UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended April 26, 2009

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission file number: 0-23985

NVIDIA CORPORATION
(Exact name of registrant as specified in its charter)

Delaware
(State or Other Jurisdiction of
Incorporation or Organization)

94-3177549
(I.R.S. Employer
Identification No.)

2701 San Tomas Expressway
Santa Clara, California 95050
(408) 486-2000

(Address, including zip code, and telephone number,
including area code, of principal executive offices)

N/A

(Former name, former address and former fiscal year if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes x No o

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes o No o

Edgar Filing: NVIDIA CORP - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of “large accelerated filer”, “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated
filer

Accelerated filer

Non-accelerated filer (Do not check if a
smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).
Yes No

The number of shares of common stock, \$0.001 par value, outstanding as of May 15, 2009 was 546.2 million.

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1 - Summary of Significant Accounting Policies

Basis of presentation

The accompanying unaudited condensed consolidated financial statements were prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Securities and Exchange Commission, or SEC, Regulation S-X. In the opinion of management, all adjustments, consisting only of normal recurring adjustments except as otherwise noted, considered necessary for a fair statement of results of operations and financial position have been included. The results for the interim periods presented are not necessarily indicative of the results expected for any future period. The following information should be read in conjunction with the audited financial statements and notes thereto included in our Annual Report on Form 10-K for the fiscal year ended January 25, 2009.

Fiscal year

We operate on a 52 or 53-week year, ending on the last Sunday in January. Fiscal year 2010 is a 53-week year, compared to fiscal year 2009 which was a 52-week year. The first quarter of fiscal years 2010 and 2009 are both 13-week quarters.

Reclassifications

Certain prior fiscal year balances have been reclassified to conform to the current fiscal year presentation.

Principles of Consolidation

Our condensed consolidated financial statements include the accounts of NVIDIA Corporation and its wholly owned subsidiaries. All material intercompany balances and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates. On an on-going basis, we evaluate our estimates, including those related to revenue recognition, cash equivalents and marketable securities, accounts receivable, inventories, income taxes, goodwill, stock-based compensation, warranty liabilities, litigation, investigation and settlement costs and other contingencies. These estimates are based on historical facts and various other assumptions that we believe are reasonable.

Revenue Recognition

Product Revenue

We recognize revenue from product sales when persuasive evidence of an arrangement exists, the product has been delivered, the price is fixed and determinable, and collection is reasonably assured. For most sales, we use a binding purchase order and in certain cases we use a contractual agreement as evidence of an arrangement. We consider delivery to occur upon shipment provided title and risk of loss have passed to the customer based on the shipping terms. At the point of sale, we assess whether the arrangement fee is fixed and determinable and whether collection is reasonably assured. If we determine that collection of a fee is not reasonably assured, we defer the fee and recognize revenue at the time collection becomes reasonably assured, which is generally upon receipt of payment.

Our policy on sales to certain distributors, with rights of return, is to defer recognition of revenue and related cost of revenue until the distributors resell the product. We record estimated reductions to revenue for customer programs at the time revenue is recognized. Our customer programs primarily involve rebates, which are designed to serve as sales incentives to resellers of our products in various target markets. We account for rebates in accordance with Emerging Issues Task Force Issue 01-9, or EITF 01-09, Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products) and, as such, we accrue for 100% of the potential rebates and do not apply a breakage factor. We recognize a liability for these rebates at the later of the date at which we record the related revenue or the date at which we offer the rebate. Rebates typically expire six months from the date of the original sale, unless we reasonably believe that the customer intends to claim the rebate. Unclaimed rebates are reversed to revenue upon expiration of the rebate.

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Our customer programs also include marketing development funds, or MDFs. We account for MDFs as either a reduction of revenue or an operating expense in accordance with EITF 01-09. MDFs represent monies paid to retailers, system builders, original equipment manufacturers, or OEMs, distributors and add-in card partners that are earmarked for market segment development and expansion and typically are designed to support our partners' activities while also promoting NVIDIA products. Depending on market conditions, we may take actions to increase amounts offered under customer programs, possibly resulting in an incremental reduction of revenue at the time such programs are offered.

We also record a reduction to revenue by establishing a sales return allowance for estimated product returns at the time revenue is recognized, based primarily on historical return rates. However, if product returns for a particular fiscal period exceed historical return rates we may determine that additional sales return allowances are required to properly reflect our estimated exposure for product returns.

License and Development Revenue

For license arrangements that require significant customization of our intellectual property components, we generally recognize this license revenue using the percentage-of-completion method of accounting over the period that services are performed. For all license and service arrangements accounted for under the percentage-of-completion method, we determine progress to completion based on actual direct labor hours incurred to date as a percentage of the estimated total direct labor hours required to complete the project. We periodically evaluate the actual status of each project to ensure that the estimates to complete each contract remain accurate. A provision for estimated losses on contracts is made in the period in which the loss becomes probable and can be reasonably estimated. Costs incurred in advance of revenue recognized are recorded as deferred costs on uncompleted contracts. If the amount billed exceeds the amount of revenue recognized, the excess amount is recorded as deferred revenue. Revenue recognized in any period is dependent on our progress toward completion of projects in progress. Significant management judgment and discretion are used to estimate total direct labor hours. Any changes in or deviations from these estimates could have a material effect on the amount of revenue we recognize in any period.

Inventories

Inventory cost is computed on an adjusted standard basis, which approximates actual cost on an average or first-in, first-out basis. Inventory costs consist primarily of the cost of semiconductors purchased from subcontractors, including wafer fabrication, assembly, testing and packaging, manufacturing support, including labor and overhead associated with such purchases, final test yield fallout, inventory provisions and shipping costs. We write down our inventory for estimated amounts related to lower of cost or market, obsolescence or unmarketable inventory equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future demand, future product purchase commitments, estimated manufacturing yield levels and market conditions. Inventory reserves once established are not reversed until the related inventory has been sold or scrapped.

Adoption of New Accounting Pronouncements

Business Combinations. In December 2007, the Financial Accounting Standards Board, or FASB, issued Statement of Financial Accounting Standards No. 141 (revised 2007), or SFAS No. 141(R), Business Combinations. Under SFAS No. 141(R), an entity is required to recognize assets acquired, liabilities assumed, contractual

contingencies, and contingent consideration at their fair value on the acquisition date. It further requires that acquisition-related costs be recognized separately from the acquisition and expensed as incurred; that restructuring costs generally be expensed in periods subsequent to the acquisition date; and that changes in accounting for deferred tax asset valuation allowances and acquired income tax uncertainties after the measurement period be recognized as a component of the provision for taxes. In addition, acquired in-process research and development is measured at fair value, capitalized as an indefinite-life intangible asset and tested for impairment pursuant to Statement of Financial Accounting Standards No. 142, Goodwill and Other Intangible Assets, or SFAS No. 142. We adopted SFAS No. 141(R) in the first quarter of 2010 and will apply this new accounting standard to any future business combinations.

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

In April 2009, the FASB issued FASB Staff Position No. 141R-1 Accounting for Assets Acquired and Liabilities Assumed in a Business Combination That Arise from Contingencies, or FSP 141R-1. FSP 141R-1 amends the provisions in SFAS No. 141(R) for the initial recognition and measurement, subsequent measurement and accounting, and disclosures for assets and liabilities arising from contingencies in business combinations. FSP 141R-1 eliminates the distinction between contractual and non-contractual contingencies, including the initial recognition and measurement criteria in SFAS No. 141(R) and instead carries forward most of the provisions in SFAS No. 141 for acquired contingencies. FSP 141R-1 is effective for contingent assets and contingent liabilities acquired in business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. We adopted FSP 141R-1 in the first quarter of 2010 and will apply this new accounting standard to any future business combinations.

Life of Intangible Assets. In April 2008, the FASB issued FSP No. 142-3, Determination of the Useful Life of Intangible Assets, or FSP 142-3, which amends the factors considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under SFAS No. 142. FSP 142-3 requires a consistent approach between the useful life of a recognized intangible asset under SFAS 142 and the period of expected cash flows used to measure the fair value of an asset under SFAS No. 141(R). The FSP also requires enhanced disclosures when an intangible asset's expected future cash flows are affected by an entity's intent and/or ability to renew or extend the arrangement. FSP 142-3 is effective for financial statements issued for fiscal years beginning after December 15, 2008 and is applied prospectively. We adopted FSP 142-3 in the first quarter of 2010. The adoption of FSP 142-3 did not have a material impact on our consolidated financial position, results of operations or cash flows.

Recently Issued Accounting Pronouncements

Fair Value of Financial Instruments. In April 2009, the FASB issued FSP No. FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments, or FSP 107-1 and APB 28-1, which require disclosure in the body or in the accompanying notes of the Company's summarized financial information for interim reporting periods and in its financial statements for annual reporting periods of the fair value of all financial instruments for which it is practicable to estimate that value, whether recognized or not in the statement of financial position, as required by Statement of Financial Accounting Standards No. 107, Disclosures about Fair Value of Financial Instruments. We will be required to adopt FSP FAS 107-1 and APB 28-1 in the second quarter of fiscal year 2010. We do not believe the adoption of FSP FAS 107-1 and APB 28-1 will have a material impact on our consolidated financial position, results of operations or cash flows.

Other-Than-Temporary Impairment. In April 2009, the FASB issued FSP No. FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments, or FSP No. 115-2 and FAS No. 124-2, which clarify the interaction of the factors that should be considered when determining whether a debt security is other than temporarily impaired. We will be required to adopt FSP No. 115-2 and FAS No. 124-2 in the second quarter of fiscal year 2010. We do not believe the adoption of FSP No. 115-2 and FAS No. 124-2 will have a material impact on our consolidated financial position, results of operations or cash flows.

Fair Value Considering Volume and Level of Activity. In April 2009, the FASB issued FSP No. FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly, or FSP 157-4, which clarifies the interaction of the factors that should be considered when evaluating whether there has been a significant decrease in the volume and

level of activity for an asset or liability when compared with normal market activity for the asset or liability (or similar assets or liabilities). If there has been a significant decrease in the volume and level of activity for the asset or liability, further analysis of the transactions or quoted prices is required, and a significant adjustment to the transactions or quoted prices may be necessary to estimate fair value. We will be required to adopt FSP No. 157-4 in the second quarter of fiscal year 2010. We do not believe the adoption of FSP No. 157-4 will have a material impact on our consolidated financial position, results of operations or cash flows.

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Note 2 – Net Income (Loss) Per Share

Basic net income per share is computed using the weighted average number of common shares outstanding during the period. Diluted net income per share is computed using the weighted average number of common and dilutive common equivalent shares outstanding during the period, using the treasury stock method. Under the treasury stock method, the effect of stock options outstanding is not included in the computation of diluted net income per share for periods when their effect is anti-dilutive. The following is a reconciliation of the numerators and denominators of the basic and diluted net income (loss) per share computations for the periods presented:

	Three Months Ended	
	April 26, 2009	April 27, 2008
(In thousands, except per share data)		
Numerator:		
Net income (loss)	\$ (201,338)	\$ 176,805
Denominator:		
Denominator for basic net income (loss) per share, weighted average shares	542,307	555,673
Effect of dilutive securities:		
Stock options outstanding	-	36,316
Denominator for diluted net income (loss) per share, weighted average shares	542,307	591,989
Net income (loss) per share:		
Basic net income (loss) per share	\$ (0.37)	\$ 0.32
Diluted net income (loss) per share	\$ (0.37)	\$ 0.30

All of our outstanding stock options and restricted stock units were anti-dilutive during the three months ended April 26, 2009 and excluded from the computation of diluted earnings per share due to the net loss for the first quarter of fiscal year 2010. Diluted net income (loss) per share does not include the effect of anti-dilutive common equivalent shares from stock options outstanding of 32.3 million for the three months ended April 27, 2008.

Note 3 – Stock Option Purchase

In March 2009, we completed a cash tender offer for certain employee stock options. The tender offer applied to outstanding stock options held by employees with an exercise price equal to or greater than \$17.50 per share. None of the non-employee members of our Board of Directors or our officers who file reports under Section 16(a) of the Securities Exchange Act of 1934 were eligible to participate in the tender offer. All eligible options with exercise prices equal to or greater than \$17.50 per share but less than \$28.00 per share were eligible to receive a cash payment of \$3.00 per option in exchange for the cancellation of the eligible option. All eligible options with exercise prices equal to or greater than \$28.00 per share were eligible to receive a cash payment of \$2.00 per option in exchange for the cancellation of the eligible option.

Our condensed consolidated statement of operations for the three months ended April 26, 2009 includes stock-based compensation charges related to the stock option purchase (in thousands):

Cost of revenue	\$ 11,412
Research and development	90,456
Sales, general and administrative	38,373
Total	\$ 140,241

A total of 28.5 million options were tendered under the offer for an aggregate cash purchase price of \$78.1 million, which was paid in exchange for the cancellation of the eligible options. As a result of the tender offer, we incurred a charge of \$140.2 million consisting of \$124.1 million related to the remaining unamortized stock based compensation expense associated with the unvested portion of the options tendered in the offer, \$11.6 million related to stock-based compensation expense resulting from amounts paid in excess of the fair value of the underlying options, plus \$4.5 million related to associated payroll taxes, professional fees and other costs.

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Note 4 - Stock-Based Compensation

We measure stock-based compensation expense at the grant date of the related equity awards, based on the fair value of the awards, and recognize the expense using the straight-line attribution method over the requisite employee service period. We estimate the fair value of employee stock options on the date of grant using a binomial model and we use the closing trading price of our common stock on the date of grant as the fair value of awards of restricted stock units, or RSUs. We calculate the fair value of our employee stock purchase plan using the Black-Scholes model.

Equity Incentive Plans

We consider equity compensation to be long-term compensation and an integral component of our efforts to attract and retain exceptional executives, senior management and world-class employees. In March 2009, we introduced RSUs as a form of equity compensation to all employees. Currently, we grant stock options and RSUs under our equity incentive plans. The description of the key features of the NVIDIA Corporation 2007 Equity Incentive Plan, or the 2007 Plan, PortalPlayer, Inc. 1999 Stock Option Plan, or 1999 Plan, and 1998 Employee Stock Purchase Plan, may be read in conjunction with the audited financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended January 25, 2009.

Options granted to new employees that started before the beginning of fiscal year 2010 generally vest ratably quarterly over a three-year period. In addition, options granted prior to the beginning of fiscal year 2010 to existing employees in recognition of performance generally vest as to 25% of the shares two years and three months after the date of grant and as to the remaining 75% of the shares subject to the option in equal quarterly installments over a nine month period. Beginning in fiscal 2010, options granted to new employees and to existing employees in recognition of performance generally vest as to 33.36% of the shares one year after the date of grant and as to the remaining 66.64% of the shares subject to the option in equal quarterly installments over the remaining period. Options granted under the 2007 Plan generally expire in six years from the date of grant. In general, RSUs vest over three years and are subject to the recipient's continuing service to NVIDIA. RSUs vest over three years at the rate of 33.36% on pre-determined dates that are close to the anniversary of the grant date and vest ratably on a semi-annual basis thereafter.

In addition to the stock-based compensation expense related to our cash tender offer to purchase certain employee stock options as described in Note 3 – Stock Option Purchase, our condensed consolidated statements of operations include stock-based compensation expense, net of amounts capitalized as inventory, as follows:

	Three Months Ended	
	April 26, 2009	April 27, 2008
	(In thousands)	
Cost of revenue	\$ 2,230	\$ 3,136
Research and development	21,270	24,534
Sales, general and administrative	10,613	14,454
Total	\$ 34,113	\$ 42,124

During the three months ended April 26, 2009 and April 27, 2008, we granted approximately 4.9 million and 8.7 million stock options, respectively, with an estimated total grant-date fair value of \$27.0 million and \$87.0 million,

respectively, and a per option weighted average grant-date fair value of \$5.45 and \$9.97, respectively. During the three months ended April 26, 2009, we granted approximately 4.6 million RSUs, with an estimated total grant-date fair value of \$46.4 million, and a per RSU weighted average grant-date fair value of \$10.17. We did not grant any RSUs during the three months ended April 27, 2008.

Of the estimated total grant-date fair value, we estimated that the stock-based compensation expense related to the equity awards that are not expected to vest was \$11.8 million and \$17.0 million for the three months ended April 26, 2009 and April 27, 2008, respectively. As of April 26, 2009 and April 27, 2008, the aggregate amount of unearned stock-based compensation expense related to our equity awards was \$130.1 million and \$272.9 million, respectively, adjusted for estimated forfeitures. As of both April 26, 2009 and April 27, 2008, we expect to recognize the unearned stock-based compensation expense related to stock options over an estimated weighted average amortization period of 2.2 years. As of April 26, 2009, we expect to recognize the unearned stock-based compensation expense related to RSUs over an estimated weighted average amortization period of 2.9 years.

(Unaudited)

Valuation Assumptions

We calculate the grant-date fair value of our equity awards under the provisions of Statement of Financial Accounting Standards No. 123 (R), or SFAS No. 123(R), Share-based Payment.

Our calculation of the fair value of stock option awards uses implied volatility rather than historical volatility as we expect that implied volatility will be more reflective of market conditions and thus a better indicator of our expected volatility than historical volatility. We also segregate options into groups of employees with relatively homogeneous exercise behavior in order to calculate the best estimate of fair value using the binomial valuation model. As such, the expected term assumption used in calculating the estimated fair value of our stock option awards using the binomial model is based on detailed historical data about employees' exercise behavior, vesting schedules, and death and disability probabilities. Our management believes the resulting binomial calculation provides a reasonable estimate of the fair value of our employee stock options.

SFAS No. 123(R) requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Forfeitures are estimated based on historical experience. If factors change and we employ different assumptions in the application of SFAS No. 123(R) in future periods, the compensation expense that we record under SFAS No. 123(R) may differ significantly from what we have recorded in the current period.

The fair value of stock options granted under our stock option plans and shares issued under our employee stock purchase plan have been estimated at the date of grant with the following assumptions:

	Three Months Ended	
	April 26, 2009	April 27, 2008
Stock Options	(Using a binomial model)	
Weighted average expected life of stock options (in years)	3.8 - 5.8	3.6 - 5.7
	1.8% -	
Risk free interest rate	2.2 %	2.6% - 2.9%
Volatility	65% - 72%	60% - 68%
Dividend yield	-	-

	Three Months Ended	
	April 26, 2009	April 27, 2008
Employee Stock Purchase Plan	(Using a Black-Scholes model)	
Weighted average expected life of stock options (in years)	0.5 - 2.0	0.5 - 2.0
Risk free interest rate	0.5% - 1.0%	1.6% - 1.8%
Volatility	73%	68%
Dividend yield	-	-

Equity Award Activity

The following summarizes the stock option and RSU activities under our equity incentive plans:

Stock Options	Options Outstanding (In thousands)	Weighted Average Exercise Price (Per Share)
Balances, January 25, 2009	97,454	\$ 13.83
Granted	4,949	\$ 9.96
Exercised	(4,158)	\$ 4.17
Cancelled	(743)	\$ 16.92
Cancellations related to stock options purchase (1)	(28,532)	\$ 23.35
Balances, April 26, 2009	68,970	\$ 8.92

(1) Please refer to Note 3 of these condensed consolidated statements of operations for further discussion related to our stock option purchase in March 2009.

Note 5 – Income Taxes

We recognized income tax (benefit) expense of (\$23.5) million and \$36.2 million for the three months ended April 26, 2009 and April 27, 2008, respectively. Income tax (benefit) expense as a percentage of income before taxes, or our effective tax rate, was (10.5%) and 17.0% for the three months ended April 26, 2009 and April 27, 2008, respectively.

The expected tax benefit derived from our loss before tax for the first three months of fiscal year 2010 at the United States federal statutory tax rate of 35% differs from our actual effective tax rate of (10.5%) due primarily to permanent tax differences related to stock-based compensation and losses recognized in tax jurisdictions where no tax benefit has been recognized, partially offset by the U.S. tax benefit of the federal research tax credit. Further, our annual projected effective tax rate of (7.0%) differs from our actual effective tax rate of (10.5%) primarily due to a one-time discrete item related to our stock option purchase completed in March 2009.

Our effective tax rate on income before tax for the first three months of fiscal year 2009 is lower than the United States federal statutory rate of 35% due primarily to income earned in jurisdictions where that tax rate is lower than the United States federal statutory tax rate.

For the three months ended April 26, 2009, there have been no material changes to our tax years that remain subject to examination by major tax jurisdictions. Additionally, there have been no material changes to our unrecognized tax benefits and any related interest or penalties from our fiscal year ended January 25, 2009.

While we believe that we have adequately provided for all uncertain tax positions, amounts asserted by tax authorities could be greater or less than our accrued position. Accordingly, our provisions on federal, state and foreign tax-related matters to be recorded in the future may change as revised estimates are made or the underlying matters are settled or otherwise resolved with the respective tax authorities. As of April 26, 2009, we do not believe that our estimates, as otherwise provided for, on such tax positions will significantly increase or decrease within the next twelve months.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Note 6 - Marketable Securities

We account for our investment instruments in accordance with Statement of Financial Accounting Standards No. 115, or SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities. All of the cash equivalents and marketable securities are treated as “available-for-sale” under SFAS No. 115. Investments in both fixed rate and floating rate interest earning instruments carry a degree of interest rate risk. Fixed rate debt securities may have their market value adversely impacted due to a rise in interest rates, while floating rate securities may produce less income than expected if interest rates fall. Due in part to these factors, our future investment income may fall short of expectations due to changes in interest rates or if the decline in fair value of our publicly traded debt or equity investments is judged to be other-than-temporary. We may suffer losses in principal if we are forced to sell securities that decline in market value due to changes in interest rates. However, because any debt securities we hold are classified as “available-for-sale,” no gains or losses are realized in our statement of operations due to changes in interest rates unless such securities are sold prior to maturity or unless declines in market values are determined to be other-than-temporary. These securities are reported at fair value with the related unrealized gains and losses included in accumulated other comprehensive income, a component of stockholders’ equity, net of tax.

