THE COMPANY

Citigroup Inc. (Citigroup and, together with its subsidiaries, the Company, Citi or Citigroup) is a global diversified financial services holding company whose businesses provide a broad range of financial services to consumer and corporate customers. Citigroup has more than 200 million customer accounts and does business in more than 100 countries. Citigroup was incorporated in 1988 under the laws of the State of Delaware.

The Company is a bank holding company within the meaning of the U.S. Bank Holding Company Act of 1956 registered with, and subject to examination by, the Board of Governors of the Federal Reserve System (FRB). Citibank, N.A. is a U.S. national bank subject to supervision and examination by the Office of the Comptroller of the Currency (OCC) and the Federal Deposit Insurance Corporation (FDIC). Some of the Company's other subsidiaries are also subject to supervision and examination by their respective federal and state authorities.

This Quarterly Report on Form 10-Q should be read in conjunction with Citigroup's 2008 Annual Report on Form 10-K and Citigroup's Quarterly Report on Form 10-Q for the quarter ended March 31, 2009. Additional financial, statistical, and business-related information, as well as business and segment trends, are included in a Financial Supplement that was filed as Exhibit 99.2 to the Company's Current Report on Form 8-K, filed with the Securities and Exchange Commission (SEC) on July 17, 2009.

The principal executive offices of the Company are located at 399 Park Avenue, New York, New York 10043, telephone number 212 559 1000. Additional information about Citigroup is available on the Company's web site at www.citigroup.com. Citigroup's recent annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, as well as the Company's other filings with the SEC, are available free of charge through the Company's web site by clicking on the "Investors" page and selecting "All SEC Filings." The SEC web site contains reports, proxy and information statements, and other information regarding the Company at www.sec.gov.

Table of Contents

Citigroup is managed along the following segment and product lines:

The following are the four regions in which Citigroup operates. The regional results are fully reflected in the segment results.

- (1) *Asia* includes Japan, *Latin America* includes Mexico, and *North America* includes U.S., Canada and Puerto Rico.

- (1) The six months ended June 30, 2009 Income available to common shareholders includes a reduction of \$1.285 billion related to a conversion price reset pursuant to Citigroup's prior agreement with the purchasers of \$12.5 billion convertible preferred stock issued in a private offering in January 2008. The conversion price was reset from \$31.62 per share to \$26.35 per share. See "Events in 2009 Public and Private Exchange Offers" below. There was no impact to net income, total stockholders' equity or capital ratios due to the reset. However, the reset resulted in a reclassification from Retained earnings to Additional paid-in capital of \$1.285 billion and a reduction in Income available to common shareholders of \$1.285 billion.
- (2) The Company adopted Financial Accounting Standards Board (FASB) Staff Position (FSP) Emerging Issues Task Force (EITF) 03-6-1 "Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities" (Accounting Standards Codification (ASC) 260-10-45 to 65) on January 1, 2009. All prior periods have been restated to conform to the current presentation. The Diluted EPS calculation for the second quarter and six months of 2008 utilize Basic shares and Income available to common shareholders (Basic) due to the negative Income available to common shareholders. Using actual Diluted shares and Income available to common shareholders (Diluted) would result in anti-dilution.
- (3) The return on average common stockholders' equity is calculated using income (loss) available to common stockholders.
- (4) As defined by the banking regulators, the Tier 1 Common ratio represents Tier 1 Capital less perpetual preferred stock, qualifying noncontrolling interests in subsidiaries and qualifying mandatorily redeemable securities of subsidiary trusts divided by risk-weighted assets. Tier 1 Common ratio is a non-GAAP measure. See "Capital Resources and Liquidity" below for additional information on this measure, including a reconciliation to the most directly comparable GAAP measure.
- (5) The Leverage ratio represents Tier 1 Capital divided by each period's quarterly adjusted average total assets.

Edgar Filing: CITIGROUP INC - Form 10-Q

NM Not meaningful

Certain reclassifications have been made to the prior periods' financial statements to conform to the current period's presentation.

Certain statements in this Form 10-Q, including, but not limited to, statements made in "Management's Discussion and Analysis," are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These statements are based on management's current expectations and are subject to uncertainty and changes in circumstances. Actual results may differ materially from those included in these statements due to a variety of factors including, but not limited to, those described in Citigroup's 2008 Annual Report on Form 10-K under "Risk Factors."

Within this Form 10-Q, please refer to the indices on pages 2 and 73 for page references to the Management's Discussion and Analysis section and Notes to Consolidated Financial Statements, respectively.

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS

SECOND QUARTER OF 2009 MANAGEMENT SUMMARY

Citigroup reported net income of \$4.279 billion, \$0.49 per diluted share, for the second quarter of 2009. The results included a \$6.7 billion after-tax gain on the sale of Smith Barney. The \$0.49 earnings per share reflected preferred stock dividends and the quarterly accretion of the Series H preferred stock discount (the preferred stock issued to the U.S. Treasury as part of TARP in October 2008). See "TARP and Other Regulatory Programs" below.

Revenues of \$30.0 billion increased 71% from year-ago levels due primarily to the Smith Barney gain on sale and positive revenue marks and gains, relative to the prior-year period, in Citi Holdings, partially offset by the impact of foreign exchange translation and declines in Regional Consumer Banking revenues, primarily in Cards. The difficult economic environment continued to have a negative impact on all businesses.

Net interest revenue declined 8% from the 2008 second quarter, reflecting the Company's smaller balance sheet. Net interest margin in the second quarter of 2009 was 3.24%, up 7 basis points from the second quarter of 2008, reflecting significantly lower cost of funding, largely offset by a decrease in asset yields related to the decrease in the Federal funds rate and the FDIC special assessment of \$333 million.

Non-interest revenue increased \$13.6 billion from a year ago, primarily reflecting the gain on sale of Smith Barney, lower write-downs and gains on exposures in Citi Holdings.

Operating expenses decreased 21% from the previous year, reflecting benefits from Citi's ongoing re-engineering efforts, expense control, and the impact of foreign exchange translation. Headcount of 279,000 was down 84,000 from June 30, 2008 and 30,000 from March 31, 2009.

The Company's equity capital base and trust preferred securities were \$176.3 billion at June 30, 2009. Citigroup's stockholders' equity increased by \$8.4 billion during the second quarter of 2009 to \$152.3 billion, primarily reflecting net income less dividend payouts and an improvement in *Accumulated Other Comprehensive Income*. The Company distributed \$1.55 billion in dividends to its preferred stockholders during the quarter. Citigroup had a Tier 1 Capital ratio of 12.74% at June 30, 2009.

On July 23, 2009 and July 29, 2009, Citigroup closed its exchange offers with the private and public holders, respectively, of preferred stock and trust preferred securities, as applicable (\$32.8 billion in aggregate liquidation value). In connection with these exchanges, the U.S. Treasury (UST) also exchanged \$25 billion of aggregate liquidation value of its preferred stock, for a total exchange of \$57.8 billion. Following an increase in Citigroup's authorized common stock, and the conversion of interim securities to common stock, the UST will own approximately 33.6% of Citigroup's outstanding common stock (not including the exercise of the warrants issued to the UST as part of TARP). See "Events of 2009 Public and Private Exchange Offers" and "TARP and Other Regulatory Programs."

As a result of the closing of the private and public exchange offers, Citigroup will increase its Tier 1 common by approximately \$64 billion from the second quarter of 2009 level of \$27 billion to approximately \$91 billion. In addition, Citigroup's Tangible Common Equity (TCE), which was \$40 billion as of June 30, 2009, will increase by approximately \$60 billion to approximately \$100 billion. (TCE and Tier 1 Common are non-GAAP financial measures. See "Capital Resources and Liquidity" for additional information on these measures, including a reconciliation to the most directly comparable GAAP measures.)

During the second quarter of 2009, the Company recorded a net build of \$3.9 billion to its credit reserves. The net build consisted of \$1.2 billion in Citicorp (\$0.6 billion in Regional Consumer Banking and \$0.6 billion in ICG) and \$2.7 billion in Citi Holdings (almost all in Local Consumer Lending). The consumer loan delinquency rate was 4.24% at June 30, 2009, compared to 3.93% at March 31, 2009 and 2.30% a year ago. Corporate non-accrual loans were \$12.4 billion at June 30, 2009, compared to \$11.2 billion at March 31, 2009 and \$2.2 billion a year ago. The increase from prior-year levels is primarily attributable to the transfer of non-accrual loans from the held-for-sale portfolio to the held-for-investment portfolio during the fourth quarter of 2008. The allowance for loan losses totaled \$35.9 billion at June 30, 2009, a coverage ratio of 5.60% of total loans.

The Company's effective tax rate was 17.1% in the second quarter of 2009, which includes a tax benefit of \$129 million relating to the conclusion of an audit of certain issues in the Company's 2003-2005 U.S. Federal tax audit.

Total deposits were approximately \$804.7 billion at June 30, 2009, up 6% from March 31, 2009 and flat with prior-year levels. At June 30, 2009, the Company has increased its structural liquidity (equity, long-term debt and deposits) as a percentage of assets from 68% at March 31, 2009 to approximately 71% at June 30, 2009. Citigroup has continued its deleveraging, reducing total assets from \$2,100 billion a year ago to \$1,849 billion at June 30, 2009.

Edgar Filing: CITIGROUP INC - Form 10-Q

In July 2009, Citi appointed three new directors to its board. Additionally, the Company recently announced several senior management appointments, including John Gerspach as Chief Financial Officer, replacing Ned Kelly, who was appointed Vice Chairman of Citigroup, and Eugene McQuade as Chief Executive Officer for Citibank, N.A.

Table of Contents

EVENTS IN 2009

Certain significant events have occurred during the fiscal year to date, including events subsequent to June 30, 2009, that had, or could have, an effect on Citigroup's current and future financial condition, results of operations, liquidity and capital resources. Certain of these events are summarized below and discussed in more detail throughout this MD&A.

PUBLIC AND PRIVATE EXCHANGE OFFERS

Private Exchange Offers

On July 23, 2009, Citigroup closed its exchange offers with the private holders of \$12.5 billion aggregate liquidation value of preferred stock. As previously disclosed, the U.S. Treasury (UST) matched these exchange offers by exchanging \$12.5 billion aggregate liquidation value of its preferred stock, for a total closing of \$25 billion. The preferred stock held by the private holders and the UST was exchanged for an aggregate of approximately 7,692 shares of interim securities and warrants. The warrants will terminate and the interim securities will automatically convert into Citigroup common stock upon the increase, subject to shareholder approval, in Citigroup's authorized common stock at a ratio of one million shares of common stock for each interim security. Following the authorized share increase, the interim securities issued to the private holders and the UST in this closing will convert into approximately 7.7 billion shares of Citigroup common stock.

The shareholder approval on the proposed increase in Citigroup's authorized common stock is scheduled to occur on September 2, 2009. In addition, see "Public Exchange Offers" below.

Public Exchange Offers

On July 29, 2009, Citigroup closed its exchange offers with certain holders of its publicly-held preferred stock and trust preferred securities. Approximately \$20.3 billion in aggregate liquidation value of publicly-held preferred stock and trust preferred securities were validly tendered and not withdrawn in the public exchange offers. This represents 99% of the total liquidation value of securities that Citigroup was offering to exchange.

Upon closing of the public exchange offers, Citi issued approximately 5.8 billion shares of common stock to the public exchange offer participants. In accordance with the instructions given by the participants in the public exchange offers, these shares of common stock are subject to an irrevocable proxy to vote in favor of the proposal to increase Citigroup's authorized common stock, among other matters, which will result in the termination of the warrants and the automatic conversion of the interim securities issued to the UST and the private holders in the private exchange offers into common stock (see "Private Exchange Offers" above).

In addition, as previously disclosed, on July 30, 2009, the UST matched the public exchange offers by exchanging an additional \$12.5 billion aggregate liquidation value of its preferred stock, resulting in Citi's issuing approximately 3,846 additional shares of interim securities to the UST and increasing the number of shares of common stock the UST may acquire upon exercise of the warrant issued to it in connection with the private exchange offers closing. The warrant will terminate and these interim securities will convert into approximately 3.8 billion shares of Citigroup common stock following the authorized share increase.

In total, approximately \$58 billion in aggregate liquidation value of preferred stock and trust preferred securities were exchanged to common stock and interim securities as a result of the completion of the private and public exchange offers and the associated exchange by the UST. Upon the increase in Citigroup's authorized common stock, and the conversion of the interim securities to common stock, the UST will own approximately 33.6% of Citigroup's outstanding common stock, not including the exercise of the warrants issued to the UST as part of TARP and pursuant to the loss-sharing agreement. See "TARP and Other Regulatory Programs" below.

Capital Impact

As a result of the closing of the private and public exchange offers and the associated exchange by the UST on a proforma basis, Citigroup increased its Tier 1 Common by approximately \$64 billion from the second quarter of 2009 level of approximately \$27 billion to approximately \$91 billion. In addition, Citigroup's tangible common equity (TCE), which was approximately \$40 billion as of June 30, 2009, increased by approximately \$60 billion to approximately \$100 billion on a proforma basis. (TCE and Tier 1 Common are non-GAAP financial measures. See "Capital Resources and Liquidity" below for additional information on these measures, including a reconciliation to the most directly comparable GAAP measures.)

8% Trust Preferred Securities

Edgar Filing: CITIGROUP INC - Form 10-Q

On July 30, 2009, all remaining preferred stock of Citigroup held by the UST and FDIC (the UST and FDIC are collectively referred to as the "USG") that was not exchanged into Citigroup common stock in connection with the private or public exchange offers was exchanged into newly issued 8% trust preferred securities. An aggregate liquidation amount of approximately \$27.1 billion in trust preferred securities was issued to the USG in exchange for an aggregate of \$27.059 billion liquidation value of preferred stock.

Accounting Impact

The accounting for the exchange offers will result in the de-recognition of preferred stock and the recognition of the common stock issued at fair value in the *Common stock* and *Additional paid-in capital* accounts in equity. The difference between the carrying amount of preferred stock and the fair value of the common stock will be recorded in *Retained earnings* (impacting net income available to common shareholders and EPS) or *Additional paid-in capital* accounts in equity, depending on whether the preferred stock was originally non-convertible or convertible.

For USG preferred stock that was converted to 8% trust preferred securities, the newly issued trust preferred securities will be initially recorded at fair value as *Long-term debt*. The difference between the carrying amount of the preferred stock and the fair value of the trust preferred securities will be

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

recorded in *Retained earnings* after adjusting for appropriate deferred tax liability (impacting net income available to common shareholders and EPS). For trust preferred securities exchanged for common stock, the carrying amount currently recorded as long-term debt will be de-recognized and the common stock issued will be recorded at fair value in the Common Stock and the Additional Paid-in Capital accounts in equity. The difference between the carrying amount of the trust preferred securities and the fair value of the common stock will be recorded in the current earnings of the period in which the transaction will occur.

The following table presents the impact of the completion of all stages of the exchange offers to Citigroup's common shares outstanding and to its balance sheet:

(in millions of dollars, except incremental number of Citigroup common shares)

Security	Notional Amounts	Converting Into	Incremental Number of Citigroup Common Shares (in millions)	Date of Settlement	Other Assets(4)	Long-Term Debt	Impact on

Summary

Edgar Filing: CITIGROUP INC - Form 10-Q

The additional estimated \$60 billion of TCE is primarily the result of the exchange of approximately \$74 billion carrying amount of preferred shares and \$6 billion carrying value of trust preferred securities for 17,372 million shares of common stock and approximately \$27.1 billion liquidation amount of trust preferred securities (recorded as Long-term Debt at its fair value of \$16.2 billion). This resulted in an increase to common stock and APIC of \$62 billion and a reduction in *Retained earnings* of approximately \$2 billion, for a total increase in TCE of approximately \$60 billion.

The additional \$64 billion of Tier 1 Common includes the impact of the above plus a reduction in the disallowed Deferred tax asset (which increases Tier 1 Common) that arises from the accounting for the transactions. TCE and Tier 1 Common are non-GAAP financial measures. See "Capital Resources and Liquidity" below for additional information on these measures, including a reconciliation to the most directly comparable GAAP measures.

- (1) Upon shareholder approval of the increase in Citigroup's authorized common stock, the interim securities will be automatically converted into common stock (anticipated in early September 2009).
- (2) The *Retained earnings* impact primarily reflects:
 - a) Difference between the carrying value of the preferred stock exchanged versus the fair value of the common stock and trust preferred securities issued.
 - b) Value of inducement offer to the convertible preferred stock holders (calculated as the incremental shares received in excess of the original terms multiplied by stock price on the commitment date).
 - c) Estimated after-tax gain from extinguishment of debt associated with the trust preferred securities held by public investors.
- (3) Estimated after-tax gain to be reflected in third quarter 2009 earnings of approximately \$0.9 billion from the extinguishment of debt associated with the trust preferred securities held by public investors.
- (4) Primarily represents the impact on deferred taxes of the various exchange transactions, which will benefit Tier 1 Common and Tier 1 Capital.

Earnings per share in the third quarter of 2009 will be impacted by (1) the increase in shares outstanding as a result of the issuance of common shares and interim securities and the timing thereof, (2) the net impact to *Retained earnings* and income statement resulting from the preferred share and trust preferred securities exchange and (3) dividends on USG preferred shares accrued up to the date of their conversion to interim securities and trust preferred securities.

Table of Contents

TAX BENEFITS PRESERVATION PLAN

As of June 30, 2009, Citigroup had recognized net deferred tax assets of approximately \$42 billion, a portion of which is included in TCE. Citi's ability to utilize its deferred tax assets to offset future taxable income may be significantly limited if Citi experiences an "ownership change", as defined in Section 382 of the Internal Revenue Code of 1986, as amended (the "Code"). In general, an ownership change will occur if there is a cumulative change in Citi's ownership by "5% shareholders" (as defined in the Code) that exceeds 50 percentage points over a rolling three-year period. As such, if the Company experiences an ownership change, its TCE may be reduced.

While the common stock issued pursuant to the private and public exchange offers (described above) did not result in an ownership change under the Code, the common stock issued did increase the cumulative change percentage for Section 382 purposes. On June 9, 2009, the board of directors of Citigroup adopted a tax benefits preservation plan (the "Plan"). The purpose of the Plan is to minimize the likelihood of an ownership change occurring for Section 382 purposes and thus protect Citigroup's ability to utilize certain of its deferred tax assets, such as net operating loss and tax credit carry forwards, to offset future income.

In connection with the adoption of the Plan, Citigroup's board of directors declared a dividend of one preferred stock purchase right (a "Right") for each outstanding (i) share of common and (ii) 1-millionth of a share of the interim securities. The dividend was paid to holders of record of Citigroup's common stock on June 22, 2009. Shares of Citigroup's common stock and interim securities issued after June 22, 2009 will be issued with the Right attached. The terms and conditions of the Rights are set forth in the Tax Benefits Preservation Plan attached as Exhibit 4.1 to Citigroup's Form 8-K filed with the SEC on June 10, 2009.

THE SUPERVISORY CAPITAL ASSESSMENT PROGRAM

On May 7, 2009, the USG released the results of its Supervisory Capital Assessment Program (SCAP). The SCAP constituted a comprehensive capital assessment of the 19 largest U.S. financial institutions, including Citi. Based on the results of the USG's assessment under the SCAP, Citi was required to increase its previously announced plan to increase Tier 1 Common by an additional \$5.5 billion. See "Events in 2009 Public and Private Exchange Offers" above. In addition, Citi was required to develop and submit a capital plan to the FRB and FDIC. The Company submitted its capital plan to the regulators on June 8, 2009, as required. For additional information on the requirements of the capital plan, as well as other information on SCAP, see the "Events in 2009" section of the Company's Quarterly Report on Form 10-Q for the period ended March 31, 2009.

LOSS-SHARING AGREEMENT

On January 15, 2009, Citigroup issued preferred shares to the UST and the FDIC, and a warrant to the UST, in exchange for \$301 billion of loss protection on a specified pool of Citigroup assets. The Company is required to absorb the first \$39.5 billion of qualifying losses under the agreement, plus 10% of the remaining losses incurred.

As a result of receipt of principal repayments and charge-offs, the total asset pool has declined by approximately \$35 billion from the original \$301 billion to approximately \$266.4 billion. Approximately \$2.5 billion of GAAP losses on the asset pool were recorded in the second quarter of 2009, bringing the GAAP losses to date to approximately \$5.3 billion. See "TARP and Other Regulatory Programs U.S. Government Loss-Sharing Agreement" below.

The shares of preferred stock issued to the UST and FDIC in consideration for the loss-sharing agreement were subsequently exchanged into newly issued 8% trust preferred securities pursuant to the exchange offers, as described under "Public and Private Exchange Offers" above. For additional information of the warrant issued to the UST as part of this transaction, see "TARP and Other Regulatory Programs" below.

Table of Contents**ITEMS IMPACTING CITICORP SECURITIES AND BANKING****Citicorp Securities and Banking Significant Revenue Items and Risk Exposure**

	Pretax Revenue Marks (in millions)		Risk Exposure (in billions)		
	Second Quarter 2009	Second Quarter 2008	June 30, 2009	Mar. 31, 2009	% Change

CVA on derivatives positions, excluding monoline insurers	597	48	N/A	N/A	
Total significant revenue items	\$ (777)	\$ (299)			

(1) Net of hedges.

Private Equity and Equity Investments

In the second quarter of 2009, Citicorp recognized pretax gains of approximately \$11 million on private equity and equity investments. Citicorp had \$1.8 billion in private equity and equity investments securities at June 30, 2009, which increased approximately \$85 million from March 31, 2009.

Alt-A Mortgage Securities

In the second quarter of 2009, Citigroup recorded pretax gains of approximately \$99 million, net of hedges, on Alt-A mortgage securities held in Citicorp. For these purposes, Alt-A mortgage securities are non-agency residential mortgage-backed securities (RMBS) where (i) the underlying collateral has weighted average FICO scores between 680 and 720 or (ii) for instances where FICO scores are greater than 720, RMBS have 30% or less of the underlying collateral composed of full documentation loans.

Citicorp had \$1.2 billion in Alt-A mortgage securities at June 30, 2009, which increased \$0.3 billion from March 31, 2009. Of the \$1.2 billion, approximately \$0.7 billion was classified as *Trading account assets* and \$0.5 billion was classified as available-for-sale investments.

Commercial Real Estate

Citicorp's commercial real estate (CRE) exposure is split into three categories: assets held at fair value; held to maturity/held for investment; and equity. During the second quarter of 2009, pretax losses of \$32 million, net of hedges, were booked on exposures recorded at fair value. Citicorp had \$7.0 billion in CRE positions at June 30, 2009, which increased \$0.8 billion from March 31, 2009. See "Exposure to Commercial Real Estate" below for a further discussion.

Credit Valuation Adjustment on Citi's Debt Liabilities for Which Citi Has Elected the Fair Value Option

Under SFAS 157 (ASC 820-10-35-18), the Company is required to use its own credit spreads in determining the current value for its derivative liabilities and all other liabilities for which it has elected the fair value option. When Citi's credit spreads widen (deteriorate), Citi recognizes a gain on these liabilities because the value of the liabilities has decreased. When Citi's credit spreads narrow (improve), Citi recognizes a loss on these liabilities because the value of the liabilities has increased.

During the second quarter of 2009, Citicorp recorded losses of approximately \$1,452 million on its fair value option liabilities (excluding derivative liabilities) principally due to narrowing (improving) of the Company's credit spreads.

Credit Valuation Adjustment on Derivative Positions, excluding Monoline insurers

During the second quarter of 2009, Citicorp recorded pretax net gain of approximately \$597 million on its derivative positions due to the narrowing of the credit default swap spreads of the Company's counterparties on its derivative assets. A majority of the gains were offset by losses due to narrowing in the Company's own credit spreads on the Company's derivative liabilities. See "Derivatives" below for a further discussion.

See, generally, "Managing Global Risk" below for additional information on the risk exposures discussed above.

Table of Contents**ITEMS IMPACTING CITI HOLDINGS****Citi Holdings Significant Revenue Items and Risk Exposure Predominantly in Special Asset Pool**

	Pretax Revenue (in millions)		Risk Exposure (in billions)

- (1) Net of hedges.
- (2) Net of underwriting fees.
- (3) Excludes CRE positions that are included in the SIV portfolio.

Subprime-Related Direct Exposures

In the second quarter of 2009, Citi Holdings recorded gains of approximately \$613 million, net of hedges, on its subprime-related direct exposures. The Company's remaining \$9.6 billion in U.S. subprime net direct exposure in Citi Holdings at June 30, 2009 consisted of (i) approximately \$8.3 billion of net exposures to the super senior tranches of CDOs, which are collateralized by asset-backed securities, derivatives on asset-backed securities or both, and (ii) approximately \$1.4 billion of subprime-related exposures in its lending and structuring business. See "U.S. Subprime-Related Direct Exposures" below for a further discussion of such exposures and the associated marks recorded.

Private Equity and Equity Investments

In the second quarter of 2009, Citi Holdings recognized pretax losses of approximately \$37 million on private equity and equity investments. Citi Holdings had \$6.2 billion in private equity and equity investments securities at June 30, 2009, which increased approximately \$150 million from March 31, 2009.

Alt-A Mortgage Securities

In the second quarter of 2009, Citigroup recorded pretax losses of approximately \$390 million, net of hedges, on Alt-A mortgage securities held in Citi Holdings. For these purposes, Alt-A mortgage securities are non-agency residential mortgage-backed securities (RMBS) where (i) the underlying collateral has weighted average FICO scores between 680 and 720 or (ii) for instances where FICO scores are greater than 720, RMBS have 30% or less of the underlying collateral composed of full documentation loans.

Edgar Filing: CITIGROUP INC - Form 10-Q

Citi Holdings had \$10.0 billion in Alt-A mortgage securities at June 30, 2009, which decreased \$1.6 billion from March 31, 2009. Of the \$10.0 billion, approximately \$0.4 billion was classified as *Trading account assets*, on which \$29 million of fair value losses, net of hedging, was recorded in earnings, \$0.1 billion was classified as available-for-sale (AFS) investments, and \$9.5 billion was classified as held-to-maturity (HTM) investments. HTM securities decreased \$1.1 billion from March 31, 2009, due to principal pay-downs and impairments recognized during the quarter.

Highly Leveraged Loans and Financing Commitments

The Company recorded pretax losses of approximately \$237 million on funded and unfunded highly leveraged finance exposures in the second quarter of 2009. Citigroup's exposure to highly leveraged financings totaled \$8.5 billion at June 30, 2009 (approximately \$8.1 billion in funded and \$0.4 billion in unfunded commitments), reflecting a decrease of approximately \$1.0 billion from March 31, 2009. See "Highly Leveraged Financing Transactions" below for a further discussion.

Commercial Real Estate

Citi Holdings' commercial real estate (CRE) exposure is split into three categories: assets held at fair value; held to maturity/held for investment; and equity. During the second quarter of 2009, pretax losses of \$213 million, net of hedges, were booked on exposures recorded at fair value, \$135 million of losses were booked on equity method investments, and \$6 million of impairments were booked on HTM positions. Citi Holdings had \$28.6 billion in CRE positions at June 30, 2009, which decreased \$1.3 billion from March 31, 2009. See "Exposure to Commercial Real Estate" below for a further discussion.

Monoline Insurers Credit Valuation Adjustment

During the second quarter of 2009, Citi Holdings recorded a pretax gain on credit value adjustments (CVA) of approximately \$157 million on its exposure to monoline insurers. CVA is calculated by applying forward default

Table of Contents

probabilities, which are derived using the counterparty's current credit spread, to the expected exposure profile. The exposure primarily relates to hedges on super senior subprime exposures that were executed with various monoline insurance companies. See "Direct Exposure to Monolines" below for a further discussion.

Credit Valuation Adjustment on Citi's Debt Liabilities for Which Citi Has Elected the Fair Value Option

Under SFAS 157 (ASC 820-10-35-18), the Company is required to use its own credit spreads in determining the current value for its derivative liabilities and all other liabilities for which it has elected the fair value option. When Citi's credit spreads widen (deteriorate), Citi recognizes a gain on these liabilities because the value of the liabilities has decreased. When Citi's credit spreads narrow (improve), Citi recognizes a loss on these liabilities because the value of the liabilities has increased.

During the second quarter of 2009, Citi Holdings recorded a loss of approximately \$156 million on its fair value option liabilities (excluding derivative liabilities) due to the narrowing of the Company's credit spreads.

Credit Valuation Adjustment on Derivative Positions, excluding Monoline insurers

During the second quarter of 2009, Citi Holdings recorded a net gain of approximately \$804 million on its derivative positions primarily due to the narrowing of the credit default swap spreads of the Company's counterparties on its derivative assets. See "Derivatives" below for a further discussion.

Accretion on Reclassified Assets

In the fourth quarter of 2008, the Company reclassified \$33.3 billion of debt securities from trading securities to HTM investments, \$4.7 billion of debt securities from trading securities to AFS, and \$15.7 billion of loans from held-for-sale to held-for-investment. All assets were reclassified with an amortized cost equal to the fair value on the date of reclassification. The difference between the amortized cost basis and the expected principal cash flows is treated as a purchase discount and accreted into income over the remaining life of the security or loan. In the second quarter of 2009, the Company recognized approximately \$501 million of interest revenue from this accretion.

See, generally, "Managing Global Risk" below for additional information on the risk exposures discussed above.

Table of Contents

DIVESTITURES

Joint Venture with Morgan Stanley

Pursuant to a previously disclosed agreement, on June 1, 2009, Citi and Morgan Stanley established a joint venture (JV) that combines the Global Wealth Management platform of Morgan Stanley with Citi's Smith Barney, Quilter and Australia private client networks. Citi sold 100% of these businesses to Morgan Stanley in exchange for a 49% stake in the JV and an upfront cash payment of \$2.75 billion. The Brokerage and Asset Management business recorded a pretax gain of approximately \$11.1 billion (\$6.7 billion after-tax) on this sale. Both Morgan Stanley and Citi will access the JV for retail distribution and each firm's institutional businesses will continue to execute order flow from the JV.

In addition, as previously disclosed, on August 1, 2009, Citi sold its managed futures business to the Morgan Stanley Smith Barney JV. This sale will result in an after-tax gain of approximately \$160 million in the third quarter of 2009 and will not impact Citi's 49% ownership stake in the JV.

Sale of Nikko Cordial Securities

On May 1, 2009, Citigroup entered into a definitive agreement to sell its Japanese domestic securities business, conducted principally through Nikko Cordial Securities Inc., to Sumitomo Mitsui Banking Corporation in a transaction with a total cash value to Citi of approximately \$7.9 billion (¥774.5 billion). Citi's ownership interests in Nikko Citigroup Limited, Nikko Asset Management Co., Ltd., and Nikko Principal Investments Japan Ltd. were not included in the transaction. Citi expects to recognize an immaterial after-tax gain on the transaction when the transaction closes. The transaction is expected to close by the end of the fourth quarter of 2009, subject to regulatory approvals and customary closing conditions. The results of Nikko Cordial are reflected as Discontinued Operations in the Company's Consolidated Financial Statements.

Sale of NikkoCiti Trust

On July 1, 2009, Citigroup entered into a definitive agreement to sell all of the shares of NikkoCiti Trust and Banking Corporation (NCT) to Nomura Trust & Banking Co., Ltd. for an all cash consideration of \$197 million, subject to certain closing purchase price adjustments. The sale is expected to close in the fourth quarter of 2009, subject to regulatory approvals and customary closing conditions.

OTHER ITEMS

Income Taxes

The Company's effective tax rate on continuing operations was 17.1% in the second quarter of 2009 versus 51.2% in the prior-year period. The current quarter includes a tax benefit of \$129 million in continuing operations (plus \$34 million in discontinued operations) relating to the conclusion of an audit of various issues in the Company's 2003-2005 U.S. federal tax audit. The Company expects to conclude the audit of its U.S. federal consolidated income tax returns for the years 2003-2005 within the next 12 months. The gross uncertain tax position at June 30, 2009 for the items expected to be resolved is approximately \$85 million plus gross interest of approximately \$8 million. The potential net tax benefit to continuing operations could be approximately \$90 million. This is in addition to the \$110 million and \$163 million benefits booked in the first and second quarters of 2009, respectively, for issues already resolved.

The Company's net deferred tax asset of \$41.6 billion at June 30, 2009 decreased by approximately \$2.9 billion from December 31, 2008. The principal items reducing the deferred tax asset were approximately \$1.4 billion due to an increase in other comprehensive income and approximately \$1.2 billion in compensation tax benefits under SFAS 123(R)(ASC 718-740) which reduced *additional paid-in capital* in 2009. Although realization is not assured, the Company believes that the realization of the recognized net deferred tax asset at June 30, 2009 is more likely than not based upon expectations of future taxable income in the jurisdictions in which it operates and available tax planning strategies.

SUBSEQUENT EVENTS

Public and Private Exchange Offers

On July 23, 2009 and July 29, 2009, Citigroup closed its exchange offers with the private and public holders of preferred stock and trust preferred securities, as applicable (\$32.8 billion in aggregate liquidation value). In connection with these exchanges, the U.S. Treasury also exchanged \$25 billion of aggregate liquidation value of its preferred stock, for a total exchange of \$57.8 billion. See "Events in 2009 Public and Private Exchange Offers" above.

Sale of Nikko Asset Management

On July 30, 2009, Citigroup entered into a definitive agreement to sell its entire ownership interest in Nikko Asset Management to The Sumitomo Trust and Banking Co., Ltd. for an all-cash consideration of approximately \$795 million (¥75.6 billion). The sale is expected to close in the fourth quarter of 2009, subject to regulatory approvals and customary closing conditions, and is not expected to have a material impact on Citi's net income.

As required by SFAS 165, Subsequent Events, the Company has evaluated subsequent events through August 7, 2009, which is the date its Consolidated Financial Statements were issued.

ACCOUNTING CHANGES AND FUTURE APPLICATION OF ACCOUNTING STANDARDS

See Note 1 to the Consolidated Financial Statements for a discussion of "Accounting Changes" and "Future Application of Accounting Standards."

2Q09 vs. 2Q08

Revenues, net of interest expense declined 17%, primarily reflecting higher credit losses flowing through the credit card securitization trusts. Net interest revenue was up 30% driven by higher net interest margin in cards as a result of higher interest revenue from pricing actions and lower funding costs, and by the impact of higher deposit and loan volumes in retail banking. Average deposits were 11% higher than the prior year, driven by growth in consumer CDs and commercial deposits. Non-interest revenue declined 50%, primarily driven by higher credit losses flowing through the securitization trusts partially offset by other securitization revenue, and by the absence of a prior-year \$170 million

gain on a cards portfolio sale.

Operating expenses declined 16%, reflecting the benefits from re-engineering efforts, lower marketing costs, and the absence of a \$55 million repositioning charge in the second quarter of 2008.

Provisions for loan losses and for benefits and claims increased 70% primarily due to rising net credit losses in both cards and retail banking. The \$130 million loan loss reserve build in the second quarter reflected the continued weakness in consumer credit. The cards net credit loss ratio increased 400 basis points to 7.51%, while the retail banking net credit loss ratio increased 174 basis points to 4.85%.

2Q09 YTD vs. 2Q08 YTD

Revenues, net of interest expense declined 13%, primarily reflecting higher credit losses flowing through the credit card securitization trusts. *Net interest revenue* was up 28% driven by the impact of pricing actions and lower funding costs in cards, and by higher deposit and loan volumes in retail banking, with average deposits up 8% from the prior-year period. *Non-interest revenue* declined 39%, driven by higher credit losses flowing through the securitization trusts partially offset by other securitization revenue, and by the absence of a \$349 million gain on the sale of Visa shares and a \$170 million gain on a cards portfolio sale in the prior-year period.

Operating expenses declined 12%, reflecting the benefits from re-engineering efforts, lower marketing costs, and the absence of \$120 million of repositioning charges in the prior-year period, which were partially offset by the absence of a prior-year \$159 million Visa litigation reserve release.

Provisions for loan losses and for benefits and claims increased 66% primarily due to rising net credit losses in both cards and retail banking. Continued weakness in consumer credit and trends in the macro-economic environment,

Table of Contents

including rising unemployment and higher bankruptcy filings, drove higher credit costs. The cards net credit loss ratio increased 330 basis points to 6.61%, while the retail banking net credit loss ratio increased 39 basis points to 4.06%.

Recent Legislative Actions

The Credit Card Accountability Responsibility and Disclosure Act of 2009

On May 22, 2009, The Credit Card Accountability Responsibility and Disclosure Act of 2009 (CARD Act) was enacted into law. The CARD Act will affect various credit card practices of card issuers, including Citigroup, such as marketing, underwriting, pricing, billing and disclosure requirements, thus reshaping the way consumers have access to and use their credit cards. Many of the provisions in the CARD Act will take effect in February 2010, although some take effect earlier in August 2009 and some later in August 2010.

Among other things, the CARD Act:

prohibits a card issuer from increasing a customer's annual percentage rate ("APR") on an existing balance unless the customer has not made a minimum payment within 60 days after the due date for such payment, and requires the card issuer to terminate the increase no later than six months after the date on which it is imposed if the consumer makes the required minimum payment on time during that period;

requires an issuer to provide a 45-day written notice of an APR increase, or any other significant change to account terms, which notice must include a statement of the customer's right to cancel the account prior to the effective date of the change;

generally prohibits increasing the APR on new balances during the first year the card account is opened;

requires that penalty fees (e.g., late payment and over-the-limit fees) be "reasonable and proportional" to the customer's violation of account terms;

for accounts with different APRs on different balances, requires a card issuer to apply payments made by a customer in excess of the minimum payment to the card balance bearing the highest rate of interest; and

generally prohibits interest rate increases on outstanding balances, with certain limited exceptions.

Certain provisions of the CARD Act are consistent with Citigroup's existing practices and will not require any changes or modifications. Other provisions, however, such as those that restrict the ability of an issuer to increase APRs on outstanding balances or that establish standards for penalty fees and payment allocation will require Citigroup to make fundamental changes to its credit card business model. The impact of the CARD Act on Citigroup's credit businesses is not fully known at this time. Such impact will ultimately depend upon the successful implementation of changes to Citigroup's business model and the continued regulatory interpretations of the CARD Act, among other considerations.

Mortgage Modification Programs

See "Citi Holdings Local Consumer Lending" below for a description of the Obama administration's Home Affordable Modification Program (HAMP) and Citigroup's mortgage modification programs generally.

2Q09 vs. 2Q08

Revenues, net of interest expense, declined 22%. More than half of the revenue decline is attributable to changes in foreign currency translation (generally referred to throughout this report as "FX translation"). Other drivers included lower wealth management and lending revenues due to lower volumes and spread compression. Investment sales and assets under management declined by 38% and 32%, respectively. Net interest revenue was 27% lower than the prior-year period with average loans for retail banking down 22% as a result of a lower risk profile, branch closures, and the impact of FX translation. Average deposits were down 25%, primarily due to FX translation. Retail banking net interest margin declined from 11.0% to 9.8%. Non-interest revenue declined 13%, primarily due to the impact of FX translation.

Edgar Filing: CITIGROUP INC - Form 10-Q

Operating expenses declined 29%, reflecting expense control actions, lower marketing expenditure, and the impact of FX translation. Cost savings were achieved by branch closures, headcount reductions and re-engineering efforts.

Provisions for loan losses and for benefits and claims increased \$216 million, to \$279 million in the second quarter of 2009. Net credit losses increased from \$48 million to \$121 million, while the loan loss reserve build increased from \$15 million to \$158 million. Higher credit costs reflected continued credit deterioration, particularly in UAE, Turkey, Poland and Russia.

2Q09 YTD vs. 2Q08 YTD

Revenues, net of interest expense, declined 22%. Over half of the revenue decline is attributable to the impact of FX translation. Other drivers included lower wealth management and lending revenues due to lower volumes and spread compression. Investment sales and assets under management declined by 47% and 32%, respectively. *Net interest revenue* was 26% lower than the prior year with average loans for retail banking down 21%, average deposits down 25%, and net interest margin decreasing as well. *Non-interest revenue* declined 14%, primarily due to the impact of FX translation.

Operating expenses declined 30%, reflecting expense control actions, lower marketing spend, and the impact of FX translation. Cost savings were achieved by branch closures, headcount reductions and re-engineering efforts.

Provisions for loan losses and for benefits and claims increased \$314 million, to \$440 million for during the first six months of 2009. Net credit losses increased from \$95 million to \$210 million, while the loan loss reserve build increased from \$31 million to \$230 million. Higher credit costs reflected continued credit deterioration across the region.

2Q09 vs. 2Q08

Revenues, net of interest expense, declined 23%, mainly due to the impact of FX translation, lower cards receivables and spread compression, partially offset by higher business volumes in retail banking. Net interest revenue was 22% lower than the prior year caused by the decrease in cards receivables as well as lower spreads resulting from a lower risk profile, partially offset by higher business volumes in retail banking. Average deposits were down 14%, due primarily to the impact of FX translation. Non-interest revenue declined 26%, primarily due to the decline in cards fees as well as the impact of FX translation.

Edgar Filing: CITIGROUP INC - Form 10-Q

Operating expenses declined 16%, reflecting the benefits from re-engineering efforts and the impact of FX translation.

Provisions for loan losses and for benefits and claims increased 8% as a result of continued losses, especially in the cards business, which were partially offset by the impact of FX translation. Cards net credit loss rates increased from 11.4% to 16.2%. Rising losses were particularly apparent in the Mexico cards portfolio.

2Q09 YTD vs. 2Q08 YTD

Revenues, net of interest expense, declined 22% driven by the impact of FX translation, lower volumes and spread compression in the cards business. *Net interest revenue* was 23% lower than the prior year with average credit cards loans down 23%, and net interest margin decreasing as well due to the cards spread compression impact. *Non-interest revenue* declined 18%, primarily due to the decline in cards fees as well as the impact of FX translation.

Operating expenses declined 11%, reflecting the benefits from re-engineering efforts and the impact of FX translation. The prior-year period also included a \$257 million expense benefit related to a legal vehicle restructuring in Mexico.

Provisions for loan losses and for benefits and claims increased 4% as result of deteriorating credit conditions, especially in the cards business, which were partially offset by the impact of FX translation. Cards net credit loss rates increased from 10.9% to 16.1%. Credit deterioration was particularly apparent in the Mexico cards portfolio.

2Q09 vs. 2Q08

Revenue, net of interest expense declined 14% driven by a 35% decline in investment sales and the impact of FX translation. Net interest revenue was 8% lower than the prior-year period. Average loans and deposits were down 16% and 9%, respectively, and net interest margin decreased as well, in each case primarily due to the impact of FX translation. Non-interest revenue declined 26%, primarily due to the decline in investment sales.

Operating expenses declined 14%, reflecting the benefits from re-engineering efforts and the impact of FX translation.

Edgar Filing: CITIGROUP INC - Form 10-Q

Provisions for loan losses and for benefits and claims increased 55% mainly due to deteriorating credit conditions, partially offset by FX translation. Rising losses were particularly apparent in the card portfolios in India and Korea.

2Q09 YTD vs. 2Q08 YTD

Revenue, net of interest expense declined 18% driven by a 51% decline in investment sales and the impact of FX translation. *Net interest revenue* was 9% lower than the prior-year period. Average loans were down 17% and deposits were down 13%, respectively, and net interest margin decreased as well. *Non-interest revenue* declined 34%, primarily due to the decline in investment sales.

Operating expenses declined 18%, reflecting the benefits from re-engineering efforts and the impact of FX translation.

Provisions for loan losses and for benefits and claims increased 72% mainly due to higher net credit losses in India and Korea.

2Q09 vs. 2Q08

Revenues, net of interest expense decreased 7% primarily due to revenue marks of negative \$777 million and lending revenues of negative \$928 million, due mainly to losses on credit default swap hedges, which offset strong trading results in fixed income markets revenues. Investment banking revenues were down 13% from the second quarter of 2008, a quarter driven by stronger M&A and equity volumes, due primarily to lower advisory and equity underwriting revenues. Equity markets revenues were down 28% from the prior-year period, primarily driven by net negative revenue marks of \$694 million due to the narrowing in Citigroup credit spreads, partially offset by the narrowing of counterparty spreads. Private bank revenues were down 20% on lower assets under management, decreased investment sales and lower average lending volumes. Fixed income markets revenues were up 26% driven by strong results across most fixed income categories reflecting favorable positioning and sustained client activity.

