PROSPECTUS SUPPLEMENT

(To Prospectus Dated February 2, 2005)

\$12,410,781,162

The Bear Stearns Companies Inc.

Medium-Term Notes, Series B

Set forth below is a summary of the terms of the notes offered by this prospectus supplement and the accompanying prospectus. For more detail, see "Description of Notes."

- Interest

The notes have a fixed or floating interest rate. The floating interest rate formula will be based on:

- Commercial Paper Rate;
- LIBOR;
- Federal Funds Rate;
- Treasury Rate;
- Prime Rate;
- CMT Rate; or
- Another interest rate formula.

- Index Notes

The principal, interest or other amounts payable on the notes, if any, may be based on one or more indices or other formulas.

- Maturity

The notes will mature in 9 months or more.

- Ranking

The notes will be our unsecured senior debt and will rank equally with all of our other unsecured and unsubordinated debt.

- Sinking Fund

The notes will not be subject to a sinking fund unless otherwise set forth in the applicable pricing supplement.

- Interest Payment Dates

Interest on fixed rate notes will be paid semi-annually or otherwise on the dates set forth in the applicable pricing supplement. Interest on floating rate notes or index notes will be paid monthly, quarterly, semiannually, annually or as otherwise set forth in the applicable pricing supplement.

- Redemption and Repurchase

The notes may be subject to:

- redemption, at our option; and
- repayment, at your option.

- Book-Entry Notes

The notes will be issued in book-entry form unless otherwise set forth in the applicable pricing supplement.

- Denominations

The notes will be issued in minimum denominations of \$25,000 (or the specified currency equivalent), increased in multiples of \$1,000 (or the specified currency equivalent), unless otherwise set forth in the applicable pricing supplement.

INVESTMENT IN THE NOTES INVOLVES CERTAIN RISKS. SEE "RISK FACTORS" BEGINNING ON PAGE S-3 OF THIS PROSPECTUS SUPPLEMENT.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus supplement or the accompanying prospectus. Any representation to the contrary is a criminal offense.

	Per Note	Total(4)
Initial public offering price(1)	100%	\$12,410,781,162
Agents' discounts and commission(2)	0.125% 0.750%	\$15,513,476 93,080,859
Our proceeds, before expenses(3)	99.250% 99.875%	\$12,317,700,303 12,395,267,686

- (1) We will issue the notes at 100% of their principal amount, unless otherwise set forth in the applicable pricing supplement.
- We will pay a commission to each agent, in the form of a discount, ranging from .125% to .750% of the price to the public of any note, depending on maturity, when that agent places such note. Any agent may agree with us, in respect of the sale of a note, to accept a commission other than one based on maturity, provided that the maximum commission will not be greater than 8%. We may sell notes to any agent as principal either at a discount or at 100% of their principal amount, for resale at negotiated prices to be determined by that agent at the time of resale. See "Supplemental Plan of Distribution." We have agreed to indemnify each agent against certain liabilities, including liabilities under the Securities Act of 1933, as amended.
- (3) Before deduction of expenses payable by us, estimated at \$700,000.
- (4) In US dollars or their equivalent in one or more foreign or composite currencies.

Bear, Stearns & Co. Inc.

February 2, 2005

We are offering the notes on a continuing basis through Bear, Stearns & Co. Inc., and any other agent we may designate. Each agent has agreed to use its reasonable best efforts to solicit purchases of the notes. We have reserved the right to sell notes directly on our own behalf. We will not list the notes on any securities exchange, and we cannot assure you that the notes offered by this prospectus supplement will be sold or that there will be a secondary market for them. We reserve the right to withdraw, cancel or modify the offer made by this prospectus supplement without giving notice. We may reject any offer in whole or in part.

Each agent may use this prospectus supplement in connection with offers and sales associated with market-making transactions in the notes. Each agent may act as principal or agent in the market-making transactions. The offers and sales will be made at prices that relate to prevailing prices at the time.

You must read this prospectus supplement and the accompanying prospectus together with all the documents which are deemed to be incorporated in this prospectus supplement and the accompanying prospectus by reference (see "Where You Can Find More Information" in the accompanying prospectus). This prospectus supplement and the accompanying prospectus must be read and construed on the basis that the incorporated documents are so incorporated and form part of this document, except as specified in this document.

We have not authorized any person to give any information or represent anything not contained in this prospectus supplement and the accompanying prospectus. You must not rely on any unauthorized information.

RISK FACTORS

Your investment in the notes involves risk. In consultation with your financial and legal advisers, you should carefully consider the following risks and the other information included or incorporated by reference in the applicable pricing supplement, this prospectus supplement and the accompanying prospectus, including the information under "Where You Can Find More Information" on page 3 of the accompanying prospectus, before deciding that an investment in the notes is suitable for you. You should not purchase the notes unless you understand and can bear the investment risks of the notes.

There may not be any Trading Market for Your Notes; Many Factors Affect the Trading Market and Value of Your Notes.

Upon issuance, the notes will not have an established trading market. We cannot assure you a trading market for the notes will ever develop or, if one develops, that it will be maintained. If you wish to liquidate your investment in the notes prior to maturity, selling your notes may be your only option. At that time, there may be an illiquid market for the notes or no market at all. In addition to our own creditworthiness, many other factors may affect the trading market value of, and trading market for, your notes. These factors include:

the rate of interest, if any, on your notes;
the complexity and volatility of the index or formula applicable to your notes;
the method of calculating the principal, or any premium, interest or other amounts payable in respect of your notes;
the time remaining to the maturity of your notes;
the total outstanding amount of any particular issuance of notes or of our notes in total;
any redemption or repayment features of your notes;

the amount of any other securities linked to your notes; and

the level, direction and volatility of market interest rates generally.

We expect that changes in interest rates will affect the trading value of the notes. In general, if US interest rates increase, we expect that the trading value of the notes will decrease and, conversely, if US interest rates decrease, we expect that the trading value of the notes will increase.

In addition, notes that are designed for specific investment objectives or strategies often experience a more limited trading market and more price volatility. There may be a limited number of buyers when you decide to sell your notes. This may affect the price you receive for your notes or your ability to sell your notes at all. You should not purchase notes unless you understand and know you can bear all of the investment risks related to your notes.

The Notes are not Insured Against Loss by any Third Party; You can only Depend on our Earnings and Assets for Payment of Principal and Interest on the Notes.

The notes will be solely our obligations, and no other entity will have any obligation, contingent or otherwise, to make any payments in respect of the notes.

In addition, because we are a holding company whose primary assets consist of shares of stock or other equity interests in our subsidiaries, almost all of our income is derived from those subsidiaries. Our subsidiaries will have no obligation to pay any amount in respect of the notes or to make any funds available for payment of the notes. Accordingly, we will be dependent on dividends and other

distributions or loans from our subsidiaries to generate the funds necessary to meet our obligations with respect to the notes, including the payment of principal and interest. The notes will also be effectively subordinated to the claims of creditors of our subsidiaries with respect to their assets.

If funds from dividends, other distributions or loans from our subsidiaries are not adequate, we may be unable to make payments of principal or interest in respect of the notes and you could lose all or a part of your investment.

At August 31, 2004:

we had outstanding (on an unconsolidated basis) approximately \$40.0 billion of debt and other obligations, including approximately \$36.2 billion of unsecured senior debt and \$3.4 billion of unsecured inter-company debt; and

our subsidiaries had outstanding (after elimination of inter-company items) approximately \$192.6 billion of debt and other obligations (including \$55.8 billion related to securities sold under repurchase agreements, \$75.0 billion related to payables to customers, \$28.0 billion related to financial instruments sold, but not yet purchased, and \$33.8 billion of other liabilities, including \$17.4 billion of debt).

If the Notes are Redeemable, We may Redeem such Notes when Prevailing Interest Rates are Relatively Low.

If the pricing supplement for your notes provides that the notes are redeemable at our option, we may choose to redeem the notes on or after the date indicated in the pricing supplement. If the pricing supplement provides that the notes are subject to mandatory redemption or are otherwise repayable at the option of the holder, we also may be required to redeem the notes upon the occurrence of certain events or at a certain date. In the event that prevailing interest rates are relatively low when we choose or are required to redeem the notes, you may not be able to reinvest the redemption proceeds in a comparable security with a yield as high as that on the notes being redeemed. Our ability to redeem the notes before the maturity date may affect the market value of the notes at any time when potential purchasers believe we are likely to redeem notes.