We performed an impairment review of our investment portfolio as of April 26, 2009. Currently, we have the intent and ability to hold our investments with impairment indicators until maturity. Based on our quarterly impairment review and having considered the guidance in Statement of Financial Accounting Standards Staff Position No. 115-1, or FSP No. 115-1, A Guide to the Implementation of Statement 115 on Accounting for Certain Investments in Debt and Equity Securities, we did not record any other than temporary impairment charges during the first quarters of fiscal years 2010 and 2009. We concluded that our investments were appropriately valued and that no additional other than temporary impairment charges were necessary on our portfolio of available for sale investments as of April 26, 2009.

Net realized gains for the first quarter of fiscal year 2010 were \$0.8 million. Net realized gains or losses for the first quarter of fiscal year 2009 were not material. As of April 26, 2009, we had a net unrealized gain of \$5.4 million, which was comprised of gross unrealized gains of \$7.4 million, offset by \$2.0 million of gross unrealized losses. As of January 25, 2009, we had a net unrealized gain of \$4.4 million, which was comprised of gross unrealized gains of \$7.8 million, offset by \$3.4 million of gross unrealized losses.

As of April 26, 2009, our money market investment in the Reserve International Liquidity Fund, Ltd., or the International Reserve Fund, which was valued at \$40.0 million, net of \$5.6 million of other than temporary impairment charges that we recorded during fiscal year 2009, was classified as marketable securities in our Condensed Consolidated Balance Sheet as of April 26, 2009 due to the halting of redemption requests in September 2008 by the International Reserve Fund. The \$40.0 million value of our holdings in the International Reserve Fund as of April 26, 2009 reflects an initial investment of \$130.0 million, reduced by \$84.4 million that we received from the International Reserve Fund during the first quarter of fiscal 2010 and the \$5.6 million other than temporary impairment charge we recorded against the value of this investment during fiscal year 2009. The \$84.4 million we received was our portion of a payout of approximately 65% of the total assets of the International Reserve Fund. We expect to receive the proceeds from our remaining investment in the International Reserve Fund, excluding some or all of the \$5.6 million, by October 2009, when all of the underlying securities held by the International Reserve Fund are scheduled to have matured. However, redemptions from the International Reserve Fund are currently subject to pending litigation, which could cause further delay in receipt of our funds.

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Note 7 – Fair Value of Cash Equivalents and Marketable Securities

We measure our cash equivalents and marketable securities at fair value. The fair values of our financial assets and liabilities are determined using quoted market prices of identical assets or quoted market prices of similar assets from active markets. Level 1 valuations are obtained from real-time quotes for transactions in active exchange markets involving identical assets. Level 2 valuations are obtained from quoted market prices in active markets involving similar assets. Level 3 valuations are based on unobservable inputs to the valuation methodology and include our own data about assumptions market participants would use in pricing the asset or liability based on the best information available under the circumstances.

Financial assets and liabilities measured at fair value are summarized below:

	Fair value measurement at reporting date using			
	April 26, 2009	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	High Level of Judgment (Level 3)
	(In thousands)			
Debt securities issued by US Government agencies (1)	\$ 386,569	\$ -	\$ 386,569	\$ -
Corporate debt securities (2)	234,978	-	234,978	-
Debt securities issued by United States Treasury (3)	209,430	-	209,430	-
Money market funds (4)	193,333	153,358	-	39,975
Mortgage-backed securities issued by Government-sponsored entities (2)	160,956	-	160,956	-
Asset-backed Securities (2)	22,704	-	22,704	-
Commercial paper (5)	2,799	-	2,799	-
Total cash equivalents and marketable securities	\$ 1,210,769	\$ 153,358	\$ 1,017,436	\$ 39,975

(1) Includes \$102,650 in Cash and cash equivalents and \$283,919 in Marketable Securities on the Condensed Consolidated Balance Sheet.

(2) Included in Marketable Securities on the Condensed Consolidated Balance Sheet.

(3) Includes \$126,089 in Cash and cash equivalents and \$83,341 in Marketable Securities on the Condensed Consolidated Balance Sheet.

(4) Includes \$153,358 in Cash and cash equivalents and \$39,975 in Marketable Securities on the Condensed Consolidated Balance Sheet.

(5) Included in Cash and cash equivalents on the Condensed Consolidated Balance Sheet.

For our money market funds that were held by the International Reserve Fund at April 26, 2009, we assessed the fair value of the money market funds by considering the underlying securities held by the International Reserve Fund. As the International Reserve Fund has halted redemption requests and is currently believed to be holding all of their securities until maturity, we valued the underlying securities held by the International Reserve Fund at their maturity value using an income approach. Certain of the debt securities held by the International Reserve Fund were issued by

companies that had filed for bankruptcy during fiscal year 2009 and, as such, our valuation of those securities was zero. The net result was that, during the third quarter of fiscal year 2009, we estimated the fair value of the International Reserve Fund's investments to be 95.7% of their last-known value and we recorded an other than temporary impairment charge of \$5.6 million. The \$40.0 million value of our holdings in the International Reserve Fund as of April 26, 2009 reflects an initial investment of \$130.0 million, reduced by \$84.4 million that we received from the International Reserve Fund during the first quarter of fiscal 2010 and the \$5.6 million other than temporary impairment charge we recorded against the value of this investment during fiscal year 2009. Due to the inherent subjectivity and the significant judgment involved in the valuation of our holdings of International Reserve Fund, we have classified these securities under the Level 3 fair value hierarchy.

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Reconciliation of financial assets measured at fair value on a recurring basis using significant unobservable inputs, or Level 3 inputs (in thousands):

Balance, beginning of period, January 25, 2009	\$ 124,400
Transfer into Level 3	-
Other than temporary impairment	-
Redemption of funds	(84,425)
Balance, end of period, April 26, 2009	\$ 39,975

Total financial assets at fair value classified within Level 3 were 1.3% of total assets on our Condensed Consolidated Balance Sheet as of April 26, 2009.

Note 8 - 3dfx

During fiscal year 2002, we completed the purchase of certain assets from 3dfx Interactive, Inc., or 3dfx, for an aggregate purchase price of approximately \$74.2 million. On December 15, 2000, NVIDIA Corporation and one of our indirect subsidiaries entered into an Asset Purchase Agreement, or the APA, which closed on April 18, 2001, to purchase certain graphics chip assets from 3dfx.

In October 2002, 3dfx filed for Chapter 11 bankruptcy protection in the United States Bankruptcy Court for the Northern District of California. In March 2003, the Trustee appointed by the Bankruptcy Court to represent 3dfx's bankruptcy estate served his complaint on NVIDIA. The Trustee's complaint asserted claims for, among other things, successor liability and fraudulent transfer and sought additional payments from us. In early November 2005, NVIDIA and the Official Committee of Unsecured Creditors, or the Creditors' Committee, agreed to a Plan of Liquidation of 3dfx, which included a conditional settlement of the Trustee's claims against us. This conditional settlement was subject to a confirmation process through a vote of creditors and the review and approval of the Bankruptcy Court. The conditional settlement called for a payment by NVIDIA of approximately \$30.6 million to the 3dfx estate. Under the settlement, \$5.6 million related to various administrative expenses and Trustee fees, and \$25.0 million related to the satisfaction of debts and liabilities owed to the general unsecured creditors of 3dfx. Accordingly, during the three month period ended October 30, 2005, we recorded \$5.6 million as a charge to settlement costs and \$25.0 million as additional purchase price for 3dfx. The Trustee advised that he intended to object to the settlement.

The conditional settlement reached in November 2005 never progressed through the confirmation process and the Trustee's case still remains pending appeal. As such, we have not reversed the accrual of \$30.6 million - \$5.6 million as a charge to settlement costs and \$25.0 million as additional purchase price for 3dfx - that we recorded during the three months ended October 30, 2005, pending resolution of the appeal of the Trustee's case. We do not believe the resolution of this matter will have a material impact on our results of operations or financial position.

The 3dfx asset purchase price of \$95.0 million and \$4.2 million of direct transaction costs were allocated based on fair values presented below. The final allocation of the purchase price of the 3dfx assets is contingent upon the

outcome of all of the 3dfx litigation. Please refer to Note 12 of these Notes to Condensed Consolidated Financial Statements for further information regarding this litigation.

	Fair Market Value (In thousands)	Straight-Line Amortization Period (Years)
Property and equipment	\$ 2,433	1-2
Trademarks	11,310	5
Goodwill	85,418	-
Total	\$ 99,161

(Unaudited)

Note 9 - Intangible Assets

We currently amortize our intangible assets with definitive lives over periods ranging from one to ten years using a method that reflects the pattern in which the economic benefits of the intangible asset are consumed or otherwise used up or, if that pattern can not be reliably determined, using a straight-line amortization method. The components of our amortizable intangible assets are as follows:

	April 26, 2009			January 25, 2009		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
	(In thousands)					
Technology licenses	\$ 134,343	\$ (37,968)	\$ 96,375	\$ 130,654	\$ (34,610)	\$ 96,044
Acquired intellectual property	75,339	(39,274)	36,065	75,340	(35,200)	40,140
Patents	18,588	(8,582)	10,006	18,588	(7,671)	10,917
Total intangible assets	\$ 228,270	\$ (85,824)	\$ 142,446	\$ 224,582	\$ (77,481)	\$ 147,101

Amortization expense associated with intangible assets was \$8.3 million and \$7.5 million for the three months ended April 26, 2009 and April 27, 2008, respectively. Future amortization expense related to the net carrying amount of intangible assets at April 26, 2009 is estimated to be \$25.8 million for the remainder of fiscal 2010, \$27.6 million in fiscal 2011, \$25.1 million in fiscal 2012, \$19.0 million in fiscal 2013, \$14.6 million in fiscal 2014, and a total of \$30.3 million in fiscal 2015 and fiscal years subsequent of fiscal 2015.

Note 10 - Balance Sheet Components

Certain balance sheet components are as follows:

	April 26, 2009	January 25, 2009
Inventories:	(In thousands)	
Raw materials	\$ 25,569	\$ 27,804
Work in-process	94,770	132,960
Finished goods	206,920	377,070
Total inventories	\$ 327,259	\$ 537,834

At April 26, 2009, we had outstanding inventory purchase obligations totaling approximately \$457 million.

	April 26, 2009	January 25, 2009
Accrued Liabilities:	(In thousands)	
Accrued customer programs (1)	\$ 229,246	\$ 239,797
Warranty accrual (2)	112,016	150,629
Accrued payroll and related expenses	49,466	82,449

Accrued legal settlement (3)	30,600	30,600
Deferred rent	11,354	11,643
Deferred revenue	3,907	3,774
Other	39,469	40,835
Total accrued liabilities and other	\$ 476,058	\$ 559,727

(1) Please refer to Note 1 of these Notes to Condensed Consolidated Financial Statements for discussion regarding the nature of accrued customer programs and their accounting treatment related to our revenue recognition policies and estimates.

(2) Please refer to Note 11 of these Notes to Condensed Consolidated Financial Statements for discussion regarding the warranty accrual.

(3) Please refer to Note 12 of these Notes to Condensed Consolidated Financial Statements for discussion regarding the 3dfx litigation.

Other long-term liabilities	16,051	17,835
Total other long-term liabilities	\$ 132,305	\$ 151,850

Note 11 - Guarantees

FASB Interpretation No. 45, or FIN 45, Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others, requires that upon issuance of a guarantee, the guarantor must recognize a liability for the fair value of the obligation it assumes under that guarantee. In addition, FIN 45 requires disclosures about the guarantees that an entity has issued, including a tabular reconciliation of the changes of the entity's product warranty liabilities.

Product Defect

Our products are complex and may contain defects or experience failures due to any number of issues in design, fabrication, packaging, materials and/or use within a system. If any of our products or technologies contains a defect, compatibility issue or other error, we may have to invest additional research and development efforts to find and correct the issue. Such efforts could divert our management's and engineers' attention from the development of new products and technologies and could increase our operating costs and reduce our gross margin. In addition, an error or defect in new products or releases or related software drivers after commencement of commercial shipments could result in failure to achieve market acceptance or loss of design wins. Also, we may be required to reimburse customers, including for customers' costs to repair or replace the products in the field. A product recall or a significant number of product returns could be expensive, damage our reputation and could result in the shifting of business to our competitors. Costs associated with correcting defects, errors, bugs or other issues could be significant and could materially harm our financial results.

During fiscal year 2009, we recorded a \$196.0 million charge against cost of revenue to cover anticipated customer warranty, repair, return, replacement and other associated costs arising from a weak die/package material set in certain versions of our previous generation media and communications processor, or MCP, and GPU products used in notebook systems. All of our newly manufactured products and all of our products that are currently shipping in volume have a different material set that we believe is more robust.

The previous generation MCP and GPU products that are impacted were included in a number of notebook products that were shipped and sold in significant quantities. Certain notebook configurations of these MCP and GPU products are failing in the field at higher than normal rates. While we have not been able to determine a root cause for these failures, testing suggests a weak material set of die/package combination, system thermal management designs, and customer use patterns are contributing factors. We have worked with our customers to develop and have made available for download a software driver to cause the system fan to begin operation at the powering up of the system

and reduce the thermal stress on these chips. We have also recommended to our customers that they consider changing the thermal management of the MCP and GPU products in their notebook system designs. We intend to fully support our customers in their repair and replacement of these impacted MCP and GPU products that fail, and their other efforts to mitigate the consequences of these failures.

We continue to engage in discussions with our supply chain regarding reimbursement to us for some or all of the costs we have incurred and may incur in the future relating to the weak material set. We also continue to seek to access our insurance coverage, which provided us with \$8.0 million in related reimbursement during fiscal year 2009. However, there can be no assurance that we will recover any additional reimbursement. We continue to not see any abnormal failure rates in any systems using NVIDIA products other than certain notebook configurations. However, we are continuing to test and otherwise investigate other products. There can be no assurance that we will not discover defects in other MCP or GPU products.

In September, October and November 2008, several putative class action lawsuits were filed against us, asserting various claims related to the impacted MCP and GPU products. Please refer to Note 12 of these Notes to Condensed Consolidated Financial Statements for further information regarding this litigation.

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Accrual for product warranty liabilities

Cost of revenue includes the estimated cost of product warranties that are calculated at the point of revenue recognition. Under limited circumstances, we may offer an extended limited warranty to customers for certain products. Additionally, we accrue for known warranty and indemnification issues if a loss is probable and can be reasonably estimated. The estimated product warranty liabilities for the three months ended April 26, 2009 and April 27, 2008 are as follows:

	April 26, 2009	April 27, 2008
(In thousands)		
Balance at beginning of period	\$ 150,629 (1)	\$ 5,707
Additions	-	685
Deductions	(38,613) (2)	-
Balance at end of period	\$ 112,016	\$ 6,392

(1) Includes a balance of \$145.7 million associated with incremental repair and replacement costs from a weak die/package material set. In July 2008, we recorded a \$196.0 million charge against cost of revenue to cover anticipated customer warranty, repair, return, replacement and other associated costs arising from a weak die/package material set. This charge was subsequently offset by deductions of \$50.3 million in deductions towards warranty accrual associated with incremental repair and replacement costs from a weak die/package material set.

(2) Includes \$31.2 million for the three months ended April 26, 2009 in payments related to the warranty accrual associated with incremental repair and replacement costs from a weak die/package material set.

In connection with certain agreements that we have executed in the past, we have at times provided indemnities to cover the indemnified party for matters such as tax, product and employee liabilities. We have also on occasion included intellectual property indemnification provisions in our technology related agreements with third parties. Maximum potential future payments cannot be estimated because many of these agreements do not have a maximum stated liability. As such, we have not recorded any liability in our Condensed Consolidated Financial Statements for such indemnifications.

Note 12 - Commitments and Contingencies

3dfx

On December 15, 2000, NVIDIA and one of our indirect subsidiaries entered into an Asset Purchase Agreement, or APA, to purchase certain graphics chip assets from 3dfx. The transaction closed on April 18, 2001. That acquisition, and 3dfx's October 2002 bankruptcy filing, led to four lawsuits against NVIDIA: two brought by 3dfx's former landlords, one by 3dfx's bankruptcy trustee and the fourth by a committee of 3dfx's equity security holders in the bankruptcy estate.

Landlord Lawsuits.

In May 2002, we were served with a California state court complaint filed by the landlord of 3dfx's San Jose, California commercial real estate lease, Carlyle Fortran Trust, or Carlyle. In December 2002, we were served with a California state court complaint filed by the landlord of 3dfx's Austin, Texas commercial real estate lease, CarrAmerica Realty Corporation, or CarrAmerica. The landlords both asserted claims for, among other things, interference with contract, successor liability and fraudulent transfer. The landlords sought to recover damages in the aggregate amount of approximately \$15 million, representing amounts then owed on the 3dfx leases. The cases were later removed to the United States Bankruptcy Court for the Northern District of California when 3dfx filed its bankruptcy petition and consolidated for pretrial purposes with an action brought by the bankruptcy trustee.

In 2005, the U.S. District Court for the Northern District of California withdrew the reference to the Bankruptcy Court for the landlords' actions, and on November 10, 2005, granted our motion to dismiss both landlords' complaints. The landlords filed amended complaints in early February 2006, and NVIDIA again filed motions to dismiss those claims. On September 29, 2006, the District Court dismissed the CarrAmerica action in its entirety and without leave to amend. On December 15, 2006, the District Court also dismissed the Carlyle action in its entirety. Both landlords filed timely notices of appeal from those orders.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

On July 17, 2008, the United States Court of Appeals for the Ninth Circuit held oral argument on the landlords' appeals. On November 25, 2008, the Court of Appeals issued its opinion affirming the dismissal of Carlyle's complaint in its entirety. The Court of Appeals also affirmed the dismissal of most of CarrAmerica's complaint, but reversed the District Court's dismissal of CarrAmerica's claims for interference with contractual relations and fraud. On December 8, 2008, Carlyle filed a Request for Rehearing En Banc, which CarrAmerica joined. That same day, Carlyle also filed a Motion for Clarification of the Court's Opinion. On January 22, 2009, the Court of Appeals denied the Request for Rehearing En Banc, but clarified its opinion affirming dismissal of the claims by stating that CarrAmerica had standing to pursue claims for interference with contractual relations, fraud, conspiracy and tort of another, and remanding Carlyle's case with instructions that the District Court evaluate whether the Trustee had abandoned any claims, which Carlyle might have standing to pursue.

The District Court held a status conference in the CarrAmerica and Carlyle cases on March 9, 2009. That same day, 3dfx's bankruptcy Trustee filed in the bankruptcy court a Notice of Trustee's Intention to Compromise Controversy with Carlyle Fortran Trust. According to that Notice, the Trustee would abandon any claims it has against us for intentional interference with contract, negligent interference with prospective economic advantage, aiding and abetting breach of fiduciary duty, declaratory relief, unfair business practices and tort of another, in exchange for which Carlyle will withdraw irrevocably its Proof of Claim against the 3dfx bankruptcy estate and waive any further right of distribution from the estate. In light of the Trustee's notice, the District Court ordered the parties to seek a hearing on the Notice on or before April 24, 2009, ordered Carlyle and CarrAmerica to file amended complaints by May 10, 2009, and set a further Case Management Conference for May 18, 2009. The parties have filed a stipulation requesting that the District Court vacate the May 18, 2009 Case Management Conference date until after Bankruptcy Court renders its decision. At a hearing on May 13, 2009, the Bankruptcy Court ruled that the Trustee had not abandoned any claims against us, and denied the Trustee's Notice of Intention to Compromise Controversy with Carlyle Fortran Trust without prejudice.

On April 2, 2009, Carlyle filed a petition for a writ of certiorari in the United States Supreme Court, seeking review of the Court of Appeals decision. We continue to believe that there is no merit to Carlyle or CarrAmerica's remaining claims.

Trustee Lawsuit.

In March 2003, the Trustee appointed by the Bankruptcy Court to represent 3dfx's bankruptcy estate served his complaint on NVIDIA. The Trustee's complaint asserts claims for, among other things, successor liability and fraudulent transfer and seeks additional payments from us. The Trustee's fraudulent transfer theory alleged that NVIDIA had failed to pay reasonably equivalent value for 3dfx's assets, and sought recovery of the difference between the \$70 million paid and the alleged fair value, which the Trustee estimated to exceed \$50 million. The Trustee's successor liability theory alleged NVIDIA was effectively 3dfx's legal successor and was therefore responsible for all of 3dfx's unpaid liabilities. This action was consolidated for pretrial purposes with the landlord cases, as noted above.

On October 13, 2005, the Bankruptcy Court heard the Trustee's motion for summary adjudication, and on December 23, 2005, denied that motion in all material respects and held that NVIDIA may not dispute that the value of the 3dfx transaction was less than \$108 million. The Bankruptcy Court denied the Trustee's request to find that the value of the 3dfx assets conveyed to NVIDIA was at least \$108 million.

In early November 2005, after several months of mediation, NVIDIA and the Official Committee of Unsecured Creditors, or the Creditors' Committee, agreed to a Plan of Liquidation of 3dfx, which included a conditional settlement of the Trustee's claims against us. This conditional settlement was subject to a confirmation process through a vote of creditors and the review and approval of the Bankruptcy Court. The conditional settlement called for a payment by NVIDIA of approximately \$30.6 million to the 3dfx estate. Under the settlement, \$5.6 million related to various administrative expenses and Trustee fees, and \$25.0 million related to the satisfaction of debts and liabilities owed to the general unsecured creditors of 3dfx. Accordingly, during the three month period ended October 30, 2005, we recorded \$5.6 million as a charge to settlement costs and \$25.0 million as additional purchase price for 3dfx. The Trustee advised that he intended to object to the settlement. The conditional settlement never progressed substantially through the confirmation process.

On December 21, 2006, the Bankruptcy Court scheduled a trial for one portion of the Trustee's case against NVIDIA. On January 2, 2007, NVIDIA terminated the settlement agreement on grounds that the Bankruptcy Court had failed to proceed toward confirmation of the Creditors' Committee's plan. A non-jury trial began on March 21, 2007 on valuation issues in the Trustee's constructive fraudulent transfer claims against NVIDIA. Specifically, the Bankruptcy Court tried four questions: (1) what did 3dfx transfer to NVIDIA in the APA?; (2) of what was transferred, what qualifies as "property" subject to the Bankruptcy Court's avoidance powers under the Uniform Fraudulent Transfer Act and relevant bankruptcy code provisions?; (3) what is the fair market value of the "property" identified in answer to question (2)?; and (4) was the \$70 million that NVIDIA paid "reasonably equivalent" to the fair market value of that property? The parties completed post-trial briefing on May 25, 2007.

