The unaudited condensed consolidated financial statements should be read in conjunction with the consolidated December 31, 2002

The following discussion should be read in conjunction with the Company's Condensed Consolidated Financial Statements and Notes thereto, included elsewhere within this Report.

### Forward Looking Statements

-----

This Form 10-QSB contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements included Herein that address activities, events or developments that the Corporation expects, believes, estimates, plans, intends, projects or anticipates will or may occur in the future, are forward-looking statements. Actual events may differ materially from those anticipated in the forward-looking statements. Important risks that may cause such a difference include: general domestic and international economic business conditions, increased competition in the Company's markets and products. Other factors may include, availability and terms of capital, and/or increases in operating and supply costs. Market

acceptance of existing and new products, rapid technological changes, availability of qualified personnel also could be factors. Changes in the Company's business strategies and development plans and changes in government regulation could adversely affect the Company. Although the Company believes that the assumptions underlying the forward-looking statements contained herein are reasonable, any of the assumptions could be inaccurate. There can be no assurance that the forward-looking statements included in this filing will prove to be accurate. In light of the significant uncertainties inherent in the forward-looking statements included herein, the inclusion of such information should not be regarded as a representation by the Company that the objectives and expectations of the Company would be achieved.

### Results of Operations

-----

#### Revenue

-----

During the quarter ended June 30, 2003 the Company realized \$271,734 of revenue compared to \$257,506, a 6% increase compared to the same period in the prior year.

During the first six months of 2003, the Company realized \$284,121 of revenues compared to \$375,468, a 24% decrease compared to the same period in the prior year. The decrease is due to the limited revenues achieved for the first three months of 2003.

#### Costs and expenses

-----

During the quarter ended June 30, 2003 the Company incurred \$189,713 of operating expenses compared to \$372,761, a 49% decrease compared to the same period in the prior year.

During the first six months of 2003, the Company incurred \$351,314 of operating expenses compared to \$804,583, a 56% decrease compared to the same period in the prior year. The decrease is due to better operating efficiencies.

### Liquidity and Capital Resources

-----

As of June 30, 2003, Largo had a deficiency in working capital of \$845,000.

During the first six months of 2003, Largo generated cash flow of \$70,000 from operating activities. While we have raised capital to meet our working capital and financing needs in the past, additional financing is required in order to meet our current and projected cash flow deficits from operations and development. We are seeking financing in the form of equity in order to provide the necessary working capital. We currently have no commitments for financing. There is no guarantee that we will be successful in raising the funds required.

The effect of inflation on the Company's revenue and operating results was not significant. The Company's operations are located in mainland China and there are no seasonal aspects that would have a material effect on the Company's financial condition or results of operations.

The Company's independent certified public accountant has stated in his report included in the Company's December 31, 2002 Form 10-KSB, that the Company has incurred operating losses in the last two years, and that the Company is dependent upon management's ability to develop profitable operations. These factors among others may raise substantial doubt about the Company's ability to continue as a going concern.

TRENDS, RISKS AND UNCERTAINTIES  
-----

We have sought to identify what we believe to be the most significant risks to our business, but we cannot predict whether, or to what extent, any of such risks may be realized nor can we guarantee that we have identified all possible risks that might arise. Investors should carefully consider all of such risk factors before making an investment decision with respect to our Common Stock.

CAUTIONARY FACTORS THAT MAY AFFECT FUTURE RESULTS  
-----

Our annual report on December 31, 2002 Form 10-KSB includes a detailed list of cautionary factors that may affect future results. Management believes that there have been no material changes to those factors listed, however other factors besides those listed could adversely affect us. That annual report can be accessed on EDGAR.

ITEM 3. CONTROLS AND PROCEDURES

The Company's management including the Chief Executive Officer, President and Chief Financial Officer, have evaluated, within 90 days prior to the filing of this quarterly report, the effectiveness of the design, maintenance and operation of the Company's disclosure controls and procedures. Management determined that the Company's disclosure controls and procedures were effective in ensuring that the information required to be disclosed by the Company in the reports that it files under the Exchange Act is accurate and is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and regulations.

Disclosure controls and procedures, no matter how well designed and implemented, can provide only reasonable assurance of achieving an entity's disclosure objectives. The likelihood of achieving such objectives is affected by limitations inherent in disclosure controls and procedures. These include the fact that human judgment in decision making can be fully faulty and that breakdowns in internal control can occur because of human failures such as errors or mistakes or intentional circumvention of the established process.

There have been no significant changes in internal controls or in other factors that could significantly affect these controls subsequent to the date of the evaluation thereof, including any corrective actions with regard to significant deficiencies and material weaknesses.