If the Notes you Purchase are Floating Rate Notes, you may Receive a Lesser Amount of Interest in the Future.

Because the interest rate on floating rate notes will be indexed to an external interest rate or index that may vary from time to time, there will be significant risks not associated with a conventional fixed rate debt security. These risks include fluctuation of the applicable interest rate and the possibility that, in the future, you will receive a lesser amount of interest. We have no control over a number of matters that may affect interest rates, including economic, financial and political events that are important in determining the existence, magnitude and longevity of these risks and their results. In recent years, interest rates have been volatile, and volatility may be expected in the future. However, past experience is not necessarily indicative of what may occur in the future.

If the Floating Rate Notes you Purchase are Subject to a Maximum Interest Rate, Your Return will be Limited.

If the applicable pricing supplement specifies that your floating rate notes are subject to a maximum interest rate, the rate of interest that will accrue on the floating rate notes during any interest reset period will never exceed the specified maximum interest rate. Conversely, although the applicable rate of interest will always be greater than zero for floating rate notes, unless a minimum interest rate

is specified in the applicable pricing supplement, we cannot assure you that the interest rate you receive in the future will not decrease.

Holders of Indexed Notes are Subject to Important Risks that are not Associated with More Conventional Debt Securities.

If you invest in indexed notes, you will be subject to significant risks not associated with conventional fixed-rate or floating-rate debt securities. These risks include the possibility that the particular index or indices may be subject to fluctuations, and the possibility that an investor will receive a lower, or no, amount of principal, premium, or interest, and at different times than expected. In recent years, interest rates and indices have been volatile, and this volatility may be expected in the future. However, past experience is not necessarily indicative of what may occur in the future. We have no control over a number of matters, including economic, financial, and political events, that are important in determining the existence, magnitude, and longevity of these risks and their impact on the value of, or payments made on, the indexed notes. Some of the additional risks that you should consider in connection with an investment in indexed notes are as follows:

You may lose some or all of your principal. The principal amount of an indexed note may or may not be fully "principal protected." This means that the principal amount you will receive at maturity may be less than the original purchase price of the indexed note. It also is possible that principal will not be repaid.

Your yield may be less than the yield on a conventional debt security of comparable maturity. Any yield on your investment in an indexed note (whether or not the principal amount is indexed) may be less than the overall return you would earn if you purchased a conventional debt security at the same time and with the same maturity date.

The existence of a multiplier or leverage factor may result in the loss of your principal and interest. Some indexed notes may have interest and principal payments that increase or decrease at a rate greater than the rate of a favorable or unfavorable movement in the indexed item. This is referred to as a multiplier or leverage factor. A multiplier or leverage factor in a principal or interest index will increase the risk that no principal or interest will be paid.

Payment on the indexed note prior to maturity may result in a reduced return on your investment. The terms of an indexed note may require that the indexed note be paid prior to its scheduled maturity date. That early payment could reduce your anticipated return. In addition, you may not be able to invest the funds you receive in a new investment that yields a similar return.

The United States federal income tax consequences of the indexed notes are uncertain. No statutory, judicial, or administrative authority directly addresses the characterization of the indexed notes or securities similar to the indexed notes for United States federal income tax purposes. As a result, significant United States federal income tax consequences of an investment in the indexed notes are not certain. We are not requesting a ruling from the Internal Revenue Service (the "IRS") for any of the indexed notes and we give no assurance that the IRS will agree with the statements made in this prospectus supplement or in the pricing supplement applicable to those notes.

Your investment return may be less than a comparable direct investment in the stocks included in an index or in a fund that invests in those stocks. A direct investment in the stocks included in an index or in a fund that invests in those stocks would allow you to receive the full benefit of any appreciation in the price of the shares, as well as in any dividends paid by those shares. Indexed notes may not offer these benefits.

Hedging Activities may Affect Your Return at Maturity and the Market Value of the Notes.

Hedging activities also may affect trading in the notes. We and our affiliates may from time to time engage in hedging activities in connection with an offering of the notes. This hedging activity may affect the value of the notes in a manner that would be adverse to your investment in the notes. In addition, we or our affiliates may acquire a long or short position in the notes from time to time. In the case of indexed notes, we or our affiliates may engage in hedging activity related to the indexed notes or to a component of the index or formula applicable to the indexed notes. All or a portion of these positions may be liquidated at or about the time of the maturity date of the notes. The aggregate amount and the composition of these positions are likely to vary over time. We have no reason to believe that any of our activities will have a material effect on the notes. However, we cannot assure you that our activities or the activities of our affiliates will not affect the prices at which you may sell your notes.

Changes in Our Credit Ratings are Expected to Affect the Value of the Notes.

Our credit ratings are an assessment of our ability to pay our obligations. Consequently, actual or anticipated changes in our credit ratings, as well as our financial condition or results of operations may significantly affect the trading value of the notes. However, because the return on the notes depends upon factors in addition to our ability to pay our obligations, an improvement in our credit ratings, financial condition or results of operations will not reduce the other investment risks related to the notes.

Changes in Exchange Rates and Exchange Controls Could Result in a Substantial Loss to You.

An investment in notes that are denominated in a specified currency other than US dollars, or the principal, premium and/or any interest of which are determined by reference to a currency or currency index or indices, entails significant risks that are not associated with a similar investment in a security denominated in US dollars. Risks include, without limitation, the possibility of significant changes in rates of exchange between the US dollar and the various foreign currencies or composite currencies and the possibility of the imposition or modification of foreign exchange controls by either the United States or foreign governments. These risks generally depend on factors over which we have no control, such as economic and political events or the supply of and demand for the relevant currencies. In recent years, rates of exchange between the US dollar and certain foreign currencies have been highly volatile and such volatility may be expected in the future. Fluctuations in any particular exchange rate that have occurred in the past are not necessarily indicative, however, of fluctuations in the rate that may occur during the term of any note. Depreciation of a specified currency other than US dollars against the US dollar could result in a decrease in the effective yield of the note below its coupon rate, and in certain circumstances could result in a loss to the investor on a US dollar basis.

Governments have imposed, and may in the future impose, exchange controls that could affect exchange rates as well as the availability of a specified foreign currency for making payments with respect to a note. There can be no assurance that exchange controls will not restrict or prohibit payments in any such currency or currency unit. Even if there are no actual exchange controls, it is possible that the specified currency for any particular note would not be available to make payments when due. In that event, we will repay such note in US dollars on the basis of the most recently available exchange rate. See "Description of Notes" Payment of Principal and Interest."

The Unavailability of Currencies Could Result in a Substantial Loss to You.

Currently, there are limited facilities in the United States for currency conversion between US dollars and foreign currencies. In addition, banks do not offer non-US dollar denominated checking or

savings account facilities in the United States. Accordingly, payments on notes made in a specified currency other than US dollars will be made from an account with a bank located in the country issuing the specified currency. As a result, you may have difficulty or be unable to convert such specified currencies into US dollars on a timely basis or at all. See "Description of Notes Payment of Principal and Interest." Unless otherwise specified in the applicable pricing supplement, notes denominated in a specified currency other than US dollars will not be sold in, or to residents of, the country issuing the specified currency in which particular notes are denominated.

Judgments in a Foreign Currency Could Result in a Substantial Loss to You.

The notes will be governed by and construed in accordance with the laws of the State of New York. If an action based on the notes were commenced in a court in the United States, it is likely that such court would grant judgment relating to the notes only in US dollars. It is not clear, however, whether in granting such judgment, the rate of conversion into US dollars would be determined with reference to the date of default, the date judgment is rendered or some other date. New York statutory law provides, however, that a court shall render a judgment or decree in the foreign currency of the underlying obligation and that the judgment or decree shall be converted into US dollars at the exchange rate prevailing on the date of entry of the judgment. Therefore, the exchange rate on the date of the judgment could be more favorable than the exchange rate on the date that the judgment is paid.

Please note, this prospectus supplement, the attached prospectus and the applicable pricing supplement do not describe all the risks of an investment in notes denominated in a specified currency other than US dollars, or the principal of or the premium and/or any interest on which are determined by reference to a currency, currency index or indices, equity index or indices or other formula or measure. You should consult your own financial and legal advisors as to the risks entailed by an investment in notes denominated in a specified currency other than US dollars, or as to which the principal, premium and/or any interest is determined by reference to a currency, currency index or indices, equity index or indices or other formula or measure. These notes are not an appropriate investment for investors who are unsophisticated with respect to foreign currency, equity linked or indexed transactions.