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

On April 30, 2008, the Bankruptcy Court issued its Memorandum Decision After Trial, in which it provided a detailed summary of the trial proceedings and the parties' contentions and evidence and concluded that "the creditors of 3dfx were not injured by the Transaction." This decision did not entirely dispose of the Trustee's action, however, as the Trustee's claims for successor liability and intentional fraudulent conveyance were still pending. On June 19, 2008, NVIDIA filed a motion for summary judgment to convert the Memorandum Decision After Trial to a final judgment. That motion was granted in its entirety and judgment was entered in NVIDIA's favor on September 11, 2008. The Trustee filed a Notice of Appeal from that judgment on September 22, 2008, and on September 25, 2008, NVIDIA exercised its election to have the appeal heard by the United States District Court, where the appeal is pending. The District Court has set the Trustee's appeal for hearing on June 10, 2009.

While the conditional settlement reached in November 2005 never progressed through the confirmation process, the Trustee's case still remains pending appeal. As such, we have not reversed the accrual of \$30.6 million - \$5.6 million as a charge to settlement costs and \$25.0 million as additional purchase price for 3dfx - that we recorded during the three months ended October 30, 2005, pending resolution of the appeal of the Trustee's case. We do not believe the resolution of this matter will have a material impact on our results of operations or financial position.

The Equity Committee Lawsuit.

On December 8, 2005, the Trustee filed a Form 8-K on behalf of 3dfx, disclosing the terms of the conditional settlement agreement between NVIDIA and the Creditor's Committee. Thereafter, certain 3dfx shareholders filed a petition with the Bankruptcy Court to appoint an official committee to represent the claimed interests of 3dfx shareholders. The court granted that petition and appointed an Equity Securities Holders' Committee, or the Equity Committee. The Equity Committee thereafter sought and obtained an order granting it standing to bring suit against NVIDIA, for the benefit of the bankruptcy estate, to compel NVIDIA to pay the stock consideration then unpaid from the APA, and filed its own competing plan of reorganization/liquidation. The Equity Committee's plan assumes that 3dfx can raise additional equity capital that would be used to retire all of 3dfx's debts, and thus to trigger NVIDIA's obligation to pay six million shares of stock consideration specified in the APA. NVIDIA contends, among other things, that such a commitment is not sufficient and that its obligation to pay the stock consideration had long before been extinguished. On May 1, 2006, the Equity Committee filed its lawsuit for declaratory relief to compel NVIDIA to pay the stock consideration. In addition, the Equity Committee filed a motion seeking Bankruptcy Court approval of investor protections for Harbinger Capital Partners Master Fund I, Ltd., an equity investment fund that conditionally agreed to pay no more than \$51.5 million for preferred stock in 3dfx. The hearing on that motion was held on January 18, 2007, and the Bankruptcy Court approved the proposed protections.

After the Bankruptcy Court denied our motion to dismiss on September 6, 2006, the Equity Committee again amended its complaint, and NVIDIA moved to dismiss that amended complaint as well. On December 21, 2006, the Bankruptcy Court granted the motion as to one of the Equity Committee's claims, and denied it as to the others. However, the Bankruptcy Court also ruled that NVIDIA would only be required to answer the first three causes of action by which the Equity Committee seeks determinations that (1) the APA was not terminated before 3dfx filed for bankruptcy protection, (2) the 3dfx bankruptcy estate still holds some rights in the APA, and (3) the APA is capable of being assumed by the bankruptcy estate.

Because of the trial of the Trustee's fraudulent transfer claims against NVIDIA, the Equity Committee's lawsuit did not progress substantially in 2007. On July 31, 2008, the Equity Committee filed a motion for summary judgment on its

first three causes of action. On September 15, 2008, NVIDIA filed a cross-motion for summary judgment. On October 24, 2008, the Court held a hearing on the parties' cross-motions for summary judgment. On January 6, 2009, the Bankruptcy Court issued a Memorandum Decision granting NVIDIA's motion and denying the Equity Committee's motion, and entered an Order to that effect on January 30, 2009. On February 27, 2009, the Bankruptcy Court entered judgment in favor of NVIDIA. The Equity Committee has waived its right to appeal by stipulation entered on February 18, 2009, and the judgment is now final.

Proceedings, SEC inquiry and lawsuits related to our historical stock option granting practices

In June 2006, the Audit Committee of the Board of NVIDIA, or Audit Committee, began a review of our stock option practices based on the results of an internal review voluntarily undertaken by management. The Audit Committee, with the assistance of outside legal counsel, completed its review on November 13, 2006 when the Audit Committee reported its findings to our full Board. The review covered option grants to all employees, directors and consultants for all grant dates during the period from our initial public offering in January 1999 through June 2006. Based on the findings of the Audit Committee and our internal review, we identified a number of occasions on which we used an incorrect measurement date for financial accounting and reporting purposes.

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

We voluntarily contacted the SEC regarding the Audit Committee's review. In late August 2006, the SEC initiated an inquiry related to our historical stock option grant practices. In October 2006, we met with the SEC and provided it with a review of the status of the Audit Committee's review. In November 2006, we voluntarily provided the SEC with additional documents. We continued to cooperate with the SEC throughout its inquiry. On October 26, 2007, the SEC formally notified us that the SEC's investigation concerning our historical stock option granting practices had been terminated and that no enforcement action was recommended.

Concurrently with our internal review and the SEC's inquiry, since September 29, 2006, ten derivative cases were filed in state and federal courts asserting claims concerning errors related to our historical stock option granting practices and associated accounting for stock-based compensation expense. These complaints were filed in various courts, including the California Superior Court, Santa Clara County, the United States District Court for the Northern District of California, and the Court of Chancery of the State of Delaware in and for New Castle County. The California Superior Court cases were subsequently consolidated as were the cases pending in the Northern District of California. All of the cases purported to be brought derivatively on behalf of NVIDIA against members of our Board and several of our current and former officers and directors. Plaintiffs in these actions alleged claims for, among other things, breach of fiduciary duty, unjust enrichment, insider selling, abuse of control, gross mismanagement, waste, and constructive fraud. The Northern District of California action also alleged violations of federal provisions, including Sections 10(b) and 14(a) of the Securities Exchange Act of 1934. The plaintiffs sought to recover for NVIDIA, among other things, damages in an unspecified amount, rescission, punitive damages, treble damages for insider selling, and fees and costs. Plaintiffs also sought an accounting, a constructive trust and other equitable relief.

On August 5, 2007, our Board authorized the formation of a Special Litigation Committee to investigate, evaluate, and make a determination as to how NVIDIA should proceed with respect to the claims and allegations asserted in the underlying derivative cases brought on behalf of NVIDIA. Between June 2007 and September 2008 the parties to the actions and the Special Litigation Committee engaged in settlement discussions, including four mediation sessions before the Honorable Edward Infante (Ret.). On September 22, 2008, we disclosed that we had entered into Memoranda of Understanding regarding the settlement of all derivative actions concerning our historical stock option granting practices. On November 10, 2008, the definitive settlement agreements were concurrently filed in the Chancery Court of Delaware and the United States District Court for the Northern District of California. The settlement agreements do not contain any admission of wrongdoing or fault on the part of NVIDIA, our board of directors or executive officers. The terms of the settlement agreements include, among other things, the agreement by the board of directors to continue and to implement certain corporate governance changes; acknowledgement of the prior amendment of certain options through re-pricings and limitations of the relevant exercise periods; an agreement by Jen-Hsun Huang, our president and chief executive officer, to amend additional options to increase the aggregate exercise price of such options by \$3.5 million or to cancel options with an intrinsic value of \$3.5 million; an \$8.0 million cash payment by our insurance carrier to NVIDIA; and an agreement to not object to attorneys' fees to be paid by NVIDIA to plaintiffs' counsel of no more than \$7.25 million, if approved by the courts. On January 24, 2009, a Notice of Pendency and Settlement of Shareholder Derivative Actions was mailed to shareholders of record and posted on www.nvidia.com. On March 11, 2009, a final settlement hearing was held in the Delaware Chancery Court and, on the same date, the Court entered a Final Order and Judgment, which approved the settlement and requested attorneys' fees, and dismissed the Delaware action with prejudice. On March 17, 2009, a final settlement hearing was held in the District Court for the Northern District of California. The following day, the District Court entered an Order and Final Judgment approving the settlement and requested attorneys' fees, and dismissing the action

with prejudice. On April 2, 2009, pursuant to the settlement approved by the District Court, the parties to the action pending in the California Superior Court, Santa Clara County filed a stipulation to have the Santa Clara action dismissed. On April 6, 2009, the Santa Clara Superior Court granted the stipulation and dismissed the action with prejudice.

Department of Justice Subpoena and Investigation, and Civil Cases

On November 29, 2006, we received a subpoena from the San Francisco Office of the Antitrust Division of the United States Department of Justice, or DOJ, in connection with the DOJ's investigation into potential antitrust violations related to GPUs and cards. On October 10, 2008, the DOJ formally notified us that the DOJ investigation has been closed. No specific allegations were made against NVIDIA during the investigation.

As of January 25, 2009, over 50 civil complaints have been filed against us. The majority of the complaints were filed in the Northern District of California, several were filed in the Central District of California, and other cases were filed in several other Federal district courts. On April 18, 2007, the Judicial Panel on Multidistrict Litigation transferred the actions currently pending outside of the Northern District of California to the Northern District of California for coordination of pretrial proceedings before the Honorable William H. Alsup. By agreement of the parties, Judge Alsup will retain jurisdiction over the consolidated cases through trial or other resolution.

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

In the consolidated proceedings, two groups of plaintiffs (one putatively representing all direct purchasers of GPUs and the other putatively representing all indirect purchasers) filed consolidated, amended class-action complaints. These complaints purport to assert federal antitrust claims based on alleged price fixing, market allocation, and other alleged anti-competitive agreements between us and ATI Technologies, ULC., or ATI, and Advanced Micro Devices, Inc., or AMD, as a result of its acquisition of ATI. The indirect purchasers' consolidated amended complaint also asserts a variety of state law antitrust, unfair competition and consumer protection claims on the same allegations, as well as a common law claim for unjust enrichment.

Plaintiffs filed their first consolidated complaints on June 14, 2007. On July 16, 2007, we moved to dismiss those complaints. The motions to dismiss were heard by Judge Alsup on September 20, 2007. The court subsequently granted and denied the motions in part, and gave the plaintiffs leave to move to amend the complaints. On November 7, 2007, the court granted plaintiffs' motion to file amended complaints, ordered defendants to answer the complaints, lifted a previously entered stay on discovery, and set a trial date for January 12, 2009. Plaintiffs filed motions for class certification on April 24, 2008. We filed oppositions to the motions on May 20, 2008. On July 18, 2008, the court ruled on Plaintiffs' class certification motions. The court denied class certification for the proposed class of indirect purchasers. The court granted in part class certification for the direct purchasers but limited the direct purchaser class to individual purchasers that acquired graphics processing cards products directly from NVIDIA or ATI from their websites between December 4, 2002 and November 7, 2007.

On September 16, 2008, we executed a settlement agreement, or the Agreement, in connection with the claims of the certified class of direct purchaser plaintiffs approved by the court. Pursuant to the Agreement, NVIDIA has paid \$850,000 into a \$1.7 million fund to be made available for payments to the certified class. We are not obligated under the Agreement to pay plaintiffs' attorneys' fees, costs, or make any other payments in connection with the settlement other than the payment of \$850,000. The Agreement has received final approval from the court and disposes of all claims and appeals raised by the certified class in the complaints against NVIDIA. Because the Court certified a class consisting only of a narrow group of direct purchasers, the Agreement does not resolve any claims that other direct purchasers may assert. In addition, on September 9, 2008, we reached a settlement agreement with the remaining individual indirect purchaser plaintiffs pursuant to which NVIDIA paid \$112,500 in exchange for a dismissal of all claims and appeals related to the complaints raised by the individual indirect purchaser plaintiffs. This settlement is not subject to the approval of the court. Pursuant to the settlement, the individual indirect purchaser plaintiffs in the complaints have dismissed their claims and withdrawn their appeal of the class certification ruling. Because the Court did not certify a class of indirect purchasers, this settlement agreement resolves only the claims of those indirect purchasers that were named in the various actions.

Rambus Corporation

On July 10, 2008, Rambus Corporation, or Rambus, filed suit against NVIDIA Corporation, asserting patent infringement of 17 patents claimed to be owned by Rambus. Rambus seeks damages, enhanced damages and injunctive relief. The lawsuit was filed in the Northern District of California in San Jose, California. On July 11, 2008, NVIDIA filed suit against Rambus in the Middle District of North Carolina asserting numerous claims, including antitrust and other claims. NVIDIA seeks damages, enhanced damages and injunctive relief. Rambus has since dropped two patents from its lawsuit in the Northern District of California. The two cases have recently been consolidated into a single proceeding in the Northern District of California. On April 13, 2009, the Court issued an order staying motion practice and allowing only document discovery to proceed. A case management conference is

scheduled for August 21, 2009. On November 6, 2008, Rambus filed a complaint alleging a violation of 19 U.S.C. Section 1337 based on a claim of patent infringement against NVIDIA and 14 other respondents with the U.S. International Trade Commission, or ITC. The complaint seeks an exclusion order barring the importation of products that allegedly infringe nine Rambus patents. The ITC has instituted the investigation and a trial is currently scheduled to begin August 17, 2009. NVIDIA intends to pursue its offensive and defensive cases vigorously in both actions.

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Product Defect Litigation and Securities Cases

In September, October and November 2008, several putative consumer class action lawsuits were filed against us, asserting various claims arising from a weak die/package material set in certain versions of our previous generation MCP and GPU products used in notebook systems. Most of the lawsuits were filed in Federal Court in the Northern District of California, but three were filed in state court in California, in Federal Court in New York, and in Federal Court in Texas. Those three actions have since been removed or transferred to the United States District Court for the Northern District of California, San Jose Division, where all of the actions now are currently pending. The various lawsuits are titled *Nakash v. NVIDIA Corp.*, *Feinstein v. NVIDIA Corp.*, *Inicom Networks, Inc. v. NVIDIA Corp.* and *Dell, Inc. and Hewlett Packard, Olivos v. NVIDIA Corp.*, *Dell, Inc. and Hewlett Packard*, *Sielicki v. NVIDIA Corp. and Dell, Inc.*, *Cormier v. NVIDIA Corp.*, *National Business Officers Association, Inc. v. NVIDIA Corp.*, and *West v. NVIDIA Corp.* The First Amended Complaint was filed on October 27, 2008, which no longer asserted claims against Dell, Inc. The various complaints assert claims for, among other things, breach of warranty, violations of the Consumer Legal Remedies Act, Business & Professions Code sections 17200 and 17500 and other consumer protection statutes under the laws of various jurisdictions, unjust enrichment, and strict liability.

The District Court has entered orders deeming all of the above cases related under the relevant local rules. On December 11, 2008, NVIDIA filed a motion to consolidate all of the aforementioned consumer class action cases. On February 26, 2009, the District Court consolidated the cases, as well as two other cases pending against Hewlett-Packard, under the caption "The NVIDIA GPU Litigation" and ordered the plaintiffs to file lead counsel motions by March 2, 2009. On March 2, 2009, several of the parties filed motions for appointment of lead counsel and briefs addressing certain related issues. On April 10, 2009, the District Court appointed Milberg LLP lead counsel. On May 6, 2009, the plaintiffs filed an Amended Consolidated Complaint, alleging claims for violations of California Business and Professions Code Section 17200, Breach of Implied Warranty under California Civil Code Section 1792, Breach of the Implied Warranty of Merchantability under the laws of 27 other states, Breach of Warranty under the Magnuson-Moss Warranty Act, Unjust Enrichment, violations of the New Jersey Consumer Fraud Act, Strict Liability and Negligence, and violation of California's Consumer Legal Remedies Act. On May 14, 2009, the District Court entered a case schedule order, which sets a September 28, 2009 hearing date for an anticipated motion to dismiss, a December 7, 2009 hearing date for anticipated class certification motion, and a July 12, 2010 fact discovery deadline.

In September 2008, three putative securities class actions, or the Actions, were filed in the United States District Court for the Northern District of California arising out of our announcements on July 2, 2008, that we would take a charge against cost of revenue to cover anticipated costs and expenses arising from a weak die/package material set in certain versions of our previous generation MCP and GPU products and that we were revising financial guidance for our second quarter of fiscal year 2009. The Actions purport to be brought on behalf of purchasers of NVIDIA stock and assert claims for violations of Sections 10(b) and 20(a) of the Securities Exchange Act of 1934, as amended. On October 30, 2008, the Actions were consolidated under the caption *In re NVIDIA Corporation Securities Litigation*, Civil Action No. 08-CV-04260-JW (HRL). Lead Plaintiffs and Lead Plaintiffs' Counsel were appointed on December 23, 2008. On February 6, 2009, co-Lead Plaintiff filed a Writ of Mandamus with the Ninth Circuit Court of Appeals challenging the designation of co-Lead Plaintiffs' Counsel. On February 19, 2009, co-Lead Plaintiff filed with the District Court, a motion to stay the District Court proceedings pending resolution of the Writ of Mandamus by the Ninth Circuit. On February 24, 2009, Judge Ware granted the stay. The Writ is still pending in the Court of Appeals. We intend to take all appropriate action with respect to the above cases.

Intel Corporation

On February 17, 2009, Intel Corporation filed suit against NVIDIA Corporation, seeking declaratory and injunctive relief relating to a licensing agreement that the parties signed in 2004. The lawsuit was filed in Delaware Chancery Court. Intel seeks an order from the Court declaring that the license does not extend to certain future NVIDIA chipset products, and enjoining NVIDIA from stating that it has licensing rights for these products. The lawsuit seeks no damages from NVIDIA. If Intel successfully obtains such a court order, we could be unable to sell our MCP products for use with certain Intel processors and our competitive position would be harmed.

On March 23, 2009, we filed our answer to Intel's complaint and also asserted counterclaims for declaratory relief, injunctive relief, breach of contract, and breach of the implied covenant of good faith and fair dealing. Our counterclaims seek an order declaring that NVIDIA has the right to sell certain chipset products with Intel's processors under the 2004 licensing agreement, and enjoining Intel from interfering with NVIDIA's licensing rights. In addition, the counterclaims seek a finding that Intel has materially breached its obligations under the 2004 licensing agreement, and requests various remedies for that breach, including termination of Intel's cross licensing rights. On April 16, 2009, Intel filed its answer to our counterclaims.

The case is still in its preliminary stages and no trial date has been set. NVIDIA disputes Intel's claims and intends to vigorously defend these claims, as well as pursue its counterclaims.

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Note 13 - Stockholders' Equity

Stock Repurchase Program

During fiscal year 2005, we announced that our Board of Directors, or Board, had authorized a stock repurchase program to repurchase shares of our common stock, subject to certain specifications, up to an aggregate maximum amount of \$300 million. During fiscal year 2007, the Board further approved an increase of \$400 million to the original stock repurchase program. In fiscal year 2008, we announced a stock repurchase program under which we may purchase up to an additional \$1.0 billion of our common stock over a three year period through May 2010. On August 12, 2008, we announced that our Board further authorized an additional increase of \$1.0 billion to the stock repurchase program. As a result of these increases, we have an ongoing authorization from the Board, subject to certain specifications, to repurchase shares of our common stock up to an aggregate maximum amount of \$2.7 billion through May 2010.

The repurchases will be made from time to time in the open market, in privately negotiated transactions, or in structured stock repurchase programs, and may be made in one or more larger repurchases, in compliance with the Securities Exchange Act of 1934 Rule 10b-18, subject to market conditions, applicable legal requirements, and other factors. The program does not obligate NVIDIA to acquire any particular amount of common stock and the program may be suspended at any time at our discretion. As part of our share repurchase program, we have entered into, and we may continue to enter into, structured share repurchase transactions with financial institutions. These agreements generally require that we make an up-front payment in exchange for the right to receive a fixed number of shares of our common stock upon execution of the agreement, and a potential incremental number of shares of our common stock, within a pre-determined range, at the end of the term of the agreement.

During the three months ended April 26, 2009, we did not enter into any structured share repurchase transactions or otherwise purchase any shares of our common stock. Through April 26, 2009, we have repurchased an aggregate of 90.9 million shares under our stock repurchase program for a total cost of \$1.46 billion. As of April 26, 2009, we are authorized, subject to certain specifications, to repurchase shares of our common stock up to an additional amount of \$1.24 billion through May 2010.

Please refer to Note 3 and Note 4 of the Notes to Condensed Consolidated Financial Statements for further information regarding stock-based compensation related to our March 2009 stock option purchase and related to equity awards granted under our equity incentive programs.

Convertible Preferred Stock

As of April 26, 2009 and January 25, 2009, there were no shares of preferred stock outstanding.

Note 14 - Comprehensive Income (Loss)

Comprehensive income (loss) consists of net income (loss) and other comprehensive income (loss). Other comprehensive income or loss components include unrealized gains or losses on available-for-sale securities, net of tax. The components of comprehensive income, net of tax, were as follows:

	Three Months Ended	
	April 26, 2009	April 27, 2008
	(In thousands)	
Net income (loss)	\$ (201,338)	\$ 176,805
Net change in unrealized gains (losses) on available-for-sale securities, net of tax	1,609	(5,631)
Reclassification adjustments for net realized gains (losses) on available-for-sale securities included in net income (loss), net of tax	(543)	(854)
Total comprehensive income (loss)	\$ (200,272)	\$ 170,320

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Note 15 - Segment Information

Our Chief Executive Officer, who is considered to be our chief operating decision maker, or CODM, reviews financial information presented on an operating segment basis for purposes of making operating decisions and assessing financial performance.