Operating expenses decreased 25% driven by headcount reductions, repositioning charges recorded in the second quarter of 2008 and reductions in other operating expenses.

Provision for credit losses and for benefits and claims increased by 98% mainly due to increased credit reserve builds and provisions for unfunded lending commitments, partially offset by lower net credit losses.

2Q09 YTD vs. 2Q08 YTD

Revenues, net of interest expense increased 28% mainly due to an increase in fixed income markets of \$6.6 billion to \$15.8 billion, mostly in the first quarter of 2009, reflecting strong trading results, offset by a decrease in lending revenues to a negative \$1.3 billion mainly from losses on credit default swap hedges.

Operating expenses decreased 30% driven by lower compensation due to headcount reductions and benefits from re-engineering and expense management.

Table of Contents

Provision for credit losses and for benefits and claims increased \$0.5 billion to \$1.2 billion mainly from increased credit reserve builds.

2Q09 vs. 2Q08

Revenues, net of interest expense were \$2.5 billion, in line with the prior-year period as clients remained actively engaged. Growth in deposits and increasing spreads were offset by the impact of FX translation and declines in assets under custody. Average deposits increased by 5%, driven by growth in North America and Asia. Assets under custody declined by 13% from the prior-year period, primarily due to lower equity markets.

Operating expenses declined by 19% driven by headcount reduction, re-engineering efforts, expense management initiatives and the impact of FX translation.

2Q09 YTD vs. 2Q08 YTD

Revenues, net of interest expense of \$4.9 billion decreased slightly from the prior-year period driven primarily by the impact of FX translation, as well as by lower volumes and asset under custody valuations.

Operating expenses declined 17% driven by headcount reduction and re-engineering benefits, as well as the impact of FX translation.

2Q09 vs. 2Q08

Revenues, net of interest expense increased \$9.9 billion due to an \$11.1 billion pretax gain on sale (\$6.7 billion after-tax) on the Morgan Stanley Smith Barney joint venture transaction, which closed on June 1, 2009. Excluding the gain, revenues declined \$1.2 billion driven by the absence of one month of Smith Barney revenues as well as the impact of market conditions on Smith Barney transactional and fee-based revenue relative to the prior year.

Operating expenses decreased 45% from the prior-year period, primarily driven by lower revenue-driven expenses in Smith Barney, a one month absence of Smith Barney expenses, lower variable compensation and re-engineering efforts, particularly in retail alternative investments.

Provisions for loan losses and for benefits and claims decreased by 30% mainly reflecting lower provisions for benefits and claims.

2Q09 YTD vs. 2Q08 YTD

Revenues, net of interest expense increased \$9.2 billion due to an \$11.1 billion pre-tax gain on sale (\$6.7 billion after-tax) on the Morgan Stanley Smith Barney joint venture transaction which closed on June 1, 2009. Excluding the gain, revenue declined \$1.9 billion driven by the absence of one month of Smith Barney revenues as well as the impact of market conditions on Smith Barney transactional and fee-based revenue relative to the prior year.

Operating expenses decreased \$1.8 billion, or 41%, primarily driven by lower revenue-driven expenses in Smith Barney, a one month absence of Smith Barney expenses, lower variable compensation and re-engineering efforts, particularly in retail alternative investments.

Edgar Filing: CITIGROUP INC - Form 10-Q

Provisions for loan losses and for benefits and claims increased by 6% due to reserve builds in Smith Barney for SFAS 114 (ASC 310-10-35) impaired loans and lending to address client liquidity needs related to auction rate securities holdings, partially offset by lower provisions for benefits and claims.

NM Not meaningful

2Q09 vs. 2Q08

Revenues, net of interest expense decreased 37% mainly due to a decline in net interest revenue, higher net credit losses flowing through the securitization trusts in North America and a special FDIC assessment. *Net interest revenue* was 30% lower than the prior year driven by lower balances (due to run-off and credit tightening) and spread compression due largely to higher non-accrual loans, the FDIC special assessment and the impact of loan modifications. Average loans were down 13%, with North America (ex Cards) down 11%, North America Cards down 20%, and International down 21%. *Non-interest revenue* declined 62%, primarily due to higher credit costs flowing through the securitization trusts in North America and lower securitization gains. Non-interest revenue was also negatively impacted by \$266 million of losses on credit default swap hedges.

Operating expenses decreased 17% primarily due to re-engineering actions, lower volumes and marketing expenses and the absence of a \$85 million repositioning charge in the prior-year quarter. The declines in expenses were partially offset by higher other real estate owned assets (OREO) and collections costs.

Provisions for loan losses and for benefits and claims increased by 63%, reflecting higher reserve builds of \$1.0 billion and increased net credit losses of \$2.2 billion driven by deteriorating economic conditions globally. The reserve builds in the 2009 second quarter were mainly driven by increases for residential mortgage loans in North America as well as increases in EMEA. Net credit losses were higher versus the prior year across all businesses. The net credit reserve build for residential mortgages was driven by increases in first and second mortgages as well as continued deterioration in the housing market. Credit costs in North America also reflected a continued increase in credit losses in credit cards and commercial real estate. International credit costs reflected continued deterioration in CitiFinancial Japan, the U.K., Greece and Spain. The net credit loss ratio increased 310 basis points from the prior-year quarter with North America (ex Cards) up 267 basis points to 4.98%, International up 422 basis points to 9.69% and North America Cards up 707 basis points to 14.83%.

2Q09 YTD vs. 2Q08 YTD

Revenues, net of interest expense decreased 24% due to a decline in net interest revenue, higher net credit losses flowing through the securitization trusts in North America and a special FDIC assessment. *Net interest revenue* was 23% lower than the prior year driven by lower balances (due to run-off and credit tightening) and spread compression due largely to higher non-accrual loans, the FDIC special assessment and the impact of loan modifications. *Non-interest revenue* declined 28%, primarily due to higher credit costs flowing through the securitization trusts in North America and lower securitization gains. Non-interest revenue was also negatively impacted by \$266 million of losses on credit default swap hedges. Year-to-date non-interest revenue also included a \$1.1 billion pretax gain on the sale of the Company's remaining stake in Redecard as compared to a prior-year pretax gain on sale of Redecard of \$663 million.

Operating expenses decreased 18% primarily due to re-engineering actions, lower volumes and marketing expenses and the absence of prior-year repositioning charges. The declines in expenses were partially offset by higher OREO and collections costs.

Provisions for loan losses and for benefits and claims increased by 59%, reflecting higher reserve builds of \$1.2 billion and increased net credit losses of \$4.1 billion driven by deteriorating economic conditions globally. The reserve builds in 2009 were mainly driven by increases for residential mortgage loans and retail partners cards in North America as well as increases in EMEA; net credit losses were higher versus the prior year across all businesses.

Assets declined 16%, primarily driven by lower loans due to run-off and the impact of credit tightening.

Table of Contents

Mortgage Modifications and Recent Legislative Actions

Citigroup Mortgage Modification Programs

The Company has instituted a variety of programs to assist borrowers with financial difficulties to stay in their homes. These programs include modifying the original loan terms, reducing interest rates, extending the remaining loan duration and/or waiving a portion of the remaining principal balance. Each borrower's financial situation is evaluated individually. If a borrower meets certain criteria (for example, based on verifiable cash reserves and the level of debt to income), Citi works to develop a modification program suited to the needs of the borrower's situation.

In addition, Citi expects a significant number of loan modifications will be offered under the U.S. Treasury's Home Affordable Modification Program (HAMP), which was rolled out in the second quarter.

During the second quarter of 2009, Citi observed declines in mortgage delinquencies for loans that were delinquent in the 90 day to 179 day bucket. Well over half of these declines were attributable to loss mitigation and modification initiatives that the Company has put in place, including the loan modification programs described above. The future loss rates associated with these loan modification programs (both for those loans that qualify under HAMP and for those made under Citi's loan modification programs) could have an impact on the Company's future delinquency trends and loan loss reserving actions.

Home Affordable Modification Program

On March 4, 2009, the U.S. Treasury (UST) announced details of the Obama administration's Home Affordable Modification Program (HAMP). HAMP is designed to reduce the monthly mortgage payments to a 31% housing debt ratio by lowering the interest rate, extending the term of the loan and forbearing principal of certain eligible borrowers who have defaulted on their mortgages, or who are at risk of imminent default due to economic hardship. In order to be entitled to loan modifications, borrowers must complete a three-month trial period, and must be current at the end of the trial period. During the trial period, the original terms of the loans remain in effect pending final modification.

With respect to interest rate reductions, if the reduced interest rate is equal to or greater than the Freddie Mac Survey Rate at the time of modification, the reduced rate is permanent. If the reduced rate is less than the Freddie Mac Survey Rate at the time of modification, the rate will remain in effect for a period of five years. After five years, the interest rate may increase annually to a rate capped at the Freddie Mac Survey Rate at the time of original modification. The financial impact of interest rate reductions are shared between participating financial institutions, including Citi's wholly-owned subsidiary, CitiMortgage Inc., and the UST.

Under HAMP, investors and servicers of mortgages are entitled to receive certain payments from the UST based on the completion of loan modifications and continued borrower performance under the modified terms. To date, Citi has not recorded any fees under HAMP, as the trial period began in June 2009. During the trial period, the borrower continues to owe interest at the original contractual rate and recognizes interest to the extent permitted under Citi's nonaccrual policy. In addition, the Company does not record charge-offs while the loans are in the trial period if at least one payment under the trial period terms has been made.

The Credit Card Accountability Responsibility and Disclosure Act of 2009

See "Citicorp North America Retail Consumer Banking" above for a description of The Credit Card Accountability Responsibility and Disclosure Act of 2009 (CARD Act) and the potential impact of the CARD Act on Citigroup's credit card businesses.

NM Not meaningful

2Q09 vs. 2Q08

Revenues, net of interest expense increased 92% primarily due to favorable net revenue marks relative to the prior-year quarter. Revenue in the current quarter included positive marks of \$613 million on subprime-related direct exposures and \$804 million positive CVA on derivative positions, excluding monoline insurers, partially offset by \$967 million other revenue write-downs and losses. Revenue in the current quarter was also negatively impacted by \$1.1 billion of losses related to hedges of various asset positions.

Operating expenses declined 23%, mainly driven by lower volumes and lower transaction expenses.

Provisions for credit losses and for benefits and claims increased by \$1.4 billion primarily driven by \$1.6 billion in write-offs, partially offset by a lower loan loss reserve of \$213 million. The net \$104 million net credit reserve release in the second quarter of 2009 was driven by a \$750 million release for specific counterparties, partially offset by builds for specific counterparties.

2Q09 YTD vs. 2Q08 YTD

Revenues, net of interest expense increased 75% primarily due to favorable net revenue relative to the prior period. Revenue year-to-date included a \$1.1 billion positive CVA on derivative positions, offset by negative revenue of \$1.7 billion on subprime-related direct exposures and \$1.1 billion of negative marks for private equity positions. Revenue year-to-date was also negatively impacted by \$2.9 billion related to CVA on fair value option liabilities and monolines, Alt-A mortgages, CRE, and leveraged finance commitments.

Operating expenses declined 23% mainly driven by lower volumes and lower transaction expenses.

Edgar Filing: CITIGROUP INC - Form 10-Q

Provisions for credit losses and for benefits and claims increased by \$2.8 billion primarily driven by the \$3.1 billion increase in write-offs over the period. Significant write-offs included exposures in Lyondell Basell. The net \$40 million net credit reserve release in the current period was driven by a \$2.1 billion release for specific counterparties (including Lyondell Basell), partially offset by builds for specific counterparties.

2Q09 vs. 2Q08

Revenues, net of interest expense increased primarily due to lower intersegment eliminations, partially offset by hedging activities.

Operating Expenses increased due to lower intersegment eliminations.

Income Taxes (benefits) decreased due to higher tax benefits held at Corporate in the current year.

2Q09 YTD vs 2Q08 YTD

Revenues, net of interest expense increased due to lower intersegment eliminations, hedging activities, and the impact of changes in U.S. dollar rates.

Operating Expenses increased due to lower intersegment eliminations.

Table of Contents

TARP AND OTHER REGULATORY PROGRAMS

Issuance of \$45 Billion of Preferred Stock and Warrants to Purchase Common Stock under TARP

On October 28, 2008 and December 31, 2008, Citigroup raised \$25 billion and \$20 billion, respectively, through the sale of preferred stock and warrants to purchase common stock to the UST as part of the UST's Troubled Asset Relief Program (TARP) Capital Purchase Program. All of the proceeds were treated as Tier 1 Capital for regulatory capital purposes.

As part of the public and private exchange offers, the aggregate \$25 billion of preferred stock issued to the UST in October 2008 was exchanged for interim securities and a warrant. The warrant will terminate, and the interim securities will automatically convert into Citigroup common stock, following shareholder approval of the increase in the Company's authorized common stock. See "Events in 2009 Public and Private Exchange Offers" above. In addition, as part of the public and private exchange offers, the aggregate \$20 billion of preferred stock issued to the UST in December 2008 was exchanged for newly issued 8% trust preferred securities. See "Events in 2009 Public and Private Exchange Offers" above.

For a discussion of the accounting impact of the exchange offers, see "Events in 2009 Public and Private Exchange Offers" above.

The warrant issued to the UST in October 2008 has a term of 10 years, an exercise price of \$17.85 per share and is exercisable for approximately 210.1 million shares of common stock, which will be reduced by one-half if Citigroup raises an additional \$25 billion through the issuance of Tier 1-qualifying perpetual preferred or common stock by December 31, 2009. The value ascribed to the warrant, or \$1.3 billion out of the \$25 billion in cash proceeds, on a relative fair value basis, was recorded in Citigroup's stockholders' equity and resulted in an increase in *Additional paid-in capital*. The warrant issued to the UST in December 2008 has a term of 10 years, an exercise price of \$10.61 per share and is exercisable for approximately 188.5 million shares of common stock. The value ascribed to the warrant, or \$0.5 billion out of the \$20 billion in cash proceeds, on a relative fair value basis, was recorded in Citigroup's stockholders' equity and resulted in an increase in *Additional paid-in capital*.

The fair value for the warrants was calculated using the Black-Scholes option pricing model. The valuation was based on the Citigroup stock price, stock volatility, dividend yield, and the risk free rate on the measurement date for both the issuances.

FDIC's Temporary Liquidity Guarantee Program

Under the terms of the FDIC's Temporary Liquidity Guarantee Program (TLGP), the FDIC will guarantee, until the earlier of either its maturity or June 30, 2012 (for qualifying debt issued before April 1, 2009) or December 31, 2012 (for qualifying debt issued on or after April 1, 2009 through October 31, 2009), certain qualifying senior unsecured debt issued by certain Citigroup entities between October 31, 2008 and October 31, 2009 in amounts up to 125% of the qualifying debt for each qualifying entity. The FDIC charges Citigroup a fee ranging from 50 to 150 basis points in accordance with a prescribed fee schedule for any qualifying debt issued with the FDIC guarantee.

As to any entity participating in the TLGP, the TLGP regulations grant discretion to the FDIC, after consultation with the participating entity's appropriate Federal banking agency, to determine that the entity will no longer be permitted to continue to participate in the TLGP. If the FDIC makes that determination, it will inform the entity that it will no longer be provided the protections of the TLGP. Such a determination will not affect the guarantee of prior debt issuances under the TLGP.

As of June 30, 2009, Citigroup and its affiliates had issued a total of \$44.7 billion of long-term debt that is covered under the FDIC guarantee, with \$6.35 billion maturing in 2010, \$14.75 billion maturing in 2011 and \$23.5 billion maturing in 2012.

In addition, as of June 30, 2009, Citigroup, through its subsidiaries, also had \$27.7 billion in outstanding commercial paper and interbank deposits backed by the FDIC. The FDIC also charges a fee ranging from 50 to 150 basis points in connection with the issuance of those instruments.

FDIC Increased Deposit Insurance

On October 4, 2008, the FDIC increased the insurance it provides on U.S. deposits in most banks and savings associations located in the United States, including Citibank, N.A., from \$100,000 to \$250,000 per depositor, per insured bank.

Table of Contents

U.S. Government Loss-Sharing Agreement

Background

On January 15, 2009, Citigroup entered into a definitive agreement with the UST, the FDIC and the Federal Reserve Bank of New York (collectively, the USG) on losses arising on a \$301 billion portfolio of Citigroup assets (valued as of November 21, 2008, other than as set forth in note 1 to the table below). As shown in the table below, as a result of receipt of principal repayment and charge-offs, the total asset pool has declined by approximately \$35 billion to approximately \$266.4 billion from the original \$301 billion.

As consideration for the loss-sharing agreement, Citigroup issued approximately \$7.1 billion in preferred stock to the UST and the FDIC, as well as a warrant exercisable for common stock to the UST. Of the issuance, \$3.617 billion, representing the total fair value of the issued shares and warrant, was treated as Tier 1 Capital.

As part of the public and private exchange offers, the approximately \$7.1 billion of preferred stock issued to the UST and FDIC in consideration for the loss-sharing agreement was exchanged for newly issued 8% trust preferred securities. See "Events in 2009 Public and Private Exchange Offers" above. The warrant issued to the UST as consideration for the loss-sharing agreement has a term of 10 years, an exercise price of \$10.61 per share and is exercisable for approximately 66.5 million shares of common stock. The fair value of the warrant of \$88 million was recorded as a credit to *Additional paid-in capital* at the time of issuance.

Terms of Agreement

The loss-sharing agreement extends for 10 years for residential assets and five years for non-residential assets. Under the agreement, a "loss" on a portfolio asset is defined to include a charge-off or a realized loss upon collection, through a permitted disposition or exchange, or upon a foreclosure or short-sale loss, but not merely through a change in Citigroup's fair value accounting for the asset or the creation or increase of a related loss reserve. Once a loss is recognized under the agreement, the aggregate amount of qualifying losses across the portfolio in a particular period is netted against the aggregate recoveries and gains across the portfolio, all on a pretax basis.

The resulting net loss amount on the portfolio is the basis of the loss-sharing agreement between Citigroup and the USG. Citigroup will bear the first \$39.5 billion of such net losses, which amount was determined using (i) an agreed-upon \$29 billion of first losses, (ii) Citigroup's then-existing reserve with respect to the portfolio of approximately \$9.5 billion, and (iii) an additional \$1.0 billion as an agreed-upon amount in exchange for excluding the effects of certain hedge positions from the portfolio. Net losses, if any, on the portfolio after Citigroup's losses exceed the \$39.5 billion first-loss amount will be borne 90% by the USG and 10% by Citigroup in the following manner:

first, until the UST has paid \$5 billion in aggregate, 90% by the UST and 10% by Citigroup;

second, until the FDIC has paid \$10 billion in aggregate, 90% by the FDIC and 10% by Citigroup; and

third, 90% by the Federal Reserve Bank of New York and 10% by Citigroup.

Approximately \$2.5 billion of GAAP losses on the asset pool were recorded in the second quarter of 2009, bringing the GAAP losses on the portfolio to date to approximately \$5.3 billion (i.e., for the period of November 21, 2008 through June 30, 2009). These losses count towards Citigroup's \$39.5 billion first-loss position.

The Federal Reserve Bank of New York will implement its loss-sharing obligations under the agreement by making a loan, after Citigroup's first-loss position and the obligations of the UST and FDIC have been exhausted, in an amount equal to the then aggregate value of the remaining covered asset pool (after reductions for charge-offs, pay-downs and realized losses) as determined in accordance with the agreement. Following the loan, as losses are incurred on the remaining covered asset pool, Citigroup will be required to immediately repay 10% of such losses to the Federal Reserve Bank of New York. The loan is non-recourse to Citigroup, other than with respect to the repayment obligation in the preceding sentence and interest on the loan. The loan is recourse only to the remaining covered asset pool, which is the sole collateral to secure the loan. The loan will bear interest at the overnight index swap rate plus 300 basis points.

The covered asset pool includes U.S.-based exposures and transactions that were originated prior to March 14, 2008. Pursuant to the terms of the agreement, the composition of the covered asset pool, the amount of Citigroup's first-loss position and the premium paid for loss coverage are subject to final confirmation by the USG of, among other things, the qualification of assets under the asset eligibility criteria, expected losses

and reserves. See "Events in 2009 Loss-Sharing Agreement."

The USG has a 120-day confirmation period to review the composition of the asset pool from the date that Citi submitted its revised asset pool. The revised asset pool was submitted by Citigroup on April 15, 2009. The advisor to the USG has been conducting its review of the assets and it is thus currently expected that the USG will complete its review by August 13, 2009. The final composition of the asset pool will be established within 90 days after the USG completes its review.

The agreement includes guidelines for governance and asset management with respect to the covered asset pool, including reporting requirements and notice and approval rights of the USG at certain thresholds. If covered losses exceed \$19 billion, the USG may increase the required reporting or alter the thresholds for notice and approval. If covered losses exceed \$27 billion, the USG has the right to change the asset manager for the covered asset pool, among other things.

Accounting and Regulatory Capital Treatment

Citigroup accounts for the loss-sharing agreement as an indemnification agreement pursuant to the guidance in FASB Statement No. 141 (revised 2007), *Business Combinations* (ASC 805-20-30-18). Citigroup recorded an asset of \$3.617 billion (equal to the fair value of the consideration issued to the USG, described above) in *Other assets* on the Consolidated Balance Sheet. The asset will be amortized as an *Other operating expense* in the Consolidated Statement of Income on a straight-line basis over the coverage periods of 10 years for residential assets and five years for non-residential assets, based on the relative initial principal amounts of each

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

group. During the quarter ended June 30, 2009, Citigroup recorded \$120 million as an *Other operating expense*.

Under indemnification accounting, recoveries (gains), if any, will be recognized in the Consolidated Statement of Income in the same future periods that cumulative losses recorded under U.S. GAAP on the covered assets exceed the \$39.5 billion first-loss amount. The Company will recognize and measure an indemnification asset on the same basis that it recognizes losses on the covered assets in the Consolidated Statement of Income. For example, for a covered loan classified as held-for-investment and reported in the balance sheet at amortized cost, the Company would recognize and measure an indemnification asset due from the USG at the same time related loan loss reserves are recorded for that loan equal to 90% of the amount of the loan loss reserve, subject to the first-loss limitation.

Under indemnification accounting, recoveries (gains) may be recorded at times when such amounts are not contractually receivable from the USG based on the definition of covered losses in the loss-sharing agreement. Such amounts may or may not thereafter become contractually receivable, depending upon whether or not they become covered "losses" (see above for definition of covered "loss"). Indemnification accounting matches the amount and timing of the recording of recoveries with the amount and timing of the recognition of losses based on the U.S. GAAP accounting for the covered assets, as opposed to the amount and timing of recognition as defined in the loss-sharing agreement. The indemnification asset amount recorded will be adjusted, as appropriate, to take into consideration additional revenue and expense amounts related to the covered assets specifically defined as recoverable or non-recoverable in the loss-sharing program. As of June 30, 2009, the Company has recognized cumulative U.S. GAAP losses on the covered assets that are substantially below our first-loss amount and, therefore, no additional indemnification asset has been recognized as of such time.

The fair value of the warrant issued to the UST, which remains outstanding is \$88 million and was recorded as a credit to *Additional paid-in capital* at the time of issuance.

The covered assets are risk-weighted at 20% for purposes of calculating the Tier 1 Capital ratio at June 30, 2009.

The following table summarizes the assets that were part of the covered asset pool agreed to between Citigroup and the USG as of January 16, 2009, with their values as of November 21, 2008 (except as set forth in the note to the table below), and the balances as of June 30, 2009, reflecting changes in the balances of assets that remained qualified, plus approximately \$10 billion of new replacement assets that Citi substituted for non-qualifying assets. The \$266.4 billion of covered assets at June 30, 2009 are recorded in Citi Holdings within Local Consumer Lending (\$183.2 billion) and Special Asset Pool (\$83.2 billion). The asset pool, as revised, remains subject to the USG's final review process, anticipated to be completed by August 13, 2009, with final composition of the asset pool established within 90 days after the USG's completion of its review.

-
- (1) As a result of the initial confirmation process (conducted between November 21, 2008 and January 15, 2009), the covered asset pool includes approximately \$99 billion of assets considered "replacement" assets (assets that were added to the pool to replace assets that were in the pool as of November 21, 2008 but were later determined not to qualify). Loss-sharing on qualifying losses incurred on these replacement assets was effective beginning January 15, 2009, instead of November 21, 2008.
- (2) Reclassified to conform to the current period's presentation.

Table of Contents

Implementation and Management of TARP Programs

After Citigroup received the TARP capital, it established a Special TARP Committee composed of senior executives to approve, monitor and track how the funds are utilized. Citi is required to adhere to the following objectives as a condition of the USG's capital investment:

Expand the flow of credit to U.S. consumers and businesses on competitive terms to promote the sustained growth and vitality of the U.S. economy.

Work diligently, under existing programs, to modify the terms of residential mortgages as appropriate to strengthen the health of the U.S. housing market.

The Committee has established specific guidelines, which are consistent with the objectives and spirit of the program. Pursuant to these guidelines, Citi will use TARP capital only for those purposes expressly approved by the Committee. TARP capital will not be used for compensation and bonuses, dividend payments, lobbying or government relations activities, or any activities related to marketing, advertising and corporate sponsorship. TARP capital will be used exclusively to support assets and not for expenses.

Committee approval is the final stage in a four-step review process to evaluate proposals from Citi businesses for the use of TARP capital, considering the risk, the potential financial impact and returns.

On May 12, 2009, Citi published its quarterly report summarizing its TARP spending initiatives for the first quarter of 2009 (the report is available at www.citigroup.com). The report states that the Committee has authorized \$44.75 billion in initiatives backed by TARP capital which has subsequently been increased to \$50.8 billion. As of June 30, 2009, the Company has deployed approximately \$15.1 billion of funds under the approved initiatives.

Table of Contents**MANAGING GLOBAL RISK**

Citigroup's risk management framework balances strong corporate oversight with well-defined independent risk management functions for each business and region, as well as cross-business product expertise. The Citigroup risk management framework is described in Citigroup's 2008 Annual Report on Form 10-K.

- (4) The fourth quarter of 2008 primarily includes reductions to the credit loss reserves of approximately \$400 million primarily related to FX translation.
- (5) The third quarter of 2008 primarily includes reductions to the credit loss reserves of \$23 million related to securitizations, reductions of \$244 million related to the sale of Citigroup's German Retail Banking Operation and reductions of approximately \$500 million related to FX translation.
- (6) The second quarter of 2008 primarily includes reductions to the credit loss reserves of \$21 million related to securitizations, reductions of \$156 million related to the sale of CitiCapital and additions of \$56 million related to purchase price adjustments for the Grupo Cuscatlan acquisition.
- (7) Represents additional credit loss reserves for unfunded corporate lending commitments and letters of credit recorded *Other Liabilities* on the Consolidated Balance Sheet.
- (8) Allowance for Credit losses represents management's estimate of probable losses inherent in the portfolio. Attribution of the allowance is made for analytical purposes only, and the entire allowance is available to absorb probable credit losses inherent in the portfolio.

Table of Contents**NON-PERFORMING ASSETS (NON-ACCRUAL LOANS, OTHER REAL ESTATE OWNED AND OTHER REPOSSESSED ASSETS)**

The table below summarizes the Company's non-accrual loans. These are loans in which the borrower has fallen behind in interest payments, or for corporate loans where the Company has determined that the payment of interest or principal is doubtful, and are now considered impaired. In situations where the Company reasonably expects that only a portion of the principal and interest owed will ultimately be collected, all payments received are reflected as a reduction of principal and not as interest income.

(1)

Primarily transportation equipment, carried at lower of cost or fair value, less costs to sell.

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

There is no industry-wide definition of non-performing assets. As such, analysis against the industry is not always comparable. The table below represents the Company's view of non-performing assets. As a general rule, unsecured consumer loans are charged off at 120 days past due and credit card loans are charged off at 180 days contractually past due. Consumer loans secured with non-real-estate collateral are written down to the estimated value of the collateral, less costs to sell, at 120 days past due. Consumer real-estate secured loans are written down to the estimated value of the property, less costs to sell, when they are 180 days contractually past due. Impaired corporate loans and leases are written down to the extent that principal is judged to be uncollectible.

Note: Table may not foot or cross-foot due to roundings.

- (1) Includes net profits and losses associated with liquidations.
- (2) Reflects sales, transfers and repayment or liquidations of principal.
- (3) Consists of older-vintage, high-grade ABS CDOs.
- (4) Includes \$7 million recorded in credit costs.
- (5) A portion of the underlying securities was purchased in liquidations of CDOs and reported as *Trading account assets*. As of June 30, 2009, \$156 million relating to deals liquidated was held in the trading books.
- (6) Composed of net CDO super-senior exposures and gross lending and structuring exposures.
- (7) SFAS 157 (ASC 820-10) adjustment related to counterparty credit risk.

Edgar Filing: CITIGROUP INC - Form 10-Q

The Company had approximately \$9.6 billion in net U.S. subprime-related direct exposures in the Special Asset Pool at June 30, 2009. The exposure consisted of (a) approximately \$8.3 billion of net exposures in the super senior tranches (i.e., the most senior tranches) of CDOs, which are collateralized by asset-backed securities, derivatives on asset-backed securities, or both (ABS CDOs), and (b) approximately \$1.4 billion of exposures in its lending and structuring business.

Direct ABS CDO Super Senior Exposures

The net \$8.3 billion in ABS CDO super senior exposures as of June 30, 2009 is collateralized primarily by subprime residential mortgage-backed securities (RMBS), derivatives on RMBS, or both. These exposures include \$7.3 billion in the super senior tranches of ABS CDOs initially issued as commercial paper (ABCP) and approximately \$0.9 billion of other super senior tranches of ABS CDOs.

Citigroup's CDO super senior subprime direct exposures are Level 3 assets. The valuation of the high-grade and mezzanine ABS CDO positions uses trader prices based on the underlying assets of each high-grade and mezzanine ABS CDO. Unlike the ABCP- and CDO-squared positions, the high-grade and mezzanine positions are now largely hedged through the ABX and bond short positions, which are, by necessity, trader priced. This results in closer symmetry in the way these long and short positions are valued by the Company. Citigroup intends to use trader marks to value this portion of the portfolio going forward so long as it remains largely hedged.

The valuation of the ABCP- and CDO-squared positions are subject to valuation based on significant unobservable inputs. Fair value of these exposures is based on estimates of future cash flows from the mortgage loans underlying the assets of the ABS CDOs. To determine the performance of the underlying mortgage loan portfolios, the Company estimates the prepayments, defaults and loss severities based on a number of macroeconomic factors, including housing price changes, unemployment rates, interest rates, and borrower and loan attributes, such as age, credit scores, documentation status, loan-to-value (LTV) ratios and debt-to-income (DTI) ratios. The model is calibrated using available mortgage loan information including historical loan performance. In addition, the methodology estimates the impact of geographic concentration of mortgages and the impact of reported fraud in the origination of subprime mortgages. An appropriate discount rate is then applied to the cash flows generated for each ABCP- and CDO-squared tranche, in order to estimate its fair value under current market conditions.

When necessary, the valuation methodology used by Citigroup is refined and the inputs used for purposes of estimation are modified, in part, to reflect ongoing market developments. More specifically, the inputs of home price appreciation (HPA) assumptions and delinquency data were updated along with discount rates that are based upon a weighted average combination of implied spreads from single-name ABS bond prices and ABX indices, as well as CLO spreads under current market conditions. The housing-price changes are estimated using a forward-looking projection, which incorporated the Loan Performance Index. In addition,

Table of Contents

the Company's mortgage default model also uses recent mortgage performance data, a period of sharp home price declines and high levels of mortgage foreclosures.

The valuation as of June 30, 2009 assumes a cumulative decline in U.S. housing prices from peak to trough of 32.3%. This rate assumes declines of 10% and 3% in 2009 and 2010, respectively, the remainder of the 32.3% decline having already occurred before the end of 2008.

In addition, the discount rates were based on a weighted average combination of the implied spreads from single-name ABS bond prices, ABX indices and CLO spreads, depending on vintage and asset types. To determine the discount margin, the Company applies the mortgage default model to the bonds underlying the ABX indices and other referenced cash bonds and solves for the discount margin that produces the current market prices of those instruments.

The primary drivers that currently impact the model valuations are the discount rates used to calculate the present value of projected cash flows and projected mortgage loan performance. In valuing its direct ABCP- and CDO-squared super senior exposures, the Company has made its best estimate of the key inputs that should be used in its valuation methodology. However, the size and nature of these positions as well as current market conditions are such that changes in inputs such as the discount rates used to calculate the present value of the cash flows can have a significant impact on the reported value of these exposures. For instance, each 10 basis point change in the discount rate used generally results in an approximate \$24 million change in the fair value of the Company's direct ABCP- and CDO-squared super senior exposures as of June 30, 2009. This applies to both decreases in the discount rate (which would increase the value of these assets and decrease reported write-downs) and increases in the discount rate (which would decrease the value of these assets and increase reported write-downs).

Estimates of the fair value of the CDO super senior exposures depend on market conditions and are subject to further change over time. In addition, while Citigroup believes that the methodology used to value these exposures is reasonable, the methodology is subject to continuing refinement, including as a result of market developments. Further, any observable transactions in respect of some or all of these exposures could be employed in the fair valuation process in accordance with and in the manner called for by SFAS 157 (ASC 820-10).

Lending and Structuring Exposures

The \$1.4 billion of subprime-related exposures includes approximately \$1.0 billion of actively managed subprime loans purchased for resale or securitization at a discount to par during 2007 and approximately \$0.4 billion of financing transactions with customers secured by subprime collateral. These amounts represent the fair value as determined using observable inputs and other market data. The majority of the change from the March 31, 2009 balances reflects sales, transfers and liquidations.

The Special Asset Pool also has trading positions, both long and short, in U.S. subprime RMBS and related products, including ABS CDOs, which are not included in the figures above. The exposure from these positions is actively managed and hedged, although the effectiveness of the hedging products used may vary with material changes in market conditions.

Exposure to Commercial Real Estate

The Company, through its business activities and as a capital markets participant, incurs exposures that are directly or indirectly tied to the commercial real estate market. These exposures are represented primarily by the following three categories:

(1) *Assets held at fair value* include: \$5.1 billion, of which approximately \$4.3 billion are securities, loans and other items linked to commercial real estate (CRE) that are carried at fair value as trading account assets, \$0.1 billion of loans which are held-for-sale, and approximately \$0.7 billion which are securities backed by CRE carried at fair value as available-for-sale (AFS) investments. Changes in fair value for these trading account assets are reported in current earnings, while AFS investments are reported in OCI with other-than-temporary impairments reported in current earnings.

The majority of these exposures are classified as Level 3 in the fair-value hierarchy. Weakening activity in the trading markets for some of these instruments resulted in reduced liquidity, thereby decreasing the observable inputs for such valuations, and could have an adverse impact on how these instruments are valued in the future if such conditions persist.

(2) *Assets held at amortized cost* include approximately \$2.0 billion of securities classified as held-to-maturity (HTM) and \$24.0 billion of loans and commitments. The HTM securities were classified as such during the fourth quarter of 2008 and were previously classified as either trading or AFS. They are accounted for at amortized cost, subject to other-than-temporary impairment. Loans and commitments are recorded at amortized cost, less loan loss reserves. The impact from changes in credit is reflected in the calculation of the allowance for loan losses and in net credit losses.

Edgar Filing: CITIGROUP INC - Form 10-Q

(3) *Equity and other investments* include approximately \$4.5 billion of equity and other investments such as limited partner fund investments which are accounted for under the equity method, which recognizes gains or losses based on the investor's share of the net income of the investee.

Table of Contents**Direct Exposure to Monolines**

Through Citi Holdings Special Asset Pool, the Company has exposure to various monoline bond insurers (Monolines), listed in the table below, from hedges on certain investments and from trading positions. The hedges are composed of credit default swaps and other hedge instruments. The Company recorded a reduction of \$157 million CVA related to exposure to Monolines during the second quarter of 2009, bringing the total CVA balance to \$5.2 billion.

The following table summarizes the market value of the Company's direct exposures to and the corresponding notional amounts of transactions with the various Monolines as well as the aggregate credit valuation adjustment associated with these exposures as of June 30, 2009 and March 31, 2009.

<i>In millions of dollars</i>	June 30, 2009		March 31, 2009	
	Fair-value exposure	Notional amount of transactions	Fair-value exposure	Notional amount of transactions
Direct subprime ABS CDO super senior Ambac	\$ 4,525	\$ 5,328	\$ 4,649	\$ 5,352
Trading assets non-subprime:				
MBIA	\$ 2,123	\$ 3,868	\$ 2,209	\$ 4,567
FSA	128	1,108	294	1,119
Assured	126	466	147	454
Radian	19	150	39	150
Ambac		407	19	821
Subtotal trading assets non-subprime	\$ 2,396	\$ 5,999	\$ 2,708	\$ 7,111
Total gross fair-value direct exposure	\$ 6,921		\$ 7,357	
Credit valuation adjustment	(5,213)		(5,370)	
Total net fair-value direct exposure	\$ 1,708		\$ 1,987	

The fair-value exposure, net of payable and receivable positions, represents the market value of the contract as of June 30, 2009 and March 31, 2009, respectively, excluding the CVA. The notional amount of the transactions, including both long and short positions, is used as a reference value to calculate payments. The CVA is a downward adjustment to the fair-value exposure to a counterparty to reflect the counterparty's creditworthiness in respect of the obligations in question.

Credit valuation adjustments are based on credit spreads and on estimates of the terms and timing of the payment obligations of the Monolines. Timing in turn depends on estimates of the performance of the transactions to which the Company's exposure relates, estimates of whether and when liquidation of such transactions may occur and other factors, each considered in the context of the terms of the Monolines' obligations.

As of June 30, 2009 and March 31, 2009, the Company had \$6.3 billion and \$6.6 billion, respectively, in notional amount of hedges against its direct subprime ABS CDO super senior positions. Of those amounts, \$5.3 billion and \$5.4 billion, respectively, were purchased from Monolines and are included in the notional amount of transactions in the table above.

With respect to Citi's trading assets, there were \$2.4 billion and \$2.7 billion of fair-value exposure to Monolines as of June 30, 2009 and March 31, 2009, respectively. Trading assets include trading positions, both long and short, in U.S. subprime RMBS and related products, including ABS CDOs.

The notional amount of transactions related to the remaining non-subprime trading assets as of June 30, 2009 was \$6.0 billion. The \$6.0 billion notional amount of transactions comprised \$955 million primarily in interest-rate swaps with a corresponding fair value exposure of \$2.1 million net payable. The remaining notional amount of \$5.0 billion was in the form of credit default swaps and total return swaps with a fair value exposure of \$2.4 billion.

The notional amount of transactions related to the remaining non-subprime trading assets at March 31, 2009 was \$7.1 billion with a corresponding fair value exposure of \$2.7 billion. The \$7.1 billion notional amount of transactions comprised \$2.1 billion primarily in

Edgar Filing: CITIGROUP INC - Form 10-Q

interest-rate swaps with a corresponding fair value exposure of \$10 million. The remaining notional amount of \$5.0 billion was in the form of credit default swaps and total return swaps with a fair value of \$2.7 billion.

The Company has purchased mortgage insurance from various monoline mortgage insurers on first mortgage loans. The notional amount of this insurance protection was approximately \$316 million and \$300 million as of June 30, 2009 and March 31, 2009, respectively, with nominal pending claims against this notional amount.

In addition, Citigroup has indirect exposure to Monolines in various other parts of its businesses. Indirect exposure includes circumstances in which the Company is not a contractual counterparty to the Monolines, but instead owns securities which may benefit from embedded credit enhancements provided by a Monoline. For example, corporate or municipal bonds in the trading business may be insured by the Monolines. The previous table does not capture this type of indirect exposure to the Monolines.

Table of Contents

Highly Leveraged Financing Transactions

Highly leveraged financing commitments are agreements that provide funding to a borrower with higher levels of debt (measured by the ratio of debt capital to equity capital of the borrower) than is generally the case for other companies. In recent years through mid-2008, highly leveraged financing had been commonly employed in corporate acquisitions, management buy-outs and similar transactions.

In these financings, debt service (that is, principal and interest payments) absorbs a significant portion of the cash flows generated by the borrower's business. Consequently, the risk that the borrower may not be able to meet its debt obligations is greater. Due to this risk, the interest rates and fees charged for this type of financing are generally higher than for other types of financing.

Prior to funding, highly leveraged financing commitments are assessed for impairment in accordance with SFAS 5 (ASC 450-20-25), and losses are recorded when they are probable and reasonably estimable. For the portion of loan commitments that relates to loans that will be held for investment, loss estimates are made based on the borrower's ability to repay the facility according to its contractual terms. For the portion of loan commitments that relates to loans that will be held-for-sale, loss estimates are made in reference to current conditions in the resale market (both interest rate risk and credit risk are considered in the estimate). Loan origination, commitment, underwriting and other fees are netted against any recorded losses.

Citigroup generally manages the risk associated with highly leveraged financings it has entered into by seeking to sell a majority of its exposures to the market prior to or shortly after funding. In certain cases, all or a portion of a highly leveraged financing to be retained is hedged with credit derivatives or other hedging instruments. Thus, when a highly leveraged financing is funded, Citigroup records the resulting loan as follows:

the portion that Citigroup will seek to sell is recorded as a loan held-for-sale in *Other assets* on the Consolidated Balance Sheet, and measured at the lower of cost or market (LOCOM); and

the portion that will be retained is recorded as a loan held-for-investment in *Loans* and measured at amortized cost less a reserve for loan losses.

Due to the dislocation of the credit markets and the reduced market interest in higher-risk/higher-yield instruments since the latter half of 2007, liquidity in the market for highly leveraged financings has been limited. This has resulted in the Company's recording pretax write-downs on funded and unfunded highly leveraged finance exposures of \$237 million in the second quarter of 2009, bringing the cumulative write-downs for the first half of 2009 to \$484 million.

Citigroup's exposures to highly leveraged financing commitments totaled \$8.5 billion at June 30, 2009 (\$8.1 billion funded and \$0.4 billion in unfunded commitments), reflecting a decrease of \$1.0 billion from March 31, 2009.

In 2008, the Company completed the transfer of approximately \$12.0 billion of loans to third parties, of which \$8.5 billion relates to highly leveraged loan commitments. In these transactions, the third parties purchased subordinate interests backed by the transferred loans. These subordinate interests absorb first loss on the transferred loans and provide the third parties with control of the loans. The Company retained senior debt securities backed by the transferred loans. These transactions were accounted for as sales of the transferred loans. The loans were removed from the balance sheet and the retained securities are classified as AFS securities on the Company's Consolidated Balance Sheet.

In addition, the Company purchased protection on the senior debt securities from the third-party subordinate interest holders via total return swaps (TRS). The counterparty credit risk in the TRS is protected through margin agreements that provide for both initial margin and additional margin at specified triggers. Due to the initial cash margin received, the existing margin requirements on the TRS, and the substantive subordinate investments made by third parties, the Company believes that the transactions largely mitigate the Company's risk related to the transferred loans.

The Company's sole remaining exposure to the transferred loans are the senior debt securities, which have an amortized cost basis of \$6.7 billion and fair value of \$6.3 billion at June 30, 2009, and the receivables under the TRS, which have a fair value of \$0.4 billion at June 30, 2009. The change in the value of the retained senior debt securities that are classified as AFS securities are recorded in AOCI as they are deemed temporary. The offsetting change in the TRS are recorded as cash flow hedges within AOCI. See Note 14 to the Consolidated Financial Statements for additional information.

Table of Contents**DERIVATIVES**

Presented below are the notional and the mark-to-market receivables and payables for Citigroup's derivative exposures as of June 30, 2009 and December 31, 2008:

Notionals(1)

<i>In millions of dollars</i>	Trading derivatives(2)(3)		Non-trading Derivatives(3)	
	June 30, 2009	December 31, 2008	June 30, 2009	December 31, 2008

Total	\$ 11,615	\$ 17,163	\$ 11,025	\$ 11,488

- (1) Includes the notional amounts for long and short derivative positions. The notional amounts are presented based on the derivatives classification on the Consolidated Balance Sheet.
- (2) Trading Derivatives include proprietary positions, as well as hedging derivatives instruments that do not qualify for hedge accounting in accordance with SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities" (SFAS 133/ASC 815).
- (3) Reclassified to conform to the current period's presentation.
- (4) Credit Derivatives are arrangements designed to allow one party (the "beneficiary") to transfer the credit risk of a "reference asset" to another party (the "guarantor"). These arrangements allow a guarantor to assume the credit risk associated with the reference assets without directly purchasing it. The Company has entered into credit derivatives positions for purposes such as risk management, yield enhancement, reduction of credit concentrations, and diversification of overall risk.

Fair Valuation Adjustments for Derivatives

The fair value adjustments applied by the Company to its derivative carrying values consist of the following items:

Liquidity adjustments are applied to items in Level 2 or Level 3 of the fair-value hierarchy (see Note 17 to the Consolidated Financial Statements) to ensure that the fair value reflects the price at which the entire position could be liquidated. The liquidity reserve is based on the bid/offer spread for an instrument, adjusted to take into account the size of the position.

Credit valuation adjustments (CVA) are applied to over-the-counter derivative instruments, in which the base valuation generally discounts expected cash flows using LIBOR interest rate curves. Because not all counterparties have the same credit risk as that implied by the relevant LIBOR curve, a CVA is necessary to incorporate the market view of both counterparty credit risk and the Company's own credit risk in the valuation.

The Company's CVA methodology comprises two steps. First, the exposure profile for each counterparty is determined using the terms of all individual derivative positions and a Monte Carlo simulation or other quantitative analysis to generate a series of expected cash flows at future points in time. The calculation of this exposure profile considers the effect of credit risk mitigants, including pledged cash or other collateral and any legal right of offset that exists with a counterparty through arrangements such as netting agreements. Individual derivative contracts that are subject to an enforceable master netting agreement with a counterparty are aggregated for this purpose, since it is those aggregate net cash flows that are subject to nonperformance risk. This process identifies specific, point in time future cash flows that are subject to nonperformance risk, rather than using the current recognized net asset or liability as a basis to measure the CVA. Second, market-based views of default probabilities derived from observed credit spreads in the credit default swap market, are applied to the expected future cash flows determined in step one. Own-credit CVA is determined using Citi-specific CDS spreads for the relevant tenor. Generally, counterparty CVA is determined using CDS spread indices for each credit rating and tenor. For certain identified facilities where individual analysis is practicable (for example, exposures to monoline counterparties) counterparty-specific CDS spreads are used.

The CVA adjustment is designed to incorporate a market view of the credit risk inherent in the derivative portfolio as required by SFAS 157 (ASC 820-10). However, most derivative instruments are negotiated bilateral contracts and are not commonly transferred to third parties. Derivative instruments are normally settled contractually, or if terminated early, are terminated at a value negotiated bilaterally between the counterparties. Therefore, the CVA (both counterparty and own-credit) may not be realized upon a settlement or termination in the normal course of business. In addition, all or a portion of the credit valuation adjustments may be reversed or otherwise adjusted in future periods in the event of changes in the credit risk of Citi or its counterparties, or changes in the credit mitigants (collateral and netting agreements) associated with the derivative instruments. Historically, Citigroup's credit spreads have moved in tandem

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

with general counterparty credit spreads, thus providing offsetting CVAs affecting revenue. However, in the first quarter of 2009, Citigroup's credit spreads widened and counterparty credit spreads generally narrowed, each of which positively affected revenues.

The table below summarizes pretax gains (losses) related to changes in CVAs on derivative instruments for the quarters ended June 30, 2009 and 2008:

<i>In millions of dollars</i>	Credit valuation adjustment gain (loss)	
	2009	2008
Non-monoline counterparties	\$ 4,381	\$ 405
Citigroup (own)	(2,980)	(299)
Net non-monoline CVA	\$ 1,401	\$ 106
Monoline counterparties	157	(2,428)
Total CVA derivative instruments	\$ 1,558	\$ (2,322)

The table below summarizes pretax gains (losses) related to changes in CVAs on derivative instruments for the six months ended June 30, 2009 and 2008:

<i>In millions of dollars</i>	Credit valuation adjustment gain (loss)	
	2009	2008
Non-monoline counterparties	\$ 4,533	\$ (1,385)
Citigroup (own)	(357)	1,214
Net non-monoline CVA	\$ 4,176	\$ (171)
Monoline counterparties	(934)	(3,919)
Total CVA derivative instruments	\$ 3,242	\$ (4,090)

The table below summarizes the CVA applied to the fair value of derivative instruments as of June 30, 2009 and December 31, 2008.

<i>In millions of dollars</i>	Credit valuation adjustment Contra liability (contra asset)	
	June 30, 2009	December 31, 2008
Non-monoline counterparties	\$ (3,733)	\$ (8,266)
Citigroup (own)	3,289	3,611
Net non-monoline CVA	\$ (444)	\$ (4,655)
Monoline counterparties	(5,213)	(4,279)
Total CVA derivative instruments	\$ (5,657)	\$ (8,934)

The CVA amounts shown above relate solely to the derivative portfolio, and do not include:

Own-credit adjustments for non-derivative liabilities measured at fair value under the fair-value option. See Note 17 to the Consolidated Financial Statements for further information.

The effect of counterparty credit risk embedded in non-derivative instruments. General spread widening has negatively affected the market value of a range of financial instruments. Losses on non-derivative instruments, such as bonds and loans,

related to counterparty credit risk are not included in the table above.

Credit Derivatives

The Company makes markets in and trades a range of credit derivatives, both on behalf of clients as well as for its own account. Through these contracts the Company either purchases or writes protection on either a single-name or portfolio basis. The Company uses credit derivatives to help mitigate credit risk in its corporate loan portfolio and other cash positions, to take proprietary trading positions, and to facilitate client transactions.

Credit derivatives generally require that the seller of credit protection make payments to the buyer upon the occurrence of pre-defined events (settlement triggers). These settlement triggers are defined by the form of the derivative and the referenced credit and are generally limited to the market standard of failure to pay on indebtedness and bankruptcy of the reference credit and, in a more limited range of transactions, debt restructuring. Credit derivative transactions referring to emerging market reference credits will also typically include additional settlement triggers to cover the acceleration of indebtedness and the risk of repudiation or a payment moratorium. In certain transactions on a portfolio of referenced credits or asset-backed securities, the seller of protection may not be required to make payment until a specified amount of losses has occurred with respect to the portfolio and/or may only be required to pay for losses up to a specified amount.

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

The following tables summarize the key characteristics of the Company's credit derivative portfolio by activity, counterparty and derivative form as of June 30, 2009 and December 31, 2008:

June 30, 2009:

<i>In millions of dollars</i>	Fair values		Notionals	
	Receivable	Payable	Beneficiary	Guarantor
By Activity:

(1)

Reclassified to conform to the current period's presentation.

The fair values shown are prior to the application of any netting agreements, cash collateral, and market or credit value adjustments.

The Company actively participates in trading a variety of credit derivatives products as both an active two-way market-maker for clients and to manage credit risk. The majority of this activity was transacted with other financial intermediaries, including both banks and broker-dealers. The Company generally has a mismatch between the total notional amounts of protection purchased and sold and it may hold the reference assets directly, rather than entering into offsetting credit derivative contracts as and when desired. The open risk exposures from credit derivative contracts are largely matched after certain cash positions in reference assets are considered and after notional amounts are adjusted, either to a duration-based equivalent basis or to reflect the level of subordination in tranching structures.

The Company actively monitors its counterparty credit risk in credit derivative contracts. Approximately 88% of the gross receivables as of June 30, 2009 are from counterparties with which the Company maintains collateral agreements. A majority of the Company's top 15 counterparties (by receivable balance owed to the Company) are banks, financial institutions or other dealers. Contracts with these counterparties do not include ratings-based termination events. However, counterparty rating downgrades may have an incremental effect by lowering the threshold at which the Company may call for additional collateral. A number of the remaining significant counterparties are monolines.

Table of Contents**MARKET RISK MANAGEMENT PROCESS**

Market risk encompasses liquidity risk and price risk, both of which arise in the normal course of business of a global financial intermediary. Liquidity risk is the risk that an entity may be unable to meet a financial commitment to a customer, creditor, or investor when due. Liquidity risk is discussed in "Capital Resources and Liquidity" below. Price risk is the earnings risk from changes in interest rates, foreign exchange rates, equity and commodity prices, and in their implied volatilities. Price risk arises in non-trading portfolios, as well as in trading portfolios.

Interest Rate Exposure

The exposures in the following table represent the approximate annualized risk to Net Interest Revenue (NIR) assuming an unanticipated parallel instantaneous 100bp change, as well as a more gradual 100bp (25bps per quarter) parallel change in rates as compared with the market forward interest rates in selected currencies.

<i>In millions of dollars</i>	June 30, 2009		March 31, 2009		June 30, 2008	
	Increase	Decrease	Increase	Decrease	Increase	Decrease
U.S. dollar						
Instantaneous change	\$ (1,767)	\$ 1,935	\$ (1,654)	\$ 1,543	\$ (1,236)	\$ 1,170
Gradual change	\$ (1,005)	\$ 936	\$ (888)	\$ 660	\$ (756)	\$ 633
Mexican peso						
Instantaneous change	\$ (21)	\$ 21	\$ (20)	\$ 20	\$ (24)	\$ 24
Gradual change	\$ (15)	\$ 15	\$ (14)	\$ 14	\$ (19)	\$ 19
Euro						
Instantaneous change	\$ (29)	\$ 21	\$ 11	\$ (12)	\$ (71)	\$ 71
Gradual change	\$ (35)	\$ 35	\$ 12	\$ (12)	\$ (51)	\$ 51
Japanese yen						
Instantaneous change	\$ 215	NM	\$ 195	NM	\$ 131	NM
Gradual change	\$ 122	NM	\$ 122	NM	\$ 73	NM
Pound sterling						
Instantaneous change	\$ (11)	\$ 11	\$ 1	\$ (5)	\$ 13	\$ (13)
Gradual change	\$ (14)	\$ 14	\$ (1)	\$ 1	\$ 15	\$ (15)

NM Not meaningful. A 100 basis point decrease in interest rates would imply negative rates for the Japanese yen yield curve.

The changes in the U.S. dollar interest rate exposures from March 31, 2009 to June 30, 2009 are related to customer-related asset and liability mix, the impact of the Morgan Stanley Smith Barney joint venture, as well as Citigroup's view of prevailing interest rates.

The following table shows the risk to NIR from six different changes in the implied forward rates. Each scenario assumes that the rate change will occur on a gradual basis every three months over the course of one year.

	Scenario 1	Scenario 2	Scenario 3	Scenario 4	Scenario 5	Scenario 6
Overnight rate change (bp)		100	200	(200)	(100)	
10-year rate change (bp)	(100)		100	(100)		100
Impact to net interest revenue (in millions of dollars)	\$ 1	\$ (853)	\$ (1,711)	\$ 686	\$ 812	\$ (89)

Table of Contents**Value at Risk**

For Citigroup's major trading centers, the aggregate pretax value at risk (VAR) in the trading portfolios was \$277 million, \$292 million, and \$255 million at June 30, 2009, March 31, 2009, and June 30, 2008, respectively. Daily exposures averaged \$260 million during the second quarter of 2009 and ranged from \$224 million to \$290 million. The following table summarizes VAR to Citigroup trading portfolios at June 30, 2009, March 31, 2009, and June 30, 2008, including the total VAR, the specific risk only component of VAR, and general market factors only VAR, along with the quarterly averages:

<i>In million of dollars</i>	June 30, 2009	Second Quarter 2009 Average	March 31, 2009	First Quarter 2009 Average	June 30, 2008	Second Quarter 2008 Average
Interest rate	\$ 226	\$ 217	\$ 239	\$ 272	\$ 288	\$ 301
Foreign exchange	84	61	38	73	47	49
Equity	65	94	144	97	95	79
Commodity	36	38	34	22	45	51
Diversification benefit	(134)	(150)	(163)	(173)	(220)	(188)
Total All market risk factors, including general and specific risk	\$ 277	\$ 260	\$ 292	\$ 291	\$ 255	\$ 292
Specific risk only component	\$ 18	\$ 20	\$ 14	\$ 19	\$ 15	\$ 7
Total General market factors only	\$ 259	\$ 240	\$ 278	\$ 272	\$ 240	\$ 285

The specific risk only component represents the level of equity and debt issuer-specific risk embedded in VAR. Citigroup's specific risk model conforms to the 4x-multiplier treatment and is subject to extensive annual hypothetical back-testing.

The table below provides the range of VAR in each type of trading portfolio that was experienced during the quarters ended:

<i>In millions of dollars</i>	June 30, 2009		March 31, 2009		June 30, 2008	
	Low	High	Low	High	Low	High
Interest rate	\$ 193	\$ 240	\$ 209	\$ 320	\$ 268	\$ 339
Foreign exchange	31	91	29	140	33	81
Equity	50	153	47	167	63	181
Commodity	26	50	12	34	40	60

Table of Contents

OPERATIONAL RISK MANAGEMENT PROCESS

Operational risk is the risk of loss resulting from inadequate or failed internal processes, systems or human factors, or from external events. It includes the reputation and franchise risk associated with business practices or market conduct in which the Company is involved. Operational risk is inherent in Citigroup's global business activities and, as with other risk types, is managed through an overall framework designed to balance strong corporate oversight with well-defined independent risk management. This framework includes:

recognized ownership of the risk by the businesses;

oversight by independent risk management; and

independent review by Audit and Risk Review (ARR).

The goal is to keep operational risk at appropriate levels relative to the characteristics of our businesses, the markets in which we operate, our capital and liquidity, and the competitive, economic and regulatory environment. Notwithstanding these controls, Citigroup incurs operational losses.

Framework

To monitor, mitigate and control operational risk, Citigroup maintains a system of comprehensive policies and has established a consistent, value-added framework for assessing and communicating operational risk and the overall effectiveness of the internal control environment across Citigroup. An Operational Risk Council has been established to provide oversight for operational risk across Citigroup. The Council's membership includes senior members of the Chief Risk Officer's organization covering multiple dimensions of risk management with representatives of the Business and Regional Chief Risk Officers' organizations and the Business Management Group. The Council's focus is on further advancing operational risk management at Citigroup with focus on proactive identification and mitigation of operational risk and related incidents. The Council works with the business segments and the control functions to help ensure a transparent, consistent and comprehensive framework for managing operational risk globally.

Each major business segment must implement an operational risk process consistent with the requirements of this framework. The process for operational risk management includes the following steps:

identify and assess key operational risks;

establish key risk indicators;

produce a comprehensive operational risk report; and

prioritize and assure adequate resources to actively improve the operational risk environment and mitigate emerging risks.

The operational risk standards facilitate the effective communication and mitigation of operational risk both within and across businesses. As new products and business activities are developed, processes are designed, modified or sourced through alternative means and operational risks are considered. Information about the businesses' operational risk, historical losses, and the control environment is reported by each major business segment and functional area, and summarized for senior management and the Citigroup Board of Directors.

Table of Contents

Measurement and Basel II

To support advanced capital modeling and management, the businesses are required to capture relevant operational risk capital information. An enhanced version of the risk capital model for operational risk has been developed and implemented across the major business segments as a step toward readiness for Basel II capital calculations. The risk capital calculation is designed to qualify as an "Advanced Measurement Approach" under Basel II. It uses a combination of internal and external loss data to support statistical modeling of capital requirement estimates, which are then adjusted to reflect qualitative data regarding the operational risk and control environment.

Information Security and Continuity of Business

Information security and the protection of confidential and sensitive customer data are a priority of Citigroup. The Company has implemented an Information Security Program that complies with the Gramm-Leach-Bliley Act and other regulatory guidance. The Information Security Program is reviewed and enhanced periodically to address emerging threats to customers' information.

The Corporate Office of Business Continuity, with the support of senior management, continues to coordinate global preparedness and mitigate business continuity risks by reviewing and testing recovery procedures.

Table of Contents**COUNTRY AND CROSS-BORDER RISK**

The table below shows all countries where total Federal Financial Institutions Examination Council (FFIEC) cross-border outstandings exceed 0.75% of total Citigroup assets:

	June 30, 2009					December 31, 2008				
	Cross-Border Claims on Third Parties					Total Cross-Border				
<i>In billions of U.S. dollars</i>	Banks	Public	Private	Total	Trading and Short-Term Claims(1)	Investments in and Funding of Local Franchises	Total Cross-Border Outstandings	Commitments(2)	Outstandings	Commitments(2)

(1) Reclassified to conform to the current period's presentation and to exclude discontinued operations.

(2) Excludes taxable equivalent adjustment (based on the U.S. Federal statutory tax rate of 35%) of \$82 million, \$97 million, and \$65 million for the second quarter of 2009, the first quarter of 2009, and the second quarter of 2008, respectively.

(3) Excludes expenses associated with hybrid financial instruments and beneficial interest in consolidated VIEs. These obligations are classified as *Long-term debt* and accounted for at fair value with changes recorded in *Principal transactions*.

Edgar Filing: CITIGROUP INC - Form 10-Q

A significant portion of the Company's business activities are based upon gathering deposits and borrowing money and then lending or investing those funds, including market-making activities in tradable securities. Net interest margin (NIM) is calculated by dividing annualized gross interest revenue less gross interest expense by average interest earning assets.

During the second quarter of 2009, the yields across both the interest earning assets as well as the interest earning liabilities dropped significantly from the same period in 2008. The lower cost of funds compared to prior year more than offset the lower asset yields, resulting in slightly higher NIM.

Net interest margin decreased compared to the first quarter of 2009, driven mainly by lower yields on the consumer loan portfolio both domestically as well as internationally. The second quarter of 2009 NIM also includes the one-time FDIC special assessment of \$333 million, which negatively impacted NIM by 8bps. This charge was included in interest expense on deposits.

- (1) Interest revenue the taxable equivalent adjustments (based on the U.S. federal statutory tax rate of 35%) of \$179 million and \$133 million for the first six months of 2009 and 2008, respectively.
- (2) Interest rates and amounts include the effects of risk management activities associated with the respective asset and liability categories.
- (3) Monthly or quarterly averages have been used by certain subsidiaries where daily averages are unavailable.
- (4) Detailed average volume, interest revenue and interest expense exclude discontinued operations.
- (5) Savings deposits consist of Insured Money Market Rate accounts, NOW accounts, and other savings deposits. The second quarter of 2009 interest expense includes the one-time FDIC special assessment of \$333 million.
- (6) Average rates reflect prevailing local interest rates, including inflationary effects and monetary corrections in certain countries.
- (7) Average volumes of securities loaned or sold under agreements to repurchase are reported net pursuant to FIN 41(ASC 210-20-45) and interest expense excludes the impact of FIN 41(ASC 210-20-45).
- (8) The fair value carrying amounts of derivative and foreign exchange contracts are reported in non-interest-earning assets and other non-interest bearing liabilities.
- (9) Interest expense on *Trading account liabilities* of the ICG is reported as a reduction of Interest revenue. Interest revenue and interest expense on cash collateral positions are reported in *Trading account assets* and *Trading account liabilities*, respectively.
- (10) Excludes hybrid financial instruments and beneficial interests in consolidated VIEs that are classified as long-term debt as these obligations are accounted for at fair value with changes recorded in Principal Transactions. In addition, the majority of the funding provided by Corporate Treasury to CitiCapital is excluded from this line.
- (11) Includes stockholders' equity from discontinued operations.
- (12) Includes allocations for capital and funding costs based on the location of the asset.

Reclassified to conform to the current period's presentation.

Table of Contents

CAPITAL RESOURCES AND LIQUIDITY

CAPITAL RESOURCES

Overview

Capital is generally generated by earnings from operating businesses. This is augmented through issuances of common stock, convertible preferred stock, preferred stock, subordinated debt underlying trust preferred securities, and equity issued through awards under employee benefit plans. Capital is used primarily to support assets in the Company's businesses and to absorb expected and unexpected market, credit, or operational losses. The Company's potential further uses of capital, particularly to pay dividends and repurchase common stock, became severely restricted during the latter half of 2008 and during 2009, to date, as explained more fully in the Company's 2008 Annual Report on Form 10-K, its Quarterly Report on Form 10-Q for the quarter ended March 31, 2009, and as discussed in this MD&A.

Citigroup's capital management framework is designed to ensure that Citigroup and its principal subsidiaries maintain sufficient capital consistent with the Company's risk profile, all applicable regulatory standards and guidelines, and external rating agency considerations. The capital management process is centrally overseen by senior management and is reviewed at the consolidated, legal entity, and country level.

Senior management oversees the capital management process of Citigroup and its principal subsidiaries mainly through Citigroup's Finance and Asset and Liability Committee (FinALCO). The Committee is composed of the senior-most management of Citigroup for the purpose of engaging management in decision-making and related discussions on capital and liquidity matters. Among other things, the Committee's responsibilities include: determining the financial structure of Citigroup and its principal subsidiaries; ensuring that Citigroup and its regulated entities are adequately capitalized; determining appropriate asset levels and return hurdles for Citigroup and individual businesses; reviewing the funding and capital markets plan for Citigroup; and monitoring interest-rate risk, corporate and bank liquidity and the impact of currency translation on non-U.S. earnings and capital.

Certain of the capital measures discussed in this section, including Tier 1 Common, Tangible Common Equity (TCE) and related ratios, are non-GAAP financial measures. See "Components of Capital Under Regulatory Guidelines" and "Tangible Common Equity" below for additional information on these measures, including a reconciliation of these measures to the most directly comparable GAAP measures.

Exchange Offers

Upon completion of the public and private exchange offers (see "Events in 2009 Public and Private Exchange Offers" above), an aggregate of approximately \$58 billion in aggregate liquidation value of outstanding preferred stock and trust preferred securities, including an aggregate \$25 billion liquidation value of preferred stock held by the UST, was exchanged for Citigroup common stock and/or interim securities convertible into Citi common stock. In addition, an additional approximately \$27.1 billion in aggregate liquidation value of preferred stock held by the USG was exchanged for newly issued 8% trust preferred securities. As a result of these exchanges, Citigroup's Tier 1 Common will increase by approximately \$64 billion and its Tier 1 Common ratio will increase to approximately 9%, each based on June 30, 2009 levels. In addition, the Company's TCE will increase by approximately \$60 billion to approximately \$100 billion. See "Events in 2009 Public and Private Exchange Offers" and "Subsequent Events" above for an additional discussion of the capital impact of the exchange offers on Citi.

Future business results of the Company, including events such as corporate dispositions, will continue to affect the Company's capital levels. Moreover, changes that the FASB has adopted regarding off-balance sheet assets, consolidation and sale treatment will have an incremental impact on Citi's capital ratios. For more information on this, see Note 1 "Future Application of Accounting Standards" and Note 15 to the Consolidated Financial Statements, including "Funding, Liquidity Facilities and Subordinate Interests."

Table of Contents**Capital Ratios**

Citigroup is subject to risk-based capital guidelines issued by the Federal Reserve Board (FRB). Capital adequacy is measured, in part, based on two risk-based capital ratios, the Tier 1 and Total Capital (Tier 1 + Tier 2 Capital) ratios. Tier 1 Capital consists of core capital, while Total Capital also includes other items such as subordinated debt and allowance for credit losses. Both measures of capital adequacy are stated as a percentage of risk-weighted assets.

Citigroup's risk-weighted assets are principally derived from application of the risk-based capital guidelines related to the measurement of credit risk, under which on-balance sheet assets and the credit equivalent amount of certain off-balance sheet exposures (such as financial guarantees, unfunded lending commitments, letters of credit, and derivatives) are assigned to one of several prescribed risk weight categories based upon the perceived credit risk associated with the obligor, or if relevant, the guarantor, the nature of the collateral, or external credit ratings. Risk-weighted assets also incorporate a measure for market risk on covered trading account positions, and all foreign exchange and commodity positions whether or not carried in the trading account. Excluded from risk-weighted assets are any assets, such as goodwill and deferred tax assets, to the extent required to be deducted from regulatory capital.

Citigroup is also subject to a Leverage ratio requirement, a non-risk-based measure of capital adequacy, which is defined as Tier 1 Capital as a percentage of quarterly adjusted average total assets.

To be "well capitalized" under federal bank regulatory agency definitions, a bank holding company must have a Tier 1 Capital ratio of at least 6%, a Total Capital ratio of at least 10%, and a Leverage Ratio of at least 3%, and not be subject to an FRB directive to maintain higher capital levels. As noted in the table below, Citigroup was "well capitalized" under these federal bank regulatory agency definitions as of June 30, 2009 and December 31, 2008.

In addition, in conjunction with the conclusion of the Supervisory Capital Assessment Program (SCAP), the results of which were released by the USG on May 7, 2009, the banking regulators developed a new measure of capital called Tier 1 Common defined as Tier 1 Capital less non-common elements including qualifying perpetual preferred stock, qualifying noncontrolling interests in subsidiaries and qualifying mandatorily redeemable securities of subsidiary trusts.

The following table sets forth Citigroup's regulatory capital ratios as of June 30, 2009 and December 31, 2008.

Citigroup Regulatory Capital Ratios

	Jun. 30, 2009	Dec. 31, 2008
Tier 1 Common	2.75%	2.30%
Tier 1 Capital	12.74	11.92
Total Capital (Tier 1 and Tier 2)	16.62	15.70
Leverage(1)	6.92	6.08

(1) Tier 1 Capital divided by each period's quarterly adjusted average total assets.

Table of Contents**Components of Capital Under Regulatory Guidelines**

<i>In millions of dollars</i>	Jun. 30, 2009	Dec. 31, 2008(1)
Tier 1 Common

Less: Pension liability adjustment, net of tax(3)	(2,611)	(2,615)
Less: Cumulative effect included in fair value of financial liabilities attributable to the change in own credit worthiness, net of tax(4)	2,496	3,391
Less: Disallowed deferred tax assets(5)	24,448	23,520
Less: Intangible assets:		
Goodwill(6)	26,111	27,132
Other disallowed intangible assets(6)	10,023	10,607
Other	(893)	(840)
Total Tier 1 Common	\$ 27,361	\$ 22,927
Qualifying perpetual preferred stock	\$ 74,301	\$ 70,664
Qualifying mandatorily redeemable securities of subsidiary trusts	24,034	23,899
Qualifying noncontrolling interests	1,082	1,268
Total Tier 1 Capital	\$ 126,778	\$ 118,758
Tier 2 Capital		
Allowance for credit losses(7)	\$ 12,769	\$ 12,806
Qualifying subordinated debt(8)	25,208	24,791
Net unrealized pretax gains on available-for-sale equity securities(2)	669	43
Total Tier 2 Capital	\$ 38,646	\$ 37,640
Total Capital (Tier 1 and Tier 2)	\$ 165,424	\$ 156,398
Risk-Weighted Assets(9)	\$ 995,414	\$ 996,247

(1) Reclassified to conform to the current period presentation.

(2) Tier 1 Capital excludes net unrealized gains (losses) on available-for-sale debt securities and net unrealized gains on available-for-sale equity securities with readily determinable fair values, in accordance with risk-based capital guidelines. In arriving at Tier 1 Capital, banking organizations are required to deduct net unrealized losses on available-for-sale equity securities with readily determinable fair values, net of tax. Banking organizations are permitted to include in Tier 2 Capital up to 45% of pretax net unrealized gains on available-for-sale equity securities with readily determinable fair values.

(3) The FRB granted interim capital relief for the impact of adopting SFAS 158 (ASC 715-20-65).

(4) The impact of including Citigroup's own credit rating in valuing liabilities for which the fair value option has been elected is excluded from Tier 1 Capital, in accordance with risk-based capital guidelines.

(5)

Edgar Filing: CITIGROUP INC - Form 10-Q

Of the Company's approximately \$42 billion of net deferred tax assets at June 30, 2009, approximately \$13 billion of such assets were includable without limitation in regulatory capital pursuant to risk-based capital guidelines, while approximately \$24 billion of such assets exceeded the limitation imposed by these guidelines and, as "disallowed deferred tax assets," were deducted in arriving at Tier 1 Capital. The Company's other approximately \$5 billion of net deferred tax assets at June 30, 2009 primarily represented the deferred tax effects of unrealized gains and losses on available-for-sale debt securities, which are permitted to be excluded prior to deriving the amount of net deferred tax assets subject to limitation under the guidelines. The Company had approximately \$24 billion of disallowed deferred tax assets at December 31, 2008.

- (6) Includes goodwill/intangible assets of discontinued operations held for sale.
- (7) Includable up to 1.25% of risk-weighted assets. Any excess allowance is deducted in arriving at risk-weighted assets.
- (8) Includes qualifying subordinated debt in an amount not exceeding 50% of Tier 1 Capital.
- (9) Includes risk-weighted credit equivalent amounts, net of applicable bilateral netting agreements, of \$76.9 billion for interest rate, commodity, and equity derivative contracts, foreign-exchange contracts, and credit derivatives as of June 30, 2009, compared with \$102.9 billion as of December 31, 2008. Market-risk-equivalent assets included in risk-weighted assets amounted to \$78.2 billion at June 30, 2009 and \$101.8 billion at December 31, 2008. Risk-weighted assets also include the effect of certain other off-balance sheet exposures, such as unused lending commitments and letters of credit, and reflect deductions for certain intangible assets and any excess allowance for credit losses.

Recent Actions Impacting Citigroup's Risk-Weighted Assets

All three of Citigroup's primary credit card securitization trusts Master Trust, Omni Trust and Broadway Trust had bonds placed on ratings watch with negative implications by rating agencies during the first and second quarters of 2009. As a result of the ratings watch status, certain actions were taken by Citi with respect to each of the trusts. In general, the actions subordinated certain senior interests in the trust assets that were retained by Citi, which effectively placed these interests below investor interests in terms of priority of payment.

With respect to the Master Trust, in the first quarter of 2009, Citi subordinated a portion of its "seller's interest", which represents a senior interest in trust receivables, thus making those cash flows available to pay investor coupon each month. In addition, during the second quarter of 2009, a subordinated note with a \$3 billion principal amount was issued by the Master Trust and retained by Citibank (South Dakota), N.A., in order to provide additional credit support for the senior note classes. The note is classified as a held-to-maturity investment security.

With respect to the Omni Trust, in the second quarter of 2009, subordinated notes with a principal amount of \$2 billion were issued by the trust and retained by Citibank (South Dakota), N.A., in order to provide additional credit support for the senior note classes. The notes are classified as Trading account assets. These notes are in addition to a \$265 million subordinated note issued by Omni Trust and retained by Citibank (South Dakota), N.A. in the fourth quarter of 2008 for the same purpose of providing additional credit support for senior noteholders.

With respect to the Broadway Trust, subordinated notes with a principal amount of \$82 million were issued by the trust and retained by Citibank, N.A., in order to provide additional credit support for the senior note classes. The notes are classified as Trading account assets.

As a result of these actions, based on the applicable regulatory capital rules, Citigroup included the sold assets of the Master and Omni Trusts (commencing with the first quarter of 2009) and the Broadway Trust (commencing with the second quarter of 2009) in its risk-weighted assets for purposes of calculating its risk-based capital ratios. The effect of this change increased Citigroup's risk-weighted assets by approximately \$82 billion, and decreased Citigroup's Tier 1 Capital ratio by approximately 100 bps, each as of March 31, 2009, with respect to the Master and Omni Trusts. The inclusion of the Broadway Trust increased Citigroup's risk-weighted assets by an additional approximately \$900 million at June 30, 2009. All bond ratings for each of the trusts have been

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

affirmed by the rating agencies, and no downgrades occurred as of June 30, 2009.

Common Equity

Citigroup's common stockholders' equity increased by approximately \$7.0 billion to \$78 billion, and represented 4.2% of total assets as of June 30, 2009, from \$71 billion and 3.7% at December 31, 2008.

The table below summarizes the change in Citigroup's common stockholders' equity during the first six months of 2009:

<i>In billions of dollars</i>	
Common equity, December 31, 2008	\$ 71.0
Net income	5.9
Employee benefit plans and other activities	0.1
Dividends	(2.6)
Net change in Accumulated other comprehensive income (loss), net of tax	3.6
 Common equity, June 30, 2009	 \$ 78.0

As of June 30, 2009, \$6.7 billion of stock repurchases remained under authorized repurchase programs after no material repurchases were made in 2008 and the first six months of 2009. Under various of its agreements with the USG, the Company is restricted from repurchasing common stock, subject to certain exceptions, including in the ordinary course of business as part of employee benefit programs. In addition, in accordance with its recent exchange agreements with the USG, Citigroup agreed not to pay a quarterly common stock dividend exceeding \$0.01 per share per quarter for so long as the USG holds any debt or equity security of Citigroup (or any affiliate thereof) acquired by the USG in connection with the public and private exchange offers (without the consent of the USG). See "Events in 2009 Public and Private Exchange Offers" above. Any such dividend on Citi's outstanding common stock would need to be made in compliance with Citi's obligations to any remaining outstanding preferred stock.

Tangible Common Equity

Citigroup's management believes TCE is useful because it is a measure utilized by regulators and market analysts in evaluating a company's financial condition and capital strength. TCE, as defined by Citigroup, represents *Common equity* less *Goodwill* and *Intangible assets (excluding MSRs)* net of the *related net deferred tax liabilities*. Other companies may calculate TCE in a manner different from Citigroup. TCE was \$40.0 billion at June 30, 2009 and \$31.1 billion at December 31, 2008.

The TCE ratio (TCE divided by risk-weighted assets, see "Components of Capital Under Regulatory Guidelines" above) was 4.0% at June 30, 2009 and 3.1% at December 31, 2008. A reconciliation of Citigroup's total stockholders' equity to TCE follows:

<i>In millions of dollars, except ratio</i>	June 30, 2009	December 31, 2008
Total Citigroup Stockholders' Equity	\$ 152,302	\$ 141,630
Less:		
Preferred Stock	74,301	70,664
Common Equity	\$ 78,001	\$ 70,966
Less:		
Goodwill as reported	25,578	27,132
Intangible Assets (other than MSRs) as reported	10,098	14,159
Goodwill and Intangible Assets recorded as Assets of Discontinued Operations Held for Sale	3,618	
Less: Related Net Deferred Tax Liabilities	1,296	1,382
 Tangible Common Equity (TCE)	 \$ 40,003	 \$ 31,057
 Tangible Assets		
GAAP Assets	\$ 1,848,533	\$ 1,938,470
Less:		

Edgar Filing: CITIGROUP INC - Form 10-Q

Goodwill as reported	25,578	27,132
Intangible Assets (other than MSRs) as reported	10,098	14,159
Goodwill and Intangible Assets recorded as Assets of Discontinued Operations Held for Sale	3,618	
Related deferred tax assets	1,283	1,285
Tangible Assets (TA)(1)	\$ 1,807,956	\$ 1,895,894
Risk-Weighted Assets (RWA) under "Components of Capital Under Regulatory Guidelines"	\$ 995,414	\$ 996,247
TCE/TA RATIO	2.2%	1.6%
TCE RATIO (TCE/RWA)	4.0%	3.1%

(1) GAAP Assets less Goodwill and Intangible Assets excluding MSRs, and the related deferred tax assets.

Table of Contents**Capital Resources of Citigroup's Depository Institutions**

Citigroup's subsidiary depository institutions in the U.S. are subject to risk-based capital guidelines issued by their respective primary federal bank regulatory agencies, which are similar to the FRB's guidelines. To be "well capitalized" under federal bank regulatory agency definitions, Citigroup's depository institutions must have a Tier 1 Capital ratio of at least 6%, a Total Capital (Tier 1 + Tier 2 Capital) ratio of at least 10% and a Leverage ratio of at least 5%, and not be subject to a regulatory directive to meet and maintain higher capital levels.

At June 30, 2009, all of Citigroup's subsidiary depository institutions were "well capitalized" under federal bank regulatory agency definitions, including Citigroup's primary depository institution, Citibank, N.A., as noted in the following table:

Citibank, N.A. Components of Capital and Ratios Under Regulatory Guidelines

<i>In billions of dollars</i>	Jun. 30, 2009	Dec. 31, 2008
Tier 1 Capital	\$ 94.3	\$ 71.0
Total Capital (Tier 1 and Tier 2)	112.5	108.4
Tier 1 Capital Ratio	14.58%	9.94%
Total Capital Ratio (Tier 1 and Tier 2)	17.40	15.18
Leverage Ratio(1)	8.23	5.82

(1)

Tier 1 Capital divided by each period's quarterly adjusted average total assets.

Citibank, N.A. had a net loss of \$1.5 billion for the first six months of 2009.

In addition, during the first six months of 2009, Citibank, N.A. received capital contributions from its parent company of \$27.5 billion.

Total subordinated notes issued to Citicorp Holdings Inc. that were outstanding at June 30, 2009 and December 31, 2008, and included in Citibank, N.A.'s Tier 2 Capital, amounted to \$9.5 billion and \$28.2 billion, respectively, reflecting the redemption of \$18.7 billion of subordinated notes in the first six months of 2009.

The significant events in the latter half of 2008 and the first six months of 2009 impacting the capital of Citigroup also affected, or could affect, Citibank, N.A. Citibank, N.A. is subject to separate banking regulation and examination.

Table of Contents

The following table presents the estimated sensitivity of Citigroup's and Citibank, N.A.'s capital ratios to changes of \$100 million of Tier 1 or Total Capital (numerator), or changes of \$1 billion in risk-weighted assets or adjusted average total assets (denominator) based on financial information as of June 30, 2009. This information is provided solely for the purpose of analyzing the impact that a change in the Company's financial position or results of operations could have on these ratios. These sensitivities only consider a single change to either a component of capital, risk-weighted assets or adjusted average total assets. Accordingly, an event that affects more than one factor may have a larger basis-point impact than is reflected in this table.

	Tier 1 Common Ratio		Tier 1 Capital Ratio		Total Capital Ratio		Leverage Ratio	
	Impact of \$100 million change in Tier 1 Common	Impact of \$1 billion change in risk-weighted assets	Impact of \$100 million change in Tier 1 Capital	Impact of \$1 billion change in risk-weighted assets	Impact of \$100 million change in total capital	Impact of \$1 billion change in risk-weighted assets	Impact of \$100 million change in Tier 1 Capital	Impact of \$1 billion change in adjusted average total assets
Citigroup	1.0 bps	0.3 bps	1.0 bps	1.3 bps	1.0 bps	1.7 bps	0.6 bps	0.4 bps
Citibank, N.A.			1.5 bps	2.3 bps	1.5 bps	2.7 bps	0.9 bps	0.7 bps

Broker-Dealer Subsidiaries

At June 30, 2009, Citigroup Global Markets Inc., an indirect wholly-owned subsidiary of Citigroup Global Markets Holdings Inc., had net capital, computed in accordance with the SEC's net capital rule, of \$8.1 billion, which exceeded the minimum requirement by \$7.5 billion.

In addition, certain of the Company's broker-dealer subsidiaries are subject to regulation in the other countries in which they do business, including requirements to maintain specified levels of net capital or its equivalent. The Company's broker-dealer subsidiaries were in compliance with their capital requirements at June 30, 2009. The requirements applicable to these subsidiaries in the U.S. and in particular other jurisdictions are subject to political debate and potential change in light of recent events.

Regulatory Capital Standards Developments

Citigroup supports the move to a new set of risk-based capital standards, published on June 26, 2004 (and subsequently amended in November 2005) by the Basel Committee on Banking Supervision, consisting of central banks and bank supervisors from 13 countries. The international version of the Basel II framework will allow Citigroup to leverage internal risk models used to measure credit, operational, and market risk exposures to drive regulatory capital calculations.

On December 7, 2007, the U.S. banking regulators published the rules for large banks to comply with Basel II in the U.S. These rules require Citigroup, as a large and internationally active bank, to comply with the most advanced Basel II approaches for calculating credit and operational risk capital requirements. The U.S. implementation timetable consists of a parallel calculation period under the current regulatory capital regime (Basel I) and Basel II, starting anytime between April 1, 2008, and April 1, 2010 followed by a three-year transition period, typically starting 12 months after the beginning of parallel reporting. The U.S. regulators have reserved the right to change how Basel II is applied in the U.S. following a review at the end of the second year of the transitional period, and to retain the existing prompt corrective action and leverage capital requirements applicable to banking organizations in the U.S.

The Company intends to implement Basel II within the timeframe required by the final rules.

Table of Contents

FUNDING

Overview

Because Citigroup is a bank holding company, substantially all of its net earnings are generated within its operating subsidiaries. These subsidiaries make funds available to Citigroup, primarily in the form of dividends. Certain subsidiaries' dividend-paying abilities may be limited by covenant restrictions in credit agreements, regulatory requirements and/or rating-agency requirements that also impact their capitalization levels.

As discussed in more detail in the Company's 2008 Annual Report on Form 10-K, global financial markets faced unprecedented disruption in the latter part of 2008. Citigroup and other U.S. financial services firms are currently benefiting from government programs that are improving markets and providing Citigroup and other institutions with significant current funding capacity and significant liquidity support. See "TARP and Other Regulatory Programs" above.

In addition to the above programs, since the middle of 2007, the Company has taken a series of actions to reduce potential funding risks related to short-term market dislocations. The amount of commercial paper outstanding was reduced and the weighted-average maturity was extended, the parent company liquidity portfolio (a portfolio of cash and highly liquid securities) and broker-dealer "cash box" (unencumbered cash deposits) were increased substantially, and the amount of unsecured overnight bank borrowings was reduced.

As of June 30, 2009, the parent company liquidity portfolio and broker-dealer "cash box" totaled \$65.0 billion as compared with \$66.8 billion at December 31, 2008 and \$64.8 billion at June 30, 2008. In addition, as of June 30, 2009, Citigroup's bank subsidiaries had an aggregate of approximately \$110 billion of cash on deposit with major Central Banks (including the U.S. Federal Reserve Bank of New York, the European Central Bank, Bank of England, Swiss National Bank and Bank of Japan). This compares with approximately \$72 billion at December 31, 2008. These amounts are in addition to cash deposited from the broker-dealer "cash box" noted above. Citigroup's bank subsidiaries also have significant additional liquidity resources through unencumbered highly liquid securities and other assets available for secured funding through private markets or that are, or could be, pledged to the major Central Banks and the U.S. Federal Home Loan Banks.

These actions to reduce funding risks, the reduction of the balance sheet and the substantial support provided by U.S. government programs have allowed the combined parent and broker-dealer entities to maintain sufficient liquidity to meet all maturing unsecured debt obligations due within a one-year time horizon, without accessing the unsecured markets.

Citigroup's funding sources are diversified across funding types and geography, a benefit of its global franchise. Funding for Citigroup and its major operating subsidiaries includes a geographically diverse retail and corporate deposit base of approximately \$804.7 billion at June 30, 2009. These deposits are diversified across products and regions, with approximately two-thirds of them outside of the U.S. This diversification provides the Company with an important and low-cost source of funding. A significant portion of these deposits has been, and is currently expected to be, long term and stable, and is considered to be core.

During the quarter ended June 30, 2009, the Company's deposit base increased by \$42 billion compared to March 31, 2009, approximately half of which was due to FX translation. On a volume basis, deposit increases were noted in Regional Consumer Banking, particularly in North America, and in Global Transaction Services due to growth in all regions and strength in Treasury and Trade Solutions. These increases were partially offset by declines in Securities and Banking related to reduction of higher cost wholesale deposits.

Banking Subsidiaries

There are various legal limitations on the ability of Citigroup's subsidiary depository institutions to extend credit, pay dividends or otherwise supply funds to Citigroup and its non-bank subsidiaries. Currently, the approval of the Office of the Comptroller of the Currency, in the case of national banks, or the Office of Thrift Supervision, in the case of federal savings banks, is required if total dividends declared in any calendar year exceed amounts specified by the applicable agency's regulations. State-chartered depository institutions are subject to dividend limitations imposed by applicable state law.

In determining the declaration of dividends, each depository institution must also consider its effect on applicable risk-based capital and leverage ratio requirements, as well as policy statements of the federal regulatory agencies that indicate that banking organizations should generally pay dividends out of current operating earnings. Citigroup did not receive any dividends from its banking subsidiaries during the second quarter of 2009.

Non-Banking Subsidiaries

Edgar Filing: CITIGROUP INC - Form 10-Q

Citigroup receives dividends from its non-bank subsidiaries. These non-bank subsidiaries, including Citigroup Global Market Holdings Inc. (CGMHI), are generally not subject to regulatory restrictions on dividends. However, the ability of CGMHI to declare dividends can be restricted by capital considerations of its broker-dealer subsidiaries.

CGMHI's consolidated balance sheet is liquid, with the vast majority of its assets consisting of marketable securities and collateralized short-term financing agreements arising from securities transactions. CGMHI monitors and evaluates the adequacy of its capital and borrowing base on a daily basis to maintain liquidity and to ensure that its capital base supports the regulatory capital requirements of its subsidiaries.

Some of Citigroup's non-bank subsidiaries, including CGMHI, have credit facilities with Citigroup's subsidiary depository institutions, including Citibank, N.A. Borrowings under these facilities must be secured in accordance with Section 23A of the Federal Reserve Act. There are various legal restrictions on the extent to which a bank holding company and certain of its non-bank subsidiaries can borrow or obtain credit from Citigroup's subsidiary depository institutions or engage in certain other transactions with them. In general, these restrictions require that transactions be on arm's length terms and be secured by designated amounts of

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

specified collateral. See Note 12 to the Consolidated Financial Statements.

At June 30, 2009, long-term debt and commercial paper outstanding for Citigroup, CGMHI, Citigroup Funding Inc. (CFI) and other Citigroup subsidiaries, collectively, were as follows:

<i>In billions of dollars</i>	Citigroup parent company	CGMHI(1)	CFI(1)	Other Citigroup Subsidiaries
Long-term debt	\$ 192.3	\$ 15.1	\$ 44.1	\$ 96.5(2)
Commercial paper	\$	\$	\$ 27.9	\$ 0.6

(1) Citigroup guarantees all of CFI's debt and CGMHI's publicly issued securities.

(2) At June 30, 2009, approximately \$38.5 billion relates to collateralized advances from the Federal Home Loan Bank.

The table below details the long-term debt issuances of Citigroup during the past three quarters.

<i>In billions of dollars</i>	4Q08	1Q09	2Q09	Total
Debt issued under TLGP guarantee	\$ 5.8	\$ 21.9	\$ 17.0	\$ 44.7
Debt issued without TLGP guarantee	0.8	2.5	17.5(1)	20.8
Total	\$ 6.6	\$ 24.4	\$ 34.5	\$ 65.5

(1) Includes \$8.5 billion issued through the U.S. Government sponsored Department of Education Conduit Facility, and \$1 billion issued by Citibank Pty. Ltd. Australia and guaranteed by the Commonwealth of Australia.

See "TARP and Other Regulatory Programs FDIC Temporary Liquidity Guarantee Program" regarding FDIC guarantees of certain long-term debt and commercial paper and interbank deposits. See also Note 12 to the Consolidated Financial Statements for further detail on Citigroup's (and its affiliates') long-term debt and commercial paper outstanding.

Credit Ratings

Citigroup's ability to access the capital markets and other sources of wholesale funds is currently significantly subject to government funding and liquidity support. Any ability to access the capital markets or other sources of funds, as well as the cost of these funds and its ability to maintain certain deposits, is highly dependent on its credit ratings. The table below indicates the current ratings for Citigroup.

On November 24, 2008, Fitch Ratings lowered Citigroup Inc.'s and Citibank, N.A.'s senior debt rating to "A+" from "AA-." In doing so, Fitch removed the rating from "Watch Negative" and applied a "Stable Outlook."

On February 27, 2009, Moody's Investors Service lowered Citigroup Inc.'s senior debt rating to "A3" from "A2" and Citibank, N.A.'s long-term rating to "A1" from "Aa3." In doing so, Moody's removed the ratings from "Under Review for possible downgrade" and applied a "Stable Outlook."

On December 19, 2008, Standard & Poor's lowered Citigroup Inc.'s senior debt rating to "A" from "AA-" and Citibank, N.A.'s long-term rating to "A+" from "AA." In doing so, Standard & Poor's removed the rating from "CreditWatch Negative" and applied a "Stable Outlook." On December 19, 2008, Standard & Poor's also lowered the short-term and commercial paper ratings of Citigroup and Citibank, N.A. to "A-1" from "A-1+." On February 27, 2009, Standard & Poor's placed the ratings of Citigroup Inc. and its subsidiaries on "Negative Outlook." On May 4, 2009, Standard & Poor's placed the ratings of Citigroup Inc. and its subsidiaries on "Credit Watch Negative." On May 8, 2009, Standard & Poor's affirmed the ratings of Citigroup Inc. and its subsidiaries. In doing so, Standard & Poor's removed the rating from "Credit Watch

Edgar Filing: CITIGROUP INC - Form 10-Q

Negative" and applied a "Stable Outlook."

As a result of the Citigroup guarantee, changes in ratings and ratings outlooks for Citigroup Funding Inc. are the same as those of Citigroup noted above.

Citigroup's Debt Ratings as of June 30, 2009

	Citigroup Inc.		Citigroup Funding Inc.		Citibank, N.A.	
	Senior debt	Commercial paper	Senior debt	Commercial paper	Long-term	Short-term
Fitch Ratings	A+	F1+	A+	F1+	A+	F1+
Moody's Investors Service	A3	P-1	A3	P-1	A1	P-1
Standard & Poor's	A	A-1	A	A-1	A+	A-1

Ratings downgrades by Fitch Ratings, Moody's Investors Service or Standard & Poor's have had and could continue to have impacts on funding and liquidity, and could also have further explicit impact on liquidity due to collateral triggers and other cash requirements. Because of the current credit ratings of Citigroup Inc., a one-notch downgrade of its senior debt/long-term rating would likely impact Citigroup Inc.'s commercial paper/short-term rating. As of June 30, 2009, a one-notch downgrade of the senior debt/long-term rating of Citigroup Inc., accompanied by a one-notch downgrade of Citigroup Inc.'s commercial paper/short-term rating, would result in an approximately \$12.2 billion funding requirement in the form of collateral and cash obligations. Further, as of June 30, 2009, a one-notch downgrade of the senior debt/long-term ratings of Citibank, N.A. would result in an approximately \$4.2 billion funding requirement in the form of collateral and cash obligations. Because of the credit ratings of Citibank, N.A., a one-notch downgrade of its senior debt/long-term rating is unlikely to have any impact on its commercial paper/short-term rating.

Table of Contents

LIQUIDITY

Citigroup's liquidity management is structured to optimize the free flow of funds through the Company's legal and regulatory structure. Principal constraints relate to legal and regulatory limitations, sovereign risk and tax considerations. Consistent with these constraints, Citigroup's primary objectives for liquidity management are established by entity and in aggregate across three main operating entities as follows:

Parent Holding Company

Broker Dealer Entities

Bank Entities

Within this construct, there is a funding framework for the Company's activities. The primary benchmark for the Parent and Broker Dealer Entities is that on a combined basis, Citigroup maintains sufficient liquidity to meet all maturing unsecured debt obligations due within a one-year time horizon without accessing the unsecured markets. The resulting "short-term ratio" is monitored on a daily basis.

Starting in the latter part of 2008, serious credit and other market disruptions caused significant potential constraints on liquidity for financial institutions. Citigroup and other U.S. financial services firms are currently benefiting from government programs that are providing Citigroup and other institutions with significant liquidity support. See "TARP and Other Regulatory Programs" above.

Table of Contents

OFF-BALANCE SHEET ARRANGEMENTS

Citigroup and its subsidiaries are involved with several types of off-balance sheet arrangements, including special purpose entities (SPEs), primarily in connection with securitization activities in Regional Consumer Banking and Local Consumer Lending. Citigroup and its subsidiaries use SPEs principally to obtain liquidity and favorable capital treatment by securitizing certain of Citigroup's financial assets, assisting clients in securitizing their financial assets and creating investment products for clients. For further information about the Company's securitization activities and involvement in SPEs, see Note 15 to the Consolidated Financial Statements.

The following tables describe certain characteristics of assets owned by certain identified significant unconsolidated variable interest entities (VIEs) as of June 30, 2009. These VIEs and the Company's exposure to the VIEs are described in Note 15 to the Consolidated Financial Statements. See also Note 1 to the Consolidated Financial Statements, "Elimination of QSPEs and Changes in the Consolidation Model for Variable Interest Entities."

Citi-Administered Asset-Backed Commercial Paper Conduits	Total assets (in billions)	Weighted average life	Credit rating distribution

FAIR VALUATION

For a discussion of fair value of assets and liabilities, see Note 17 and Note 18 to the Consolidated Financial Statements.

CONTROLS AND PROCEDURES

Disclosure

The Company's management, with the participation of the Company's CEO and CFO, has evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) as of June 30, 2009 and, based on that evaluation, the CEO and CFO have concluded that at that date the Company's disclosure controls and procedures were effective.

Financial Reporting

There were no changes in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) during the fiscal quarter ended June 30, 2009 that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

FORWARD-LOOKING STATEMENTS

When describing future business conditions in this Form 10-Q, including, but not limited to, descriptions in the section titled "Management's Discussion and Analysis," the Company makes certain statements that are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. The Company's actual results may differ materially from those included in the forward-looking statements, which are indicated by words such as "believe," "expect," "anticipate," "intend," "estimate," "may increase," "may fluctuate," and similar expressions, or future or conditional verbs such as "will," "should," "would," and "could."

These forward-looking statements are based on management's current expectations and involve external risks and uncertainties including, but not limited to, those described under "Risk Factors" in Citigroup's 2008 Annual Report on Form 10-K. Other risks and uncertainties disclosed herein include, but are not limited to:

the effect that an ownership change (as defined in Section 382 of the Internal Revenue Code) could have on the Company's ability to utilize its deferred tax assets, a portion of which is included in the Company's TCE, to offset future taxable income;

the realization of the recognized net deferred tax asset at June 30, 2009;

the impact of The Card Accountability, Responsibility and Disclosure Act of 2009 (CARD Act) on the Company's credit card businesses;

the effectiveness of Citi's loan modification programs (both Citi-instituted programs and the Obama administration's Home Affordable Modification Program (HAMP)) and their impact on Citi's future delinquency trends and loan loss reserves;

the impact that FASB-adopted changes regarding off-balance sheet assets, consolidation and sale treatment could have on Citi's financial statements and capital ratios;

the effectiveness of the hedging products used in connection with the Special Asset Pool's trading positions in U.S. subprime RMBS and related products, including ABS CDOs, in the event of material changes in market conditions; and

the outcome of legal, regulatory and other proceedings.

(1)

Reclassified to conform to current period's presentation.

(2)

For the three and six months ended June 30, 2009, OTTI losses on investments are accounted for in accordance FSP FAS 115-2 (ASC 320-10-65-1) (see "Accounting Changes" in Note 1 to the Consolidated Financial Statements).

(3)

The Company adopted FSP EITF 03-6-1 (ASC 260-10-45 to 65) on January 1, 2009. All prior periods have been restated to conform to the current presentation. The Diluted EPS calculation for 2008 utilizes Basic shares and Income available to common shareholders (Basic) due to the negative Income available to common shareholders. Using actual Diluted shares and Income available to common shareholders (Diluted) would result in anti-dilution.

See Notes to the Consolidated Financial Statements.

The accompanying Unaudited Consolidated Financial Statements as of June 30, 2009 and for the three- and six-month periods ended June 30, 2009 include the accounts of Citigroup Inc. (Citigroup) and its subsidiaries (collectively, the Company). In the opinion of management, all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation, have been reflected. The accompanying Unaudited Consolidated Financial Statements should be read in conjunction with the Consolidated Financial Statements and related notes included in Citigroup's 2008 Annual Report on Form 10-K.

Certain financial information that is normally included in annual financial statements prepared in accordance with U.S. generally accepted accounting principles, but is not required for interim reporting purposes, has been condensed or omitted.

Management must make estimates and assumptions that affect the Consolidated Financial Statements and the related footnote disclosures. While management makes its best judgment, actual results could differ from those estimates. Current market conditions increase the risk and complexity of the judgments in these estimates.

Certain reclassifications have been made to the prior-period's financial statements to conform to the current period's presentation. As noted above, the Notes to Consolidated Financial Statements are unaudited, including any reclassifications to December 31, 2008 balances related to the new Citicorp/Citi Holdings organizational structure.

FASB Launches Accounting Standards Codification

The FASB has issued FASB Statement No. 168, *The "FASB Accounting Standards Codification" and the Hierarchy of Generally Accepted Accounting Principles*. Statement 168 establishes the FASB Accounting Standards Codification (Codification or ASC) as the single source of authoritative U.S. generally accepted accounting principles (GAAP) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. The Codification supersedes all existing non-SEC accounting and reporting standards. All other non-grandfathered, non-SEC accounting literature not included in the Codification will become nonauthoritative.

Following the Codification, the Board will not issue new standards in the form of Statements, FASB Staff Positions or Emerging Issues Task Force Abstracts. Instead, it will issue Accounting Standards Updates, which will serve to update the Codification, provide background information about the guidance and provide the basis for conclusions on the changes to the Codification.

GAAP is not intended to be changed as a result of the FASB's Codification project, but it will change the way the guidance is organized and presented. As a result, these changes will have a significant impact on how companies reference GAAP in their financial statements and in their accounting policies for financial statements issued for interim and annual periods ending after September 15, 2009. Citigroup has begun the process of implementing the Codification in this quarterly report by providing references to the Codification topics alongside references to the existing standards.

Significant Accounting Policies

The Company's accounting policies are fundamental to understanding management's discussion and analysis of results of operations and financial condition. The Company has identified six policies as being significant because they require management to make subjective and/or complex judgments about matters that are inherently uncertain. These policies relate to Valuations of Financial Instruments, Allowance for Credit Losses, Securitizations, Goodwill, Income Taxes and Legal Reserves. The Company, in consultation with the Audit and Risk Management Committee of the Board of Directors, has reviewed and approved these significant accounting policies, which are further described in the Company's 2008 Annual Report on Form 10-K.

ACCOUNTING CHANGES

Interim Disclosures about Fair Value of Financial Instruments

Edgar Filing: CITIGROUP INC - Form 10-Q

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1, "Interim Disclosures about Fair Value of Financial Instruments," (ASC 825-10-65-1). This FSP requires disclosing qualitative and quantitative information about the fair value of all financial instruments on a quarterly basis, including methods and significant assumptions used to estimate fair value during the period. These disclosures were previously only done annually. The disclosures required by this FSP are effective for the quarter ended June 30, 2009. This FSP has no effect on how Citigroup accounts for these instruments.

Other-Than-Temporary Impairments on Investment Securities

In April 2009, the FASB issued FSP FAS 115-2 and FAS 124-2, "Recognition and Presentation of Other-Than-Temporary Impairments" (FSP FAS 115-2/ASC 320-10-65-1), which amends the recognition guidance for other-than-temporary impairments (OTTI) of debt securities and expands the financial statement disclosures for OTTI on debt and equity securities. Citigroup adopted the FSP in the first quarter of 2009.

As a result of the FSP, the Company's Consolidated Statement of Income reflects the full impairment (that is, the difference between the security's amortized cost basis and fair value) on debt securities that the Company intends to sell or would more-likely-than-not be required to sell before the expected recovery of the amortized cost basis. For available-for-sale (AFS) and held-to-maturity (HTM) debt securities that

Table of Contents

management has no intent to sell and believes that it more-likely-than-not will not be required to sell prior to recovery, only the credit loss component of the impairment is recognized in earnings, while the rest of the fair value loss is recognized in *Accumulated Other Comprehensive Income* (AOCI). The credit loss component recognized in earnings is identified as the amount of principal cash flows not expected to be received over the remaining term of the security as projected using the Company's cash flow projections using its base assumptions. As a result of the adoption of the FSP, Citigroup's income in the first and second quarters of 2009 was higher by \$631 million and \$1,634 million on a pretax basis \$391 million and \$1,013 million on an after-tax basis), respectively.

The cumulative effect of the change included an increase in the opening balance of *Retained earnings* at January 1, 2009 of \$665 million on a pretax basis (\$413 million after-tax).

See Note 10 to the Consolidated Financial Statements, Investments, for disclosures related to the Company's investment securities and OTTI.

Measurement of Fair Value in Inactive Markets

In April 2009, the FASB issued FSP FAS 157-4, "Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly" (ASC 820-10-65-4). The FSP reaffirms that fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions. The FSP also reaffirms the need to use judgment in determining if a formerly active market has become inactive and in determining fair values when the market has become inactive. The adoption of the FSP had no effect on the Company's Consolidated Financial Statements.

Revisions to the Earnings per Share Calculation

In June 2008, the FASB issued FSP EITF 03-6-1, "Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities" (ASC 260-10-45 to 65). Under the FSP, unvested share-based payment awards that contain nonforfeitable rights to dividends are considered to be a separate class of common stock and included in the EPS calculation using the "two-class method." Citigroup's restricted and deferred share awards meet the definition of a participating security. In accordance with the FSP, restricted and deferred shares are now included in the basic EPS calculation.

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

The following table shows the effect of adopting the FSP on Citigroup's basic and diluted EPS for 2008 and 2009:

	1Q08	2Q08	3Q08	4Q08	Full Year 2008	1Q09
Basic and Diluted Earnings per Share(1)						
As reported	\$ (1.02)	\$ (0.54)	\$ (0.60)	\$ (3.40)	\$ (5.59)	N/A
Two-class method	\$ (1.03)	\$ (0.55)	\$ (0.61)	\$ (3.40)	\$ (5.61)	\$ (0.18)

N/A Not Applicable

(1)

Diluted EPS is the same as Basic EPS for all periods presented due to the net loss available to common shareholders. Using actual diluted shares would result in anti-dilution.

Additional Disclosures for Derivative Instruments

On January 1, 2009, the Company adopted SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities, an amendment to SFAS 133* (SFAS 161/ASC 815-10-65-1). The standard requires enhanced disclosures about derivative instruments and hedged items that are accounted for under SFAS 133 (ASC 815-10) and related interpretations. No comparative information for periods prior to the effective date is required. See Note 16 to the Consolidated Financial Statements, Derivatives Activities, for disclosures related to the Company's hedging activities and derivative instruments. SFAS 161 (ASC 815-10-65-1) had no impact on how Citigroup accounts for these instruments.

Business Combinations

In December 2007, the FASB issued Statement No. 141(revised), *Business Combinations* (SFAS 141(R)/ASC 805-10), which is designed to improve the relevance, representational faithfulness, and comparability of the information that a reporting entity provides in its financial reports about a business combination and its effects. The Statement replaces SFAS 141, *Business Combinations*. SFAS 141(R) (ASC 805-10) retains the fundamental requirements in SFAS 141 that the acquisition method of accounting (which Statement 141 called the purchase method) be used for all business combinations and for an acquirer to be identified for each business combination. SFAS 141(R) (ASC 805-10) also retains the guidance in SFAS 141 for identifying and recognizing intangible assets separately from goodwill. The most significant changes in SFAS 141(R) (ASC 805-10) are: (1) acquisition costs and restructuring costs will now be expensed; (2) stock consideration will be measured based on the quoted market price as of the acquisition date instead of the date the deal is announced; and (3) the acquirer will record a 100% step-up to fair value for all assets and liabilities, including the noncontrolling interest portion, and goodwill is recorded as if a 100% interest was acquired.

Citigroup adopted SFAS 141(R) (ASC 805-10) on January 1, 2009, and the standard is applied prospectively.

Noncontrolling Interests in Subsidiaries

In December 2007, the FASB issued Statement No. 160, *Noncontrolling Interests in Consolidated Financial Statements* (SFAS 160/ASC 810-10-65-1), which establishes standards for the accounting and reporting of noncontrolling interests in subsidiaries (previously called minority interests) in consolidated financial statements and for the loss of control of subsidiaries. Upon adoption, SFAS 160 (ASC 810-10-65-1) requires that the equity interest of noncontrolling shareholders, partners, or other equity holders in subsidiaries be presented as a separate item in Citigroup's stockholders' equity, rather than as a liability. After the initial adoption, when a subsidiary is deconsolidated, any retained noncontrolling equity investment in the former subsidiary must be measured at fair value at the date of deconsolidation.

The gain or loss on the deconsolidation of the subsidiary is measured using the fair value of the remaining investment, rather than the previous carrying amount of that retained investment.

Citigroup adopted SFAS 160 (ASC 810-10-65-1) on January 1, 2009. As a result, \$2.392 billion of noncontrolling interests was reclassified from *Other liabilities* to Citigroup's Stockholders' equity.

Sale with Repurchase Financing Agreements

Edgar Filing: CITIGROUP INC - Form 10-Q

In February 2008, the FASB issued FASB Staff Position (FSP) FAS 140-3, "Accounting for Transfers of Financial Assets and Repurchase Financing Transactions" (ASC 860-10-40). This FSP provides implementation guidance on whether a security transfer with a contemporaneous repurchase financing involving the transferred financial asset must be evaluated as one linked transaction or two separate de-linked transactions.

The FSP requires the recognition of the transfer and the repurchase agreement as one linked transaction, unless all of the following criteria are met: (1) the initial transfer and the repurchase financing are not contractually contingent on one another; (2) the initial transferor has full recourse upon default, and the repurchase agreement's price is fixed and not at fair value; (3) the financial asset is readily obtainable in the marketplace and the transfer and repurchase financing are executed at market rates; and (4) the maturity of the repurchase financing is before the maturity of the financial asset. The scope of this FSP is limited to transfers and subsequent repurchase financings that are entered into contemporaneously or in contemplation of one another. Citigroup adopted the FSP on January 1, 2009. The impact of adopting this FSP was not material.

Table of Contents

The following accounting pronouncements became effective for Citigroup on January 1, 2009. The impact of adopting these pronouncements did not have a material impact on Citigroup's Consolidated Financial Statements.

Determining Whether an Instrument (or Embedded Feature) Is Indexed to an Entity's Own Stock

EITF Issue 07-5, "Determining Whether an Instrument (or Embedded Feature) Is Indexed to an Entity's Own Stock" (ASC 815-40).

Transition Guidance for Conforming Changes to Issue No. 98-5

EITF Issue 08-4, "Transition Guidance for Conforming Changes to Issue No. 98-5" (ASC 470-20-65-2).

Equity Method Investment Accounting Considerations

EITF Issue 08-6, "Equity Method Investment Accounting Considerations" (ASC 323-10).

Accounting for Defensive Intangible Assets

EITF Issue 08-7, "Accounting for Defensive Intangible Assets" (ASC 350-30).

Determination of the Useful Life of Intangible Assets

FSP FAS 142-3 "Determination of the Useful Life of Intangible Assets" (ASC 350-30).

FUTURE APPLICATION OF ACCOUNTING STANDARDS

Fair Value Disclosures about Pension Plan Assets

In December 2008, the FASB issued FSP FAS 132(R)-1, "Employers' Disclosures about Postretirement Benefit Plan Assets" (ASC 715-20-65-2). This FSP requires that information about plan assets be disclosed, on an annual basis, based on the fair value disclosure requirements of SFAS 157 (ASC 820-10). Citigroup will be required to separate plan assets into the three fair value hierarchy levels and provide a rollforward of the changes in fair value of plan assets classified as Level 3 in Citigroup's annual Consolidated Financial Statements.

The disclosures about plan assets required by this FSP are effective for fiscal years ending after December 15, 2009. This FSP will have no effect on the Company's accounting for plan benefits and obligations.

Loss-Contingency Disclosures

In June 2008, the FASB issued an exposure draft proposing expanded disclosures regarding loss contingencies accounted for under FASB Statement No. 5, *Accounting for Contingencies* (ASC 450-10 to 20, and SFAS 141(R) (ASC 805-10). This proposal increases the number of loss contingencies subject to disclosure and requires substantial quantitative and qualitative information to be provided about those loss contingencies. The proposed effective date is December 31, 2009, but will have no effect on the Company's accounting for loss contingencies.

Elimination of QSPEs and Changes in the Consolidation Model for Variable Interest Entities

In May 2009, the FASB issued SFAS No. 166, *Accounting for Transfers of Financial Assets, an amendment of FASB Statement No. 140* (SFAS 166), that will eliminate Qualifying Special Purpose Entities (QSPEs) from the guidance in SFAS 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities* (ASC 860). This change will have a significant impact on Citigroup's Consolidated Financial Statements as the Company will lose sales treatment for certain assets previously sold to QSPEs, as well as for certain future sales, and for certain transfers of portions of assets that do not meet the definition of participating interests. SFAS 166 is effective for fiscal years that begin after November 15, 2009.

Simultaneously, the FASB issued SFAS No. 167, *Amendments to FASB Interpretation No. 46(R)* (SFAS 167), which details three key changes to the consolidation model in FASB Interpretation No. 46 (Revised December 2003), "Consolidation of Variable Interest Entities" (FIN 46(R)/ASC 810-10). First, former QSPEs will now be included in the scope of SFAS 167. In addition, the FASB has changed the method of analyzing which party to a variable interest entity (VIE) should consolidate the VIE (known as the primary beneficiary) to a qualitative

determination of which party to the VIE has power combined with potentially significant benefits and losses, instead of the current quantitative risks and rewards model. The entity that has power has the ability to direct the activities of the VIE that most significantly impact the VIE's economic performance. Finally, the new standard

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

requires that the primary beneficiary analysis be re-evaluated whenever circumstances change. The current rules require reconsideration of the primary beneficiary only when specified reconsideration events occur.

As a result of implementing these new accounting standards, Citigroup expects to be required to consolidate certain of the VIEs and former QSPEs with which it currently has involvement. An ongoing evaluation of the application of these new requirements could, with the resolution of certain uncertainties, result in the identification of additional VIEs and QSPEs, other than those presented below, needing to be consolidated. It is not currently anticipated, however, that any such newly identified VIEs and QSPEs would have a significant impact on Citigroup's Consolidated Financial Statements or capital position.

In accordance with SFAS 167, Citigroup is currently evaluating two approaches for consolidating all of the VIEs and QSPEs that it expects to consolidate. The first approach would require initially measuring the assets, liabilities, and noncontrolling interests of the VIEs and QSPEs at their carrying values (the amounts at which the assets, liabilities, and noncontrolling interests would have been carried in the Consolidated Financial Statements, if Citigroup were to be designated as the primary beneficiary). The second approach under consideration would be to elect the fair value option, in which all of the financial assets and liabilities of certain designated VIEs and QSPEs would be recorded at fair value upon adoption of SFAS 167 and continue to be marked to market thereafter, with changes in fair value reported in earnings.

While this review has not yet been completed, Citigroup's tentative approach would be to consolidate all of the VIEs and QSPEs that it expects to consolidate at carrying value, except for Local Consumer Lending private label residential mortgages, for which the fair value option would be elected. The following tables present the pro forma impact of adopting these new accounting standards applying this tentative approach. The actual impact of adopting these new accounting requirements could, however, be significantly different, should Citigroup change from this methodology. For instance, if Citigroup were to consolidate its off-balance sheet credit card securitization vehicles applying the fair value option, an associated allowance for loan losses would not be established upon adoption of SFAS 167, with an offsetting charge to *Retained earnings*. Rather, the charge to *Retained earnings* would be affected by the difference between the fair value of the assets and liabilities that Citigroup would consolidate, which would result in a lesser charge to *Retained earnings* than under the carrying value approach.

The pro forma impact of these impending changes on incremental GAAP assets and resulting risk-weighted assets for those VIEs and former QSPEs that are currently expected to be consolidated for accounting purposes as of January 1, 2010 (based on financial information as of June 30, 2009), reflecting Citigroup's present understanding of the new requirements, and assuming continued application of existing risk-based capital rules, would be as follows:

<i>In billions of dollars</i>	GAAP assets	Incremental Risk- weighted assets(1)
Credit cards	\$ 85.5	\$ 0.5
Commercial paper conduits	44.5	
Student loans	14.2	4.1
Private label consumer mortgages	9.2	5.3
Investment funds	3.3	0.5
Commercial mortgages	1.3	1.3
Muni bonds	0.7	0.1
Mutual fund deferred sales commissions	0.6	0.4
Total	\$ 159.3	\$ 12.2

(1)

Citigroup undertook certain actions during the first and second quarters of 2009 in support of its off-balance sheet credit card securitization vehicles. As a result of these actions, Citigroup included approximately \$82 billion of incremental risk-weighted assets in its risk-based capital ratios as of March 31, 2009, and an additional approximately \$900 million as of June 30, 2009. See Note 15 to the Consolidated Financial Statements.

The above table reflects: (i) the estimated portion of the assets of former QSPEs to which Citigroup, acting as principal, has transferred assets and received sales treatment as of June 30, 2009 (totaling approximately \$747.0 billion), and (ii) the estimated assets of significant unconsolidated VIEs as of June 30, 2009 with which Citigroup is involved (totaling approximately \$238.4 billion) that would be required to be consolidated under the new accounting standards. Due to the variety of transaction structures and the level of Citigroup involvement in

Edgar Filing: CITIGROUP INC - Form 10-Q

individual former QSPEs and VIEs, only a portion of the former QSPEs and VIEs with which the Company is involved is expected to be consolidated.

In addition, the cumulative effect of adopting these new accounting standards as of January 1, 2010, based on financial information as of June 30, 2009, would result in an estimated aggregate after-tax charge to *Retained earnings* of approximately \$8.3 billion, reflecting the net effect of an overall pretax charge to *Retained earnings* (primarily relating to the establishment of loan loss reserves and the reversal of residual interests held) of approximately \$13.3 billion and the recognition of related deferred tax assets amounting to approximately \$5.0 billion.

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

The pro forma impact on certain of Citigroup's regulatory capital ratios of adopting these new accounting standards (based on financial information as of June 30, 2009), and assuming the continued application of the existing risk-based capital rules, would be as follows:

	As of June 30, 2009		
	As Reported	Pro Forma	Impact
Tier 1 Capital	12.74%	11.40%	(134) bps
Total Capital	16.62%	15.30%	(132) bps

The actual impact of adopting the new accounting standards on January 1, 2010 could differ, as financial information changes from the June 30, 2009 estimates and as several uncertainties in the application of these new standards are resolved.

Investment Company Audit Guide (SOP 07-1)

In July 2007, the AICPA issued Statement of Position 07-1, "Clarification of the Scope of the Audit and Accounting Guide for Investment Companies and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies" (SOP 07-1/ASC 946-10), which was expected to be effective for fiscal years beginning on or after December 15, 2007. However, in February 2008, the FASB delayed the effective date indefinitely by issuing an FSP SOP 07-1-1, "Effective Date of AICPA Statement of Position 07-1." This statement sets forth more stringent criteria for qualifying as an investment company than does the predecessor Audit Guide. In addition, SOP 07-1(ASC 946-10) establishes new criteria for a parent company or equity method investor to retain investment company accounting in their consolidated financial statements. Investment companies record all their investments at fair value with changes in value reflected in earnings. The Company is currently evaluating the potential impact of adopting SOP 07-1(ASC 946-10).

Table of Contents**2. DISCONTINUED OPERATIONS****Sale of Nikko Cordial**

On May 1, 2009, Citigroup entered into a definitive agreement to sell its Japanese domestic securities business, conducted principally through Nikko Cordial Securities Inc., to Sumitomo Mitsui Banking Corporation in a transaction with a total cash value to Citi of approximately \$7.9 billion (¥774.5 billion). Citi's ownership interests in Nikko Citigroup Limited, Nikko Asset Management Co., Ltd., and Nikko Principal Investments Japan Ltd. were not included in the transaction. The transaction is expected to close by the end of the fourth quarter of 2009, subject to regulatory approvals and customary closing conditions.

The Nikko Cordial operations had total assets and total liabilities as of June 30, 2009, of \$19.4 billion and \$12.4 billion, respectively.

Results for all of the Nikko Cordial businesses sold are reported as *Discontinued operations* for all periods presented. The assets and liabilities of the businesses being sold are included in *Assets of discontinued operations held for sale* and *Liabilities of discontinued operations held for sale* on the Consolidated Balance Sheet.

The following is a summary as of June 30, 2009 of the assets and liabilities of *Discontinued operations* held for sale on the Consolidated Balance Sheet for the operations related to the Nikko Cordial businesses to be sold:

<i>In millions of dollars</i>	June 30, 2009
Assets	
Cash due from banks	\$ 800
Deposits at interest with banks	443
Federal funds sold and securities borrowed or purchased under agreements to resell	3,306
Brokerage receivables	1,711
Trading account assets	6,185
Investments	486
Goodwill	533
Intangibles	3,085
Other assets	2,863
Total assets	\$ 19,412
Liabilities	
Federal funds purchased and securities loaned or sold under agreements to repurchase sold under agreements to repurchase	\$ 1,473
Brokerage payables	2,488
Trading account liabilities	2,289
Short term borrowings	4,300
Other Liabilities	1,824
Total liabilities	\$ 12,374

Summarized financial information for discontinued operations, including cash flows, related to the sale of Nikko Cordial follows:

<i>In millions of dollars</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008

Net cash provided by (used in) discontinued operations	\$ 783	\$ 370

Table of Contents**Sale of Citigroup's German Retail Banking Operations**

On December 5, 2008, Citigroup sold its German retail banking operations to Credit Mutuel for Euro 5.2 billion in cash plus the German retail bank's operating net earnings accrued in 2008 through the closing. The sale resulted in an after-tax gain of approximately \$3.9 billion including the after-tax gain on the foreign currency hedge of \$383 million recognized during the fourth quarter of 2008.

The sale did not include the corporate and investment banking business or the Germany-based European data center. Results for all of the German retail banking businesses sold, are reported as *Discontinued operations* for all periods presented.

Summarized financial information for *Discontinued operations*, including cash flows, related to the sale of the German retail banking operations is as follows:

<i>In millions of dollars</i>	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2009	2008	2009	2008

CitiCapital

On July 31, 2008, Citigroup sold substantially all of CitiCapital, the equipment finance unit in *North America*. The total proceeds from the transaction were approximately \$12.5 billion and resulted in an after-tax loss to Citigroup of \$305 million. This loss is included in *Income from discontinued operations* on the Company's Consolidated Statement of Income for the second quarter of 2008.

Results for all of the CitiCapital businesses sold, are reported as *Discontinued operations* for all periods presented.

Summarized financial information for *Discontinued operations*, including cash flows, related to the sale of CitiCapital is as follows:

<i>In millions of dollars</i>	Three Months		Six Months	
	Ended June 30,		Ended June 30,

Total interest expense	\$ 6,842	\$ 13,351	\$ 14,499	\$ 29,424
Net interest revenue	\$ 12,829	\$ 13,986	\$ 25,755	\$ 27,074
Provision for loan losses	12,233	6,983	22,148	12,560
Net interest revenue after provision for loan losses	\$ 596	\$ 7,003	\$ 3,607	\$ 14,514

(1) Reclassified to conform to the current period's presentation.

(2) Interest expense on trading account liabilities of the ICG is reported as a reduction of interest revenue for *Trading account assets*.

Table of Contents**5. COMMISSIONS AND FEES**

Commissions and fees revenue includes charges to customers for credit and bank cards, including transaction-processing fees and annual fees; advisory and equity and debt underwriting services; lending and deposit-related transactions, such as loan commitments, standby letters of credit, and other deposit and loan servicing activities; investment management-related fees, including brokerage services, and custody and trust services; and insurance fees and commissions.

The following table presents commissions and fees revenue for the three and six months ended June 30, 2009 and 2008:

<i>In millions of dollars</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008(1)	2009	2008(1)
Loan servicing(2)	\$ 1,367	\$ 1,393	\$ 1,563	\$ 1,107
Credit cards and bank cards	1,000	997	1,977	1,792
Investment banking	1,071	1,186	1,885	2,391
Smith Barney	321	744	836	1,507
ICG trading-related	475	600	822	1,302
Other Consumer	324	320	612	635
Transaction services	327	364	643	717
Checking-related	249	298	512	585
Other ICG	80	114	188	244
Primerica	76	107	149	217
Corporate finance(3)	171	(389)	421	(3,500)
Other	(24)	65	(3)	143
Total commissions and fees	\$ 5,437	\$ 5,799	\$ 9,605	\$ 7,140

-
- (1) Reclassified to conform to the current period's presentation.
- (2) Includes fair value adjustments on mortgage servicing assets. The mark-to-market on the underlying economic hedges of the MSRs is included in Other revenue.
- (3) Includes write-downs of approximately \$237 million for the second quarter of 2009 and \$484 million for the six months ended June 30, 2009, and \$428 million for the second quarter of 2008 and \$3.5 billion for the six months ended June 30, 2008, net of underwriting fees on funded and unfunded highly leveraged finance commitments. Write-downs were recorded on all highly leveraged finance commitments where there was value impairment, regardless of funding date.

Table of Contents**6. RETIREMENT BENEFITS**

The Company has several non-contributory defined benefit pension plans covering U.S. employees and has various defined benefit pension and termination indemnity plans covering employees outside the United States. The principal U.S. defined benefit plan, which formerly covered substantially all U.S. employees, is closed to new entrants and, effective January 1, 2008, no longer accrues benefits for most employees. Employees satisfying certain age and service requirements remain covered by a prior final pay formula.

The Company also offers post-retirement health care and life insurance benefits to certain eligible U.S. retired employees, as well as to certain eligible employees outside the United States. For information on the Company's Retirement Benefit Plans and Pension Assumptions, see Citigroup's 2008 Annual Report on Form 10-K.

The following tables summarize the components of the net expense recognized in the Consolidated Statement of Income for the three and six months ended June 30, 2009 and 2008.

Net Expense (Benefit)

<i>In millions of dollars</i>	Three Months Ended June 30,							
	Pension Plans				Postretirement Benefit Plans			
	U.S. Plans(1)		Plans Outside U.S.		U.S. Plans		Plans Outside U.S.	
	2009	2008	2009	2008	2009	2008	2009	2008
Benefits earned during the period	\$ 6	\$ 7	\$ 34	\$ 52	\$ 1	\$ 6	\$ 12	
Interest cost on benefit obligation	163	165	74	99	15	15	22	30
Expected return on plan assets	(229)	(234)	(84)	(122)	(3)	(3)	(20)	(29)
Amortization of unrecognized:								
Net transition obligation			(1)	1				
Prior service cost (benefit)	(2)		2	1				
Net actuarial loss	2		18	4			5	8
Net expense (benefit)	\$ (60)	\$ (62)	\$ 43	\$ 35	\$ 12	\$ 13	\$ 13	\$ 21

<i>In millions of dollars</i>	Six Months Ended June 30,							
	Pension Plans				Postretirement Benefit Plans			
	U.S. Plans(1)		Plans Outside U.S.		U.S. Plans		Plans Outside U.S.	
	2009	2008	2009	2008	2009	2008	2009	2008
Benefits earned during the period	\$ 12	\$ 15	\$ 71	\$ 103	\$ 1	\$ 13	\$ 19	
Interest cost on benefit obligation	326	329	144	182	30	30	43	50
Expected return on plan assets	(458)	(467)	(162)	(250)	(5)	(5)	(38)	(57)
Amortization of unrecognized:								
Net transition obligation			(1)	1				
Prior service cost (benefit)	(1)	(1)	2	2				
Net actuarial loss	2		33	13	1		9	11
Net expense (benefit)	\$ (119)	\$ (124)	\$ 87	\$ 51	\$ 26	\$ 26	\$ 27	\$ 23

(1)

The U.S. plans exclude nonqualified pension plans, for which the net expense was \$9 million and \$10 million for the three months ended June 30, 2009 and 2008, respectively, and \$19 million and \$20 million for the first six months of 2009 and 2008, respectively.

Table of Contents**Employer Contributions**

Citigroup's pension funding policy for U.S. plans and non-U.S. plans is generally to fund to applicable minimum funding requirements, rather than to the amounts of accumulated benefit obligations. For the U.S. plans, the Company may increase its contributions above the minimum required contribution under the Employee Retirement Income Security Act of 1974 (ERISA), if appropriate to its tax and cash position and the plan's funded position. At June 30, 2009 and December 31, 2008, there were no minimum required contributions and no discretionary cash or non-cash contributions are currently planned for the U.S. plans. For the non-U.S. plans, the Company contributed \$79 million during the six months ended June 30, 2009. Citigroup presently anticipates contributing an additional \$152 million to fund its non-U.S. plans in the remainder of 2009 for a total of \$231 million.

7. RESTRUCTURING

In the fourth quarter of 2008, Citigroup recorded a pretax restructuring expense of \$1.581 billion related to the implementation of a Company-wide re-engineering plan. For the three months ended June 30, 2009, Citigroup recorded a pretax net restructuring release of \$32 million composed of a gross charge of \$25 million and a credit of \$57 million due to changes in estimates. The charges related to the 2008 Re-engineering Projects Restructuring Initiative are reported in the Restructuring line on the Company's Consolidated Statement of Income and are recorded in each segment.

In 2007, the Company completed a review of its structural expense base in a Company-wide effort to create a more streamlined organization, reduce expense growth, and provide investment funds for future growth initiatives. As a result of this review, a pretax restructuring charge of \$1.4 billion was recorded in *Corporate/Other* during the first quarter of 2007. Additional net charges of \$151 million were recognized in subsequent quarters throughout 2007, and net releases of \$31 million and \$3 million in 2008 and 2009, due to changes in estimates. The charges related to the 2007 Structural Expense Review Restructuring Initiative are reported in the Restructuring line on the Company's Consolidated Statement of Income.

The primary goals of the 2008 Re-engineering Projects Restructuring Initiative and the 2007 Structural Expense Review Restructuring Initiative were:

- eliminate layers of management/improve workforce management;
- consolidate certain back-office, middle-office and corporate functions;
- increase the use of shared services;
- expand centralized procurement; and
- continue to rationalize operational spending on technology.

The implementation of these restructuring initiatives also caused certain related premises and equipment assets to become redundant. The remaining depreciable lives of these assets were shortened, and accelerated depreciation charges began in the second quarter of 2007 and fourth quarter of 2008 for the 2007 and 2008 initiatives, respectively, in addition to normal scheduled depreciation.

The following tables detail the Company's restructuring reserves.

2008 Re-engineering Projects Restructuring Charges

<i>In millions of dollars</i>	Severance		Contract	Asset	Employee	Total
Total Citigroup (pretax)	SFAS 112(1)	SFAS 146(2)	termination	write-downs(3)	termination	Citigroup
			costs		cost	

Edgar Filing: CITIGROUP INC - Form 10-Q

-
- (1) Represents the total charges incurred since inception and excludes pension curtailment charges of \$51 million recorded during the fourth quarter of 2008.

Table of Contents**8. EARNINGS PER SHARE**

The following is a reconciliation of the income and share data used in the basic and diluted earnings per share computations for the three and six months ended June 30, 2009 and 2008:

<i>In millions, except per share amounts</i>	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008(1)	2009	2008(1)
Income (loss) before attribution of noncontrolling interests	\$ 4,387	\$ (2,329)	\$ 6,081	\$ (7,515)
Noncontrolling interest	(34)	72	(50)	56
Net income (loss) from continuing operations (for EPS purposes)	\$ 4,421	\$ (2,401)	\$ 6,131	\$ (7,571)
Income (loss) from discontinued operations, net of taxes	(142)	(94)	(259)	(35)
Citigroup's net income (loss)	\$ 4,279	\$ (2,495)	\$ 5,872	\$ (7,606)
Preferred dividends	(1,495)	(361)	(2,716)	(444)
Impact on the conversion price reset related to the \$12.5 billion convertible preferred stock private issuance(2)			(1,285)	
Preferred stock Series H discount accretion	(54)		(107)	
Income (loss) available to common stockholders for basic EPS(3)	2,730	(2,856)	1,764	(8,050)
Effect of dilutive securities	270	270	540	336
Income (loss) available to common stockholders for diluted EPS(4)	\$ 3,000	\$ (2,586)	\$ 2,304	\$ (7,714)
Weighted average common shares outstanding applicable to basic EPS	5,399.5	5,287.4	5,392.3	5,186.5
Effect of dilutive securities:				
Convertible securities	568.3	489.2	568.3	489.2
Options		0.2		0.6
Adjusted weighted average common shares outstanding applicable to diluted EPS(3)	5,967.8	5,776.8	5,960.6	5,676.3
Basic earnings per share(3)(4)				
Income (loss) from continuing operations	\$ 0.51	\$ (0.53)	\$ 0.36	\$ (1.56)
Discontinued operations	(0.02)	(0.02)	(0.05)	(0.01)
Net income (loss)	\$ 0.49	\$ (0.55)	\$ 0.31	\$ (1.57)
Diluted earnings per share(3)(4)				
Income (loss) from continuing operations	\$ 0.51	\$ (0.53)	\$ 0.36	\$ (1.56)
Discontinued operations	(0.02)	(0.02)	(0.05)	(0.01)
Net income (loss)	\$ 0.49	\$ (0.55)	\$ 0.31	\$ (1.57)

(1) The Company adopted FSP EITF 03-6-1(ASC 260-10-45 to 65) on January 1, 2009. All prior periods have been restated to conform to the current period's presentation.

(2)

Edgar Filing: CITIGROUP INC - Form 10-Q

The six months ended June 30, 2009 income available to common shareholders includes a reduction of \$1,285 million related to the conversion price reset pursuant to Citigroup's prior agreement with the purchasers of \$12.5 billion convertible preferred stock issued in a private offering in January 2008. The conversion price was reset from \$31.62 per share to \$26.35 per share.

- (3) Due to the net loss available to common shareholders for Basic EPS in the three and six months ended June 30, 2008, loss available to common stockholders for basic EPS was used to calculate Diluted earnings per share. Adding back the effect of dilutive securities would result in anti-dilution.
- (4) Due to the net loss available to common shareholders for Diluted EPS in the three and six months ended June 30, 2008, basic shares were used to calculate Diluted earnings per share. Adding dilutive securities to the denominator would result in anti-dilution.

Table of Contents**9. TRADING ACCOUNT ASSETS AND LIABILITIES**

Trading account assets and liabilities, at fair value, consisted of the following at June 30, 2009 and December 31, 2008:

<i>In millions of dollars</i>	June 30, 2009	December 31, 2008
Trading account assets		
Trading mortgage-backed securities		
Agency guaranteed	\$ 27,174	\$ 32,981
Prime	1,051	1,416

(1)

Reclassified to conform to the current period's presentation.

The Company conducts and documents periodic reviews of all securities with unrealized losses to evaluate whether the impairment is other than temporary. As discussed in more detail below, prior to January 1, 2009, these reviews were conducted pursuant to FASB Staff Position No. 115-1, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments* (FSP FAS 115-1/ASC 320-10-35). Any unrealized loss identified as other than temporary was recorded directly in the Consolidated Statement of Income. As of January 1, 2009, the Company adopted FSP FAS 115-2 and FAS 124-2 (ASC 320-10-65-1). Accordingly, any credit-related impairment related to debt securities the Company does not plan to sell and is more-likely-than-not not to be required to sell is recognized in the Consolidated Statement of Income, with the non-credit-related impairment recognized in Other Comprehensive Income (OCI). For other impaired debt securities, the entire impairment is recognized in the Consolidated Statement of Income. See Note 1 to the Consolidated Financial Statements for additional information.

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

Edgar Filing: CITIGROUP INC - Form 10-Q

- (1) For securities transferred to HTM from *Trading account assets*, amortized cost is defined as the fair value amount of the securities at the date of transfer. For securities transferred to HTM from AFS, amortized cost is defined as the original purchase cost, plus or minus any accretion or amortization of interest, less any impairment previously recognized in earnings.
- (2) HTM securities are carried on the Consolidated Balance Sheet at amortized cost and the changes in the value of these securities, other than impairment charges, are not reported on the financial statements.
- (3) Reclassified to conform to the current period's presentation.

The net unrealized losses classified in accumulated other comprehensive income (AOCI) that relate to debt securities reclassified from AFS investments to HTM investments was \$8.5 billion as of June 30, 2009, compared to \$8.0 billion as of December 31, 2008. This balance is amortized over the remaining life of the related securities as an adjustment of yield in a manner consistent with the accretion of discount on the same transferred debt securities. This will have no impact on the Company's net income because the amortization of the unrealized holding loss reported in equity will offset the effect on interest income of the accretion of the discount on these securities.

Table of Contents

The table below shows the fair value of investments in HTM that have been in an unrealized loss position for less than 12 months or for 12 months or longer as of June 30, 2009 and December 31, 2008:

<i>In millions of dollars</i>	Less than 12 months		12 months or longer		Total

(3) Includes asset-backed securities and all other debt securities.

Table of Contents

Evaluating Investments for Other-than-Temporary Impairments

The Company conducts and documents periodic reviews of all securities with unrealized losses to evaluate whether the impairment is other than temporary. Prior to January 1, 2009, these reviews were conducted pursuant to FASB Staff Position No. FAS 115-1, *The Meaning of Other-Than-Temporary Impairment and its Application to Certain Investments* (FSP FAS 115-1/ASC 320-10-35). Any unrealized loss identified as other than temporary was recorded directly in the Consolidated Statement of Income. As of January 1, 2009, the Company adopted FSP FAS 115-2 and FAS 124-2 (ASC 320-10-65-1). Accordingly, any credit-related impairment related to debt securities the Company does not plan to sell and is not likely to be required to sell is recognized in the Consolidated Statement of Income, with the non-credit-related impairment recognized in OCI. For other impaired debt securities, the entire impairment is recognized in the Consolidated Statement of Income.

An unrealized loss exists when the current fair value of an individual security is less than its amortized cost basis. Unrealized losses that are determined to be temporary in nature are recorded, net of tax, in AOCI for AFS securities, while such losses related to HTM securities are not recorded, as these investments are carried at their amortized cost. For securities transferred to HTM from *Trading account assets*, amortized cost is defined as the fair value amount of the securities at the date of transfer, plus any accretion income and less any impairment recognized in earnings subsequent to transfer. For securities transferred to HTM from AFS, amortized cost is defined as the original purchase cost, plus or minus any accretion or amortization of a purchase discount or premium, less any impairment recognized in earnings subsequent to transfer.

Regardless of the classification of the securities as AFS or HTM, the Company has assessed each position for credit impairment.

Factors considered in determining whether a loss is temporary include:

the length of time and the extent to which fair value has been below cost;

the severity of the impairment;

the cause of the impairment and the financial condition and near-term prospects of the issuer;

activity in the market of the issuer which may indicate adverse credit conditions; and

the Company's ability and intent to hold the investment for a period of time sufficient to allow for any anticipated recovery.

The Company's review for impairment generally entails:

identification and evaluation of investments that have indications of possible impairment;

analysis of individual investments that have fair values less than amortized cost, including consideration of the length of time the investment has been in an unrealized loss position and the expected recovery period;

discussion of evidential matter, including an evaluation of factors or triggers that could cause individual investments to qualify as having other-than-temporary impairment and those that would not support other-than-temporary impairment; and

documentation of the results of these analyses, as required under business policies.

For equity securities, management considers the various factors described above, including its intent and ability to hold the equity security for a period of time sufficient for recovery to amortized cost. Where management lacks that intent or ability, the security's decline in fair value is deemed to be other than temporary and is recorded in earnings.

For debt securities that are not deemed to be credit impaired, management performs additional analysis to assess whether it intends to sell or would more-likely-than-not be required to sell the investment before the expected recovery of the amortized cost basis. In most cases, management has asserted that it has no intent to sell and that it believes it is more-likely-than-not that it will not be required to sell the investment before recovery of its amortized cost basis. Where such an assertion has not been made, the security's decline in fair value is deemed to be other than temporary and is recorded in earnings.

For debt securities, a critical component of the evaluation for other-than-temporary impairments is the identification of credit impaired securities, where management does not expect to receive cash flows sufficient to recover the entire amortized cost basis of the security. For securities purchased and classified as AFS with the expectation of receiving full principal and interest cash flows, this analysis considers the likelihood of receiving all contractual principal and interest. For securities reclassified out of the trading category in the fourth quarter of 2008, the analysis considered the likelihood of receiving the expected principal and interest cash flows anticipated as of the date of reclassification in the fourth quarter of 2008. The extent of the Company's analysis regarding credit quality and the stress on assumptions used in the analysis have been refined for securities where the current fair value or other characteristics of the security warrant. The paragraphs below describe the Company's process for identifying credit impairment in security types with the most significant unrealized losses as of June 30, 2009.

Mortgage-Backed Securities

For U.S. mortgage-backed securities (and in particular for Alt-A and other mortgage-backed securities that have significant unrealized losses as a percentage of amortized cost), credit impairment is assessed using a cash flow model that estimates the cash flows on the underlying mortgages, using the security-specific collateral and transaction structure. The model estimates cash flows from the underlying mortgage loans and distributes those cash flows to various tranches of securities, considering the transaction structure and any subordination and credit enhancements that exist in that structure. The cash flow model incorporates actual cash flows on the mortgage-backed securities through the current period and then projects the remaining cash flows using a number of assumptions, including default rates, prepayment rates, and recovery rates (on foreclosed properties).

Management develops specific assumptions using as much market data as possible and includes internal estimates

Table of Contents

as well as estimates published by rating agencies and other third-party sources. Default rates are projected by considering current underlying mortgage loan performance, generally assuming the default of (1) 10% of current loans, (2) 25% of 30-59 day delinquent loans, (3) 75% of 60-90 day delinquent loans and (4) 100% of 91+ day delinquent loans. These estimates are extrapolated along a default timing curve to estimate the total lifetime pool default rate. Other assumptions used contemplate the actual collateral attributes, including geographic concentrations, rating agency loss projections, rating actions and current market prices.

The key base assumptions for mortgage-backed securities as of June 30, 2009 are in the table below:

	June 30, 2009
Prepayment rate	3-8 CRR
Loss severity(1)	45%-75%
Unemployment rate	10%
Peak-to-trough housing price decline	32.3%

(1)

Loss severity rates are estimated considering collateral characteristics and generally range from 45%-55% for prime bonds, 50%-65% for Alt-A bonds, and 65%-75% for sub-prime bonds.

In addition, cash flow projections are developed using more stressful parameters, and management assesses the results of those stress tests (including the severity of any cash shortfall indicated and the likelihood of the stress scenario actually occurring based on the underlying pool's characteristics and performance) to assess whether management expects to recover the amortized cost basis of the security. If cash flow projections indicate that the Company does not expect to recover its amortized cost basis, the Company recognizes the estimated credit loss in earnings.

State and Municipal Securities

Citigroup's AFS state and municipal bonds consist primarily of bonds that are financed through Tender Option Bond programs. The process for identifying credit impairment for bonds in this program is largely based on third-party credit ratings. Individual bond positions must meet minimum ratings requirements, which vary based on the sector of the bond issuer. The average portfolio rating, ignoring any insurance, is Aa3/AA-.

Citigroup monitors the bond issuer and insurer ratings on a daily basis. In the event of a downgrade of the bond below the Aa3/AA-, the subject bond is specifically reviewed for potential shortfall in contractual principal and interest. Citigroup has not recorded any credit impairments on bonds held as part of the Tender Option Bond program.

The remainder of Citigroup's AFS state and municipal bonds, outside of the Tender Option Bond Programs, are specifically reviewed for credit impairment based on instrument-specific estimates of cash flows, probability of default and loss given default.

Recognition and Measurement of Other-Than-Temporary Impairment

AFS and HTM debt securities that have been identified as other-than-temporarily impaired are written down to their current fair value. For debt securities that are intended to be sold or that management believes more-likely-than-not will be required to be sold prior to recovery, the full impairment is recognized immediately in earnings.

For AFS and HTM debt securities that management has no intent to sell and believes that it more-likely-than-not will not be required to be sold prior to recovery, only the credit loss component of the impairment is recognized in earnings, while the rest of the fair value loss is recognized in OCI. The credit loss component recognized in earnings is identified as the amount of principal cash flows not expected to be received over the remaining term of the security as projected using the Company's cash flow projections using its base assumptions.

AFS equity securities deemed other-than-temporarily impaired are written down to fair value, with the full difference between fair value and amortized cost recognized in earnings.

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

The following table presents the total other-than-temporary impairments recognized during the three months and six months ended June 30, 2009:

Other-Than-Temporary Impairments (OTTI) on Investments

<i>In millions of dollars</i>	Three months ended June 30, 2009			Six months ended June 30, 2009		
	AFS	HTM	Total	AFS	HTM	Total

Table of Contents**11. GOODWILL AND INTANGIBLE ASSETS****Goodwill**

The changes in goodwill during the six months ended June 30, 2009 were as follows:

<i>In millions of dollars</i>	Goodwill
Balance at December 31, 2008	\$ 27,132
Foreign exchange translation	(844)
Purchase accounting adjustments and other	122
Balance at March 31, 2009	\$ 26,410
Morgan Stanley Smith Barney joint venture	(1,146)
Estimated impact from the Sale of Nikko Cordial Securities, reclassified as <i>Assets of discontinued operations held for sale</i>	(533)
Foreign exchange translation	847
Balance at June 30, 2009	\$ 25,578

Identification of New Reporting Units

The changes in the organizational structure resulted in the creation of new reporting segments. As a result, commencing with the second quarter 2009, the Company has identified new reporting units as required under SFAS 142, *Goodwill and Other Intangible Assets*. Goodwill affected by the reorganization has been reassigned from ten reporting units to nine, using a fair value approach. Subsequent to June 30, 2009, goodwill will be allocated to disposals and tested for impairment under the new reporting units.

During the first six months of 2009, no goodwill was written off due to impairment.

While no impairment was noted in step one of the Company's reporting unit impairment test, goodwill for the new Latin America Regional Consumer Banking and Local Consumer Lending Cards reporting units, may be particularly sensitive to further deterioration in economic conditions. If the future were to differ adversely from management's best estimate of key economic assumptions and associated cash flows were to decrease by a small margin, the Company could potentially experience future material impairment charges with respect to the \$1,265 million and \$4,781 million of goodwill remaining in our Latin America Regional Consumer Banking and Local Consumer Lending Cards reporting units, respectively. Any such charges, by themselves, would not negatively affect the Company's Tier 1, Tier 1 Common and Total Capital regulatory ratios, its Tangible Common Equity or the Company's liquidity position.

The following tables present the Company's goodwill balances by reporting unit and by segment at June 30, 2009:

<i>In millions of dollars</i>	June 30, 2009
By Reporting Unit	
North America Regional Consumer Banking	\$ 2,406
EMEA Regional Consumer Banking	306
Asia Regional Consumer Banking	5,392
Latin America Regional Consumer Banking	1,265
Securities and Banking	8,516
Transaction Services	1,561
Brokerage and Asset Management	1,299
Local Consumer Lending Cards	4,781
Local Consumer Lending Other	52
Total	\$ 25,578
By Segment	
Regional Consumer Banking	\$ 9,370
Institutional Clients Group	10,077
Citi Holdings	6,131

Total **\$ 25,578**

Intangible Assets

The components of intangible assets were as follows:

<i>In millions of dollars</i>	June 30, 2009			December 31, 2008		
	Gross carrying amount	Accumulated amortization	Net carrying amount	Gross carrying amount	Accumulated amortization	Net carrying amount
Purchased credit card relationships	\$ 8,418	\$ 4,748	\$ 3,670	\$ 8,443	\$ 4,513	\$ 3,930

Total intangible assets	\$ 24,083	\$ 7,215	\$ 16,868	\$ 26,708	\$ 6,892	\$ 19,816

(1) Includes contract-related intangible assets.

N/A Not Applicable.

Table of Contents

The changes in intangible assets during the six months ended June 30, 2009 were as follows:

<i>In millions of dollars</i>	Net carrying amount at December 31, 2008	Acquisitions / Divestitures	Amortization	Impairments	FX and other(1)	Net carrying amount at June 30, 2009
Purchased credit card relationships	\$ 3,930	\$	\$ (287)	\$	\$ 27	\$ 3,670
Core deposit intangibles	683		(58)	(3)	15	637
Other customer relationships(2)	3,863	(3,016)	(116)		(186)	545
Present value of future profits	151		(7)		1	145
Indefinite-lived intangible assets	1,474	(69)			(11)	1,394
Other	4,058	(155)	(149)	(46)	(1)	3,707
	\$ 14,159	\$ (3,240)	\$ (617)	\$ (49)	\$ (155)	\$ 10,098
Mortgage servicing rights(3)	5,657					6,770
Total intangible assets	\$ 19,816					\$ 16,868

(1) Includes the impact of FX translation and purchase accounting adjustments.

(2) Decrease during the second quarter of 2009 is due to the reclassification of assets of the Nikko Cordial businesses to *Assets of discontinued operations held for sale* as described in Note 2 to the Consolidated Financial Statements.

(3) See Note 15 to the Consolidated Financial Statements for the roll-forward of mortgage servicing rights.

Table of Contents**12. DEBT****Short-Term Borrowings**

Short-term borrowings consist of commercial paper and other borrowings as follows:

<i>In millions of dollars</i>	June 30, 2009	December 31, 2008
Commercial paper		
Citigroup Funding Inc.	\$ 27,862	\$ 28,654
Other Citigroup subsidiaries	633	471
	\$ 28,495	\$ 29,125
Other short-term borrowings	73,399	97,566
Total short-term borrowings	\$ 101,894	\$ 126,691

Borrowings under bank lines of credit may be at interest rates based on LIBOR, CD rates, the prime rate, or bids submitted by the banks. Citigroup pays commitment fees for its lines of credit.

Some of Citigroup's non-bank subsidiaries have credit facilities with Citigroup's subsidiary depository institutions, including Citibank, N.A. Borrowings under these facilities must be secured in accordance with Section 23A of the Federal Reserve Act.

Citigroup Global Markets Holdings Inc. (CGMHI) has committed financing with unaffiliated banks. At June 30, 2009, CGMHI had drawn down the full \$1.175 billion available under these facilities, of which \$725 million is guaranteed by Citigroup. CGMHI has bilateral facilities totaling \$500 million with unaffiliated banks with maturities occurring on various dates in the second half of 2009. It also has substantial borrowing agreements consisting of facilities that CGMHI has been advised are available, but where no contractual lending obligation exists. These arrangements are reviewed on an ongoing basis to ensure flexibility in meeting CGMHI's short-term requirements.

Long-Term Debt

<i>In millions of dollars</i>	June 30, 2009	December 31, 2008
Citigroup parent company	\$ 192,295	\$ 192,290
Other Citigroup subsidiaries(1)	96,497	109,306
Citigroup Global Markets Holdings Inc. (CGMHI)	15,134	20,623
Citigroup Funding Inc. (CFI)(2)	44,120	37,374
Total long term debt	\$ 348,046	\$ 359,593

(1) At June 30, 2009 and December 31, 2008, collateralized advances from the Federal Home Loan Bank are \$38.5 billion and \$67.4 billion, respectively.

(2) Includes Principal-Protected Trust Securities (Safety First Trust Securities) with carrying values of \$494 million issued by Safety First Trust Series 2006-1, 2007-1, 2007-2, 2007-3, 2007-4, 2008-1, 2008-2, 2008-3, 2008-4, 2008-5, 2008-6, 2009-1, 2009-2, and 2009-3 (collectively, the "Safety First Trusts") at June 30, 2009 and \$452 million issued by Safety First Trust Series 2006-1, 2007-1, 2007-2, 2007-3, 2007-4, 2008-1, 2008-2, 2008-3, 2008-4, 2008-5 and 2008-6 at December 31, 2008. CFI owns all of the voting securities of the Safety First Trusts. The Safety First Trusts have no assets, operations, revenues or cash flows other than those related to the issuance, administration, and repayment of the Safety First Trust Securities and the Safety First Trusts' common securities. The Safety First Trusts' obligations under the Safety First Trust Securities are fully and unconditionally guaranteed by CFI, and CFI's guarantee obligations are fully and unconditionally guaranteed by Citigroup.

Edgar Filing: CITIGROUP INC - Form 10-Q

CGMHI has a syndicated five-year committed uncollateralized revolving line of credit facility with unaffiliated banks totaling \$3.0 billion, which was undrawn at June 30, 2009 and matures in 2011. CGMHI also has committed long-term financing facilities with unaffiliated banks. At June 30, 2009, CGMHI had drawn down the full \$900 million available under these facilities, of which \$350 million is guaranteed by Citigroup. Generally, a bank can terminate these facilities by giving CGMHI one-year prior notice.

The Company issues both fixed and variable rate debt in a range of currencies. It uses derivative contracts, primarily interest rate swaps, to effectively convert a portion of its fixed rate debt to variable rate debt and variable rate debt to fixed rate debt. The maturity structure of the derivatives generally corresponds to the maturity structure of the debt being hedged. In addition, the Company uses other derivative contracts to manage the impact of FX translation certain debt issuances.

Citigroup and other U.S. financial services firms are currently benefiting from government programs that are improving markets and providing Citigroup and other institutions with significant current funding capacity and significant liquidity support, including the Temporary Liquidity Guarantee Program (TLGP). See "TARP and Other Regulatory Programs" above.

Long-term debt at June 30, 2009 and December 31, 2008 includes \$24.2 billion and \$24.1 billion, respectively, of junior subordinated debt. The Company formed statutory business trusts under the laws of the state of Delaware. The trusts exist for the exclusive purposes of (1) issuing trust securities representing undivided beneficial interests in the assets of the trust; (2) investing the gross proceeds of the trust securities in junior subordinated deferrable interest debentures (subordinated debentures) of its parent; and (3) engaging in only those activities necessary or incidental thereto. Upon approval from the Federal Reserve Board, Citigroup has the right to redeem these securities.

Citigroup has contractually agreed not to redeem or purchase (i) the 6.50% Enhanced Trust Preferred Securities of Citigroup Capital XV before September 15, 2056, (ii) the 6.45% Enhanced Trust Preferred Securities of Citigroup

Table of Contents

Capital XVI before December 31, 2046, (iii) the 6.35% Enhanced Trust Preferred Securities of Citigroup Capital XVII before March 15, 2057, (iv) the 6.829% Fixed Rate/Floating Rate Enhanced Trust Preferred Securities of Citigroup Capital XVIII before June 28, 2047, (v) the 7.250% Enhanced Trust Preferred Securities of Citigroup Capital XIX before August 15, 2047, (vi) the 7.875% Enhanced Trust Preferred Securities of Citigroup Capital XX before December 15, 2067, and (vii) the 8.300% Fixed Rate/Floating Rate Enhanced Trust Preferred Securities of Citigroup Capital XXI before December 21, 2067, unless certain conditions, described in Exhibit 4.03 to Citigroup's Current Report on Form 8-K filed on September 18, 2006, in Exhibit 4.02 to Citigroup's Current Report on Form 8-K filed on November 28, 2006, in Exhibit 4.02 to Citigroup's Current Report on Form 8-K filed on March 8, 2007, in Exhibit 4.02 to Citigroup's Current Report on Form 8-K filed on July 2, 2007, in Exhibit 4.02 to Citigroup's Current Report on Form 8-K filed on August 17, 2007, in Exhibit 4.2 to Citigroup's Current Report on Form 8-K filed on November 27, 2007, and in Exhibit 4.2 to Citigroup's Current Report on Form 8-K filed on December 21, 2007, respectively, are met. These agreements are for the benefit of the holders of Citigroup's 6.00% Junior Subordinated Deferrable Interest Debentures due 2034. In addition, see Note 23 to the Consolidated Financial Statements, "Exchange Offers," below.

Citigroup owns all of the voting securities of these subsidiary trusts. These subsidiary trusts have no assets, operations, revenues or cash flows other than those related to the issuance, administration, and repayment of the subsidiary trusts and the subsidiary trusts' common securities. These subsidiary trusts' obligations are fully and unconditionally guaranteed by Citigroup.

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

The following table summarizes the financial structure of each of the Company's subsidiary trusts at June 30, 2009:

Trust securities with distributions guaranteed by Citigroup	Junior subordinated debentures owned by trust							
	<i>In millions of dollars, except share amounts</i>	Issuance date	Securities issued	Liquidation value	Coupon rate	Common shares issued to parent	Amount(1)	Maturity

(1) Represents the proceeds received from the trust at the date of issuance.

In each case, the coupon rate on the debentures is the same as that on the trust securities. Distributions on the trust securities and interest on the debentures are payable quarterly, except for Citigroup Capital III, Citigroup Capital XVIII and Citigroup Capital XXI on which distributions are payable semiannually.

During the second quarter of 2009, Citigroup did not issue any trust preferred securities. In addition, see Note 23 to the Consolidated Financial Statements, "Exchange Offers," below.

Table of Contents**13. PREFERRED STOCK**

The following table summarizes the Company's preferred stock outstanding at June 30, 2009 and December 31, 2008:

	Dividend rate	Redemption price per depositary share / preference share	Number of depositary shares	Convertible to approximate number of Citigroup common shares	Carrying value (in millions of dollars)	
					June 30, 2009	December 31, 2008
Series A1(1)	7.000%	\$ 50	137,600,000	261,083,726	\$ 6,880	\$ 6,880
Series B1(1)	7.000%	50	60,000,000	113,844,648	3,000	3,000
Series C1(1)	7.000%	50	20,000,000	37,948,216	1,000	1,000
Series D1(1)	7.000%	50	15,000,000	28,461,162	750	750
Series E(2)	8.400%	1,000	6,000,000		6,000	6,000

				568,293,689	\$ 74,301	\$ 70,664

- (1) Issued on January 23, 2008 as depositary shares, each representing a 1/1,000th interest in a share of the corresponding series of Non-Cumulative Convertible Preferred Stock. Redeemable in whole or in part on or after February 15, 2015. Under the terms of pre-existing conversion price reset agreements with holders of Series A, B, C, D, J, K, L1 and N (the "Old Preferred Stock"), on February 17, 2009, Citigroup exchanged shares of new preferred stock (the "New Preferred Stock") for an equal number of shares of Old Preferred Stock. The terms and conditions of the New Preferred Stock were identical in all material respects to the terms and conditions of the Old Preferred Stock, except that the Conversion Price and Conversion Rate of the New Preferred Stock were reset to \$26.3517 and 1,897.4108, respectively. All shares of the Old Preferred Stock were canceled. The dividend of \$0.88 per depositary share is payable quarterly when, as and if declared by the Company's Board of Directors. Redemption is subject to a capital replacement covenant.
- (2) Issued on April 28, 2008 as depositary shares, each representing a 1/25th interest in a share of the corresponding series of Fixed Rate/Floating Rate Non-Cumulative Preferred Stock. Redeemable in whole or in part on or after April 30, 2018. Dividends are payable semi-annually for the first 10 years until April 30, 2018 at \$42.00 per depositary share and thereafter quarterly at a floating rate when, as and if declared by the Company's Board of Directors.
- (3) Issued on May 13, 2008 and May 28, 2008 as depositary shares, each representing a 1/1,000th interest in a share of the corresponding series of Non-Cumulative Preferred Stock. Redeemable in whole or in part on or after June 15, 2013. The dividend of \$0.53 per depositary share is payable quarterly when, as and if declared by the Company's Board of Directors.
- (4) Issued on January 15, 2009 as shares of Cumulative Preferred Stock to the U.S. Treasury and the FDIC as consideration for guaranteeing approximately \$300.8 billion of assets. Redeemable in whole or in part subject to approval of the investor and compliance with certain conditions. The dividend of \$20,000 per preferred share is payable quarterly when, as and if declared by the

Edgar Filing: CITIGROUP INC - Form 10-Q

Company's Board of Directors.

- (5) Issued on October 28, 2008 as shares of Cumulative Preferred Stock to the U.S. Treasury under the Troubled Asset Relief Program (TARP). Redeemable in whole or in part subject to approval of the investor and compliance with certain conditions. Dividends are payable quarterly for the first five years until February 15, 2013 at \$12,500 per preferred share and thereafter at \$22,500 per preferred share when, as and if declared by the Company's Board of Directors.
- (6) Issued on December 31, 2008 as shares of Cumulative Preferred Stock to the U.S. Treasury under TARP. Redeemable in whole or in part subject to approval of the investor and compliance with certain conditions. The dividend of \$20,000 per preferred share is payable quarterly when, as and if declared by the Company's Board of Directors.
- (7) Issued on January 23, 2008 and January 29, 2008 as depositary shares, each representing a 1/1,000th interest in a share of the corresponding series of Non-Cumulative Convertible Preferred Stock. Redeemable in whole or in part on or after February 15, 2015. Convertible into Citigroup common stock at a conversion rate of approximately 1,482.3503 per share, which is subject to adjustment under certain conditions. The dividend of \$0.81 per depositary share is payable quarterly when, as and if declared by the Company's Board of Directors. Redemption is subject to a capital replacement covenant.
- (8) Issued on January 25, 2008 as depositary shares, each representing a 1/1,000th interest in a share of the corresponding series of Non-Cumulative Preferred Stock. Redeemable in whole or in part on or after February 15, 2018. The dividend of \$0.51 per depositary share is payable quarterly when, as and if declared by the Company's Board of Directors. Redemption is subject to a capital replacement covenant.

If dividends were to be declared on Series E as scheduled, the impact from preferred dividends on earnings per share in the first and third quarters will be lower than the impact in the second and fourth quarters. All other series have a quarterly dividend declaration schedule. As previously announced, following the closing of the public exchange offers, Citigroup suspended payment of dividends on all remaining outstanding preferred securities.

Other than securities containing customary anti-dilution provisions, Citigroup's only outstanding instruments subject to potential resets are the warrant to purchase 210,084,034 shares of common stock issued to the U.S. Treasury as part of TARP on November 28, 2008, the warrant to purchase 188,501,414 shares of common stock issued to the U.S. Treasury as part of

Table of Contents

TARP on December 31, 2008, and the warrant to purchase 66,531,728 shares of common stock issued to the U.S. Treasury as consideration for the loss-sharing agreement on January 15, 2009. Under the terms of the warrants, the number of shares of common stock for which the warrants are exercisable and the exercise price of the warrants will be subject to a reset if, prior to the third anniversary of issue date of the warrants, Citigroup issues shares of common stock (or rights or warrants or other securities exercisable or convertible into or exchangeable for shares of common stock) (collectively, "convertible securities") without consideration or at a consideration per share (or having a conversion price per share) that is less than 90% of the market price of Citigroup's common stock on the last trading day preceding the date of the agreement on pricing such shares (or such convertible securities), subject to specified exceptions.

In addition, see Note 23 to the Consolidated Financial Statements, "Exchange Offers," below.

Table of Contents**14. CHANGES IN ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)**

Changes in each component of Accumulated Other Comprehensive Income (Loss) (AOCI) for the first and second quarters of 2009 were as follows:

<i>In millions of dollars</i>	Net unrealized gains (losses) on investment securities	Foreign currency translation adjustment, net of hedges	Cash flow hedges	Pension liability adjustments	Accumulated other comprehensive income (loss)
Balance, December 31, 2008	\$ (9,647)	\$ (7,744)	\$ (5,189)	\$ (2,615)	\$ (25,195)

Change	\$ 2,985	\$ 2,406	\$ 41	\$ (62)	\$ 5,370
Citigroup Stockholders AOCI balance, June 30, 2009	\$ (7,055)	\$ (8,312)	\$ (3,665)	\$ (2,611)	\$ (21,643)

(1) Primarily related to AFS municipal and other debt securities.

(2) Reflects, among other items, the movements in the Japanese yen, Korean won, Euro, Pound Sterling, Polish Zloty, Mexican peso and the Singapore dollar against the U.S. dollar, and changes in related tax effects.

(3) Decrease (increase) in net unrealized gains (losses) on investment securities, net of taxes includes the change in the hedged senior debt securities retained from the sale of a portfolio of highly leveraged loans. The offsetting change in the corresponding cash flow hedge is reflected in Cash Flow hedges, net of taxes.

(4)

Reflects, among other items, the movements in the British Pound, Mexican Peso, Japanese Yen, Australian Dollar, Korean Won, and the Euro against the U.S. dollar, and changes in related tax effects.

Table of Contents**15. SECURITIZATIONS AND VARIABLE INTEREST ENTITIES****Overview**

Citigroup and its subsidiaries are involved with several types of off-balance sheet arrangements, including special purpose entities (SPEs). See Note 1 to the Consolidated Financial Statements for a discussion of impending accounting changes to SFAS 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities* (SFAS 140 /ASC 860), and FASB Interpretation No. 46, "Consolidation of Variable Interest Entities (revised December 2003) (FIN 46 (R)/ASC 810-10)."

Uses of SPEs

An SPE is an entity designed to fulfill a specific limited need of the company that organized it.

The principal uses of SPEs are to obtain liquidity and favorable capital treatment by securitizing certain of Citigroup's financial assets, to assist clients in securitizing their financial assets, and to create investment products for clients. SPEs may be organized in many legal forms including trusts, partnerships or corporations. In a securitization, the company transferring assets to an SPE converts those assets into cash before they would have been realized in the normal course of business, through the SPE's issuance of debt and equity instruments, certificates, commercial paper and other notes of indebtedness, which are recorded on the balance sheet of the SPE and not reflected on the transferring company's balance sheet, assuming applicable accounting requirements are satisfied. Investors usually have recourse to the assets in the SPE and often benefit from other credit enhancements, such as a collateral account or over collateralization in the form of excess assets in the SPE, or from a liquidity facility, such as a line of credit, liquidity put option or asset purchase agreement. The SPE can typically obtain a more favorable credit rating from rating agencies than the transferor could obtain for its own debt issuances, resulting in less expensive financing costs. The SPE may also enter into derivative contracts in order to convert the yield or currency of the underlying assets to match the needs of the SPE investors, or to limit or change the credit risk of the SPE. Citigroup may be the provider of certain credit enhancements as well as the counterparty to any related derivative contracts.

SPEs may be Qualifying SPEs (QSPEs) or Variable Interest Entities (VIEs) or neither.

Qualifying SPEs

QSPEs are a special class of SPEs defined in SFAS 140 /ASC 860-40-15. QSPEs have significant limitations on the types of assets and derivative instruments they may own or enter into and the types and extent of activities and decision-making they may engage in. Generally, QSPEs are passive entities designed to purchase assets and pass through the cash flows from those assets to the investors in the QSPE. QSPEs may not actively manage their assets through discretionary sales and are generally limited to making decisions inherent in servicing activities and issuance of liabilities. QSPEs are generally exempt from consolidation by the transferor of assets to the QSPE and any investor or counterparty.

Variable Interest Entities

VIEs are entities defined in FIN 46(R)/ASC 810-10-15, as entities that have either a total equity investment that is insufficient to permit the entity to finance its activities without additional subordinated financial support or whose equity investors lack the characteristics of a controlling financial interest (i.e., ability to make significant decisions through voting rights, right to receive the expected residual returns of the entity and obligation to absorb the expected losses of the entity). Investors that finance the VIE through debt or equity interests or other counterparties that provide other forms of support, such as guarantees, subordinated fee arrangements, or certain types of derivative contracts, are variable interest holders in the entity. The variable interest holder, if any, that will absorb a majority of the entity's expected losses, receive a majority of the entity's expected residual returns, or both, is deemed to be the primary beneficiary and must consolidate the VIE. Consolidation of a VIE is determined based primarily on variability generated in scenarios that are considered most likely to occur, rather than based on scenarios that are considered more remote. Certain variable interests may absorb significant amounts of losses or residual returns contractually, but if those scenarios are considered very unlikely to occur, they may not lead to consolidation of the VIE.

All of these facts and circumstances are taken into consideration when determining whether the Company has variable interests that would deem it the primary beneficiary and, therefore, require consolidation of the related VIE or otherwise rise to the level where disclosure would provide useful information to the users of the Company's financial statements. In some cases, it is qualitatively clear based on the extent of the Company's involvement or the seniority of its investments that the Company is not the primary beneficiary of the VIE. In other cases, a more detailed and quantitative analysis is required to make such a determination.

The Company generally considers the following types of involvement to be significant:

Edgar Filing: CITIGROUP INC - Form 10-Q

assisting in the structuring of a transaction and retaining any amount of debt financing (e.g., loans, notes, bonds or other debt instruments) or an equity investment (e.g., common shares, partnership interests or warrants);

writing a "liquidity put" or other liquidity facility to support the issuance of short-term notes;

writing credit protection (e.g., guarantees, letters of credit, credit default swaps or total return swaps where the Company receives the total return or risk on the assets held by the VIE); or

certain transactions where the Company is the investment manager and receives variable fees for services.

In various other transactions, the Company may act as a derivative counterparty (for example, interest rate swap, cross-currency swap, or purchaser of credit protection under a credit default swap or total return swap where the Company pays the total return on certain assets to the SPE); may act as underwriter or placement agent; may provide administrative, trustee, or other services; or may make a market in debt securities or other instruments issued by VIEs. The Company generally considers such involvement, by itself, "not significant" under FIN 46(R)/ASC 810-10-25.

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

Citigroup's involvement with QSPEs, Consolidated and Unconsolidated VIEs with which the Company holds significant variable interests as of June 30, 2009 and December 31, 2008 is presented below:

<i>In millions of dollars</i>	As of June 30, 2009				Maximum exposure to loss in significant unconsolidated VIEs(1)

(1) Reclassified to conform to the current period's presentation.

(2) A significant unconsolidated VIE is an entity where the Company has any variable interest considered to be significant, regardless of the likelihood of loss or the notional amount of exposure.

(3) The definition of maximum exposure to loss is included in the text that follows.

Table of Contents

This table does not include:

certain venture capital investments made by some of the Company's private equity subsidiaries, as the Company accounts for these investments in accordance with the Investment Company Audit Guide;

certain limited partnerships where the Company is the general partner and the limited partners have the right to replace the general partner or liquidate the funds;

certain investment funds for which the Company provides investment management services and personal estate trusts for which the Company provides administrative, trustee and/or investment management services;

VIEs structured by third parties where the Company holds securities in inventory. These investments are made on arm's-length terms; and

transferred assets to a VIE where the transfer did not qualify as a sale and where the Company did not have any other involvement that is deemed to be a variable interest with the VIE. These transfers are accounted for as secured borrowings by the Company.

The asset balances for consolidated VIEs represent the carrying amounts of the assets consolidated by the Company. The carrying amount may represent the amortized cost or the current fair value of the assets depending on the legal form of the asset (e.g., security or loan) and the Company's standard accounting policies for the asset type and line of business.

The asset balances for unconsolidated VIEs where the Company has significant involvement represent the most current information available to the Company. In most cases, the asset balances represent an amortized cost basis without regard to impairments in fair value, unless fair value information is readily available to the Company. For VIEs that obtain asset exposures synthetically through derivative instruments (for example, synthetic CDOs), the table includes the full original notional amount of the derivative as an asset.

The maximum funded exposure represents the balance sheet carrying amount of the Company's investment in the VIE. It reflects the initial amount of cash invested in the VIE plus any accrued interest and is adjusted for any impairments in value recognized in earnings and any cash principal payments received. The maximum exposure of unfunded positions represents the remaining undrawn committed amount, including liquidity and credit facilities provided by the Company, or the notional amount of a derivative instrument considered to be a variable interest, adjusted for any declines in fair value recognized in earnings. In certain transactions, the Company has entered into derivative instruments or other arrangements that are not considered variable interests in the VIE under FIN 46(R)/ASC 810-10-15 (e.g., interest rate swaps, cross-currency swaps, or where the Company is the purchaser of credit protection under a credit default swap or total return swap where the Company pays the total return on certain assets to the SPE). Receivables under such arrangements are not included in the maximum exposure amounts.

Funding Commitments for Significant Unconsolidated VIEs Liquidity Facilities and Loan Commitments

The following table presents the notional amount of liquidity facilities and loan commitments that are classified as funding commitments in the SPE table as of June 30, 2009:

<i>In billions of dollars</i>	Liquidity Facilities	Loan Commitments
<i>Citicorp</i>		
Citi-administered asset-backed commercial paper conduits (ABCP)	\$ 25,506	\$ 4,200
Third-party commercial paper conduits	552	10
Asset-based financing		410
Municipal securities tender option bond trusts (TOBs)	6,543	
Total Citicorp	\$ 32,601	\$ 4,620

Edgar Filing: CITIGROUP INC - Form 10-Q

<i>Citi Holdings</i>			
Citi-administered asset-backed commercial paper conduits (ABCP)	\$ 14,180	\$	
Third-party commercial paper conduits	169		
Collateralized loan obligations (CLOs)			12
Asset-based financing			1,543
Municipal investments			611
Other			269
Total Citi Holdings	\$ 14,349	\$	2,435
Total Citigroup funding commitments	\$ 46,950	\$	7,055

Table of Contents***Citicorp's Consolidated VIEs Balance Sheet Classification***

The following table presents the carrying amounts and classifications of consolidated assets that are collateral for consolidated VIE obligations:

<i>In billions of dollars</i>	June 30, 2009	December 31, 2008
Cash	\$ 0.4	\$ 0.7
Trading account assets	3.0	4.3
Investments	17.0	12.5
Loans	0.2	0.5
Other assets	2.1	1.7
Total assets of consolidated VIEs	\$ 22.7	\$ 19.7

The following table presents the carrying amounts and classification of the third-party liabilities of the consolidated VIEs:

<i>In billions of dollars</i>	June 30, 2009	December 31, 2008
Short-term borrowings	\$ 16.8	\$ 14.2
Long-term debt	5.7	5.6
Other liabilities	0.2	0.9
Total liabilities of consolidated VIEs	\$ 22.7	\$ 20.7

The consolidated VIEs included in the table above represent hundreds of separate entities with which the Company is involved. In general, the third-party investors in the obligations of consolidated VIEs have legal recourse only to the assets of the VIEs and do not have such recourse to the Company, except where the Company has provided a guarantee to the investors or is the counterparty to certain derivative transactions involving the VIE. In addition, the assets are generally restricted only to pay such liabilities. Thus, the Company's maximum legal exposure to loss related to consolidated VIEs is significantly less than the carrying value of the consolidated VIE assets due to outstanding third-party financing. Intercompany liabilities are excluded from the table.

Citi Holdings' Consolidated VIEs Balance Sheet Classification

The following table presents the carrying amounts and classifications of consolidated assets that are collateral for consolidated VIE obligations:

<i>In billions of dollars</i>	June 30, 2009	December 31, 2008
Cash	\$ 0.7	\$ 1.2
Trading account assets	10.5	16.6
Investments	3.1	3.3
Loans	1.8	2.1
Other assets	0.7	0.7
Total assets of consolidated VIEs	\$ 16.8	\$ 23.9

The following table presents the carrying amounts and classification of the third-party liabilities of the consolidated VIEs:

<i>In billions of dollars</i>	June 30, 2009	December 31, 2008
Trading account liabilities	\$ 0.2	\$ 0.5
Short-term borrowings	2.9	2.8
Long-term debt	0.5	1.2
Other liabilities	1.2	2.1
Total liabilities of consolidated VIEs	\$ 4.8	\$ 6.6

Citicorp's Significant Interests in Unconsolidated VIEs Balance Sheet Classification

The following table presents the carrying amounts and classification of significant interests in unconsolidated VIEs:

<i>In billions of dollars</i>	June 30, 2009	December 31, 2008
Trading account assets	\$ 1.2	\$ 1.9
Investments	0.2	0.2
Loans	3.4	3.5
Other assets	0.6	0.4
Total assets of significant interest in unconsolidated VIEs	\$ 5.4	\$ 6.0

<i>In billions of dollars</i>	June 30, 2009	December 31, 2008
Long-term debt	\$ 0.5	\$ 0.4
Total liabilities of significant interest in unconsolidated VIEs	\$ 0.5	\$ 0.4

Citi Holdings' Significant Interests in Unconsolidated VIEs Balance Sheet Classification

The following table presents the carrying amounts and classification of significant interests in unconsolidated VIEs:

<i>In billions of dollars</i>	June 30, 2009	December 31, 2008
Trading account assets	\$ 4.0	\$ 4.4
Investments	9.8	8.2
Loans	12.8	12.4
Other assets	0.1	2.6
Total assets of significant interest in unconsolidated VIEs	\$ 26.7	\$ 27.6

<i>In billions of dollars</i>	June 30, 2009	December 31, 2008
Trading account liabilities	\$ 0.5	\$ 0.2
Other liabilities	0.4	0.6
Total liabilities of significant interest in unconsolidated VIEs	\$ 0.9	\$ 0.8

Table of Contents**Credit Card Securitizations**

The Company securitizes credit card receivables through trusts that are established to purchase the receivables. Citigroup sells receivables into the QSPE trusts on a non-recourse basis. Credit card securitizations are revolving securitizations; that is, as customers pay their credit card balances, the cash proceeds are used to purchase new receivables and replenish the receivables in the trust. The Company relies on securitizations to fund a significant portion of its managed *North America* Cards business.

The following table reflects amounts related to the Company's securitized credit card receivables at June 30, 2009 and December 31, 2008:

<i>In billions of dollars</i>	Citicorp		Citi Holdings	
	June 30, 2009	December 31, 2008	June 30, 2009	December 31, 2008
Principal amount of credit card receivables in trusts	\$ 77.4	\$ 78.3	\$ 42.6	\$ 45.7
Ownership interests in principal amount of trust credit card receivables:				
Sold to investors via trust-issued securities	65.5	68.2	28.3	30.0
Retained by Citigroup as trust-issued securities	5.1	1.2	9.0	5.4
Retained by Citigroup via non-certificated interests recorded as consumer loans	6.8	8.9	5.3	10.3
Total ownership interests in principal amount of trust credit card receivables	\$ 77.4	\$ 78.3	\$ 42.6	\$ 45.7
Other amounts recorded on the balance sheet related to interests retained in the trusts:				
Other retained interests in securitized assets	\$ 1.2	\$ 1.2	\$ 1.6	\$ 2.0
Residual interest in securitized assets(1)	0.3	0.3	1.0	1.4
Amounts payable to trusts	1.2	1.0	0.7	0.7

(1)

June 30, 2009 balances include net unbilled interest of \$0.3B for Citicorp and \$0.4B for Citi Holdings. December 31, 2008 balances included net unbilled interest of \$0.3B for Citicorp and \$0.3B for Citi Holdings.

Credit Card Securitizations Citicorp

In the second quarter of 2009 and 2008, the Company recorded net gains (losses) from securitization of Citicorp's credit card receivables of \$51 million and (\$141) million, and \$151 million and (\$146) million for the six months ended June 30, 2009 and 2008, respectively. Net gains (losses) reflect the following:

- incremental gains (losses) from new securitizations;
- the reversal of the allowance for loan losses associated with receivables sold;
- net gains on replenishments of the trust assets offset by other-than-temporary impairments; and
- changes in fair value for the portion of the residual interest classified as trading assets.

The following tables summarize selected cash flow information related to Citicorp's credit card securitizations for the three and six months ended June 30, 2009 and 2008:

Edgar Filing: CITIGROUP INC - Form 10-Q

<i>In billions of dollars</i>	Three months ended	
	June 30, 2009	June 30, 2008
Proceeds from new securitizations	\$ 5.9	\$ 3.2
Proceeds from collections reinvested in new receivables	36.1	44.6
Contractual servicing fees received	0.3	0.3
Cash flows received on retained interests and other net cash flows	0.7	1.0

<i>In billions of dollars</i>	Six months ended	
	June 30, 2009	June 30, 2008
Proceeds from new securitizations	\$ 10.6	\$ 9.2
Proceeds from collections reinvested in new receivables	71.5	86.7
Contractual servicing fees received	0.6	0.6
Cash flows received on retained interests and other net cash flows	1.6	2.1

As of June 30, 2009 and December 31, 2008, the residual interest in securitized credit card receivables was valued at \$0 for Citicorp. As such, key assumptions used in measuring the fair value of the residual interest are not provided for the three months ended June 30, 2009 or as of June 30, 2009. Key assumptions used in measuring the fair value of the residual interests at the date of sale or securitization of Citicorp's credit card receivables for the three months ended June 30 2008 are as follows:

	June 30, 2009	June 30, 2008
Discount rate	NA	14.5%
Constant prepayment rate	NA	5.9% to 20.3%
Anticipated net credit losses	NA	5.1% to 5.2%

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

At June 30, 2009, the sensitivity of the fair value to adverse changes of 10% and 20% in each of the key assumptions were as follows:

<i>In millions of dollars</i>	Residual interest	Retained certificates	Other retained interests
Carrying value of retained interests	\$	\$ 5,177	\$ 1,426
Discount rates			
Adverse change of 10%	\$	\$ (13)	\$ (1)
Adverse change of 20%		(25)	(2)
Constant prepayment rate			
Adverse change of 10%	\$	\$	\$
Adverse change of 20%			
Anticipated net credit losses			
Adverse change of 10%	\$	\$	\$ (36)
Adverse change of 20%			(71)

Managed Loans Citicorp

After securitization of credit card receivables, the Company continues to maintain credit card customer account relationships and provides servicing for receivables transferred to the trusts. As a result, the Company considers the securitized credit card receivables to be part of the business it manages.

Managed-basis (Managed) presentations are non-GAAP financial measures. Managed presentations include results from both the on-balance sheet loans and off-balance sheet loans, and exclude the impact of card securitization activity. Managed presentations assume that securitized loans have not been sold and present the results of the securitized loans in the same manner as Citigroup's owned loans. Citigroup's management believes that Managed presentations provide a greater understanding of ongoing operations and enhance comparability of those results in prior periods as well as demonstrating the effects of unusual gains and charges in the current period. Management further believes that a meaningful analysis of the Company's financial performance requires an understanding of the factors underlying that performance and that investors find it useful to see these non-GAAP financial measures to analyze financial performance without the impact of unusual items that may obscure trends in Citigroup's underlying performance.

The following tables present a reconciliation between the Managed basis and on-balance sheet credit card portfolios and the related delinquencies (loans which are 90 days or more past due) and credit losses, net of recoveries.

<i>In millions of dollars, except loans in billions</i>	June 30, 2009	December 31, 2008
Loan amounts, at period end		
On balance sheet	\$ 42.1	\$ 45.5
Securitized amounts	70.7	69.5
Total managed loans	\$ 112.8	\$ 115.0
Delinquencies, at period end		
On balance sheet	\$ 1,459	\$ 1,402
Securitized amounts	1,898	1,543
Total managed delinquencies	\$ 3,357	\$ 2,945
Credit losses, net of recoveries, for the three months ended June 30,	2009	2008
On balance sheet	\$ 978	\$ 700
Securitized amounts	1,838	1,043
Total managed	\$ 2,816	\$ 1,743

Edgar Filing: CITIGROUP INC - Form 10-Q

<i>Credit losses, net of recoveries, for the six months ended June 30,</i>	2009	2008
On balance sheet	\$ 1,815	\$ 1,338
Securitized amounts	3,329	1,923
Total managed	\$ 5,144	\$ 3,261

Credit Card Securitizations Citi Holdings

In the second quarter of 2009 and 2008, the Company recorded net gains (losses) from securitization of Citi Holding's credit card receivables of (\$612) million and (\$35), and (\$676) and \$192 for the six months ended June 30, 2009 and 2008, respectively.

The following tables summarize selected cash flow information related to Citi Holding's credit card securitizations for the three and six months ended June 30, 2009 and 2008:

<i>In billions of dollars</i>	Three months ended	
	June 30, 2009	June 30, 2008
Proceeds from new securitizations	\$ 10.6	\$ 6.8
Proceeds from collections reinvested in new receivables	13.6	13.0
Contractual servicing fees received	0.2	0.2
Cash flows received on retained interests and other net cash flows	0.6	0.9

<i>In billions of dollars</i>	Six months ended	
	June 30, 2009	June 30, 2008
Proceeds from new securitizations	\$ 18.7	\$ 10.8
Proceeds from collections reinvested in new receivables	25.8	26.4
Contractual servicing fees received	0.4	0.4
Cash flows received on retained interests and other net cash flows	1.2	1.8

Key assumptions used in measuring the fair value of the residual interest at the date of sale or securitization of Citi Holding's credit card receivables for the three months ended June 30, 2009 and 2008, respectively, are as follows:

	June 30, 2009	June 30, 2008
Discount rate	19.7%	17.9%
Constant prepayment rate	6.0% to 10.7%	7.1% to 12.2%
Anticipated net credit losses	12.2% to 13.1%	6.6% to 6.8%

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

The constant prepayment rate assumption range reflects the projected payment rates over the life of a credit card balance, excluding new card purchases. This results in a high payment in the early life of the securitized balances followed by a much lower payment rate, which is depicted in the disclosed range.

The effect of two negative changes in each of the key assumptions used to determine the fair value of retained interests is required to be disclosed. The negative effect of each change must be calculated independently, holding all other assumptions constant. Because the key assumptions may not in fact be independent, the net effect of simultaneous adverse changes in the key assumptions may be less than the sum of the individual effects shown below.

At June 30, 2009, the key assumptions used to value retained interests and the sensitivity of the fair value to adverse changes of 10% and 20% in each of the key assumptions were as follows:

	June 30, 2009
Discount rate	19.7%
Constant prepayment rate	6.1% to 10.7%
Anticipated net credit losses	13.1%
Weighted average life	11.7 months

	Residual interest	Retained certificates	Other retained interests
<i>In millions of dollars</i>			
Carrying value of retained interests	\$ 562	\$ 8,784	\$ 2,005
Discount rates			
Adverse change of 10%	\$ (32)	\$ (26)	\$ (5)
Adverse change of 20%	(62)	(52)	(10)
Constant prepayment rate			
Adverse change of 10%	\$ (39)	\$	\$
Adverse change of 20%	(74)		
Anticipated net credit losses			
Adverse change of 10%	\$ (377)	\$	\$ (43)
Adverse change of 20%	(560)		(85)

Managed Loans Citi Holdings

After securitization of credit card receivables, the Company continues to maintain credit card customer account relationships and provides servicing for receivables transferred to the trusts. As a result, the Company considers the securitized credit card receivables to be part of the business it manages.

Managed-basis (Managed) presentations are non-GAAP financial measures. Managed presentations include results from both the on-balance sheet loans and off-balance sheet loans, and exclude the impact of card securitization activity. Managed presentations assume that securitized loans have not been sold and present the results of the securitized loans in the same manner as Citigroup's owned loans. Citigroup's management believes that Managed presentations provide a greater understanding of ongoing operations and enhance comparability of those results in prior periods as well as demonstrating the effects of unusual gains and charges in the current period. Management further believes that a meaningful analysis of the Company's financial performance requires an understanding of the factors underlying that performance and that investors find it useful to see these non-GAAP financial measures to analyze financial performance without the impact of unusual items that may obscure trends in Citigroup's underlying performance.

The following tables present a reconciliation between the Managed basis and on-balance sheet credit card portfolios and the related delinquencies (loans which are 90 days or more past due) and credit losses, net of recoveries.

	June 30, 2009	December 31, 2008

Funding, Liquidity Facilities and Subordinated Interests

Citigroup securitizes credit card receivables through three securitization trusts: Citibank Credit Card Master Trust ("Master Trust"), which is part of Citicorp and the Citibank OMNI Master Trust ("Omni Trust") and Broadway Credit Card Trust ("Broadway Trust"), which are part of Citi Holdings.

Master Trust issues fixed and floating-rate term notes as well as commercial paper through the Dakota program. Some of the term notes are issued to multi-seller commercial paper conduits. In the first half of 2009, the Master Trust has issued \$4.3 billion of notes that are eligible for the Term Asset-Backed Securities Loan Facility (TALF) program, where investors can borrow from the Federal Reserve using the trust securities as collateral. The weighted average maturity of the term notes issued by the Master Trust was 3.5 years as of June 30, 2009 and 3.8 years as of December 31, 2008.

Table of Contents**Master Trust liabilities:**

<i>In billions</i>	June 30, 2009	December 31, 2008
Term notes issued to multi-seller CP conduits	\$ 0.5	\$ 1.0
Term notes issued to other third parties	54.0	56.2
Term notes retained by Citigroup affiliates	5.1	1.2
Dakota commercial paper program	11.0	11.0
Total Master Trust liabilities	\$ 70.6	\$ 69.4

Both Omni and Broadway Trusts issue fixed and floating-rate term notes, some of which are purchased by multi-seller commercial paper conduits. The Omni Trust also issues commercial paper through the Palisades program. A portion of the Palisades commercial paper has been purchased by the Federal Reserve's Commercial Paper Funding Facility (CPFF). In addition, some of the multi-seller conduits that hold Omni Trust term notes have placed commercial paper with CPFF. The total amount of Omni Trust liabilities funded directly or indirectly through the CPFF was \$9.3 billion at June 30, 2009 and \$6.9 billion at December 31, 2008.

In the second quarter of 2009, Omni Trust issued \$4.0 billion of term notes that are eligible for the TALF program. The weighted average maturity of the term notes issued by the Omni Trust was 0.9 years as of June 30, 2009 and 0.5 years as of December 31, 2008. The weighted average maturity of the term notes issued by the Broadway Trust was 3.1 years as of June 30, 2009 and 3.3 years as of December 31, 2008.

Omni Trust liabilities:

<i>In billions</i>	June 30, 2009	December 31, 2008
Term notes issued to multi- seller CP conduits	\$ 13.3	\$ 17.8
Term notes issued to other third parties	5.1	2.3
Term notes retained by Citigroup affiliates	8.7	5.1
Palisades commercial paper program	8.5	8.5
Total Omni Trust liabilities	\$ 35.6	\$ 33.7

Broadway Trust liabilities:

<i>In billions</i>	June 30, 2009	December 31, 2008
Term notes issued to multi- seller CP conduits	\$ 0.4	\$ 0.4
Term notes issued to other third parties	1.0	1.0
Term notes retained by Citigroup affiliates	0.3	0.3
Total Broadway Trust liabilities	\$ 1.7	\$ 1.7

Citibank (South Dakota), N.A. is the sole provider of full liquidity facilities to the commercial paper programs of the Master and Omni Trusts. Both of these facilities, which represent contractual obligations on the part of Citibank (South Dakota), N.A. to provide liquidity for the issued commercial paper, are made available on market terms to each of the trusts. The liquidity facilities require Citibank (South Dakota), N.A. to purchase the commercial paper issued by each trust at maturity, if the commercial paper does not roll over, as long as there are available credit enhancements outstanding, typically in the form of subordinated notes. The liquidity commitment related to the Omni Trust commercial paper programs, amounted to \$8.5 billion at June 30, 2009 and December 31, 2008. During the second quarter of 2009, \$4 billion of the Omni Trust liquidity facility was drawn to pay down maturing commercial paper held by a single investor. This investor made its initial investment in Omni Trust commercial paper in January 2009 and was covered by the Citibank (South Dakota) N.A. liquidity facility. The portion of the liquidity facility related to the maturing commercial paper was cancelled during the 2009 second quarter and is no longer outstanding as of June 30, 2009. The liquidity commitment related to the Master Trust commercial paper program amounted to \$11 billion at both June 30, 2009 and December 31, 2008. As of June 30, 2009 and December 31, 2008, none of the Master Trust or Omni Trust liquidity commitments were drawn.

In addition, Citibank (South Dakota), N.A. provides liquidity to a third-party, non-consolidated multi-seller commercial paper conduit, which is not a VIE. The commercial paper conduit has acquired notes issued by the Omni Trust. Citibank (South Dakota), N.A. provides the liquidity facility on market terms. Citibank (South Dakota), N.A. will be required to act in its capacity as liquidity provider as long as there are available credit enhancements outstanding and if: (1) the conduit is unable to roll over its maturing commercial paper; or (2) Citibank (South

Edgar Filing: CITIGROUP INC - Form 10-Q

Dakota), N.A. loses its A-1/P-1 credit rating. The liquidity commitment to the third-party conduit was \$5.2 billion at June 30, 2009 and \$4 billion at December 31, 2008. As of June, 30, 2009 and December 31, 2008, none of this liquidity commitment was drawn.

All three of Citigroup's primary credit card securitization trusts have had bonds placed on ratings watch with negative implications by rating agencies during the first and second quarters of 2009. As a result of the ratings watch status, certain actions were taken with respect to each of the trusts. In general, the actions subordinated certain senior interests in the trust assets that were retained by Citigroup, which effectively placed these interests below investor interests in terms of priority of payment. With respect to the Master Trust, in the first quarter of 2009, Citigroup subordinated a portion of its "seller's interest", which represents a senior interest in Trust receivables, thus making those cash flows available to pay investor coupon each month. In addition, during the second quarter of 2009, a subordinated note with a \$3 billion principal amount was issued by the Master Trust and retained by Citibank (South Dakota), N.A., in order to provide additional credit support for the senior note classes. The note is

Table of Contents

classified as Held-to-maturity Investment Securities as Citigroup has the intent and ability to hold the security until its maturity. With respect to the Omni Trust, in the second quarter of 2009, subordinated notes with a principal amount of \$2 billion were issued by the Trust and retained by Citibank (South Dakota), N.A., in order to provide additional credit support for the senior note classes. The notes are classified as Trading account assets. These notes are in addition to a \$265 million subordinated note issued by Omni Trust and retained by Citibank (South Dakota), N.A. in the fourth quarter of 2008 for the purpose of providing additional credit support for senior noteholders. With respect to the Broadway Trust, subordinated notes with a principal amount of \$82 million were issued by the Trust and retained by Citibank, N.A., in order to provide additional credit support for the senior note classes. The notes are classified as Trading account assets.

Table of Contents**Mortgage Securitizations**

The Company provides a wide range of mortgage loan products to a diverse customer base. In connection with the securitization of these loans, the Company's U.S. Consumer mortgage business retains the servicing rights, which entitle the Company to a future stream of cash flows based on the outstanding principal balances of the loans and the contractual servicing fee. Failure to service the loans in accordance with contractual requirements may lead to a termination of the servicing rights and the loss of future servicing fees. In non-recourse servicing, the principal credit risk to the Company is the cost of temporary advances of funds. In recourse servicing, the servicer agrees to share credit risk with the owner of the mortgage loans, such as FNMA or FHLMC, or with a private investor, insurer or guarantor. Losses on recourse servicing occur primarily when foreclosure sale proceeds of the property underlying a defaulted mortgage loan are less than the outstanding principal balance and accrued interest of the loan and the cost of holding and disposing of the underlying property. The Company's mortgage loan securitizations are primarily non-recourse, thereby effectively transferring the risk of future credit losses to the purchasers of the securities issued by the trust. Securities and Banking and Special Asset Pool retains servicing for a limited number of its mortgage securitizations.

The Company's Consumer business provides a wide range of mortgage loan products to its customers. Once originated, the Company often securitizes these loans through the use of QSPEs. These QSPEs are funded through the issuance of Trust Certificates backed solely by the transferred assets. These certificates have the same average life as the transferred assets. In addition to providing a source of liquidity and less expensive funding, securitizing these assets also reduces the Company's credit exposure to the borrowers. These mortgage loan securitizations are primarily non-recourse, thereby effectively transferring the risk of future credit losses to the purchasers of the securities issued by the trust. However, the Company generally retains the servicing rights and in certain instances retains investment securities, interest-only strips and residual interests in future cash flows from the trusts.

Mortgage Securitizations Citicorp

The following tables summarize selected cash flow information related to mortgage securitizations for the three and six months ended June 30, 2009 and 2008:

	Three months ended June 30, 2009		Three months ended June 30, 2008
	U.S. agency sponsored mortgages	Non-agency sponsored mortgages	Agency and non-agency sponsored mortgages
<i>In billions of dollars</i>			
Proceeds from new securitizations	\$ 4.5	\$ 1.1	\$ 1.2
Contractual servicing fees received			
Cash flows received on retained interests and other net cash flows			

	Six months ended June 30, 2009		Six months ended June 30, 2008
	U.S. agency sponsored mortgages	Non-agency sponsored mortgages	Agency and non-agency sponsored mortgages
<i>In billions of dollars</i>			
Proceeds from new securitizations	\$ 5.3	\$ 1.6	\$ 3.2
Contractual servicing fees received			
Cash flows received on retained interests and other net cash flows			

Gains (losses) recognized on the securitization of non-agency sponsored mortgage activity during the second quarter of 2009 was (\$5) million. For the six months ended June 30, 2009, losses recognized on the securitization of non-agency sponsored mortgages were (\$4) million.

Losses recognized on the securitization of agency sponsored mortgage activity during the second quarter of 2009 were (\$10) million. For the six months ended June 30 of 2009, losses recognized on the securitization of agency sponsored mortgages were (\$7) million.

There were no gains (losses) recognized on the securitization of agency and non-agency mortgages in the second quarter of 2008. Agency and non-agency securitization gains (losses) for the six months ended June 30, 2008 were \$4 million.

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

Key assumptions used in measuring the fair value of retained interests at the date of sale or securitization of mortgage receivables for the three months ended June 30, 2009 and 2008 are as follows:

	Three months ended June 30, 2009		Three months ended June 30, 2008
	U.S. agency sponsored mortgages	Non-agency sponsored mortgages	Agency and non-agency sponsored mortgages
Discount rate	0.7% to 24.0%	3.7% to 39.3%	2.7% to 34.9%
Constant prepayment rate	21.7% to 45.5%	3.0% to 26.6%	2.0% to 28.4%
Anticipated net credit losses		50.0% to 80.0%	20.0% to 100.0%

The range in the key assumptions for retained interests in Securities and Banking is due to the different characteristics of the interests retained by the Company. The interests retained by Securities and Banking and Special Asset Pool range from highly rated and/or senior in the capital structure to unrated and/or residual interests.

The effect of adverse changes of 10% and 20% in each of the key assumptions used to determine the fair value of retained interests is disclosed below. The negative effect of each change is calculated independently, holding all other assumptions constant. Because the key assumptions may not in fact be independent, the net effect of simultaneous adverse changes in the key assumptions may be less than the sum of the individual effects shown below.

At June 30, 2009, the key assumptions used to value retained interests and the sensitivity of the fair value to adverse changes of 10% and 20% in each of the key assumptions were as follows:

	June 30, 2009	
	U.S. agency sponsored mortgages	Non-agency sponsored mortgages
Discount rate	0.7% to 24.0%	3.7% to 39.3%
Constant prepayment rate	21.7% to 45.5%	3.0% to 26.6%
Anticipated net credit losses	NA	50.0% to 80.0%

<i>In millions of dollars</i>	U.S. agency sponsored mortgages	Non-agency sponsored mortgages
Carrying value of retained interests	\$ 1,149	\$ 472
Discount rates		
Adverse change of 10%	\$ (12)	\$ (10)
Adverse change of 20%	(24)	(21)
Constant prepayment rate		
Adverse change of 10%	\$ (3)	\$ (1)
Adverse change of 20%	(5)	(3)
Anticipated net credit losses		
Adverse change of 10%	\$	\$ (11)
Adverse change of 20%		(22)

Mortgage Securitizations Citi Holdings

The following tables summarize selected cash flow information related to mortgage securitizations for the three and six months ended June 30, 2009 and 2008:

<i>In billions of dollars</i>	Three months ended June 30, 2009		Three months ended June 30, 2008
	U.S. agency sponsored mortgages	Non-agency sponsored mortgages	Agency and non-agency sponsored mortgages
Proceeds from new securitizations	\$ 25.0	\$	\$ 26.3
Contractual servicing fees received	0.3		0.4
Cash flows received on retained interests and other net cash flows	0.1		0.2

Edgar Filing: CITIGROUP INC - Form 10-Q

<i>In billions of dollars</i>	Six months ended June 30, 2009		Six months ended June 30,
	U.S. agency sponsored mortgages	Non-agency sponsored mortgages	2008 Agency and non-agency sponsored mortgages
Proceeds from new securitizations	\$ 45.1	\$	\$ 48.3
Contractual servicing fees received	0.7		0.7
Cash flows received on retained interests and other net cash flows	0.2	0.1	0.5

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

The Company did not recognize gains (losses) on the securitization of U.S. agency and non-agency sponsored mortgages in the second quarter of 2009, as well as the six months ended June 30, 2009. There were gains from the securitization of agency and non-agency sponsored mortgages of \$55 million and \$57 million in the second quarter of 2008, and the six months ended June 30, 2008, respectively.

Key assumptions used in measuring the fair value of retained interests at the date of sale or securitization of mortgage receivables for the three months ended June 30, 2009 and 2008 are as follows:

	Three months ended June 30, 2009		Three months ended June 30, 2008	
	U.S. agency sponsored mortgages	Non-agency sponsored mortgages	Agency and non-agency sponsored mortgages	
Discount rate	7.9% to 8.6%	NA	12.4% to 15.3%	
Constant prepayment rate	2.8% to 5.1%	NA	3.6% to 6.1%	
Anticipated net credit losses	NA			

The range in the key assumptions for Special Asset Pool retained interests in Special Asset Pool is due to the different characteristics of the interests retained by the Company. The interests retained by Securities and Banking range from highly rated and/or senior in the capital structure to unrated and/or residual interests.

The effect of adverse changes of 10% and 20% in each of the key assumptions used to determine the fair value of retained interests is disclosed below. The negative effect of each change is calculated independently, holding all other assumptions constant. Because the key assumptions may not in fact be independent, the net effect of simultaneous adverse changes in the key assumptions may be less than the sum of the individual effects shown below.

At June 30, 2009, the key assumptions used to value retained interests and the sensitivity of the fair value to adverse changes of 10% and 20% in each of the key assumptions were as follows:

	June 30, 2009	
	U.S. agency sponsored mortgages	Non-agency sponsored mortgages
Discount rate	11.8%	3.7% to 39.3%
Constant prepayment rate	14.9%	3.0% to 27.7%
Anticipated net credit losses	0.1%	0.3% to 65.0%
Weighted average life	0.5 to 6.2 years	0.1 to 8.7 years

<i>In millions of dollars</i>	U.S. agency sponsored mortgages	Non-agency sponsored mortgages
Carrying value of retained interests	\$ 7,205	\$ 1,092
Discount rates		
Adverse change of 10%	\$ (233)	\$ (53)
Adverse change of 20%	(451)	(103)
Constant prepayment rate		
Adverse change of 10%	\$ (387)	\$ (56)
Adverse change of 20%	(744)	(109)
Anticipated net credit losses		
Adverse change of 10%	\$ (35)	\$ (46)
Adverse change of 20%	(71)	(91)

Mortgage Servicing Rights

The fair value of capitalized mortgage loan servicing rights (MSR) was \$6.7 billion and \$8.9 billion at June 30, 2009 and 2008, respectively. The MSRs correspond to principal loan balances of \$586 billion and \$578 billion as of June 30, 2009 and 2008, respectively. The following table summarizes the changes in capitalized MSRs for the three and six months ended June 30, 2009 and 2008:

<i>In millions of dollars</i>	Three Months Ended June 30,	
	2009	2008
Balance, at March 31	\$ 5,481	\$ 7,716

Edgar Filing: CITIGROUP INC - Form 10-Q

Originations	391	424
Purchases		
Changes in fair value of MSR's due to changes in inputs and assumptions	1,343	1,066
Transfer to Trading account assets		(59)
Other changes(1)	(445)	(213)
Balance, at June 30	\$ 6,770	\$ 8,934

<i>In millions of dollars</i>	Six Months Ended June 30,	
	2009	2008
Balance, at December 31	\$ 5,657	\$ 8,380
Originations	626	769
Purchases		1
Changes in fair value of MSR's due to changes in inputs and assumptions	1,517	505
Transfer to Trading account assets		(163)
Other changes(1)	(1,030)	(558)
Balance, at June 30	\$ 6,770	\$ 8,934

(1) Represents changes due to customer payments and passage of time.

The market for MSR's is not sufficiently liquid to provide participants with quoted market prices. Therefore, the Company uses an option-adjusted spread valuation approach to determine the fair value of MSR's. This approach consists of projecting servicing cash flows under multiple interest rate scenarios and discounting these cash flows using risk-adjusted discount rates. The key assumptions used in the valuation of MSR's include mortgage prepayment speeds and discount rates. The model assumptions and the MSR's' fair value

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

estimates are compared to observable trades of similar MSR portfolios and interest-only security portfolios, as available, as well as to MSR broker valuations and industry surveys. The cash flow model and underlying prepayment and interest rate models used to value these MSRs are subject to validation in accordance with the Company's model validation policies.

The fair value of the MSRs is primarily affected by changes in prepayments that result from shifts in mortgage interest rates. In managing this risk, the Company economically hedges a significant portion of the value of its MSRs through the use of interest rate derivative contracts, forward purchase commitments of mortgage-backed securities and purchased securities classified as trading.

The Company receives fees during the course of servicing previously securitized mortgages. The amount of these fees for the months ended June 30, 2009 and 2008 were as follows:

<i>In millions of dollars</i>	Three months ended,		Six months ended,	
	2009	2008	2009	2008
Servicing fees	\$ 429	\$ 420	\$ 858	\$ 831
Late fees	23	24	48	50
Ancillary fees	22	17	42	35
Total MSR fees	\$ 474	\$ 461	\$ 948	\$ 916

These fees are classified in the Consolidated Statement of Income as *Commissions and fees*.

Student Loan Securitizations

Through the Company's Local Consumer Lending business within Citi Holdings, the Company maintains programs to securitize certain portfolios of student loan assets. Under these securitization programs, transactions qualifying as sales are off-balance sheet transactions in which the loans are removed from the Consolidated Financial Statements of the Company and sold to a QSPE. These QSPEs are funded through the issuance of pass-through term notes collateralized solely by the trust assets. For these off-balance sheet securitizations, the Company generally retains interests in the form of subordinated residual interests (i.e., interest-only strips) and servicing rights.

Under terms of the trust arrangements, the Company has no obligations to provide financial support and has not provided such support. A substantial portion of the credit risk associated with the securitized loans has been transferred to third-party guarantors or insurers either under the Federal Family Education Loan Program, authorized by the U.S. Department of Education under the Higher Education Act of 1965, as amended, or private credit insurance.

The following tables summarize selected cash flow information related to student loan securitizations for the three and six months ended June 30, 2009 and 2008:

<i>In billions of dollars</i>	Three months ended	
	June 30, 2009	June 30, 2008
Proceeds from new securitizations	\$	\$ 2.0
Proceeds from collections reinvested in new receivables		
Contractual servicing fees received		
Cash flows received on retained interests and other net cash flows		0.1

<i>In billions of dollars</i>	Six months ended	
	June 30, 2009	June 30, 2008
Proceeds from new securitizations	\$	\$ 2.0
Proceeds from collections reinvested in new receivables		
Contractual servicing fees received		
Cash flows received on retained interests and other net cash flows	0.1	0.1

Edgar Filing: CITIGROUP INC - Form 10-Q

Key assumptions used in measuring the fair value of the residual interest at the date of sale or securitization of Citi Holding's student loan receivables for the three months ended June 30, 2009 and 2008, respectively, are as follows:

	June 30, 2009	June 30, 2008
Discount rate	NA	5.8% to 13.6%
Constant prepayment rate	NA	1.2% to 11.6%
Anticipated net credit losses	NA	0.3% to 0.9%

At June 30, 2009, the key assumptions used to value retained interests and the sensitivity of the fair value to adverse changes of 10% and 20% in each of the key assumptions were as follows:

	Retained interests
Discount rate	5.2% to 16.6%
Constant prepayment rate	0.4% to 6.5%
Anticipated net credit losses	0.2% to 0.7%
Weighted average life	4.0 to 10.2 years

<i>In millions of dollars</i>	Retained interests
Carrying value of retained interests	\$ 977
Discount rates	
Adverse change of 10%	\$ (29)
Adverse change of 20%	(56)
Constant prepayment rate	
Adverse change of 10%	\$ (5)
Adverse change of 20%	(11)
Anticipated net credit losses	
Adverse change of 10%	\$ (5)
Adverse change of 20%	(10)

Table of Contents**On-Balance Sheet Securitizations Citi Holdings**

The Company engages in on-balance sheet securitizations. These are securitizations that do not qualify for sales treatment; thus, the assets remain on the Company's balance sheet. The following table presents the carrying amounts and classification of consolidated assets and liabilities transferred in transactions from the Consumer credit card, student loan, mortgage and auto businesses, accounted for as secured borrowings:

<i>In billions of dollars</i>	June 30, 2009	December 31, 2008
Cash	\$ 0.2	\$ 0.3
Available-for-sale securities	0.1	0.1
Loans	17.7	7.5
Allowance for loan losses	(0.2)	(0.1)
Other	0.5	
Total assets	\$ 18.3	\$ 7.8
Long-term debt	\$ 13.7	\$ 6.3
Other liabilities	0.1	0.3
Total liabilities	\$ 13.8	\$ 6.6

All assets are restricted from being sold or pledged as collateral. The cash flows from these assets are the only source used to pay down the associated liabilities, which are non-recourse to the Company's general assets.

Citi-Administered Asset-Backed Commercial Paper Conduits

The Company is active in the asset-backed commercial paper conduit business as administrator of several multi-seller commercial paper conduits, and also as a service provider to single-seller and other commercial paper conduits sponsored by third parties.

The multi-seller commercial paper conduits are designed to provide the Company's customers access to low-cost funding in the commercial paper markets. The conduits purchase assets from or provide financing facilities to customers and are funded by issuing commercial paper to third-party investors. The conduits generally do not purchase assets originated by the Company. The funding of the conduit is facilitated by the liquidity support and credit enhancements provided by the Company.

As administrator to the conduits, the Company is responsible for selecting and structuring of assets purchased or financed by the conduits, making decisions regarding the funding of the conduits, including determining the tenor and other features of the commercial paper issued, monitoring the quality and performance of the conduits' assets, and facilitating the operations and cash flows of the conduits. In return, the Company earns structuring fees from customers for individual transactions and earns an administration fee from the conduit, which is equal to the income from client program and liquidity fees of the conduit after payment of interest costs and other fees. This administration fee is fairly stable, since most risks and rewards of the underlying assets are passed back to the customers and, once the asset pricing is negotiated, most ongoing income, costs and fees are relatively stable as a percentage of the conduit's size.

The conduits administered by the Company do not generally invest in liquid securities that are formally rated by third parties. The assets are privately negotiated and structured transactions that are designed to be held by the conduit, rather than actively traded and sold. The yield earned by the conduit on each asset is generally tied to the rate on the commercial paper issued by the conduit, thus passing interest rate risk to the client. Each asset purchased by the conduit is structured with transaction-specific credit enhancement features provided by the third-party seller, including over-collateralization, cash and excess spread collateral accounts, direct recourse or third-party guarantees. These credit enhancements are sized with the objective of approximating a credit rating of A or above, based on the Company's internal risk ratings.

Substantially all of the funding of the conduits is in the form of short-term commercial paper, with a weighted average life generally ranging from 30-45 days. As of June 30, 2009, and December 31, 2008, the weighted average life of the commercial paper issued was approximately 36 and 37 days, respectively. In addition, the conduits have issued subordinate loss notes and equity with a notional amount of approximately \$78 million and varying remaining tenors ranging from one month to six years.

The primary credit enhancement provided to the conduit investors is in the form of transaction-specific credit enhancement described above. In addition, there are generally two additional forms of credit enhancement that protect the commercial paper investors from defaulting

Edgar Filing: CITIGROUP INC - Form 10-Q

assets. First, the subordinate loss notes issued by each conduit absorb any credit losses up to their full notional amount. It is expected that the subordinate loss notes issued by each unconsolidated conduit are sufficient to absorb a majority of the expected losses from each conduit, thereby making the single investor in the Subordinate Loss Note the primary beneficiary under FIN 46(R)(ASC 810-10-25). Second, each conduit has obtained a letter of credit from the Company, which is generally 8-10% of the conduit's assets. The letters of credit provided by the Company total approximately \$4.2 billion and are included in the Company's maximum exposure to loss. The net result across all multi-seller conduits administered by the Company is that, in the event defaulted assets exceed the transaction-specific credit enhancement described above, any losses in each conduit are allocated in the following order:

Subordinate loss note holders,

the Company, and

the commercial paper investors.

The Company also provides the conduits with two forms of liquidity agreements that are used to provide funding to the conduits in the event of a market disruption, among other events. Each asset of the conduit is supported by a transaction-specific liquidity facility in the form of an asset purchase agreement (APA). Under the APA, the Company has agreed to purchase non-defaulted eligible receivables from the conduit at par. Any assets purchased under the APA are subject to increased pricing. The APA is not designed to provide credit support to the conduit, as it generally does not permit the purchase of defaulted or impaired assets and generally reprices the assets purchased to consider potential increased credit risk.

Table of Contents

The APA covers all assets in the conduits and is considered in the Company's maximum exposure to loss. In addition, the Company provides the conduits with program-wide liquidity in the form of short-term lending commitments. Under these commitments, the Company has agreed to lend to the conduits in the event of a short-term disruption in the commercial paper market, subject to specified conditions. The total notional exposure under the program-wide liquidity agreement is \$11.8 billion and is considered in the Company's maximum exposure to loss. The Company receives fees for providing both types of liquidity agreement and considers these fees to be on fair market terms.

Finally, the Company is one of several named dealers in the commercial paper issued by the conduits and earns a market-based fee for providing such services. Along with third-party dealers, the Company makes a market in the commercial paper and may from time to time fund commercial paper pending sale to a third party. On specific dates with less liquidity in the market, the Company may hold in inventory commercial paper issued by conduits administered by the Company, as well as conduits administered by third parties. The amount of commercial paper issued by its administered conduits held in inventory fluctuates based on market conditions and activity. As of June 30, 2009, the Company owned approximately \$0.2 billion of the commercial paper issued by its administered conduits.

FIN 46(R)(ASC 810-10-25) requires that the Company quantitatively analyze the expected variability of the conduit to determine whether the Company is the primary beneficiary of the conduit. The Company performs this analysis on a quarterly basis. For conduits where the subordinate loss notes or third party guarantees are sufficient to absorb a majority of the expected loss of the conduit, the Company does not consolidate. In circumstances where the subordinate loss notes or third party guarantees are insufficient to absorb a majority of the expected loss, the Company consolidates the conduit as its primary beneficiary due to the additional credit enhancement provided by the Company. In conducting this analysis, the Company considers three primary sources of variability in the conduit: credit risk, interest-rate risk and fee variability.

The Company models the credit risk of the conduit's assets using a Credit Value at Risk (C-VaR) model. The C-VaR model considers changes in credit spreads (both within a rating class as well as due to rating upgrades and downgrades), name-specific changes in credit spreads, credit defaults and recovery rates and diversification effects of pools of financial assets. The model incorporates data from independent rating agencies as well as the Company's own proprietary information regarding spread changes, ratings transitions and losses given default. Using this credit data, a Monte Carlo simulation is performed to develop a distribution of credit risk for the portfolio of assets owned by each conduit, which is then applied on a probability-weighted basis to determine expected losses due to credit risk. In addition, the Company continuously monitors the specific credit characteristics of the conduit's assets and the current credit environment to confirm that the C-VaR model used continues to incorporate the Company's best information regarding the expected credit risk of the conduit's assets.

The Company also analyzes the variability in the fees that it earns from the conduit using monthly actual historical cash flow data to determine average fee and standard deviation measures for each conduit. Because any unhedged interest rate and foreign-currency risk not contractually passed on to customers is absorbed by the fees earned by the Company, the fee variability analysis incorporates those risks.

The fee variability and credit risk variability are then combined into a single distribution of the conduit's overall returns. This return distribution is updated and analyzed on at least a quarterly basis to ensure that the amount of the subordinate loss notes issued to third parties is sufficient to absorb greater than 50% of the total expected variability in the conduit's returns. The expected variability absorbed by the subordinate loss note investors is therefore measured to be greater than the expected variability absorbed by the Company through its liquidity arrangements and other fees earned, and the investors in commercial paper and medium-term notes. While the notional amounts of the subordinate loss notes are quantitatively small compared to the size of the conduits, this is reflective of the fact that most of the substantive risks of the conduits are absorbed by the enhancements provided by the sellers (customers) and other third parties that provide transaction-level credit enhancement. Because FIN 46(R) (ASC 810-10-25) generally requires these risks and related enhancements to be excluded from the analysis, the remaining risks and expected variability are quantitatively small. The calculation of variability under FIN 46(R)(ASC 810-10-25) focuses primarily on *expected* variability, rather than the risks associated with extreme outcomes (for example, large levels of default) that are expected to occur very infrequently. So while the subordinate loss notes are sized appropriately compared to expected losses as measured in FIN 46(R)(ASC 810-10-25), they do not provide significant protection against extreme or unusual credit losses. Where such credit losses occur or become expected to occur, the Company would consolidate the conduit due to the additional credit enhancement provided by the Company.

Third-Party Commercial Paper Conduits

The Company also provides liquidity facilities to single- and multi-seller conduits sponsored by third parties. These conduits are independently owned and managed and invest in a variety of asset classes, depending on the nature of the conduit. The facilities provided by the Company typically represent a small portion of the total liquidity facilities obtained by each conduit, and are collateralized by the assets of each conduit. As of June 30, 2009, the notional amount of these facilities was approximately \$1 billion and \$301 million was funded under these facilities.

Collateralized Debt and Loan Obligations

Edgar Filing: CITIGROUP INC - Form 10-Q

A collateralized debt obligation (CDO) is an SPE that purchases a pool of assets consisting of asset-backed securities and synthetic exposures through derivatives on asset-backed securities and issues multiple tranches of equity and notes to investors. A third-party manager is typically retained by the CDO to select the pool of assets and manage those assets over

Table of Contents

the term of the CDO. The Company earns fees for warehousing assets prior to the creation of a CDO, structuring CDOs and placing debt securities with investors. In addition, the Company has retained interests in many of the CDOs it has structured and makes a market in those issued notes.

A cash CDO, or arbitrage CDO, is a CDO designed to take advantage of the difference between the yield on a portfolio of selected assets, typically residential mortgage-backed securities, and the cost of funding the CDO through the sale of notes to investors. "Cash flow" CDOs are vehicles in which the CDO passes on cash flows from a pool of assets, while "market value" CDOs pay to investors the market value of the pool of assets owned by the CDO at maturity. Both types of CDOs are typically managed by a third-party asset manager. In these transactions, all of the equity and notes issued by the CDO are funded, as the cash is needed to purchase the debt securities. In a typical cash CDO, a third-party investment manager selects a portfolio of assets, which the Company funds through a warehouse financing arrangement prior to the creation of the CDO. The Company then sells the debt securities to the CDO in exchange for cash raised through the issuance of notes. The Company's continuing involvement in cash CDOs is typically limited to investing in a portion of the notes or loans issued by the CDO and making a market in those securities, and acting as derivative counterparty for interest rate or foreign currency swaps used in the structuring of the CDO.

A synthetic CDO is similar to a cash CDO, except that the CDO obtains exposure to all or a portion of the referenced assets synthetically through derivative instruments, such as credit default swaps. Because the CDO does not need to raise cash sufficient to purchase the entire referenced portfolio, a substantial portion of the senior tranches of risk is typically passed on to CDO investors in the form of unfunded liabilities or derivative instruments. Thus, the CDO writes credit protection on select referenced debt securities to the Company or third parties and the risk is then passed on to the CDO investors in the form of funded notes or purchased credit protection through derivative instruments. Any cash raised from investors is invested in a portfolio of collateral securities or investment contracts. The collateral is then used to support the CDO's obligations on the credit default swaps written to counterparties. The Company's continuing involvement in synthetic CDOs generally includes purchasing credit protection through credit default swaps with the CDO, owning a portion of the capital structure of the CDO, in the form of both unfunded derivative positions (primarily super senior exposures discussed below) and funded notes, entering into interest-rate swap and total-return swap transactions with the CDO, lending to the CDO, and making a market in those funded notes.

A collateralized loan obligation (CLO) is substantially similar to the CDO transactions described above, except that the assets owned by the SPE (either cash instruments or synthetic exposures through derivative instruments) are corporate loans and to a lesser extent corporate bonds, rather than asset-backed debt securities.

Consolidation

The Company has retained significant portions of the "super senior" positions issued by certain CDOs. These positions are referred to as "super senior" because they represent the most senior positions in the CDO and, at the time of structuring, were senior to tranches rated AAA by independent rating agencies. These positions include facilities structured in the form of short-term commercial paper, where the Company wrote put options ("liquidity puts") to certain CDOs. Under the terms of the liquidity puts, if the CDO was unable to issue commercial paper at a rate below a specified maximum (generally LIBOR + 35bps to LIBOR + 40 bps), the Company was obligated to fund the senior tranche of the CDO at a specified interest rate. As of June 30, 2009, the Company had purchased all \$25 billion of the commercial paper subject to these liquidity puts.

Since inception of many CDO transactions, the subordinate tranches of the CDOs have diminished significantly in value and in rating. The declines in value of the subordinate tranches and in the super senior tranches indicate that the super senior tranches are now exposed to a significant portion of the expected losses of the CDOs, based on current market assumptions. The Company evaluates these transactions for consolidation when reconsideration events occur, as defined in FIN 46(R) (ASC 810-10-25).

Upon a reconsideration event, the Company is at risk for consolidation only if the Company owns a majority of either a single tranche or a group of tranches that absorb the remaining risk of the CDO. Due to reconsideration events during 2007 and 2008, the Company has consolidated 30 of the 46 CDOs/CLOs in which the Company holds a majority of the senior interests of the transaction.

The Company continues to monitor its involvement in unconsolidated VIEs and if the Company were to acquire additional interests in these vehicles or if the CDOs' contractual arrangements were to be changed to reallocate expected losses or residual returns among the various interest holders, the Company may be required to consolidate the CDOs. For cash CDOs, the net result of such consolidation would be to gross up the Company's balance sheet by the current fair value of the subordinate securities held by third parties, which amounts are not considered material. For synthetic CDOs, the net result of such consolidation may reduce the Company's balance sheet by eliminating intercompany derivative receivables and payables in consolidation.

Table of Contents**Cash Flows and Retained Interests Citicorp**

The following tables summarize selected cash flow information related to CDO and CLO securitizations for the three months ended June 30, 2009:

<i>In billions of dollars</i>	Three months ended June 30, 2009	
	CDOs	CLOs
Cash flows received on retained interests		

<i>In billions of dollars</i>	Six months ended June 30, 2009	
	CDOs	CLOs
Cash flows received on retained interests		

The key assumptions, used for the securitization of CDOs and CLOs during the three months ended June 30, 2009, in measuring the fair value of retained interests at the date of sale or securitization, are as follows:

	CDOs	CLOs
Discount rate	N/A	13.5% to 14.8%

The effect of two negative changes in discount rates used to determine the fair value of retained interests is disclosed below.

<i>In millions of dollars</i>	CDOs	CLOs
Carrying value of retained interests	NA	\$ 168

Asset-Based Financing Citicorp

The Company provides loans and other forms of financing to VIEs that hold assets. Those loans are subject to the same credit approvals as all other loans originated or purchased by the Company. Financings in the form of debt securities or derivatives are, in most circumstances, reported in *Trading account assets* and accounted for at fair value through earnings.

The primary types of Citicorp's asset-based financing, total assets of the unconsolidated VIEs with significant involvement and the Company's maximum exposure to loss at June 30, 2009 are shown below. For the Company to realize that maximum loss, the VIE (borrower) would have to default with no recovery from the assets held by the VIE.

<i>In billions of dollars</i>	Total	Maximum
Type	assets	exposure
Commercial and other real estate	\$ 1.0	\$
Hedge funds and equities	5.4	3.0
Corporate loans		
Airplanes, ships and other assets	7.3	0.9
Total	\$ 13.7	\$ 3.9

Asset-Based Financing Citi Holdings

The Company provides loans and other forms of financing to VIEs that hold assets. Those loans are subject to the same credit approvals as all other loans originated or purchased by the Company. Financings in the form of debt securities or derivatives are, in most circumstances, reported in *Trading account assets* and accounted for at fair value through earnings.

The primary types of Citi Holdings' asset-based financing, total assets of the unconsolidated VIEs with significant involvement and the Company's maximum exposure to loss at June 30, 2009 are shown below. For the Company to realize that maximum loss, the VIE (borrower) would have to default with no recovery from the assets held by the VIE.

<i>In billions of dollars</i>	Total	Maximum
Type	assets	exposure
Commercial and other real estate	\$ 45.4	\$ 8.9

Municipal Securities Tender Option Bond (TOB) Trusts

The Company sponsors TOB trusts that hold fixed- and floating-rate, tax-exempt securities issued by state or local municipalities. The trusts are typically single-issuer trusts whose assets are purchased from the Company and from the secondary market. The trusts issue long-term senior floating rate notes (Floaters) and junior residual securities (Residuals). The Floaters have a long-term rating based on the long-term rating of the underlying municipal bond and a short-term rating based on that of the liquidity provider to the trust. The Residuals are generally rated based on the long-term rating of the underlying municipal bond and entitle the holder to the residual cash flows from the issuing trust.

The Company sponsors three kinds of TOB trusts: customer TOB trusts, proprietary TOB trusts and QSPE TOB trusts.

Customer TOB trusts are trusts through which customers finance investments in municipal securities and are not consolidated by the Company. Proprietary and QSPE TOB trusts, on the other hand, provide the Company with the ability to finance its own investments in municipal securities.

Proprietary TOB trusts are generally consolidated, in which case the financing (the Floaters) is recognized on the Company's balance sheet as a liability. However, certain proprietary TOB trusts are not consolidated by the Company, where the Residuals are held by hedge funds that are consolidated and managed by the Company. The assets and the associated liabilities of these TOB trusts are not consolidated by the hedge funds (and, thus, are not consolidated by the Company) under the application of the AICPA Investment Company Audit Guide, which precludes consolidation of owned investments. The Company consolidates the hedge funds, because the Company holds controlling financial interests in the hedge funds. Certain of the Company's equity investments in the hedge funds are hedged with derivatives transactions executed by the Company with third parties referencing the returns of the hedge fund.

QSPE TOB trusts provide the Company with the same exposure as proprietary TOB trusts and are not consolidated by the Company.

Credit rating distribution is based on the external rating of the municipal bonds within the TOB trusts, including any credit enhancement provided by monoline insurance companies or the Company in the primary or secondary markets, as discussed below. The total assets for proprietary TOB Trusts (consolidated and non-consolidated) includes \$0.7 billion of assets where the Residuals are held by a hedge fund that is consolidated and managed by the Company.

Edgar Filing: CITIGROUP INC - Form 10-Q

The TOB trusts fund the purchase of their assets by issuing Floaters along with Residuals, which are frequently less than 1% of a trust's total funding. The tenor of the Floaters matches the maturity of the TOB trust and is equal to or shorter than the tenor of the municipal bond held by the trust, and the Floaters bear interest rates that are typically reset weekly to a new market rate (based on the SIFMA index). Floater holders have an option to tender the Floaters they hold back to the trust periodically. Customer TOB trusts issue the Floaters and Residuals to third parties. Proprietary and QSPE TOB trusts issue the Floaters to third parties and the Residuals are held by the Company.

Approximately \$3.1 billion of the municipal bonds owned by TOB trusts have an additional credit guarantee provided by the Company. In all other cases, the assets are either unenhanced or are insured with a monoline insurance provider in the primary market or in the secondary market. While the trusts have not encountered any adverse credit events as defined in the underlying trust agreements, certain monoline insurance companies have experienced downgrades. In these cases, the Company has proactively managed the TOB programs by applying additional secondary market insurance on the assets or proceeding with orderly unwinds of the trusts.

The Company, in its capacity as remarketing agent, facilitates the sale of the Floaters to third parties at inception of the trust and facilitates the reset of the Floater coupon and tenders of Floaters. If Floaters are tendered and the Company (in its role as remarketing agent) is unable to find a new investor within a specified period of time, it can declare a failed remarketing (in which case the trust is unwound) or may choose to buy the Floaters into its own inventory and may continue to try to sell it to a third-party investor. While the level of the Company's inventory of Floaters fluctuates, the Company held approximately \$0.4 billion of Floater inventory related to the Customer, Proprietary and QSPE TOB programs as of June 30, 2009.

If a trust is unwound early due to an event other than a credit event on the underlying municipal bond, the underlying municipal bond is sold in the secondary market. If there is an accompanying shortfall in the trust's cash flows to fund the redemption of the Floaters after the sale of the underlying

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

municipal bond, the trust draws on a liquidity agreement in an amount equal to the shortfall. Liquidity agreements are generally provided to the trust directly by the Company. For customer TOBs where the Residual is less than 25% of the trust's capital structure, the Company has a reimbursement agreement with the Residual holder under which the Residual holder reimburses the Company for any payment made under the liquidity arrangement. Through this reimbursement agreement, the Residual holder remains economically exposed to fluctuations in value of the municipal bond. These reimbursement agreements are actively margined based on changes in value of the underlying municipal bond to mitigate the Company's counterparty credit risk. In cases where a third party provides liquidity to a proprietary or QSPE TOB trust, a similar reimbursement arrangement is made whereby the Company (or a consolidated subsidiary of the Company) as Residual holder absorbs any losses incurred by the liquidity provider. As of June 30, 2009, liquidity agreements provided with respect to customer TOB trusts totaled \$6.5 billion, offset by reimbursement agreements in place with a notional amount of \$4.9 billion. The remaining exposure relates to TOB transactions where the Residual owned by the customer is at least 25% of the bond value at the inception of the transaction. In addition, the Company has provided liquidity arrangements with a notional amount of \$0.9 billion to QSPE TOB trusts and other non-consolidated proprietary TOB trusts described above.

The Company considers the customer and proprietary TOB trusts (excluding QSPE TOB trusts) to be VIEs within the scope of FIN 46(R) (ASC 810-10-15). Because third-party investors hold the Residual and Floater interests in the customer TOB trusts, the Company's involvement and variable interests include only its role as remarketing agent and liquidity provider. On the basis of the variability absorbed by the customer through the reimbursement arrangement or significant residual investment, the Company does not consolidate the Customer TOB trusts. The Company's variable interests in the Proprietary TOB trusts include the Residual as well as the remarketing and liquidity agreements with the trusts. On the basis of the variability absorbed through these contracts (primarily the Residual), the Company generally consolidates the Proprietary TOB trusts. Finally, certain proprietary TOB trusts and QSPE TOB trusts are not consolidated by application of specific accounting literature. For the nonconsolidated proprietary TOB trusts and QSPE TOB trusts, the Company recognizes only its residual investment on its balance sheet at fair value and the third-party financing raised by the trusts is off-balance sheet.

The following table summarizes selected cash flow information related to Citicorp's municipal bond securitizations for the three and six months ended June 30, 2009 and 2008:

<i>In billions of dollars</i>	Three months ended June 30,

Municipal Investments

Municipal investment transactions represent partnerships that finance the construction and rehabilitation of low-income affordable rental housing. The Company generally invests in these partnerships as a limited partner and earns a return primarily through the receipt of tax credits earned from the affordable housing investments made by the partnership.

Client Intermediation

Client intermediation transactions represent a range of transactions designed to provide investors with specified returns based on the returns of an underlying security, referenced asset or index. These transactions include credit-linked notes and equity-linked notes. In these transactions, the SPE typically obtains exposure to the underlying security, referenced asset or index through a derivative instrument, such as a total-return swap or a credit-default swap. In turn the SPE issues notes to investors that pay a return based on the specified underlying security, referenced asset or index. The SPE invests the proceeds in a financial asset or a guaranteed insurance contract (GIC) that serves as collateral for the derivative contract over the term of the transaction. The Company's involvement in these transactions includes being the counterparty to the SPE's derivative instruments and investing in a portion of the notes issued by the SPE. In certain

Table of Contents

transactions, the investor's maximum risk of loss is limited and the Company absorbs risk of loss above a specified level.

The Company's maximum risk of loss in these transactions is defined as the amount invested in notes issued by the SPE and the notional amount of any risk of loss absorbed by the Company through a separate instrument issued by the SPE. The derivative instrument held by the Company may generate a receivable from the SPE (for example, where the Company purchases credit protection from the SPE in connection with the SPE's issuance of a credit-linked note), which is collateralized by the assets owned by the SPE. These derivative instruments are not considered variable interests under FIN 46(R) (ASC 810-10-15) and any associated receivables are not included in the calculation of maximum exposure to the SPE.

Structured Investment Vehicles

Structured Investment Vehicles (SIVs) are SPEs that issue junior notes and senior debt (medium-term notes and short-term commercial paper) to fund the purchase of high quality assets. The Company acts as manager for the SIVs.

In order to complete the wind-down of the SIVs, the Company purchased the remaining assets of the SIVs in November 2008. The Company funded the purchase of the SIV assets by assuming the obligation to pay amounts due under the medium-term notes issued by the SIVs, as the medium-term notes mature.

Investment Funds

The Company is the investment manager for certain investment funds that invest in various asset classes including private equity, hedge funds, real estate, fixed income and infrastructure. The Company earns a management fee, which is a percentage of capital under management, and may earn performance fees. In addition, for some of these funds the Company has an ownership interest in the investment funds.

The Company has also established a number of investment funds as opportunities for qualified employees to invest in private equity investments. The Company acts as investment manager to these funds and may provide employees with financing on both a recourse and non-recourse basis for a portion of the employees' investment commitments.

Trust Preferred Securities

The Company has raised financing through the issuance of trust preferred securities. In these transactions, the Company forms a statutory business trust and owns all of the voting equity shares of the trust. The trust issues preferred equity securities to third-party investors and invests the gross proceeds in junior subordinated deferrable interest debentures issued by the Company. These trusts have no assets, operations, revenues or cash flows other than those related to the issuance, administration and repayment of the preferred equity securities held by third-party investors. These trusts' obligations are fully and unconditionally guaranteed by the Company.

Because the sole asset of the trust is a receivable from the Company, the Company is not permitted to consolidate the trusts under FIN 46(R) (ASC 810-10-15), even though the Company owns all of the voting equity shares of the trust, has fully guaranteed the trusts' obligations, and has the right to redeem the preferred securities in certain circumstances. The Company recognizes the subordinated debentures on its balance sheet as long-term liabilities.

Table of Contents

16. DERIVATIVES ACTIVITIES

In the ordinary course of business, Citigroup enters into various types of derivative transactions. These derivative transactions include:

Futures and forward contracts which are commitments to buy or sell at a future date a financial instrument, commodity or currency at a contracted price and may be settled in cash or through delivery.

Swap contracts which are commitments to settle in cash at a future date or dates that may range from a few days to a number of years, based on differentials between specified financial indices, as applied to a notional principal amount.

Option contracts which give the purchaser, for a fee, the right, but not the obligation, to buy or sell within a limited time a financial instrument, commodity or currency at a contracted price that may also be settled in cash, based on differentials between specified indices or prices.

Citigroup enters into these derivative contracts relating to interest rate, foreign currency, commodity, and other market/credit risks for the following reasons:

Trading Purposes Customer Needs Citigroup offers its customers derivatives in connection with their risk-management actions to transfer, modify or reduce their interest rate, foreign exchange and other market/ credit risks or for their own trading purposes. As part of this process, Citigroup considers the customers' suitability for the risk involved, and the business purpose for the transaction. Citigroup also manages its derivative-risk positions through offsetting trade activities, controls focused on price verification, and daily reporting of positions to senior managers.

Trading Purposes Own Account Citigroup trades derivatives for its own account, and as an active market maker. Trading limits and price verification controls are key aspects of this activity.

Hedging Citigroup uses derivatives in connection with its risk-management activities to hedge certain risks or reposition the risk profile of the Company. For example, Citigroup may issue fixed-rate long-term debt and then enter into a receive-fixed, pay-variable-rate interest rate swap with the same tenor and notional amount to convert the interest payments to a net variable-rate basis. This strategy is the most common form of an interest rate hedge, as it minimizes interest cost in certain yield curve environments. Derivatives are also used to manage risks inherent in specific groups of on-balance sheet assets and liabilities, including investments, corporate and consumer loans, deposit liabilities, as well as other interest-sensitive assets and liabilities. In addition, foreign-exchange contracts are used to hedge non-U.S. dollar denominated debt, foreign-currency-denominated available-for-sale securities, net capital exposures and foreign-exchange transactions.

Derivatives may expose Citigroup to market, credit or liquidity risks in excess of the amounts recorded on the Consolidated Balance Sheet. Market risk on a derivative product is the exposure created by potential fluctuations in interest rates, foreign-exchange rates and other factors and is a function of the type of product, the volume of transactions, the tenor and terms of the agreement, and the underlying volatility. Credit risk is the exposure to loss in the event of nonperformance by the other party to the transaction where the value of any collateral held is not adequate to cover such losses. The recognition in earnings of unrealized gains on these transactions is subject to management's assessment as to collectibility. Liquidity risk is the potential exposure that arises when the size of the derivative position may not be able to be rapidly adjusted in periods of high volatility and financial stress at a reasonable cost.

Information pertaining to the volume of derivative activity is provided in the tables below. The notional amounts, for both long and short derivative positions, of Citigroup's derivative instruments as of June 30, 2009 are presented in the table below:

(1) Derivatives in hedge accounting relationships accounted for under SFAS 133 (ASC 815) are recorded in either Other assets/liabilities or Trading account assets/liabilities on the Consolidated Balance Sheet.

(2)

Edgar Filing: CITIGROUP INC - Form 10-Q

Management hedges represent derivative instruments used in certain economic hedging relationships that are identified for management purposes, but for which SFAS 133 (ASC 815) hedge accounting is not applied. These derivatives are recorded in Other assets/liabilities on the Consolidated Balance Sheet.

(3)

Credit derivatives are arrangements designed to allow one party (the "beneficiary") to transfer the credit risk of a "reference asset" to another party (the "guarantor"). These arrangements allow a guarantor to assume the credit risk associated with the reference asset without directly purchasing it. The Company has entered into credit derivatives positions for purposes such as risk management, yield enhancement, reduction of credit concentrations and diversification of overall risk.

(1)

The trading derivatives fair values are presented in Note 9 Trading Assets and Liabilities.

All derivatives are reported on the balance sheet at fair value. In addition, where applicable, all such contracts covered by master netting agreements are reported net. Gross positive fair values are netted with gross negative fair values by counterparty pursuant to a valid master netting agreement. In addition, payables and receivables in respect of cash collateral received from or paid to a given counterparty are included in this netting. However, non-cash collateral is not included.

As of June 30, 2009 the amount of payables in respect of cash collateral received that was netted with unrealized gains from derivatives was \$40 billion, while the amount of receivables in respect of cash collateral paid that was netted with unrealized losses from derivatives was \$50 billion.

The amounts recognized in the Consolidated Statement of Income for the quarter ended June 30, 2009 related to derivatives not designated in a qualifying SFAS 133 (ASC 815) hedging relationship are shown in the table below:

<i>In millions of dollars</i>	Non-designated derivatives(1) gains (losses) Three months ended June 30, 2009		Non-designated derivatives(1) gains (losses) Six months ended June 30, 2009	
	Principal transactions	Other revenues	Principal transactions	Other revenues

Total gain (loss) on non-designated derivatives(1)	\$ 2,033	\$ (3,170)	\$ 527	\$ (1,946)
-----------------------------------------------------------	-----------------	-------------------	---------------	-------------------

(1) Non-designated derivatives are derivative instruments not designated in qualifying SFAS 133 (ASC 815) hedging relationships.

Accounting for Derivative Hedging

Citigroup accounts for its hedging activities in accordance with SFAS 133 (ASC 815). As a general rule, SFAS 133 (ASC 815) hedge accounting is permitted for those situations where the Company is exposed to a particular risk, such as interest-rate or foreign-exchange risk, that causes changes in the fair value of an asset or liability, or variability in the expected future cash flows of an existing asset, liability or a forecasted transaction that may affect earnings.

Derivative contracts hedging the risks associated with the changes in fair value are referred to as fair value hedges, while contracts hedging the risks affecting the expected future cash flows are called cash flow hedges. Hedges that utilize derivatives or debt instruments to manage the foreign exchange risk associated with equity investments in non-U.S. dollar functional currency foreign subsidiaries (net investment in a foreign operation) are called net investment hedges.

If certain hedging criteria specified in SFAS 133 (ASC 815) are met, including testing for hedge effectiveness, special hedge accounting may be applied. The hedge effectiveness assessment methodologies for similar hedges are performed in a similar manner and are used consistently throughout the hedging relationships. For fair value hedges, the changes in value of the hedging derivative, as well as the changes in

Table of Contents

value of the related hedged item due to the risk being hedged, are reflected in current earnings. For cash flow hedges and net investment hedges, the changes in value of the hedging derivative are reflected in Accumulated other comprehensive income (loss) in Citigroup's stockholders' equity, to the extent the hedge is effective. Hedge ineffectiveness, in either case, is reflected in current earnings.

For asset/liability management hedging, the fixed-rate long-term debt may be recorded at amortized cost under current U.S. GAAP. However, by electing to use SFAS 133 (ASC 815) hedge accounting, the carrying value of the debt is adjusted for changes in the benchmark interest rate, with any such changes in value recorded in current earnings. The related interest-rate swap is also recorded on the balance sheet at fair value, with any changes in fair value reflected in earnings. Thus, any ineffectiveness resulting from the hedging relationship is recorded in current earnings. Alternatively, an economic hedge, which does not meet the SFAS 133 (ASC 815) hedging criteria, would involve only recording the derivative at fair value on the balance sheet, with its associated changes in fair value recorded in earnings. The debt would continue to be carried at amortized cost and, therefore, current earnings would be impacted only by the interest rate shifts and other factors that cause the change in the swap's value and the underlying yield of the debt. This type of hedge is undertaken when SFAS 133 (ASC 815) hedge requirements cannot be achieved or management decides not to apply SFAS 133 (ASC 815) hedge accounting. Another alternative for the Company would be to elect to carry the debt at fair value under SFAS 159 (ASC 825-10). Once the irrevocable election is made upon issuance of the debt, the full change in fair value of the debt would be reported in earnings. The related interest rate swap, with changes in fair value also reflected in earnings, provides a natural offset to the debt's fair value change. To the extent the two offsets would not be exactly equal, the difference would be reflected in current earnings. This type of economic hedge is undertaken when the Company prefers to follow this simpler method that achieves generally similar financial statement results to an SFAS 133 (ASC 815) fair-value hedge.

Key aspects of achieving SFAS 133 (ASC 815) hedge accounting are documentation of hedging strategy and hedge effectiveness at the hedge inception and substantiating hedge effectiveness on an ongoing basis. A derivative must be highly effective in accomplishing the hedge objective of offsetting either changes in the fair value or cash flows of the hedged item for the risk being hedged. Any ineffectiveness in the hedge relationship is recognized in current earnings. The assessment of effectiveness excludes changes in the value of the hedged item that are unrelated to the risks being hedged. Similarly, the assessment of effectiveness may exclude changes in the fair value of a derivative related to time value that, if excluded, are recognized in current earnings.

Fair value hedges*Hedging of benchmark interest rate risk*

Citigroup hedges exposure to changes in the fair value of outstanding fixed-rate issued debt and borrowings. The fixed cash flows from those financing transactions are converted to benchmark variable-rate cash flows by entering into receive fixed, pay-variable interest rate swaps. These fair-value hedge relationships use dollar-offset ratio analysis to determine whether the hedging relationships are highly effective at inception and on an ongoing basis.

Citigroup also hedges exposure to changes in the fair value of fixed-rate assets, including available-for-sale debt securities and loans. The hedging instruments used are receive-variable, pay-fixed interest rate swaps. Most of these fair-value hedging relationships use dollar-offset ratio analysis to determine whether the hedging relationships are highly effective at inception and on an ongoing basis, while certain others use regression analysis.

Hedging of foreign exchange risk

Citigroup hedges the change in fair value attributable to foreign-exchange rate movements in available-for-sale securities that are denominated in currencies other than the functional currency of the entity holding the securities, which may be within or outside the U.S. The hedging instrument employed is a forward foreign-exchange contract. In this type of hedge, the change in fair value of the hedged available-for-sale security attributable to the portion of foreign exchange risk hedged is reported in earnings and not Accumulated other comprehensive income a process that serves to offset substantially the change in fair value of the forward contract that is also reflected in earnings. Citigroup considers the premium associated with forward contracts (differential between spot and contractual forward rates) as the cost of hedging; this is excluded from the assessment of hedge effectiveness and reflected directly in earnings. Dollar-offset method is used to assess hedge effectiveness. Since that assessment is based on changes in fair value attributable to changes in spot rates on both the available-for-sale securities and the forward contracts for the portion of the relationship hedged, the amount of hedge ineffectiveness is not significant.

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

The following table summarizes certain information related to the Company's fair value hedges for the three and six months ended June 30, 2009:

<i>In millions of dollars</i>	Three months ended June 30, 2009		Six months ended June 30, 2009	
	Principal Transactions	Other Revenue	Principal Transactions	Other Revenue
Gain (loss) on fair value designated and qualifying hedges				
Interest rate contracts	\$ 509	\$ (3,687)	\$ 965	\$ (5,886)
Foreign exchange contracts	1,186	467	1,303	322
Total gain (loss) on fair value designated and qualifying hedges	\$ 1,695	\$ (3,220)	\$ 2,268	\$ (5,564)
Gain (loss) on the hedged item in designated and qualifying fair value hedges				
Interest rate hedges	\$ (593)	\$ 3,546	\$ (1,042)	\$ 5,990
Foreign exchange hedges	(1,306)	(571)	(1,151)	(283)
Total gain (loss) on the hedged item in designated and qualifying fair value hedge	\$ (1,899)	\$ 2,975	\$ (2,193)	\$ 5,707
Hedge ineffectiveness recognized in earnings on designated and qualifying fair value hedges				
Interest rate hedges	\$ 50	\$ (170)	\$ 131	\$ 85
Foreign exchange hedges	(3)	(105)	8	32
Total hedge ineffectiveness recognized in earnings on designated and qualifying fair value hedges	\$ 47	\$ (275)	\$ 139	\$ 117
Net gain (loss) excluded from assessment of the effectiveness of fair value hedges				
Interest rate contracts	\$ (134)	\$ 29	\$ (208)	\$ 19
Foreign exchange contracts	(117)	1	144	7
Total net gain / (loss) excluded from assessment of the effectiveness of fair value hedges	\$ (251)	\$ 30	\$ (64)	\$ 26

Cash flow hedges

Hedging of benchmark interest rate risk

Citigroup hedges variable cash flows resulting from floating-rate liabilities and roll over (re-issuance) of short-term liabilities. Variable cash flows from those liabilities are converted to fixed-rate cash flows by entering into receive-variable, pay-fixed interest-rate swaps and receive-variable, pay-fixed forward-starting interest-rate swaps. For some hedges, the hedge ineffectiveness is eliminated by matching all terms of the hedged item and the hedging derivative at inception and on an ongoing basis. Citigroup does not exclude any terms from consideration when applying the matched terms method. To the extent all terms are not perfectly matched, these cash-flow hedging relationships use either regression analysis or dollar-offset ratio analysis to assess whether the hedging relationships are highly effective at inception and on an ongoing basis. Since efforts are made to match the terms of the derivatives to those of the hedged forecasted cash flows as closely as possible, the amount of hedge ineffectiveness is not significant even when the terms do not match perfectly.

Hedging of foreign exchange risk

Citigroup locks in the functional currency equivalent of cash flows of various balance sheet liability exposures, including short-term borrowings and long-term debt (and the forecasted issuances or rollover of such items) that are denominated in a currency other than the functional currency of the issuing entity. Depending on the risk-management objectives, these types of hedges are designated as either cash-flow hedges of only foreign exchange risk or cash-flow hedges of both foreign-exchange and interest rate risk, and the hedging instruments used are

Edgar Filing: CITIGROUP INC - Form 10-Q

foreign-exchange forward contracts, cross-currency swaps and foreign-currency options. For some hedges, Citigroup matches all terms of the hedged item and the hedging derivative at inception and on an ongoing basis to eliminate hedge ineffectiveness. Citigroup does not exclude any terms from consideration when applying the matched terms method. To the extent all terms are not perfectly matched, any ineffectiveness is measured using the "hypothetical derivative method" from FASB Derivative Implementation Group Issue G7(ASC 815-30-35-12 through 35-32). Efforts are made to match up the terms of the hypothetical and actual derivatives used as closely as possible. As a result, the amount of hedge ineffectiveness is not significant even when the terms do not match perfectly.

Hedging total return

Citigroup generally manages the risk associated with highly leveraged financing it has entered into by seeking to sell a majority of its exposures to the market prior to or shortly after funding. The portion of the highly leveraged financing that is retained by Citigroup is hedged with a total return swap.

The hedge ineffectiveness on the cash flow hedges recognized in earnings totals \$5 million for the three months

Table of Contents

ended June 30, 2009 and \$9 million for the six months ended June 30, 2009.

The pretax change in Accumulated other comprehensive income (loss) from cash flow hedges for the three and six months ended June 30, 2009 is presented below:

<i>In millions of dollars</i>	Three months ended June 30, 2009	Six months ended June 30, 2009
Effective portion of cash flow hedges included in AOCI		
Interest rate contracts	\$ 402	\$ 570
Foreign exchange contracts	233	633
Credit derivatives	(1,135)	358
Total Effective portion of cash flow hedges included in AOCI	\$ (500)	\$ 1,561
Effective portion of cash flow hedges reclassified from AOCI to Earnings		
Interest rate contracts(1)	\$ (445)	\$ (857)
Foreign exchange contracts(2)	(65)	21
Credit derivatives		
Total effective portion of cash flow hedges reclassified from AOCI to Earnings	\$ (510)	\$ (836)

- (1) The amount reclassified from AOCI, related to interest rate cash flow hedges, to Other revenue and Principal transactions is (\$395) million and (\$50) million, respectively for the three months ended June 30, 2009, and (\$762) million and (\$95) million for the six months ended June 30, 2009, respectively.
- (2) The amount reclassified from AOCI, related to foreign exchange cash flow hedges, to Other Revenue and Principal transactions is \$(63) million and (\$2) million, respectively, for the three months ended June 30, 2009, and \$25 million and (\$4) million for the six months ended June 30, 2009, respectively.

For cash flow hedges, any changes in the fair value of the end-user derivative remaining in *Accumulated other comprehensive income (loss)* on the Consolidated Balance Sheet will be included in earnings of future periods to offset the variability of the hedged cash flows when such cash flows affect earnings. The net loss associated with cash flow hedges expected to be reclassified from *Accumulated other comprehensive income* within 12 months of June 30, 2009 is approximately \$2 billion.

The impact of cash flow hedges on AOCI is also included within Note 14 to the Consolidated Financial Statements Changes in Accumulated Comprehensive Income (Loss).

Net investment hedges

Consistent with SFAS No. 52, *Foreign Currency Translation* (SFAS 52/ASC 830-20-35-5), SFAS 133 (ASC 815-20-25-58) allows hedging of the foreign-currency risk of a net investment in a foreign operation. Citigroup uses foreign-currency forwards, options and swaps and foreign-currency-denominated debt instruments to manage the foreign-exchange risk associated with Citigroup's equity investments in several non-U.S. dollar functional currency foreign subsidiaries. In accordance with SFAS 52(ASC 830-30-50-1), Citigroup records the change in the carrying amount of these investments in the *Cumulative translation adjustment* account within *Accumulated other comprehensive income (loss)*. Simultaneously, the effective portion of the hedge of this exposure is also recorded in the *Cumulative translation adjustment account* and the ineffective portion, if any, is immediately recorded in earnings.

For derivatives used in net investment hedges, Citigroup follows the forward-rate method from FASB Derivative Implementation Group Issue H8 (ASC 815-35-35-16 through 35-26), "Foreign Currency Hedges: Measuring the Amount of Ineffectiveness in a Net Investment

Edgar Filing: CITIGROUP INC - Form 10-Q

Hedge." According to that method, all changes in fair value, including changes related to the forward-rate component of the foreign-currency forward contracts and the time-value of foreign-currency options, are recorded in the Cumulative translation adjustment account. For foreign-currency denominated debt instruments that are designated as hedges of net investments, the translation gain or loss that is recorded in the cumulative translation adjustment account is based on the spot exchange rate between the functional currency of the respective subsidiary and the U.S. dollar, which is the functional currency of Citigroup. To the extent the notional amount of the hedging instrument exactly matches the hedged net investment and the underlying exchange rate of the derivative hedging instrument relates to the exchange rate between the functional currency of the net investment and Citigroup's functional currency (or, in the case of a non-derivative debt instrument, such instrument is denominated in the functional currency of the net investment), no ineffectiveness is recorded in earnings.

The following table summarizes certain information related to the Company's net investment hedges for the three and six months ended June 30, 2009:

Net Investments Hedges(1)	Three months ended June 30, 2009	Six months ended June 30, 2009
<i>In millions of dollars</i>		
Pretax gain (loss) included in FX translation adjustment with AOCI	\$ (3,451)	\$ (2,912)
Gain (loss) on hedge ineffectiveness on net investment hedges included in Other revenue	\$ (5)	\$ 4

- (1) No amount, related to the effective portion of net investment hedges, was reclassified from AOCI to earnings for the three and six months ended June 30, 2009. Additionally, no amount was excluded from the assessment of the effectiveness of the net investment hedges during the three and six months ended June 30, 2009.

Credit Derivatives

A credit derivative is a bilateral contract between a buyer and a seller under which the seller agrees to provide protection to the buyer against the credit risk of a particular entity ("reference entity" or "reference credit"). Credit derivatives generally require that the seller of credit protection make payments to the buyer upon the occurrence of predefined credit events (commonly referred to as "settlement triggers"). These settlement triggers are defined by the form of the derivative and the reference credit and are generally limited to the market standard of failure to pay on indebtedness and bankruptcy of the reference credit and, in a more limited range of transactions, debt restructuring. Credit derivative transactions referring to emerging market reference credits will also typically include additional settlement triggers to cover the acceleration of indebtedness and the risk of repudiation or a payment moratorium. In certain transactions,

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

protection may be provided on a portfolio of referenced credits or asset-backed securities. The seller of such protection may not be required to make payment until a specified amount of losses has occurred with respect to the portfolio and/or may only be required to pay for losses up to a specified amount.

The Company makes markets in and trades a range of credit derivatives, both on behalf of clients as well as for its own account. Through these contracts, the Company either purchases or writes protection on either a single name or a portfolio of reference credits. The Company uses credit derivatives to help mitigate credit risk in its corporate loan portfolio and other cash positions, to take proprietary trading positions, and to facilitate client transactions.

The range of credit derivatives sold includes credit default swaps, total return swaps and credit options.

A credit default swap is a contract in which, for a fee, a protection seller (guarantor) agrees to reimburse a protection buyer (beneficiary) for any losses that occur due to a credit event on a reference entity. If there is no credit default event or settlement trigger, as defined by the specific derivative contract, then the guarantor makes no payments to the beneficiary and receives only the contractually specified fee. However, if a credit event occurs as defined in the specific derivative contract sold, the guarantor will be required to make a payment to the beneficiary.

A total return swap transfers the total economic performance of a reference asset, which includes all associated cash flows, as well as capital appreciation or depreciation. The protection buyer (beneficiary) receives a floating rate of interest and any depreciation on the reference asset from the protection seller (guarantor) and, in return, the protection seller receives the cash flows associated with the reference asset plus any appreciation. Thus, according to the total return swap agreement, the beneficiary will be obligated to make a payment any time the floating interest rate payment and any depreciation of the reference asset exceed the cash flows associated with the underlying asset. A total return swap may terminate upon a default of the reference asset subject to the provisions of the related total return swap agreement between the protection seller (guarantor) and the protection buyer (beneficiary).

A credit option is a credit derivative that allows investors to trade or hedge changes in the credit quality of the reference asset. For example, in a credit spread option, the option writer (guarantor) assumes the obligation to purchase or sell the reference asset at a specified "strike" spread level. The option purchaser (beneficiary) buys the right to sell the reference asset to, or purchase it from, the option writer at the strike spread level. The payments on credit spread options depend either on a particular credit spread or the price of the underlying credit-sensitive asset. The options usually terminate if the underlying assets default.

A credit-linked note is a form of credit derivative structured as a debt security with an embedded credit default swap. The purchaser of the note writes credit protection to the issuer, and receives a return which will be negatively affected by credit events on the underlying reference credit. If the reference entity defaults, the purchaser of the credit-linked note may assume the long position in the debt security and any future cash flows from it, but will lose the amount paid to the issuer of the credit-linked note. Thus the maximum amount of the exposure is the carrying amount of the credit-linked note. As of June 30, 2009 and December 31, 2008, the amount of credit-linked notes held by the Company in trading inventory was immaterial.

The following tables summarize the key characteristics of the Company's credit derivative portfolio as protection seller (guarantor) as of June 30, 2009 and December 31, 2008:

<i>In millions of dollars as of June 30, 2009</i>	Maximum potential amount of future payments	Fair value payable
By industry/counterparty		
Bank	\$ 899,598	\$ 71,253
Broker-dealer	322,349	30,798

Non-investment grade		410,483	87,508
Not rated		181,371	27,053
Total by rating	\$	1,443,280	\$ 198,233

Citigroup evaluates the payment/performance risk of the credit derivatives to which it stands as guarantor based on the credit rating which has been assigned to the underlying referenced credit. Where external ratings by nationally recognized statistical rating organizations (such as Moody's and S&P), are used, investment grade ratings are considered to be Baa/BBB or above, while anything below is considered non-investment grade. The Citigroup internal ratings are in line with the related external credit rating system. On certain underlying referenced credit, mainly related to over-the-counter credit derivatives, ratings are not available, and these are included in the not-rated category. Credit derivatives written on an underlying non-investment grade referenced credit represent greater payment risk to the Company. The non-investment grade category in the table above primarily

Table of Contents

includes credit derivatives where the underlying referenced entity has been downgraded subsequent to the inception of the derivative.

The maximum potential amount of future payments under credit derivative contracts presented in the table above is based on the notional value of the derivatives. The Company believes that the maximum potential amount of future payments for credit protection sold is not representative of the actual loss exposure based on historical experience. This amount has not been reduced by the Company's rights to the underlying assets and the related cash flows. In accordance with most credit derivative contracts, should a credit event (or settlement trigger) occur, the Company is usually liable for the difference between the protection sold and the recourse it holds in the value of the underlying assets. Thus, if the reference entity defaults, Citi will generally have a right to collect on the underlying reference credit and any related cash flows, while being liable for the full notional amount of credit protection sold to the buyer. Furthermore, this maximum potential amount of future payments for credit protection sold has not been reduced for any cash collateral paid to a given counterparty, as such payments would be calculated after netting all derivative exposures, including any credit derivatives with that counterparty in accordance with a related master netting agreement. Due to such netting processes, determining the amount of collateral that corresponds to credit derivative exposures only is not possible. The Company actively monitors open credit risk exposures, and manages this exposure by using a variety of strategies including purchased credit derivatives, cash collateral or direct holdings of the referenced assets. This risk mitigation activity is not captured in the table above.

Credit-Risk-Related Contingent Features in Derivatives

Certain derivative instruments contain provisions that require the Company to either post additional collateral or immediately settle any outstanding liability balances upon the occurrence of a specified credit risk-related event. These events, which are defined by the existing derivative contracts, are primarily downgrades in the credit ratings of the Company and its affiliates. The fair value of all derivative instruments with credit-risk-related contingent features that are in a liability position at June 30, 2009 is \$20 billion. The Company has posted \$14 billion as collateral for this exposure in the normal course of business as of June 30, 2009. Each downgrade would trigger additional collateral requirements for the Company and its affiliates. However, in the event that each legal entity was downgraded to below investment grade credit rating as of June 30, 2009, the Company would be required to post additional collateral of up to \$3 billion.

Table of Contents**17. FAIR-VALUE MEASUREMENT (SFAS 157/ASC 820-10)**

Effective January 1, 2007, the Company adopted SFAS 157(ASC 820-10). SFAS 157(ASC 820-10) defines fair value, establishes a consistent framework for measuring fair value and expands disclosure requirements about fair-value measurements. SFAS 157(ASC 820-10), among other things, requires the Company to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. In addition, SFAS 157(ASC 820-10) precludes the use of block discounts when measuring the fair value of instruments traded in an active market; such discounts were previously applied to large holdings of publicly traded equity securities. It also requires recognition of trade-date gains related to certain derivative transactions whose fair value has been determined using unobservable market inputs. This guidance supersedes the guidance in Emerging Issues Task Force Issue No. 02-3, "Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management Activities" (EITF Issue 02-3), which prohibited the recognition of trade-date gains for such derivative transactions when determining the fair value of instruments not traded in an active market.

As a result of the adoption of SFAS 157(ASC 820-10), the Company made some amendments to the techniques used in measuring the fair value of derivative and other positions. These amendments change the way that the probability of default of a counterparty is factored into the valuation of derivative positions, include for the first time the impact of Citigroup's own credit risk on derivatives and other liabilities measured at fair value, and also eliminate the portfolio servicing adjustment that is no longer necessary under SFAS 157(ASC 820-10).

Fair-Value Hierarchy

SFAS 157(ASC 820-10-35-37 to 35-55) specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Company's market assumptions. These two types of inputs have created the following fair-value hierarchy:

Level 1 Quoted prices for *identical* instruments in active markets.

Level 2 Quoted prices for *similar* instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.

Level 3 Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are *unobservable*.

This hierarchy requires the use of observable market data when available. The Company considers relevant and observable market prices in its valuations where possible. The frequency of transactions, the size of the bid-ask spread and the amount of adjustment necessary when comparing similar transactions are all factors in determining the liquidity of markets and the relevance of observed prices in those markets.

Determination of Fair Value

For assets and liabilities carried at fair value, the Company measures such value using the procedures set out below, irrespective of whether these assets and liabilities are carried at fair value as a result of an election under SFAS 159 (ASC 825-10-4 through 25-5), FASB Statement No. 155, *Accounting for Certain Hybrid Financial Instruments* (SFAS 155/ASC 815-15-25-4 through 25-5), or FASB Statement No. 156, *Accounting for Servicing of Financial Assets* (SFAS 156/ASC 860-50-35), or whether they were previously carried at fair value.

When available, the Company generally uses quoted market prices to determine fair value and classifies such items in Level 1. In some cases where a market price is available, the Company will make use of acceptable practical expedients (such as matrix pricing) to calculate fair value, in which case the items are classified in Level 2.

If quoted market prices are not available, fair value is based upon internally developed valuation techniques that use, where possible, current market-based or independently sourced market parameters, such as interest rates, currency rates, option volatilities, etc. Items valued using such internally generated valuation techniques are classified according to the lowest level input or value driver that is significant to the valuation. Thus, an item may be classified in Level 3 even though there may be some significant inputs that are readily observable.

Edgar Filing: CITIGROUP INC - Form 10-Q

Where available, the Company may also make use of quoted prices for recent trading activity in positions with the same or similar characteristics to that being valued. The frequency and size of transactions and the amount of the bid-ask spread are among the factors considered in determining the liquidity of markets and the relevance of observed prices from those markets. If relevant and observable prices are available, those valuations would be classified as Level 2. If prices are not available, other valuation techniques would be used and the item would be classified as Level 3.

Fair-value estimates from internal valuation techniques are verified, where possible, to prices obtained from independent vendors or brokers. Vendors and brokers' valuations may be based on a variety of inputs ranging from observed prices to proprietary valuation models.

The following section describes the valuation methodologies used by the Company to measure various financial instruments at fair value, including an indication of the level in the fair-value hierarchy in which each instrument is generally classified. Where appropriate, the description includes details of the valuation models, the key inputs to those models as well as any significant assumptions.

Securities purchased under agreements to resell and securities sold under agreements to repurchase

No quoted prices exist for such instruments and so fair value is determined using a discounted cash-flow technique. Cash flows are estimated based on the terms of the contract, taking into account any embedded derivative or other features. Expected cash flows are discounted using market rates appropriate to the maturity of the instrument as well as the nature and amount of collateral taken or received. Generally, such instruments are classified within Level 2 of the fair-value hierarchy as the inputs used in the fair valuation are readily observable.

Table of Contents

Trading Account Assets and Liabilities Trading Securities and Trading Loans

When available, the Company uses quoted market prices to determine the fair value of trading securities; such items are classified in Level 1 of the fair-value hierarchy. Examples include some government securities and exchange-traded equity securities.

For bonds and secondary market loans traded over the counter, the Company generally determines fair value utilizing internal valuation techniques. Fair-value estimates from internal valuation techniques are verified, where possible, to prices obtained from independent vendors. Vendors compile prices from various sources and may apply matrix pricing for similar bonds or loans where no price is observable. If available, the Company may also use quoted prices for recent trading activity of assets with similar characteristics to the bond or loan being valued. Trading securities and loans priced using such methods are generally classified as Level 2. However, when less liquidity exists for a security or loan, a quoted price is stale or prices from independent sources vary, a loan or security is generally classified as Level 3.

Where the Company's principal market for a portfolio of loans is the securitization market, the Company uses the securitization price to determine the fair value of the portfolio. The securitization price is determined from the assumed proceeds of a hypothetical securitization in the current market, adjusted for transformation costs (i.e., direct costs other than transaction costs) and securitization uncertainties such as market conditions and liquidity. As a result of the severe reduction in the level of activity in certain securitization markets since the second half of 2007, observable securitization prices for certain directly comparable portfolios of loans have not been readily available. Therefore, such portfolios of loans are generally classified in Level 3 of the fair-value hierarchy. However, for other loan securitization markets, such as those related to conforming prime fixed-rate and conforming adjustable-rate mortgage loans, pricing verification of the hypothetical securitizations has been possible, since these markets have remained active. Accordingly, these loan portfolios are classified as Level 2 in the fair-value hierarchy.

Trading Account Assets and Liabilities Derivatives

Exchange-traded derivatives are generally fair valued using quoted market (i.e., exchange) prices and so are classified in Level 1 of the fair-value hierarchy.

The majority of derivatives entered into by the Company are executed over the counter and so are valued using internal valuation techniques as no quoted market prices exist for such instruments. The valuation techniques and inputs depend on the type of derivative and the nature of the underlying instrument. The principal techniques used to value these instruments are discounted cash flows, Black-Scholes and Monte Carlo simulation. The fair values of derivative contracts reflect cash the Company has paid or received (for example, option premiums paid and received).

The key inputs depend upon the type of derivative and the nature of the underlying instrument and include interest rate yield curves, foreign-exchange rates, the spot price of the underlying volatility and correlation. The item is placed in either Level 2 or Level 3 depending on the observability of the significant inputs to the model. Correlation and items with longer tenors are generally less observable.

Subprime-Related Direct Exposures in CDOs

The Company accounts for its CDO super senior subprime direct exposures and the underlying securities on a fair-value basis with all changes in fair value recorded in earnings. Citigroup's CDO super senior subprime direct exposures are not subject to valuation based on observable transactions. Accordingly, the fair value of these exposures is based on management's best estimates based on facts and circumstances as of the date of these Consolidated Financial Statements.

Citigroup's CDO super senior subprime direct exposures are Level 3 assets. The valuation of the high-grade and mezzanine ABS CDO positions uses trader prices based on the underlying assets of each high-grade and mezzanine ABS CDO. Unlike the ABCP and CDO-squared positions, the high-grade and mezzanine positions are now largely hedged through the ABX and bond short positions, which are, by necessity, trader priced. This results in closer symmetry in the way these long and short positions are valued by the Company. Citigroup intends to use trader marks to value this portion of the portfolio going forward so long as it remains largely hedged.

The valuation of the ABCP and CDO-squared positions are subject to valuation based on significant unobservable inputs. Fair value of these exposures is based on estimates of future cash flows from the mortgage loans underlying the assets of the ABS CDOs. To determine the performance of the underlying mortgage loan portfolios, the Company estimates the prepayments, defaults and loss severities based on a number of macroeconomic factors, including housing price changes, unemployment rates, interest rates and borrower and loan attributes, such as age, credit scores, documentation status, loan-to-value (LTV) ratios and debt-to-income (DTI) ratios. The model is calibrated using available mortgage loan information including historical loan performance. In addition, the methodology estimates the impact of geographic concentration of mortgages and the impact of reported fraud in the origination of subprime mortgages. An appropriate discount rate is then applied to the cash flows generated for each ABCP and CDO-squared tranche, in order to estimate its fair value under current market conditions.

Edgar Filing: CITIGROUP INC - Form 10-Q

When necessary, the valuation methodology used by Citigroup is refined and the inputs used for the purposes of estimation are modified, in part, to reflect ongoing market developments. More specifically, the inputs of home price appreciation (HPA) assumptions and delinquency data were updated along with discount rates that are based upon a weighted average combination of implied spreads from single name ABS bond prices and ABX indices, as well as CLO spreads under current market conditions.

The housing-price changes were estimated using a forward-looking projection, which incorporated the Loan Performance Index. In addition, the Company's mortgage default model also uses recent mortgage performance data, a period of sharp home price declines and high levels of mortgage foreclosures.

The valuation as of June 30, 2009 assumes a cumulative decline in U.S. housing prices from peak to trough of 32.3%.

Table of Contents

This rate assumes declines of 10% and 3% in 2009 and 2010, respectively, the remainder of the 32.3% decline having already occurred before the end of 2008.

In addition, the discount rates were based on a weighted average combination of the implied spreads from single name ABS bond prices, ABX indices and CLO spreads, depending on vintage and asset types. To determine the discount margin, the Company applies the mortgage default model to the bonds underlying the ABX indices and other referenced cash bonds and solves for the discount margin that produces the current market prices of those instruments.

The primary drivers that currently impact the super senior valuations are the discount rates used to calculate the present value of projected cash flows and projected mortgage loan performance.

For most of the lending and structuring direct subprime exposures (excluding super seniors), fair value is determined utilizing observable transactions where available, other market data for similar assets in markets that are not active and other internal valuation techniques.

Investments

The investments category includes available-for-sale debt and marketable equity securities, whose fair value is determined using the same procedures described for trading securities above or, in some cases, using vendor prices as the primary source.

Also included in investments are nonpublic investments in private equity and real estate entities held by the S&B business. Determining the fair value of nonpublic securities involves a significant degree of management resources and judgment as no quoted prices exist and such securities are generally very thinly traded. In addition, there may be transfer restrictions on private equity securities. The Company uses an established process for determining the fair value of such securities, using commonly accepted valuation techniques, including the use of earnings multiples based on comparable public securities, industry-specific non-earnings-based multiples and discounted cash flow models. In determining the fair value of nonpublic securities, the Company also considers events such as a proposed sale of the investee company, initial public offerings, equity issuances, or other observable transactions.

Private equity securities are generally classified in Level 3 of the fair-value hierarchy.

Short-Term Borrowings and Long-Term Debt

Where fair-value accounting has been elected, the fair value of non-structured liabilities is determined by discounting expected cash flows using the appropriate discount rate for the applicable maturity. Such instruments are generally classified in Level 2 of the fair-value hierarchy as all inputs are readily observable.

The Company determines the fair value of structured liabilities (where performance is linked to structured interest rates, inflation or currency risks) and hybrid financial instruments (performance linked to risks other than interest rates, inflation or currency risks) using the appropriate derivative valuation methodology (described above) given the nature of the embedded risk profile. Such instruments are classified in Level 2 or Level 3 depending on the observability of significant inputs to the model.

Market Valuation Adjustments

Liquidity adjustments are applied to items in Level 2 and Level 3 of the fair-value hierarchy to ensure that the fair value reflects the price at which the entire position could be liquidated. The liquidity reserve is based on the bid-offer spread for an instrument, adjusted to take into account the size of the position.

Counterparty credit-risk adjustments are applied to derivatives, such as over-the-counter derivatives, where the base valuation uses market parameters based on the LIBOR interest rate curves. Not all counterparties have the same credit risk as that implied by the relevant LIBOR curve, so it is necessary to consider the market view of the credit risk of a counterparty in order to estimate the fair value of such an item.

Bilateral or "own" credit-risk adjustments are applied to reflect the Company's own credit risk when valuing derivatives and liabilities measured at fair value, in accordance with the requirements of SFAS 157 (ASC 820-10-35-17 through 35-18). Counterparty and own credit adjustments consider the expected future cash flows between Citi and its counterparties under the terms of the instrument and the effect of credit risk on the valuation of those cash flows, rather than a point-in-time assessment of the current recognized net asset or liability. Furthermore, the credit-risk adjustments take into account the effect of credit-risk mitigants, such as pledged collateral and any legal right of offset (to the extent such offset exists) with a counterparty through arrangements such as netting agreements.

Auction Rate Securities

Auction rate securities (ARS) are long-term municipal bonds, corporate bonds, securitizations and preferred stocks with interest rates or dividend yields that are reset through periodic auctions. The coupon paid in the current period is based on the rate determined by the prior auction. In the event of an auction failure, ARS holders receive a "fail rate" coupon, which is specified by the original issue documentation of each ARS.

Where insufficient orders to purchase all of the ARS issue to be sold in an auction were received, the primary dealer or auction agent would traditionally have purchased any residual unsold inventory (without a contractual obligation to do so). This residual inventory would then be repaid through subsequent auctions, typically in a short timeframe. Due to this auction mechanism and generally liquid market, ARS have historically traded and were valued as short-term instruments.

Citigroup acted in the capacity of primary dealer for approximately \$72 billion of ARS and continued to purchase residual unsold inventory in support of the auction mechanism until mid-February 2008. After this date, liquidity in the ARS market deteriorated significantly, auctions failed due to a lack of bids from third-party investors, and Citigroup ceased to purchase unsold inventory. Following a number of ARS refinancings, at June 30, 2009, Citigroup continued to act in the capacity of primary dealer for approximately \$34 billion of outstanding ARS.

The Company classifies its ARS as held-to-maturity, available-for-sale and trading securities.

Prior to our first auction's failing in the first quarter of 2008, Citigroup valued ARS based on observation of auction market prices, because the auctions had a short maturity period (7, 28 and 35 days). This generally resulted in valuations at par. Once

Table of Contents

the auctions failed, ARS could no longer be valued using observation of auction market prices. Accordingly, the fair value of ARS is currently estimated using internally developed discounted cash flow valuation techniques specific to the nature of the assets underlying each ARS.

For ARS with U.S. municipal securities as underlying assets, future cash flows are estimated based on the terms of the securities underlying each individual ARS and discounted at an estimated discount rate in order to estimate the current fair value. The key assumptions that impact the ARS valuations are estimated prepayments and refinancings, estimated fail rate coupons (i.e., the rate paid in the event of auction failure, which varies according to the current credit rating of the issuer) and the discount rate used to calculate the present value of projected cash flows. The discount rate used for each ARS is based on rates observed for straight issuances of other municipal securities. In order to arrive at the appropriate discount rate, these observed rates were adjusted upward to factor in the specifics of the ARS structure being valued, such as callability, and the illiquidity in the ARS market.

For ARS with student loans as underlying assets, future cash flows are estimated based on the terms of the loans underlying each individual ARS, discounted at an appropriate rate in order to estimate the current fair value. The key assumptions that impact the ARS valuations are the expected weighted average life of the structure, estimated fail rate coupons, the amount of leverage in each structure and the discount rate used to calculate the present value of projected cash flows. The discount rate used for each ARS is based on rates observed for basic securitizations with similar maturities to the loans underlying each ARS being valued. In order to arrive at the appropriate discount rate, these observed rates were adjusted upward to factor in the specifics of the ARS structure being valued, such as callability, and the illiquidity in the ARS market.

During the first quarter of 2008, ARS for which the auctions failed and where no secondary market has developed were moved to Level 3, as the assets were subject to valuation using significant unobservable inputs. For ARS which are subject to SFAS 157(ASC 820-10) classification, the majority continue to be classified in Level 3.

Alt-A Mortgage Securities

The Company classifies its Alt-A mortgage securities as held-to-maturity, available-for-sale, and trading investments. The securities classified as trading and available-for-sale are recorded at fair value with changes in fair value reported in current earnings and AOCI, respectively. For these purposes, Alt-A mortgage securities are non-agency residential mortgage-backed securities (RMBS) where (1) the underlying collateral has weighted average FICO scores between 680 and 720 or (2) for instances where FICO scores are greater than 720, RMBS have 30% or less of the underlying collateral composed of full documentation loans.

Similar to the valuation methodologies used for other trading securities and trading loans, the Company generally determines the fair value of Alt-A mortgage securities utilizing internal valuation techniques. Fair-value estimates from internal valuation techniques are verified, where possible, to prices obtained from independent vendors. Vendors compile prices from various sources. Where available, the Company may also make use of quoted prices for recent trading activity in securities with the same or similar characteristics to that being valued.

The internal valuation techniques used for Alt-A mortgage securities, as with other mortgage exposures, consider estimated housing price changes, unemployment rates, interest rates and borrower attributes. They also consider prepayment rates as well as other market indicators.

Alt-A mortgage securities that are valued using these methods are generally classified as Level 2. However, Alt-A mortgage securities backed by Alt-A mortgages of lower quality or more recent vintages are mostly classified in Level 3 due to the reduced liquidity that exists for such positions, which reduces the reliability of prices available from independent sources.

Commercial Real Estate Exposure

Citigroup reports a number of different exposures linked to commercial real estate at fair value with changes in fair value reported in earnings, including securities, loans and investments in entities that hold commercial real estate loans or commercial real estate directly. The Company also reports securities backed by commercial real estate as *Available-for-sale investments*, which are carried at fair value with changes in fair-value reported in AOCI.

Similar to the valuation methodologies used for other trading securities and trading loans, the Company generally determines the fair value of securities and loans linked to commercial real estate utilizing internal valuation techniques. Fair-value estimates from internal valuation techniques are verified, where possible, to prices obtained from independent vendors. Vendors compile prices from various sources. Where available, the Company may also make use of quoted prices for recent trading activity in securities or loans with the same or similar characteristics to that being valued. Securities and loans linked to commercial real estate valued using these methodologies are generally classified as Level 3 as a result of the reduced liquidity currently in the market for such exposures.

Edgar Filing: CITIGROUP INC - Form 10-Q

The fair value of investments in entities that hold commercial real estate loans or commercial real estate directly is determined using a similar methodology to that used for other non-public investments in real estate held by the S&B business. The Company uses an established process for determining the fair value of such securities, using commonly accepted valuation techniques, including the use of earnings multiples based on comparable public securities, industry-specific non-earnings-based multiples and discounted cash flow models. In determining the fair value of such investments, the Company also considers events, such as a proposed sale of the investee company, initial public offerings, equity issuances, or other observable transactions. Such investments are generally classified in Level 3 of the fair-value hierarchy.

Highly Leveraged Financing Commitments

The Company reports approximately \$900 million of highly leveraged loans as held for sale, which are measured on a LOCOM basis. The fair value of such exposures is determined, where possible, using quoted secondary-market prices and

Table of Contents

classified in Level 2 of the fair-value hierarchy if there is a sufficient level of activity in the market and quotes or traded prices are available with suitable frequency.

However, due to the dislocation of the credit markets and the reduced market interest in higher risk/higher yield instruments since the latter half of 2007, liquidity in the market for highly leveraged financings has been limited. Therefore, a majority of such exposures are classified in Level 3 as quoted secondary market prices do not generally exist. The fair value for such exposures is determined using quoted prices for a similar asset or assets, adjusted for the specific attributes of the loan being valued.

Table of Contents**Items Measured at Fair Value on a Recurring Basis**

The following tables present for each of the fair-value hierarchy levels the Company's assets and liabilities that are measured at fair value on a recurring basis at June 30, 2009 and December 31, 2008. The Company often hedges positions that have been classified in the Level 3 category with financial instruments that have been classified as Level 1 or Level 2. In addition, the Company also hedges items classified in the Level 3 category with instruments classified in Level 3 of the fair value hierarchy. The effects of these hedges are presented gross in the following table.

<i>In millions of dollars at June 30, 2009</i>	Level 1	Level 2	Level 3	Gross inventory	Netting(1)	Net balance

Table of Contents**Changes in Level 3 Fair-Value Category**

The following tables present the changes in the Level 3 fair-value category for the three months ended June 30, 2009 and December 31, 2008. The Company classifies financial instruments in Level 3 of the fair-value hierarchy when there is reliance on at least one significant unobservable input to the valuation model. In addition to these unobservable inputs, the valuation models for Level 3 financial instruments typically also rely on a number of inputs that are readily observable either directly or indirectly. Thus, the gains and losses presented below include changes in the fair value related to both observable and unobservable inputs.

The Company often hedges positions with offsetting positions that are classified in a different level. For example, the gains and losses for assets and liabilities in the Level 3 category presented in the tables below do not reflect the effect of offsetting losses and gains on hedging instruments that have been classified by the Company in the Level 1 and Level 2 categories. In addition, the Company hedges items classified in the Level 3 category with instruments also classified in Level 3 of the fair-value hierarchy. The effects of these hedges are presented gross in the following tables.

<i>In millions of dollars</i>	March 31, 2009	Net realized/ unrealized gains (losses) included in		Transfers in and/or out of Level 3	Purchases, issuances and settlements	June 30, 2009	Unrealized gains (losses) still held(3)

-
- (1) Changes in fair value for available-for-sale investments (debt securities) are recorded in *Accumulated other comprehensive income*, while gains and losses from sales are recorded in *Realized gains (losses) from sales of investments* on the Consolidated Statement of Income.
- (2) Unrealized gains (losses) on MSRs are recorded in *Commissions and fees* on the Consolidated Statement of Income.
- (3) Represents the amount of total gains or losses for the period, included in earnings (and *Accumulated other comprehensive income* for changes in fair value for available-for-sale investments), attributable to the change in fair value relating to assets and liabilities classified as Level 3 that are still held at June 30, 2009 and 2008.
- (4) Total Level 3 derivative exposures have been netted in these tables for presentation purposes only.

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

The following is a discussion of the changes to the Level 3 balances for each of the roll-forward tables presented above.

The significant changes from March 31, 2009 to June 30, 2009 Level 3 assets and liabilities are due to:

A net increase in trading securities of \$1.8 billion that was driven by net realized / unrealized gains of \$1.5 billion recorded in *Principal transactions*, composed mainly of gains on subprime mortgage-backed securities, U.S. government sponsored mortgage-backed securities, corporate debt securities and other debt securities;

A net decrease in trading derivatives which was driven by net realized / unrealized losses of \$2.5 billion recorded in *Principal transactions*, mainly on complex derivative contracts such as those linked to credit and equity exposures. These losses are partially offset by gains recognized on instruments that have been classified in Levels 1 and 2.

The significant changes from December 31, 2008 to June 30, 2009 Level 3 assets and liabilities are due to:

A net decrease in trading securities of \$6.1 billion that was mainly driven by:

- (i) Net realized / unrealized losses of \$2.4 billion recorded in *Principal transactions*, mainly composed of write-downs on subprime mortgage-backed securities;
- (ii) Net transfers of \$3.1 billion to Level 2 inventory as a result of better vendor pricing coverage for corporate debt.

A decrease in investments of \$5.3 billion that primarily resulted from:

- (i) Net realized / unrealized losses recorded in other income of \$1.4 billion mainly driven by \$1.6 billion in losses on hedged senior debt securities retained from the sale of a portfolio of highly leveraged loans; as well as losses on private equity investments and real estate fund investments. Offsetting this loss on the retained highly leveraged debt securities is a gain on the corresponding cash flow hedge that is reflected in AOCI and on the line Other Financial Assets measured on a recurring basis within the fair value hierarchy table presented above as a Level 3 asset.
- (ii) Net settlements of investment securities of \$2.5 billion mainly due to pay-downs during the quarter.
- (iii) Net transfers of \$1.4 billion of investments to Level 2.

A decrease in trading derivatives was driven by net realized and unrealized losses of \$2.4 billion recorded in *Principal transactions*, mainly on complex derivative contracts such as those linked to credit and equity exposures. These losses are partially offset by gains recognized on instruments that have been classified in Levels 1 and 2.

For the period March 31, 2008 to June 30, 2008, the changes in Level 3 assets and liabilities are due to:

- (i) The decrease in trading account assets of \$14 billion, which was driven primarily by the write-downs on ABS-CDO super senior exposures plus approximately \$9 billion of net sales of trading securities, including CDO liquidations.
- (ii)

Edgar Filing: CITIGROUP INC - Form 10-Q

The increase in investments of \$7 billion, which was largely due to \$8.7 billion of senior debt securities retained from the Company's April 17, 2008 sale of a corporate loan portfolio that included highly leverage loans, offset by net sales/settlements of other investments.

- (iii) The increase in MSR of \$1.3 billion, which resulted from the mark-to-market gain recognized of \$1.4 billion. This gain was offset by the decrease of \$2.1 billion in the value of the related non-Level 3 hedges.
- (iv) The reductions in securities sold under agreement to repurchase of \$3 billion, and short-term borrowings of \$5 billion, which were driven primarily by the transfers of certain positions from Level 3 to Level 2, as valuation methodology inputs considered to be unobservable were demonstrated to be insignificant to the overall valuation.
- (v) The decrease in long-term debt of \$9 billion, as payments were made against the consolidated SIV's long-term debt.

The significant changes from December 31, 2007 to June 30, 2008 in Level 3 assets and liabilities are due to:

- (i) A minimal net increase in trading securities as net write-downs recognized for ABSCDO super senior exposures and Alt-A mortgage securities, plus a net reduction from settlements/sales of trading securities, were offset by a net transfer-in to Level 3 from Level 2 as prices and other valuation inputs became unobservable for a number of positions including auction rate securities and Alt-A mortgage securities.
- (ii) The increase in investments of \$10 billion, which was due primarily to \$8.7 billion of senior debt securities retained from the Company's April 17, 2008 sale of a corporate loan portfolio that included highly leverage loans.
- (iii) The reduction in securities sold under agreement to repurchase of \$3 billion, which was driven by the transfer of positions from Level 3 to Level 2 as valuation methodology inputs considered to be unobservable were demonstrated to be insignificant to the overall valuation.
- (iv) The decrease in short-term borrowings of \$4 billion, which was primarily due to net transfers out of \$2 billion as valuation methodology inputs considered to be unobservable were demonstrated to be insignificant to the overall valuation, and payments of \$1 billion against the consolidated SIV's short-term debt.
- (v) The increase in long-term debt of \$29 billion, which was driven by the transfer of consolidated SIV liabilities to Level 3 due to the lack of observable inputs, offset by the payments made against this debt in the second quarter 2008.

Items Measured at Fair Value on a Nonrecurring Basis

Certain assets and liabilities are measured at fair value on a nonrecurring basis and therefore are not included in the tables above. These include assets measured at cost that have been written down to fair value during the periods as a result of an impairment. In addition, assets such as loans held for sale that are measured at the lower of cost or market (LOCOM) that were recognized at fair value below cost at the end of the period.

The fair value of loans measured on a LOCOM basis is determined where possible using quoted secondary-market prices. Such loans are generally classified in Level 2 of the fair-value hierarchy given the level of activity in the market and the frequency of available quotes. If no such quoted price exists, the fair value of a loan is determined using quoted prices for a similar asset or assets, adjusted for the specific attributes of that loan.

The following table presents all loans held-for-sale that are carried at LOCOM as of June 30, 2009 and December 31, 2008 (in billions):

Aggregate Cost	Fair Value	Level 2	Level 3
-------------------	---------------	---------	---------

Edgar Filing: CITIGROUP INC - Form 10-Q

June 30, 2009	\$	0.3	\$	0.1	\$	0.1	\$
December 31, 2008		3.1		2.1		0.8	1.3

Table of Contents

18. FAIR-VALUE ELECTIONS (SFAS 155/ASC 815-15-25, SFAS 156/ASC 860-50-35 and SFAS 159/ASC 825-10)

Under SFAS 159 (ASC 825-10), the Company may elect to report most financial instruments and certain other items at fair value on an instrument-by-instrument basis with changes in fair value reported in earnings. After the initial adoption, the election is made upon the acquisition of an eligible financial asset, financial liability or firm commitment or when certain specified reconsideration events occur. The fair-value election may not be revoked once an election is made.

Additionally, the transition provisions of SFAS 159 (ASC 825-10) permit a one-time election for existing positions at the adoption date with a cumulative-effect adjustment included in opening retained earnings and future changes in fair value reported in earnings.

The Company also has elected the fair-value accounting provisions permitted under SFAS 155 (ASC 815-15-25) and SFAS 156 (ASC 860-50-35) for certain assets and liabilities. In accordance with SFAS 155 (ASC 815-15-25), which was primarily adopted on a prospective basis, hybrid financial instruments, such as structured notes containing embedded derivatives that otherwise would require bifurcation, as well as certain interest-only instruments, may be accounted for at fair value if the Company makes an irrevocable election to do so on an instrument-by-instrument basis. The changes in fair value are recorded in current earnings. Additional discussion regarding the applicable areas in which SFAS 155 (ASC 815-15-25) was adopted is presented in Note 17 to the Consolidated Financial Statements.

SFAS 156 (ASC 860-50-35) requires all servicing rights to be recognized initially at fair value. At its initial adoption, the standard permits a one-time irrevocable election to re-measure each class of servicing rights at fair value, with the changes in fair value recorded in current earnings. The classes of servicing rights are identified based on the availability of market inputs used in determining their fair values and the methods for managing their risks. The Company has elected fair-value accounting for its mortgage and student loan classes of servicing rights. The impact of adopting this standard was not material. See Note 15 to the Consolidated Financial Statements for further discussions regarding the accounting and reporting of mortgage servicing rights.

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

The following table presents, as of June 30, 2009, the fair value of those positions selected for fair-value accounting in accordance with SFAS 159 (ASC 825-10), SFAS 156 (ASC 860-50-35), and SFAS 155 (ASC 815-15-25), as well as the changes in fair value for the six months ended June 30, 2009 and June 30, 2008.

Table of Contents**Own-Credit Valuation Adjustment**

The fair value of debt liabilities for which the fair-value option was elected (other than non-recourse and similar liabilities) was impacted by the narrowing of the Company's credit spread. The estimated change in the fair value of these debt liabilities due to such changes in the Company's own credit risk (or instrument-specific credit risk) was a loss of \$1.608 billion and \$228 million for the three months ended June 30, 2009 and June 30, 2008, respectively, and a loss of \$1.428 billion and a gain of \$1.051 billion for the six months ended June 30, 2009 and June 30, 2008, respectively. Changes in fair value resulting from changes in instrument-specific credit risk were estimated by incorporating the Company's current observable credit spreads into the relevant valuation technique used to value each liability as described above.

During the fourth quarter of 2008, the Company changed the source of its credit spreads from those observed in the credit default swap market to those observed in the bond market. Had this modification been in place since the beginning of 2008, the change in the Company's own credit spread would have resulted in a loss of \$60 million and a gain of \$1.19 billion for the three and six months ended June 30, 2008, respectively.

SFAS 159 The Fair-Value Option for Financial Assets and Financial Liabilities (ASC 825-10)*Legg Mason convertible preferred equity securities*

The Legg Mason convertible preferred equity securities (Legg shares) were acquired in connection with the sale of Citigroup's Asset Management business in December 2005. Prior to the election of fair-value option accounting, the shares were classified as available-for-sale securities with the unrealized loss of \$232 million as of December 31, 2006 included in *Accumulated other comprehensive income (loss)*. In connection with the Company's adoption of SFAS 159 (ASC 825-10), this unrealized loss was recorded as a reduction of January 1, 2007 *Retained earnings* as part of the cumulative-effect adjustment.

During the first quarter of 2008, the Company sold the remaining 8.4 million Legg shares at a pretax loss of \$10.3 million (\$6.7 million after-tax).

Selected portfolios of securities purchased under agreements to resell, securities borrowed, securities sold under agreements to repurchase, securities loaned and certain non-collateralized short-term borrowings

The Company elected the fair-value option retrospectively for our United States and United Kingdom portfolios of fixed-income securities purchased under agreements to resell and fixed-income securities sold under agreements to repurchase (and certain non-collateralized short-term borrowings). The fair-value option was also elected prospectively in the second quarter of 2007 for certain portfolios of fixed-income securities lending and borrowing transactions based in Japan. In each case, the election was made because the related interest-rate risk is managed on a portfolio basis, primarily with derivative instruments that are accounted for at fair value through earnings. Previously, these positions were accounted for on an accrual basis.

Changes in fair value for transactions in these portfolios are recorded in *Principal transactions*. The related interest revenue and interest expense are measured based on the contractual rates specified in the transactions and are reported as interest revenue and expense in the Consolidated Statement of Income.

Selected letters of credit and revolving loans hedged by credit default swaps or participation notes

The Company has elected the fair-value option for certain letters of credit that are hedged with derivative instruments or participation notes. Upon electing the fair-value option, the related portions of the allowance for loan losses and the allowance for unfunded lending commitments were reversed. Citigroup elected the fair-value option for these transactions because the risk is managed on a fair-value basis and to mitigate accounting mismatches.

The notional amount of these unfunded letters of credit was \$2 billion as of June 30, 2009 and \$1.4 billion as of December 31, 2008. The amount funded was insignificant with no amounts 90 days or more past due or on a non-accrual status at June 30, 2009 and December 31, 2008.

These items have been classified in *Trading account assets* or *Trading account liabilities* on the Consolidated Balance Sheet. Changes in fair value of these items are classified in *Principal transactions* in the Company's Consolidated Statement of Income.

Certain credit products

Edgar Filing: CITIGROUP INC - Form 10-Q

Citigroup has elected the fair-value option for certain originated and purchased loans, including certain unfunded loan products, such as guarantees and letters of credit, executed by Citigroup's trading businesses. None of these credit products is a highly leveraged financing commitment. Significant groups of transactions include loans and unfunded loan products that are expected to be either sold or securitized in the near term, or transactions where the economic risks are hedged with derivative instruments such as purchased credit default swaps or total return swaps where the Company pays the total return on the underlying loans to a third party. Citigroup has elected the fair-value option to mitigate accounting mismatches in cases where hedge accounting is complex and to achieve operational simplifications. Fair value was not elected for most lending transactions across the Company, including where those management objectives would not be met.

Edgar Filing: CITIGROUP INC - Form 10-Q

Table of Contents

The following table provides information about certain credit products carried at fair value:

<i>In millions of dollars</i>	June 30, 2009		December 31, 2008	
	Trading assets	Loans	Trading assets	Loans
Carrying amount reported on the Consolidated Balance Sheet	\$ 15,101	\$ 1,373	\$ 16,254	\$ 2,315
Aggregate unpaid principal balance in excess of fair value	\$ 2,967	\$ (12)	\$ 6,501	\$ 3
Balance of non-accrual loans or loans more than 90 days past due	\$ 692	\$ 1,097	\$ 77	\$ 1,113
Aggregate unpaid principal balance in excess of fair value for non-accrual loans or loans more than 90 days past due	\$ 480	\$ (1)	\$ 190	\$ (4)

In addition to the amounts reported above, \$200 million and \$72 million of unfunded loan commitments related to certain credit products selected for fair-value accounting were outstanding as of June 30, 2009 and December 31, 2008, respectively.

Changes in fair value of funded and unfunded credit products are classified in *Principal transactions* in the Company's Consolidated Statement of Income. Related interest revenue is measured based on the contractual interest rates and reported as *Interest revenue* on trading account assets or loans depending on their balance sheet classifications. The changes in fair value for the six months ended June 30, 2009 and 2008 due to instrument-specific credit risk totaled to a loss of \$48 million and \$25 million, respectively.

Certain investments in private equity and real estate ventures and certain equity method investments

Citigroup invests in private equity and real estate ventures for the purpose of earning investment returns and for capital appreciation. The Company has elected the fair-value option for certain of these ventures, because such investments are considered similar to many private equity or hedge fund activities in our investment companies, which are reported at fair value. The fair-value option brings consistency in the accounting and evaluation of certain of these investments. As required by SFAS 159 (ASC 825-10), all investments (debt and equity) in such private equity and real estate entities are accounted for at fair value. These investments are classified as *Investments* on Citigroup's Consolidated Balance Sheet.

Citigroup also holds various non-strategic investments in leveraged buyout funds and other hedge funds that previously were required to be accounted for under the equity method. The Company elected fair-value accounting to reduce operational and accounting complexity. Since the funds account for all of their underlying assets at fair value, the impact of applying the equity method to Citigroup's investment in these funds was equivalent to fair-value accounting. Thus, this fair-value election had no impact on opening *Retained earnings*. These investments are classified as *Other assets* on Citigroup's Consolidated Balance Sheet.

Changes in the fair values of these investments are classified in *Other revenue* in the Company's Consolidated Statement of Income.

Certain structured liabilities

The Company has elected the fair-value option for certain structured liabilities whose performance is linked to structured interest rates, inflation or currency risks ("structured liabilities"). The Company elected the fair-value option, because these exposures are considered to be trading-related positions and, therefore, are managed on a fair-value basis. These positions will continue to be classified as debt, deposits or derivatives (*Trading account liabilities*) on the Company's Consolidated Balance Sheet according to their legal form.

For those structured liabilities classified as *Long-term debt* for which the fair-value option has been elected, the aggregate fair value exceeds the aggregate unpaid principal balance of such instruments by \$13 million as of June 30, 2009 and the aggregate unpaid principal balance exceeded the aggregate fair value by \$277 million as of December 31, 2008.

The change in fair value for these structured liabilities is reported in *Principal transactions* in the Company's Consolidated Statement of Income.

Related interest expense is measured based on the contractual interest rates and reported as such in the Consolidated Income Statement.

Certain non-structured liabilities

Edgar Filing: CITIGROUP INC - Form 10-Q

The Company has elected the fair-value option for certain non-structured liabilities with fixed and floating interest rates ("non-structured liabilities"). The Company has elected the fair-value option where the interest-rate risk of such liabilities is economically hedged with derivative contracts or the proceeds are used to purchase financial assets that will also be accounted for at fair value through earnings. The election has been made to mitigate accounting mismatches and to achieve operational simplifications. These positions are reported in *Short-term borrowings* and *Long-term debt* on the Company's Consolidated Balance Sheet.

For those non-structured liabilities classified as *Short-term borrowings* for which the fair-value option has been elected, the aggregate unpaid principal balance exceeds the aggregate fair value of such instruments by \$0.4 million as of June 30, 2009 and the aggregate fair value exceeded the aggregate unpaid principal balance by \$5 million as December 31, 2008.

For non-structured liabilities classified as *Long-term debt* for which the fair-value option has been elected, the aggregate fair value exceeded the aggregate unpaid principal balance of such instruments by \$449 million and the aggregate unpaid principal balance exceeded the aggregate fair value by \$97 million as of June 30, 2009 and December 31, 2008, respectively. The change in fair value for these non-structured liabilities is reported in *Principal transactions* in the Company's Consolidated Statement of Income.

Related interest expense continues to be measured based on the contractual interest rates and reported as such in the Consolidated Income Statement.

Table of Contents***Certain mortgage loans***

Citigroup has elected the fair-value option for certain purchased and originated prime fixed-rate and conforming adjustable-rate first mortgage loans held-for-sale. These loans are intended for sale or securitization and are hedged with derivative instruments. The Company has elected the fair-value option to mitigate accounting mismatches in cases where hedge accounting is complex and to achieve operational simplifications. The fair-value option was not elected for loans held-for-investment, as those loans are not hedged with derivative instruments. This election was effective for applicable instruments originated or purchased on or after September 1, 2007.

The following table provides information about certain mortgage loans carried at fair value:

<i>In millions of dollars</i>	June 30, 2009	December 31, 2008
Carrying amount reported on the Consolidated Balance Sheet	\$ 8,115	\$ 4,273
Aggregate fair value in excess of unpaid principal balance	\$ 84	\$ 138
Balance of non-accrual loans or loans more than 90 days past due	\$ 7	\$ 9
Aggregate unpaid principal balance in excess of fair value for non-accrual loans or loans more than 90 days past due	\$ 4	\$ 2

The changes in fair values of these mortgage loans is reported in *Other revenue* in the Company's Consolidated Statement of Income. The changes in fair value during the six months ended June 30, 2009 and June 30, 2008 due to instrument-specific credit risk resulted in a \$10 million loss and \$24 million loss, respectively. Related interest income continues to be measured based on the contractual interest rates and reported as such in the Consolidated Statement of Income.

Items selected for fair-value accounting in accordance with SFAS 155 (ASC 815-15-25) and SFAS 156 (ASC 860-50-35)***Certain hybrid financial instruments***

The Company has elected to apply fair-value accounting under SFAS 155 (ASC 815-15-25) for certain hybrid financial assets and liabilities whose performance is linked to risks other than interest rate, foreign exchange or inflation (e.g., equity, credit or commodity risks). In addition, the Company has elected fair-value accounting under SFAS 155 (ASC 815-15-25) for residual interests retained from securitizing certain financial assets.

The Company has elected fair-value accounting for these instruments because these exposures are considered to be trading-related positions and, therefore, are managed on a fair-value basis. In addition, the accounting for these instruments is simplified under a fair-value approach as it eliminates the complicated operational requirements of bifurcating the embedded derivatives from the host contracts and accounting for each separately. The hybrid financial instruments are classified as *Trading account assets, Loans, Deposits, Trading account liabilities* (for prepaid derivatives), *Short-term borrowings* or *Long-Term Debt* on the Company's Consolidated Balance Sheet according to their legal form, while residual interests in certain securitizations are classified as *Trading account assets*.

For hybrid financial instruments for which fair-value accounting has been elected under SFAS 155 (ASC 815-15-25) and that are classified as *Long-term debt*, the aggregate unpaid principal exceeds the aggregate fair value by \$395 million and \$1.9 billion as of June 30, 2009 and December 31, 2008, respectively. The difference for those instruments classified as *Loans* is immaterial.

Changes in fair value for hybrid financial instruments, which in most cases includes a component for accrued interest, are recorded in *Principal transactions* in the Company's Consolidated Statement of Income. Interest accruals for certain hybrid instruments classified as trading assets are recorded separately from the change in fair value as *Interest revenue* in the Company's Consolidated Statement of Income.

Table of Contents

Mortgage servicing rights

The Company accounts for mortgage servicing rights (MSRs) at fair value in accordance with SFAS 156 (ASC 860-50-35). Fair value for MSRs is determined using an option-adjusted spread valuation approach. This approach consists of projecting servicing cash flows under multiple interest-rate scenarios and discounting these cash flows using risk-adjusted rates. The model assumptions used in the valuation of MSRs include mortgage prepayment speeds and discount rates. The fair value of MSRs is primarily affected by changes in prepayments that result from shifts in mortgage interest rates. In managing this risk, the Company hedges a significant portion of the values of its MSRs through the use of interest-rate derivative contracts, forward-purchase commitments of mortgage-backed securities, and purchased securities classified as trading. See Note 15 to the Consolidated Financial Statements for further discussions regarding the accounting and reporting of MSRs.

These MSRs, which totaled \$6.8 billion and \$5.7 billion as of June 30, 2009 and December 31, 2008, respectively, are classified as Mortgage servicing rights on Citigroup's Consolidated Balance Sheet. Changes in fair value of MSRs are recorded in *Commissions and fees* in the Company's Consolidated Statement of Income.

Table of Contents**19. FAIR VALUE OF FINANCIAL INSTRUMENTS (SFAS 107/ASC 825-10-50)****Estimated Fair Value of Financial Instruments**

The table below presents the carrying value and fair value of Citigroup's financial instruments. The disclosure excludes leases, affiliate investments, pension and benefit obligations and insurance policy claim reserves. In addition, contract-holder fund amounts exclude certain insurance contracts. Also as required, the disclosure excludes the effect of taxes, any premium or discount that could result from offering for sale at one time the entire holdings of a particular instrument, excess fair value associated with deposits with no fixed maturity and other expenses that would be incurred in a market transaction. In addition, the table excludes the values of non-financial assets and liabilities, as well as a wide range of franchise, relationship and intangible values (but includes mortgage servicing rights), which are integral to a full assessment of Citigroup's financial position and the value of its net assets.

The fair value represents management's best estimates based on a range of methodologies and assumptions. The carrying value of short-term financial instruments not accounted for at fair value under SFAS 155(ASC 815-15-25) or SFAS 159(ASC 825-10), as well as receivables and payables arising in the ordinary course of business, approximates fair value because of the relatively short period of time between their origination and expected realization. Quoted market prices are used when available for investments and for both trading and end-user derivatives, as well as for liabilities, such as long-term debt, with quoted prices. For performing loans not accounted for at fair value under SFAS 155(ASC 815-15-25) or SFAS 159(ASC 825-10), contractual cash flows are discounted at quoted secondary market rates or estimated market rates if available. Otherwise, sales of comparable loan portfolios or current market origination rates for loans with similar terms and risk characteristics are used. For loans with doubt as to collectibility, expected cash flows are discounted using an appropriate rate considering the time of collection and the premium for the uncertainty of the flows. The value of collateral is also considered. For liabilities such as long-term debt not accounted for at fair value under SFAS 155(ASC 815-15-25) or SFAS 159(ASC 825-10) and without quoted market prices, market borrowing rates of interest are used to discount contractual cash flows.

<i>In billions of dollars</i>	June 30, 2009		December 31, 2008	
	Carrying value	Estimated fair value	Carrying value	Estimated fair value
Assets				
Investments	\$ 266.8	\$ 261.6	\$ 256.0	\$ 251.9
Federal funds sold and securities borrowed or purchased under agreements to resell	179.5	179.5	184.1	184.1
Trading account assets	325.0	325.0	377.6	377.6
Loans(1)	602.6	601.3	660.9	642.7
Other financial assets(2)	314.4	314.4	316.6	316.6

<i>In billions of dollars</i>	June 30, 2009		December 31, 2008	
	Carrying value	Estimated fair value	Carrying value	Estimated fair value
Liabilities				
Deposits	\$ 804.7	\$ 803.5	\$ 774.2	\$ 772.9
Federal funds purchased and securities loaned or sold under agreements to repurchase	172.0	172.0	205.3	205.3
Trading account liabilities	119.3	119.3	167.5	167.5
Long-term debt	348.0	315.5	359.6	317.1
Other financial liabilities(3)	203.7	203.7	253.9	253.9

(1)

The carrying value of loans is net of the *Allowance for loan losses* of \$35.9 billion for June 30, 2009 and \$29.6 billion for December 31, 2008. In addition, the carrying values exclude \$3.2 billion and \$3.7 billion of lease finance receivables at June 30, 2009 and December 31, 2008, respectively.

(2)

Edgar Filing: CITIGROUP INC - Form 10-Q

Includes cash and due from banks, deposits with banks, brokerage receivables, reinsurance recoverable, mortgage servicing rights, and other financial instruments included in *Other assets* on the Consolidated Balance Sheet, for all of which the carrying value is a reasonable estimate of fair value.

(3)

Includes brokerage payables, short-term borrowings and other financial instruments included in *Other Liabilities* on the Consolidated Balance Sheet, for all of which the carrying value is a reasonable estimate of fair value.

Fair values vary from period to period based on changes in a wide range of factors, including interest rates, credit quality, and market perceptions of value and as existing assets and liabilities run off and new transactions are entered into.

The estimated fair values of loans reflect changes in credit status since the loans were made, changes in interest rates in the case of fixed-rate loans, and premium values at origination of certain loans. The carrying values (reduced by the *Allowance for loan losses*) exceeded the estimated fair values of Citigroup's loans, in aggregate, by \$1.3 billion and \$18.2 billion at June 30, 2009 and December 31, 2008, respectively. At June 30, 2009, the carrying values net of the allowance exceeded estimated fair value for consumer loans by \$2.1 billion, and the estimated fair values exceeded the carrying values net of allowances by \$0.8 billion for corporate loans.

Citigroup has determined that it is not practicable to estimate the fair value on an ongoing basis of the loss sharing program with the United States Government because the program is a unique contract tailored to fit the specific portfolio of assets held by Citigroup, contains various public policy and other non-financial elements, and provides a significant Tier 1 Capital benefit.

Table of Contents**20. GUARANTEES**

The Company provides a variety of guarantees and indemnifications to Citigroup customers to enhance their credit standing and enable them to complete a wide variety of business transactions. FASB Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others" (FIN 45/ASC 460-10), provides initial measurement and disclosure guidance in accounting for guarantees. FIN 45(ASC 460-10) requires that, for certain contracts meeting the definition of a guarantee, the guarantor must recognize, at inception, a liability for the fair value of the obligation undertaken in issuing the guarantee.

In addition, the guarantor must disclose the maximum potential amount of future payments the guarantor could be required to make under the guarantee, if there were a total default by the guaranteed parties. The determination of the maximum potential future payments is based on the notional amount of the guarantees without consideration of possible recoveries under recourse provisions or from collateral held or pledged. Such amounts bear no relationship to the anticipated losses, if any, on these guarantees.

The following tables present information about the Company's guarantees at June 30, 2009 and December 31, 2008:

<i>In billions of dollars at June 30, except carrying value in millions</i>	Maximum potential amount of future payments			Carrying value <i>(in millions)</i>
	Expire within 1 year	Expire after 1 year	Total amount outstanding	
2009				
Financial standby letters of credit	\$ 52.2	\$ 50.6	\$ 102.8	\$ 297.9
Performance guarantees	9.7	5.6	15.3	31.2
Derivative instruments considered to be guarantees	9.1	3.1	12.2	1,393.4
Loans sold with recourse		0.3	0.3	55.2
Securities lending indemnifications(1)	55.3		55.3	
Credit card merchant processing(1)	54.2		54.2	
Custody indemnifications and other		25.2