Except as set forth under "Certain US Federal Income Tax Considerations," the information set forth in this prospectus supplement is directed to prospective purchasers who are US residents, and we disclaim any responsibility to advise prospective purchasers who are residents of countries other than the United States with respect to any matters that may affect the purchase, holding or receipt of payments of principal (and premium, if any) and any interest with respect to the notes. These persons should consult their own financial and legal advisors with regard to such matters.

PRICING SUPPLEMENT

The pricing supplement for each offering of notes will contain the specific information and terms for that offering. The pricing supplement may also add, update or change information contained in this prospectus supplement and the prospectus. If any information in the pricing supplement, including any changes in the method of calculating interest on any note, is inconsistent with this prospectus supplement, you should rely on the information in the pricing supplement. It is important that you consider all of the information in the pricing supplement, this prospectus supplement and the prospectus when making your investment decision.

DESCRIPTION OF NOTES

General

The following terms apply to each note unless otherwise specified in the applicable pricing supplement and the note. The applicable pricing supplement will describe the terms for the notes, including:

interest rate;
index or other formulas on which principal, interest or other amounts payable may be based;
remarketing provisions;
our right to redeem notes;
your right to tender notes you have purchased; and
any other provisions.

We will issue notes under an indenture, dated as of May 31, 1991, as amended, between us and JPMorgan Chase Bank, N.A. (formerly, The Chase Manhattan Bank), as Trustee, that is more fully described in the accompanying prospectus. The notes are part of a single series of our debt securities that are issuable under the indenture. For a description of the rights attaching to the debt securities under the indenture, see "Description of Debt Securities" in the accompanying prospectus. This description and the description under "Description of Debt Securities" in the accompanying prospectus are summaries and do not restate the indenture. We urge you to read the indenture and its supplements which we have filed with the SEC because they, and not this description or the one in the accompanying prospectus, define your rights as a holder of notes. See "Where You Can Find More Information" in the accompanying prospectus on how to locate the indenture and its supplements.

The notes are limited in amount as described on the cover page of this prospectus supplement, less an amount equal to the aggregate initial public offering price of any other securities we may issue in the future, including any other series of medium-term notes. We may increase this limit if we wish to sell additional notes in the future. Under the indenture, we may issue debt securities over the amount authorized on the date of this prospectus supplement without obtaining your consent or the consent of holders of other debt securities. Each series of notes or other debt securities may differ as to their terms. For current information on our outstanding debt, see our most recent Forms 10-K and 10-Q. See "Where You Can Find More Information" in the accompanying prospectus.

We will offer the notes on a continuous basis at various times. The notes will mature at face value nine months or more from the date they are issued and before maturity may be subject to redemption at our option or repayment at your option, as specified in the applicable pricing supplement. Each note will be denominated in either US dollars or in another currency that will be specified both on the face of the note and in the applicable pricing supplement.

You will be required to pay for any notes you purchase by delivery of the requisite amount of the specified currency to an agent, unless other arrangements have been made. Payments should be made in the specified currency in the country issuing the specified currency, provided that, at your election and, in certain circumstances, at our option, payments on notes denominated in other than US dollars may be made in US dollars. See "Risk Factors" The Unavailability of Currencies Could Result in a Substantial Loss to You" and "Payment of Principal and Interest."

US dollar-denominated notes will be issued in minimum denominations of \$25,000, increased in multiples of \$1,000. Non-US dollar-denominated notes will be issued in the amount of the specified currency equal to US \$25,000 or any integral multiple of the equivalent of US \$1,000, as determined by reference to the noon buying rate in New York City for cable transfers in that specified currency as

certified for customs purposes by the Federal Reserve Bank of New York for that specified currency on the Business Day before the date of issuance or, if that exchange rate is not available, then on the basis of the most recently available exchange rate for the specified currency. We may specify other authorized denominations in the applicable pricing supplement.

We may issue the notes as currency indexed notes, the principal amount of which is payable at or before maturity and any interest on which and any premium or other amounts payable with respect to which will be determined by the difference between the currency in which the notes are denominated and another currency or composite currency or by reference to any other currency index or indices, as set forth in the applicable pricing supplement. See "Currency Indexed Notes."

We may also issue the notes as indexed notes, the principal amount of which is payable at or before maturity and any interest on which and any premium or other amounts payable with respect to which will be determined by reference to the price or performance of one or more specified securities, commodities or indices on certain specified dates, or by some other financial, economic or other measures or instruments. See "Other Indexed Notes."

The notes are unsecured and will rank equally with all of our unsecured and unsubordinated debt, including the other debt securities issued under the indenture. Because we are a holding company, the notes will be effectively subordinated to the claims of creditors of our subsidiaries with respect to their assets. At August 31, 2004:

we had outstanding (on an unconsolidated basis) approximately \$40.0 billion of debt and other obligations, including approximately \$36.2 billion of unsecured senior debt and \$3.4 billion of unsecured inter-company debt; and

our subsidiaries had outstanding (after elimination of inter-company items) approximately \$192.6 billion of debt and other obligations (including \$55.8 billion related to securities sold under repurchase agreements, \$75.0 billion related to payables to customers, \$28.0 billion related to financial instruments sold, but not yet purchased, and \$33.8 billion of other liabilities, including \$17.4 billion of debt).

The notes will not have a sinking fund unless otherwise specified in the pricing supplement.

Unless otherwise set forth in the applicable pricing supplement, each note will be issued in "book-entry" form represented by a permanent global security registered in the name of The Depository Trust Company or its nominee. As long as DTC or its nominee is the registered owner of a global security, DTC or its nominee will be considered the sole owner or holder of the book-entry note(s) represented by that global security under the indenture. See "Book-Entry Procedures and Settlement" in the accompanying prospectus.

We may issue the notes as exchangeable notes that are exchangeable at your option for:

the securities, or cash representing the value of securities, of an entity unaffiliated with us;

a basket of these securities:

an index or indices of these securities; or

any combination of the above options, as is described in the applicable pricing supplement.

Exchangeable notes may bear interest or be issued with original issue discount or at a premium, all as specified in the applicable pricing supplement. See "Exchangeable Notes."

Under the terms of the indenture, we may defease the notes. See "Description of Debt Securities" Defeasance" in the accompanying prospectus.

In the following discussion, any time we refer to paying principal on the notes, we mean at maturity or upon redemption or repayment. All times are New York City time unless otherwise noted. The following terms may apply to each note as specified in the applicable pricing supplement. We have provided the definitions of certain capitalized terms used in this prospectus supplement in the Glossary.

Possible Principal Protection

The applicable pricing supplement will detail whether your principal investment in the notes is (1) fully guaranteed and thus protected, (2) possibly protected or (3) not protected.

Principal protected means that, if held to maturity, your principal investment in the notes is guaranteed and will not be at risk of loss. At maturity, you will receive at least the principal amount of the notes.

Possible principal protection means that only under certain circumstances will your principal investment in the notes be guaranteed. If, and only if, the specific circumstances in the applicable pricing supplement are met and if the notes are held to maturity, your principal investment in the notes is guaranteed and will not be at risk of loss. If the specific circumstances in the applicable pricing supplement are not met, then your investment may result in a loss as there is no guaranteed return of principal.

If your principal investment is not principal protected, then there is no fixed repayment amount of principal at maturity. Your investment may result in a loss as there is no guaranteed return of principal, and at maturity, the amount you receive may be less than the original purchase price of the notes.

Interest Rate

General

We have provided a Glossary at the end of this prospectus supplement to define certain capitalized words used in discussing the interest rate payable on the notes.

The interest rate on the notes will be either fixed or floating. The interest paid will include interest accrued from the date of original issue to, but excluding, the relevant interest payment date, maturity date, redemption date or repayment date and will be payable on each interest payment date and upon maturity, redemption or repayment. Interest will be paid to the person in whose name the note is registered at the close of business on the record date before each interest payment date, which in the case of global securities representing book-entry notes will be the depository or its nominee. However, interest payable upon maturity, redemption or repayment will be payable to the person to whom principal is payable, which in the case of global securities representing book-entry notes will be the depository or its nominee. The first interest payment on any note issued between a record date and an interest payment date will be made on the interest payment date after the next record date.