We report financial information for four operating segments to our CODM: the GPU business, which is comprised primarily of our GeForce products that support desktop and notebook personal computers, or PCs, plus memory products; the professional solutions business, or PSB, which is comprised of our NVIDIA Quadro professional workstation products and other professional graphics products, including our NVIDIA Tesla high-performance computing products; the media and communications processor, or MCP, business which is comprised of NVIDIA nForce core logic and motherboard GPU products; and our consumer products business, or CPB, which is comprised of our GoForce and APX mobile brands and products that support handheld personal media players, or PMPs, personal digital assistants, or PDAs, cellular phones and other handheld devices. CPB also includes license, royalty, other revenue and associated costs related to video game consoles and other digital consumer electronics devices.

In addition to these operating segments, we have the “All Other” category that includes human resources, legal, finance, general administration, corporate marketing expenses and charges related to the stock option purchase, all of which total up to \$199.4 million and \$76.2 million for the three months ended April 26, 2009 and April 27, 2008, respectively, that we do not allocate to our other operating segments as these expenses are not included in the segment operating performance measures evaluated by our CODM. “All Other” also includes the results of operations of other miscellaneous reporting segments that are neither individually reportable, nor aggregated with another operating segment. Revenue in the “All Other” category is primarily derived from sales of components.

Our CODM does not review any information regarding total assets on an operating segment basis. Operating segments do not record intersegment revenue, and, accordingly, there is none to be reported. The accounting policies for segment reporting are the same as for NVIDIA as a whole.

	GPU	PSB	MCP	CPB	All Other	Consolidated
Three Months Ended April 26, 2009:						
	(In thousands)					
Revenue	\$ 354,871	\$ 106,148	\$ 186,444	\$ 11,881	\$ 4,887	\$ 664,231

Revenue by geographic region is allocated to individual countries based on the location to which the products are initially billed even if our customers' revenue is attributable to end customers that are located in a different location.

The following tables summarize information pertaining to our revenue from customers based on invoicing address in different geographic regions:

Revenue:	Three Months Ended	
	April 26, 2009	April 27, 2008
	(In thousands)	
China	\$ 260,150	\$ 367,426
Taiwan	166,436	391,628
Other Americas	70,603	695
Other Asia Pacific	70,484	167,854
United States	51,890	93,831
Europe	44,668	131,954
Total revenue	\$ 664,231	\$ 1,153,388

NVIDIA CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Revenue from significant customers, those representing 10% or more of total revenue aggregated approximately 22% of our total revenue from two customers for the three months ended April 26, 2009 and approximately 11% of our total revenue from another customer for the three months ended April 27, 2008.

Accounts receivable from significant customers, those representing 10% or more of total accounts receivable aggregated approximately 27% of our accounts receivable balance from two customers at April 26, 2009 and approximately 38% of our accounts receivable balance from three customers at January 25, 2009.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are subject to the "safe harbor" created by those sections. Forward-looking statements are based on our management's beliefs and assumptions and on information currently available to our management. In some cases, you can identify forward-looking statements by terms such as "may," "will," "should," "could," "goal," "would," "expect," "plan," "anticipate," "estimate," "project," "predict," "potential" and similar expressions intended to identify forward-looking statements. These statements involve known and unknown risks, uncertainties and other factors, which may cause our actual results, performance, time frames or achievements to be materially different from any future results, performance, time frames or achievements expressed or implied by the forward-looking statements. We discuss many of these risks, uncertainties and other factors in this Quarterly Report on Form 10-Q in greater detail under the heading "Risk Factors." Given these risks, uncertainties and other factors, you should not place undue reliance on these forward-looking statements. Also, these forward-looking statements represent our estimates and assumptions only as of the date of this filing. You should read this Quarterly Report on Form 10-Q completely and with the understanding that our actual future results may be materially different from what we expect. We hereby qualify our forward-looking statements by these cautionary statements. Except as required by law, we assume no obligation to update these forward-looking statements publicly, or to update the reasons actual results could differ materially from those anticipated in these forward-looking statements, even if new information becomes available in the future.

All references to "NVIDIA," "we," "us," "our" or the "Company" mean NVIDIA Corporation and its subsidiaries, except where it is made clear that the term means only the parent company.

NVIDIA, GeForce, SLI, Hybrid SLI, GoForce, NVIDIA Quadro, Quadro, NVIDIA Quadro Plex, NVIDIA nForce, PureVideo, CUDA, Tesla, NVIDIA APX, PhysX, Ageia, Mental Images, Mental Ray, and the NVIDIA logo are our trademarks and/or registered trademarks in the United States and other countries that are used in this document. We may also refer to trademarks of other corporations and organizations in this document.

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with "Item 6. Selected Financial Data" of our Annual Report on Form 10-K for the fiscal year ended January 25, 2009 and Part II, "Item 1A. Risk Factors", of our Condensed Consolidated Financial Statements and related Notes thereto, as well as other cautionary statements and risks described elsewhere in this Quarterly Report on Form 10-Q, before deciding to purchase, hold or sell shares of our common stock.

Overview

Our Company

NVIDIA Corporation is the worldwide leader in visual computing technologies and the inventor of the graphics processing unit, or the GPU. Our products are designed to generate realistic, interactive graphics on workstations, personal computers, game consoles and mobile devices. We serve the entertainment and consumer market with our GeForce products, the professional design and visualization market with our Quadro products, and the high-performance computing market with our Tesla products. We have four major product-line operating segments: the GPU Business, the professional solutions business, or PSB, the media and communications processor, or MCP,

business, and the consumer products business, or CPB.

Our GPU business is comprised primarily of our GeForce products that support desktop and notebook personal computers, or PCs, plus memory products. Our PSB is comprised of our NVIDIA Quadro professional workstation products and other professional graphics products, including our NVIDIA Tesla high-performance computing products. Our MCP business is comprised of NVIDIA nForce core logic and motherboard GPU, or mGPU products. Our CPB is comprised of our GoForce and APX mobile brands and products that support handheld personal media players, or PMPs, personal digital assistants, or PDAs, cellular phones and other handheld devices. CPB also includes license, royalty, other revenue and associated costs related to video game consoles and other digital consumer electronics devices. Original equipment manufacturers, or OEMs, original design manufacturers, or ODMs, add-in-card manufacturers, system builders and consumer electronics companies worldwide utilize NVIDIA processors as a core component of their entertainment, business and professional solutions.

We were incorporated in California in April 1993 and reincorporated in Delaware in April 1998. Our headquarter facilities are in Santa Clara, California. Our Internet address is www.nvidia.com. The contents of our website are not a part of this Form 10-Q.

Recent Developments, Future Objectives and Challenges

GPU Business

Our market share in the total desktop standalone GPU segment grew from 63 percent to 69 percent from the fourth quarter of calendar 2008 to the first quarter of calendar 2009, as reported in Mercury Research's First Quarter PC Graphics Report in April 2009. In addition to graphics leadership, we are focusing on leading the industry with physics processing and evangelizing the benefits of utilizing the GPU for parallel computing.

Our PhysX engine and library is now available for PCs, game consoles and smart phones. Game developers can utilize PhysX to create environments using physics simulations that are dynamic, realistic and interactive. PhysX has been adopted by many of the video game industry's top companies.

Microsoft's DirectX Compute is a new GPU Computing application programming interface, or API, that runs on our current CUDA architecture under both Windows VISTA and Windows 7. DirectX Compute allows developers to harness the parallel computing power of our GPU's to create compelling computing applications in consumer and professional markets. As part of the DirectX Compute presentation at the Game Developer Conference (GDC) in March 2009, we demonstrated three such applications running on a GeForce GTX 280 GPU. We support languages and API's that enable developers to access the parallel processing power of the GPU. In addition to DirectX Compute and our CUDA C extensions, there are other programming models available including OpenCL. During the first quarter of fiscal year 2010, we released our OpenCL driver and software development kit to developers participating in our OpenCL software Early Access Program.

Professional Solutions Business

Corporate demand, which comprises a substantial percentage of the demand for professional workstation products, has not shown any significant signs of economic recovery. This appears to reflect ongoing constrained corporate budgets and redeployment and/or upgrade activity of older equipment by customers. Workstation product revenue currently comprises a significant portion of our total PSB revenue. Therefore, until corporate demand recovers, we expect this trend to continue to have a negative impact on our overall Company gross profit and gross margin, as the gross margin experienced by our PSB is generally higher than our overall Company gross margin.

During the first quarter of fiscal year 2010, five new consumer applications were launched that are accelerated by the CUDA architecture on our GPUs – Super LoiloScope Mars, for video editing, ArcSoft SimHD, for DVD image enhancement, Nero Move It and Cyberlink MediaShow Espresso, for video format conversion, and Motion DSP vReveal, for real-time video quality enhancement. We recently collaborated with a leading Chinese geophysical services provider to unveil the launch of a new Tesla-based hardware and seismic software suite that accelerates the performance of complex seismic data computation for oil and gas companies in China. We also collaborated with the investment banking division of a leading European financial institution to replace their CPU cores with a smaller cluster consisting of CPU servers and two Tesla GPU-based S1070 systems, which require significantly less power. Factoring the acceleration in processing times achieved using Tesla GPUs, the division is using almost 200 times less electricity than before.

MCP Business

We are currently focused on energizing the PC market by transforming Intel Atom PCs into a premium experience typically found in higher priced laptops and desktops. Our strategy is to combine the GeForce® 9400 GPU found in new desktop and notebook PCs with the Intel Atom CPU. This combination, which is code-named Ion, creates a

platform that enables a premium PC experience in a small form factor – enabling netbooks, small form factor, all-in-one PCs to play rich media content and popular games in high definition.

During the first quarter of fiscal year 2010, we saw signs of increased demand for our products designed for the mainstream AMD integrated desktop market as well as for our Ion products and other products that are designed for the Intel-based integrated notebook market.

During the first quarter of fiscal year 2010, we collaborated with Acer to introduce the Acer AspireRevo. The Acer AspireRevo is no larger than a typical hardcover book, but has a fully capable desktop with advanced graphics and several multimedia features.

Consumer Products Business

During the first quarter of fiscal year 2010, we demonstrated the Tegra 600 Series computer-on-a-chip that enables an always-on, always-connected HD netbook that can go days between battery charges.

Stock Option Purchase

In March 2009, we completed a cash tender offer for certain employee stock options. We use equity to promote employee retention and provide an incentive vehicle valued by employees that is also aligned to stockholder interest. However, our stock price had declined significantly during fiscal 2009, and all of the eligible options were “out-of-the-money” (i.e., had exercise prices above our then-current common stock price). Therefore, we provided an incentive to employees with an opportunity to obtain a cash payment for their eligible options, while reducing our existing overhang and potential stockholder dilution from such stock options. The tender offer applied to outstanding stock options held by employees with an exercise price equal to or greater than \$17.50 per share. None of the non-employee members of our Board of Directors or our officers who file reports under Section 16(a) of the Securities Exchange Act of 1934, including our former Chief Financial Officer, Marvin D. Burkett, were eligible to participate in the tender offer.

All eligible options with exercise prices equal to or greater than \$17.50 per share but less than \$28.00 per share were eligible to receive a cash payment of \$3.00 per option in exchange for the cancellation of the eligible option. All eligible options with exercise prices equal to or greater than \$28.00 per share were eligible to receive a cash payment of \$2.00 per option in exchange for the cancellation of the eligible option. A total of 28.5 million options were tendered under the offer for an aggregate cash purchase price of \$78.1 million, which was paid in exchange for the cancellation of the eligible options. As a result of the tender offer, we incurred a charge of \$140.2 million consisting of the remaining unamortized stock based compensation expense associated with the unvested portion of the options tendered in the offer, stock-based compensation expense resulting from amounts paid in excess of the fair value of the underlying options, plus associated payroll taxes and professional fees. The stock option purchase charge of \$140.2 million relates to personnel associated with cost of revenue (for manufacturing personnel), research and development, and sales, general and administrative of \$11.4 million, \$90.5 million, and \$38.3 million, respectively.

Financial Information by Business Segment and Geographic Data

Our Chief Executive Officer, who is considered to be our chief operating decision maker, or CODM, reviews financial information presented on a operating segment basis for purposes of making operating decisions and assessing financial performance.

We report financial information for four operating segments to our CODM: the GPU business, which is comprised primarily of our GeForce products that support desktop and notebook PCs, plus memory products; the PSB which is comprised of our NVIDIA Quadro professional workstation products and other professional graphics products, including our NVIDIA Tesla high-performance computing products; the MCP business which is comprised of NVIDIA nForce core logic and motherboard GPU products; and our CPB, which is comprised of our GoForce and APX mobile brands and products that support handheld PMPs, PDAs, cellular phones and other handheld devices. CPB also includes license, royalty, other revenue and associated costs related to video game consoles and other digital consumer electronics devices.

In addition to these operating segments, we have the “All Other” category that includes human resources, legal, finance, general administration, corporate marketing expenses and charges related to the stock option purchase, all of which total up to \$199.4 million and \$76.2 million for the three months ended April 26, 2009 and April 27, 2008, respectively, that we do not allocate to our other operating segments as these expenses are not included in the segment operating performance measures evaluated by our CODM. “All Other” also includes the results of operations of other miscellaneous reporting segments that are neither individually reportable, nor aggregated with another operating segment. Revenue in the “All Other” category is primarily derived from sales of components.

Results of Operations

The following table sets forth, for the periods indicated, certain items in our condensed consolidated statements of operations expressed as a percentage of revenue.

	Three Months Ended	
	April 26, 2009	April 27, 2008
Revenue	100.0	100.0%
Cost of revenue	71.4	55.4
Gross margin	28.6	44.6
Operating expenses:		
Research and development	45.4	19.0
Sales, general and administrative	17.9	8.1
Total operating expenses	63.3	27.1
Income (loss) from operations	(34.7)	17.5
Interest and other income, net	0.9	0.9
Income (loss) before income tax expense	(33.8)	18.4
Income tax expense (benefit)	(3.5)	3.1
Net income (loss)	(30.3)	15.3%

First Quarter of Fiscal Years 2010 and 2009

Revenue

Revenue was \$664.2 million for the first quarter of fiscal year 2010, compared to \$1.15 billion for the first quarter of fiscal year 2009, which represents a decrease of 42%. We expect revenue to increase slightly during the second quarter of fiscal year 2010 as compared to the first quarter of fiscal year 2010. A discussion of our revenue results for each of our operating segments is as follows:

GPU Business. GPU Business revenue decreased by 49% to \$354.9 million in the first quarter of fiscal year 2010, compared to \$701.5 million for the first quarter of fiscal year 2009. This decrease resulted from decreased sales of our desktop GPU, notebook GPU and memory products. Sales of our desktop GPU and memory products decreased approximately 48% and 64%, respectively, in fiscal year 2010 when compared to fiscal year 2009. These decreases were primarily due to the year-over-year decline in the Standalone Desktop market segment as reported in the May 2009 PC Graphics Report from Mercury Research. This decline was primarily driven by the decline in unit demand due to the recessionary conditions in the economy, a combination of market migration from desktop PCs towards notebook PCs and a shift in the mix of products sold towards lower priced products which negatively impacted the average sales price, or ASP, of our products. However, as an offset to these conditions, we maintained our leadership position in the Standalone Desktop market segment as reported in the May 2009 PC Graphics Report from Mercury Research which was driven primarily by our GeForce 9-based products. Sales of our notebook GPU products decreased by approximately 51% compared to the first quarter of fiscal year 2009. This decline was primarily driven by a combination of the decline in unit demand due to the recessionary conditions in the economy and a decline in the ASPs due to increased competition in the marketplace. Memory sales declined as a result of a decline in sales of our high-end desktop GPU products.

PSB. PSB revenue decreased by 48% to \$106.1 million in the first quarter of fiscal year 2010, compared to \$203.4 million for the first quarter of fiscal year 2009. Both ASPs and unit shipments of professional workstation products

decreased primarily due to the decline in corporate spending as a result of the recessionary conditions in the economy. This appears to reflect ongoing constrained corporate budgets and redeployment and/or upgrade activity of older equipment by customers.

MCP Business. MCP Business revenue decreased by 4% to \$186.4 million in the first quarter of fiscal year 2010, compared to \$195.1 million for the first quarter of fiscal year 2009. The decrease resulted from a decline in the sale of our higher priced AMD-based platform products offset by an increase in sales of our Intel-based platform products as compared to the first quarter of fiscal year 2009. The increase in Intel-based product sales was driven by sales of our GeForce 9400M mGPU, which we launched in October 2008 along with Apple Inc. for their new lineup of Mac notebooks, and our new GeForce 9400 and 9300 mGPUs for Intel desktop PCs.

CPB. CPB revenue decreased by 72% to \$11.9 million in the first quarter of fiscal year 2010, compared to \$42.5 million for the first quarter of fiscal year 2009. The overall decrease in CPB revenue is primarily driven by a combination of decreases in revenue from our cell phone products, decreases in revenue from certain contractual development arrangements with Sony Computer Entertainment, or SCE, and a drop in royalties from SCE due to lower seasonal sales of PS3 Playstations.

Concentration of Revenue

Revenue from sales to customers outside of the United States accounted for 92% of total revenue for both the first quarter of fiscal year 2009 and the first quarter of fiscal year 2008. Revenue by geographic region is allocated to individual countries based on the location to which the products are initially billed even if the foreign contract equipment manufacturers, or CEMs', add-in board and motherboard manufacturers' revenue is attributable to end customers in a different location.

Revenue from significant customers, those representing 10% or more of total revenue aggregated approximately 22% of our total revenue from two customers for the first quarter of fiscal year 2010 and approximately 11% of our total revenue from another customer for the first quarter of fiscal year 2009.

Gross Profit and Gross Margin

Gross profit consists of total revenue, net of allowances, less cost of revenue. Cost of revenue consists primarily of the cost of semiconductors purchased from subcontractors, including wafer fabrication, assembly, testing and packaging, manufacturing support costs, including labor and overhead associated with such purchases, final test yield fallout, inventory and warranty provisions and shipping costs. Cost of revenue also includes development costs for license, service arrangements and stock-based compensation related to personnel associated with manufacturing.

Gross margin is the percentage of gross profit to revenue. Our gross margin can vary in any period depending on the mix of types of products sold. Our gross margin is significantly impacted by the mix of products we sell. Product mix is often difficult to estimate with accuracy. Therefore, if we experience product transition challenges, if we achieve significant revenue growth in our lower margin product lines, or if we are unable to earn as much revenue as we expect from higher margin product lines, our gross margin may be negatively impacted.

Our overall gross margin was 28.6% and 44.6% for the first quarter of fiscal year 2010 and 2009, respectively. The decline in gross margin for the first quarter of fiscal year 2010 when compared to the first quarter of fiscal year 2009 was driven primarily by the decline in desktop GPU gross margin and the impact of the stock-based compensation charges related to the stock option purchase completed in March 2009. The decline in desktop GPU gross margin reflects the impact of ASP regression in our products caused by a combination of the recessionary conditions in the economy and increased competitive pricing pressures that we began to experience during the second quarter of fiscal year 2009. The ASP regression was also driven by a combination of market migration from desktop PCs towards notebook PCs and an overall market shift in the mix of products towards lower priced products. These factors were further exacerbated in the first quarter of fiscal year 2010 as a result of losses we incurred selling certain older, transitioning products. These losses were only partially offset by a net benefit of approximately \$8 million arising from a combination of new inventory write downs that we recorded during the first quarter of fiscal year 2010 offset by the sell-through of inventory that had previously been written down in the fourth quarter of 2009.

We will continue to focus on improving our gross margin by delivering cost effective product architectures, enhancing business processes and delivering profitable growth. As such, we expect gross margin to increase during the second quarter of fiscal year 2010 as compared to the first quarter of fiscal year 2010.

A discussion of our gross margin results for each of our operating segments is as follows:

GPU Business. The gross margin of our GPU business decreased during fiscal year 2010 as compared to fiscal year 2009. This decrease was primarily due to the ASP decline in our GeForce 9-based and previous generations of desktop products resulting from the recessionary conditions in the economy and increased competition. The ASP

regression was also driven by a combination of market migration from desktop PCs towards notebook PCs and an overall market shift in the mix of products towards lower priced products. These factors were further exacerbated in the first quarter of fiscal year 2010 as a result of losses we incurred selling certain older, transitioning products. This decrease in gross margins was only partially offset by a net benefit arising from a combination of new inventory write downs that we recorded during the first quarter of fiscal year 2010 offset by the sell-through of inventory that had previously been written down in the fourth quarter of 2009.

PSB. The gross margin of our PSB decreased during fiscal year 2010 as compared to fiscal year 2009. This decrease was primarily due to a decline in ASPs caused primarily by pricing pressure from an overall decline in corporate spending as a result of the recessionary conditions in the economy.

MCP Business. The gross margin of our MCP Business decreased slightly for the first quarter of fiscal year 2010 as compared to the first quarter of fiscal year 2009. This decrease was primarily due to a shift in product mix toward increased shipments of lower margin Intel-based and AMD-based platform products.

CPB. The gross margin of our CPB decreased for the first quarter of fiscal year 2010 as compared to the first quarter of fiscal year 2009. This decrease was due to a decline in the sales of our cell phone products and other handheld devices, the negative impact of approximately \$10.0 million of additional inventory reserves taken during the quarter related to this business, as well as a drop in royalties from SCE.

Operating Expenses

	Three Months Ended		\$	%
	April 26, 2009	April 27, 2008		
	(In millions)			
Research and development expenses	\$ 301.8	\$ 218.8	\$ 83.0	38%
Sales, general and administrative expenses	118.9	93.1	25.8	28%
Total operating expenses	\$ 420.7	\$ 311.9	\$ 108.8	35%
Research and development as a percentage of net revenue	45.4 %	19.0%		
Sales, general and administrative as a percentage of net revenue	17.9 %	8.1%		

Research and Development

Research and development expenses were \$301.8 million and \$218.8 million during the first quarters of fiscal years 2010 and 2009, respectively, an increase of \$83.0 million, or 38%. During the first quarter of fiscal year 2010, research and development expenses included stock-based compensation of \$90.5 million related to the purchase of certain outstanding options that were tendered in March 2009. The increase in research and development expenses was also driven by an increase of \$2.5 million in depreciation and amortization due to the impact of the property and equipment and intangible asset purchased since fiscal year 2009. These increases were offset by decreases that were primarily related to our cost reduction initiatives across several discretionary spending areas, which resulted in decreased expenses related to travel and entertainment by \$2.4 million, development expenses by \$4.1 million and computer software and equipment by \$3.1 million. Additionally, stock-based compensation related to on-going vesting of equity awards during the first quarter of fiscal year 2010 decreased by \$3.3 million primarily due to the cancellation of stock options as a result of the purchase of certain outstanding options that were tendered in March 2009. Salaries and benefits remained comparable during the periods as a result of a decline in the bonus and incentive expense for the first quarter of fiscal year 2010 offset by the growth in headcount in departments related to research and development functions by approximately 100 personnel.

