GLOSSARY OF KEY TERMS

2013 Form 10-K	Our Annual Report on Form 10-K for the year ended December 31, 2013, filed with the SEC on February 6, 2014
AFUDC	Allowance for funds used during construction, which represents the estimated cost of funds, from both debt and equity sources, used to finance the construction of major projects, capitalized in PP&E and considered rate base for ratemaking purposes
AGL Capital	AGL Capital Corporation
AGL Credit Facility	\$1.3 billion credit agreement entered into by AGL Capital to support its commercial paper program, which matures in November 2017
AGL Resources	AGL Resources Inc., together with its consolidated subsidiaries
Atlanta Gas Light	Atlanta Gas Light Company
Bcf	Billion cubic feet
Central Valley	Central Valley Gas Storage, LLC
Compass Energy	Compass Energy Services, Inc., which was sold in 2013
EBIT	Earnings before interest and taxes, the primary measure of our operating segments' profit or loss, which includes operating income and other income and excludes financing costs, including interest on debt and income tax expense
ERC	Environmental remediation costs
FASB	Financial Accounting Standards Board
Fitch	Fitch Ratings
GAAP	Accounting principles generally accepted in the United States of America
Georgia Commission	Georgia Public Service Commission, the state regulatory agency for Atlanta Gas Light
Golden Triangle	Golden Triangle Storage, Inc.
Heating Degree Days	A measure of the weather, calculated when the average daily temperatures are less than 65 degrees Fahrenheit
Heating Season	The period from November through March when natural gas usage and operating revenues are generally higher
Horizon Pipeline	Horizon Pipeline Company, LLC
Illinois Commission	Illinois Commerce Commission, the state regulatory agency for Nicor Gas
Jefferson Island	Jefferson Island Storage & Hub, LLC
LIFO	Last-in, first-out
LNG	Liquefied natural gas
LOCOM	Lower of weighted average cost or market price
Marketers	Marketers selling retail natural gas in Georgia and certificated by the Georgia Commission
MGP	Manufactured Gas Plant
Moody's	Moody's Investors Service
New Jersey BPU	New Jersey Board of Public Utilities, the state regulatory agency for Elizabethtown Gas
Nicor	Nicor Inc.
Nicor Gas	Northern Illinois Gas Company, doing business as Nicor Gas Company
Nicor Gas Credit Facility	\$700 million credit facility entered into by Nicor Gas to support its commercial paper program, which matures in December 2017
NYMEX	New York Mercantile Exchange, Inc.

OCI	Other comprehensive income
Operating margin	A non-GAAP measure of income, calculated as operating revenues minus cost of goods sold and revenue tax expense
OTC	Over-the-counter
PBR	Performance-based rate
Piedmont	Piedmont Natural Gas Company, Inc.
Pivotal Home Solutions	Nicor Energy Services Company, doing business as Pivotal Home Solutions
PP&E	Property, plant and equipment
QIP	Nicor Gas' Qualified Infrastructure Program
S&P	Standard & Poor's Ratings Services
Sawgrass Storage	Sawgrass Storage, LLC
SEC	Securities and Exchange Commission
Sequent	Sequent Energy Management, L.P.
SouthStar	SouthStar Energy Services, LLC
STRIDE	Atlanta Gas Light's Strategic Infrastructure Development and Enhancement program
Triton	Triton Container Investments, LLC
Tropical Shipping	Tropical Shipping and Construction Company Limited, and also the name used throughout this filing to describe the business operations of our former cargo shipping segment (excluding Triton), which now has been classified as discontinued operations and held for sale
U.S.	United States
VaR	Value-at-risk is the maximum potential loss in portfolio value over a specified time period that is not expected to be exceeded within a given degree of probability
VIE	Variable interest entity
Virginia Commission	Virginia State Corporation Commission, the state regulatory agency for Virginia Natural Gas
Virginia Natural Gas	Virginia Natural Gas, Inc.
WACOG	Weighted average cost of gas

AGL RESOURCES INC. AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1 - Organization and Basis of Presentation

General

AGL Resources Inc. is an energy services holding company that conducts substantially all its operations through its subsidiaries. Unless the context requires otherwise, references to “we,” “us,” “our,” the “company,” or “AGL Resources” mean consolidated AGL Resources Inc. and its subsidiaries.

The December 31, 2013 Condensed Consolidated Statement of Financial Position data was derived from our audited financial statements, but does not include all disclosures required by GAAP. We have prepared the accompanying unaudited Condensed Consolidated Financial Statements under the rules and regulations of the SEC. In accordance with such rules and regulations, we have condensed or omitted certain information and notes normally included in financial statements prepared in conformity with GAAP. Our unaudited Condensed Consolidated Financial Statements reflect all adjustments of a normal recurring nature that are, in the opinion of management, necessary for a fair presentation of our financial results for the interim periods. These unaudited Condensed Consolidated Financial Statements should be read in conjunction with our Consolidated Financial Statements and related notes included in Item 8 of our 2013 Form 10-K.

Due to the seasonal nature of our business and other factors, our results of operations and our financial condition for the periods presented are not necessarily indicative of the results of operations or financial condition to be expected for or as of any other period.

Basis of Presentation

Our unaudited Condensed Consolidated Financial Statements include our accounts, the accounts of our wholly owned subsidiaries, the accounts of our majority owned or otherwise controlled subsidiaries and the accounts of our consolidated VIE for which we are the primary beneficiary. For unconsolidated entities that we do not control, but exercise significant influence over, we use the equity method of accounting and our proportionate share of income or loss is recorded on the unaudited Condensed Consolidated Statements of Income. See Note 9 for additional information. We have eliminated intercompany profits and transactions in consolidation except for intercompany profits where recovery of such amounts is probable under the affiliates’ rate regulation process.

On April 4, 2014 we entered into a definitive agreement to sell Tropical Shipping, which historically operated within our cargo shipping segment. The assets and liabilities of these businesses are classified as held for sale on the unaudited Condensed Consolidated Statements of Financial Position, and the financial results of these businesses are reflected as discontinued operations on the unaudited Condensed Consolidated Statements of Income. Amounts shown in the following notes, unless otherwise indicated, exclude assets held for sale and discontinued operations. Cargo shipping also included our investment in Triton, which is not a part of the sale and has been reclassified into our other segment. See Note 12 for additional information.

Note 2 - Significant Accounting Policies and Methods of Application

Our accounting policies are described in Note 2 to our Consolidated Financial Statements and related notes included in Item 8 of our 2013 Form 10-K. There were no significant changes to our accounting policies during the six months ended June 30, 2014.

Use of Accounting Estimates

The preparation of our financial statements in conformity with GAAP requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and the related disclosures. Our estimates are based on historical experience and various other assumptions that we believe to be reasonable under the circumstances. Our estimates may involve complex situations requiring a high degree of judgment either in the application and interpretation of existing literature or in the development of estimates that impact our financial statements. The most significant estimates relate to our rate-regulated subsidiaries, uncollectible accounts and other allowances for contingent losses, goodwill and other intangible assets, retirement plan benefit obligations, derivative and hedging activities and provisions for income taxes. We evaluate our estimates on an ongoing basis, and our actual results could differ from our estimates.

Cash and Cash Equivalents

Our cash and cash equivalents primarily consist of cash on deposit, money market accounts and certificates of deposit held by domestic subsidiaries with original maturities of three months or less. As of June 30, 2014 and 2013, and December 31, 2013, \$15 million, \$31 million and \$24 million, respectively, of cash and short and long-term investments held by Tropical Shipping are excluded from cash and cash equivalents and are included in assets held for sale. For more information on the sale of Tropical Shipping, see Note 12.

Glossary

Table of Contents

Energy Marketing Receivables and Payables

Our wholesale services segment provides services to retail and wholesale marketers and utility and industrial customers. These customers, also known as counterparties, utilize netting agreements that enable our wholesale services segment to net receivables and payables by counterparty upon settlement. Wholesale services also nets across product lines and against cash collateral, provided the master netting and cash collateral agreements include such provisions. While the amounts due from, or owed to, wholesale services' counterparties are settled net, they are recorded on a gross basis in our unaudited Condensed Consolidated Statements of Financial Position as energy marketing receivables and energy marketing payables.

Our wholesale services segment has trade and credit contracts that contain minimum credit rating requirements. These credit rating requirements typically give counterparties the right to suspend or terminate credit if our credit ratings are downgraded to non-investment grade status. Under such circumstances, wholesale services would need to post collateral to continue transacting business with some of its counterparties. To date, our credit ratings have exceeded the minimum requirements. As of June 30, 2014 and 2013, and December 31, 2013, the collateral that wholesale services would have been required to post if our credit ratings had been downgraded to non-investment grade status would not have had a material impact to our consolidated results of operations, cash flows or financial condition. If such collateral were not posted, wholesale services' ability to continue transacting business with these counterparties would be negatively impacted.

Inventories

For our regulated utilities, except Nicor Gas, our natural gas inventories and the inventories we hold for Marketers in Georgia are carried at cost on a WACOG basis. In Georgia's competitive environment, Marketers sell natural gas to firm end-use customers at market-based prices. Part of the unbundling process, which resulted from deregulation and provides this competitive environment, is the assignment to Marketers of certain pipeline services that Atlanta Gas Light has under contract. On a monthly basis, Atlanta Gas Light assigns the majority of the pipeline storage services that it has under contract to Marketers, along with a corresponding amount of inventory. Atlanta Gas Light also retains and manages a portion of its pipeline storage assets and related natural gas inventories for system balancing and to serve system demand. See Note 10 for information regarding a regulatory filing by Atlanta Gas Light related to natural gas inventory.