Fixed Rate Notes

The applicable pricing supplement will designate the fixed rate of interest payable on a fixed rate note. The fixed rate of interest may be zero in the case of a fixed rate note issued with original issue discount. Each fixed rate note will bear interest from its date of original issue at the rate per year stated on its face until the principal is paid or made available for payment. Interest will be paid semiannually or otherwise on the dates specified in the applicable pricing supplement and at maturity, or on redemption or optional repayment.

The record dates for fixed rate notes will be 15 calendar days before the interest payment date, whether or not that date is a Business Day, unless otherwise specified in the applicable pricing supplement. Interest will be computed using a 360-day year of twelve 30-day months. In the event that any interest payment date, maturity date, redemption date or repayment date of a fixed rate note is not a Business Day, the related payment of principal, premium, if any, or interest will be made on the next succeeding Business Day and, unless otherwise specified by the applicable pricing supplement, no interest shall accrue for the period from and after that interest payment date, maturity date, redemption date or repayment date, as the case may be, to the next Business Day.

Floating	Rate	Notes

General

The interest rate on a floating rate note will be calculated by reference to the specified interest rate formula, plus or minus a spread, if any, as specified in the applicable pricing supplement. The spread is the number of basis points specified in the applicable pricing supplement as applicable to the interest rate for the floating rate note and may be a fixed amount or an amount that increases or decreases over time. The formula may be based on any of the following rates:

the Commercial Paper Rate;
LIBOR;
the Federal Funds Rate;
the Treasury Rate;
the Prime Rate;
the CMT Rate; or
another interest rate formula.
dition to any spread, the applicable pricing supplement will also indicate any applicable maximum or minimum interest rate limitations
The applicable pricing supplement also will define or specify the following terms, if applicable:
Calculation Date;
initial interest rate;
interest payment period;
interest payment dates;
record date;
Index Maturity;

Interest Determination Date;		
Interest Reset Period;		
Interest Reset Date; and		
sinking fund, if any.		
	S-11	

On your request, the Calculation Agent will provide you with the current interest rate and the interest rate which will become effective on the next interest reset date. See " How Interest Is Calculated."

Date Interest Rate Changes

The interest rate on floating rate notes may be reset daily, weekly, monthly, quarterly, semiannually or annually, as provided in the applicable pricing supplement. Unless otherwise set forth in the applicable pricing supplement, the Interest Reset Date will be:

for notes which reset daily, each Business Day;

for notes (other than Treasury Rate notes) which reset weekly, the Wednesday of each week;

for Treasury Rate notes which reset weekly, the Tuesday of each week;

for notes which reset monthly, the third Wednesday of each month;

for notes which reset quarterly, the third Wednesday of March, June, September and December;

for notes which reset semiannually, the third Wednesday of the two months specified in the note and/or the applicable pricing supplement; and

for notes which reset annually, the third Wednesday of the month specified in the note and/or the applicable pricing supplement.

The initial interest rate or interest rate formula effective until the first Interest Reset Date will be indicated in the applicable pricing supplement.

After the first Interest Reset Date, the interest rate will be the rate determined on the next Interest Determination Date as explained below. Each time a new interest rate is determined it will become effective on the next Interest Reset Date. Except for notes which reset daily or weekly, no changes will be made in the interest rate during the 10 days before the date of maturity, redemption or repayment. Unless otherwise specified in the applicable pricing supplement, the interest rate for notes with daily interest reset dates may be changed until the Business Day immediately before the maturity date. Unless otherwise specified in the applicable pricing supplement, the interest rate for notes with weekly reset dates may be changed until the Interest Reset Date immediately before the maturity date. If any Interest Reset Date is not a Business Day, then the Interest Reset Date will be postponed to the next Business Day. However, in the case of a LIBOR note, if the next Business Day is in the next calendar month, the Interest Reset Date will be the preceding Business Day.

In the case of weekly reset Treasury Rate notes, if an auction of Treasury bills falls on a day that is an Interest Reset Date for Treasury Rate notes, the Interest Reset Date will be the following day that is a Business Day.

When Interest Rate Is Determined

Unless otherwise specified in the applicable pricing supplement, the "Interest Determination Date" is as follows:

for the Commercial Paper Rate and Federal Funds (Effective) Rate, the Business Day before the Interest Reset Date;

for LIBOR, the second London Banking Day before the Interest Reset Date;

for the Treasury Rate, the day of the week in which the Interest Reset Date falls on which Treasury bills would normally be auctioned. Treasury bills are usually sold at auction on Monday of each week, unless that day is a legal holiday, in which case the auction is usually held on the

following Tuesday, unless the auction may be held on the preceding Friday. If the auction is held on the preceding Friday, that Friday will be the Interest Determination Date pertaining to the Interest Reset Date occurring in the next week;

for the Prime Rate and Federal Funds (Open) Rate, the same day as the Interest Reset Date; and

for a CMT Rate note, the tenth Business Day before the Interest Reset Date.

When Interest Is Paid

Unless otherwise specified in the applicable pricing supplement, interest is paid as follows:

for notes which reset daily, weekly or monthly, on the third Wednesday of each month or on the third Wednesday of March, June, September and December of each year, as specified in the note or the applicable pricing supplement;

for notes which reset quarterly, on the third Wednesday of March, June, September and December of each year;

for notes which reset semiannually, on the third Wednesday of the two months of each year specified in the note or the applicable pricing supplement;

for notes which reset annually, on the third Wednesday of the month specified in the note or the applicable pricing supplement; and

at maturity, redemption or optional repayment.

If any interest payment date, maturity date, redemption date or repayment date of a floating rate note is not a Business Day, the related payment of principal, premium, if any, or interest will be postponed to the next Business Day and, unless otherwise specified in the applicable pricing supplement, no additional interest shall accrue for the period from and after that interest payment date, maturity date, redemption date or repayment date, as the case may be, to the next Business Day. However, for LIBOR notes, if the next Business Day is in the next calendar month, principal, premium, if any, or interest will be paid on the preceding Business Day, provided that any such Business Day is also a London Banking Day.

For floating rate notes, the record date will be 15 calendar days before each interest payment date, whether or not that date is a Business Day, unless otherwise specified in the applicable pricing supplement.

How Interest Is Calculated

Unless otherwise specified in the applicable pricing supplement, interest payments will be the amount of interest accrued from, and including, the prior interest payment date in respect of which interest has been paid (or from, and including, the date of original issue if no interest has been paid), to, but excluding, the interest payment date. If the interest payment date is also a day that principal is due, the interest payable will include interest accrued to, but excluding, the date of maturity, redemption or optional repayment.

Accrued interest from the date of original issue or from the last date to which interest has been paid is calculated by multiplying the face amount of the floating rate note by an accrued interest factor. The accrued interest factor is computed by adding the interest factors calculated for each day from the date of issue, or from the last date to which interest has been paid, to the date for which accrued interest is being calculated. The interest factor (expressed as a decimal calculated to seven decimal places without rounding) for each such day is computed by dividing the interest rate applicable to that day by 360, in the case of Commercial Paper Rate notes, Federal Funds Rate notes, LIBOR notes and Prime Rate notes, or by the actual number of days in the year, in the case of Treasury Rate notes. With

respect to CMT Rate notes, interest is calculated on the basis of twelve 30-day months and a 360-day year.

All percentages resulting from any calculation on floating rate notes will be rounded, if necessary, to the nearest one hundred-thousandth of a percentage point, with five one-millionths of a percentage point rounded upward (e.g., 6.876545% (or .06876545) being rounded to 6.87655% (or .0687655) and 6.876544% (or .06876544) being rounded to 6.87654% (or .0687654)), and all dollar amounts used in or resulting from such calculation will be rounded to the nearest cent (with one-half cent being rounded upward).

Unless otherwise specified in the applicable pricing supplement, the Calculation Date relating to an Interest Determination Date will be the earlier of (a) the tenth calendar day after the Interest Determination Date or, if that day is not a Business Day, the next Business Day or (b) the Business Day before the applicable interest payment date, maturity date, redemption date or repayment date. JPMorgan Chase Bank, N.A. (formerly, The Chase Manhattan Bank) will be the Calculation Agent with respect to the floating rate notes. On your request, the Calculation Agent will provide you with the interest rate then in effect, and, if different, the interest rate that will become effective as a result of a determination made on the most recent Interest Reset Date with respect to your floating rate note.

Legal Maximum Interest Rate

In addition to any maximum interest rate for any floating rate note, the interest rate on the floating rate notes will not be higher than the maximum rate permitted by New York law, as modified by federal law. Current New York law provides a maximum interest rate of 25% per annum. This limit does not apply to notes with principal amounts of more than \$2,500,000.