In order to remain competitive, we anticipate that we will continue to devote substantial resources to research and development. Research and development expenses are likely to fluctuate from time to time to the extent we make periodic incremental investments in research and development and these investments may be independent of our level of revenue.

Sales, General and Administrative

Sales, general and administrative expenses were \$118.9 million and \$93.1 million during the first quarters of fiscal years 2010 and 2009, respectively, an increase of \$25.8 million, or 28%. During the first quarter of fiscal year 2010, sales, general and administrative expenses included stock-based compensation of \$38.3 million related to the purchase of certain outstanding options that were tendered in March 2009. The increase in sales, general and administrative expenses was also driven by an increase in depreciation and amortization by \$3.5 million due to the impact of the property and equipment purchased since fiscal year 2009. Outside professional fees also increased by \$5.2 million primarily due to an increase in legal expenses incurred pertaining to on-going litigation matters. These increases were offset by decreases in salaries and benefits primarily due to the decrease in the bonus and incentives expenses for the first quarter of fiscal year 2010. Additionally, as a result of our cost reduction initiatives across several discretionary spending areas, we decreased expenses related to travel and entertainment by \$2.5 million, employee expenses by \$1.8

million, fees and charges by \$1.3 million, marketing expenses by \$2.0 million and computer software and equipment by \$2.9 million. Additionally, stock-based compensation related to on-going vesting of equity awards decreased by \$3.8 million primarily due to the cancellation of stock options as a result of the purchase of certain outstanding options that were tendered in March 2009.

We expect operating expenses to decrease in the second quarter of fiscal year 2010 compared to the first quarter of fiscal year 2010.

Interest Income

Interest income consists of interest earned on cash, cash equivalents and marketable securities. Interest income decreased to \$6.1 million in first quarter of fiscal year 2010, from \$14.3 million in first quarter of fiscal year 2009, primarily due to the result of lower interest rates in the first quarter of fiscal year 2010 which were lower when compared to the first quarter of fiscal year 2009. Additionally, average balances of cash, cash equivalents and marketable securities were lower in the first quarter of fiscal year 2010 when compared to the first quarter of fiscal year 2009.

Other Expense, net

Net other expenses decreased by \$4.3 million in the first quarter of fiscal year 2010 when compared to the first quarter of fiscal year 2009. During the first quarter of fiscal year 2009, other expense was higher, primarily due to the impact of the weakness of the U.S. Dollar on our foreign currency denominated liabilities, which resulted in foreign exchange losses. During the first quarter of 2010, the fluctuations in the U.S. Dollar did not result in material foreign exchange losses.

Income Taxes

We recognized income tax expense (benefit) of (\$23.5) million and \$36.2 million for the first quarter of fiscal year 2010 and 2009, respectively. Income tax expense (benefit) as a percentage of income before taxes, or our effective tax rate, was (10.5%) and 17.0% for the first quarter of fiscal year 2010 and 2009, respectively.

The expected tax benefit derived from our loss before tax for the first three months of fiscal year 2010 at the United States federal statutory tax rate of 35% differs from our actual effective tax rate of (10.5%) due primarily to permanent tax differences related to stock-based compensation and losses recognized in tax jurisdictions where no tax benefit has been recognized, partially offset by the U.S. tax benefit of the federal research tax credit. Further, our annual projected effective tax rate of (7.0%) differs from our actual effective tax rate of (10.5%) primarily due to a one-time discrete item related to our stock option purchase completed in March 2009.

Our effective tax rate on income before tax for the first quarter of fiscal year 2009 is lower than the U.S. federal statutory rate of 35% due primarily to income earned in jurisdictions where that tax rate is lower than the U.S. federal statutory tax rate.

Please refer to Note 5 of the Notes to Condensed Consolidated Financial Statements for further information regarding the components of our income tax expense.

Liquidity and Capital Resources

	As of April 26, 2009	As of January 25, 2009
(In millions)		
Cash and cash equivalents	\$ 512.3	\$ 417.7
Marketable securities	825.8	837.7
Cash, cash equivalents, and marketable securities	\$ 1,338.1	\$ 1,255.4

	Three Months Ended	
	April 26, 2009	April 27, 2008
(In millions)		
Net cash provided by operating activities	\$ 142.1	\$ 145.2
Net cash provided by (used in) investing activities	\$ (8.9)	\$ 24.5
Net cash used in financing activities	\$ (38.6)	\$ (93.4)

As of April 26, 2009, we had \$1.34 billion in cash, cash equivalents and marketable securities, an increase of \$82.7 million from \$1.26 billion at the end of fiscal year 2009. Our portfolio of cash equivalents and marketable securities is managed by several financial institutions. Our investment policy requires the purchase of top-tier investment grade securities, the diversification of asset type and includes certain limits on our portfolio duration.

Operating activities

Operating activities generated cash of \$142.1 million and \$145.2 million during the first quarters of fiscal years 2010 and 2009, respectively. Our net income (loss) plus the impact of non-cash charges to earnings such as depreciation, amortization, stock-based compensation and charges related to the stock option purchase and deferred income taxes decreased during the comparable periods due the net loss in the first fiscal quarter of 2010. Additionally, the changes in operating assets and liabilities resulted in a net decrease in cash flow from operations. The changes in operating assets and liabilities resulted from the reduced spending, timing of payments to vendors. Additionally, the reduction in inventories also resulted from rescheduling actions that were implemented in response to our high inventory levels at the end of the fourth quarter of fiscal year 2009 as well as a result of the increase in revenue for the first quarter of fiscal year 2010.

Investing activities

Investing activities have consisted primarily of purchases and sales of marketable securities, acquisitions of businesses and purchases of property and equipment, which include the purchase of property, leasehold improvements for our facilities and intangible assets. Investing activities used cash of \$8.9 million and provided cash of \$24.5 million during the first quarters of fiscal years 2010 and 2009, respectively.

We expect to spend approximately \$100 million to \$150 million for capital expenditures during the remainder of fiscal year 2010, primarily for leasehold improvements, software licenses, emulation equipment, computers and engineering workstations. In addition, we may continue to use cash in connection with the acquisition of new businesses or assets.

Financing activities

Financing activities used cash of \$38.6 million and \$93.4 million during the first quarters of fiscal years 2010 and 2009, respectively. Net cash used by financing activities in the first quarter of fiscal year 2010 was primarily due to \$78.1 million paid towards the stock option purchase, offset by cash proceeds of \$39.7 million from common stock issued under our employee stock plans. During the first quarter of fiscal year 2009, we used \$123.9 million to repurchase our common stock.

Liquidity

Our primary source of liquidity is cash generated by our operations. Our investment portfolio consisted of cash and cash equivalents, asset-backed securities, commercial paper, mortgage-backed securities issued by government-sponsored enterprises, equity securities, money market funds and debt securities of corporations, municipalities and the United States government and its agencies. These investments are denominated in United States dollars. As of April 26, 2009, we did not have any investments in auction-rate preferred securities.

We account for our investment instruments in accordance with Statement of Financial Accounting Standards No. 115, or SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities. All of the cash equivalents and marketable securities are treated as “available-for-sale” under SFAS No. 115. Investments in both fixed rate and floating rate interest earning instruments carry a degree of interest rate risk. Fixed rate debt securities may have their market value adversely impacted due to a rise in interest rates, while floating rate securities may produce less income than expected if interest rates fall. Due in part to these factors, our future investment income may fall short of expectations due to changes in interest rates or if the decline in fair value of our publicly traded debt or equity investments is judged to be other-than-temporary. We may suffer losses in principal if we are forced to sell securities that decline in market value due to changes in interest rates. However, because any debt securities we hold are classified as “available-for-sale,” no gains or losses are realized in our statement of operations due to changes in interest rates unless such securities are sold prior to maturity or unless declines in market values are determined to be other-than-temporary. These securities are reported at fair value with the related unrealized gains and losses included in accumulated other comprehensive income, a component of stockholders’ equity, net of tax.

As of April 26, 2009 and January 25, 2009, we had \$1.34 billion and \$1.26 billion, respectively, in cash, cash equivalents and marketable securities. Our investment policy requires the purchase of top-tier investment grade securities, the diversification of asset types and includes certain limits on our portfolio duration, as specified in our investment policy guidelines. These guidelines also limit the amount of credit exposure to any one issue, issuer or type of instrument. As of April 26, 2009, we were in compliance with our investment policy. As of April 26, 2009, our investments in government agencies and government sponsored enterprises represented approximately 63% of our cash equivalents and marketable securities, while the financial sector, which has been negatively impacted by recent market liquidity conditions, accounted for approximately 14% of our total cash equivalents and marketable securities. Substantially all of our investments are with A/A2 or better rated securities with the substantial majority of the securities rated AA-/Aa3 or better.

We performed an impairment review of our investment portfolio as of April 26, 2009. Currently, we have the intent and ability to hold our investments with impairment indicators until maturity. Based on our quarterly impairment review and having considered the guidance in Statement of Financial Accounting Standards Staff Position No. 115-1, or FSP No. 115-1, A Guide to the Implementation of Statement 115 on Accounting for Certain Investments in Debt and Equity Securities, we did not record any other than temporary impairment charges during the first quarters of fiscal years 2010 and 2009. Please refer to Note 6 and Note 7 of the Notes to Condensed Consolidated Financial Statements for further details. We concluded that our investments were appropriately valued and that no other than temporary impairment charges were necessary on our portfolio of available for sale investments as of April 26, 2009.

Net realized gains (losses) for the first quarter of fiscal year 2010 was \$0.8 million. Net realized gains (losses) for first quarter of fiscal year 2009 was not material. As of April 26, 2009, we had a net unrealized gain of \$5.4 million, which was comprised of gross unrealized gains of \$7.4 million, offset by \$2.0 million of gross unrealized losses. As of January 25, 2009, we had a net unrealized gain of \$4.4 million, which was comprised of gross unrealized gains of \$7.8 million, offset by \$3.4 million of gross unrealized losses.

As of April 26, 2009, our money market investment in the International Reserve Fund, which was valued at \$40.0 million, net of \$5.6 million of other than temporary impairment charges that we recorded during fiscal year 2009, was classified as marketable securities in our Condensed Consolidated Balance Sheet due to the halting of redemption requests in September 2008 by the International Reserve Fund. The \$40.0 million value of our holdings in the International Reserve Fund as of April 26, 2009 reflects an initial investment of \$130.0 million, reduced by \$84.4 million that we received from the International Reserve Fund during the first quarter of fiscal 2010 and the \$5.6 million other than temporary impairment charge we recorded against the value of this investment during fiscal year 2009. The \$84.4 million we received was our portion of a payout of approximately 65% of the total assets of the

International Reserve Fund. We expect to receive the proceeds from our remaining investment in the International Reserve Fund, excluding some or all of the \$5.6 million, by October 2009, when all of the underlying securities held by the International Reserve Fund are scheduled to have matured. However, redemptions from the International Reserve Fund are currently subject to pending litigation, which could cause further delay in receipt of our funds.

Our accounts receivable are highly concentrated and make us vulnerable to adverse changes in our customers' businesses, and to downturns in the industry and the worldwide economy. Two customers accounted for approximately 27% of our accounts receivable balance at April 26, 2009. While we strive to limit our exposure to uncollectible accounts receivable using a combination of credit insurance and letters of credit, difficulties in collecting accounts receivable could materially and adversely affect our financial condition and results of operations. These difficulties are heightened during periods when economic conditions worsen. We continue to work directly with more foreign customers and it may be difficult to collect accounts receivable from them. We maintain an allowance for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. This allowance consists of an amount identified for specific customers and an amount based on overall estimated exposure. If the financial condition of our customers were to deteriorate, resulting in an impairment in their ability to make payments, additional allowances may be required, we may be required to defer revenue recognition on sales to affected customers, and we may be required to pay higher credit insurance premiums, any of which could adversely affect our operating results. In the future, we may have to record additional reserves or write-offs and/or defer revenue on certain sales transactions which could negatively impact our financial results.

Stock Repurchase Program

During fiscal year 2005, we announced that our Board of Directors, or Board, had authorized a stock repurchase program to repurchase shares of our common stock, subject to certain specifications, up to an aggregate maximum amount of \$300 million. During fiscal year 2007, the Board further approved an increase of \$400 million to the original stock repurchase program. In fiscal year 2008, we announced a stock repurchase program under which we may purchase up to an additional \$1.0 billion of our common stock over a three year period through May 2010. On August 12, 2008, we announced that our Board further authorized an additional increase of \$1.0 billion to the stock repurchase program. As a result of these increases, we have an ongoing authorization from the Board, subject to certain specifications, to repurchase shares of our common stock up to an aggregate maximum amount of \$2.7 billion through May 2010.

The repurchases will be made from time to time in the open market, in privately negotiated transactions, or in structured stock repurchase programs, and may be made in one or more larger repurchases, in compliance with the Exchange Act Rule 10b-18, subject to market conditions, applicable legal requirements, and other factors. The program does not obligate NVIDIA to acquire any particular amount of common stock and the program may be suspended at any time at our discretion. As part of our share repurchase program, we have entered into, and we may continue to enter into, structured share repurchase transactions with financial institutions. These agreements generally require that we make an up-front payment in exchange for the right to receive a fixed number of shares of our common stock upon execution of the agreement, and a potential incremental number of shares of our common stock, within a pre-determined range, at the end of the term of the agreement.

During the first quarter of fiscal year 2010, we did not enter into any structured share repurchase transactions or otherwise purchase any shares of our common stock. Through April 26, 2009, we have repurchased an aggregate of 90.9 million shares under our stock repurchase program for a total cost of \$1.46 billion. As of January 25, 2009, we are authorized, subject to certain specifications, to repurchase shares of our common stock up to an additional amount of \$1.24 billion through May 2010.

Operating Capital and Capital Expenditure Requirements

We believe that our existing cash balances and anticipated cash flows from operations will be sufficient to meet our operating, acquisition and capital requirements for at least the next twelve months. However, there is no assurance that we will not need to raise additional equity or debt financing within this time frame. Additional financing may not be available on favorable terms or at all and may be dilutive to our then-current stockholders. We also may require additional capital for other purposes not presently contemplated. If we are unable to obtain sufficient capital, we could be required to curtail capital equipment purchases or research and development expenditures, which could harm our business. Factors that could affect our cash used or generated from operations and, as a result, our need to seek additional borrowings or capital include:

- decreased demand and market acceptance for our products and/or our customers' products;
- inability to successfully develop and produce in volume production our next-generation products;
- competitive pressures resulting in lower than expected average selling prices; and
- new product announcements or product introductions by our competitors.

We expect to spend approximately \$100 million to \$150 million for capital expenditures during the remainder of fiscal year 2010, primarily for leasehold improvements, software licenses, emulation equipment, computers and engineering workstations. In addition, we may continue to use cash in connection with the acquisition of new

businesses or assets.

For additional factors see “Item 1A. Risk Factors - Risks Related to Our Business and Industry - Our revenue may fluctuate while our operating expenses are relatively fixed, which makes our results difficult to predict and could cause our results to fall short of expectations.”

3dfx Asset Purchase

On December 15, 2000, NVIDIA Corporation and one of our indirect subsidiaries entered into an Asset Purchase Agreement, or APA, which closed on April 18, 2001, to purchase certain graphics chip assets from 3dfx. Under the terms of the APA, the cash consideration due at the closing was \$70.0 million, less \$15.0 million that was loaned to 3dfx pursuant to a Credit Agreement dated December 15, 2000. The APA also provided, subject to the other provisions thereof, that if 3dfx properly certified that all its debts and other liabilities had been provided for, then we would have been obligated to pay 3dfx one million shares, which due to subsequent stock splits now totals six million shares, of NVIDIA common stock. If 3dfx could not make such a certification, but instead properly certified that its debts and liabilities could be satisfied for less than \$25.0 million, then 3dfx could have elected to receive a cash payment equal to the amount of such debts and liabilities and a reduced number of shares of our common stock, with such reduction calculated by dividing the cash payment by \$25.00 per share. If 3dfx could not certify that all of its debts and liabilities had been provided for, or could not be satisfied, for less than \$25.0 million, we would not be obligated under the agreement to pay any additional consideration for the assets.

In October 2002, 3dfx filed for Chapter 11 bankruptcy protection in the United States Bankruptcy Court for the Northern District of California. In March 2003, we were served with a complaint filed by the Trustee appointed by the Bankruptcy Court which sought, among other things, payments from us as additional purchase price related to our purchase of certain assets of 3dfx. In early November 2005, NVIDIA and the Official Committee of Unsecured Creditors, or the Creditors' Committee, agreed to a Plan of Liquidation of 3dfx, which included a conditional settlement of the Trustee's claims against us. This conditional settlement was subject to a confirmation process through a vote of creditors and the review and approval of the Bankruptcy Court. The conditional settlement called for a payment by NVIDIA of approximately \$30.6 million to the 3dfx estate. Under the settlement, \$5.6 million related to various administrative expenses and Trustee fees, and \$25.0 million related to the satisfaction of debts and liabilities owed to the general unsecured creditors of 3dfx. Accordingly, during the three month period ended October 30, 2005, we recorded \$5.6 million as a charge to settlement costs and \$25.0 million as additional purchase price for 3dfx. The Trustee advised that he intended to object to the settlement.

The conditional settlement reached in November 2005 never progressed through the confirmation process and the Trustee's case still remains pending appeal. As such, we have not reversed the accrual of \$30.6 million - \$5.6 million as a charge to settlement costs and \$25.0 million as additional purchase price for 3dfx – that we recorded during the three months ended October 30, 2005, pending resolution of the appeal of the Trustee's case. We do not believe the resolution of this matter will have a material impact on our results of operations or financial position.

Please refer to Note 12 of the Notes to Condensed Consolidated Financial Statements for further information regarding this litigation.

Product Defect

Our products are complex and may contain defects or experience failures due to any number of issues in design, fabrication, packaging, materials and/or use within a system. If any of our products or technologies contains a defect, compatibility issue or other error, we may have to invest additional research and development efforts to find and correct the issue. Such efforts could divert our management's and engineers' attention from the development of new products and technologies and could increase our operating costs and reduce our gross margin. In addition, an error or defect in new products or releases or related software drivers after commencement of commercial shipments could result in failure to achieve market acceptance or loss of design wins. Also, we may be required to reimburse customers, including for customers' costs to repair or replace the products in the field. A product recall or a significant number of product returns could be expensive, damage our reputation and could result in the shifting of business to our competitors. Costs associated with correcting defects, errors, bugs or other issues could be significant and could materially harm our financial results.

During the second quarter of fiscal year 2009, we recorded a \$196.0 million charge against cost of revenue to cover anticipated customer warranty, repair, return, replacement and other associated costs arising from a weak die/package material set in certain versions of our previous generation MCP and GPU products used in notebook systems. All of our newly manufactured products and all of our products that are currently shipping in volume have a different material set that we believe is more robust.

The previous generation MCP and GPU products that are impacted were included in a number of notebook products that were shipped and sold in significant quantities. Certain notebook configurations of these MCP and GPU products are failing in the field at higher than normal rates. While we have not been able to determine a root cause for these failures, testing suggests a weak material set of die/package combination, system thermal management designs, and customer use patterns are contributing factors. We have worked with our customers to develop and have made available for download a software driver to cause the system fan to begin operation at the powering up of the system

and reduce the thermal stress on these chips. We have also recommended to our customers that they consider changing the thermal management of the MCP and GPU products in their notebook system designs. We intend to fully support our customers in their repair and replacement of these impacted MCP and GPU products that fail, and their other efforts to mitigate the consequences of these failures.

We continue to engage in discussions with our supply chain regarding reimbursement to us for some or all of the costs we have incurred and may incur in the future relating to the weak material set. We also continue to seek to access our insurance coverage, which provided us with \$8.0 million in related reimbursement during fiscal year 2009. However, there can be no assurance that we will recover any additional reimbursement. We continue to not see any abnormal failure rates in any systems using NVIDIA products other than certain notebook configurations. However, we are continuing to test and otherwise investigate other products. There can be no assurance that we will not discover defects in other MCP or GPU products.

Determining the amount of the \$196.0 million charge related to this issue required management to make estimates and judgments based on historical experience, test data and various other assumptions including estimated field failure rates that we believe to be reasonable under the circumstances. The results of these judgments formed the basis for our estimate of the total charge to cover anticipated customer warranty, repair, return and replacement and other associated costs. However, if actual repair, return, replacement and other associated costs and/or actual field failure rates exceed our estimates, we may be required to record additional reserves, which would increase our cost of revenue and materially harm our financial results.

In September, October and November 2008, several putative class action lawsuits were filed against us, asserting various claims related to the impacted MCP and GPU products. Please refer to Note 12 of the Notes to Condensed Consolidated Financial Statements for further information regarding this litigation.

Contractual Obligations

At April 26, 2009, we had outstanding inventory purchase obligations totaling approximately \$457 million. There were no other material changes in our contractual obligations from those disclosed in our Annual Report on Form 10-K for the fiscal year ended January 25, 2009. Please see Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources" in our Form 10-K for a description of our contractual obligations.

Off-Balance Sheet Arrangements

As of April 26, 2009, we had no material off-balance sheet arrangements as defined in Regulation S-K 303(a)(4)(ii).

Adoption of New Accounting Pronouncements

Please see Note 1 of the Notes to Condensed Consolidated Financial Statements for a discussion of adoption of new accounting pronouncements.

