99.1 Press Release: NICE to Acquire eglue, a Leading Provider of Real-Time Decisioning and Agent Guidance Solutions, Dated June 10, 2010.

NICE to Acquire eglue, a Leading Provider of Real-Time Decisioning and Agent Guidance Solutions

The eglue offering augments the NICE SmartCenter suite for optimizing Customer Dynamics, turning insights into immediate business impact with advanced real-time decisioning and guidance modules, enabling "next-best action" for contact center agents

eglue's capabilities of process automation, real-time monitoring and guidance will extend NICE's ability to address workforce efficiency, effectiveness, and compliance adherence in back office operations

Deal is expected to be accretive to NICE on a non-GAAP fully diluted EPS basis starting first quarter 2011

RA'ANANA, ISRAEL, June, 10, 2010 - NICE Systems (NASDAQ: NICE) a leading global provider of intent-based solutions that enable enterprises and security organizations to extract Insight from Interactions, transactions and surveillance to drive business performance, reduce risk and ensure safety, today announced the signing of a definitive agreement to acquire eglue, a leading provider of real-time decisioning and guidance solutions. NICE customers will benefit from the strategic expansion of the company's enterprise contact center and back office offering, enhancing and further impacting compliance adherence, operational efficiency, customer experience and sales and marketing effectiveness, enabling their organization to become more customer-centric.

Under the terms of the agreement, NICE will be acquiring the company for a total cash consideration of approximately \$29 million. The transaction price may be increased by up to an additional \$6 million, subject to certain performance criteria.

The combination of eglue's leading real-time decisioning and guidance capabilities and the NICE SmartCenter suite of intent-based business solutions will enable contact centers to harness Customer Dynamics, turning insights from cross-channel customer interactions into business impact in real time. For example, an agent servicing a customer that has previously called the contact center regarding the same issue will receive a real-time alert about the customer's sequence of prior interactions across the different communication channels (web, chat, text, etc.) and be presented with all the necessary information and steps to efficiently resolve the customer issue. Furthermore, the agent will be provided with personalized real-time guidance to leverage and act upon cross-sell or up-sell opportunities.

"A major trend that will dominate customer service strategies over the next five years is providing contact center agents a combination of business rules and business knowledge in real time," said Michael Maoz, Research Vice President at analyst and advisory firm Gartner. "The ability to impact interactions based on analysis of the most relevant customer and interaction data is key to delivering an excellent customer experience."

eglua's capabilities will also significantly extend NICE's ability to address workforce efficiency, effectiveness, and compliance adherence in back office operations.

Founded in 2001, eglue is headquartered in the US, with offices in Israel and Europe. Its solutions have been installed at dozens of customer sites worldwide, including first-tier telecom carriers, and financial services, retail, travel and utility companies.

"Joining NICE is an important and exciting step for eglue and its customers," said Omer Geva, Co-Founder and Chief Executive Officer, eglue. "Together, we'll expand our global outreach to support the evolving needs of customers in both the contact center and back office arena worldwide. Being a part of NICE will enable us to provide unmatched capabilities to our customers by addressing their most pressing business challenges."

"The joint eglue-NICE SmartCenter solutions close the loop on key business improvement processes required by enterprises worldwide, turning business insights into impact in real time. Together, we will further advance NICE's innovative Customer Dynamics strategy to improve the complex, ongoing exchange between companies and their customers, as companies strive to gain a competitive edge, retain satisfied and loyal customers, while operating in the most efficient and profitable manner," said Zeevi Bregman, President and Chief Executive Officer, NICE Systems. "We are excited about the many opportunities presented by this strategic move. With eglue's real-time decisioning and guidance offering, we augment our intent-based business solutions -- a major growth driver for NICE -- as well as extend our reach into back office operations, which today is a significant and underserved market. We expect that the addition of eglue will contribute to NICE's growth and profitability in the years to come. We look forward to having eglue's strong management and professional teams join NICE."

The transaction is subject to the satisfaction of customary closing conditions and is anticipated to close during the third quarter of 2010.

Following closing and as a result of the acquisition, NICE expects to generate additional non-GAAP revenues of several million dollars in 2010 and to be slightly dilutive on a non-GAAP earning per fully diluted share basis in each of the last two quarters of 2010. Furthermore, the acquisition is expected to become accretive on a non-GAAP earnings per fully diluted share basis in the first quarter of 2011. These estimates exclude acquisition related expenses and amortization of acquired intangible assets as well as certain business combination costs.

The outlook provided may change as the integration proceeds and acquisition accounting is finalized.

About eglue

eglua is a global provider of unique solutions that maximize the return on every customer interaction. The eglue solution impacts the bottom and top lines in the contact center by reducing operational expenses, generating new revenue and retaining customers, all in real time. eglue increases business and IT agility, and ensures a quick return on investment (ROI). Forward Looking Statements

This press release contains forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. Such forward-looking statements, including the statements by Messer. Bregman, are based on the current expectations of the management of NICE-Systems Ltd. (the Company) only, and are subject to a number of risks and uncertainties that could cause the actual results or performance of the Company to differ materially from those described herein, including but not limited to the impact of the global economic environment on the Company's customer base (particularly financial services firms) and the resulting uncertainties; changes in technology and market requirements; decline in demand for the Company's products; inability to timely develop and introduce new technologies, products and applications; difficulties or delays in absorbing and integrating acquired operations, products, technologies and personnel; loss of market share; pressure on pricing resulting from competition; and inability to maintain certain marketing and distribution arrangements. For a more detailed description of the risk factors and uncertainties affecting the company, refer to the Company's reports filed from time to time with the Securities and Exchange Commission, including the Company's Annual Report on Form 20-F. The forward-looking statements contained in this press release are made as of the date of this press release, and the Company undertakes no obligation to update or revise them, except as required by law.