Commercial Paper Rate Notes

Each Commercial Paper Rate note will bear interest at the rate (calculated with reference to the Commercial Paper Rate and any spread) specified in the Commercial Paper Rate note and in the applicable pricing supplement.

Unless otherwise specified in the applicable pricing supplement, the Commercial Paper Rate means, with respect to any Interest Determination Date, the Money Market Yield (as set forth and calculated in the Glossary section of this prospectus supplement) on such date of the rate for commercial paper having the Index Maturity specified in the applicable pricing supplement as published in H.15(519) under the heading "Commercial Paper Nonfinancial." If the rate is not published in H.15(519) on the Calculation Date, the Money Market Yield will be calculated based on the rate on the Interest Determination Date as published in H.15 Daily Update or any other recognized electronic source used for displaying that rate under the heading "Commercial Paper Nonfinancial."

If neither of the rates described above is published on the Calculation Date, then the Commercial Paper Rate will be the Money Market Yield of the arithmetic mean of the offered rates, as of 11:00 a.m. on the Interest Determination Date, of three leading dealers of commercial paper in New York City selected by the Calculation Agent for commercial paper of the specified Index Maturity placed for an industrial issuer whose bond rating is "AA," or the equivalent, from a nationally recognized rating agency.

If the three dealers selected are not quoting as mentioned above, the Commercial Paper Rate will remain the Commercial Paper Rate then in effect on such Interest Determination Date.

LIBOR Notes

Each LIBOR note will bear interest at the rate (calculated with reference to LIBOR and any spread) specified in the LIBOR note and in the applicable pricing supplement. LIBOR will be determined by the Calculation Agent as follows, unless otherwise specified in the applicable pricing supplement:

With respect to any Interest Determination Date, either:

- (a)
 the arithmetic mean, as determined by the Calculation Agent, of the offered rates for deposits in US dollars for the Index
 Maturity specified in the applicable pricing supplement, beginning on the second London Banking Day after that date, which
 appear on the Reuters Screen LIBO Page as of 11:00 a.m., London time, on that date, if at least two such offered rates appear
 on the Reuters Screen LIBO Page; or
- (b)
 the offered rate for deposits in US dollars having the specified Index Maturity, beginning on the second London Banking
 Day after that date, which appears on the Telerate Page 3750 as of 11:00 a.m., London time, on that date.

If neither the Reuters Screen LIBO Page nor Telerate Page 3750 is specified in the applicable pricing supplement, LIBOR will be determined as if Telerate Page 3750 had been specified.

In the case where (a) above applies, if fewer than two offered rates appear on the Reuters Screen LIBO Page, or, in the case where (b) above applies, if no rate appears on the Telerate Page 3750, LIBOR will be determined based on the rates at approximately 11:00 a.m., London time, on that LIBOR Interest Determination Date at which deposits in US dollars having the specified Index Maturity are offered by four major banks in the London interbank market selected by the Calculation Agent to prime banks in the London interbank market beginning on the second London Banking Day after that date and in a principal amount of not less than US \$1,000,000 that is representative of a single transaction in such market at such time (a "representative amount").

The Calculation Agent will request the principal London office of each such bank to provide a quotation of its rate. If at least two such quotations are provided, LIBOR for that date will be the arithmetic mean of such quotations.

If fewer than two quotations are provided, LIBOR for that date will be the arithmetic mean of the rates quoted at approximately 11:00 a.m. on such date by three major banks in New York City selected by the Calculation Agent for loans in US dollars to leading European banks having the specified Index Maturity beginning on the second London Banking Day after that date and in a principal amount of not less than a representative amount.

Finally, if the three banks are not quoting as mentioned above, LIBOR will remain LIBOR then in effect on such Interest Determination Date.

Federal Funds Rate Notes

Each Federal Funds Rate note will bear interest at the rate (calculated with reference to the Federal Funds Rate and any spread) specified in the Federal Funds Rate note and in the applicable pricing supplement. The Federal Funds Rate may be either of the Federal Funds (Effective) Rate or the Federal Funds (Open) Rate.

Unless otherwise specified in the applicable pricing supplement, the Federal Funds (Effective) Rate means, with respect to any Interest Determination Date, the rate on that day for Federal Funds as published in H.15(519) under the heading "Federal funds (effective)" on Telerate page 120 or any successor service or page or, if not so published on the Calculation Date relating to that Interest Determination Date, the Federal Funds (Effective) Rate will be the rate on that Interest Determination

Date that is published in H.15 Daily Update or any other recognized electronic source used for displaying that rate under the heading "Federal Funds/Effective Rate."

Unless otherwise specified in the applicable pricing supplement, the Federal Funds (Open) Rate means, with respect to any Interest Determination Date, the rate on that day for Federal Funds as reported on Telerate page 5 under the heading "Federal Funds/Open."

If (1) the applicable Federal Funds (Effective) Rate described above or (2) the Federal Funds (Open) Rate described above is not published by 3:00 p.m. on the relevant Calculation Date, then the Federal Funds (Effective) Rate and the Federal Funds (Open) Rate, as applicable, will be calculated by the Calculation Agent as the arithmetic mean of the rates for the last transaction in overnight Federal Funds arranged by three leading brokers of Federal Funds transactions in New York City selected by the Calculation Agent as of 11:00 a.m., on that Interest Determination Date.

If the brokers that are selected by the Calculation Agent are not quoting, the interest rate in effect for the applicable period will remain the interest rate then in effect on such Interest Determination Date.

Treasury Rate Notes

Each Treasury Rate note will bear interest at the rate (calculated with reference to the Treasury Rate and any spread) specified in the Treasury Rate note and in the applicable pricing supplement.

Unless otherwise specified in the applicable pricing supplement, the Treasury Rate means, with respect to any Interest Determination Date, the rate for the most recent auction of Treasury bills, direct obligations of the United States, having the Index Maturity specified in the applicable pricing supplement as published under the column designated "Invest Rate" on Telerate page 56 captioned "US Treasury 3MO T-Bill Auction Results" or Telerate page 57 captioned "US Treasury 6MO T-Bill Auction Results."

If the Treasury Rate cannot be set as described above on the Calculation Date pertaining to such Interest Determination Date, the following procedures will apply, as appropriate:

- (1)

 The rate will be the auction average rate (expressed as a bond equivalent on the basis of a year of 365 or 366 days, as applicable, and applied on a daily basis) as otherwise announced by the United States Department of the Treasury.
- If the results of the auction of Treasury bills having the specified Index Maturity are not published in H.15(519) by 3:00 p.m. on the Calculation Date, or if no such auction is held in a particular week, then the Treasury Rate will be calculated by the Calculation Agent and will be a yield to maturity (expressed as a bond equivalent on the basis of a year of 365 or 366 days, as applicable, and applied on a daily basis) of the arithmetic mean of the secondary market bid rates as of approximately 3:30 p.m. on the Interest Determination Date, of three leading primary US government securities dealers selected by the Calculation Agent, for the issue of Treasury bills with a remaining maturity closest to the specified Index Maturity.
- (3)
 Finally, if the dealers are not quoting as mentioned above, the Treasury Rate will remain the Treasury Rate then in effect on such Interest Determination Date.

Prime Rate Notes

Each Prime Rate note will bear interest at the rate (calculated with reference to the Prime Rate and any spread) specified in the Prime Rate note and the applicable pricing supplement.

Unless otherwise specified in the applicable pricing supplement, Prime Rate means, with respect to any Interest Determination Date, either the rate set forth for that date on Telerate page 5 under the heading "Bank Rate/Prime" or the rate set forth for that date in H.15(519) under the heading "Bank Prime Loan."