Recently Issued Accounting Pronouncements

Please see Note 1 of the Notes to Condensed Consolidated Financial Statements for a discussion of recently issued accounting pronouncements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Investment and Interest Rate Risk

As of April 26, 2009 and January 25, 2009, we had \$1.34 billion and \$1.26 billion, respectively, in cash, cash equivalents and marketable securities. We invest in a variety of financial instruments, consisting principally of cash and cash equivalents, asset-backed securities, commercial paper, mortgage-backed securities issued by Government-sponsored enterprises, equity securities, money market funds and debt securities of corporations, municipalities and the United States government and its agencies. As of April 26, 2009, we did not have any investments in auction-rate preferred securities. Our investments are denominated in United States dollars.

We account for our investment instruments in accordance with Statement of Financial Accounting Standards No. 115, or SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities. All of the cash equivalents and marketable securities are treated as “available-for-sale” under SFAS No. 115. Investments in both fixed rate and floating rate interest earning instruments carry a degree of interest rate risk. Fixed rate securities may have their market value adversely impacted due to a rise in interest rates, while floating rate securities may produce less income than expected if interest rates fall. Due in part to these factors, our future investment income may fall short of expectations due to changes in interest rates or if the decline in fair value of our publicly traded debt or equity investments is judged to be other-than-temporary. We may suffer losses in principal if we are forced to sell securities that decline in securities market value due to changes in interest rates. However, because any debt securities we hold are classified as “available-for-sale,” no gains or losses are realized in our Condensed Consolidated Statements of Operations due to changes in interest rates unless such securities are sold prior to maturity or unless declines in value are determined to be other-than-temporary. These securities are reported at fair value with the related unrealized gains and losses included in accumulated other comprehensive income (loss), a component of stockholders’ equity, net of tax.

As of April 26, 2009, we performed a sensitivity analysis on our floating and fixed rate financial investments. According to our analysis, parallel shifts in the yield curve of both plus or minus 0.5% would result in changes in fair market values for these investments of approximately \$5.5 million.

The current financial turmoil affecting the banking system and financial markets and the possibility that financial institutions may consolidate or go out of business have resulted in a tightening in the credit markets, a low level of liquidity in many financial markets, and extreme volatility in fixed income, credit, currency and equity markets. There could be a number of follow-on effects from the credit crisis on our business, including insolvency of key suppliers resulting in product delays; inability of customers, including channel partners, to obtain credit to finance purchases of our products and/or customer, including channel partner, insolvencies; and failure of financial institutions, which may negatively impact our treasury operations. Other income and expense could also vary materially from expectations depending on gains or losses realized on the sale or exchange of financial instruments; impairment charges related to debt securities as well as equity and other investments; interest rates; and cash, cash equivalent and marketable securities balances. The current volatility in the financial markets and overall economic uncertainty increases the risk that the actual amounts realized in the future on our financial instruments could differ significantly from the fair values currently assigned to them. As of January 25, 2009, our investments in government agencies and government sponsored enterprises represented approximately 63% of our total cash equivalents and marketable securities, while the financial sector accounted for approximately 14% of our total cash equivalents and marketable securities. Substantially all of our investments are with A/A2 or better rated securities with the substantial majority of the securities rated AA-/Aa3 or better. If the fair value of our investments in these sectors was to decline by 2%-5%, it would result in changes in fair market values for these investments by approximately \$18-\$46 million.

Exchange Rate Risk

We consider our direct exposure to foreign exchange rate fluctuations to be minimal. Currently, sales and arrangements with third-party manufacturers provide for pricing and payment in United States dollars, and, therefore, are not subject to exchange rate fluctuations. Gains or losses from foreign currency remeasurement are included in “Other income (expense), net” in our Condensed Consolidated Financial Statements and to date have not been significant. The impact of foreign currency transaction loss included in determining net income (loss) for the first quarter of fiscal years 2010 and 2009 was \$0.2 million and \$4.2 million, respectively. Increases in the value of the United States’ dollar relative to other currencies would make our products more expensive, which could negatively impact our ability to compete. Conversely, decreases in the value of the United States’ dollar relative to other currencies could result in our suppliers raising their prices in order to continue doing business with us. Fluctuations in currency exchange rates could harm our business in the future.

We may enter into certain transactions such as forward contracts which are designed to reduce the future potential impact resulting from changes in foreign currency exchange rates. There were no forward exchange contracts outstanding at April 26, 2009.

ITEM 4. CONTROLS AND PROCEDURES

Controls and Procedures

Disclosure Controls and Procedures

Based on their evaluation as of April 26, 2009, our management, including our Chief Executive Officer and Chief Financial Officer, have concluded that our disclosure controls and procedures as defined in Rule 13a-15(e) and Rule 15d-15(e) under the Securities Exchange Act of 1934 were effective.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal controls over financial reporting during our fiscal quarter ended April 26, 2009 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on Effectiveness of Controls

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls and procedures or our internal controls, will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within NVIDIA have been detected.

PART II

ITEM 1. LEGAL PROCEEDINGS

Please see Part I, Item 1, Note 12 of the Notes to Condensed Consolidated Financial Statements for a discussion of our legal proceedings.

ITEM 1A. RISK FACTORS

In evaluating NVIDIA and our business, the following factors should be considered in addition to the other information in this Quarterly Report on Form 10-Q. Before you buy our common stock, you should know that making such an investment involves some risks including, but not limited to, the risks described below. Additionally, any one of the following risks could seriously harm our business, financial condition and results of operations, which could cause our stock price to decline. Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business operations.

Risks Related to Our Business and Industry

Global economic conditions have reduced demand for our products, adversely impacted our customers and suppliers and harmed our business.

Our operations and performance depend significantly on worldwide economic conditions. Uncertainty about current global economic conditions poses a continuing risk to our business as consumers and businesses have postponed spending in response to tighter credit, negative financial news and/or declines in income or asset values, which have reduced the demand for our products. Other factors that could depress demand for our products in the future include conditions in the residential real estate and mortgage markets, labor and healthcare costs, access to credit, consumer confidence, and other macroeconomic factors affecting consumer spending behavior. These and other economic factors have reduced demand for our products and could further harm our business, financial condition and operating results.

The current financial turmoil affecting the banking system and financial markets and the possibility that financial institutions may consolidate or go out of business have resulted in a tightening in the credit markets, a low level of liquidity in many financial markets, and extreme volatility in fixed income, credit, currency and equity markets. There could be a number of follow-on effects from the credit crisis on our business, including insolvency of key suppliers resulting in product delays; inability of customers, including channel partners, to obtain credit to finance purchases of our products and/or customer, including channel partner, insolvencies; and failure of financial institutions, which may negatively impact our treasury operations. Other income and expense could also vary materially from expectations depending on gains or losses realized on the sale or exchange of financial instruments; impairment charges related to debt securities as well as equity and other investments; interest rates; and cash, cash equivalent and marketable securities balances. The current volatility in the financial markets and overall economic uncertainty increases the risk that the actual amounts realized in the future on our financial instruments could differ significantly from the fair values currently assigned to them.

Our business is cyclical in nature and is currently experiencing a severe downturn, which has harmed and may continue to harm our financial results.

Our business is directly affected by market conditions in the highly cyclical semiconductor industry, which is currently experiencing a severe downturn. The semiconductor industry has been adversely affected by many factors,

including the current global downturn, ongoing efforts by our customers to reduce their spending, diminished product demand, increased inventory levels, lower average selling prices, uncertainty regarding long-term growth rates and underlying financial health and increased competition. These factors, could, among other things, limit our ability to maintain or increase our sales or recognize revenue and in turn adversely affect our business, operating results and financial condition. If our actions to reduce our operating expenses to sufficiently offset these factors during this downturn are unsuccessful, our operating results will suffer.

Our revenue may fluctuate while our operating expenses are relatively fixed, which makes our results difficult to predict and could cause our results to fall short of expectations.

Demand for many of our revenue components fluctuate and are difficult to predict, and our operating expenses are relatively fixed and largely independent of revenue. Therefore, it is difficult for us to accurately forecast revenue and profits or losses in any particular period. Our operating expenses, which are comprised of research and development expenses, sales, general and administrative expenses, represented 63% and 27% of our total revenue for the first quarters of fiscal years 2010 and 2009, respectively. Since we often recognize a substantial portion of our revenue in the last month of each quarter, we may not be able to adjust our operating expenses in a timely manner in response to any unanticipated revenue shortfalls in any quarter. Further, some of our operating expenses, like stock-based compensation expense can only be adjusted over a longer period of time and cannot be reduced during a quarter. If we are unable to reduce operating expenses quickly in response to any revenue shortfalls, our financial results will be negatively impacted.

In response to the current economic environment, we have commenced several cost reduction measures which are designed to reduce our operating expenses and will continue to focus on reducing our operating expenses during the second quarter of fiscal year 2010. Please refer to the discussion in Note 3 to the Notes to the Consolidated Financial Statements for the impact of the tender offer related to the stock option purchase on operating expenses during the first quarter of fiscal year 2010.

Any one or more of the risks discussed in this Quarterly Report on Form 10-Q or other factors could prevent us from achieving our expected future revenue or net income. Accordingly, we believe that period-to-period comparisons of our results of operations should not be relied upon as an indication of future performance. Similarly, the results of any quarterly or full fiscal year period are not necessarily indicative of results to be expected for a subsequent quarter or a full fiscal year. As a result, it is possible that in some quarters our operating results could be below the expectations of securities analysts or investors, which could cause the trading price of our common stock to decline. We believe that our quarterly and annual results of operations may continue to be affected by a variety of factors that could harm our revenue, gross profit and results of operations.

Our failure to estimate customer demand properly could adversely affect our financial results.

We manufacture our products based on forecasts of customer demand in order to have shorter shipment lead times and quicker delivery schedules for our customers. As a result, we may build inventories for anticipated periods of growth which do not occur or may build inventory anticipating demand for a product that does not materialize. The current negative worldwide economic conditions and market instability makes it increasingly difficult for us, our customers and our suppliers to accurately forecast future product demand trends. In forecasting demand, we make multiple assumptions any of which may prove to be incorrect. Situations that may result in excess or obsolete inventory include:

- if there were a sudden and significant decrease in demand for our products;
- if there were a higher incidence of inventory obsolescence because of rapidly changing technology and customer requirements;
- if we fail to estimate customer demand properly for our older products as our newer products are introduced; or
- if our competition were to take unexpected competitive pricing actions.

Any inability to sell products to which we have devoted resources could harm our business. In addition, cancellation or deferral of customer purchase orders could result in our holding excess inventory, which could adversely affect our gross margin and restrict our ability to fund operations. Additionally, because we often sell a substantial portion of our products in the last month of each quarter, we may not be able to reduce our inventory purchase commitments in a timely manner in response to customer cancellations or deferrals. We could be subject to excess or obsolete inventories and be required to take corresponding inventory write-downs and/or a reduction in average selling prices if growth slows or does not materialize, or if we incorrectly forecast product demand, which could negatively impact our financial results.

Conversely, if we underestimate our customers' demand for our products, our third party manufacturing partners may not have adequate lead-time or capacity to increase production for us meaning that we may not be able to obtain sufficient inventory to fill our customers' orders on a timely basis. Even if we are able to increase production levels to meet customer demand, we may not be able to do so in a cost effective or timely manner. Inability to fulfill our customers' orders on a timely basis, or at all, could damage our customer relationships, result in lost revenue, cause a loss in market share, impact our customer relationships or damage our reputation, any of which could adversely impact our business.

Because our gross margin for any period depends on a number of factors, our failure to forecast changes in any of these factors could adversely affect our gross margin.

We are focused on improving our gross margin. Our gross margin for any period depends on a number of factors, including:

- the mix of our products sold;
- average selling prices;
- introduction of new products;
- product transitions;
- sales discounts;
- unexpected pricing actions by our competitors;
- the cost of product components; and
- the yield of wafers produced by the foundries that manufacture our products.

If we do not correctly forecast the impact of any of the relevant factors on our business, there may not be any actions we can take or we may not be able to take any possible actions in time to counteract any negative impact on our gross margin. For example, our gross margin declined to 28.6% during the first quarter of fiscal year 2010 as compared to 44.6% from the first quarter of fiscal year 2009. During the first quarter of fiscal year 2010, the revenue and gross margins from our sale of desktop products decreased when compared to the revenue and gross margins during the first quarter of fiscal year 2009 primarily due to a decline in the Standalone Desktop market segment as reported in the May 2009 PC Graphics Report from Mercury Research. This decline was driven by a combination of market migration from desktop PCs towards notebook PCs and an overall market shift in the mix of products towards lower priced products. If the overall shift in the demand from the consumer continues to shift towards lower priced products, it will have an adverse impact on our gross margin.

If we are unable to compete in the markets for our products, our financial results could be adversely impacted.

The market for GPUs, MCPs, and computer-on-a-chip products that support netbooks, PNDs, PMPs, PDAs, cellular phones or other handheld devices is intensely competitive and is characterized by rapid technological change, new product introductions, evolving industry standards and declining average selling prices. We believe that the principal competitive factors in this market are performance, breadth of product offerings, access to customers and distribution channels, software support, conformity to industry standard Application Programming Interface, or APIs, manufacturing capabilities, price of processors, and total system costs. We believe that our ability to remain competitive will depend on how well we are able to anticipate the features and functions that customers will demand and whether we are able to deliver consistent volumes of our products at acceptable levels of quality. We expect competition to increase from both existing competitors and new market entrants with products that may be less costly than ours, or may provide better performance or additional features not provided by our products. In addition, it is possible that new competitors or alliances among competitors could emerge and acquire significant market share. We believe other factors impacting our ability to compete are:

- product performance;
- product bundling by competitors with multiple product lines;
- breadth and frequency of product offerings;
- access to customers and distribution channels;
- backward-forward software support;
- conformity to industry standard application programming interfaces; and
- manufacturing capabilities.

A significant source of competition is from companies that provide or intend to provide GPU, MCP, and computer-on-a-chip products that support netbooks, PNDs, PMPs, PDAs, cellular phones or other handheld devices. Some of our competitors may have greater marketing, financial, distribution and manufacturing resources than we do and may be more able to adapt to customer or technological changes. Currently, Intel Corporation, or Intel, which has greater resources than we do, is working on a multi-core architecture code-named Larrabee, which may compete with our products in various markets. Intel may also release an enthusiast level discrete GPU based on the Larrabee architecture. Additionally, in fiscal year 2009, Intel also introduced the Intel Atom processor which is designed for lower cost PCs. Intel may also release a second generation of Atom chips by 2010 which is expected to have an improved battery life. The Intel Atom processor may compete with our products that support netbooks, PDAs, cellular phones and other handheld devices.

Our current competitors include the following:

.

suppliers of discrete MCPs that incorporate a combination of networking, audio, communications and input/output, or I/O, functionality as part of their existing solutions, such as AMD, Broadcom Corporation, or Broadcom, Silicon Integrated Systems, Inc., or SIS, VIA Technologies, Inc., or VIA, and Intel;

- suppliers of GPUs, including MCPs that incorporate 3D graphics functionality as part of their existing solutions, such as AMD, Intel, Matrox Electronics Systems Ltd., SIS, and VIA;
- suppliers of computer-on-a-chip products that support netbooks, PNDs, PMPs, PDAs, cellular phones or other handheld devices such as AMD, Broadcom, Fujitsu Limited, Imagination Technologies Ltd., ARM Holdings plc, Marvell Technology Group Ltd, or Marvell, NEC Corporation, Qualcomm Incorporated, Renesas Technology, Samsung, Seiko-Epson, Texas Instruments Incorporated, and Toshiba America, Inc.; and
- suppliers of computer-on-a-chip products for handheld and embedded devices that incorporate multimedia processing as part of their existing solutions such as Broadcom, Texas Instruments Inc., Qualcomm Incorporated, Marvell, Freescale Semiconductor Inc., Renesas Technology, Samsung, and ST Microelectronics.

If and to the extent we offer products in new markets, we may face competition from some of our existing competitors as well as from companies with which we currently do not compete. For example, in the case of our CPB, our Tegra and GoForce products primarily compete in architecture used in multimedia cellular phones and handheld devices. We believe that mobile devices like phones, music players, and portable navigation devices will increasingly become more consumer PC-like and be capable of delivering all the entertainment and web experiences in a handheld device. We cannot accurately predict if we will compete successfully in any of the new markets we may enter. If we are unable to compete in our current or new markets, demand for our products could decrease which could cause our revenue to decline and our financial results to suffer.

Our GPU and MCP products are currently used with both Intel and AMD processors. In February 2009, Intel filed suit against us, related to a patent license agreement that we signed with Intel in 2004. Intel seeks an order from the court declaring that the license does not extend to a new Intel processor architecture and enjoining us from stating that we have licensing rights for this architecture. If Intel successfully obtains such a court order, we could be unable to sell our MCP products for use with these Intel processors and our competitive position would be harmed. In addition, in order to continue to sell MCP products for use with these Intel processors we could be required to negotiate a new license agreement with Intel and we may not be able to do so on reasonable terms, if at all.

We are dependent on the personal computer market and its rate of growth in the future may have a negative impact on our business.

We derive and expect to continue to derive the majority of our revenue from the sale or license of products for use in the desktop personal computer, or PC, and notebook PC markets, including professional workstations. A reduction in sales of PCs, or a reduction in the growth rate of PC sales, may reduce demand for our products. These changes in demand could be large and sudden. During first quarter of fiscal year 2010, sales of our desktop GPU products decreased by approximately 48% compared to the first quarter of fiscal year 2009. These decreases were primarily due to the Standalone Desktop GPU market segment decline as reported in the May 2009 PC Graphics Report from Mercury Research. Since PC manufacturers often build inventories during periods of anticipated growth, they may be left with excess inventories if growth slows or if they incorrectly forecast product transitions. In these cases, PC manufacturers may abruptly suspend substantially all purchases of additional inventory from suppliers like us until their excess inventory has been absorbed, which would have a negative impact on our financial results.

As Intel and AMD continue to pursue platform solutions, we may not be able to successfully compete and our business would be negatively impacted.

We expect substantial competition from both Intel's and AMD's strategy of selling platform solutions, such as the success Intel achieved with its Centrino platform solution. AMD has also announced a platform solution. Additionally, we expect that Intel and AMD will extend this strategy to other segments, including the possibility of successfully integrating a central processing unit, or CPU, and a GPU on the same chip, as evidenced by AMD's announcement of its Fusion processor project. If AMD and Intel continue to pursue platform solutions, we may not be able to successfully compete and our business would be negatively impacted.

If our products contain significant defects our financial results could be negatively impacted, our reputation could be damaged and we could lose market share.

Our products are complex and may contain defects or experience failures due to any number of issues in design, fabrication, packaging, materials and/or use within a system. If any of our products or technologies contains a defect, compatibility issue or other error, we may have to invest additional research and development efforts to find and correct the issue. Such efforts could divert our engineers' attention from the development of new products and technologies and could increase our operating costs and reduce our gross margin. In addition, an error or defect in new products or releases or related software drivers after commencement of commercial shipments could result in failure to achieve market acceptance or loss of design wins. Also, we may be required to reimburse customers, including our customers' costs to repair or replace products in the field. A product recall or a significant number of product returns could be expensive, damage our reputation, could result in the shifting of business to our competitors and could result in litigation against us. Costs associated with correcting defects, errors, bugs or other issues could be significant and could materially harm our financial results. For example, during the second quarter of fiscal year 2009, we recorded a \$196.0 million charge against cost of revenue to cover anticipated customer warranty, repair, return, replacement and other associated costs arising from a weak die/package material set in certain versions of our previous generation media and communications processor, or MCP, and GPU products used in notebook systems. In September, October and November 2008, several putative class action lawsuits were filed against us, asserting various claims related to the impacted MCP and GPU products. Please refer to the risk entitled "We are subject to litigation arising from alleged

defects in our previous generation MCP and GPU products, which if determined adversely to us, could harm our business” for the risk associated with this litigation.

If our products do not continue to be adopted by the desktop PC, notebook PC, workstation, high-performance computing, netbook, personal media player, or PMP, personal digital assistant, or PDA, cellular handheld device, and video game console markets or if the demand for new and innovative products in these markets decreases, our business and operating results would suffer.

Our success depends in part upon continued broad adoption of our processors for 3D graphics and multimedia in desktop PC, notebook PC, workstation, high-performance computing, netbooks, PMPs, PDAs, cellular handheld devices, and video game console applications. The market for processors has been characterized by unpredictable and sometimes rapid shifts in the popularity of products, often caused by the publication of competitive industry benchmark results, changes in pricing of dynamic random-access memory devices and other changes in the total system cost of add-in boards, as well as by severe price competition and by frequent new technology and product introductions. Broad market acceptance is difficult to achieve and such market acceptance, if achieved, is difficult to sustain due to intense competition and frequent new technology and product introductions. Our GPU and MCP businesses together comprised approximately 82% and 78% of our revenue during the first quarters of fiscal years 2010 and 2009, respectively. As such, our financial results would suffer if for any reason our current or future GPUs or MCPs do not continue to achieve widespread adoption by the PC market. If we are unable to complete the timely development of new products or if we were unable to successfully and cost-effectively manufacture and deliver products that meet the requirements of the desktop PC, notebook PC, workstation, high-performance computing, netbook, PMP, PDA, cellular phone, and video game console markets, we may experience a decrease in revenue which could negatively impact our operating results.

Additionally, there can be no assurance that the industry will continue to demand new products with improved standards, features or performance. If our customers, OEMs, ODMs, add-in-card and motherboard manufacturers, system builders and consumer electronics companies, do not continue to design products that require more advanced or efficient processors and/or the market does not continue to demand new products with increased performance, features, functionality or standards, sales of our products could decline and the markets for our products could shrink. Decreased sales of our products for these markets could negatively impact our revenue and our financial results.

We are subject to risks associated with international operations which may harm our business.