Nicor Gas' inventory is carried at cost on a LIFO basis. Inventory decrements occurring during interim periods that are expected to be restored prior to year-end are charged to cost of goods sold at the estimated annual replacement cost, and the difference between this cost and the actual liquidated LIFO layer cost is recorded as a temporary LIFO inventory liquidation. Any temporary LIFO liquidation is included as a current liability in our unaudited Condensed Consolidated Statements of Financial Position. Interim inventory decrements that are not expected to be restored prior to year-end are charged to cost of goods sold at the actual LIFO cost of the layers liquidated. The inventory decrement as of June 30, 2014 is expected to be restored prior to year-end. The inventory decrement as of June 30, 2013 was restored prior to December 31, 2013.

Our retail operations, wholesale services and midstream operations segments carry inventory at the lower of cost or market value, where cost is determined on a WACOG basis. For these segments, we evaluate the weighted average cost of their natural gas inventories against market prices to determine whether any declines in market prices below the WACOG are other than temporary. For any declines considered to be other than temporary, we record adjustments to reduce the weighted average cost of the natural gas inventory to market value. For the three and six months ended June 30, 2014, we recorded \$4 million and \$6 million, respectively, total LOCOM adjustment to reduce the value of our inventories to market value and \$8 million for the three and six months ended June 30, 2013.

Midstream operations' primary activity is operating non-utility storage and pipeline facilities. Mechanical integrity tests and engineering studies are periodically performed on these storage facilities in accordance with certain state regulatory requirements. However, such tests may be performed in advance of such state requirements for operational purposes. During the first half of 2014, an engineering study and mechanical integrity tests were performed at one of our storage facilities, identifying a lower amount of working gas capacity that is the result of naturally occurring shrinkage of the storage caverns. Further, based on the lower capacity and an analysis of the volume of natural gas stored in the facility, we recorded additional gas costs to true-up the amount of retained fuel at this facility in the amount of \$2 million and \$9 million for the three and six months ended June 30, 2014, respectively.

Fair Value Measurements

We have financial and nonfinancial assets and liabilities subject to fair value measurement. The financial assets and liabilities measured and carried at fair value include cash and cash equivalents, and derivative assets and liabilities. The carrying values of receivables, short- and long-term investments, accounts payable, short-term debt, other current assets and liabilities, and accrued interest approximate fair value. Our nonfinancial assets and liabilities include pension and other retirement benefits, which are presented in Note 4 to our Consolidated Financial Statements and in related notes included in Item 8 of our 2013 Form 10-K.

Glossary

Table of Contents

As defined in the authoritative guidance related to fair value measurements and disclosures, fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). We utilize market data or assumptions that market participants would use in valuing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated or generally unobservable. We primarily apply the market approach for recurring fair value measurements to utilize the best available information. Accordingly, we use valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. We classify fair value balances based on the observance of those inputs in accordance with the fair value hierarchy.

Derivative Instruments

The fair value of the natural gas and weather derivative instruments that we use to manage exposures arising from changing natural gas prices and weather risk reflects the estimated amounts that we would receive or pay to terminate or close the contracts at the reporting date, taking into account the current unrealized gains or losses on open contracts. We use external market quotes and indices to value substantially all of our derivative instruments. See Note 4 and Note 5 for additional derivative disclosures.

Goodwill

During the first quarter of 2014, we completed an engineering study at our midstream operations storage facilities that indicated a reduced forecast of working gas capacity from what was projected when our 2013 annual goodwill impairment analysis was performed during the fourth quarter of 2013. Given that the 2013 annual goodwill impairment test indicated that the estimated fair value of this reporting unit exceeded its carrying amount by less than 5%, we considered this reduced storage capacity as an indicator of potential impairment and, accordingly, conducted an interim goodwill impairment analysis during the first quarter of 2014.

The estimated fair value of this reporting unit was determined utilizing the income approach, which estimated the fair value based upon the present value of estimated future cash flows. The forecasts used in the income approach, which were updated during the first quarter of 2014 to reflect the contracting activity that occurred during the quarter, assume discrete period revenue growth through fiscal 2022 to reflect the recovery of subscription rates, stabilization of earnings and establishment of a reasonable base year that was used to estimate the terminal value in the valuation model. Consistent with our 2013 annual goodwill impairment testing, we assumed a long-term earnings growth rate in the terminal year of 2.5%, which we believe is appropriate given the current economic and industry specific expectations. As of the valuation date, we utilized a discount rate of 7.0%, which we believe is appropriate as it reflects the relative risk and the time value of money, and is consistent with the peer group of this reporting unit as well as the discount rates that were utilized in our 2013 annual goodwill impairment tests.

Our interim goodwill impairment test, which utilized cash flow forecasts providing for growth over the next eight years, indicated that the estimated fair value of this reporting unit continues to exceed its carrying amount with a cushion of less than 10%. However, continued declines in capacity or subscription rates, reductions to our cash flow forecasts, a sustained period at the current subscription rates or other changes to the assumptions and factors used in this analysis may result in a future failure of step one of the goodwill impairment test and require us to proceed to step two of the goodwill impairment test in a future period.

The risk of impairment of the underlying long-lived assets is not estimated to be significant as the assets have long remaining useful lives, and authoritative guidance requires such assets to be tested for impairment on the basis of undiscounted cash flows over their remaining useful lives. We will continue to monitor this reporting unit for potential impairment. Changes in the amount of goodwill for the six months ended June 30, 2014 and 2013 are provided in the following table.

Edgar Filing: AGL RESOURCES INC - Form 10-Q

In millions	Distribution Operations	Retail Operations	Midstream Operations	Consolidated (1)
Goodwill - December 31, 2012	\$1,640	\$122	\$14	\$ 1,776
2013 activity	-	46	-	46
Goodwill - June 30, 2013	\$1,640	\$168	\$14	\$ 1,822
Goodwill - December 31, 2013	\$1,640	\$173	\$14	\$ 1,827
Goodwill - June 30, 2014	\$1,640	\$173	\$14	\$ 1,827

(1) Excludes goodwill at Tropical Shipping now classified as held for sale. See Note 12 for additional information.

Other, net	-	2	-	1
Total other income	\$2	\$7	\$5	\$12

Earnings Per Common Share

We compute basic earnings per common share attributable to AGL Resources Inc. common shareholders by dividing our net income attributable to AGL Resources Inc. by the daily weighted average number of common shares outstanding. Diluted earnings per common share attributable to AGL Resources Inc. common shareholders reflect the potential reduction in earnings per common share attributable to AGL Resources Inc. common shareholders that occurs when potentially dilutive common shares are added to common shares outstanding.

We derive our potentially dilutive common shares by calculating the number of shares issuable under restricted stock, restricted stock units and stock options. The vesting of certain shares of the restricted stock and restricted stock units depends on the satisfaction of defined performance and/or time-based criteria. The future issuance of shares underlying the outstanding stock options depends on whether the market price of the common shares underlying the options exceeds the respective exercise prices of the stock options.

The following table shows the calculation of our diluted shares attributable to AGL Resources Inc. common shareholders for the periods presented, as if performance units currently earned under the plan ultimately vest and as if stock options currently exercisable at prices below the average market prices are exercised.

In millions (except per share amounts)	Three months ended June		Six months ended June	
	2014	2013	2014	2013
Income from continuing operations	\$63	\$50	\$403	\$203

Diluted earnings per common share attributable to AGL Resources Inc. common shareholders	\$0.54	\$0.41	\$2.97	\$1.72		

(1) Daily weighted average shares outstanding.

Accounting Developments

On April 10, 2014, the FASB issued authoritative guidance related to reporting discontinued operations. The guidance generally raises the threshold for disposals to qualify as discontinued operations and requires new disclosures of both discontinued operations and certain other material disposals that do not meet the definition of a discontinued operation. The guidance will be effective for us prospectively beginning January 1, 2015. It is not expected to have a material impact on our consolidated financial statements, and it will have no impact on our accounting for the sale of Tropical Shipping.

On May 28, 2014, the FASB issued an update to authoritative guidance related to revenue from contracts with customers. The update replaces most of the existing guidance with a single set of principles for recognizing revenue from contracts with customers. The guidance will be effective for us beginning January 1, 2017. Early adoption is not permitted. The new guidance must be applied retrospectively to each prior period presented or via a cumulative effect upon the date of initial application. We have not yet determined the impact of this new guidance, nor have we selected a transition method.

On June 19, 2014, the FASB issued an update to authoritative guidance related to accounting for share-based payments when the terms of an award provide that a performance target could be achieved after the requisite service period. The guidance will be effective for us beginning January 1, 2016 and it is not expected to have a material impact on our consolidated financial statements.

Table of Contents

Note 3 - Regulated Operations

We account for the financial effects of regulation in accordance with authoritative guidance related to regulated entities whose rates are designed to recover the costs of providing service. In accordance with this guidance, incurred costs and estimated future expenditures that would otherwise be charged to expense in the current period are capitalized as regulatory assets when it is probable that such costs or expenditures will be recovered in rates in the future. Similarly, we recognize regulatory liabilities when it is probable that regulators will require customer refunds through future rates or when revenue is collected from customers for estimated expenditures that have not yet been incurred. Generally, regulatory assets are amortized into expense, and regulatory liabilities are amortized into income over the period authorized by the regulatory commissions. The following table summarizes our regulatory assets and liabilities as of the dates presented. In addition, see Note 13 for a subsequent event that impacts our regulatory assets.