If the Prime Rate cannot be set as described above, the following procedures will occur:

- (1)

 If the applicable rate is not published in H.15(519) or on Telerate page 5 prior to 9:00 a.m. on the Calculation Date, then the Prime Rate will be the arithmetic mean of the rates of interest publicly announced by each bank that appears on the Reuters Screen NYMF Page on such Interest Determination Date as such bank's prime rate or base lending rate as in effect for such Interest Determination Date.
- (2)

 If fewer than four rates appear on the Reuters Screen NYMF Page, the rate will be the arithmetic mean of the prime rates quoted on the basis of the actual number of days in the year divided by 360 as of the close of business on such Interest Determination Date by at least two of the three major money center banks in New York City selected by the Calculation Agent from which quotations are requested.
- If fewer than two quotations are provided, the Calculation Agent will determine the Prime Rate as the arithmetic mean on the basis of the prime rates in New York City by the appropriate number of substitute banks or trust companies organized and doing business under the laws of the United States, or any state, in each case having total equity capital of at least US \$500 million and being subject to supervision or examination by federal or state authority, selected by the Calculation Agent to quote the rate or rates.
- If in any month or two consecutive months, the Prime Rate is not published in H.15(519) or on Telerate page 5 and the banks or trust companies selected are not quoting as mentioned in (3) above, the Prime Rate for the Interest Reset Period will remain the same as the Prime Rate for the immediately preceding Interest Reset Period (or, if there was no such Interest Reset Period, the rate of interest payable on the Prime Rate notes for which the Prime Rate is being determined shall be the initial interest rate).

If this failure continues over three or more consecutive months, the Prime Rate for each succeeding Interest Determination Date until the maturity or redemption of such Prime Rate notes or, if earlier, until this failure ceases, shall be LIBOR determined as if such Prime Rate notes were LIBOR notes, and the spread, if any, will be the number of basis points specified in the applicable pricing supplement as the "Alternate Rate Event Spread."

CMT Rate Notes

Each CMT Rate note will bear interest at the rate (calculated with reference to the CMT Rate and any spread) specified in the CMT Rate note and in the applicable pricing supplement.

Unless otherwise specified in the applicable pricing supplement, the CMT Rate means, with respect to any Interest Determination Date, the rate displayed on the designated CMT Telerate Page, under the caption "... Treasury Constant Maturities... Federal Reserve Board Release H.15... Mondays Approximately 3:45 p.m.," under the column for the designated CMT Index Maturity, for:

- (a)the latest rate displayed at the close of business on such Interest Determination Date if the designated CMT Telerate Page is 7051; or
- (b) the average for the week, or the month, as specified in the applicable pricing supplement, ended immediately before the week in which the related Interest Determination Date occurs if the designated CMT Telerate Page is 7052.

If the CMT Rate cannot be set as described above, the following procedures will occur:

(1)

If the applicable rate described above is not displayed on the relevant page by 3:00 p.m., New York City time on that Calculation Date, unless the calculation is made earlier and the rate is available from that source at that time on the Calculation Date, then the CMT Rate will be the Treasury constant maturity rate having the designated Index Maturity, as published in H.15(519) or another recognized electronic source for displaying the rate.

- If the applicable rate described above is not published in H.15(519) or another recognized electronic source for displaying such rate by 3:00 p.m., New York City time on that Calculation Date, unless the calculation is made earlier and the rate is available from one of those sources at that time, then the CMT Rate will be the Treasury constant maturity rate, or other United States Treasury rate, for the Index Maturity and with reference to the relevant Interest Determination Date, that is published by either the Board of Governors of the Federal Reserve System or the United States Department of the Treasury and that the Calculation Agent determines to be comparable to the rate formerly displayed on the designated CMT Telerate Page and published in H.15(519).
- If the rate described in the prior paragraph cannot be determined, then the Calculation Agent will determine the CMT Rate to be a yield to maturity based on the average of the secondary market offered rates as of approximately 3:30 p.m., New York City time, on the relevant Interest Determination Date reported, according to their written records, by three leading primary United States government securities dealers in New York City. The Calculation Agent will select five such securities dealers after consulting with us, and will eliminate the highest quotation (or, in the event of equality, one of the highest) and the lowest quotation (or, in the event of equality, one of the lowest), for the most recently issued direct noncallable fixed rate obligations of the United States Treasury ("Treasury Notes") with an original maturity of approximately the designated Index Maturity and a remaining term to maturity of not less than the designated Index Maturity minus one year in a representative amount. If two Treasury Notes with an original maturity as described above have remaining terms to maturity equally close to the designated Index Maturity, the quotes for the Treasury Note with the shorter remaining term to maturity will be used.
- If the Calculation Agent cannot obtain three Treasury Note quotations of the kind described in the prior paragraph, the Calculation Agent will determine the CMT Rate to be the yield to maturity based on the average of the secondary market offered rates for Treasury Notes with an original maturity longer than the designated CMT Index Maturity which have a remaining term to maturity closest to the designated CMT Index Maturity and in a representative amount, as of approximately 3:30 p.m., New York City time, on the relevant Interest Determination Date of leading primary United States government securities dealers in New York City. In selecting these offered rates, the Calculation Agent will request quotations from at least five such securities dealers and will disregard the highest quotation (or if there is equality, one of the highest) and the lowest quotation (or if there is equality, one of the lowest). If two Treasury Notes with an original maturity longer than the designated CMT Index Maturity have remaining terms to maturity that are equally close to the designated CMT Index Maturity, the Calculation Agent will obtain quotations for the Treasury Note with the shorter remaining term to maturity.
- If fewer than five but more than two of the leading primary United States government securities dealers are quoting as described in the prior paragraph, then the CMT Rate for the relevant Interest Determination Date will be based on the average of the offered rates obtained, and neither the highest nor the lowest of those quotations will be eliminated.
- (6)
 If two or fewer leading primary United States government securities dealers selected by the Calculation Agent are quoting as described above, the CMT Rate will remain the CMT Rate then in effect on that Interest Determination Date.

Inverse Floating Rate Notes

Any floating rate note may be designated in the applicable pricing supplement as an inverse floating rate note. In such an event, unless otherwise specified in the applicable pricing supplement, the interest rate on the floating rate note will be equal to a fixed rate of interest minus an interest rate

determined based on a rate specified in the applicable pricing supplement, as adjusted by any spread or multiplier.

Index Notes

Currency Indexed Notes

We may offer notes the principal amounts of which are payable at or before maturity and the amounts of interest payable on which and/or any premium payable with respect to which are determined by the rate of exchange between the specified currency and the other currency or composite currency or currencies specified as the indexed currency or by reference to some other currency index or indices, in each case as set forth in the applicable pricing supplement.

Unless otherwise specified in the applicable pricing supplement, you will be entitled to receive a principal amount or portion of that amount in respect of the currency indexed note exceeding the amount designated as the face amount of the currency indexed note in the applicable pricing supplement if, at the stated maturity date, the rate at which the specified currency can be exchanged for the indexed currency is greater than the rate of exchange designated as the base exchange rate, which is expressed in units of the indexed currency per one unit of the specified currency, as specified in the applicable pricing supplement. You will only be entitled to receive a principal amount in respect of the currency indexed notes less than the face amount of currency indexed notes, if, at the stated maturity date, the rate at which the specified currency can be exchanged for the indexed currency is less than the base exchange rate, in each case determined as described under "Payment of Principal and Interest."

The applicable pricing supplement will set forth information as to the relative historical value of the applicable specified currency against the applicable indexed currency, any currency and/or exchange controls applicable to the specified currency or indexed currency and any additional tax consequences to holders. See "Risk Factors" Changes in Exchange Rates and Exchange Controls Could Result in a Substantial Loss to You."

Unless otherwise specified in the applicable pricing supplement, we will pay interest, and any premium, in the specified currency based on the face amount of the currency indexed notes and at the rate and times and in the manner set forth in this prospectus supplement and in the applicable pricing supplement.

Other Indexed Notes

We may issue indexed notes, in which the amount of principal, or any premium, interest, or other amounts payable at or before maturity is determined by reference, either directly or indirectly, to the price or performance of:

one or more securities;
one or more commodities;
any other financial, economic or other measures or instruments, including the occurrence or non-occurrence of any event of circumstance; and/or
indices or baskets of any of these items.

The applicable pricing supplement relating to these other indexed notes will describe one or more of the following terms of your notes:

the method by and the terms on which any amount of principal will be paid on or before maturity;

the amount of any interest, premium or other amounts we will pay you or the formula we will use to calculate these amounts;

whether your notes will be exchangeable for or payable in cash, securities of an issuer other than The Bear Stearns Companies Inc. or other property;

additional tax consequences to the holders of these notes, and

a description of certain additional risks associated with investment in these notes and other information relating to these notes.

See "Risk Factors Holders of Indexed Notes are Subject to Important Risks that are not Associated with More Conventional Debt Securities."