We conduct our business worldwide. Our semiconductor wafers are manufactured, assembled, tested and packaged by third-parties located outside of the United States. We generated 92% of our revenue for both the first quarter of fiscal year 2010 and the first quarter of fiscal year 2009 from sales to customers outside the United States. As of April 26, 2009, we had offices in fifteen countries outside of the United States. The manufacture, assembly, test and packaging of our products outside of the United States, operation of offices outside of the United States, and sales to customers internationally subjects us to a number of risks, including:

- international economic and political conditions, such as political tensions between countries in which we do business;
- unexpected changes in, or impositions of, legislative or regulatory requirements;
- complying with a variety of foreign laws;
- differing legal standards with respect to protection of intellectual property and employment practices;
- cultural differences in the conduct of business;
- inadequate local infrastructure that could result in business disruptions;
- exporting or importing issues related to export or import restrictions, tariffs, quotas and other trade barriers and restrictions;
-

financial risks such as longer payment cycles, difficulty in collecting accounts receivable and fluctuations in currency exchange rates;

- imposition of additional taxes and penalties; and
- other factors beyond our control such as terrorism, civil unrest, war and diseases such as severe acute respiratory syndrome and the Avian flu.

If sales to any of our customers outside of the United States and other Americas are delayed or cancelled because of any of the above factors, our revenue may be negatively impacted.

Our international operations in Australia, China, Finland, France, Germany, Hong Kong, India, Japan, Korea, Russia, Singapore, Sweden, Switzerland, Taiwan, and the United Kingdom are subject to many of the above listed risks. Difficulties with our international operations, including finding appropriate staffing and office space, may divert management's attention and other resources any of which could negatively impact our operating results.

The economic conditions in our primary overseas markets, particularly in Asia, may negatively impact the demand for our products abroad. All of our international sales to date have been denominated in United States dollars. Accordingly, an increase in the value of the United States dollar relative to foreign currencies could make our products less competitive in international markets or require us to assume the risk of denominating certain sales in foreign currencies. We anticipate that these factors will impact our business to a greater degree as we further expand our international business activities.

Our business results could be adversely affected if the identification and development of new products or entry into or development of a new market is delayed or unsuccessful.

In order to maintain or improve our financial results, we will need to continue to identify and develop new products as well as identify and enter new markets. As our GPUs and other processors develop and competition increases, we anticipate that product life cycles at the high end will remain short and average selling prices will decline. In particular, average selling prices and gross margins for our GPUs and other processors could decline as each product matures and as unit volume increases. As a result, we will need to introduce new products and enhancements to existing products to maintain or improve overall average selling prices, our gross margin and our financial results. We believe the success of our new product introductions will depend on many factors outlined elsewhere in these risk factors as well as the following:

- market demand for new products and enhancements to existing products;
- timely completion and introduction of new product designs and new opportunities for existing products;
- seamless transitions from an older product to a new product;
- differentiation of our new products from those of our competitors;
- delays in volume shipments of our products;
- market acceptance of our products instead of our customers' products; and
- availability of adequate quantity and configurations of various types of memory products.

In the past, we have experienced delays in the development and adoption of new products and have been unable to successfully manage product transitions from older to newer products resulting in obsolete inventory.

To be successful, we must also enter new markets or develop new uses for our future or existing products. We cannot accurately predict if our current or existing products or technologies will be successful in the new opportunities or markets that we identify for them or that we will compete successfully in any new markets we may enter. For example, we have developed products and other technology in order for certain general-purpose computing operations to be performed on a GPU rather than a CPU. This general purpose computing, which is often referred to as GP computing, was a new use for the GPU which had been entirely used for graphics rendering. During fiscal year 2008, we introduced our NVIDIA Tesla family of products, which was our entry into the high-performance computing industry, a new market for us. We also offer our CUDA software development solution, which is a C language programming environment for GPUs, that allows parallel computing on the GPU by using standard C language to create programs that process large quantities of data in parallel. Some of our competitors, including Intel, are now developing their own solutions for the discrete graphics and computing markets. Our failure to successfully develop, introduce or achieve market acceptance for new GPUs, other products or other technologies or to enter into new markets or identify new uses for existing or future products, could result in rapidly declining average selling prices, reduced demand for our products or loss of market share any of which could cause our revenue, gross margin and overall financial results to suffer.

If we are unable to achieve design wins, our products may not be adopted by our target markets or customers either of which could negatively impact our financial results.

The success of our business depends to a significant extent on our ability to develop new competitive products for our target markets and customers. We believe achieving design wins, which entails having our existing and future products chosen for hardware components or subassemblies designed by OEMs, ODMs, add-in board and motherboard manufacturers, is an integral part of our future success. Our OEM, ODM, and add-in board and motherboard manufacturers' customers typically introduce new system configurations as often as twice per year, typically based on spring and fall design cycles or in connection with trade shows. Accordingly, when our customers are making their design decisions, our existing products must have competitive performance levels or we must timely introduce new products in order to be included in our customers' new system configurations. This requires that we:

- anticipate the features and functionality that customers and consumers will demand;
- incorporate those features and functionalities into products that meet the exacting design requirements of our customers;
- price our products competitively; and
- introduce products to the market within our customers' limited design cycles.

If OEMs, ODMs, and add-in board and motherboard manufacturers do not include our products in their systems, they will typically not use our products in their systems until at least the next design configuration. Therefore, we endeavor to develop close relationships with our OEMs and ODMs, in an attempt to better anticipate and address customer needs in new products so that we will achieve design wins.

Our ability to achieve design wins also depends in part on our ability to identify and be compliant with evolving industry standards. Unanticipated changes in industry standards could render our products incompatible with products developed by major hardware manufacturers and software developers like AMD, Intel and Microsoft Corporation, or Microsoft. If our products are not in compliance with prevailing industry standards, we may not be designed into our customers' product designs. However, to be compliant with changes to industry standards, we may have to invest significant time and resources to redesign our products which could negatively impact our gross margin or operating results. If we are unable to achieve new design wins for existing or new customers, we may lose market share and our operating results would be negatively impacted.

We may have to invest more resources in research and development than anticipated, which could increase our operating expenses and negatively impact our operating results.

If new competitors, technological advances by existing competitors, our entry into new markets, or other competitive factors require us to invest significantly greater resources than anticipated in our research and development efforts, our operating expenses would increase. We had 3,816 full-time employees engaged in research and development as of April 26, 2009, compared to 3,683 employees as of April 27, 2008. Research and development expenditures were \$301.8 million and \$218.8 million, for the first quarters of fiscal years 2010 and 2009, respectively. Research and development expenses included stock-based compensation expense of \$21.3 million and \$24.5 million related to on-going vesting of equity awards during the first quarters of fiscal years 2010 and 2009, respectively. Additionally, during the first quarter of fiscal year 2010, research and development expenses included stock-based compensation of \$90.5 million related to the purchase of certain outstanding options that were tendered in March 2009. If we are required to invest significantly greater resources than anticipated in research and development efforts without a corresponding increase in revenue, our operating results could further decline. Research and development expenses are likely to fluctuate from time to time to the extent we make periodic incremental investments in research and development and these investments may be independent of our level of revenue which could negatively impact our financial results. In order to remain competitive, we anticipate that we will continue to devote substantial resources to research and development.

We are dependent on key employees and the loss of any of these employees could negatively impact our business.

Our future success and ability to compete is substantially dependent on our ability to identify, hire, train and retain highly qualified key personnel. The market for key employees in the semiconductor industry can be competitive. None of our key employees is bound by an employment agreement, meaning our relationships with all of our key employees are at will. The loss of the services of any of our other key employees without an adequate replacement or our inability to hire new employees as needed could delay our product development efforts, harm our ability to sell our products or otherwise negatively impact our business.

In September 2008, we reduced our global workforce by approximately 6.5% as part of our efforts to allow continued investment in strategic growth areas. This reduction in our workforce may impair our ability to recruit and retain qualified employees of our workforce as a result of a perceived risk of future workforce reductions. Employees, whether or not directly affected by the reduction, may also seek future employment with our business partners, customers or competitors. In addition, we rely on stock-based awards as one means for recruiting, motivating and retaining highly skilled talent. If the value of such stock awards does not appreciate as measured by the performance of the price of our common stock or if our share-based compensation otherwise ceases to be viewed as a valuable benefit, our ability to attract, retain, and motivate employees could be weakened, which could harm our results of operations. The significant decline in the trading price of our common stock has resulted in the exercise price of a significant portion of our outstanding options to significantly exceed the current trading price of our common stock, thus lessening the effectiveness of these stock-based awards. We may not continue to successfully attract and retain key personnel which would harm our business.

We may not be able to realize the potential financial or strategic benefits of business acquisitions or strategic investments, which could hurt our ability to grow our business, develop new products or sell our products.

We have acquired and invested in other businesses that offered products, services and technologies that we believe will help expand or enhance our existing products and business. We may enter into future acquisitions of, or investments in, businesses, in order to complement or expand our current businesses or enter into a new business market. Negotiations associated with an acquisition or strategic investment could divert management's attention and other company resources. Any of the following risks associated with past or future acquisitions or investments could impair our ability to grow our business, develop new products, our ability to sell our products, and ultimately could have a negative impact on our growth or our financial results:

- difficulty in combining the technology, products, operations or workforce of the acquired business with our business;
- difficulty in operating in a new or multiple new locations;
- disruption of our ongoing businesses or the ongoing business of the company we invest in or acquire;
- difficulty in realizing the potential financial or strategic benefits of the transaction;
- difficulty in maintaining uniform standards, controls, procedures and policies;
- disruption of or delays in ongoing research and development efforts;
- diversion of capital and other resources;
- assumption of liabilities;
- diversion of resources and unanticipated expenses resulting from litigation arising from potential or actual business acquisitions or investments;
- difficulties in entering into new markets in which we have limited or no experience and where competitors in such markets have stronger positions; and
- impairment of relationships with employees and customers, or the loss of any of our key employees or customers our target's key employees or customers, as a result of our acquisition or investment.

In addition, the consideration for any future acquisition could be paid in cash, shares of our common stock, the issuance of convertible debt securities or a combination of cash, convertible debt and common stock. If we make an investment in cash or use cash to pay for all or a portion of an acquisition, our cash reserves would be reduced which could negatively impact the growth of our business or our ability to develop new products. However, if we pay the consideration with shares of common stock, or convertible debentures, the holdings of our existing stockholders would be diluted. The significant decline in the trading price of our common stock would make the dilution to our stockholders more extreme and could negatively impact our ability to pay the consideration with shares of common stock or convertible debentures. We cannot forecast the number, timing or size of future strategic investments or acquisitions, or the effect that any such investments or acquisitions might have on our operations or financial results.

We are exposed to credit risk, fluctuations in the market values of our portfolio investments and in interest rates.

We account for our investment instruments in accordance with Statement of Financial Accounting Standards No. 115, or SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities. All of the cash equivalents and marketable securities are treated as “available-for-sale” under SFAS No. 115. Investments in both fixed rate and floating rate interest earning instruments carry a degree of interest rate risk. Fixed rate securities may have their market value adversely impacted due to a rise in interest rates, while floating rate securities may produce less income than expected if interest rates fall. Due in part to these factors, our future investment income may fall short of expectations due to changes in interest rates or if the decline in fair value of our publicly traded debt or equity investments is judged to be other-than-temporary. We may suffer losses in principal if we are forced to sell securities that decline in securities market value due to changes in interest rates. Future declines in the market values of our cash, cash equivalents and marketable securities could have a material adverse effect on our financial condition and operating results. However, because any debt securities we hold are classified as “available-for-sale,” no gains or losses are realized in our Consolidated Statements of Operations due to changes in interest rates unless such securities are sold prior to maturity or unless declines in value are determined to be other-than-temporary.

At April 26, 2009 and January 25, 2009, we had \$1.34 billion and \$1.26 billion, respectively, in cash, cash equivalents and marketable securities. Given the global nature of our business, we have invested both domestically and internationally. All of our investments are denominated in United States dollars. We invest in a variety of financial instruments, consisting principally of cash and cash equivalents, asset-backed securities, commercial paper, mortgage-backed securities issued by Government-sponsored enterprises, equity securities, money market funds and debt securities of corporations, municipalities and the United States government and its agencies. As of April 26, 2009, we did not have any investments in auction-rate preferred securities. As of April 26, 2009, our investments in government agencies and government sponsored enterprises represented approximately 63% of our total cash equivalents and marketable securities, while the financial sector accounted for approximately 14% of our total cash equivalents and marketable securities.

The current volatility in the financial markets and overall economic uncertainty increases the risk that the actual amounts realized in the future on our financial instruments could differ significantly from the fair values currently assigned to them. Other income and expense could also vary materially from expectations depending on gains or losses realized on the sale or exchange of financial instruments; impairment charges related to debt securities as well as equity and other investments; interest rates; and cash, cash equivalent and marketable securities balances. For instance, we recorded \$5.6 million related to what we believe is an other than temporary impairment of our investment in the money market funds held by the International Reserve Fund during the third quarter of fiscal year 2009. Please refer to Notes 6 and 7 of these Notes to Condensed Consolidated Financial Statements for further details. As of April 26, 2009, our money market investment in the International Reserve Fund, which was valued at \$40.0 million, net of \$5.6 million of other than temporary impairment charges that we recorded during fiscal year 2009, was classified as marketable securities in our Condensed Consolidated Balance Sheet due to the halting of redemption requests in September 2008 by the International Reserve Fund. The \$40.0 million value of our holdings in the International Reserve Fund as of April 26, 2009 reflects an initial investment of \$130.0 million, reduced by \$84.4 million that we received from the International Reserve Fund during the first quarter of fiscal 2010 and the \$5.6 million other than

temporary impairment charge we recorded against the value of this investment during fiscal year 2009. The \$84.4 million we received was our portion of a payout of approximately 65% of the total assets of the International Reserve Fund. We expect to receive the proceeds from our remaining investment in the International Reserve Fund, excluding some or all of the \$5.6 million, by October 2009, when all of the underlying securities held by the International Reserve Fund are scheduled to have matured. However, redemptions from the International Reserve Fund are currently subject to pending litigation, which could cause further delay in receipt of our funds. In addition, we may determine that further impairment of our investment in the International Reserve Fund may be necessary.

Risks Related to Our Partners and Customers

We depend on foundries to manufacture our products and these third parties may not be able to satisfy our manufacturing requirements, which would harm our business.

We do not manufacture the silicon wafers used for our products and do not own or operate a wafer fabrication facility. Instead, we are dependent on industry-leading foundries, such as Taiwan Semiconductor Manufacturing Corporation, or TSMC, to manufacture our semiconductor wafers using their state-of-the-art fabrication equipment and techniques. The foundries, which have limited capacity, also manufacture products for other semiconductor companies, including some of our competitors. Since we do not have long-term commitment contracts with any of these foundries, they do not have an obligation to provide us with any minimum quantity of product at any time or at any set price, except as may be provided in a specific purchase order. Most of our products are only manufactured by one foundry at a time. In times of high demand, the foundries could choose to prioritize their capacity for other companies, reduce or eliminate deliveries to us, or increase the prices that they charge us. If we are unable to meet customer demand due to reduced or eliminated deliveries or have to increase the prices of our products, we could lose sales to customers, which would negatively impact our revenue and our reputation.

Because the lead-time needed to establish a strategic relationship with a new manufacturing partner could be several quarters, we do not have an alternative source of supply for our products. In addition, the time and effort to qualify a new foundry could result in additional expense, diversion of resources, or lost sales, any of which would negatively impact our financial results. We believe that long-term market acceptance for our products will depend on reliable relationships with the third-party manufacturers we use to ensure adequate product supply and competitive pricing to respond to customer demand.

Failure to achieve expected manufacturing yields for our products could negatively impact our financial results and damage our reputation.

Manufacturing yields for our products are a function of product design, which is developed largely by us, and process technology, which typically is proprietary to the manufacturer. Low yields may result from either product design or process technology failure. We do not know a yield problem exists until our design is manufactured. When a yield issue is identified, the product is analyzed and tested to determine the cause. As a result, yield problems may not be identified until well into the production process. Resolution of yield problems requires cooperation by, and communication between, us and the manufacturer. Because of our potentially limited access to wafer foundry capacity, decreases in manufacturing yields could result in an increase in our costs and force us to allocate our available product supply among our customers. Lower than expected yields could potentially harm customer relationships, our reputation and our financial results.

We are dependent on third parties for assembly, testing and packaging of our products, which reduces our control over the delivery schedule, product quantity or product quality.

Our products are assembled, tested and packaged by independent subcontractors, such as Advanced Semiconductor Engineering, Inc., Amkor Technology, JSI Logistics, Ltd., King Yuan Electronics Co., Siliconware Precision Industries Co. Ltd., and ChipPAC. As a result, we do not directly control our product delivery schedules, product quantity, or product quality. All of these subcontractors assemble, test and package products for other companies, including some of our competitors. Since we do not have long-term agreements with our subcontractors, when demand for subcontractors to assemble, test or package products is high, our subcontractors may decide to prioritize the orders of other customers over our orders. Since the time required to qualify a different subcontractor to assemble, test or package our products can be lengthy, if we have to find a replacement subcontractor we could experience

significant delays in shipments of our products, product shortages, a decrease in the quality of our products, or an increase in product cost. Any product shortages or quality assurance problems could increase the costs of manufacture, assembly or testing of our products, which could cause our gross margin and revenue to decline.

Failure to transition to new manufacturing process technologies could adversely affect our operating results and gross margin.

We use the most advanced manufacturing process technology appropriate for our products that is available from our third-party foundries. As a result, we continuously evaluate the benefits of migrating our products to smaller geometry process technologies in order to improve performance and reduce costs. We believe this strategy will help us remain competitive. Our current product families are manufactured using 0.15 micron, 0.14 micron, 0.13 micron, 0.11 micron, 90 nanometer, 65 nanometer and 55 nanometer process technologies. Manufacturing process technologies are subject to rapid change and require significant expenditures for research and development, which could negatively impact our operating expenses and gross margin.

We have experienced difficulty in migrating to new manufacturing processes in the past and, consequently, have suffered reduced yields, delays in product deliveries and increased expense levels. We may face similar difficulties, delays and expenses as we continue to transition our new products to smaller geometry processes. Moreover, we are dependent on our third-party manufacturers to invest sufficient funds in new manufacturing techniques in order to have ample capacity for all of their customers and to develop the techniques in a timely manner. Our product cycles may also depend on our third-party manufacturers migrating to smaller geometry processes successfully and in time for us to meet our customer demands. Some of our competitors own their manufacturing facilities and may be able to move to a new state of the art manufacturing process more quickly or more successfully than our manufacturing partners. For example, Intel has released a 45 nanometer chip for desktop computers which it is manufacturing in its foundries. In addition, in October 2008, AMD and the Advanced Technology Investment Company, a technology investment company backed by the government of Abu Dhabi, announced the establishment of a U.S. headquartered semiconductor manufacturing company that will manufacture AMD's advance processors. If our suppliers fall behind our competitors in manufacturing processes, the development and customer demand for our products and the use of our products could be negatively impacted. If we are forced to use larger geometric processes in manufacturing a product than our competition, our gross margin may be reduced. The inability by us or our third-party manufacturers to effectively and efficiently transition to new manufacturing process technologies may adversely affect our operating results and our gross margin.

We rely on third-party vendors to supply software development tools to us for the development of our new products and we may be unable to obtain the tools necessary to develop or enhance new or existing products.

We rely on third-party software development tools to assist us in the design, simulation and verification of new products or product enhancements. To bring new products or product enhancements to market in a timely manner, or at all, we need software development tools that are sophisticated enough or technologically advanced enough to complete our design, simulations and verifications. In the past, we have experienced delays in the introduction of products as a result of the inability of then available software development tools to fully simulate the complex features and functionalities of our products. In the future, the design requirements necessary to meet consumer demands for more features and greater functionality from our products may exceed the capabilities of available software development tools. Unavailability of software development tools may result in our missing design cycles or losing design wins, either of which could result in a loss of market share or negatively impact our operating results.

Because of the importance of software development tools to the development and enhancement of our products, a critical component of our product development efforts is our partnerships with leaders in the computer-aided design industry, including Cadence Design Systems, Inc. and Synopsys, Inc. We have invested significant resources to develop relationships with these industry leaders and have often assisted them in the definition of their new products. We believe that forming these relationships and utilizing next-generation development tools to design, simulate and verify our products will help us remain at the forefront of the 3D graphics, communications and networking segments and develop products that utilize leading-edge technology on a rapid basis. If these relationships are not successful, we may be unable to develop new products or product enhancements in a timely manner, which could result in a loss of market share, a decrease in revenue or negatively impact our operating results.

We sell our products to a small number of customers and our business could suffer if we lose any of these customers.

We have a limited number of customers and our sales are highly concentrated. For the first quarters of fiscal years 2010 and 2009, aggregate sales to customers in excess of 10% of our total revenue accounted for approximately 22% of total revenue from two customers and approximately 11% of our total revenue from another customer, respectively. Although a small number of our other customers represent the majority of our revenue, their end customers include a large number of original equipment manufacturers, or OEMs, and system integrators throughout

the world who, in many cases, specify the graphics supplier. Our sales process involves achieving key design wins with leading PC, OEMs and major system builders and supporting the product design into high volume production with key contract equipment manufacturers, or CEMs, original design manufacturers, or ODMs, add-in board and motherboard manufacturers. These design wins in turn influence the retail and system builder channel that is serviced by CEMs, ODMs, add-in board and motherboard manufacturers. Our distribution strategy is to work with a small number of leading independent CEMs, ODMs, add-in board and motherboard manufacturers, and distributors, each of which has relationships with a broad range of system builders and leading PC OEMs. If we were to lose sales to our PC OEMs, CEMs, ODMs, add-in board manufacturers and motherboard manufacturers and were unable to replace the lost sales with sales to different customers, if they were to significantly reduce the number of products they order from us, or if we were unable to collect accounts receivable from them, our revenue may not reach or exceed the expected level in any period, which could harm our financial condition and our results of operations.

Any difficulties in collecting accounts receivable, including from foreign customers, could harm our operating results and financial condition.

Our accounts receivable are highly concentrated and make us vulnerable to adverse changes in our customers' businesses, and to downturns in the industry and the worldwide economy. Accounts receivable from significant customers, those representing 10% or more of total accounts receivable aggregated approximately 27% of our accounts receivable balance from two customers at April 26, 2009 and approximately 38% of our accounts receivable balance from three customers at January 25, 2009.