In millions	June 30, 2014	December 31, 2013	June 30, 2013
Regulatory assets			
Deferred natural gas costs	\$ 79	\$ 1	\$ -
Recoverable regulatory infrastructure program costs	47	48	46
Recoverable ERC	33	45	27
Recoverable pension and retiree welfare benefit costs	9	9	19
Other	43	59	28
Total regulatory assets - current	211	162	120
Recoverable ERC	454	433	458
Recoverable regulatory infrastructure program costs	107	87	116
Recoverable pension and retiree welfare benefit costs	94	99	188
Long-term debt fair value adjustment	78	82	86
Other	42	36	50
Total regulatory assets - long-term	775	737	898
Total regulatory assets	\$ 986	\$ 899	\$ 1,018
Regulatory liabilities			
Accrued natural gas costs	\$ 41	\$ 92	\$ 130
Bad debt over collection	39	41	39
Accumulated removal costs	27	27	17
Deferred seasonal rates	8	-	8
Other	34	23	22
Total regulatory liabilities - current	149	183	216
Accumulated removal costs	1,478	1,445	1,431
Regulatory income tax liability	27	27	26
Unamortized investment tax credit	24	26	27
Bad debt over collection	9	17	20
Other	27	3	6
Total regulatory liabilities - long-term	1,565	1,518	1,510
Total regulatory liabilities	\$ 1,714	\$ 1,701	\$ 1,726

Base rates are designed to provide the opportunity for both a recovery of cost and a return on investment during the period rates are in effect. As such, all of our regulatory assets recoverable through base rates are subject to review by the respective state regulatory commission during future rate proceedings. We believe that we will be able to recover such costs consistent with our historical recoveries.

Natural Gas Costs We charge our utility customers for natural gas consumed using natural gas cost recovery mechanisms set by the state regulatory agencies. Under these mechanisms, all prudently incurred natural gas costs are

passed through to customers without markup, subject to regulatory review. We defer or accrue the difference between the actual cost of gas and the amount of commodity revenue earned in a given period, such that no operating margin is recognized related to these costs. The deferred or accrued amount is either billed or refunded to our customers prospectively through adjustments to the commodity rate. Deferred natural gas costs are reflected as regulatory assets and accrued natural gas costs are reflected as regulatory liabilities. The following table illustrates the change in net position of these costs from June 30, 2013 to June 30, 2014.

In millions	June 30, 2014	June 30, 2013	Change
Deferred natural gas costs	\$79	\$-	\$79
Accrued natural gas costs	(41)	(130)	89
Total (1)	\$38	\$(130)	\$168

(1) The \$168 million change resulted from increased natural gas prices during the first half of 2014 compared to the first half of 2013, primarily driven by colder weather experienced in 2014. These costs will be fully recovered in future periods.

Environmental Remediation Costs We are subject to federal, state and local laws and regulations governing environmental quality and pollution control that require us to remove or remedy the effect on the environment of the disposal or release of specified substances at our current and former operating sites, substantially all of which is related to our MGP sites. The ERC assets and liabilities are associated with our distribution operations segment and remediation costs are generally recoverable from customers through rate mechanisms approved by regulators. Accordingly, both costs incurred to remediate the former MGP sites, plus the future estimated cost recorded as liabilities, net of amounts previously collected, are recognized as a regulatory asset until recovered from customers.

Glossary

Table of Contents

Our ERC liabilities are estimates of future remediation costs for investigation and cleanup of our current and former operating sites that are contaminated. These estimates are based on conventional engineering estimates and the use of probabilistic models of potential costs when such estimates cannot be made, on an undiscounted basis. As cleanup options and plans mature and cleanup contracts are entered into, we are increasingly able to provide conventional engineering estimates of the likely costs of many elements of the remediation program. These estimates contain various engineering assumptions, which we refine and update on an ongoing basis. These liabilities do not include other potential expenses, such as unasserted property damage claims, personal injury or natural resource damage claims, legal expenses or other costs for which we may be held liable but for which we cannot reasonably estimate an amount. The following table provides additional information on the costs related to remediation of our current and former operating sites as of June 30, 2014 and reflects changes in estimates since we filed our 2013 Form 10-K.

In millions	Probabilistic model cost estimates	Engineering estimates	Amount recorded	Expected costs over next 12 months
Illinois	\$ 205 - 462	\$ 46	\$ 251	\$ 37
New Jersey	126 - 196	3	129	32
Georgia and Florida	66 - 106	9	78	14
North Carolina (1)	n/a	11	11	7
Total	\$ 397 - 764	\$ 69	\$ 469	(2) \$ 90

(1) We have no regulatory recovery mechanisms for the site in North Carolina. Therefore, this amount is not included in our regulatory assets and changes in estimated costs are recognized in income in the period of change.

(2) Increase of \$22 million from December 31, 2013 primarily relates to a scope increase required by the Georgia Environmental Protection Division for a site in Georgia and an adjustment for a site in Florida. This was partially offset by a decrease for a site in New Jersey where remediation is almost complete.

Note 4 - Fair Value Measurements

The methods used to determine the fair values of our assets and liabilities are described within Note 2.

Derivative Instruments

The following table summarizes, by level within the fair value hierarchy, our derivative assets and liabilities that were carried at fair value on a recurring basis in our unaudited Consolidated Statements of Financial Position as of the dates presented. See Note 5 for additional derivative instrument information.

In millions	June 30, 2014		December 31, 2013		June 30, 2013	
	Assets (1)	Liabilities	Assets (1)	Liabilities	Assets (1)	Liabilities
Natural gas derivatives						
Quoted prices in active markets						
(Level 1)	\$8	\$(38)	\$6	\$(79)	\$4	\$(51)
Significant other observable						
inputs (Level 2)	57	(60)	67	(79)	78	(35)
Netting of cash collateral	46	36	43	78	47	47
Total carrying value (2) (3)	\$111	\$(62)	\$116	\$(80)	\$129	\$(39)

(1) Balances of \$3 million at June 30, 2014, \$3 million at December 31, 2013 and \$1 million at June 30, 2013 associated with certain weather derivatives have been excluded, as they are accounted for based on intrinsic value rather than fair value.

(2) There were no significant unobservable inputs (Level 3) for any of the dates presented.

(3) There were no significant transfers between Level 1, Level 2 or Level 3 for any of the dates presented.

Debt

Our long-term debt is recorded at amortized cost, with the exception of Nicor Gas' first mortgage bonds, which are recorded at their acquisition date fair value. The fair value adjustment of Nicor Gas' first mortgage bonds is being amortized over the lives of the bonds. The following table lists the carrying amount and fair value of our long-term debt as of the dates presented.

In millions	June 30, 2014	December 31, 2013	June 30, 2013
Long-term debt carrying amount	\$ 3,807	\$ 3,813	\$ 3,819
Long-term debt fair value (1)	4,191	3,956	4,070
(1)	Fair value determined using Level 2 inputs.

Table of Contents

Note 5 - Derivative Instruments

A description of our objectives and strategies for using derivative instruments, related accounting policies and methods used to determine their fair values are described in Note 2 to our Consolidated Financial Statements and related notes included in Item 8 of our 2013 Form 10-K. See Note 4 for additional fair value disclosures.

Certain of our derivative instruments contain credit risk-related or other contingent features that could require us to post collateral in the normal course of business when our financial instruments are in net liability positions. As of June 30, 2014, for agreements with such features, derivative instruments with liability fair values for which we had posted no collateral to our counterparties totaled \$62 million. The maximum collateral that could be required with these features is \$11 million. For more information, see “Energy Marketing Receivables and Payables” in Note 2, which also have credit risk-related or other contingent features. Our derivative instrument activities are included within operating cash flows as an adjustment to net income of \$(13) million and \$14 million for the six months ended June 30, 2014 and 2013, respectively. See Note 4 for additional derivative instrument information. The following table summarizes the various ways in which we account for our derivative instruments and the impact on our unaudited Condensed Consolidated Financial Statements.

Accounting Treatment	Recognition and Measurement	
	Statements of Financial Position	Statements of Income
Cash flow hedge	Derivative carried at fair value	Ineffective portion of the gain or loss on the derivative instrument is recognized in earnings
	Effective portion of the gain or loss on the derivative instrument is reported initially as a component of accumulated OCI (loss)	Effective portion of the gain or loss on the derivative instrument is reclassified out of accumulated OCI (loss) and into earnings when the hedged transaction affects earnings
Fair value hedge	Derivative carried at fair value	Gains or losses on the derivative instrument and the hedged item are recognized in earnings. As a result, to the extent the hedge is effective, the gains or losses will offset and there is no impact on earnings. Any hedge ineffectiveness will impact earnings
	Changes in fair value of the hedged item are recorded as adjustments to the carrying amount of the hedged item	
Not designated as hedges	Derivative carried at fair value	Realized and unrealized gains or losses on the derivative instrument are recognized in earnings
	Distribution operations’ gains and losses on derivative instruments are deferred as regulatory assets or liabilities until included in cost of goods sold	Gains or losses on these derivative instruments are ultimately included in billings to customers and are recognized in cost of goods sold in the same period as the related revenues

Quantitative Disclosures Related to Derivative Instruments

As of the dates presented, our derivative instruments were comprised of both long and short natural gas positions. A long position is a contract to purchase natural gas, and a short position is a contract to sell natural gas. We had a net long natural gas contracts position outstanding in the following quantities:

In Bcf (1)	December 31,		
	June 30, 2014 (2)	2013	June 30, 2013
Cash flow hedges	6	6	3

Edgar Filing: AGL RESOURCES INC - Form 10-Q

Not designated as hedges	140	183	221
Total volumes	146	189	224
Short position	(2,530)	(2,622)	(2,311)
Long position	2,676	2,811	2,535
Net long position	146	189	224

- (1) Volumes related to Nicor Gas exclude variable-priced contracts, which are carried at fair value, but whose fair values are not directly impacted by changes in commodity prices.
- (2) Approximately 98% of these contracts have durations of 2 years or less and the remaining 2% expire between 2 and 5 years.

Derivative Instruments in our Unaudited Condensed Consolidated Statements of Financial Position

In accordance with regulatory requirements, gains and losses on derivative instruments used to hedge natural gas purchases for customer use at distribution operations are reflected in accrued natural gas costs within our Consolidated Statements of Financial Position until billed to customers. The following amounts deferred as a regulatory asset or liability on our Condensed Consolidated Statements of Financial Position represent the net realized gains (losses) related to these natural gas cost hedges for the periods presented.

In millions	Three months ended June 30,		Six months ended June 30,	
	2014	2013	2014	2013
Nicor Gas	\$10	\$9	\$12	\$8
Elizabethtown Gas	2	(1)	5	(4)

Glossary

Table of Contents

The following table presents the fair values and unaudited Condensed Consolidated Statements of Financial Position classifications of our derivative instruments as of the dates presented.

In millions	Classification	June 30, 2014		December 31, 2013		June 30, 2013	
		Assets	Liabilities	Assets	Liabilities	Assets	Liabilities
Designated as cash flow or fair value hedges							
Natural gas contracts	Current	\$ 2	\$ (1)	\$ 3	\$ (1)	\$ 2	\$ (1)
Not designated as hedges							
Natural gas contracts	Current	702	(721)	691	(761)	456	(445)
Natural gas contracts	Long-term	77	(89)	206	(220)	124	(139)
Total		779	(810)	897	(981)	580	(584)
Gross amount of recognized assets and liabilities (1) (2)		781	(811)	900	(982)	582	(585)
Gross amounts offset in our unaudited Condensed Consolidated Statements of Financial Position (2)		(667)	749	(781)	902	(452)	546
Net amounts of assets and liabilities presented in our unaudited Condensed Consolidated Statements of Financial Position (3)		\$ 114	\$ (62)	\$ 119	\$ (80)	\$ 130	\$ (39)

- (1) The gross amounts of recognized assets and liabilities are netted within our unaudited Condensed Consolidated Statements of Financial Position to the extent that we have netting arrangements with the counterparties.
- (2) As required by the authoritative guidance related to derivatives and hedging, the gross amounts of recognized assets and liabilities above do not include cash collateral held on deposit in broker margin accounts of \$82 million as of June 30, 2014, \$121 million as of December 31, 2013 and \$94 million as of June 30, 2013. Cash collateral is included in the "Gross amounts offset in our unaudited Condensed Consolidated Statements of Financial Position" line of this table.
- (3) At June 30, 2014, December 31, 2013 and June 30, 2013 we held letters of credit from counterparties that would offset, under master netting arrangements, an insignificant portion of these assets.

Derivative Instruments in the Unaudited Condensed Consolidated Statements of Income

The following table presents the impacts of our derivative instruments in our unaudited Condensed Consolidated Statements of Income for the periods presented.

In millions	Three months ended June		Six months ended June	
	2014	2013	2014	2013
Designated as cash flow or fair value hedges				
Natural gas contracts - net gain reclassified from OCI into cost of goods sold	\$2	\$1	\$5	\$1
	-	-	1	-

Natural gas contracts - net gain reclassified from OCI into operation and maintenance expense

Interest rate swaps - net loss reclassified from OCI into interest expense	-	-	-	(3)
Income tax benefit	(1)	-	(1)	1
Net of tax	1	1	5	(1)

Not designated as hedges (1)

Natural gas contracts - net fair value adjustments recorded in operating revenues	30	22	-	(2)
Natural gas contracts - net fair value adjustments recorded in cost of goods sold (2)	(1)	(1)	1	(1)
Income tax benefit	(11)	(8)	-	1
Net of tax	18	13	1	(2)
Total gains (losses) on derivative instruments	\$19	\$14	\$6	\$(3)

(1) Associated with the fair value of derivative instruments held at June 30, 2014 and 2013.

(2) Excludes losses recorded in cost of goods sold associated with weather derivatives of \$6 million and \$3 million for the six months ended June 30, 2014 and 2013, respectively.

Any amounts recognized in operating income, related to ineffectiveness or due to a forecasted transaction that is no longer expected to occur, were immaterial for the three and six months ended June 30, 2014 and 2013. Our expected gains to be reclassified from OCI into cost of goods sold, operation and maintenance expense, interest expense and operating revenues and recognized in our unaudited Condensed Consolidated Statements of Income over the next 12 months are \$1 million. These deferred gains and losses are related to natural gas derivative contracts associated with retail operations and Nicor Gas' system use. The expected gains are based upon the fair values of these financial instruments at June 30, 2014. The effective portion of gains and losses on derivative instruments qualifying as cash flow hedges that was recognized in OCI during the periods is presented on our Condensed Consolidated Statements of income. See Note 8 for these amounts.

There have been no other significant changes to our derivative instruments, as described in Note 2, Note 4 and Note 5 to our Consolidated Financial Statements and related notes included in Item 8 of our 2013 Form 10-K.

Note 7 - Debt and Credit Facilities

The following table provides maturity dates, year-to-date weighted average interest rates and amounts outstanding for our various debt securities and facilities for the periods presented. We fully and unconditionally guarantee all debt issued by AGL Capital. For additional information on our debt, see Note 8 in our Consolidated Financial Statements and related notes in Item 8 of our 2013 Form 10-K.

Dollars in millions	Year(s) due	June 30, 2014			Outstanding at December 31, 2013	June 30, 2013		
		Weighted average interest rate (1)		Outstanding		Weighted average interest rate (1)	Outstanding

Unamortized debt premium, net	n/a	n/a		16	16	n/a		16
Total non-principal long-term debt		n/a		101	107	n/a		113
Total long-term debt				\$ 3,607	\$ 3,813			\$ 3,819
Total debt				\$ 4,255	\$ 4,984			\$ 4,340

(1) Interest rates are calculated based on the daily weighted average balance outstanding for the six months ended June 30.

(2) As of June 30, 2014, the effective interest rates on our commercial paper borrowings were 0.3% for AGL Capital and 0.2% for Nicor Gas.

(3) See Note 4 for additional information on our fair value measurements.

Commercial Paper Programs

We maintain commercial paper programs at AGL Capital and Nicor Gas that consist of short-term, unsecured promissory notes used in conjunction with cash from operations to fund our seasonal working capital requirements. Working capital needs fluctuate during the year and are highest during the injection period in advance of the Heating

Season. The Nicor Gas commercial paper program supports working capital needs at Nicor Gas, while all of our other subsidiaries and SouthStar participate in the AGL Capital commercial paper program. During the first six months of 2014, our commercial paper maturities ranged from 1 to 108 days, and at June 30, 2014, remaining terms to maturity ranged from 1 to 10 days. Total borrowings and repayments netted to a payment of \$723 million during the first six months of 2014. For commercial paper issuances with original maturities over three months, borrowings and repayments were \$50 million and \$145 million, respectively, during the first six months of 2014.

Financial and Non-Financial Covenants

The AGL Credit Facility and the Nicor Gas Credit Facility each include a financial covenant that requires us to maintain a ratio of total debt to total capitalization of no more than 70% at the end of any fiscal month. These ratios, as calculated in accordance with the debt covenants, include standby letters of credit and surety bonds and exclude accumulated OCI items related to non-cash pension adjustments, welfare benefits liability adjustments and accounting adjustments for cash flow hedges. Adjusting for these items, the following table contains our debt-to-capitalization ratios for the dates presented, which are below the maximum allowed.

	June 30, 2014		December 31, 2013		June 30, 2013	
AGL Credit Facility	51	%	57	%	54	%
Nicor Gas Credit Facility	52	%	55	%	43	%

The credit facilities contain certain non-financial covenants that, among other things, restrict liens and encumbrances, loans and investments, acquisitions, dividends and other restricted payments, asset dispositions, mergers and consolidations and other matters customarily restricted in such agreements.

Default Provisions

Our credit facilities and other financial obligations include provisions that, if not complied with, could require early payment or similar actions. The most important default events include the following:

- a maximum leverage ratio
- insolvency events and nonpayment of scheduled principal or interest payments
 - acceleration of other financial obligations
 - change of control provisions

Glossary

Table of Contents

We have no triggering events in our debt instruments that are tied to changes in our specified credit ratings or our stock price, and have not entered into any transaction that requires us to issue equity based on credit ratings or other triggering events. We were in compliance with all existing debt provisions and covenants, both financial and non-financial, for all periods presented.

Note 8 - Equity

Our OCI amounts are aggregated within our accumulated other comprehensive loss. The following table provides changes in the components of our accumulated other comprehensive loss balance, net of the related income tax effects.

In millions (1)	Cash flow hedges	2014 Retirement benefit plans	Total	Cash flow hedges	2013 Retirement benefit plans	Total
For the three months ended June 30						
As of beginning of period	\$1	\$(136)	\$(135)	\$1	\$(212)	\$(211)
OCI, before reclassifications	-	-	-	(1)	-	(1)

Note 9 - Non-Wholly Owned Entities

Variable Interest Entities

SouthStar, a joint venture owned by us and Piedmont, is our only significant VIE for which we are the primary beneficiary, which requires us to consolidate its assets, liabilities and statements of income. For additional information on SouthStar, see Note 10 to our Consolidated Financial Statements and related notes included in Item 8 of our 2013 Form 10-K. Earnings from SouthStar in 2014 and 2013 were allocated entirely in accordance with the ownership interests.

Cash flows used in our investing activities include capital expenditures for SouthStar of \$4 million for the six months ended June 30, 2014 and \$1 million for the six months ended June 30, 2013. Cash flows used in our financing activities include SouthStar's distribution to Piedmont for its portion of SouthStar's annual earnings from the previous year. Generally, this distribution occurs in the first quarter of each fiscal year. For each of the six months ended June 30, 2014 and 2013, SouthStar distributed \$17 million to Piedmont. The following table provides additional information about SouthStar's assets and liabilities as of the dates presented, which are consolidated within our unaudited Condensed Consolidated Statements of Financial Position.

In millions	June 30, 2014			December 31, 2013			June 30, 2013		
	Consolidated	SouthStar (1)	% (2)	Consolidated	SouthStar (1)	% (2)	Consolidated	SouthStar (1)	% (2)
Current assets	\$ 2,431	\$ 250	10 %	\$ 2,945	\$ 264	9 %	\$ 2,277	\$ 135	6 %
Goodwill and intangible assets	1,974	137	7	1,981	139	7	1,986	-	-
Long-term assets and other deferred debits	9,897	21	-	9,730	12	-	9,532	10	-
Total assets	\$ 14,302	\$ 408	3 %	\$ 14,656	\$ 415	3 %	\$ 13,795	\$ 145	1 %
Current liabilities	\$ 2,596	\$ 124	5 %	\$ 3,123	\$ 95	3 %	\$ 2,349	\$ 40	2 %
Long-term liabilities and other deferred credits	7,772	16	-	7,857	-	-	7,891	-	-
Total Liabilities	10,368	140	1	10,980	95	1	10,240	40	-
Equity	3,934	268	7	3,676	320	9	3,555	105	3 %
Total liabilities and equity	\$ 14,302	\$ 408	3 %	\$ 14,656	\$ 415	3 %	\$ 13,795	\$ 145	1 %

(1) These amounts reflect information for SouthStar and exclude intercompany eliminations and the balances of our wholly owned subsidiary with an 85% ownership interest in SouthStar.

(2) SouthStar's percentage of the amount on our Statements of Financial Position.

The following table provides information on SouthStar's operating revenues and operating expenses for the periods presented, which are consolidated within our unaudited Condensed Consolidated Statements of Income.

In millions	Three months ended June 30,		Six months ended June 30,	
	2014	2013	2014	2013

Edgar Filing: AGL RESOURCES INC - Form 10-Q

Operating revenues	\$145	\$116	\$519	\$366

Taxes other than income taxes	1	1	1	1
Total operating expenses	134	111	430	294
Operating income	\$11	\$5	\$89	\$72

Equity Method Investments

Income from our equity method investments is classified as other income in our unaudited Condensed Consolidated Statements of Income. For more information about our equity method investments, see Note 10 to our Consolidated Financial Statements and related notes in Item 8 of our 2013 Form 10-K. The carrying amounts of our investments that are accounted for under the equity method at June 30 were as follows:

In millions	2014	2013
Triton	\$65	\$71
Horizon Pipeline	15	16
Other (1)	1	9
Total	\$81	\$96

(1) Includes our investment in Sawgrass Storage. In December 2013, the joint venture decided to terminate the development of the Sawgrass Storage facility and reduced the carrying amount of the joint venture's long-lived assets to fair value.

Note 10 - Commitments, Guarantees and Contingencies

We have incurred various contractual obligations and financial commitments in the normal course of our operating and financing activities that are reasonably likely to have a material effect on liquidity or the availability of capital resources. Contractual obligations include future cash payments required under existing contractual arrangements, such as debt and lease agreements. These obligations may result from both general financing activities and from commercial arrangements that are directly supported by related revenue-producing activities.

We also are involved in legal or administrative proceedings before various courts and agencies with respect to general claims, taxes, environmental, gas cost prudence reviews and other matters. Although we are unable to determine the ultimate outcomes of these other contingencies, we believe that our financial statements appropriately reflect these amounts, including the recording of liabilities when a loss is probable and reasonably estimable. For more information on these matters, see Note 11 in our Consolidated Financial Statements and related notes in Item 8 of our 2013 Form 10-K.

Contingencies and Guarantees

Contingent financial commitments, such as financial guarantees, represent obligations that become payable only if certain predefined events occur. We have certain subsidiaries that enter into various financial and performance guarantees and indemnities providing assurance to third parties. We believe the likelihood of payment under our guarantees is remote. No liability has been recorded for such guarantees and indemnifications as the fair value was inconsequential at inception.

Regulatory Matters

On December 21, 2012 Atlanta Gas Light filed a petition with the Georgia Commission for approval to resolve an imbalance of approximately 4.8 Bcf of natural gas related to Atlanta Gas Light's use of retained storage assets to operationally balance the system for the benefit of the natural gas market. We believe that any costs associated with resolving the imbalance are recoverable from Marketers. We are currently working with the Marketers to settle this matter, and the resolution of this imbalance will ultimately be decided by the Georgia Commission. We are currently unable to predict the ultimate outcome.

Environmental Matters

We are subject to federal, state and local laws and regulations governing environmental quality and pollution control that require us to remove or remedy the effect on the environment of the disposal or release of specified substances at our current and former operating sites. See Note 3 for additional information.

Litigation

We are involved in litigation arising in the normal course of business. Although in some cases the company is unable to estimate the amount of loss reasonably possible in addition to any amounts already recognized, it is possible that the resolution of these contingencies, either individually or in aggregate, will require us to take charges against, or will result in reductions in, future earnings. Management believes that while the resolution of these contingencies, whether individually or in aggregate, could be material to earnings in a particular period, they will not have a material adverse effect on our consolidated financial position or cash flows. For additional litigation information, see Note 11 in our Consolidated Financial Statements and related notes in Item 8 of our 2013 Form 10-K.

PBR Proceeding Nicor Gas' PBR plan was a regulatory plan that provided economic incentives based on natural gas cost performance. The PBR plan went into effect in 2000 and was terminated effective January 1, 2003, following allegations that Nicor Gas acted improperly in connection with the plan. Under this plan, Nicor Gas' total gas supply costs were compared to a market-sensitive benchmark. Savings and losses relative to the benchmark were determined annually and shared equally with sales customers. Since 2002 the amount of the savings and losses required to be shared has been disputed by the Citizens Utility Board (CUB) and others, with the Illinois Attorney General (IAG) intervening, and subject to extensive contested discovery and other regulatory proceedings before administrative law judges and the Illinois Commission. In 2009 the staff of the Illinois Commission, IAG and CUB requested refunds of \$85 million, \$255 million and \$305 million, respectively.

In February 2012 we committed to a stipulation with the staff of the Illinois Commission for a resolution of the dispute through the crediting to Nicor Gas customers of \$64 million. On November 5, 2012 the Administrative Law Judges issued a proposed order for a refund of \$72 million to ratepayers. In the fourth quarter of 2012, we increased our accrual for this dispute by \$8 million for a total of \$72 million as a result of these developments and their effect on the estimated liability.

Glossary

Table of Contents

On June 7, 2013 the Illinois Commission issued an order requiring us to refund \$72 million to current Nicor Gas customers over a 12-month period. On July 1, 2013 we began refunding customers the full \$72 million through our purchased gas adjustment mechanism based on natural gas throughput. As of June 30, 2014 the full amount has been refunded, with \$43 million having been paid during the six months ended June 30, 2014.

CUB appealed the Illinois Commission's order to the appellate court in Illinois. On February 28, 2014 CUB filed its initial brief with the appellate court requesting refunds consistent with its 2009 request. Nicor Gas filed its reply on July 25, 2014.

Note 11 - Segment Information

Our operating segments comprise revenue-generating components of our company for which we produce separate financial information internally that is regularly used to make operating decisions and assess performance. Our determination of reportable segments considers the strategic operating units under which we manage sales of various products and services to customers in differing regulatory environments. We manage our businesses through four operating segments - distribution operations, retail operations, wholesale services and midstream operations - and other, a non-operating segment.

On April 4, 2014 we entered into a definitive agreement to sell Tropical Shipping, which historically operated within our cargo shipping segment. The assets and liabilities of these businesses are classified as held for sale on the unaudited Condensed Consolidated Statements of Financial Position, and the financial results of these businesses are reflected as discontinued operations on the unaudited Condensed Consolidated Statements of Income. Amounts shown in this note, unless otherwise indicated, exclude assets held for sale and discontinued operations. Cargo shipping also included our investment in Triton, which is not a part of the sale and has been reclassified into our other segment. See Note 12 for additional information.

Our distribution operations segment is the largest component of our business and includes natural gas local distribution utilities in seven states. These utilities construct, manage and maintain intrastate natural gas pipelines and distribution facilities. Although the operations of our distribution operations segment are geographically dispersed, the operating subsidiaries within the distribution operations segment are all regulated utilities, with rates determined by individual state regulatory commissions. These natural gas distribution utilities have similar economic and risk characteristics.

We also are involved in several related and complementary businesses. Our retail operations segment includes retail natural gas marketing to end-use customers primarily in Georgia and Illinois. Additionally, retail operations provide home protection products and services. Our wholesale services segment engages in natural gas storage and gas pipeline arbitrage and related activities. Additionally, they provide natural gas asset management and/or related logistics services for each of our utilities except Nicor Gas, as well as for nonaffiliated companies. Our midstream operations segment includes our non-utility storage and pipeline operations, including the operation of high-deliverability natural gas storage assets. Our other segment includes intercompany eliminations and aggregated subsidiaries that are individually not significant on a stand-alone basis and that do not fit into one of our operating segments.

The chief operating decision maker of the company is the Chairman, President and Chief Executive Officer who utilizes EBIT as the primary measure of profit and loss in assessing the results of each segment's operations. EBIT includes operating income and other income and expenses. Items we do not include in EBIT are income taxes and financing costs, including interest expense, each of which we evaluate on a consolidated basis.

Information by segment on our Statements of Financial Position as of December 31, 2013 is as follows:

In millions	Identifiable and total assets (1)	Goodwill
Distribution operations	\$ 11,727	\$ 1,640
Retail operations	694	173
Wholesale services	1,166	-
Midstream operations	713	14
Other (2) (3)	73	-
Consolidated	\$ 14,373	\$ 1,827

(1) Identifiable assets are those assets used in each segment's operations and exclude assets held for sale.

(2) The assets of our other segment consist primarily of cash and cash equivalents and PP&E, and reflect the effect of intercompany eliminations.

(3) Includes our investment in Triton that was previously part of the cargo shipping segment.

(2) Identifiable assets are those used in each segment's operations and exclude assets held for sale.

(3) The assets of our other segment consist primarily of cash and cash equivalents and PP&E, and reflect the effect of intercompany eliminations. Our other segment now also includes our investment in Triton, which was part of our cargo shipping segment and has been classified as discontinued operations. For more information see Note 12.

Note 12 - Discontinued Operations

On April 4, 2014, we entered into a definitive agreement to sell Tropical Shipping and expect to close the transaction during the third quarter of 2014. After-tax cash proceeds and distributions from the transaction are expected to be approximately \$220 million, subject to certain defined post-closing adjustments. Accordingly, we determined that the cumulative foreign earnings of Tropical Shipping would no longer be indefinitely reinvested offshore, and recognized

income tax expense of \$31 million in the first quarter of 2014 related to the cumulative foreign earnings for which no tax liabilities had previously been recorded. As of June 30, 2014, we had \$55 million of deferred income tax liabilities on our unaudited Condensed Consolidated Statements of Financial Position related to the cumulative earnings of our foreign subsidiaries that have not been repatriated.

During the first quarter of 2014, based upon the negotiated sales price, we recorded a goodwill impairment charge of \$19 million, for which there is no income tax benefit. Additionally, we suspended depreciation and amortization of the Tropical Shipping assets for which we recognized a \$4 million pre-tax loss in the second quarter of 2014. Completion of the transaction is conditioned upon certain factors, including approval by the Florida Office of Insurance Regulation. The assets and liabilities of Tropical Shipping classified as held for sale on the unaudited Condensed Consolidated Statements of Financial Position are as follows:

Operating income (loss)	1	(1)	(17)	-
Income (loss) before income taxes	1	(1)	(17)	-
Income tax expense (3)	-	-	(32)	-
Income (loss) from discontinued operations, net of tax	\$ 1	\$ (1)	\$ (49)	\$ -

(1) We ceased depreciating and amortizing Tropical Shipping's assets on April 4, 2014 as a result of entering into an agreement to sell this business and the assets were classified as held for sale.

(2) Relates to the suspension of depreciation and amortization of \$4 million and \$19 million of goodwill attributable to Tropical Shipping that was impaired as of March 31, 2014 based on the negotiated sales price.

(3)

Expense for the six months ended 2014 includes \$31 million that was recorded in the first quarter of 2014 related to the cumulative foreign earnings for which no tax liabilities previously had been recorded.

Note 13 - Subsequent Event

As discussed in Note 3, our ERC assets and liabilities are associated with our distribution operations segment and are generally recoverable through rate mechanisms. Our ERC liabilities are estimates of future remediation costs for investigation and cleanup of our former MGP operating sites that may be contaminated. The corresponding recoverable ERC regulatory assets are recorded for environmental remediation costs until the costs are recovered from our customers. We primarily recover these costs through rate riders that authorize dollar-for-dollar recovery.

In July 2014, we reached a \$77 million settlement with an insurance company of environmental claims relating to potential contamination at several of our MGP sites. Under the terms of the settlement, we will receive the \$77 million settlement in two installments: \$45 million within 30 days of the effective date of the settlement and the remaining \$32 million within one year after the effective date of the settlement. The settlement will not affect our recorded ERC liabilities but is expected to reduce our recorded ERC regulatory assets because the vast majority of the settlement amount relates to New Jersey sites for which we receive regulatory recovery of ERC expenditures. We intend to seek approval of the New Jersey BPU to utilize the insurance proceeds related to the New Jersey sites to reduce the ERC expenditures that otherwise would have been recovered from our New Jersey customers in future periods. As such, the settlement, once approved, is expected to reduce our recoverable ERC regulatory asset and have a favorable impact on the rates for our Elizabethtown Gas customers.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis should be read in conjunction with our unaudited Condensed Consolidated Financial Statements and the notes to our unaudited Condensed Consolidated Financial Statements in this quarterly filing, as well as our 2013 Form 10-K. Results for the interim periods presented are not necessarily indicative of the results to be expected for the full fiscal period due to seasonal and other factors.

Forward-Looking Statements

Certain expectations and projections regarding our future performance referenced in this section and elsewhere in this report, as well as in other reports and proxy statements we file with the SEC or otherwise release to the public and on our website are forward-looking statements and are subject to uncertainties and risks. Senior officers and other employees may also make verbal statements to analysts, investors, regulators, the media and others that are forward-looking.

Forward-looking statements often include words such as "anticipate," "assume," "believe," "can," "could," "estimate," "expect," "forecast," "future," "goal," "indicate," "intend," "may," "outlook," "plan," "potential," "predict," "project," "proposed," "seek," "should," "target," "would," or similar expressions. You are cautioned not to place undue reliance on our forward-looking statements. While we believe that our expectations are reasonable in view of the available information that we currently have, our expectations are subject to future events, risks and uncertainties, and there are numerous factors - many beyond our control - that could cause our actual results to vary from our expectations.

Such events, risks and uncertainties include, but are not limited to, changes in price, supply and demand for natural gas and related products; the impact of changes in state and federal legislation and regulation including any changes related to climate change; actions taken by government agencies on rates and other matters; concentration of credit risk; utility and energy industry consolidation; the impact on cost and timeliness of construction projects by government and other approvals, development project delays, adequacy of supply of diversified vendors, unexpected change in project costs, including the cost of funds to finance these projects and our ability to recover our project costs from our customers; limits on pipeline capacity; the impact of acquisitions and divestitures; our ability to successfully integrate operations that we have or may acquire or develop in the future; direct or indirect effects on our business, financial condition or liquidity resulting from any change in our credit ratings, or any change in the credit ratings of our counterparties or competitors; interest rate fluctuations; financial market conditions, including disruptions in the capital markets and lending environment; general economic conditions; uncertainties about environmental issues and the related impact of such issues, including our environmental remediation plans; conditions to closing the sale of Tropical Shipping; the capacity of our gas storage caverns; the impact of our construction projects and related capital expenditures; the impact of changes in weather, including climate change, on the temperature-sensitive portions of our business; the impact of natural disasters, such as hurricanes, on the supply and price of natural gas; acts of war or terrorism; the outcome of litigation; and other factors discussed elsewhere herein and in our other filings with the SEC. There also may be other factors that we do not anticipate or that we do not recognize as material that are not described in this report that could cause our actual results to differ materially from our expectations.

Forward-looking statements speak only as of the date they are made. We expressly disclaim any obligation to publicly update or revise any forward-looking statement, whether as a result of future events, new information or otherwise, except as required under U.S. federal securities law.

Executive Summary

We are an energy services holding company whose principal business is the distribution of natural gas in seven states - Illinois, Georgia, Virginia, New Jersey, Florida, Tennessee and Maryland - through our seven natural gas distribution utilities. We are also involved in several other businesses that are primarily related and complementary to the distribution of natural gas. Our operating segments consist of the following four operating and reporting segments - distribution operations, retail operations, wholesale services and midstream operations and one non-operating segment - other. These segments are consistent with how management views and operates our business. For additional information on our operating segments, see Note 11 to our unaudited Condensed Consolidated Financial Statements herein and Item 1, "Business" of our 2013 Form 10-K.

In April 2014, we entered into a definitive agreement to sell Tropical Shipping, and we anticipate closing the transaction in the third quarter of 2014. After-tax cash proceeds and distributions from the transaction are expected to be approximately \$220 million, subject to certain defined post-closing adjustments. As a result of the sale, we expect to pay income taxes of approximately \$60 million. During the first quarter of 2014, we recorded income tax expense of \$31 million related to Tropical Shipping's cumulative foreign earnings for which income taxes had not previously been recorded. We also recorded a goodwill impairment charge of \$19 million, for which there is no income tax benefit, during the first quarter of 2014 based upon the negotiated sale price. Upon closing, we expect to record income tax expense of \$29 million associated with the taxable gain on the sale. On a combined basis, this is expected to result in a reported income tax and impairment expense of approximately \$0.66 per share, of which \$0.42 was recorded in the first quarter of 2014 with the remainder to be recorded upon closing.

Glossary

Table of Contents

Tropical Shipping operated as part of our cargo shipping segment and beginning in the second quarter of 2014 the financial results were classified as discontinued operations. The cargo shipping segment also included our investment in Triton, which has been reclassified into our other segment. Accordingly, all references to continuing operations exclude the operations of Tropical Shipping.

For the second quarter of 2014, our net income attributable to AGL Resources Inc. was \$64 million, an increase of \$15 million compared to the same period in 2013. The increase was primarily the result of increased EBIT at distribution operations and retail operations due to increased average customer usage, increased regulatory infrastructure program revenues at Atlanta Gas Light, the acquisition of retail energy customers in June 2013, as well as lower depreciation expense at Nicor Gas. The increase was also favorably impacted by increases in operating margin at wholesale services due to higher commercial activity and net hedge gains. These increases were partially offset by a decrease in margin at midstream operations due to a retained fuel true-up at one of our storage facilities as a result of naturally occurring shrinkage of the caverns and the \$11 million pre-tax gain on sale of Compass Energy in the second quarter of 2013 at wholesale services.

Our operating and maintenance expenses in the second quarter of 2014 were slightly higher compared to the same period last year mainly as a result of our June 2013 acquisition at retail operations. For the second quarter of 2014, our income tax expense increased by \$8 million compared to the second quarter of 2013. The increase was primarily due to higher consolidated earnings, as previously discussed.

In the first six months of 2014, our net income attributable to AGL Resources Inc. was \$354 million, an increase of \$151 million compared to the same period in 2013, as we benefited from significantly colder-than-normal weather in most of our businesses as compared to slightly colder-than-normal weather in the first half of 2013. This cold weather contributed an additional \$11 million of operating margin for distribution operations compared to the first half of 2013, particularly in Illinois due to the near-record cold. This cold weather also increased the operating margin for retail operations by \$12 million, primarily related to Georgia compared to the first half of 2013. Excluding the favorable weather impacts at distribution operations and retail operations, we also achieved growth in our operating margins of \$15 million during the first half of 2014 primarily as a result of our 2013 acquisitions at retail operations. Additionally, we experienced natural gas volatility that enabled us to capture value and increase wholesale services' operating margin by \$330 million. These increases were partially offset by decrease in margin at midstream operations due to a retained fuel true-up at one of our storage facilities as a result of naturally occurring shrinkage of the caverns and the \$11 million pre-tax gain on sale of Compass Energy in the second quarter of 2013.

In the first half of 2014, our operating expenses were higher compared to the same period last year as a result of an increase in incentive compensation, as we experienced a higher concentration of our annual forecasted earnings in the first half of 2014 as compared to last year. Additionally, our operation and maintenance expense increased at Nicor Gas associated with the significantly colder-than-normal weather, as our employees worked extensive hours to ensure the safe and reliable delivery of natural gas to our customers. Our income tax expense increased by \$121 million for the first half of 2014 compared to the first half of 2013, primarily due to higher consolidated earnings.

Several of our business objectives are as follows:

- Distribution Operations: Invest necessary capital to enhance and maintain safety and reliability; remain a low-cost leader within the industry; opportunistically expand the system and capitalize on potential customer conversions. We intend to continue investing in our regulatory infrastructure programs in Georgia, Virginia, New Jersey and Tennessee to minimize regulatory lag and the recovery cycle. We continue to effectively manage costs and leverage our shared services model across our businesses to largely overcome inflationary effects.

Nicor Gas In 2013 Illinois enacted legislation that will allow Nicor Gas to provide more widespread safety and reliability enhancements to its distribution system. The legislation stipulates that rate increases to customer bills as a result of any infrastructure investments shall not exceed an annual average 4.0% of base rate revenues. In April 2014 we filed for a QIP under this legislation that would allow us to implement rates under the program effective in January 2015. Our filing included QIP cost estimates for three years of \$171 million in 2015, \$173 million in 2016 and \$171 million in 2017. The statutory deadline for a decision by the Illinois Commission is August 5, 2014.

In May 2014 the Illinois Commission approved Nicor Gas' Energy Smart Plan, which outlines energy efficiency program offerings and therm reduction goals with spending of \$93 million over a three-year period beginning in June 2014. Nicor Gas' first energy efficiency program ended in May 2014.

Atlanta Gas Light In accordance with an order issued by the Georgia Commission, when AGL Resources makes a business acquisition that reduces the costs allocated or charged to Atlanta Gas Light for shared services, the net savings to Atlanta Gas Light will be shared equally between the firm customers of Atlanta Gas Light and our shareholders for a 10-year period. In December 2013 we filed a Report of Synergy Savings with the Georgia Commission in connection with the Nicor acquisition. If and when approved, the net savings are expected to result in annual rate reductions to the firm customers of Atlanta Gas Light of \$5 million. We expect the Georgia Commission to rule on the report in the second half of 2014.

Glossary

Table of Contents

Virginia Natural Gas In April 2014 the Governor of Virginia signed into law legislation that enables the state's natural gas utilities, including Virginia Natural Gas, to acquire long-term supplies of natural gas and make capital investments to facilitate the delivery of low-cost shale and coal-bed methane gas to Virginia homeowners and businesses. Under the terms of the new statute, Virginia Natural Gas could enter into commercial agreements to obtain up to 25% of its annual firm sales demand for natural gas through long-term contracts or investments such as purchases of reserves. Recovery on investments would be based upon the utility's authorized return on rate base, which would flow through the purchased gas adjustment mechanism or similar mechanism, and approval in advance by the Virginia Commission. The new statute also will allow us to build pipelines and other infrastructure that deliver shale and coal-bed methane gas into the state's markets that seek to reduce natural gas supply costs or reduce price volatility for consumers, if approved by the Virginia Commission.

Elizabethtown Gas: In March 2013 the New Jersey BPU issued an order inviting the submission of proposals from utilities in New Jersey for infrastructure upgrades designed to protect utility infrastructure from future major storm events. In September 2013, in response to this request, Elizabethtown Gas filed for a Natural Gas Distribution Utility Reinforcement Effort (ENDURE), a program that will improve our distribution system's resiliency against coastal storms and floods. Under the proposed plan, Elizabethtown Gas will invest \$15 million in infrastructure and related facilities and communication planning over a one-year period beginning January 2014. In July 2014, the New Jersey BPU approved a modified ENDURE plan that allows for Elizabethtown Gas to increase its base rates effective November 1, 2015 for investments made under the program.

- **Retail Operations:** Maintain operating margin in Georgia and Illinois while continuing to expand into other profitable retail markets; integrate our warranty businesses and expand our overall market reach through partnership opportunities with our affiliates. With the continued adoption of fixed-price plans, we expect the Georgia retail market to remain highly competitive; however, our operating margins are forecasted to remain stable with modest growth from the acquisitions completed in 2013 and expansion into new markets. The segment's results in the second quarter of 2014 are 50% higher than last year primarily as a result of the successful integration of the acquisitions completed in 2013.
- **Wholesale Services:** Maximize strong storage and transportation positions, including the creation of additional economic value in 2014; effectively perform on existing asset management agreements and expand customer base and maintain cost structure in line with market fundamentals. We anticipate low volatility in certain areas of our portfolio; however, we expect a continuation of volatility in the supply-constrained Northeast corridor in the near-term. We continue to position our business model to secure sufficient supplies of natural gas to meet the needs of our utility customers and to hedge gas prices to effectively manage costs, reduce price volatility and maintain a competitive advantage. We experienced increased natural gas price volatility that enabled us to capture value in wholesale services. As a result, wholesale services' operating margin for the first half of 2014 was \$330 million higher than the same period in 2013. Wholesale services operating margin for the first half of 2014 also includes \$31 million related to year-to-date transportation and forward commodity derivative losses associated with July 2014 and forward transportation capacity. This is compared to \$18 million of similar transportation derivative losses in the first half of 2013 related to July 2013 and forward transportation capacity.
- **Midstream Operations:** Optimize storage portfolio, including contracts that have expired or will expire, pursue LNG transportation and natural gas pipeline opportunities and evaluate alternate uses for our storage facilities. In April 2014 we entered into a collaborative arrangement to construct a lateral pipeline in Georgia that will connect with the Transco pipeline system and entered into an agreement to lease our 50% ownership in this lateral pipeline extension once it is placed in-service.

The sale of Tropical Shipping will allow us to focus on growing our core business of operating regulated utilities and complementary non-regulated businesses. We will also continue to maintain our strong balance sheet and liquidity

profile, solid investment grade ratings and our commitment to sustainable annual dividend growth.

Natural Gas Market Fundamentals Volatility in the natural gas market arises from a number of factors, such as weather fluctuations or changes in supply or demand for natural gas in different regions of the country. The volatility of natural gas commodity prices has a significant impact on our customer rates, our long-term competitive position against other energy sources and the ability of retail operations and wholesale services to capture value from location and seasonal spreads. Additionally, changes in commodity prices subject a significant portion of our operations to earnings variability.

While natural gas supply increased during the 2013/2014 Heating Season in the U.S., it was not enough to meet the increased demand, resulting in the lowest storage levels in over a decade. Assuming normal weather during the next year, higher natural gas prices may occur as storage levels are restored.

Glossary

Table of Contents

Our non-utility businesses principally use physical and financial arrangements to reduce the risks associated with both weather-related seasonal fluctuations in market conditions and changing commodity prices. Additionally, our hedging strategies and physical natural gas supplies in storage enable us to reduce earnings risk exposure due to higher gas costs. These economic hedges may not qualify, or may not be designated, for hedge accounting treatment. As a result, our reported earnings for the wholesale services, retail operations and midstream operations segments reflect changes in the fair values of certain derivatives. Accordingly, a decline in natural gas prices or decreases in transportation spreads generally results in derivative gains and corresponding increases in EBIT, while an increase in natural gas prices or a widening of transportation spreads generally results in derivative losses and corresponding decreases in EBIT. These values may change significantly from period to period and are reflected as gains or losses within our operating revenues or our OCI for those derivative instruments that qualify and are designated as accounting hedges.

Results of Operations

We generate the majority of our operating revenues through the sale, distribution and storage of natural gas. We include in our consolidated revenues an estimate of revenues from natural gas distributed, but not yet billed to residential, commercial and industrial customers from the date of the last bill to the end of the reporting period. No individual customer or industry accounts for a significant portion of our revenues.

The operating revenues and EBIT of distribution operations and retail operations are seasonal. During the Heating Season, natural gas usage and operating revenues are generally higher as more customers are connected to our distribution systems and natural gas usage is higher in periods of colder weather. Our base operating expenses, excluding cost of gas, revenue taxes, interest expense and certain incentive compensation costs, are incurred relatively evenly over any given year. Thus, our operating results vary significantly from quarter to quarter as a result of seasonality.

We evaluate segment performance using the measures of EBIT and operating margin. EBIT includes operating income and other income and expenses. Items that we do not include in EBIT are financing costs (including interest) and income taxes, each of which we evaluate on a consolidated basis. Operating margin is a non-GAAP measure that is calculated as operating revenues minus cost of goods sold and revenue tax expense in distribution operations. Operating margin excludes operation and maintenance expense, depreciation and amortization, certain taxes other than income taxes, and the gain or loss on the sale of our assets, if any. These items are included in our calculation of operating income as reflected in our unaudited Condensed Consolidated Statements of Income.

We believe operating margin is a better indicator than operating revenues of the contribution resulting from customer growth in distribution operations, since the cost of goods sold and revenue tax expenses can vary significantly and are generally billed directly to our customers. We also consider operating margin to be a better indicator in retail operations, wholesale services and midstream operations, since it is a direct measure of earnings generated before overhead costs. You should not consider operating margin an alternative to, or a more meaningful indicator of, our operating performance than operating income or net income attributable to AGL Resources Inc. as determined in accordance with GAAP. In addition, our operating margin may not be comparable to similarly titled measures of other companies.

The following table reconciles operating revenue and operating margin to operating income, and EBIT to income before income taxes and net income, together with other consolidated financial information for the periods presented.

(1) Adjusted for Nicor Gas' revenue tax expenses, as they are passed directly through to customers.

(2) In April 2014 we entered into a definitive agreement to sell Tropical Shipping. We anticipate closing the transaction in the third quarter of 2014. For more information see Note 12 to our unaudited Condensed Consolidated Financial Statements under Part I, Item 1 herein.

Operating Metrics

Weather We measure the effects of weather on our business through Heating Degree Days. Generally, increased Heating Degree Days result in higher demand for natural gas on our distribution systems. With the exception of Nicor Gas and Florida City Gas, we have various regulatory mechanisms, such as weather normalization, which limit our exposure to weather changes within typical ranges in each of our utilities' respective service areas. However, our customers in Illinois and retail operations' customers in Georgia can be impacted by warmer or colder-than-normal weather. We have presented the Heating Degree Day information for those locations in the following table.

Edgar Filing: AGL RESOURCES INC - Form 10-Q

	Three months ended June 30,			2014 vs. 2013	2014 vs. normal (warmer) colder	Six months ended June 30,			2014 vs. 2013	2014 vs. normal
	Normal	2014	2013	(warmer)	colder	Normal	2014	2013	colder	colder
Illinois (1) (2)	620	610	715	(15)%	(2)%	3,605	4,366	3,868	13 %	21 %
Georgia (1)	141	146	178	(18)%	4 %	1,583	1,879	1,639	15 %	19 %

(1) Normal represents the ten-year average from January 1, 2004 through June 30, 2013, for Illinois at Chicago Midway International Airport, and for Georgia at Atlanta Hartsfield-Jackson International Airport as obtained from the National Oceanic and Atmospheric Administration, National Climatic Data Center.

(2) The 10-year average Heating Degree Days for the period, as established by the Illinois Commission in our last rate case, is 617 for the second quarter and 3,519 for the first six months from 1998 through 2007.

For our weather risk associated with Nicor Gas, we implemented a corporate weather hedging program in 2013 that utilizes OTC weather derivatives to reduce the risk of lower operating margins potentially resulting from decreased customer usage in the event of significantly warmer-than-normal weather in Illinois. We will continue to evaluate and use available methods to mitigate our exposure to weather in Illinois for future periods.

The 2013/2014 Heating Season was one of the coldest on record for Illinois, which positively impacted our operating margin by \$17 million in the first half of 2014 compared to normal weather. Georgia also experienced 19% colder-than-normal weather, and 15% colder than last year. This colder weather positively impacted our operating margin in Georgia by \$20 million in the first half of 2014 compared to normal weather.

Customers The number of customers at distribution operations and energy customers at retail operations can be impacted by natural gas prices, economic conditions and competition from alternative fuels. Our energy customers at retail operations are primarily located in Georgia and Illinois. Our customer metrics highlight the average number of customers for which we provide services and are provided in the following table.

Glossary

Table of Contents

	Three months ended June		2014		Six months ended June		2014	
	30,	2013	vs. 2013	% change	30,	2013	vs. 2013	% change
	2014	2013			2014	2013		
Distribution operations	4,508	4,492	-	%	4,520	4,496	1	%
Retail operations								
Energy customers (1)	631	618	2	%	634	616	3	%
Service contracts	1,201	1,164	3	%	1,199	1,081	11	%
Market share in Georgia	31	% 32	% (3))%	31	% 32	% (3))%

(1) Increase primarily represents the addition of approximately 33,000 residential and commercial customer relationships acquired in Illinois in June 2013.

Our year-over-year consolidated utility customer growth rate was 1% for the six months ended June 30, 2014. We anticipate overall utility customer growth trends for 2014 to continue improving based on an expectation of improvement in the economy and relatively low natural gas prices.

Retail operations' market share in Georgia has decreased slightly primarily as a result of a highly competitive marketing environment, which we expect will continue for the foreseeable future. In 2014 our retail operations segment intends to continue its efforts to enter into targeted markets and expand its energy customers and its service contracts. We anticipate this expansion will provide growth opportunities in future years.

Volumes Our natural gas volume metrics for distribution operations and retail operations, as shown in the following table, present the effects of weather and our customers' demand for natural gas compared to prior year. Wholesale services' daily physical sales volumes represent the daily average natural gas volumes sold to its customers.

	Three months ended June		2014 vs.		Six months ended June 30,		2014 vs.	
	30,	2013	2013	% change	2014	2013	2013	% change
	2014	2013			2014	2013		
Distribution operations (In Bcf)								
Firm	105	107	(2))%	467	416	12	%
Interruptible	26	26	-	%	54	56	(4))%
Total	131	133	(2))%	521	472	10	%
Retail operations (In Bcf)								
Georgia firm	5	5	-	%	25	23	9	%
Illinois	2	1	100	%	12	5	140	%
Other (including Florida, Maryland, New York and Ohio)	2	1	100	%	6	4	50	%
Wholesale services								
Daily physical sales (Bcf / day)	5.7	5.3	8	%	6.5	5.8	12	%

Within our midstream operations segment, our natural gas storage businesses seek to have a significant percentage of their working natural gas capacity under firm subscription, but also take into account current and expected market conditions. This allows our natural gas storage business to generate additional revenue during times of peak market demand for natural gas storage services, but retain some consistency with their earnings and maximize the value of the investments.

However, our midstream operations storage business is cyclical and the abundant supply of natural gas in recent years and the resulting lack of market and price volatility have negatively impacted the profitability of our storage facilities. Consistent with our expectations, we had contracts expire on March 31, 2014 that were subscribed at lower prices as compared to prior years. We anticipate these lower natural gas prices to continue throughout 2014 as compared to historical averages. The prices for natural gas storage capacity are expected to increase as supply and demand quantities reach equilibrium as the economy improves, expected exports of LNG occur and/or natural gas demand increases in response to low prices and expanded uses for natural gas. As of the periods presented the overall monthly average firm subscription rates per facility and amount of firm capacity subscription were as follows:

	June 30, 2014		June 30, 2013	
		Firm capacity under subscription		Firm capacity under subscription
	Avg. rates (1)	(1)	Avg. rates (1)	(1)
Jefferson Island	\$ 0.108	4.6	\$ 0.122	5.6
Golden Triangle	0.114	5.0	0.240	2.0
Central Valley	0.062	2.5	0.130	3.0

(1) Rates are per dekatherm. Firm capacity under subscription excludes 7.0 Bcf contracted by Sequent as of June 30, 2014 at an average monthly rate of \$0.050 and 3.5 Bcf as of June 30, 2013 at an average monthly rate of \$0.091.