Original Issue Discount Notes

We may issue original issue discount notes, including zero coupon notes, which may be fixed rate, floating rate, or indexed notes that are issued at a price lower than their principal amount or lower than their minimum repayment amount at maturity. Original issue discount notes may bear no interest or may bear interest at a rate that is below market rates at the time of issuance. For notes that do not have any periodic interest payments, interest normally accrues during the life of the notes and is paid at the maturity date or upon earlier redemption or prepayment. Upon an acceleration of the maturity of an original issue discount note, the amount of interest payable will be determined in accordance with the terms of the note as described in the applicable pricing supplement. That amount is normally less than the amount payable at the maturity date. See "Certain US Federal Income Tax Considerations Original Issue Discount."

Payment of Principal and Interest

Unless otherwise specified in the applicable pricing supplement, we will pay principal and any premium, interest or other amounts payable on all notes in the applicable specified currency. However, payments on notes denominated in a specified currency other than US dollars will be made in US dollars as described below, unless otherwise specified in the applicable pricing supplement.

At your option

Except as provided in the next paragraph, we will pay principal and premium, if any, and interest on all notes denominated in a specified currency other than US dollars in US dollars if the registered noteholder on the relevant record date or at maturity, as the case may be, has delivered a written request for payment of such note in US dollars to the Trustee at its Corporate Trust Office in New York City on or before the applicable record date or 15 days before maturity, as the case may be. The request may be made in writing (mailed or hand delivered) or by cable, telex or other form of facsimile transmission. Any request made will remain in effect with respect to further payments of principal (and premium, if any) and any interest with respect to the note payable to such holder unless the request is revoked on or before the relevant record date or 15 days before maturity, as the case may be. Please note that holders of notes denominated in a specified currency other than US dollars whose notes are registered in the name of a broker or nominee should contact that broker or nominee to determine whether and how an election to receive payments in US dollars should be made.

The US dollar amount to be paid to a holder of a note denominated in a specified currency other than US dollars who elects to receive payment in US dollars will be based on the highest bid quotation in New York City received by the Exchange Rate Agent as of 11:00 a.m. on the second Business Day before the applicable payment date from three recognized foreign exchange dealers (one of which may be the Exchange Rate Agent) for the purchase by the quoting dealer of the specified currency for US dollars for settlement on the payment date in the aggregate amount of the specified currency payable to all noteholders electing to receive US dollar payments and at which the applicable dealer commits to execute a contract. If three bid quotations are not available on the second Business Day before the date of payment, the payment will be made in the specified currency. All currency exchange costs

associated with any payment in US dollars on notes denominated in specified currencies other than US dollars will be borne by the noteholder and will be deducted from the payment to such noteholder.

Interest will be payable to the person in whose name a note is registered, which in the case of global securities will be the depository or its nominee, at the close of business on the record date before each interest payment date. However, interest payable at maturity will be payable to the person to whom principal shall be payable, which in the case of global securities will be the depository or its nominee.

The total amount of any principal (and premium, if any) and any interest due on any global security representing one or more book-entry notes on any interest payment date or at maturity will be made available to the Trustee on such date. As soon as possible thereafter, the Trustee will make such payments to the depository. The depository will allocate the payments to each book-entry note represented by a global security and make payments to the holders of such global security in accordance with its existing operating procedures. We and the Trustee will not have any responsibility or liability for the payments by the depository. So long as the depository or its nominee is the registered holder of any global security, the depository or its nominee, as the case may be, will be considered the sole holder of the book-entry note or notes represented by such global security for all purposes under the indenture. We understand, however, that under existing industry practice, the depository will authorize the persons on whose behalf it holds a global security to exercise certain rights of holders of securities. See "Book-Entry Procedures and Settlement" in the accompanying prospectus.

Payments of principal (and premium, if any) and any interest with respect to a note to be made in a specified currency other than US dollars will be made by wire transfer to an account maintained by the noteholder with a bank located in the country issuing the specified currency. Payments may also be made to the noteholder's account in another jurisdiction that we and the Trustee have approved and which has been designated by the registered noteholder on the relevant record date or at maturity, as the case may be, in writing on or before the relevant record date before the interest payment date or 15 days before maturity, as the case may be, and, in the case of payments due at maturity, the note is presented to the Paying Agent in time for the Paying Agent to pay to that account in accordance with its normal procedures. The designation shall be made by filing the appropriate information with the Trustee at its Corporate Trust Office in the Borough of Manhattan, New York City, and, unless revoked in writing, will remain in effect with respect to any future payments on the note payable to such holder.

If payment cannot be made by wire transfer because the Trustee has not received the required designation on or before the requisite date or for any other reason, a notice will be mailed to the noteholder at its registered address requesting a designation by which the wire transfer can be made and, within five Business Days of receiving this designation, the Trustee will make the appropriate payment. We will pay any administrative costs imposed by banks in connection with making payments by wire transfer, however, except as specified in the applicable pricing supplement, any taxes, assessments or governmental charges imposed on payments will be borne by the noteholder to whom payments are made.

If the official unit of any component currency is changed as a result of combination or subdivision, the number of units of that currency as a component shall be divided or multiplied in the same proportion. If two or more component currencies are consolidated into a single currency, the amounts of those currencies as components shall be replaced by an amount in such single currency equal to the sum of the amounts of the consolidated component currencies expressed in that single currency. If any component currency is divided into two or more currencies, the amount of that currency as a component shall be replaced by amounts of those two or more currencies, each of which will have a value on the date of division equal to its proportionate share of the former component currency.

Notes denominated in a specified currency other than US dollars will provide that, in the event of an official redenomination of the specified currency, our obligations shall, in all cases, be deemed

immediately following the redenomination to provide for payment of that amount of the redenominated specified currency representing the amount of such obligations immediately before the currency was redenominated.

All determinations set forth above to be made by the Calculation Agent and the Exchange Rate Agent, except as expressly provided in this prospectus supplement or the applicable pricing supplement, shall be conclusive for all purposes and binding on all noteholders and on us, in the absence of manifest error, and the Calculation Agent and the Exchange Rate Agent shall not be held liable for these determinations.

At our option in the case of an imposition of exchange controls or other circumstances beyond our control.

If the principal of (and premium, if any) or interest on any note is payable in a specified currency other than US dollars and that specified currency is not available due to the imposition of exchange controls or other circumstances beyond our control, or is no longer used by the government of the country issuing that currency or for settlement of transactions by public institutions of or within the international banking community, we may make the requisite payments in US dollars on the basis of the noon buying rate in New York City for cable transfers in that specified currency as certified for customs purposes by the Federal Reserve Bank of New York for that specified currency on the second Business Day before the applicable payment date or, if that exchange rate is not available, then on the basis of the most recently available exchange rate.

Exchangeable Notes

We may offer notes that are exchangeable at your option for securities, or cash representing the value of securities, of an entity unaffiliated with us; a basket of these securities; an index or indices of these securities or any combination of these options, all as will be described in the applicable pricing supplement. Exchangeable notes may bear interest or be issued with original issue discount or at a premium, all as will be specified in the applicable pricing supplement.

Unless otherwise specified in the applicable pricing supplement, exchangeable notes will entitle you, either during a period or at specific times, to exchange your note for the underlying security or securities constituting the underlying basket, index or indices of these securities (or combination of these alternatives) at a specified rate of exchange. If so specified in the applicable pricing supplement, exchangeable notes will be redeemable at our option before maturity. If you do not elect to exchange your exchangeable note before maturity or any applicable date for redemption, you will receive the principal amount of such note or applicable redemption price in cash.

Upon exchange, at maturity or otherwise, of your exchangeable note, you may receive, at the specified exchange rate, either the underlying security or the securities constituting the relevant basket, index or indices or the cash value of such underlying security or securities, all as may be specified in the applicable pricing supplement. The underlying security or securities constituting any basket, index or indices may be the securities of either US or foreign entities, or both, and the exchangeable notes may provide for protection against fluctuations in the rate of exchange between the currency in which that note is denominated and the currency or currencies in which the market prices of the underlying security or securities are quoted, all as may be specified in the applicable pricing supplement. Exchangeable notes may have other terms, which will be specified in the applicable pricing supplement.

Reopened Issues

We may "reopen" certain issues at any time by offering additional notes with terms identical (other than issue date and issue price) to those of existing notes.

S-22

Extension of Maturity Date

The applicable pricing supplement will indicate whether we may extend the maturity of a note for one or more periods up to, but not beyond, the date that is set forth in the pricing supplement.

We may exercise our option to extend a note's maturity date by notifying the Trustee at least 60, but not more than 75 days, before the note's original maturity date that is in effect before we exercised our option. No later than 55 days before the original maturity date, the Trustee will mail to each noteholder a notice, first class, postage prepaid, setting forth:

- (1) our election to extend the note's maturity date;
- (2) the new maturity date;
- in the case of a fixed rate note, the interest rate that will apply to the extension period or, in the case of a floating rate note, the spread, the new Interest Reset Date(s), if any, and the new interest payment date(s), if any, that will apply to the extension period; and
- (4) the provisions, if any, for redemption or repayment during the extension period.

Once the Trustee has mailed the extension notice to the noteholder, the note's maturity date shall be automatically extended and, except as may be modified by the extension notice or as described in the next paragraph, the note will have the same terms it did before the extension notice was mailed.

Notwithstanding the foregoing, no later than 20 days before a note's original maturity date, we may at our option revoke its interest rate, in the case of a fixed rate note, or the spread, in the case of a floating rate note, provided for in the extension notice and establish a higher interest rate or higher spread, as the case may be, for the extension period. We may do so by causing the Trustee to mail notice first class, postage prepaid, of a higher interest rate or higher spread, as the case may be, to the noteholder. The notice shall be irrevocable. All notes with respect to which the maturity date is extended will bear the higher interest rate or higher spread, as the case may be, for the extension period, whether or not they are tendered for repayment.

If we extend the maturity date of a note, the holder of such note may have the option to elect repayment of such note on the original maturity date at a price equal to the principal amount of the note plus any accrued interest to such date. In order for a note to be so repaid on the original maturity date, you must follow the procedures set forth under "Repayment and Repurchase" for optional repayment, except that the period for delivery of such note or notification to the Trustee shall be at least 25 but not more than 35 days before the original maturity date and except that a noteholder who has tendered a note for repayment pursuant to an extension notice may, by written notice to the Trustee, revoke any such tender for repayment until the close of business on the tenth day before the original maturity date.

Renewable Notes

We may offer notes the maturity of which may be renewed at your option for one or more specified periods up to but not beyond the final maturity of the notes. The specific terms for such extensions, including the date or dates on which the option can be exercised and whether the option can be exercised with respect to some but not all of the notes' outstanding principal balance, will be set forth in the applicable pricing supplement.

Redemption

Unless otherwise stated in the applicable pricing supplement, the notes will not have a sinking fund. Redemption dates, if any, will be fixed at the time of sale and stated in the applicable pricing supplement and on the applicable note. If no redemption date is indicated with respect to a note, the note will not be redeemable before it matures. We may redeem notes at our option beginning on a specified redemption date if the applicable pricing supplement permits redemption. Unless otherwise specified in the applicable pricing supplement, we may redeem such notes in whole or in part in

increments of \$1,000 at a redemption price equal to 100% of the principal amount to be redeemed, together with interest payable up to the redemption date, by giving notice not more than 60 nor less than 30 days before the redemption date.

Repayment and Repurchase

Optional repayment dates will be set at the time of sale and set forth in the applicable pricing supplement and on the applicable note. Except as provided under "Extension of Maturity Date," if no optional repayment date is indicated, your note will not be repayable at your option before it matures.

If the applicable pricing supplement permits, you may cause us to repay your notes on particular dates. Unless otherwise specified in the applicable pricing supplement, we may be required to repay your notes in whole or in part in increments of \$1,000, provided that any remaining principal amount of the note is at least \$25,000. The repayment price will be equal to 100% of the principal amount to be repaid, plus accrued interest to the repayment date.

Unless otherwise specified in the applicable pricing supplement, for any note to be repaid in whole or in part at your option, you must deliver to the Trustee not less than 30 nor more than 60 days before the optional repayment date (or any shorter period as described under "Extension of Maturity Date"):

the note to be repaid with the form entitled "Option to Elect Repayment" set forth on the reverse of such note duly completed; or

a telegram, telex, facsimile transmission or a letter from a member of a national securities exchange or the National Association of Securities Dealers, Inc. or a commercial bank or a trust company in the US setting forth: your name,

the principal amount of the note,

the certificate number of the note or a description of the note's tenor or terms,

the principal amount of the note to be repaid,

a statement that you are exercising your option to elect repayment, and

a guarantee that the note to be repaid, along with the form entitled "Option to Elect Repayment" duly completed, will be received by the Trustee no later than 5 Business Days after the date of the telegram, telex, facsimile transmission or letter.

The Trustee must receive the note and duly completed form entitled "Option to Elect Repayment" by the fifth Business Day after the date of such telegram, telex, facsimile transmission or letter. The exercise of the repayment option will be irrevocable, except as set forth under "Extension of Maturity Date."

If your note is represented by a global security, the depository's nominee will be the holder and, as a result, will be the only entity that can exercise a right to repayment. To ensure that the depository's nominee will timely exercise a right to repayment with respect to your interest in a global security, you must instruct the broker, or other direct or indirect participant through which you hold such interest, to notify the depository of your desire to exercise a right to repayment. To ascertain the time by which instructions must be given for timely notice to be delivered to the depository, you should consult the broker or other direct or indirect participant through which you hold your interest in a note.

The applicable pricing supplement may provide that the maturity of a floating rate note will be automatically extended for a specified period, unless you elect during a designated period to terminate the automatic extension of the maturity by following the procedures described in the applicable pricing supplement and in the floating rate note.

At any time, we may buy the notes at any price in the open market or otherwise. Any notes we purchase may be held or resold or, at our discretion, may be surrendered to the Trustee for cancellation.

CERTAIN US FEDERAL INCOME TAX CONSIDERATIONS

The following discussion summarizes certain US federal income tax consequences of the purchase, beneficial ownership and disposition of notes. Except as provided below under "Federal Income Tax Consequences to Non-US Holders," this summary deals only with a beneficial owner of a note that is:

an individual who is a citizen or resident of the United States for US federal income tax purposes;

a corporation (or other entity that is treated as a corporation for US federal tax purposes) that is created or organized in or under the laws of the United States or any state thereof (including the District of Columbia);

an estate whose income is subject to US federal income taxation regardless of its source; or

a trust if a court within the United States is able to exercise primary supervision over its administration, and one or more United States persons have the authority to control all of its substantial decisions (each, a "US Holder").

If a partnership (or other entity that is treated as a partnership for US federal tax purposes) is a beneficial owner of notes, the treatment of a partner in the partnership will generally depend upon the status of the partner and upon the activities of the partnership. A beneficial owner of notes that is a partnership, and partners in such a partnership, should consult their tax advisors about the US federal income tax consequences of holding and disposing of the notes.

An individual may, subject to certain exceptions, be deemed to be a resident of the United States for US federal income tax purposes by reason of being present in the United States for at least 31 days in the calendar year and for an aggregate of at least 183 days during a three-year period ending in the current calendar year (counting for such purposes all of the days present in the current year, one-third of the days present in the immediately preceding year, and one-sixth of the days present in the second preceding year).

This discussion is based on interpretations of the Internal Revenue Code of 1986, as amended (the "Code"), regulations issued thereunder, and rulings and decisions currently in effect (or in some cases proposed), all of which are subject to change. Any such change may be applied retroactively and may adversely affect the federal income tax consequences described herein. This summary addresses only US Holders that purchase notes at initial issuance and beneficially own such notes as capital assets and not as part of a "straddle," "hedge," "synthetic security" or a "conversion transaction" for federal income tax purposes, or as part of some other integrated investment. This summary does not discuss all of the tax consequences that may be relevant to particular investors or to investors subject to special treatment under the federal income tax laws (such as S corporations, banks, thrifts, other financial institutions, insurance companies, mutual funds, small business investment companies, tax-exempt organizations, retirement plans, real estate investment trusts, regulated investment companies, securities dealers or brokers, traders in securities electing mark to market treatment, investors whose functional currency is not the US dollar, persons subject to the alternative minimum tax, and former citizens or residents of the United States), and this summary does not discuss the tax consequences under the laws of any foreign, state or local taxing jurisdictions. Accordingly, prospective investors are urged to consult their tax advisors with respect to the federal, state and local tax consequences of investing in the notes, as well as any consequences arising under the laws of any other taxing jurisdiction to which they may be subject.

The applicable pricing supplement may contain a further discussion of the special US federal income tax consequences applicable to certain notes, including notes that may be convertible into or exercisable or exchangeable for our common or preferred stock or depositary shares or for securities, or cash representing the value of securities, of an entity unaffiliated with us, a basket of securities, or

an index or indices of these securities, notes that are "contingent payment debt instruments" (as described below), notes th