Difficulties in collecting accounts receivable could materially and adversely affect our financial condition and results of operations. These difficulties are heightened during periods when economic conditions worsen. We continue to work directly with more foreign customers and it may be difficult to collect accounts receivable from them. We maintain an allowance for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. This allowance consists of an amount identified for specific customers and an amount based on overall estimated exposure. If the financial condition of our customers were to deteriorate, resulting in an impairment in their ability to make payments, additional allowances may be required, we may be required to defer revenue recognition on sales to affected customers, and we may be required to pay higher credit insurance premiums, any of which could adversely affect our operating results. In the future, we may have to record additional reserves or write-offs and/or defer revenue on certain sales transactions which could negatively impact our financial results.

We obtain credit insurance over the purchasing credit extended to certain customers. As a result of the tightening of the credit markets, we may not be able to acquire credit insurance on the credit we extend to these customers or in amounts that we deem sufficient. While we have procedures to monitor and limit exposure to credit risk on our accounts receivables, there can be no assurance such procedures will effectively limit our credit risk or avoid losses, which could harm our financial condition or operating results.

Risks Related to Regulatory, Legal, Our Common Stock and Other Matters

We are subject to litigation arising from alleged defects in our previous generation MCP and GPU products, which if determined adversely to us, could harm our business.

During the second quarter of fiscal year 2009, we recorded a \$196.0 million charge against cost of revenue to cover anticipated customer warranty, repair, return, replacement and other associated costs arising from a weak die/package material set in certain versions of our previous generation MCP and GPU products used in notebook systems. The previous generation MCP and GPU products that are impacted were included in a number of notebook products that were shipped and sold in significant quantities. Certain notebook configurations of these MCP and GPU products are failing in the field at higher than normal rates. While we have not been able to determine a root cause for these failures, testing suggests a weak material set of die/package combination, system thermal management designs, and customer use patterns are contributing factors. We continue to engage in discussions with our supply chain regarding reimbursement to us for some or all of the costs we have incurred and may incur in the future relating to the weak material set. We also continue to seek to access our insurance coverage, which provided us with \$8 million in related reimbursement during fiscal year 2009. However, there can be no assurance that we will recover any additional reimbursement. We continue to not see any abnormal failure rates in any systems using NVIDIA products other than certain notebook configurations. However, we are continuing to test and otherwise investigate other products. There can be no assurance that we will not discover defects in other MCP or GPU products.

In September, October and November 2008, several putative class action lawsuits were filed against us, asserting various claims related to the impacted MCP and GPU products. Such lawsuits could result in the diversion of management's time and attention away from business operations, which could harm our business. In addition, the costs of defense and any damages resulting from this litigation, a ruling against us, or a settlement of the litigation could adversely affect our cash flow and financial results.

The ongoing civil actions or any new actions relating to the market for GPUs could adversely affect our business.

In November 2006, we received a subpoena from the San Francisco Office of the Antitrust Division of the United States Department of Justice, or DOJ, in connection with the DOJ's investigation into potential antitrust violations related to GPUs and cards. In October 2008, the DOJ formally notified us that the DOJ investigation had been closed. No specific allegations were made against NVIDIA during the investigation.

Several putative civil complaints were filed against us by direct and indirect purchasers of GPUs, asserting federal antitrust claims based on alleged price fixing, market allocation, and other alleged anti-competitive agreements between us and ATI Technologies, ULC., or ATI, and Advanced Micro Devices, Inc., or AMD, as a result of its acquisition of ATI. The indirect purchasers' consolidated amended complaint also asserts a variety of state law antitrust, unfair competition and consumer protection claims on the same allegations, as well as a common law claim for unjust enrichment.

In September 2008, we executed a settlement agreement, or the Agreement, in connection with the claims of the certified class of direct purchaser plaintiffs. The Agreement has received final approval from the court and disposes of all claims and appeals raised by the certified class in the complaints against NVIDIA. In addition, in September 2008, we reached a settlement agreement with the remaining individual indirect purchaser plaintiffs that provides for a dismissal of all claims and appeals related to the complaints raised by the individual indirect purchaser plaintiffs. Although the pending cases against us have been settled, additional parties may bring claims against us relating to the potential antitrust violations related to GPUs and cards. If additional claims are brought against us, such lawsuits could result in the diversion of management's time and attention away from business operations, which could harm our business. In addition, the costs of defense and any damages resulting from this litigation, a ruling against us, or a settlement of the litigation could adversely affect our cash flow and financial results.

We are a party to other litigation, including patent litigation, which, if determined adversely to us, could adversely affect our cash flow and financial results.

We are a party to other litigation as both a defendant and as a plaintiff. For example, we are engaged in litigation with Intel Corporation, Rambus Corporation and with various parties related to our acquisition of 3dfx in 2001. Please refer to Note 12 of the Notes to Condensed Consolidated Financial Statements for further detail on these lawsuits. There can be no assurance that any litigation to which we are a party will be resolved in our favor. Any claim that is successfully decided against us may cause us to pay substantial damages, including punitive damages, and other related fees. Regardless of whether lawsuits are resolved in our favor or if we are the plaintiff or the defendant in the litigation, any lawsuits to which we are a party will likely be expensive and time consuming to defend or resolve. Such lawsuits could also harm our relationships with existing customers and result in the diversion of management's time and attention away from business operations, which could harm our business. Costs of defense and any damages resulting from litigation, a ruling against us, or a settlement of the litigation could adversely affect our cash flow and financial results.

Litigation to defend against alleged infringement of intellectual property rights or to enforce our intellectual property rights and the outcome of such litigation could result in substantial costs to us.

We expect that as the number of issued hardware and software patents increases and as competition intensifies, the volume of intellectual property infringement claims and lawsuits may increase. We may in the future become involved in lawsuits or other legal proceedings alleging patent infringement or other intellectual property rights violations by us or by our customers that we have agreed to indemnify them for certain claims of infringement.

An unfavorable ruling in any such intellectual property related litigation could include significant damages, invalidation of a patent or family of patents, indemnification of customers, payment of lost profits, or, when it has been sought, injunctive relief.

In addition, in the future, we may need to commence litigation or other legal proceedings in order to:

- assert claims of infringement of our intellectual property;
- enforce our patents;
- protect our trade secrets or know-how; or
- determine the enforceability, scope and validity of the propriety rights of others.

If we have to initiate litigation in order to protect our intellectual property, our operating expenses may increase which could negatively impact our operating results. Our failure to effectively protect our intellectual property could harm our business.

If infringement claims are made against us or our products are found to infringe a third parties' patent or intellectual property, we or one of our indemnified customers may have to seek a license to the third parties' patent or other intellectual property rights. However, we may not be able to obtain licenses at all or on terms acceptable to us particularly from our competitors. If we or one of our indemnified customers is unable to obtain a license from a third party for technology that we use or that is used in one of our products, we could be subject to substantial liabilities or have to suspend or discontinue the manufacture and sale of one or more of our products. We may also have to make royalty or other payments, or cross license our technology. If these arrangements are not concluded on commercially reasonable terms, our business could be negatively impacted. Furthermore, the indemnification of a customer may increase our operating expenses which could negatively impact our operating results.

Our ability to compete will be harmed if we are unable to adequately protect our intellectual property.

We rely primarily on a combination of patents, trademarks, trade secrets, employee and third-party nondisclosure agreements, and licensing arrangements to protect our intellectual property in the United States and internationally. We have numerous patents issued, allowed and pending in the United States and in foreign jurisdictions. Our patents and pending patent applications primarily relate to our products and the technology used in connection with our products. We also rely on international treaties, organizations and foreign laws to protect our intellectual property. The laws of certain foreign countries in which our products are or may be manufactured or sold, including various countries in Asia, may not protect our products or intellectual property rights to the same extent as the laws of the United States. This makes the possibility of piracy of our technology and products more likely. We continuously assess whether and where to seek formal protection for particular innovations and technologies based on such factors as:

- the commercial significance of our operations and our competitors' operations in particular countries and regions;
- the location in which our products are manufactured;
- our strategic technology or product directions in different countries; and
- the degree to which intellectual property laws exist and are meaningfully enforced in different jurisdictions.

Our pending patent applications and any future applications may not be approved. In addition, any issued patents may not provide us with competitive advantages or may be challenged by third parties. The enforcement of patents by others may harm our ability to conduct our business. Others may independently develop substantially equivalent intellectual property or otherwise gain access to our trade secrets or intellectual property. Our failure to effectively protect our intellectual property could harm our business.

Government investigations and inquiries from regulatory agencies could lead to enforcement actions, fines or other penalties and could result in litigation against us.

In the past, we have been subject to government investigations and inquiries from regulatory agencies such as the DOJ and the SEC. We may be subject to government investigations and receive additional inquiries from regulatory agencies in the future, which may lead to enforcement actions, fines or other penalties.

In addition, litigation has often been brought against a company in connection with the announcement of a government investigation or inquiry from a regulatory agency. For example, following the announcement of the DOJ investigation, several putative civil complaints were filed against us. In addition, following our Audit Committee's investigation and the SEC's investigation concerning our historical stock option granting practices, ten derivative complaints were filed in state and federal court pertaining to allegations relating to stock option grants. Please refer to Note 12 of the Notes to Condensed Consolidated Financial Statements for further information regarding these lawsuits. Such lawsuits could result in the diversion of management's time and attention away from business operations, which could harm our business. In addition, the costs of defense and any damages resulting from litigation, a ruling against us, or a settlement of the litigation could adversely affect our cash flow and financial results.

We are subject to the risks of owning real property.

During fiscal year 2009, we purchased real property in Santa Clara, California that includes approximately 25 acres of land and ten commercial buildings. We also own real property in China and India. We have limited experience in the ownership and management of real property and are subject to the risks of owning real property, including:

- the possibility of environmental contamination and the costs associated with fixing any environmental problems;
- adverse changes in the value of these properties, due to interest rate changes, changes in the neighborhood in which the property is located, or other factors;
- the risk of loss if we decide to sell and are not able to recover all capitalized costs;
- increased cash commitments for the possible construction of a campus;
- the possible need for structural improvements in order to comply with zoning, seismic and other legal or regulatory requirements;
- increased operating expenses for the buildings or the property or both;
- possible disputes with third parties, such as neighboring owners or others, related to the buildings or the property or both; and
- the risk of financial loss in excess of amounts covered by insurance, or uninsured risks, such as the loss caused by damage to the buildings as a result of earthquakes, floods and or other natural disasters.

Expensing employee equity compensation adversely affects our operating results and could also adversely affect our competitive position.

Since inception, we have used equity through our stock option plans and our employee stock purchase program as a fundamental component of our compensation packages. We believe that these programs directly motivate our employees and, through the use of vesting, encourage our employees to remain with us.

In December 2004, the FASB issued Statement of Financial Accounting Standards No. 123(R), or SFAS No. 123(R), Share-based Payment, which requires the measurement and recognition of compensation expense for all stock-based compensation payments. SFAS No. 123(R) requires that we record compensation expense for stock options and our employee stock purchase plan using the fair value of those awards. Stock-based compensation expense resulting from our compliance with SFAS No. 123(R), was \$34.1 million and \$42.1 million related to on-going vesting of equity awards during the first quarters of fiscal years 2010 and 2009, respectively, which negatively impacted our operating results. Additionally, in March 2009, we completed a cash tender offer for to purchase certain employee stock options. A total of 28.5 million options were tendered under the offer for an aggregate cash purchase price of \$78.1 million, in exchange for the cancellation of the eligible options. As a result of the tender offer, we incurred a charge of \$140.2 million consisting of the remaining unamortized stock based compensation expense associated with the unvested portion of the options tendered in the offer, stock-based compensation expense resulting from amounts paid in excess of the fair value of the underlying options, plus associated payroll taxes and professional fees. We believe that SFAS No. 123(R) will continue to negatively impact our operating results.

To the extent that SFAS No. 123(R) makes it more expensive to grant stock options or to continue to have an employee stock purchase program, we may decide to incur increased cash compensation costs. In addition, actions that we may take to reduce stock-based compensation expense that may be more severe than any actions our competitors may implement and may make it difficult to attract retain and motivate employees, which could adversely affect our competitive position as well as our business and operating results.

We may be required to record a charge to earnings if our goodwill or amortizable intangible assets become impaired, which could negatively impact our operating results.

Under accounting principles generally accepted in the United States, we review our amortizable intangible assets and goodwill for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. Goodwill is tested for impairment at least annually. The carrying value of our goodwill or amortizable assets may not be recoverable due to factors such as a decline in stock price and market capitalization, reduced estimates of future cash flows and slower growth rates in our industry or in any of our business units. For example, during the twelve months ended January 25, 2009, our market capitalization declined from approximately \$14 billion to approximately \$4 billion. Estimates of future cash flows are based on an updated long-term financial outlook of our operations. However, actual performance in the near-term or long-term could be materially different from these forecasts, which could impact future estimates. For example, if one of our business units does not meet its near-term and longer-term forecasts, the goodwill assigned to the business unit could be impaired. We may be required to record a charge to earnings in our financial statements during a period in which an impairment of our goodwill or amortizable intangible assets is determined to exist, which may negatively impact our results of operations.

Our stock price continues to be volatile and investors may suffer losses.

Our stock has at times experienced substantial price volatility as a result of variations between our actual and anticipated financial results, announcements by us and our competitors, or uncertainty about current global economic

conditions. The stock market as a whole also has experienced extreme price and volume fluctuations that have affected the market price of many technology companies in ways that may have been unrelated to these companies' operating performance.

In the past, securities class action litigation has often been brought against a company following periods of volatility in the market price of its securities. For example, following our announcement in July 2008 that we would take a charge against cost of revenue to cover anticipated costs and expenses arising from a weak die/package material set in certain versions of our previous generation MCP and GPU products and that we were revising financial guidance for our second fiscal quarter of 2009, the trading price of our common stock declined. In September, October and November 2008, several putative class action lawsuits were filed against us relating to this announcement. Please refer to Note 12 of the Notes to Condensed Consolidated Financial Statements for further information regarding these lawsuits. Due to changes in the potential volatility of our stock price, we may be the target of securities litigation in the future. Such lawsuits could result in the diversion of management's time and attention away from business operations, which could harm our business. In addition, the costs of defense and any damages resulting from litigation, a ruling against us, or a settlement of the litigation could adversely affect our cash flow and financial results.

Changes in U.S. tax legislation regarding our foreign earnings could materially impact our business.

Currently a majority of our revenue is generated from customers located outside the United States, and a substantial portion of our assets, including employees, are located outside the United States. United States income taxes and foreign withholding taxes have not been provided on undistributed earnings for certain non-United States subsidiaries, because such earnings are intended to be indefinitely reinvested in the operations of those subsidiaries. President Obama's administration has recently announced initiatives that would substantially reduce our ability to defer U.S. taxes including, repealing the deferral of U.S. taxation of foreign earnings, eliminating utilization of or substantially reducing our ability to claim foreign tax credits, and eliminating various tax deductions until foreign earnings are repatriated to the United States. If any of these proposals are constituted into legislation, they could have a negative impact on our financial position and results of operations.

Our operating results may be adversely affected if we are subject to unexpected tax liabilities.

We are subject to taxation by a number of taxing authorities both in the United States and throughout the world. Tax rates vary among the jurisdictions in which we operate. Significant judgment is required in determining our provision for our income taxes as there are many transactions and calculations where the ultimate tax determination is uncertain. Although we believe our tax estimates are reasonable, any of the below could cause our effective tax rate to be materially different than that which is reflected in historical income tax provisions and accruals:

- the jurisdictions in which profits are determined to be earned and taxed;
- adjustments to estimated taxes upon finalization of various tax returns;
- changes in available tax credits;
- changes in share-based compensation expense;
- changes in tax laws, the interpretation of tax laws either in the United States or abroad or the issuance of new interpretative accounting guidance related to uncertain transactions and calculations where the tax treatment was previously uncertain; and
- the resolution of issues arising from tax audits with various tax authorities.

Should additional taxes be assessed as a result of any of the above, our operating results could be adversely affected. In addition, our future effective tax rate could be adversely affected by changes in the mix of earnings in countries with differing statutory tax rates, changes in tax laws or changes in the interpretation of tax laws.

Our failure to comply with any applicable environmental regulations could result in a range of consequences, including fines, suspension of production, excess inventory, sales limitations, and criminal and civil liabilities.

We are subject to various state, federal and international laws and regulations governing the environment, including restricting the presence of certain substances in electronic products and making producers of those products financially responsible for the collection, treatment, recycling and disposal of those products. For example, we are subject to the European Union Directive on Restriction of Hazardous Substances Directive, or RoHS Directive, that restricts the use of a number of substances, including lead, and other hazardous substances in electrical and electronic equipment in the market in the European Union. We could face significant costs and liabilities in connection with the European Union Directive on Waste Electrical and Electronic Equipment, or WEEE. The WEEE directs members of the European Union to enact laws, regulations, and administrative provisions to ensure that producers of electric and electronic equipment are financially responsible for the collection, recycling, treatment and environmentally responsible disposal of certain products sold into the market after August 15, 2005.

It is possible that unanticipated supply shortages, delays or excess non-compliant inventory may occur as a result of the RoHS Directive, WEEE, and other domestic or international environmental regulations. Failure to comply with any applicable environmental regulations could result in a range of consequences including costs, fines, suspension of production, excess inventory, sales limitations, criminal and civil liabilities and could impact our ability to conduct business in the countries or states that have adopted these types of regulations.

While we believe that we have adequate internal control over financial reporting, if we or our independent registered public accounting firm determines that we do not, our reputation may be adversely affected and our stock price may decline.

Section 404 of the Sarbanes-Oxley Act of 2002 requires our management to report on, and our independent registered public accounting firm to audit, the effectiveness of our internal control structure and procedures for financial reporting. We have an ongoing program to perform the system and process evaluation and testing necessary to comply with these requirements. However, the manner in which companies and their independent public accounting firms apply these requirements and test companies' internal controls remains subject to some judgment. To date, we have incurred, and we expect to continue to incur, increased expense and to devote additional management resources to Section 404 compliance. Despite our efforts, if we identify a material weakness in our internal controls, there can be no assurance that we will be able to remediate that material weakness in a timely manner, or that we will be able to maintain all of the controls necessary to determine that our internal control over financial reporting is effective. In the event that our chief executive officer, chief financial officer or our independent registered public accounting firm determine that our internal control over financial reporting is not effective as defined under Section 404, investor perceptions of us may be adversely affected and could cause a decline in the market price of our stock.

Changes in financial accounting standards or interpretations of existing standards could affect our reported results of operations.

We prepare our consolidated financial statements in conformity with generally accepted accounting principles in the United States. These principles are constantly subject to review and interpretation by the SEC and various bodies formed to interpret and create appropriate accounting principles. A change in these principles can have a significant effect on our reported results and may even retroactively affect previously reported transactions.

Provisions in our certificate of incorporation, our bylaws and our agreement with Microsoft could delay or prevent a change in control.

Our certificate of incorporation and bylaws contain provisions that could make it more difficult for a third party to acquire a majority of our outstanding voting stock. These provisions include the following:

- the ability of our Board to create and issue preferred stock without prior stockholder approval;
- the prohibition of stockholder action by written consent;
- a classified Board; and
- advance notice requirements for director nominations and stockholder proposals.

On March 5, 2000, we entered into an agreement with Microsoft in which we agreed to develop and sell graphics chips and to license certain technology to Microsoft and its licensees for use in the Xbox. Under the agreement, if an individual or corporation makes an offer to purchase shares equal to or greater than 30% of the outstanding shares of our common stock, Microsoft may have first and last rights of refusal to purchase the stock. The Microsoft provision and the other factors listed above could also delay or prevent a change in control of NVIDIA.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Issuer Purchases of Equity Securities

During fiscal year 2005, we announced that our Board of Directors, or Board, had authorized a stock repurchase program to repurchase shares of our common stock, subject to certain specifications, up to an aggregate maximum amount of \$300 million. During fiscal year 2007, the Board further approved an increase of \$400 million to the original stock repurchase program. In fiscal year 2008, we announced a stock repurchase program under which we may purchase up to an additional \$1.0 billion of our common stock over a three year period through May 2010. On August 12, 2008, we announced that our Board further authorized an additional increase of \$1.0 billion to the stock repurchase program. As a result of these increases, we have an ongoing authorization from the Board, subject to certain specifications, to repurchase shares of our common stock up to an aggregate maximum amount of \$2.7 billion through May 2010.

The repurchases will be made from time to time in the open market, in privately negotiated transactions, or in structured stock repurchase programs, and may be made in one or more larger repurchases, in compliance with the Securities Exchange Act of 1934 Rule 10b-18, subject to market conditions, applicable legal requirements, and other factors. The program does not obligate NVIDIA to acquire any particular amount of common stock and the program may be suspended at any time at our discretion. As part of our share repurchase program, we have entered into, and we may continue to enter into, structured share repurchase transactions with financial institutions. These agreements generally require that we make an up-front payment in exchange for the right to receive a fixed number of shares of our common stock upon execution of the agreement, and a potential incremental number of shares of our common stock, within a pre-determined range, at the end of the term of the agreement

During the three months ended April 26, 2009, we did not enter into any structured share repurchase transactions or otherwise purchase any shares of our common stock. Through fiscal year 2010, we have repurchased an aggregate

of 90.9 million shares under our stock repurchase program for a total cost of \$1.46 billion. As of April 26, 2009, we are authorized, subject to certain specifications, to repurchase shares of our common stock up to an additional amount of \$1.24 billion through May 2010.

Additionally, during fiscal year 2010, we granted approximately 4.9 million stock options and 4.6 million restricted stock units under the 2007 Equity Incentive Plan. In March 2009, we completed a cash tender offer for 28.5 million options held by our employees. Please refer to Note 3 and Note 4 of the Notes to Condensed Consolidated Financial Statements for further information regarding stock-based compensation related to our March 2009 stock option purchase and related to equity awards granted under our equity incentive programs.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matters were submitted to a vote of our security holders during the first quarter of fiscal year 2010.

ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS
