No.)

Edgar Filing: CENTRAL PACIFIC FINANCIAL CORP - Form 10-K/A

220 South King Street, Honolulu, Hawaii
(Address of principal executive offices)

96813
(Zip Code)

Registrant's telephone number, including area code:
(808) 544-0500

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, No Par Value	New York Stock Exchange
Preferred Share Purchase Rights	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 or Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of the Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is an accelerated filer (as defined in Exchange Act Rule 12b-2). Yes No

As of June 30, 2002, the aggregate market value of the common stock held by non-affiliates of the registrant was approximately \$309,344,000.

As of February 28, 2003, the number of shares of common stock of the registrant outstanding was 16,006,748 shares.

The following documents are incorporated by reference herein:

Document Incorporated	Part of Form 10-K Into Which Incorporated
Definitive Proxy Statement for the Annual Meeting of Shareholders which was filed within 120 days of the fiscal year ended December 31, 2002	Part III

EXPLANATORY NOTE

This Amendment No. 1 to the Annual Report on Form 10-K for Central Pacific Financial Corp., formerly CPB Inc., (the Company) for the fiscal year ended December 31, 2002 as filed with the Securities and Exchange Commission on March 14, 2003 is being filed to amend the text of the Company's 10-K as follows:

to include additional disclosure related to the market area and recent trends under the caption Market Area and Competition in the Business section;

to include additional disclosure related to the risks related to loans under the caption Loan Portfolio in the Management's Discussion and Analysis section;

to explain the increase in commercial loans over year-end 2001 under the caption Loan Portfolio - Commercial, Financial and Agricultural in the Management's Discussion and Analysis section;

to include additional disclosure regarding risks related to loan losses and the related loan loss allowances under the caption Provision and Allowance for Loan Losses in the Management's Discussion and Analysis section and under Notes 1 and 5 to the Consolidated Financial Statements under the captions Allowance for Loan Losses ;

to correct the amounts reported for changes in the allowance for loan losses for impaired loans for 2002 under Note 5 to the Consolidated Financial Statements under the caption Allowance for Loan Losses ;

to include additional disclosure related to the consolidation practices under Note 1 to the Consolidated Financial Statements under the caption Principles of Consolidation ;

to include additional disclosure related to the FHLB advance under Note 9 to the Consolidated Financial Statements;

to include additional disclosure related to the segment information and the All others columns under Note 24 to the Consolidated Financial Statements; and

to include the city and state where the auditors report was issued in the Independent Auditors Report .

In addition, in connection with the filing of this Amendment and pursuant to the rules of the Securities and Exchange Commission, the Company is including with this Amendment certain currently dated certifications. The exhibit list to this Amendment is amended to reflect the previously filed exhibits to the Company's 10-K and, therefore, unless otherwise indicated those exhibits are not re-filed herewith. The remaining disclosures contained within this Amendment consist of all other disclosures originally contained in the Company's Annual Report on Form 10-K for the year ended December 31, 2002 in the form filed with the Securities and Exchange Commission on March 14, 2003. These other disclosures as originally included in the Company's 10-K are not amended hereby, but are included for the convenience of the reader. In order to preserve the nature and character of the disclosures set forth in such disclosures as originally filed, except as expressly noted herein, this report contains disclosures as of the date of the original filing, and the Company has not updated the disclosures in this report to reflect events subsequent to the original filing date, March 14, 2003. While this report primarily relates to the historical periods covered, events may have taken place since the original filing that might have been reflected in this report if they had taken place prior to the original filing date. All information contained in this Amendment may be updated or supplemented by disclosures contained in the Company's reports filed with the Securities and Exchange Commission subsequent to the date of the original filing of the Annual Report on Form 10-K, including but not limited to the Company's Quarterly Report on Form 10-Q for the three months ended March 31, 2003.

PART I

Forward-Looking Statements

This document may contain forward-looking statements concerning projections of revenues, income, earnings per share, capital expenditures, dividends, capital structure, or other financial items, concerning plans and objectives of management for future operations, concerning future economic performance, or concerning any of the assumptions underlying or relating to any of the foregoing. Forward-looking statements can be identified by the fact that they do not relate strictly to historical or current facts, and generally include the words "believes", "plans", "intends", "expects", "anticipates" or words of similar meaning. While we believe that our forward-looking statements and the assumptions underlying them are reasonably based, such statements and assumptions are by their nature subject to risks and uncertainties, and thus could later prove to be inaccurate or incorrect. Accordingly, actual results could materially differ from projections for a variety of reasons, to include, but not be limited to: the impact of local, national and international economies and events on CPB Inc. (the "Company") business and operations and on tourism, the military, and other major industries operating within the Hawaii market; the impact of legislation affecting the banking industry; the impact of competitive products, services, pricing, and other competitive forces; movements in interest rates; loan delinquency rates; and trading of the Company's stock. For further information on factors that could cause actual results to materially differ from projections, please see the Company's publicly available Securities and Exchange Commission filings. Be advised the Company does not update any of its forward-looking statements.

ITEM 1. BUSINESS

General

Edgar Filing: CENTRAL PACIFIC FINANCIAL CORP - Form 10-K/A

The Company, a Hawaii corporation, is a bank holding company registered under the Bank Holding Company Act of 1956, as amended (the Bank Holding Company Act). Pursuant to a Plan of Reorganization and Agreement of Merger, the Company was organized on February 1, 1982 to serve as a holding company for its subsidiary, Central Pacific Bank (the Bank). The Bank was incorporated in its present form in the State of Hawaii on March 16, 1982 in connection with the holding company reorganization for the Company, and its predecessor entity was incorporated in the State of Hawaii on January 15, 1954. The Bank's deposits are insured by the Federal Deposit Insurance Corporation (FDIC) up to applicable limits. The Bank is not a member of the Federal Reserve System.

The Bank owns 100% of the outstanding stock of Central Business Club of Honolulu, Inc., whose principal business is the operation of a private food service facility.

The Bank also owns 99.8% and the Company owns 0.2% of the outstanding common stock of CPB Real Estate, Inc. (CPBREI), a real estate investment trust, which acquires, holds and manages stable, long-term real estate related assets including residential mortgage loans, commercial real estate loans and mortgage-backed securities. CPBREI, incorporated in March 1998, was established to provide the Company with an alternate means of raising capital and to

enhance federal and state tax strategies. The impact of the tax strategies is discussed in note 17 to the Company's consolidated financial statements. In November 1998, CPBREI issued 1,000 shares of Class A preferred stock to the Bank and certain employees of the Bank. In September 2000, CPBREI issued 100 shares of Class B preferred stock to the Bank and 92 shares of Class C preferred stock to the Bank. In August 2001, the Bank sold 100 shares of Class B preferred stock of CPBREI to third party investors. At December 31, 2002, the Bank held 873 shares of CPBREI Class A preferred stock and 92 shares of CPBREI Class C preferred stock, and employees or former employees held 127 shares of CPBREI Class A preferred stock.

The Company's internet site can be found at www.cpbj.com. The Company's annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports can be found on the Company's internet site as soon as reasonably practicable after such material is electronically filed with or furnished to the Securities and Exchange Commission.

The principal office of the Company is located at 220 South King Street, Honolulu, Hawaii 96813, and its telephone number is (808) 544-0500.

Banking Services

Edgar Filing: CENTRAL PACIFIC FINANCIAL CORP - Form 10-K/A

The Bank is a full-service commercial bank that has 24 banking offices and 77 ATMs located throughout the State of Hawaii as of December 31, 2002. The Bank's administrative and main offices are located in Honolulu, and there are eighteen other branches on the island of Oahu. In addition, the Bank operates two branches on the island of Maui, one branch on the island of Kauai and two branches on the island of Hawaii.

Through its network of banking offices, the Bank emphasizes personalized services and offers a full range of banking services and products to small- and medium-sized businesses, professionals and individuals in Hawaii.

Market Area and Competition

Edgar Filing: CENTRAL PACIFIC FINANCIAL CORP - Form 10-K/A

The Bank competes in the financial services industry. The Hawaii market consists of five commercial banks, three savings and loans, one finance company and numerous credit unions.

Bancwest Corporation had \$34.7 billion in assets at year-end 2002. First Hawaiian Bank, the Hawaii-based subsidiary bank, has approximately 24% of the deposits in the State of Hawaii.

Bank of Hawaii Corporation had \$9.5 billion in total assets at year-end 2002. Bank of Hawaii, its largest subsidiary, maintains approximately 24% of the deposits in the State of Hawaii.

American Savings Bank, a subsidiary of Hawaiian Electric Industries, held \$6.2 billion in assets at year-end 2002. American Savings Bank has approximately 16% of the deposits in the State of Hawaii.

Based on total consolidated assets at December 31, 2002, the Company is the third largest bank holding company in the State of Hawaii and the Bank is the third largest commercial bank

in the state maintaining approximately 7% of the deposit market share. With \$2.0 billion in assets, the Bank is establishing its position in the market as a local community bank that is large enough to provide a wide range of banking services, yet small enough to deliver personalized service. In order to compete with the other financial services providers in the State of Hawaii, the Bank principally relies upon local promotional activities, personal relationships established by officers, directors and employees with its customers, and specialized services tailored to meet the needs of the communities served. The Bank remains competitive with pricing and superior service levels. The Bank also has a strong capital base that can support expansion opportunities that may better serve the community.

The banking and financial services industry in the State of Hawaii generally, and in the Bank's target market areas, is highly competitive. The increasingly competitive environment is a result primarily of changes in regulation and changes in technology and product delivery systems. The Bank competes for loans, deposits and customers with other commercial banks, savings and loan associations, securities and brokerage companies, mortgage companies, insurance companies, finance companies, money market funds, credit unions and other nonbank financial service providers. Many of these competitors are much larger in total assets and capitalization, have greater access to capital markets and offer a broader range of financial services than the Bank. In addition, recent federal legislation may have the effect of further increasing the pace of consolidation within the financial services industry. See **ITEM 1. BUSINESS - Supervision and Regulation - Financial Services Modernization Legislation.**

At year-end 2002, personal income levels in Hawaii rose 2.8% above year-end 2001, similar to the growth rate for the entire United States for the comparable period. Also, Hawaii's population grew by 1.5% from a year ago, compared to an U.S. Census Bureau estimated 1.1% growth rate for the entire United States. The state's unemployment rate in December 2002 was 3.6%, an improvement over the 5.0% reported a year ago. The national unemployment rate was 5.7% at December 2002, compared to 5.4% at December 2001. The top five industries in the state, representing approximately 72% of total jobs, include: government, food service and accommodation, retail, healthcare, and professional services. The state's housing market, supported by low mortgage interest rates, continues to show strong growth. Residential home sales in 2002 were \$2.6 billion, an increase of 31.1% over 2001. The 2002 median sales price for single family homes and condominiums increased by 11.7% and 14.3%, respectively. In 2002, the number of construction jobs grew by 3.9% and the number of building permits increased by 11.8% over the prior year. The state's tourism industry showed slight improvement over 2001. Total visitor arrivals were up 0.9% and total visitor days increased by 2.8%. Japanese visitor arrivals were down 4.3% in 2002, compared the 15.9% decrease reported in 2001.

Economic Conditions, Government Policies, Legislation, and Regulation

The Company's profitability, like most financial institutions, is primarily dependent on interest rate differentials. In general, the difference between the interest rates paid by the Bank on interest-bearing liabilities, such as deposits and other borrowings, and the interest rates received by the Bank on its interest-earning assets, such as loans extended to its clients and securities held in its investment portfolio, comprise the major portion of the Company's earnings. These rates are highly sensitive to many factors that are beyond the control of the

Company and the Bank, such as inflation, recession and unemployment, and the impact which future changes in domestic and foreign economic conditions might have on the Company and the Bank cannot be predicted.

The business of the Company is also influenced by the monetary and fiscal policies of the federal government and the policies of regulatory agencies, particularly the Board of Governors of the Federal Reserve System (the Federal Reserve Board). The Federal Reserve Board implements national monetary policies (with objectives such as curbing inflation and combating recession) through its open-market operations in U.S. Government securities by adjusting the required level of reserves for depository institutions subject to its reserve requirements, and by varying the target federal funds and discount rates applicable to borrowings by depository institutions. The actions of the Federal Reserve Board in these areas influence the growth of bank loans, investments, and deposits and also affect interest rates earned on interest-earning assets and paid on interest-bearing liabilities. The nature and impact on the Company and the Bank of any future changes in monetary and fiscal policies cannot be predicted.

From time to time, legislation, as well as regulations, are enacted which have the effect of increasing the cost of doing business, limiting or expanding permissible activities, or affecting the competitive balance between banks and other financial services providers. Proposals to change the laws and regulations governing the operations and taxation of banks, bank holding companies, and other financial institutions and financial services providers are frequently made in the U.S. Congress, in the state legislatures, and before various regulatory agencies. This legislation may change banking statutes and the operating environment of the Company and its subsidiaries in substantial and unpredictable ways. If enacted, such legislation could increase or decrease the cost of doing business, limit or expand permissible activities or affect the competitive balance among banks, savings associations, credit unions, and other financial institutions. The Company cannot predict whether any of this potential legislation will be enacted, and if enacted, the effect that it, or any implementing regulations, would have on the financial condition or results of operations of the Company or any of its subsidiaries. See **ITEM 1. BUSINESS - Supervision and Regulation.**

Supervision and Regulation

General

Bank holding companies and banks are extensively regulated under both federal and state law. This regulation is intended primarily for the protection of depositors and the deposit insurance fund and not for the benefit of shareholders of the Company. Set forth below is a summary description of the material laws and regulations which relate to the operations of the Company. The description is qualified in its entirety by reference to the applicable laws and regulations.

The Company

The Company is a registered bank holding company, and subject to regulation under the Bank Holding Company Act. The Company is required to file with the Federal Reserve Board periodic reports and such additional information as the Federal Reserve Board may require

pursuant to the Bank Holding Company Act. The Federal Reserve Board may conduct examinations of the Company and its subsidiaries.

The Federal Reserve Board may require that the Company terminate an activity or terminate control of or liquidate or divest certain subsidiaries, affiliates or investments when the Federal Reserve Board believes the activity or the control of the subsidiary or affiliate constitutes a significant risk to the financial safety, soundness or stability of any of its banking subsidiaries. The Federal Reserve Board also has the authority to regulate provisions of certain bank holding company debt, including the authority to impose interest ceilings and reserve requirements on such debt. Under certain circumstances, the Company must file written notice and obtain approval from the Federal Reserve Board prior to purchasing or redeeming its equity securities.

Further, the Company is required by the Federal Reserve Board to maintain certain levels of capital. See **ITEM 1. BUSINESS Supervision and Regulation - Capital Standards.**

The Company is required to obtain the prior approval of the Federal Reserve Board for the acquisition of more than 5% of the outstanding shares of any class of voting securities or substantially all of the assets of any bank or bank holding company. Prior approval of the Federal Reserve Board is also required for the merger or consolidation of the Company and another bank holding company.

The Company is prohibited by the Bank Holding Company Act, except in certain statutorily prescribed instances, from acquiring direct or indirect ownership or control of more than 5% of the outstanding voting shares of any company that is not a bank or bank holding company and from engaging directly or indirectly in activities other than those of banking, managing or controlling banks, or furnishing services to its subsidiaries. However, the Company, subject to the prior approval of the Federal Reserve Board, may engage in any, or acquire shares of companies engaged in, activities that are deemed by the Federal Reserve Board to be so closely related to banking or managing or controlling banks as to be a proper incident thereto.

Under Federal Reserve Board regulations, a bank holding company is required to serve as a source of financial and managerial strength to its subsidiary banks and may not conduct its operations in an unsafe or unsound manner. In addition, it is the Federal Reserve Board's policy that a bank holding company should stand ready to use available resources to provide adequate capital funds to its subsidiary banks during periods of financial stress or adversity and should maintain the financial flexibility and capital-raising capacity to obtain additional resources for assisting its subsidiary banks. A bank holding company's failure to meet its obligations to serve as a source of strength to its subsidiary banks will generally be considered by the Federal Reserve Board to be an unsafe and unsound banking practice or a violation of the Federal Reserve Board's regulations or both.

The Company is also a financial institution holding company within the meaning of Section 412:1-109 of the Hawaii Revised Statutes. As such, the Company and its subsidiary are subject to examination by, and may be required to file reports with, the Hawaii Commissioner of Financial Institutions (the Commissioner).

The Company's securities are registered with the Securities and Exchange Commission under the Securities Exchange Act of 1934, as amended (the Exchange Act). As such, the Company is subject to the information, proxy solicitation, insider trading, corporate governance, and other requirements and restrictions of the Exchange Act.

The Bank

The Bank, as a Hawaii chartered bank, is subject to primary supervision, periodic examination, and regulation by the Commissioner and the FDIC. The Bank is also subject to certain regulations promulgated by the Federal Reserve Board. If, as a result of an examination of the Bank, the FDIC should determine that the financial condition, capital resources, asset quality, earnings prospects, management, liquidity, or other aspects of the Bank's operations are unsatisfactory or that the Bank or its management is violating or has violated any law or regulation, various remedies are available to the FDIC. Such remedies include the power to enjoin unsafe or unsound practices, to require affirmative action to correct any conditions resulting from any violation or practice, to issue an administrative order that can be judicially enforced, to direct an increase in capital, to restrict the growth of the Bank, to assess civil monetary penalties, to remove officers and directors, and ultimately to terminate the Bank's deposit insurance, which for a Hawaii chartered bank would result in a revocation of the Bank's charter. The Commissioner separately has many of the same remedial powers.

The Sarbanes-Oxley Act of 2002

On July 30, 2002, President Bush signed into law the Sarbanes-Oxley Act of 2002. This new legislation addresses accounting oversight and corporate governance matters, including:

the creation of a five-member oversight board appointed by the Securities & Exchange Commission that will set standards for accountants and have investigative and disciplinary powers;

the prohibition of accounting firms from providing various types of consulting services to public clients and requiring accounting firms to rotate partners among public client assignments every five years;

increased penalties for financial crimes;

expanded disclosure of corporate operations and internal controls and certification of financial statements;

enhanced controls on and reporting of insider trading; and

statutory separations between investment bankers and analysts.

We are currently evaluating what impacts the new legislation and its implementing regulations will have upon our operations, including a likely increase in certain outside professional costs.

USA Patriot Act of 2001

On October 26, 2001, President Bush signed the USA Patriot Act of 2001. The Patriot Act is intended to strengthen the U.S. law enforcement and the intelligence communities' abilities to work cohesively to combat terrorism on a variety of fronts. The potential impact of the Patriot Act on financial institutions of all kinds is significant and wide ranging. The Patriot Act contains sweeping anti-money laundering and financial transparency laws in addition to current requirements and requires various regulations, including:

due diligence requirements for financial institutions that administer, maintain, or manage private bank accounts or correspondent accounts for non-US persons;

standards for verifying customer identification at account opening;

rules to promote cooperation among financial institutions, regulators, and law enforcement entities in identifying parties that may be involved in terrorism or money laundering;

reports by non-financial businesses filed with the Treasury Department's Financial Crimes Enforcement Network for cash transactions exceeding \$10,000; and

the filing of suspicious activities reports by securities brokers and dealers if they believe a customer may be violating U.S. laws and regulations.

On July 23, 2002, the U.S. Treasury proposed regulations requiring institutions to incorporate into their written money laundering plans a board approved customer identification program implementing reasonable procedures for:

verifying the identity of any person seeking to open an account, to the extent reasonable and practicable;

maintaining records of the information used to verify the person's identity; and

determining whether the person appears on any list of known or suspected terrorists or terrorist organizations.

Account is defined as a formal banking or business relationship established to provide ongoing services, dealings, or other financial transactions. The Company is not able to predict the impact of such law on its financial condition or results of operations at this time.

Financial Services Modernization Legislation

General. On November 12, 1999, President Clinton signed into law the Gramm-Leach-Bliley Act of 1999 (the GLBA), also known as the Financial Services Modernization Act of 1999. The general effect of the law is to establish a comprehensive framework to permit affiliations among commercial banks, insurance companies, securities firms, and other financial

service providers by revising and expanding the Bank Holding Company Act framework to permit a holding company system to engage in a full range of financial activities through a new entity known as a financial holding company.

The law also:

broadened the activities that may be conducted by national banks, banking subsidiaries of bank holding companies, and their financial subsidiaries;

provided an enhanced framework for protecting the privacy of consumer information;

adopted a number of provisions related to the capitalization, membership, corporate governance, and other measures designed to modernize the Federal Home Loan Bank system;

modified the laws governing the implementation of the Community Reinvestment Act; and

addressed a variety of other legal and regulatory issues affecting both day-to-day operations and long-term activities of financial institutions.

The Company and the Bank do not believe that the GLBA will have a material adverse effect on operations in the near-term. However, to the extent that it permits banks, securities firms, and insurance companies to affiliate, the financial services industry may experience further consolidation. The GLBA is intended to grant to community banks certain powers as a matter of right that larger institutions have accumulated on an ad hoc basis. Nevertheless, this act may have the result of increasing the amount of competition that the Company and the Bank face from larger institutions and other types of companies offering financial products, many of which may have substantially more financial resources than the Company and the Bank.

Expanded Bank Activities. The GLBA also includes a new section of the Federal Deposit Insurance Act governing subsidiaries of state banks that engage in activities as principal that would only be permissible for a national bank to conduct in a financial subsidiary. It expressly preserves the ability of a state bank to retain all existing subsidiaries. Because the laws of the State of Hawaii do not permit the Bank to engage in all of the activities permissible to national banks, the Bank may be at a competitive disadvantage to national banks located in its market area that may offer such expanded financial products.

Privacy. Under the GLBA, federal banking regulators adopted rules that limit the ability of banks and other financial institutions to disclose non-public information about consumers to nonaffiliated third parties. Pursuant to these rules, effective July 1, 2001, financial institutions must provide:

initial notices to customers about their privacy policies, describing the conditions under which they may disclose nonpublic personal information to nonaffiliated third parties and affiliates;

annual notices of their privacy policies to current customers; and

a reasonable method for customers to opt out of disclosures to nonaffiliated third parties.

These privacy provisions affect how consumer information is transmitted through diversified financial companies and conveyed to outside vendors. Since the GLBA's enactment, a number of states have implemented their own versions of privacy laws. The Company has implemented its privacy policies in accordance with the law.

Dividends and Other Transfers of Funds

Dividends from the Bank constitute the principal source of income to the Company. The Company is a legal entity separate and distinct from the Bank. The Bank is subject to various statutory and regulatory restrictions on its ability to pay dividends to the Company. Under such restrictions, the amount available for payment of dividends to the Company by the Bank totaled \$126.3 million at December 31, 2002. In addition, the Commissioner and the FDIC have the authority to prohibit the Bank from paying dividends, depending upon the Bank's financial condition, if such payment is deemed to constitute an unsafe or unsound practice. Compliance with the capital standards set forth by the FDIC or restrictions that are or may be imposed under the prompt corrective action provisions of federal law could limit the amount of dividends that the Bank or Company may pay. The Commissioner may impose similar limitations on the conduct of Hawaii-chartered banks. See **ITEM 1. BUSINESS Supervision and Regulation Capital Standards** and **ITEM 1. BUSINESS Supervision and Regulation Prompt Corrective Action and Other Enforcement Mechanisms** for further discussion of restrictions on capital distributions.

Transactions with Affiliates

The Bank is subject to certain restrictions imposed by federal law on any extensions of credit to, or the issuance of a guarantee or letter of credit on behalf of, the Company or other affiliates, the purchase of, or investments in, stock or other securities thereof, the taking of such securities as collateral for loans, and the purchase of assets of the Company or other affiliates. Such restrictions prevent the Company and such other affiliates from borrowing from the Bank unless the loans are secured by marketable obligations of designated amounts. Further, such secured loans and investments by the Bank to or in the Company or to or in any other affiliate are limited, individually, to 10.0% of the Bank's capital and surplus (as defined by federal regulations), and such secured loans and investments are limited, in the aggregate, to 20.0% of the Bank's capital and surplus (as defined by federal regulations). The State of Hawaii also imposes certain restrictions with respect to transactions involving the Company and other controlling persons of the Bank. Additional restrictions on transactions with affiliates may be imposed on the Bank under the prompt corrective action provisions of federal law. See **ITEM 1. BUSINESS - Supervision and Regulation - Prompt Corrective Action and Other Enforcement Mechanisms.**

Capital Standards

The federal banking agencies have adopted risk-based minimum capital guidelines intended to provide a measure of capital that reflects the degree of risk associated with a banking organization's operations for both transactions reported on the balance sheet as assets and transactions which are recorded as off balance sheet items. Under these guidelines, nominal dollar amounts of assets and credit equivalent amounts of off balance sheet items are multiplied by one of several risk adjustment percentages, which range from 0% for assets with low credit risk federal banking agencies, to 100% for assets with relatively high credit risk.

The guidelines require a minimum ratio of qualifying total capital to risk-adjusted assets of 8% and a minimum ratio of Tier 1 capital to risk-adjusted assets of 4%. In addition to the risk-based guidelines, federal banking regulators require banking organizations to maintain a minimum amount of Tier 1 capital to total assets, referred to as the leverage ratio. For a banking organization rated in the highest of the five categories used by regulators to rate banking organizations, the minimum leverage ratio of Tier 1 capital to total assets must be 3%. In addition to these uniform risk-based capital guidelines and leverage ratios that apply across the industry, the regulators have the discretion to set individual minimum capital requirements for specific institutions at rates significantly above the minimum guidelines and ratios. The Company's and Bank's capital ratios compared to the minimum regulatory capital requirements as of December 31, 2002 are discussed in note 25 to the Consolidated Financial Statements.

Predatory Lending

The term predatory lending, much like the terms safety and soundness and unfair and deceptive practices, is far-reaching and covers a potentially broad range of behavior. As such, it does not lend itself to a concise or a comprehensive definition. But typically predatory lending involves at least one, and perhaps all three, of the following elements:

making unaffordable loans based on the assets of the borrower rather than on the borrower's ability to repay an obligation (asset-based lending);

inducing a borrower to refinance a loan repeatedly in order to charge high points and fees each time the loan is refinanced (loan flipping); and

engaging in fraud or deception to conceal the true nature of the loan obligation from an unsuspecting or unsophisticated borrower.

On October 1, 2002, the Federal Reserve Board regulations aimed at curbing such lending became effective. The rule significantly widens the pool of high-cost home-secured loans covered by the Home Ownership and Equity Protection Act of 1994, a federal law that requires extra disclosures and consumer protections to borrowers. The following triggers coverage under the act:

interest rates for first lien mortgage loans in excess of 8 percentage points above comparable Treasury securities;

subordinate-lien loans of 10 percentage points above Treasury securities; and

fees such as optional insurance and similar debt protection costs paid in connection with the credit transaction, when combined with points and fees if deemed excessive.

In addition, the regulation bars loan flipping by the same lender or loan servicer within a year. Lenders also will be presumed to have violated the law -- which says loans shouldn't be made to people unable to repay them - unless they document that the borrower has the ability to repay. Lenders that violate the rules face cancellation of loans and penalties equal to the finance charges paid.

The Bank is unable at this time to determine the impact of these rule changes and potential state action in this area on its financial condition or results of operation.

Prompt Corrective Action and Other Enforcement Mechanisms

Federal banking agencies possess broad powers to take corrective and other supervisory action to resolve the problems of insured depository institutions, including but not limited to those institutions that fall below one or more prescribed minimum capital ratios. Each federal banking agency has promulgated regulations defining the following five categories in which an insured depository institution will be placed, based on its capital ratios: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized. At December 31, 2002, the Bank and the Company exceeded the required ratios for classification as well capitalized.

An institution that, based upon its capital levels, is classified as well capitalized, adequately capitalized, or undercapitalized may be treated as though it were in the next lower capital category if the appropriate federal banking agency, after notice and opportunity for hearing, determines that an unsafe or unsound condition or an unsafe or unsound practice warrants such treatment. At each successive lower capital category, an insured depository institution is subject to more restrictions. The federal banking agencies, however, may not treat a significantly undercapitalized institution as critically undercapitalized unless its capital ratio actually warrants such treatment.

In addition to measures taken under the prompt corrective action provisions, commercial banking organizations may be subject to potential enforcement actions by the federal regulators for unsafe or unsound practices in conducting their businesses or for violations of any law, rule, regulation, or any condition imposed in writing by the agency or any written agreement with the agency. Finally, pursuant to an interagency agreement, the FDIC can examine any institution that has a substandard regulatory examination score or is considered undercapitalized without the express permission of the institution's primary regulator.

Safety and Soundness Standards

The federal banking agencies have adopted guidelines designed to assist the federal banking agencies in identifying and addressing potential safety and soundness concerns before capital becomes impaired. The guidelines set forth operational and managerial standards relating

to: (i) internal controls, information systems and internal audit systems, (ii) loan documentation, (iii) credit underwriting, (iv) asset growth, (v) earnings, and (vi) compensation, fees and benefits. In addition, the federal banking agencies have also adopted safety and soundness guidelines with respect to asset quality and earnings standards. These guidelines provide six standards for establishing and maintaining a system to identify problem assets and prevent those assets from deteriorating. Under these standards, an insured depository institution should: (i) conduct periodic asset quality reviews to identify problem assets, (ii) estimate the inherent losses in problem assets and establish reserves that are sufficient to absorb estimated losses, (iii) compare problem asset totals to capital, (iv) take appropriate corrective action to resolve problem assets, (v) consider the size and potential risks of material asset concentrations, and (vi) provide periodic asset quality reports with adequate information for management and the board of directors to assess the level of asset risk. These guidelines also set forth standards for evaluating and monitoring earnings and for ensuring that earnings are sufficient for the maintenance of adequate capital and reserves.

Premiums for Deposit Insurance

Through the Bank Insurance Fund (BIF), the FDIC insures the deposits of the Company's depository institution subsidiary up to prescribed limits for each depositor. The amount of FDIC assessments paid by each BIF member institution is based on its relative risk of default as measured by regulatory capital ratios and other factors. Specifically, the assessment rate is based on the institution's capitalization risk category and supervisory subgroup category. An institution's capitalization risk category is based on the FDIC's determination of whether the institution is well capitalized, adequately capitalized or less than adequately capitalized. An institution's supervisory subgroup category is based on the FDIC's assessment of the financial condition of the institution and the probability that FDIC intervention or other corrective action will be required.

FDIC-insured depository institutions pay an assessment rate equal to the rate assessed on deposits insured by the Savings Association Insurance Fund (SAIF).

The assessment rate currently ranges from zero to 27 cents per \$100 of domestic deposits. The FDIC may increase or decrease the assessment rate schedule on a semi-annual basis. Due to continued growth in deposits and some recent bank failures, the BIF is nearing its minimum ratio of 1.25% of insured deposits as mandated by law. If the ratio drops below 1.25%, it is likely the FDIC will be required to assess premiums on all banks for the first time since 1996. Any increase in assessments or the assessment rate could have a material adverse effect on the Company's earnings, depending on the amount of the increase.

The FDIC is authorized to terminate a depository institution's deposit insurance upon a finding by the FDIC that the institution's financial condition is unsafe or unsound or that the institution has engaged in unsafe or unsound practices or has violated any applicable rule, regulation, order or condition enacted or imposed by the institution's regulatory agency. The termination of deposit insurance for one or more of the Company's subsidiary depository institutions could have a material adverse effect on the Company's earnings, depending on the collective size of the particular institutions involved.

All FDIC-insured depository institutions must pay an annual assessment to provide funds for the payment of interest on bonds issued by the Financing Corporation, a federal corporation chartered under the authority of the Federal Housing Finance Board. The bonds, commonly referred to as FICO bonds, were issued to capitalize the Federal Savings and Loan Insurance Corporation. The FDIC established the FICO assessment rates effective for the fourth quarter of 2002 at approximately \$0.0170 per \$100 of assessable deposits. The FICO assessments are adjusted quarterly to reflect changes in the assessment bases of the FDIC's insurance funds and do not vary depending on a depository institution's capitalization or supervisory evaluations.

Interstate Banking and Branching

The Bank Holding Company Act permits bank holding companies from any state to acquire banks and bank holding companies located in any other state, subject to certain conditions, including certain nationwide- and state-imposed concentration limits. The Bank has the ability, subject to certain State restrictions, to acquire by acquisition or merger branches outside its home state. The establishment of new interstate branches is also possible in those states with laws that expressly permit it. Interstate branches are subject to certain laws of the states in which they are located. Competition may increase further as banks branch across state lines and enter new markets.

Community Reinvestment Act and Fair Lending Developments

The Bank is subject to certain fair lending requirements and reporting obligations involving home mortgage lending operations and Community Reinvestment Act activities. The Community Reinvestment Act generally requires the federal banking agencies to evaluate the record of a financial institution in meeting the credit needs of its local communities, including low- and moderate-income neighborhoods. A bank may be subject to substantial penalties and corrective measures for a violation of certain fair lending laws. The federal banking agencies may take compliance with such laws and Community Reinvestment Act obligations into account when regulating and supervising other activities. Furthermore, financial institutions are subject to annual reporting and public disclosure requirements for certain written agreements that are entered into between insured depository institutions or their affiliates and nongovernmental entities or persons that are made pursuant to, or in connection with, the fulfillment of the Community Reinvestment Act.

A bank's compliance with its Community Reinvestment Act obligations is based on a performance-based evaluation system which bases Community Reinvestment Act ratings on an institution's lending service and investment performance. When a bank holding company applies for approval to acquire a bank or other bank holding company, the Federal Reserve Board will review the assessment of each subsidiary bank of the applicant bank holding company, and such records may be the basis for denying the application. Based on an examination conducted August 23, 2002, the Bank was received asatisfactory rating.

Federal Reserve System

The Federal Reserve Board requires all depository institutions to maintain non-interest bearing reserves at specified levels against their transaction accounts (primarily checking, NOW,

and Super NOW checking accounts) and non-personal time deposits. At December 31, 2002, the Bank was in compliance with these requirements.

Nonbank Subsidiaries

The Bank's nonbank subsidiaries are subject to the laws and regulations of both the federal government and the state in which they conduct business.

Employees

At February 28, 2003, the Company employed 506 persons, 451 on a full-time basis and 55 on a part-time basis. Management of the Company believes that it has favorable employee relations. The Company is not a party to any collective bargaining agreement.

Factors That May Affect Future Financial Results and Operations or the Value of Company's Common Stock.

In addition to the other information contained in this report, the following risks may affect the Company. If any of these risks occurs, business, financial condition or operating results of the Company could be adversely affected.

Changes in market interest rates may adversely affect performance. The Company's earnings are affected by changing interest rates. Changes in interest rates affect the demand for new loans, the credit profile of existing loans, the rates received on loans and securities and rates paid on deposits and borrowings. The relationship between the rates received on loans and securities and the rates paid on deposits and borrowings is known as interest rate spread. Given the Company's current volume and mix of interest-bearing liabilities and interest-earning assets, its interest rate spread could be expected to increase during times of rising interest rates and, conversely, to decline during times of falling interest rates. Although the Company believes its current level of interest rate sensitivity is reasonable, significant fluctuations in interest rates may have an adverse effect on the Company's business, financial condition and results of operations.

Deterioration of economic conditions in Hawaii could adversely affect the Company's loan portfolio and reduce the demand for the Company's services. The Company focuses its business primarily in Hawaii. A deterioration in economic conditions in its market area could have a material adverse impact on the quality of its business. Factors which could impact the Hawaiian economy include: declines in the tourism and airline industries, declines in the U.S. mainland and Japan economies, and consequences from national, international and political events. An economic slowdown in Hawaii could have the following consequences, any of which could reduce the Company's net income:

loan delinquencies may increase;

problem assets and foreclosures may increase;

claims and lawsuits may increase;

demand for the Company's products and services may decline; and

collateral for loans may decline in value below the principal amount owed by the borrower.

If a significant number of borrowers, guarantors and related parties fail to perform as required by the terms of their loans, the Company will sustain losses. A significant source of risk arises from the possibility that losses will be sustained if a significant number of the Company's borrowers, guarantors and related parties fail to perform in accordance with the terms of their loans. The Company has adopted underwriting and credit monitoring procedures and credit policies, including the establishment and review of the allowance for credit losses, that management believes are appropriate to minimize this risk by assessing the likelihood of nonperformance, tracking loan performance and diversifying the Company's credit portfolio. These policies and procedures, however, may not prevent unexpected losses that could materially adversely affect the Company's results of operations.

Loan loss reserves may not cover actual loan losses. If the Company's actual loan losses exceed the amount the Company has reserved for probable losses, it will hurt the Company's business. The Company attempts to limit the risk that borrowers will fail to repay loans by carefully underwriting the loans. Losses nevertheless occur. The Company creates reserves for estimated loan losses in its accounting records. The Company bases these allowances on estimates of the following:

industry standards;

historical experience with loans;

evaluation of current economic conditions;

regular reviews of the quality, mix and size of the overall loan portfolio;

regular reviews of delinquencies; and

the quality of the collateral underlying loans.

An increase in non-performing assets would reduce the Company's income and increase its expenses. If the level of non-performing assets rises in the future, it could adversely affect the Company's operating results. Non-performing assets are mainly loans on which the borrowers are not making their required payments. Non-performing assets also include loans that have been restructured to permit the borrower to have smaller payments and real estate that has been acquired through foreclosure of unpaid loans. To the extent that assets are non-performing, the Company has less cash available for lending and other activities.

If the Company loses key employees, business may suffer. If the Company lost key employees temporarily or permanently, it could hurt business. The Company could be particularly hurt if its key employees went to work for competitors. The Company's future success depends on the continued contributions of existing senior management personnel.

Governmental regulation may impair the Company's operations or restrict its growth. The Company and the Bank are subject to significant governmental supervision and regulation. These regulations are intended primarily for the protection of depositors. Statutes and regulations affecting the Company's business may be changed at any time, and the interpretation of these statutes and regulations by examining authorities may also change. Within the last several years Congress and the President have passed and enacted significant changes to these statutes and regulations. There can be no assurance that such changes to the statutes and

regulations or in their interpretation will not adversely affect the Company's business. In addition to governmental supervision and regulation, the Bank is subject to changes in other federal and state laws, including changes in tax laws, which could materially affect the banking industry. The Company is subject to the rules and regulations of the Federal Reserve Board. If the Company fails to comply with federal and state bank regulations, the regulators may limit the Company's activities or growth, fine or ultimately put the Company out of business. Banking laws and regulations change from time to time. Bank regulations can hinder its ability to compete with financial services companies that are not regulated or are less regulated. Federal and state bank regulatory agencies regulate many aspects of the Company's operations. These areas include:

the capital that must be maintained;

the kinds of activities that can be engaged in;

the kinds and amounts of investments that can be made;

the locations of offices;

how much interest can be paid on demand deposits;

insurance of deposits and the premiums that must be paid for this insurance; and

how much cash must set aside as reserves for deposits.

Competition may adversely affect the Company's performance. The financial services business in the Company's market areas is highly competitive. It is becoming increasingly competitive due to changes in regulation, technological advances, and the accelerating pace of consolidation among financial services providers. The Bank faces competition both in attracting deposits and in making loans. The Bank competes for loans principally through the interest rates and loan fees the Bank charges and the efficiency and quality of services the Bank provides. Increasing levels of competition in the banking and financial services businesses may reduce the Company's market share or cause the prices it charge for its services to fall. The Company's results may differ in future periods depending upon the nature or level of competition.

The Company's stock price may be volatile, which could result in substantial losses for the Company's shareholders. The market price of Common Stock could be subject to wide fluctuations in response to a number of factors, including:

the amount of Common Stock outstanding and its trading volume;

actual or anticipated changes in the Company's future financial performance;

changes in financial estimates of the Company by securities analysts;

competitive developments, including announcements by the Company or competitors of new products or services or significant contracts, acquisitions, strategic partnerships, joint ventures or capital commitments;

the operating and stock performance of competitors;

changes in interest rates; and

additions or departures of key personnel.

ITEM 2. PROPERTIES

Edgar Filing: CENTRAL PACIFIC FINANCIAL CORP - Form 10-K/A

The Bank holds title to the land and building in which the Company's and Bank's headquarters, Kaimuki branch office, Hilo branch office and Kailua-Kona branch office are situated. The bank also holds title to the buildings in which the Moiliili branch office and operations center are situated, and a portion of land on which the Moiliili branch office is situated. The remaining land on which the Moiliili branch and all of the land on which the operations center are situated are leased.

All other Bank properties are occupied under leases, which expire on various dates through 2038, and, in most instances, include options to renew. These leases generally contain renewal options for periods ranging from 5 to 15 years. For the year ended December 31, 2002, net rent expense under these leases aggregated \$3.4 million. For additional information relating to lease rental expense and commitments, see note 15 to the Company's Consolidated Financial Statements.

ITEM 3. LEGAL PROCEEDINGS

The Company is a party to ordinary routine litigation incidental to its business, none of which is considered likely to have a materially adverse effect on the Company.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matters were submitted to the Company's shareholders for a vote during the fourth quarter of 2002.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY AND RELATED SHAREHOLDER MATTERS

The Company's common stock is traded on the New York Stock Exchange under the ticker symbol CPF. As of December 31, 2002, there were 1,970 shareholders of record, excluding individuals and institutions for whom shares were held in the names of nominees and brokerage firms.

The following table sets forth information on the range of high and low sales prices of the Company's common stock and cash dividends declared as of the dates indicated.

Market Prices and Common Stock Dividends Declared

		Stock Price		Cash Dividends Declared
		High	Low	
2002	\$	31.24	\$ 13.82	\$ 0.40

-
- (1) Held-to-maturity securities at amortized cost, available-for-sale securities at fair value.
 - (2) Noninterest-bearing demand, interest-bearing demand and savings deposits, and time deposits under \$100,000.
 - (3) Restated to reflect a two-for-one stock split effected November 8, 2002.
 - (4) Efficiency ratio is derived by dividing other operating expense by net operating revenue (net interest income plus other operating income before securities transactions).
 - (5) Computed on a taxable equivalent basis.
 - (6) Nonperforming assets include nonaccrual loans and other real estate.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CRITICAL ACCOUNTING POLICIES

The Company's accounting policies are fundamental to understanding Management's discussion and analysis of financial condition and results of operations. Some of the Company's accounting policies require judgment regarding valuation of assets and liabilities and/or interpretation of specific accounting guidance, and are considered to be critical accounting policies. The following are the Company's critical accounting policies:

Allowance for Loan Losses - For further information, see Provision and Allowance for Loan Losses section and note 1 to the consolidated financial statements.

OVERVIEW

The Company and its subsidiary, the Bank, posted record earnings in 2002 and reached \$2.0 billion in assets. Improved net interest margin and asset quality contributed to the year's strong earnings. The Company's common stock was listed on the New York Stock Exchange as of December 31, 2002. On December 31, 2002, the Company's common stock price closed at \$27.45, an 87% increase over the closing price a year ago. On November 8, 2002, the Company effected a 2-for-1 split of its common stock in the form of a 100% stock dividend. All share and per-share information has been adjusted to reflect the stock split.

Net income of \$33.3 million in 2002 increased by \$4.6 million or 15.9% over the \$28.7 million earned in 2001, which represented a 47.7% increase over 2000's earnings of \$19.4 million. Diluted earnings per share of \$2.04 in 2002 increased by 19.0% over the \$1.72 per share earned in 2001, which increased by 60.7% over 2000's per-share earnings of \$1.07. Cash dividends declared in 2002 of \$0.40 per share represented an increase of 17.6% over the \$0.34 per share declared in 2001, which increased by 9.7% over the \$0.31 declared in 2000. Return on average assets was 1.74% in 2002, compared to 1.60% in 2001 and 1.16% in 2000. Return on average equity of 20.55% in 2002 increased from 19.34% in 2001 and 13.55% in 2000. The Company's efficiency ratio improved to 53.02% in 2002 from 55.59% in 2001 and 58.43% in 2000.

Total assets of \$2.03 billion at December 31, 2002 increased by 10.4% over the \$1.84 billion at year-end 2001. Deposit inflows exceeded loan growth, resulting in increased investment securities and reduced borrowings. As of year-end 2002, loans of \$1.29 billion increased by \$22.9 million or 1.8% over 2001, and investment securities of \$540.9 million increased by \$149.0 million or 38.0%. Deposits of \$1.64 billion increased by \$190.2 million over the \$1.45 billion at year-end 2001, with noninterest-bearing deposits increasing by 27.9% and interest-bearing deposits increasing by 10.2%. Business checking accounts and the Bank's flagship savings product, the Exceptional Account, provided the deposit growth in 2002. Shareholders' equity of \$173.4 million increased by \$26.4 million or 17.9%.

RESULTS OF OPERATIONS

Net Interest Income

Table 1 sets forth information concerning average interest earning assets and interest-bearing liabilities and the yields and rates thereon. Table 2 presents an analysis of changes in components of net interest income between years. Interest income, which includes loan fees, and resultant yield information presented in the tables and discussed in this section are expressed on a taxable equivalent basis using an assumed income tax rate of 35%.

Time deposits under \$100,000	(1,826)	(4,022)	(5,848)	1,142	(568)	574
Time deposits \$100,000 and over	(1,577)	(7,907)	(9,484)	909	(3,906)	(2,997)
Short-term borrowings	(60)	(376)	(436)	(2,972)	(107)	(3,079)
Long-term debt	(2,249)	(2,643)	(4,892)	4,550	(2,232)	2,318
Total interest-bearing liabilities	(2,075)	(19,863)	(21,938)	3,926	(8,064)	(4,138)
Net interest income	\$ 9,383	\$ 1,476	\$ 10,859	\$ 2,992	\$ 4,308	\$ 7,300

Net interest income of \$90.7 million in 2002 increased by \$10.9 million or 13.6% over the \$79.8 million in 2001, which increased by \$7.3 million or 10.1% over 2000. The historically low market interest rates contributed to a decline in average rates on interest-bearing liabilities, including deposits and long-term debt, which exceeded the decline in average yield on interest earning assets.

Interest income of \$120.1 million in 2002 decreased by \$11.1 million or 8.4% from \$131.2 million in 2001 due to declining interest-earning asset yields consistent with general market conditions. Interest income in 2001 reflected an increase of \$3.2 million or 2.5% over 2000 due primarily to increases in loan and other interest earning asset balances. Average interest earning assets in 2002 increased by \$99.7 million or 5.9%, including a \$85.3 million increase in average investment securities and a \$14.7 million increase in average loans. In 2001 increases in average loans and average interest-bearing deposits in other banks contributed much of the increase in interest earning assets compared to 2000. The yield on total interest earning assets decreased to 6.77% in 2002 from 7.83% in 2001 and 8.10% in 2000 in line with the decline in market interest rates. The yield on loans, the largest component of interest earning assets, declined by 100 basis points in 2002 after declining by 23 basis points in 2001.

Interest expense of \$29.5 million in 2002 decreased by \$21.9 million or 42.7% from 2001, which decreased by \$4.1 million or 7.4% from 2000. While average interest-bearing liabilities increased during the period, the rate of decline in interest rates paid on those liabilities more than compensated for the balance increases, resulting in an overall decrease in interest expense. Average interest-bearing deposits increased by \$108.7 million or 9.1% in 2002, after increasing by \$59.3 million or 5.3% in 2001, while the average rate paid on those deposits decreased by 156 basis points and 48 basis points in 2002 and 2001, respectively. In 2002, average short-term borrowings and long-term debt, collectively, decreased by \$43.1 million or 20.0%, while the average rate on those borrowings decreased by 175 basis points.

The resultant net interest margin of 5.11% in 2002 increased by 35 basis points over the net interest margin of 4.76% in 2001 as funding costs declined at a faster rate than asset yields during the year. Strong competition for loans and deposits in the State of Hawaii, particularly for lower-cost core deposits, as well as global, national and local political and economic conditions, in particular, the velocity of changes in interest rates, will continue to have a direct impact on the Company's net interest margin into the future. Given the current environment, the Company expects to maintain a net interest margin at or above the 5-percent level for the near future.

Loan Portfolio

Total loans increased to \$1,289.9 million at December 31, 2002, compared with \$1,266.9 million at the end of 2001, and \$1,290.1 million at the end of 2000.

The Bank emphasizes residential and commercial mortgage loans, business loans to professionals and middle-market companies and consumer loans. The Bank's marketing strategy for generating new loans includes a business calling program that requires officers at all levels to make client development visits to local businesses each month. In addition, the Bank uses television, radio, print and direct mail marketing.

To manage credit risk (i.e., the inability of borrowers to repay their loan obligations), management analyzes the borrower's financial condition, repayment source, collateral, and other factors which could impact credit quality, such as economic conditions. For commercial loans, the Bank typically looks to the borrower's business as the principal source of repayment, although the Bank's underwriting policy generally requires additional sources of collateral, including real estate. For construction loans, each project is evaluated for economic viability, and maximum loan-to-value ratios of 80% on commercial projects and 85% on residential projects are generally required. For residential mortgage loans, the Bank requires a maximum loan-to-value ratio of 80%, although higher levels are permitted with accompanying mortgage insurance. For commercial mortgage loans, the Bank's policy is that loans shall be made for sound purposes, have a definite source and/or plan of repayment established at inception, backed up by reliable secondary sources of repayment and satisfactory collateral with good marketability. For consumer loans, credit risk is managed on a pooled basis including an evaluation of the quality, character and inherent risks in the loan portfolio, current and projected economic conditions, and past loan loss experience.

At December 31, 2002, the Bank did not have any concentration of loans in any industry classified under the Standard Industrial Code that exceeded 10% of the Bank's total loans.

The Bank did not have any cross border credit exposure as of December 31, 2002.

The following table sets forth information regarding outstanding loans by categories as of the dates indicated.

Table 3 Loans by Categories

(Dollars in thousands)	December 31,				
	2002	2001	2000	1999	1998
Commercial, financial and agricultural	\$ 262,771	\$ 233,629	\$ 233,482	\$ 186,960	\$ 189,796
Real estate Construction	117,879	131,631	72,078	45,386	61,370
Mortgage - residential	312,560	347,237	382,360	370,407	330,983
- commercial	540,111	504,346	558,586	526,801	482,849
Consumer	56,571	50,106	43,639	37,912	34,679
Total Loans	1,289,892	1,266,949	1,290,145	1,167,466	1,099,677
Allowance for loan losses	24,197	24,564	22,612	20,768	20,066
Net Loans	\$ 1,265,695	\$ 1,242,385	\$ 1,267,533	\$ 1,146,698	\$ 1,079,611

Commercial, Financial and Agricultural. Loans in this category consist primarily of loans to small and middle-market businesses and professionals located in Hawaii. Commercial loan volumes increased to \$262.8 million at December 31, 2002, from \$233.6 million at year-end 2001 and \$233.5 million at year-end 2000. As a result of the Company's business calling program, commercial loans increased by \$29.1 million over year-end 2001.

Real Estate - Construction. Real estate - construction loans decreased to \$117.9 million at year-end 2002, from \$131.6 million at the end of 2001 and \$72.1 million in 2000. The decrease from year-end 2001 was primarily attributed to accelerated loan payoffs in 2002 due to the strength of the real estate market in the State of Hawaii. The majority of the construction loans provided by the Bank in this category were used for residential development projects.

Real Estate - Mortgage - Residential. Residential mortgage loans, which were comprised primarily of adjustable rate one-to-four family first mortgages, totaled \$312.6 million at year-end 2002. Residential mortgage loan originations,

particularly fixed rate mortgage originations, increased in 2002 due to a high volume of refinancing activity. Due to the Bank's policy of selling fixed rate residential mortgage loans, residential mortgage loans at December 31, 2002 decreased by \$34.7 million from year-end 2001. The Bank emphasizes making residential mortgage loans for owner-occupied primary residences and does not actively seek to make loans for vacation condominiums or high-end homes. Mortgage loans held for sale at December 31,

2002 totaled \$6.4 million. Home equity lines of credit of \$66.7 million at December 31, 2002, with maximum loan-to-value ratios of 75%, were also included in residential mortgage loans.

Real Estate - Mortgage - Commercial. The major components of the Bank's portfolio of commercial mortgage loans at December 31, 2002 included \$161.9 million for stores and offices, and \$162.0 million for warehouses and industrial buildings.

The following table sets forth certain information with respect to the composition of the Bank's Real Estate - Mortgage loan portfolio as of the dates indicated.

Table 4 Mortgage Loan Portfolio Composition

Automobile loans, comprised primarily of indirect dealer loans, totaled \$23.6 million or 41.7% of the consumer loan portfolio in 2002. This figure includes \$23.2 million in indirect automobile loans.

Revolving credit plans increased to \$23.9 million at December 31, 2002, from \$17.4 million at year-end 2001.

Maturities and Sensitivities of Loans to Changes in Interest Rates

Edgar Filing: CENTRAL PACIFIC FINANCIAL CORP - Form 10-K/A

The following table sets forth the maturity distribution of the Bank's loan portfolio at December 31, 2002. The table excludes real estate loans (other than construction loans) and consumer loans.

Table 6 Maturity Distribution of commercial and Construction Loans

(Dollars in thousands)	One year or less	Maturing Over one through five years	Over five years	Total
Commercial, financial and agricultural	\$ 106,861	\$ 102,034	\$ 53,876	\$ 262,771
Real estate - construction	60,789	50,200	6,890	117,879
Total	\$ 167,650	\$ 152,234	\$ 60,766	\$ 380,650

The following table sets forth the sensitivity of the amounts due after one year to changes in interest rates.

Table 7 Maturity Distribution of Fixed and Variable Rate Loans

(Dollars in thousands)	Over one through five years	Maturing Over five years	Total
With fixed interest rates	\$ 25,358	\$ 16,853	\$ 42,211
With variable interest rates	126,876	43,913	170,789
Total	\$ 152,234	\$ 60,766	\$ 213,000

Investment Portfolio

The following table sets forth the amounts and the distribution of investment securities held as of the dates indicated.

(1) Weighted average yields are computed on an annual basis, and yields on tax-exempt obligations are computed on a taxable-equivalent basis using an assumed tax rate of 35%.

Deposits

Edgar Filing: CENTRAL PACIFIC FINANCIAL CORP - Form 10-K/A

The Bank competes for deposits in Hawaii principally by providing quality customer service at its branch offices. The Bank, over the years, has developed a relatively large and stable base of core deposits which consists of noninterest-bearing demand, interest-bearing demand and savings deposits and time deposits under \$100,000.

Total deposits at December 31, 2002, 2001 and 2000 were \$1,641.1 million, \$1,450.1 million and \$1,363.1 million, respectively. Deposits increased by 13.1% in 2002 compared with a 6.4% growth rate in 2001. This increase was partly attributed to the migration of consumer

funds from the equity markets. Interest-bearing deposits, excluding time deposits of \$100,000 and over, increased by 15.6% in 2002 compared with a 13.2% increase in 2001. Noninterest-bearing deposits increased by 27.9% in 2001 compared with a 19.6% increase in 2000. The Bank's ratio of core deposits to total deposits was 78.0% at December 31, 2002, compared to 74.6% at year-end 2001 and 69.3% at year-end 2000. Time deposits of \$100,000 and over were \$360.6 million at year-end 2002 compared with \$368.8 million at year-end 2001, and \$418.4 million at year-end 2000.

The following table sets forth information regarding the average deposits and the average rates paid for certain deposit categories for each of the years indicated. Average balances are computed using daily average balances.

Table 10 Average Balances and Average Rates on Deposits

(Dollars in thousands)	2002		Year Ended December 31, 2001		2000	
	Average balance	Average rate paid	Average balance	Average rate paid	Average balance	Average rate paid
Noninterest-bearing demand deposits	\$ 237,961	%	\$ 198,725	%	\$ 186,557	%
Interest-bearing demand deposits	138,083	0.39	117,205	1.00	106,922	1.12
Savings and money market deposits	561,848	1.36	397,813	2.09	390,132	2.37
Time deposits	597,882	2.52	674,093	4.51	632,716	5.18
Total	\$ 1,535,774	1.51%	\$ 1,387,836	2.87%	\$ 1,316,327	3.28%

The remaining maturities of the certificates of deposit in denominations of \$100,000 and over are set forth in the following table.

Table 11 Remaining Maturities of Large Certificates of Deposit

(Dollars in thousands)	December 31, 2002	
Three months or less	\$	150,117
Over three through six months		67,147
Over six through twelve months		65,541
Over twelve months		77,825
Total	\$	360,630

Provision and Allowance for Loan Losses

Provision for loan losses (Provision) is determined by Management s ongoing evaluation of the loan portfolio and their assessment of the ability of the allowance for loan losses (Allowance) to cover inherent losses. The Company s methodology for determining the adequacy of the Allowance and the Provision takes into account many factors, including the level and trend of nonperforming and potential problem loans, net charge-off experience, current repayment by borrowers, fair value of collateral securing specific loans and general economic factors in Hawaii. The allowance consists of two components: allocated and unallocated. To calculate the allocated component, the Company combines specific reserves required for individual loans (including impaired loans), reserves required for pooled graded loans and loan concentrations, and reserves required for homogeneous loans (e.g., consumer loans, residential mortgage loans). The Company uses a loan grading system whereby loans are segregated by risk. Certain graded commercial and commercial real estate loans are analyzed on an individual basis. Other graded loans are analyzed on an aggregate basis based upon migration analysis (i.e., movements between loan grades) and risks inherent in loan concentrations in specific industries or categories. The determination of an allocated reserve for homogeneous loans is done at an aggregate level based upon various factors including historical loss experience, delinquencies, and economic conditions. The unallocated component of the allowance incorporates the Company s judgmental determination of the risks inherent in the loan portfolio, economic uncertainties, and imprecision in the estimation model.

The Company s Provision was \$1.0 million in 2002, compared to \$3.0 million in 2001 and \$4.5 million in 2000. Net loan charge-offs of \$0.5 million in 2002 decreased from \$1.0 million in 2001 and \$2.7 million in 2000. When expressed as a percentage of average loans, net charge-offs were 0.04% in 2002, 0.08% in 2001, and 0.22% in 2000. Charge-offs in 2002 totaled \$1.3 million and included \$0.4 million in residential construction loans and \$0.5 million in consumer loans. Recoveries of \$0.8 million in 2002 included \$0.5 million on a commercial mortgage loan and \$0.1 million on a commercial loan. In 2001, charge-offs totaling \$2.5 million included \$1.2 million in commercial mortgage loans to three borrowers. Recoveries of \$600,000 on a multifamily residential mortgage loan and \$262,000 from a commercial mortgage loan borrower accounted for more than one-half of the total recoveries of \$1.5 million.

As indicated in Table 14, nonaccrual loans and loans delinquent for 90 days or more decreased by \$2.2 million from the prior year-end. This improvement in loan quality favorably impacted the allocated component of the Allowance as reflected in Table 13, despite the overall increase of \$64.9 million in commercial loans and commercial mortgage loans outstanding at

year-end 2002. As loan quality improves, the amount of graded loans which require individual analysis decreases. In addition, although residential mortgage loans decreased by \$34.7 million from year-end 2001, the allocated allowance component for this pool of loans increased based upon the analysis of risk factors discussed previously.

The Allowance expressed as a percentage of loans was 1.88% at year-end 2002, compared to the 1.94% maintained at year-end 2001, which increased over the level at December 31, 2000. The consistent level of the Allowance throughout 2002 reflects the continued uncertainty and risks in the current economic environment and the relatively stable level of nonaccrual and delinquent loans during the period.

While the economy of the United States, and similarly the State of Hawaii, appears to have survived the post-September 11 setback and show signs of growth, significant uncertainties as to the future remain. The decline in the U.S. stock market, the likelihood of military conflict in the Middle East and the fear of further terrorist acts create significant questions as to the future strength of the local economy. Such conditions and occurrences, or lack thereof, will likely affect borrowers' ability to repay loans, collateral values, the level of nonperforming loans, net charge-offs, provision for loan losses and net income in the future.

The following table sets forth certain information with respect to the Bank's allowance for loan losses as of the dates or for the periods indicated.

Table 12 Allowance for Loan Losses

(Dollars in thousands)	Year Ended December 31,				
	2002	2001	2000	1999	1998
Average amount of loans outstanding	\$ 1,285,175	\$ 1,270,450	\$ 1,223,648	\$ 1,153,623	\$ 1,071,350

Nonperforming Assets

Table 14 sets forth nonperforming assets, accruing loans delinquent for 90 days or more and restructured loans still accruing interest at the dates indicated.

Total nonperforming assets, accruing loans delinquent for 90 days or more and restructured loans still accruing interest decreased to \$2.5 million at year-end 2002 from \$3.7 million at year-end 2001. Nonaccrual loans of \$0.4 million decreased by \$2.0 million or 81.9% from \$2.4 million in 2001 due to loan payoffs and charge-offs. Other real estate of \$1.9 million at December 31, 2002 increased by \$1.1 million and included one commercial property and one residential condominium unit located on the island of Oahu and one commercial property located on the island of Kauai. Loans delinquent for 90 days or more at year-end 2002 totaled \$0.2 million, decreasing by 57.3% from year-end 2001. There were no restructured loans still accruing interest as of December 31, 2002 or 2001. Aggressive monitoring and collection efforts are credited with the improvement in nonperforming asset and delinquent loan balances. Accounting policies related to nonperforming assets are discussed in note 1 to the consolidated financial statements.

Other Operating Income

Table 15 sets forth components of other operating income and the total as a percentage of average assets.

Table 15 Components of Other Operating Income

(Dollars in thousands)	Year Ended December 31,		
	2002	2001	2000
Income from fiduciary activities	\$ 1,380	\$ 1,225	\$ 1,079
Service charges on deposit accounts	4,301	3,847	3,093
Other service charges and fees	4,814	4,062	4,247
Equity in earnings of unconsolidated subsidiaries		217	571
Fees on foreign exchange	504	420	530
Investment securities gains (losses)	477	1,395	(766)
Gains on sales of loans	469	925	132
Gain on curtailment of pension obligation	1,395		
Gain on sale of merchant portfolio			1,850
Other	1,942	2,022	2,151
Total	\$ 15,282	\$ 14,113	\$ 12,887
Total other operating income as a percentage of average assets	0.80%	0.79%	0.77%

Total other operating income of \$15.3 million in 2002 increased by \$1.2 million or 8.3% over the \$14.1 million earned in 2001, which increased by \$1.2 million or 9.5% over 2000. In 2002, the Company recorded a \$1.4 million gain on curtailment of the defined benefit retirement plan. A discussion of the curtailment is provided in note 13 of the consolidated financial statements. Service charges on deposit accounts of \$4.3 million increased by \$454,000, and other service charges and fees of \$4.8 million increased by \$752,000 in 2002 compared to 2001 due primarily to increased volumes. Investment securities gains of \$477,000 were recognized in 2002 compared with \$1.4 million in 2001, while gains on sales of loans of \$469,000 in 2002 decreased from \$925,000 in 2001.

Total other operating income of \$14.1 million in 2001 increased by \$1.2 million or 9.5% over 2000. An increase of \$754,000 in service charges on deposits, a net increase of \$2.2 million in investment securities gains and a \$793,000 increase in gains on sales of loans combined to offset a \$1.9 million gain on the sale of the Bank's merchant servicing portfolio recorded in 2000. A reduction in merchant servicing expenses was also realized and is discussed in the Other Operating Expense section.

Total other operating income, expressed as a percentage of average assets was 0.80% in 2002, 0.79% in 2001 and 0.77% in 2000.

Other Operating Expense

Table 16 sets forth components of other operating expense and the total as a percentage of average assets.

Table 16 Components of Other Operating Expense

(Dollars in thousands)	Year Ended December 31,		
	2002	2001	2000
Salaries and employee benefits	\$ 29,828	\$ 27,805	\$ 25,071
Net occupancy	3,653	4,880	6,350
Equipment	2,744	2,674	2,708
Other	18,798	15,324	15,463
Total	\$ 55,023	\$ 50,683	\$ 49,592
Total other operating expense as a percentage of average assets	2.87%	2.82%	2.96%

Total other operating expense of \$55.0 million in 2002 increased by \$4.3 million or 8.6% over the \$50.7 million of expense recognized in 2001. Salaries and employee benefits increased by \$2.0 million or 7.3% reflecting increases in defined benefit plan and profit sharing plan expenses as well as increased staffing in financial services sales, private banking and trust and investment management services. Net occupancy expense decreased by \$1.2 million primarily due to the Company's 2001 purchase and subsequent merger of CKSS Associates (CKSS) into the Bank, which owned two commercial office building in which the Company maintained branch and administrative offices. Other expenses increased by \$3.5 million due primarily to a \$1.1 million interest accrual on a state tax assessment under appeal, a \$725,000 increase in professional fees and \$586,000 in amortization expense related to investments in companies providing high-technology state tax credits. The tax credits received resulting from these investments is discussed in the Income Taxes section.

Total other operating expense of \$50.7 million in 2001 increased by \$1.1 million or 2.2% over the \$49.6 million in 2000. Salaries and employee benefits increased by \$2.7 million or 10.9% due to a \$1.2 million expense for an executive retirement plan and increased profit sharing and defined benefit plan expenses. Net occupancy expense decreased by \$1.5 million due to the Company's 2001 purchase and subsequent merger into the Bank of CKSS. Other expense in 2001 included a \$642,000 prepayment penalty incurred on the early payoff of long-term debt. The debt prepayment was part of the Company's strategy to increase the repricing of its liabilities in the declining interest rate environment.

Total other operating expense, expressed as a percentage of average assets, was 2.87% in 2002, 2.82% in 2001 and 2.96% in 2000. In 2002, the Company's efficiency ratio, which measures operating expense as a percentage of total revenue (net interest income and other operating income) improved to 53.02% from 55.59% in 2001. The Company believes its efficiency ratio will continue to improve in the near future and expects to achieve a ratio below

50%, a level that compares favorably with high-performing commercial banks in its peer group based on asset size.

Income Taxes

Income tax expense totaled \$15.0 million in 2002, \$10.2 million in 2001 and \$10.6 million in 2000. The effective tax rate was 31.0% in 2002, 26.2% in 2001 and 35.3% in 2000. In 2002, the Company recorded a \$1.4 million net reduction in taxes attributable to \$2.1 million in high-technology state tax credits. The state's high-technology tax credit program offers tax credits for investments in high-technology companies at diminishing levels over a 5-year period. During 2002, the Company invested \$1.7 million in qualifying entities and received \$6.0 million in state tax credits to be realized through 2006. In 2001, the Company recorded a nonrecurring \$3.8 million federal income tax benefit related to the carryback of tax-basis capital losses against capital gains recognized in prior years. The capital loss was created from the issuance of preferred stock by CPB Real Estate, Inc.

FINANCIAL CONDITION

Table 17 sets forth the distribution of average assets, liabilities and shareholders' equity.

Total liabilities	1,752,897	91.5	1,646,578	91.7	1,529,520	91.4
Shareholders' equity	161,971	8.5	148,435	8.3	143,374	8.6
Total liabilities and shareholders' equity	\$ 1,914,868	100.0%	\$ 1,795,013	100.0%	\$ 1,672,894	100.0%

Average total assets of \$1,914.9 million increased by \$119.9 million or 6.7% in 2002 over 2001, which increased by \$122.1 million or 7.3% over 2000. In 2002, funds generated from strong deposit growth were used to reduce long-term debt and purchase investment securities. In 2001, a combination of deposit growth and long-term debt were used to fund loan growth.

Edgar Filing: CENTRAL PACIFIC FINANCIAL CORP - Form 10-K/A

Average loans of \$1,285.2 million in 2002 increased by \$14.7 million or 1.2% over the \$1,270.5 million in 2001, which increased by \$46.8 million or 3.8% over 2000. The percentage of loans to total assets has decreased to 67.1% in 2002 from 70.8% in 2001 and 73.1% in 2000. Loan growth has been challenging in this market, which has experienced some contraction, resulting in a heightened level of competitiveness for a smaller number of lending opportunities. Increasing market share, as the Company has consistently experienced over the past number of years, has become more difficult. A reorganization of the Company's financial services sales force and a new sales process was implemented in 2002 with the goal of increasing loans by 8-10% annually in the future, market circumstances and risk tolerance permitting.

Average interest-bearing deposits in other banks of \$31.0 million were virtually unchanged from 2001 after increasing by \$24.8 million over 2000. Average investment securities of \$450.2 million increased by \$85.3 million or 23.4% in 2002 over 2001, which increased by \$13.1 million or 3.7% over 2000. Average premises and equipment of \$59.3 million in 2002 increased by \$30.0 million due to the Company's 2001 purchase and subsequent merger of CKSS Associates, which owned two commercial office buildings in which the Company maintained branch and administrative offices. The CKSS Associates transaction also resulted in the temporary increase in other assets, which increased by \$26.4 million in 2001 and a \$16.4 million reduction in 2002.

Funding for this asset growth came primarily from increases in deposits in 2002 and borrowings in 2001. Average deposits of \$1,535.8 million increased by \$147.9 million or 10.7% in 2002 over 2001, which increased by \$71.5 million or 5.4% over 2000. As a percentage of total assets, deposits increased to 80.2% in 2002 from 77.3% in 2001, which fell from 78.7% in 2000. The successful launch in 2001 of the Bank's flagship deposit product, the Exceptional Account, coupled with a general flight to safety by investors, resulted in the strong deposit growth experienced in 2002. This ended a period of lackluster deposit growth in 2000 and early 2001, when borrowings from the Federal Home Loan Bank of Seattle provided a supplemental source of funding. With the higher deposit growth, borrowings have been reduced. Average long-term debt as a percent of total assets dropped to 8.5% in 2002 from 11.4% in 2001, which increased from 8.0% in 2000. Consistent with its goals for loan growth, the Company is targeting deposit growth in the 8-10% range for the near future.

Average shareholders' equity of \$162.0 million increased by \$13.5 million or 9.1% over the \$148.4 million in 2001, which was relatively unchanged from the prior year. As a percentage of total assets, average shareholders' equity was 8.5% in 2002, 8.3% in 2001 and 8.6% in 2000.

Asset/Liability Management

The Company's earnings and capital are subject to risk of interest rate fluctuations to the extent the rate-sensitive assets and rate-sensitive liabilities mature or reprice during different periods or in differing amounts. Asset/liability management attempts to coordinate the Company's rate sensitive assets and rate-sensitive liabilities to meet its financial objectives.

The Company's asset/liability management policy seeks to maximize the risk-adjusted return to shareholders while maintaining consistently acceptable levels of liquidity, interest rate risk and capitalization. The Company's asset/liability management committee monitors its interest rate risk through the use of income simulation and rate shock analyses. This process is designed to measure the impact of future changes in interest rates on net interest margin and market value of portfolio equity. Adverse exposures are managed through the shortening or lengthening of the duration of the Company's assets and liabilities.

Table 18 sets forth information regarding interest rate sensitivity of the Company's assets, liabilities and shareholders' equity at December 31, 2002. The assumptions used in determining interest rate sensitivity of various asset and liability products had a significant

impact on the resulting table. For purposes of this presentation, assets and liabilities are classified by the earliest repricing date or maturity. All interest-bearing demand and savings balances are included in the three-months-or-less category, even though repricing of these accounts is not contractually required and many not actually occur during that period.

Table 18 Rate Sensitivity of Assets, Liabilities and Shareholders Equity

(Dollars in thousands)	Three Months or Less	Over Three Through Six Months	Over Six Through Twelve Months	Over One Through Three Years	Over Three Years	Nonrate Sensitive	Total
Assets							
Interest-bearing deposits in other banks	\$ 39,358	\$	\$	\$	\$	\$	\$ 39,358
Federal funds sold							
Investment securities	70,314	33,990	68,199	185,281	171,476	11,664	540,924
Loans held for sale					6,420		6,420
Loans	474,661	90,489	159,580	378,259	186,464	439	1,289,892
Other assets						151,569	151,569
Total assets	584,333	124,479	227,779	563,540	364,360	163,672	2,028,163
Liabilities and Shareholders Equity							
Noninterest-bearing deposits						305,351	305,351
Interest-bearing deposits	939,315	145,944	111,680	81,706	57,105		1,335,750
Short-term borrowings	28,008		1,000				29,008
Long-term debt	75,499	3,877	738	26,317	40,724		147,155
Other liabilities						37,456	37,456
Shareholders equity						173,443	173,443
Total liabilities and shareholders equity	1,042,822	149,821	113,418	108,023	97,829	516,250	2,028,163
Interest rate sensitivity gap	\$ (458,489)	\$ (25,342)	\$ 114,361	\$ 455,517	\$ 266,531	\$ (352,578)	\$
Cumulative interest rate sensitivity gap	\$ (458,489)	\$ (483,831)	\$ (369,470)	\$ 86,047	\$ 352,578	\$	\$

As shown in Table 18, the amount of liabilities being repriced or maturing exceeds the asset amount in the three-months-or-less category and the over-three-through-six-months category. In the remaining time periods, the amount of assets repricing or maturing exceeds the liabilities.

Generally, where rate-sensitive liabilities exceed rate-sensitive assets in the short-term, net interest margin is expected to be negatively impacted when interest rates increase and positively impacted when interest rates decline.

Capital Resources

The Company's objective is to maintain a level of capital that will support sustained asset growth and anticipated credit risks and to ensure that regulatory guidelines and industry standards are met.

Regulations on capital adequacy guidelines adopted by the Board of Governors of the Federal Reserve System (Federal Reserve Board) and the Federal Deposit Insurance

Corporation (FDIC) are as follows. The capital standards require a minimum Tier I risk-based capital ratio of 4% and total risk-based capital ratio of 8%. The Federal Reserve Board and the FDIC have also adopted a 3% minimum leverage ratio which is Tier I capital as a percentage of total assets. Higher-risk banks as measured by the Federal regulatory rating system are expected to maintain capital above the minimum leverage ratio requirement. In addition, FDIC-insured institutions such as the Bank must maintain leverage capital ratio and Tier I and total risk-based capital ratios of at least 5%, 6% and 10%, respectively, to be considered well capitalized under the prompt corrective action provisions of the FDIC Improvement Act of 1991. The Company's and Bank's capital ratios as of December 31, 2002 and 2001 are discussed in note 25 to the consolidated financial statements.

On December 31, 2002, the Company's common stock was listed on the New York Stock Exchange (the NYSE) under the ticker symbol CPF . The change in trading to the NYSE from the Nasdaq National Market was intended to increase the liquidity and visibility of the Company's stock. On November 8, 2002, the Company effected a 2-for-1 split of its common stock in the form of a 100% stock dividend.

In 2002, the Company's board of directors authorized the repurchase and retirement of the Company's common stock up to \$10 million. This seventh stock repurchase program brings total stock repurchases authorized since inception of the program in 1998 to \$77.0 million. During 2002, 142,400 shares were repurchased for a total consideration of \$2.6 million at an average price of \$18.22 per share. Since 1998, the Company has repurchased 5,748,814 shares, approximately 27% of the 21.2 million shares outstanding as of the commencement of the stock repurchase program. Total consideration paid on these repurchases was \$67.3 million at an average price of \$11.71 per share. As of December 31, 2002, the remaining amount of repurchases authorized was \$9.7 million. Management expects to continue repurchasing common stock to enhance shareholder value while supporting the Company's future asset growth and maintaining regulatory capital ratios at the well-capitalized level.

Liquidity

The Company's objective in managing its liquidity is to maintain a balance between sources and uses of funds in order to economically meet the cash requirements of customers for loans and deposit withdrawals and participate in investment opportunities as they arise. Management monitors the Company's liquidity position in relation to trends of loan demand and deposit growth on a daily basis to assure maximum utilization, maintenance of an adequate level of readily marketable assets, and access to short-term funding sources. During 2002, the Company's liquidity position improved as strong deposit inflows exceeded loan demand. Consequently, long-term debt was reduced, and investment in marketable investment securities increased.

The consolidated statements of cash flows identify three major categories of sources and uses of cash as operating, investing and financing activities. Cash generated from operations represents a major source of liquidity. As presented in the consolidated statements of cash flows, the Company's operating activities provided \$23.5 million in cash during the year ended December 31, 2002, compared to \$30.8 million in 2001 and \$36.5 million in 2000.

Investing activities represent a use of cash. Net cash used in investing activities totaled \$171.3 million in 2002, \$31.0 million in 2001 and \$199.6 million in 2000. The large decline in cash used in 2001 is attributable to the decline in lending activity as principal repayments exceeded loan originations. In contrast, loan originations exceeded principal repayments by \$26.9 million in 2002 and \$128.9 million in 2000. Investing activities in 2001 also included \$31.0 million in cash used to purchase a 50% interest in CKSS Associates, a Hawaii limited partnership which owned commercial office buildings including the Company's headquarters. Investment securities purchases and maturities generally comprise the balance of investing activities; however, due to the decline in lending activity, investment securities purchases have become a major use of investable cash. Purchases of investment securities in 2002 totaled \$297.9 million, while proceeds from sales and maturities totaled \$154.1 million, resulting in a net cash outflow of \$143.9 million. By comparison, the net cash outflows for investment securities purchases, sales and maturities was \$2.7 million in 2001.

Cash provided by financing activities totaled \$170.3 million in 2002 and \$131.9 million in 2000, compared to \$12.2 million in cash used in financing activities in 2001. During 2002, the net increase in deposits of \$190.2 million and \$15.1 million increase in short-term borrowings provided the source of cash, while repayments on long-term debt totaling \$40.4 million represented a use of cash. During 2001, repayments of long-term debt of \$63.5 million and a net decrease in short-term borrowings of \$42.8 million offset a \$87.9 million net increase in deposits.

For the parent company, the primary uses of funds included the aforementioned common stock repurchases, as well as dividend payments totaling \$6.1 million in 2002, \$5.4 million in 2001 and \$5.3 million in 2000. The parent company's primary source of funds was dividends received from the Bank. As presented in note 25 to the consolidated financial statements, the Bank's retained earnings, as defined, is the maximum amount permitted to be distributed as a dividend without prior regulatory approvals. At December 31, 2002, retained earnings of the Bank were \$126.3 million.

Impact of New Accounting Standards

During 2002, the Financial Accounting Standards Board issued statements on financial accounting standards, which are discussed in note 26 to the consolidated financial statements. The application of those statements is not expected to have a material impact on the Company's consolidated financial statements.

Consolidated Quarterly Results of Operations

Table 19

(Dollars in thousands, except per share data)	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Full Year
2002:					
Interest income	\$ 29,257	\$ 29,718	\$ 30,201	\$ 29,286	\$ 118,462

Diluted earnings per share	0.31	0.34	0.52	0.55	1.72

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the normal course of its business, the Company is exposed to market risk, primarily in the form of interest rate risk. Economic impact of interest rate risk may occur as interest rates change, resulting in gains or losses in future net interest income, cash flows, or current fair market value. The Company utilizes product pricing and investment and debt management strategies to manage its interest rate risk.

Table 20 presents information on the Company's financial instruments that are sensitive to changes in interest rates. Expected maturities of interest-sensitive assets and liabilities are contractual maturities. Interest-bearing demand and savings deposits, which have indeterminate maturities, are included in the earliest maturity category. The resulting table is based on assumptions that include prepayment rates on mortgage-related assets and a forecast of market interest rates. See note 22 to the consolidated financial statements for a discussion of the calculation of fair values.

Edgar Filing: CENTRAL PACIFIC FINANCIAL CORP - Form 10-K/A

At December 31, 2002, holdings of relatively shorter-term investments and short-term borrowings increased from year-end 2001. Fair value of interest-sensitive assets and liabilities as a percentage of book value rose as market interest rates declined throughout the year. Maturities and fair values of interest-sensitive assets and liabilities may vary from expectation if actual experience differs from assumptions used.

Table 20

(Dollars in thousands)	Expected Maturity Within						Book Value	Total Fair Value
	One Year	Two Years	Three Years	Four Years	Five Years	Thereafter		
Interest-sensitive assets

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

CPB INC. & SUBSIDIARY - YEARS ENDED DECEMBER 31, 2002, 2001 & 2000

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Description of Business

CPB Inc. is (the Company is) sole operating subsidiary, Central Pacific Bank (the Bank), is a full-service commercial bank which had 24 banking offices located throughout the State of Hawaii at December 31, 2002. The Bank engages in a broad range of lending activities including the granting of commercial, consumer and real estate loans. The Bank also offers a variety of deposit instruments. These include personal and business checking and savings accounts, money market accounts and time certificates of deposit.

Other products and services include non-deposit investment products, debit card services, Internet banking services, cash management services, traveler's checks, safe deposit boxes, international banking services, night depository facilities and wire transfer services. The Bank's Trust and Investment Management Division also offers investment management, asset custody and general consultation and planning services.

The Bank's business depends on rate differentials, the difference between the interest rate paid by the Bank on its deposits and other borrowings and the interest rate received by the Bank on loans extended to its customers and investment securities held in the Bank's portfolio. These rates are highly sensitive to many factors that are beyond the control of the Bank. Accordingly, the earnings and growth of the Company are subject to the influence of domestic and foreign economic conditions, including inflation, recession and unemployment.

Principles of Consolidation

The consolidated financial statements include the accounts of CPB Inc. and its subsidiary, Central Pacific Bank and its subsidiaries, Central Business Club of Honolulu (wholly owned) and CPB Real Estate, Inc. (wholly owned). All significant intercompany accounts and transactions have been eliminated in consolidation.

Prior to November 2001, the Bank owned 100% of the outstanding stock of CPB Properties, Inc. (CPB Properties), a company which was a general and managing partner and 50% owner of CKSS Associates (CKSS), a Hawaii limited partnership. The investment in CKSS was accounted for by the equity method. CKSS owned the Central Pacific Plaza, the property in which the Company's and the Bank's headquarters and main office are located. CKSS also owned the Kaimuki Plaza, the property in which the Bank's Kaimuki branch office is located. In addition, CPB Properties owned University Square, the building in which the Bank's Moiliili branch office is located. In June 2001, the Bank acquired the remaining 50% interest in CKSS from Kajima Development Corporation, Sumitomo Corporation, and Sumitomo Corporation of America for \$18.5 million. In November 2001, CPB Properties and CKSS were merged into the Bank.

Cash and Cash Equivalents

For purposes of the statements of cash flows, the Company considers cash and cash equivalents to include cash and due from banks.

Investment Securities

The Company accounts for its investment securities in accordance with Statement of Financial Accounting Standards (SFAS) No. 115, Accounting for Certain Investments in Debt and Equity Securities, which requires that investments in debt securities and marketable equity securities be designated as trading, held to maturity or available for sale. Trading securities, of which the Company had none at December 31, 2002 and 2001, would be reported at fair value, with changes in fair value included in earnings. Available-for-sale securities are reported at fair value, with net unrealized gains and losses, net of taxes, included in accumulated other comprehensive income. Held-to-maturity debt securities are reported at amortized cost.

Gains and losses from the disposition of investment securities are computed using the specific identification method.

Loans Held for Sale

Loans held for sale, consisting primarily of fixed-rate residential mortgage loans which were originated with the intent to sell, are valued at the lower of cost or market value on an aggregate basis.

Loans

Loans are stated at the principal amount outstanding, net of unearned income. Unearned income represents net deferred loan fees that are recognized over the life of the related loan as an adjustment to yield.

Interest income on loans is generally recognized on an accrual basis. Loans are placed on nonaccrual status when interest payments are 90 days past due, or earlier should Management determine that the borrowers will be unable to meet contractual principal and/or interest obligations, unless the loans are well-secured and in the process of collection. When a loan is placed on nonaccrual status, all interest previously accrued but not collected is reversed against current period interest income should Management determine that the collectibility of such accrued interest is doubtful. All subsequent receipts are applied to principal outstanding, and no interest income is recognized unless the financial condition and payment record of the borrowers warrant such recognition. A nonaccrual loan may be restored to an accrual basis when principal and interest payments are current and full payment of principal and interest is expected.

Allowance for Loan Losses

The allowance for loan losses is established through provisions for loan losses charged against income. Loans deemed to be uncollectible are charged off against the allowance, and all interest previously accrued but not collected is reversed against current period interest income. Subsequent receipts, if any, are credited first to the remaining principal, then to the allowance as recoveries, and finally to unaccrued interest.

The Company, considering current information and events regarding the borrowers' ability to repay their obligations, treats a loan as impaired when it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. When a loan is considered to be impaired, the amount of the impairment is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or, if the loan is considered to be collateral dependent, based on the fair value of the collateral. Impairment losses are included in the allowance for loan losses through a charge to the provision for loan losses. Interest income is recognized on an accrual basis unless the loan is placed on nonaccrual status.

For smaller-balance homogeneous loans (primarily residential real estate and consumer loans), the allowance for loan losses is based upon Management's evaluation of the quality, character and inherent risks in the loan portfolio, current and projected economic conditions, and past loan loss experience.

Delinquent consumer loans and residential mortgage loans are charged off within 120 days, unless determined to be adequately collateralized or in imminent process of collection. Delinquent commercial loans and commercial mortgage loans are charged off when Management determines that collectibility is doubtful and the principal amount of the loans cannot be repaid from proceeds of collateral liquidation.

Premises and Equipment

Premises and equipment are stated at cost, net of accumulated depreciation and amortization. Depreciation and amortization are included in other operating expense and are computed under the straight-line method over the estimated useful lives of the assets or the applicable leases, whichever is shorter. Major improvements and betterments are capitalized, while recurring maintenance and repairs are charged to operating expense. Net gains or losses on dispositions of premises and equipment are included in other operating expense.

Intangible Assets

Intangible assets, consisting of mortgage servicing rights, are carried at the lower of amortized cost or fair value and are included in other assets. Intangible assets totaled \$853,000 and \$1,456,000 at December 31, 2002 and 2001, respectively. Amortization expense amounted to \$927,000, \$437,000 and \$308,000 for the years ended December 31, 2002, 2001 and 2000, respectively. Accumulated amortization amounted to \$2,926,000 and \$1,999,000 at December 31, 2002 and 2001, respectively.

Impairment of Long-Lived Assets

Long-lived assets, such as property, plant, and equipment, and purchased intangibles subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the asset. Assets to be disposed of would be separately presented in the balance sheet and reported at the lower of

the carrying amount or fair value less costs to sell, and are no longer depreciated. The assets and liabilities of a disposed group classified as held for sale would be presented separately in the appropriate asset and liability sections of the balance sheet.

Other Real Estate

Other real estate is composed of properties acquired through foreclosure proceedings. Properties acquired through foreclosure are valued at fair value that establishes the new cost basis of other real estate. Losses arising at the time of acquisition of such properties are charged against the allowance for loan losses. Subsequent to acquisition, such properties are carried at the lower of cost or fair value less estimated selling expenses, determined on an individual asset basis. Any deficiency resulting from the excess of cost over fair value less estimated selling expenses is recognized as a valuation allowance. Any subsequent increase in fair value up to its cost basis is recorded as a reduction of the valuation allowance. Increases or decrease in the valuation allowance are included in other operating expense. Net gains or losses recognized on the sale of these properties are included in other operating income.

Stock Compensation Plans

Prior to January 1, 1996, the Company accounted for its stock option plan in accordance with the provisions of Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations, whereby compensation expense would be recorded on the date of grant only if the current market price of the underlying stock exceeded the exercise price. Effective January 1, 1996, the Company adopted Statement of Financial Accounting Standards (SFAS) No. 123, Accounting for Stock-Based Compensation, which permits entities to recognize as expense over the vesting period the fair value of all stock-based awards on the date of grant. Alternatively, SFAS No. 123 also allows entities to continue to apply the provisions of APB Opinion No. 25 and provide pro forma net income and pro forma earnings per share disclosures for employee stock option grants made in 1995 and future years as if the fair-value based method defined in SFAS No. 123 had been applied. In December 2002, SFAS No. 148, Accounting for Stock-Based Compensation - Transition and Disclosure - an amendment of FASB Statement No. 123, was issued. SFAS No. 148 provides alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. In addition, it amends the disclosure requirements of SFAS No. 123. The Company has elected to continue to apply the provisions of APB Opinion No. 25 and provide the pro forma disclosure provisions of SFAS No. 148.

The following table presents pro forma disclosures of the impact that the 2002, 2000, 1999 and 1997 option grants would have had on net income and earnings per share had the grants been measured using the fair value of accounting prescribed by SFAS No. 148.

(Dollars in thousands, except per share data)	2002		2001		2000	
Net income, as reported	\$	33,283	\$	28,705	\$	19,434
Deduct: Total stock-based compensation expense determined under fair value based method for all awards, net of related tax effects		(787)		(355)		(321)
Pro forma net income	\$	32,496	\$	28,350	\$	19,113
Earnings per share:						
Basic - as reported	\$	2.09	\$	1.75	\$	1.09
Basic - pro forma	\$	2.04	\$	1.73	\$	1.07
Diluted - as reported	\$	2.04	\$	1.72	\$	1.07
Diluted - pro forma	\$	1.99	\$	1.69	\$	1.05

Pro forma net income and earnings per share reflect only those options granted since 1995. The full impact of calculating compensation cost for options under SFAS No. 148 is not reflected in the pro forma net income and earnings per share amounts presented above because compensation cost is reflected over the options' vesting period of five years and compensation cost for options granted prior to January 1, 1995 was not considered.

Income Taxes

Deferred tax assets and liabilities are recognized using the asset and liability method for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and net operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using the enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income taxes in the period that includes the enactment date.

Forward Foreign Exchange Contracts

The Bank periodically is a party to a limited amount of forward foreign exchange contracts to satisfy customer requirements for foreign currencies. These contracts are not utilized for trading purposes and are carried at market value, with realized gains and losses included in fees on foreign exchange. There were no gains or losses in 2002. Net gains for 2001 totaled \$5,000. Net losses for 2000 totaled \$1,000.

Use of Estimates

The preparation of the consolidated financial statements requires Management of the Company to make a number of estimates and assumptions relating to the reported amount of

assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the period. With respect to the allowance for loan losses, the Company believes the allowance for loan losses is adequate to provide for potential losses on loans and other extensions of credit. While the Company utilizes available information to recognize losses on loans, future additions to the allowance for loan losses may be necessary based on changes in economic conditions, particularly in the State of Hawaii. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Company's allowance for loan losses. Such agencies may require the Company to recognize additions to the allowance based on their judgments about information available to them at the time of their examination. Accordingly, actual results could differ from those estimates.

2. RESERVE REQUIREMENTS

The Bank is required by the Federal Reserve Bank to maintain reserves based on the amount of deposits held. The amount held as a reserve at December 31, 2002 and 2001 was \$26,253,000 and \$24,750,000, respectively.

3. INVESTMENT SECURITIES

A summary of investment securities at December 31, 2002 and 2001 follows:

(Dollars in thousands)	Amortized cost	Gross unrealized gains	Gross unrealized losses	Estimated fair value
2002				
Held to Maturity				
U.S. Treasury and other U.S. Government agencies	\$ 22,625	\$ 823	\$	\$ 23,448
States and political subdivisions	33,695	1,348		35,043
Total	\$ 56,320	\$ 2,171	\$	\$ 58,491
Available for Sales				
U.S. Treasury and other U.S. Government agencies	\$ 369,967	\$ 10,017	\$ 296	\$ 379,688
States and political subdivisions	48,716	1,903	42	50,577
Privately-issued mortgage-backed securities	10,440	82		10,522
Federal Home Loan Bank of Seattle stock	13,412			13,412
Mutual funds	30,000			30,000
Other	405			405
Total	\$ 472,940	\$ 12,002	\$ 338	\$ 484,604
2001				
Held to Maturity				
U.S. Treasury and other U.S. Government agencies	\$ 31,612	\$ 830	\$	\$ 32,442
States and political subdivisions	38,247	520	67	38,700
Total	\$ 69,859	\$ 1,350	\$ 67	\$ 71,142
Available for Sales				
U.S. Treasury and other U.S. Government agencies	\$ 266,546	\$ 6,907	\$ 1,076	\$ 272,377
States and political subdivisions	32,404	771	9	33,166

Federal Home Loan Bank of Seattle stock	12,613			12,613
Other	675			675
Total	\$ 315,396	\$ 7,777	\$ 1,085	\$ 322,088

The amortized cost and estimated fair value of investment securities at December 31, 2002, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

(Dollars in thousands)	Amortized cost	Estimated fair value
Held to Maturity		
Due in one year or less	\$ 3,554	\$ 3,687
Due after one year through five years	15,664	16,435
Due after five years through ten years	8,742	9,174
Due after ten years	5,735	5,747
Mortgage-backed securities	22,625	23,448
Total	\$ 56,320	\$ 58,491
Available for Sale		
Due in one year or less	\$ 10,972	\$ 11,078
Due after one year through five years	75,157	78,744
Due after five years through ten years	10,680	11,786
Due after ten years	33,854	34,521
Mortgage-backed securities	298,460	304,658
Federal Home Loan Bank of Seattle stock	13,412	13,412
Mutual funds	30,000	30,000
Other	405	405
Total	\$ 472,940	\$ 484,604

Proceeds from sales of investment securities available for sale were \$16,689,000 in 2002, \$54,824,000 in 2001 and \$30,592,000 in 2000, resulting in gross realized gains of \$747,000 and \$1,129,000 in 2002 and 2001, respectively, and gross realized losses of \$126,000, and \$683,000 in 2001 and 2000, respectively. Investment securities losses in 2002, 2001, and 2000 also included writedowns of \$270,000, \$68,000 and \$83,000, respectively, on an equity security to reflect an impairment in value deemed other than temporary.

In 2001, the Bank, in response to an unsolicited tender offer from the issuer, tendered an investment security designated as held to maturity with an amortized cost of \$5,027,000. The proceeds from this tender was \$5,376,000 and resulted in a realized gain of \$349,000.

Investment securities of \$84,645,000 and \$179,308,000 at December 31, 2002 and 2001, respectively, were pledged to secure public funds on deposit, securities sold under agreements to repurchase and other short-term borrowings.

As a member of the Federal Home Loan Bank of Seattle (FHLB), the Bank is required to obtain and hold a specified number of shares of capital stock of the FHLB based on the amount of its outstanding FHLB advances. These shares are pledged to the FHLB as collateral to secure outstanding advances (see note 9).

4. LOANS

Loans, excluding loans held for sale, consisted of the following at December 31, 2002 and 2001:

(Dollars in thousands)	2002	2001
Real estate:		
Mortgage - commercial	\$ 542,588	\$ 506,222
Mortgage - residential	313,614	348,644
Construction	118,276	132,165
Commercial, financial and agricultural	264,044	235,179
Consumer	56,571	50,106
	1,295,093	1,272,316
Less unearned income	5,201	5,367
Total	\$ 1,289,892	\$ 1,266,949

In the normal course of business, the Bank has made loans to certain directors, executive officers and their affiliates under terms which Management believes are consistent with the Bank's general lending policies. An analysis of the activity of such loans in 2002 follows:

(Dollars in thousands)	
Balance, beginning of year	\$ 3,062
Additions	782
Repayments	(904)
Other changes	(358)
Balance, end of year	\$ 2,582

The amount of other changes is primarily attributable to the sale of one residential mortgage loan and the addition of new executive officers in 2002.

Impaired loans at December 31, 2002 and 2001 (see note 5 for related allowance for loan losses), amounted to \$311,000 and \$2,397,000, respectively, and included all nonaccrual and restructured loans greater than \$500,000. The average recorded investment in impaired loans amounts to \$1,943,000 in 2002, \$7,800,000 in 2001 and \$8,124,000 in 2000. Interest income recognized on such loans amounted to \$10,000 in 2002, \$1,288,000 in 2001 and \$130,000 in 2000, of which \$10,000, \$1,258,000 and \$93,000, respectively, was earned on nonaccrual loans, and \$30,000 and \$37,000 was recorded in 2001 and 2000, respectively, on restructured loans still accruing interest.

Edgar Filing: CENTRAL PACIFIC FINANCIAL CORP - Form 10-K/A

Nonaccrual loans at December 31, 2002 and 2001 totaled \$439,000 and \$2,421,000, respectively. The Bank collected and recognized interest income of \$6,000 on these loans in

2002. The Bank would have recognized additional interest income of \$22,000 had these loans been accruing interest throughout 2002. Additionally, the Bank collected and recognized interest income of \$173,000 on charged-off loans in 2002.

There were no restructured loans still accruing interest at December 31, 2002 and 2001.

Substantially all of the Bank's loans are to residents of, or companies doing business in, the State of Hawaii and are generally secured by personal assets, business assets, residential properties or income-producing or commercial properties.

5. ALLOWANCE FOR LOAN LOSSES

Changes in the allowance for loan losses were as follows:

(Dollars in thousands)	2002	2001	2000
Balance, beginning of year	\$ 24,564	\$ 22,612	\$ 20,768
Provision for loan losses	1,000	3,000	4,500
	25,564	25,612	25,268
Charge-offs	(1,281)	(2,529)	(3,592)
Recoveries	816	1,481	936
Net charge-offs	(465)	(1,048)	(2,656)
Reclassification of allowance for credit losses on off-balance sheet credit exposures	(902)		
Balance, end of year	\$ 24,197	\$ 24,564	\$ 22,612

As prescribed by current accounting practice, \$902,000 relating to the allowance for credit losses on off-balance sheet credit exposures was reclassified from the allowance for loan losses to other liabilities.

Changes in the allowance for loan losses for impaired loans (included in the above amounts) were as follows:

(Dollars in thousands)	2002	2001	2000
Balance, beginning of year	\$ 426	\$ 3,208	\$ 2,547
Provision for loan losses	9	81	14

Edgar Filing: CENTRAL PACIFIC FINANCIAL CORP - Form 10-K/A

Net charge-offs	(147)	(464)	(2,139)
Other changes	(288)	(2,399)	2,786
Balance, end of year	\$	\$	426 \$
			3,208

60

The amounts of other changes represent the net transfer of allocated allowances for loans which were not classified as impaired for the entire year.

At December 31, 2002, all impaired loans were measured based on the fair value of the underlying collateral.

6. PREMISES AND EQUIPMENT

Premises and equipment consisted of the following at December 31, 2002 and 2001:

(Dollars in thousands)	2002	2001
Land	\$ 9,534	\$ 9,534
Office buildings and improvements	77,080	77,077
Furniture, fixtures and equipment	19,568	18,680
	106,182	105,291
Less accumulated depreciation and amortization	48,457	44,656
Net	\$ 57,725	\$ 60,635

Depreciation and amortization of premises and equipment were charged to the following operating expenses:

(Dollars in thousands)	2002	2001	2000
Net occupancy	\$ 2,725	\$ 2,087	\$ 1,129
Equipment	1,463	1,415	1,569
Total	\$ 4,188	\$ 3,502	\$ 2,698

7. DEPOSITS

Certificates of deposit of \$100,000 or more totaled \$360,630,000 and \$368,794,000 at December 31, 2002 and 2001, respectively.

Interest expense on certificates of deposits of \$100,000 or more totaled \$8,949,000, \$18,433,000 and \$21,430,000 for the years ended December 31, 2002, 2001 and 2000, respectively.

8. SHORT-TERM BORROWINGS

Federal funds purchased generally mature on the day following the date of purchase.

Securities sold under agreements to repurchase with a weighted average contractual maturity of 365 days at December 31, 2002 were treated as financings, and the obligations to repurchase

the identical securities sold were reflected as a liability with the dollar amount of securities underlying the agreements remaining in the asset accounts. At December 31, 2002, the underlying securities were held in a custodial account subject to Bank control.

Other short-term borrowings consist primarily of the Treasury Tax and Loan balance, which represents tax payments collected on behalf of the U.S. government, and FHLB short-term advances. The Treasury Tax and Loan balances bear market interest rates and are callable at any time.

A summary of short-term borrowings follows:

(Dollars in thousands)	2002	2001	2000
Federal funds purchased			
Amount outstanding at December 31	\$	\$	\$
Average amount outstanding during year			5
Highest month-end balance during year			
Weighted average interest rate on balances outstanding at December 31			
Weighted average interest rate during year			6.88%
Securities sold under agreements to repurchase			
Amount outstanding at December 31	\$ 1,000	\$ 1,000	\$ 19,267
Average amount outstanding during year	1,000	2,817	10,167
Highest month-end balance during year	1,000	20,118	19,267
Weighted average interest rate on balances outstanding at December 31	1.15%	2.05%	6.65%
Weighted average interest rate during year	1.96%	6.04%	6.66%
Other short-term borrowings			
Amount outstanding at December 31	\$ 28,008	\$ 12,893	\$ 37,453
Average amount outstanding during year	9,436	8,699	46,855
Highest month-end balance during year	52,634	33,912	97,664
Weighted average interest rate on balances outstanding at December 31	1.37%	1.98%	6.67%
Weighted average interest rate during year	1.98%	5.44%	6.50%

9. LONG-TERM DEBT

Long-term debt at December 31, 2002 and 2001 consisted of intermediate-term FHLB advances with a weighted average interest rate of 3.177% and 3.793%, respectively. FHLB advances outstanding at December 31, 2002 were secured by interest-bearing deposits at the FHLB of \$39.4 million, the Bank's holdings of FHLB stock, other unencumbered investment securities with a fair value of \$19.5 million and certain real estate loans totaling \$244.8 million in accordance with the collateral provisions of the Advances, Security and Deposit Agreement between the Bank and the FHLB. At December 31, 2002, the Bank had available to it additional unused FHLB advances of approximately \$232.8 million.

A \$15.0 million FHLB advance, which bears a fixed interest rate of 6.12% and matures on September 15, 2005, is putable every three months.

At December 31, 2002, approximate maturities of FHLB advances were as follows:

(Dollars in thousands)

Year ending December 31:		
2003	\$	25,115
2004		60,371
2005		20,946
2006		7,698
2007		13,269
Thereafter		19,756
Total	\$	147,155

10. SHAREHOLDER RIGHTS PLAN

On August 26, 1998, the Company's board of directors adopted a Shareholder Rights Plan (the Rights Plan) that entitled holders of common stock to receive one right for each share of common stock outstanding as of September 16, 1998. Adjusted for the two-for-one stock split of the Company's common stock on November 8, 2002, each right entitles the registered holder to purchase from the Company one two-hundredth (2/100th) of a share of the Company's Junior Participating Preferred Stock, Series A, no par value per share, at a price of \$37.50 per one two-hundredth (2/100th) of a share, subject to adjustment. The rights are exercisable only upon the occurrence of specific events and will expire on August 26, 2008. The Rights Plan was designed to ensure that shareholders receive fair and equal treatment in the event of unsolicited or coercive attempts to acquire the Company. The Rights Plan was also intended to guard against unfair tender offers and other abusive takeover tactics. The Rights Plan was not intended to prevent an acquisition bid for the Company on terms that are fair to all shareholders.

11. EMPLOYEE STOCK OWNERSHIP PLAN

The Bank has an employee stock ownership plan (ESOP) and related trust covering substantially all full-time employees with at least one year of service. Normal vesting occurs at the rate of 20% per year starting the second year of participation. The Bank made contributions of \$1,164,000, \$890,000 and \$649,000 for 2002, 2001 and 2000, respectively, which were charged to salaries and employee benefits. Effective January 1, 2000, contributions to the profit sharing plan and ESOP combined were reduced from 10% to 5% of defined net income.

12. STOCK COMPENSATION PLANS

Stock Option Plans

The Company has adopted stock option plans for the purpose of granting options to purchase CPB Inc. common stock to directors, officers and other key individuals. Options are granted with an exercise price equal to the stock's fair market value at the date of grant. All options have 10-year terms. Incentive stock options vest at the rate of 20% per year while nonqualified stock options, which do not qualify as incentive stock options (nonqualified stock options), vest annually over the respective periods.

In November 1986, the Company adopted the 1986 Stock Option Plan (1986 Plan) making available 440,000 shares for grant to employees. In 1992, the Company's shareholders approved an increase to 1,040,000 shares for grants. The 1986 Plan expired in 1997, and no new options will be granted under this plan. Outstanding options may be exercised by optionees until the expiration of the respective options in accordance with the original terms of the 1986 Plan.

In February 1997, the Company adopted the 1997 Stock Option Plan (1997 Plan) basically as a continuance of the previous plan for a 10-year term. In April 1997, the Company's shareholders approved the 1997 Plan which provides 2,000,000 shares of the Company's common stock for grants to employees as qualified incentive stock options and to directors as nonqualified stock options (adjusted for the two-for-one stock split of the Company's common stock on November 8, 2002). During 1997, in addition to employee grants, each director of the Company and the Bank received a grant based on 1,500 shares multiplied by the lesser of 10 years or the number of years to age 70. The nonqualified stock options vest at the rate at 1,500 shares annually beginning one year from July 30, 1997, the date of grant.

The table below presents activity of the 1986 and 1997 Stock Option Plans for the years indicated. The per share weighted average fair value of options granted in January 2002, March 2002, November 2000, November 1999, July 1997 and June 1995 of \$13.03, \$14.99, \$10.90, \$9.53, \$5.47 and \$4.54, respectively, was determined using the Black Scholes option-pricing model with the following weighted average assumptions: expected dividend yield of 1.19%, 1.19%, 2.33%, 2.32%, 2.63% and 3.07%, expected volatility of 38%, 38%, 43%, 36%, 28% and 30%, risk-free interest rate of 5.02%, 5.02%, 5.04%, 6.25%, 5.45%, and 6.10% and expected life of 7.5 years for years 2002, 2000, 1999, 1997 and 1995, respectively. There were no grants in 2001, 1998 or 1996.

(Dollars in thousands)	2002		2001		2000	
	Shares	Weighted average exercise price	Shares	Weighted average exercise price	Shares	Weighted average exercise price

Stock Awards

Edgar Filing: CENTRAL PACIFIC FINANCIAL CORP - Form 10-K/A

In May 2001 and November 2002, the Company awarded 300 shares of common stock to each of its non-officer directors. Compensation expense is measured as the market price of the stock awards at the grant date, and is recognized over a five-year vesting period.

13. PENSION PLANS

The Bank has a defined benefit retirement plan covering substantially all of its employees. The plan was curtailed in 1986, and accordingly, plan benefits were fixed as of that date.

The Bank also had a money purchase pension plan which covered all full-time employees with at least one year of service. This plan was terminated in 1991, and participants in the money purchase pension plan became fully vested at the time of termination.

Effective January 1, 1991, the Bank reactivated its defined benefit retirement plan. As a result of the reactivation, employees for whom benefits were fixed in 1986 began to accrue additional benefits under a new formula that became effective January 1, 1991. Employees who were not participants at curtailment, but who were subsequently eligible to join, became participants effective January 1, 1991. Under the reactivated plan, benefits are based upon the employees' years of service and their highest average annual salaries in a 60-consecutive-month period of service, reduced by benefits provided from the Bank's terminated money purchase pension plan. The reactivation of the defined benefit retirement plan resulted in an increase of \$5,914,000 in the unrecognized prior service cost, which is being amortized over a period of 13 years.

Effective December 31, 2002, the Bank curtailed its defined benefit retirement plan, and recorded a net curtailment gain of \$1.4 million. Plan benefits were fixed as of that date.

The following table sets forth information pertaining to the defined benefit retirement plan for the years ended December 31, 2002, 2001 and 2000:

(Dollars in thousands)	2002		2001		2000

Edgar Filing: CENTRAL PACIFIC FINANCIAL CORP - Form 10-K/A

In 1995 and 2001, the Bank established Supplemental Executive Retirement Plans (SERP) which provide certain officers of the Bank with supplemental retirement benefits in excess of limits imposed on qualified plans by Federal tax laws. Effective December 31, 2002, the Bank curtailed its SERP, and accordingly, plan benefits were fixed as of that date.

The following table sets forth information pertaining to the SERP for the years ended December 31, 2002, 2001 and 2000:

(Dollars in thousands)	2002	2001	2000
Change in benefit obligation			
Benefit obligation at January 1	\$ 2,492	\$ 767	\$ 629
Service cost	78	17	12
Interest cost	176	55	50
Actuarial loss (gain)	(95)	171	123
Benefits paid	(151)	(47)	(47)
Curtailment gain	(158)		
Transitional obligation		1,200	
Prior service cost		329	
Benefit obligation at December 31	\$ 2,342	\$ 2,492	\$ 767
Change in plan assets			
Fair value of assets at January 1	\$	\$	\$
Employer contributions	151	47	47
Benefits paid	(151)	(47)	(47)
Fair value of assets at December 31	\$	\$	\$
Funded status			
Benefit obligation at December 31	\$ (2,342)	\$ (2,492)	\$ (767)
Unrecognized transition obligation	324	344	17
Unrecognized net actuarial loss	32	296	139
Net amount recognized	\$ (1,986)	\$ (1,852)	\$ (611)
Components of net periodic cost (benefit)			
Service cost	\$ 78	\$ 17	\$ 12
Interest cost	176	55	50
Amortization of unrecognized transition obligation	3	1,203	3
Recognized prior service cost	18		
Recognized net (gain) loss	11	(32)	(13)
Net periodic cost	\$ 286	\$ 1,243	\$ 52

Actuarial assumptions, including weighted average discount rates and rates of compensation increase, were consistent with the rates used for the defined benefit retirement plan.

14. PROFIT SHARING AND 401(K) PLANS

The Bank's profit sharing plan covers substantially all employees with at least one year of service. The board of directors has sole discretion in determining the annual contribution to the plan, subject to limitations of the Internal Revenue Code. Employees may elect to receive up to 50% of their annual allocation in cash.

Effective March 31, 1996, the profit sharing plan was merged with an existing employee funded 401(K) plan which allows employees to direct their own investments. Effective September 1, 1996, the Bank instituted a 50% employer-matching program for the 401(K) plan, contributing up to 2% of qualifying employees' salaries.

Effective January 1, 2000, combined contributions to the profit sharing plan and ESOP were reduced from 10% to 5% of defined net income, while contributions to the Bank's 401(K) plan increased from 50% to 100% of employee contributions up to 4% of the employee's salary. The Bank made contributions to the profit sharing plan of \$1,164,000, \$890,000 and \$649,000 for 2002, 2001 and 2000, respectively. Contributions to the 401(K) plan totaled \$659,000, \$630,000 and \$651,000 in 2002, 2001 and 2000, respectively.

15. OPERATING LEASES

The Bank occupies a number of properties under leases which expire on various dates through 2038, and, in most instances, provide for the renegotiation of rental terms at fixed intervals. These leases generally contain renewal options for periods ranging from 5 to 15 years.

Total rent expense for 2001 and 2000 represents gross rent expense less the net operating income from Company-owned properties of \$1,419,000 and \$499,000 for 2001 and 2000, respectively.

Net rent expense, charged to net occupancy expense, for all operating leases is summarized as follows:

(Dollars in thousands)	2002	2001	2000
Total rent expense	\$ 3,428	\$ 3,352	\$ 4,635
Less sublease rental income		(144)	(188)
Total	\$ 3,428	\$ 3,208	\$ 4,447

The following is a schedule of future minimum rental commitments for all noncancellable operating leases that had initial lease terms in excess of one year at December 31, 2002:

(Dollars in thousands)	Rental commitment	
Year ending December 31:		
2003	\$	2,680
2004		2,474
2005		2,392
2006		2,313
2007		1,879
Thereafter		11,974
Total	\$	23,712

In addition, the Bank leases certain properties that it owns. The following is a schedule of future minimum rental income for those noncancellable operating leases that had initial lease terms in excess of one year at December 31, 2002:

(Dollars in thousands)		
Year ending December 31:		
2003	\$	3,236
2004		2,660
2005		2,009
2006		1,291
2007		514
Thereafter		174
Total	\$	9,884

In instances where the lease calls for a renegotiation of rental payments, the lease rental payment in effect prior to renegotiation was used throughout the remaining lease term.

16. OTHER EXPENSE

Components of other expense for the years ended December 31, 2002, 2001 and 2000 were as follows:

(Dollars in thousands)	2002	2001	2000
Legal and other professional services	\$ 3,368	\$ 2,260	\$ 2,433
Computer services	1,680	1,584	1,408
Advertising	1,300	1,600	1,300
Merchant and other bank card services	654	16	365
Other	11,796	9,864	9,957
Total	\$ 18,798	\$ 15,324	\$ 15,463

17. INCOME AND FRANCHISE TAXES

Components of income tax expense (benefit) for the years ended December 31, 2002, 2001 and 2000 were as follows:

(Dollars in thousands)	Current	Deferred	Total
2002:			
Federal	\$ 10,441	\$ 3,419	\$ 13,860
State	292	803	1,095
Total	\$ 10,733	\$ 4,222	\$ 14,955
2001:			
Federal	\$ 9,862	\$ (2,415)	\$ 7,447
State	3,145	(415)	2,730
Total	\$ 13,007	\$ (2,830)	\$ 10,177
2000:			
Federal	\$ 15,933	\$ (7,448)	\$ 8,485
State	3,639	(1,539)	2,100
Total	\$ 19,572	\$ (8,987)	\$ 10,585

Income tax expense amounted to \$14,955,000, \$10,177,000 and \$10,585,000 for 2002, 2001 and 2000, respectively. Income tax expense for the periods presented differed from the expected tax expense (computed by applying the U.S. Federal corporate tax rate of 35% to income before income taxes) for the following reasons:

(Dollars in thousands)	2002	2001	2000
Computed expected tax expense	\$ 16,883	\$ 13,609	\$ 10,507
Increase (decrease) in taxes resulting from:			
Tax-exempt interest	(1,247)	(1,136)	(1,149)
Other tax-exempt income	(459)	(40)	(437)
State franchise tax, net of Federal income tax benefit	712	1,774	1,365
Stock-based benefits	(805)		
Capital loss carryback		(3,842)	
Other	(129)	(188)	299
Total	\$ 14,955	\$ 10,177	\$ 10,585

At December 31, 2002 and 2001, current Federal income taxes payable of \$1,450,000 and \$9,495,000, respectively, and current state franchise taxes payable of \$4,154,000 and \$10,091,000, respectively, were included in other liabilities.

The tax effects of temporary differences that gave rise to significant portions of the deferred tax assets and deferred tax liabilities at December 31, 2002 and 2001 were as follows:

(Dollars in thousands)	2002	2001
Deferred tax assets		
Allowance for loan losses	\$ 8,182	\$ 8,010
Net unrealized gain on available-for-sale securities	4,660	2,674
Employee retirement benefits	6,119	4,423
Premises and equipment, principally due to differences in depreciation	1,594	1,240
Accrued expenses	1,257	1,106
State franchise tax	1,514	1,041
Interest on nonaccrual loans	40	173
Other	683	333
Total deferred tax assets	\$ 24,049	\$ 19,000
Deferred tax liabilities		
Real estate investment trust dividends	\$ 9,025	\$
Investment in unconsolidated subsidiaries		587
FHLB stock dividends received	3,153	2,834
Deferred gain on curtailed retirement plan	3,328	2,771
Accreted discounts receivable	846	671
Deferred finance fees	432	637
Other	234	227
Total deferred tax liabilities	\$ 17,018	\$ 7,727
Net deferred tax assets	\$ 7,031	\$ 11,273

In assessing the realizability of deferred tax assets, Management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers projected future taxable income and tax planning strategies in making this assessment. There was no valuation allowance for deferred tax assets as of December 31, 2002 and 2001.

In 1998, the Company completed a corporate reorganization. In September 2002, the State of Hawaii tax department notified the Company that it was disallowing the tax treatment of this reorganization, and assessed the Company approximately \$0.9 million in interest on the unpaid tax liability. The unpaid tax liability and the related interest were paid in October 2002. The Company appealed this decision, and was notified in December 2002 that the Hawaii State Board of Taxation Review had denied the appeal. The Company has filed an appeal with the Hawaii State Tax Appeal Court. If the Company were successful in its appeal, the tax benefits, which have not yet been recognized, would amount to approximately \$5.3 million as of December 31, 2002.

18. COMPREHENSIVE INCOME

Components of comprehensive income, net of taxes, for the years ended December 31, 2002, 2001 and 2000 were as follows:

(Dollars in thousands)	2002	2001	2000
Unrealized holding gains on available- for-sale investment securities	\$ 7,004	\$ 4,018	\$ 3,060
Pension liability adjustments	(6,975)	(4,021)	
	\$ 29	\$ (3)	\$ 3,060

19. EARNINGS PER SHARE

Basic earnings per share is calculated by dividing net income by the weighted average number of shares outstanding. Stock options are considered common stock equivalents for purposes of calculating diluted earnings per share.

(Dollars in thousands, except per share data)	2002	2001	2000
Basic earnings per share computation			
Numerator:			
Income available to common stockholders	\$ 33,283	\$ 28,705	\$ 19,434
Denominator:			
Weighted average common shares outstanding	15,931	16,410	17,834
Basic earnings per share	\$ 2.09	\$ 1.75	\$ 1.09
Diluted earnings per share computation			
Numerator:			
Income available to common stockholders	\$ 33,283	\$ 28,705	\$ 19,434
Denominator:			
Weighted average common shares outstanding	15,931	16,410	17,834
Incremental shares from conversion of options	395	350	298
	16,326	16,760	18,132
Diluted earnings per share	\$ 2.04	\$ 1.72	\$ 1.07

20. CONTINGENT LIABILITIES AND OTHER COMMITMENTS

The Company and its subsidiary are involved in legal actions arising in the ordinary course of business. Management, after consultation with legal counsel, believes the ultimate disposition of those matters will not have a material adverse effect on the Company's consolidated financial statements.

In the normal course of business, there are outstanding contingent liabilities and other commitments, such as unused letters of credit, items held for collections and unsold traveler's checks, which are not reflected in the accompanying consolidated financial statements. Management does not anticipate any material losses as a result of these transactions.

21. FINANCIAL INSTRUMENTS WITH OFF-BALANCE SHEET RISK

The Bank is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby letters of credit and financial guarantees written, and forward foreign exchange contracts. Those instruments involve, to varying degrees, elements of credit, interest rate and foreign exchange risk in excess of the amounts recognized in the consolidated balance sheets. The contract or notional amounts of those instruments reflect the extent of involvement the Bank has in particular classes of financial instruments.

The Bank's exposure to credit loss in the event of nonperformance by the counterparty to the financial instrument for commitments to extend credit and standby letters of credit and financial guarantees written is represented by the contractual amount of those instruments. For forward foreign exchange contracts, the contract amounts do not represent exposure to credit loss. The Bank controls the credit risk of its forward foreign exchange contracts through credit approvals, limits and monitoring procedures. The Bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments.

At December 31, 2002 and 2001 financial instruments with off-balance sheet risk were as follows:

(Dollars in thousands)	2002	2001
Financial instruments whose contract amounts represent credit risk:		
Commitments to extend credit	\$ 342,357	\$ 328,524
Standby letters of credit and financial guarantees written	18,273	18,164
Financial instruments whose contract amounts exceed the amount of credit risk:		
Forward foreign exchange contracts		89

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Bank evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary, is based on Management's credit evaluation of the counterparty. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment, and income-producing commercial properties.

Standby letters of credit and financial guarantees written are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Bank holds collateral supporting those commitments for which collateral is deemed necessary.

Forward foreign exchange contracts represent commitments to purchase or sell foreign currencies at a future date at a specified price. Risks arise from the possible inability of counterparties to meet the terms of their contracts and from movements in foreign currency exchange rates.

22. FAIR VALUE OF FINANCIAL INSTRUMENTS

SFAS No. 107, Disclosures about Fair Value of Financial Instruments, as amended by SFAS No. 119, requires that the Company disclose estimated fair values for its financial instruments. Fair value estimates, methods and assumptions are set forth below for the Company's financial instruments.

Short-Term Financial Instruments

The carrying values of short-term financial instruments are deemed to approximate fair values. Such instruments are considered readily convertible to cash and include cash and due from banks, interest-bearing deposits in other banks, Federal funds sold, accrued interest receivable, due from customers on acceptances, short-term borrowings, bank acceptances outstanding and accrued interest payable.

Investment Securities

The fair value of investment securities is based on market price quotations received from securities dealers. Where quoted market prices are not available, fair values are based on quoted market prices of comparable securities. The equity investment in common stock of the FHLB, which is redeemable for cash at par value, is reported at its par value.

Loans

The fair value of loans is estimated based on discounted cash flows of portfolios of loans with similar financial characteristics including the type of loan, interest terms and repayment history. The fair value of loans is calculated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates that reflect the credit and interest rate

risks inherent in the loans. Assumptions regarding credit risk, cash flows, and discount rates are judgmentally determined using available market information and specific borrower information.

Deposit Liabilities

The fair values of deposits with no stated maturity, such as noninterest-bearing demand deposits and interest-bearing demand and savings accounts, are equal to the amount payable on demand. The fair value of time deposits is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities.

Long-Term Debt

The fair value of FHLB advances is estimated by discounting scheduled cash flows over the contractual borrowing period at the estimated market rate for similar borrowing arrangements.

Off-Balance Sheet Financial Instruments

The fair values of off-balance financial instruments are estimated based on the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties, current settlement values or quoted market prices of comparable instruments.

Limitations

Fair value estimates are made at a specific point in time based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Bank's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Bank's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Fair value estimates are based on existing on- and off-balance sheet financial instruments without attempting to estimate the value of future business and the value of assets and liabilities that are not considered financial instruments. For example, significant assets and liabilities that are not considered financial assets or liabilities include deferred tax assets, premises and equipment and intangible assets. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in many of the estimates.

23. DECLARATION OF DIVIDENDS AND DIVIDEND POLICY

The Company's board of directors, at a meeting held on December 17, 2002, declared a fourth quarter cash dividend of \$0.11 per share, in addition to the three quarterly cash dividends previously declared, for a total of \$0.40 per share for the year ended December 31, 2002.

The Company and its predecessor have paid regular semi-annual cash dividends on the common stock since 1958. Beginning in 1988, the Company commenced paying regular quarterly cash dividends. It is the present intention of the Company's board of directors to continue to pay regular quarterly cash dividends. However, since substantially all of the funds available for the payment of dividends are derived from Central Pacific Bank, future dividends will depend upon the Bank's earnings, its financial condition, its capital needs, applicable governmental policies and regulations and such other matters as the Company's board of directors may deem to be appropriate.

24. SEGMENT INFORMATION

The Company has two reportable segments: financial services and treasury. The segments reported are consistent with internal functional reporting lines. They are managed separately

because each unit has different target markets, technological requirements, marketing strategies and specialized skills. The financial services segment includes retail branch offices, corporate lending, construction and real estate development lending, residential mortgage lending, trust services and international banking services. A full range of deposit and loan products, and various other banking services is offered. The treasury segment is responsible for managing the Company's investment securities portfolio and wholesale funding activities

The all others category includes Central Business Club of Honolulu and activities such as mortgage servicing, electronic banking, investment services and management of bank owned properties.

The accounting policies of the segments are consistent with those described in note 1. The majority of the Company's net income is derived from net interest income. Accordingly, Management focuses primarily on net interest income (expense), rather than gross interest income and expense amounts, in evaluating segment profitability. Intersegment net interest income (expense) is allocated to each segment based on the amount of net investable funds provided (used) by that segment at a rate equal to the Bank's average rate on interest-sensitive assets and liabilities. All administrative and overhead expenses are allocated to the segments at cost. Cash, investment securities, loans and their related balances are allocated to the segment responsible for acquisition and maintenance of those assets. Segment assets also include all premises and equipment used directly in segment operations.

Segment profits (losses) and assets are provided in the following table for the periods indicated:

Edgar Filing: CENTRAL PACIFIC FINANCIAL CORP - Form 10-K/A

25. PARENT COMPANY AND REGULATORY RESTRICTIONS

The Bank, as a Hawaii state-chartered bank, is prohibited from declaring or paying dividends greater than its retained earnings. As of December 31, 2002, retained earnings of the Bank totaled \$126,349,000.

Section 131 of the Federal Deposit Insurance Corporation Improvement Act (FDICIA) required the Federal Reserve Board, the Federal Deposit Insurance Corporation, the Comptroller of the Currency and the Office of Thrift Supervision (collectively, the Agencies) to develop a mechanism to take prompt corrective action to resolve the problems of insured depository institutions. The final rules to implement FDICIA s Prompt Corrective Action provisions established minimum regulatory capital standards to determine an insured depository institution s capital category. However, the Agencies may impose higher minimum standards on individual institutions or may downgrade an institution from one capital category to a lower capital category because of safety and soundness concerns.

The Prompt Corrective Action provisions impose certain restrictions on institutions that are undercapitalized. The restrictions become increasingly more severe as an institution s capital category declines from undercapitalized to critically undercapitalized. As of December 31, 2002 and 2001, the Bank s regulatory capital ratios exceeded the minimum thresholds for a well-capitalized institution.

The following table sets forth actual and required capital and capital ratios for the Company and the Bank as of the dates indicated:

(Dollars in thousands)	Actual		Minimum required for capital adequacy purposes		Minimum required to be well-capitalized	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
Company

26. ACCOUNTING PRONOUNCEMENTS

In June 2001, the Financial Accounting Standards Board (FASB) issued SFAS No. 142, Goodwill and Other Intangible Assets. SFAS No. 142 supersedes APB Opinion No. 17, Intangible Assets , and provides accounting and reporting guidance on intangible assets acquired individually or with a group of other assets (but not those acquired in a business combination). The provisions of SFAS No. 142 are to be applied starting with fiscal years beginning after December 15, 2001. The application of SFAS No. 142 did not have a material impact on the Company s consolidated financial statements.

In June 2001, the FASB issued SFAS No. 143, *Accounting for Asset Retirement Obligations*. SFAS No. 143 provides accounting and reporting guidance on obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. The provisions of SFAS No. 143 are effective for fiscal years beginning after June 15, 2002. The application of SFAS No. 143 is not expected to have a material impact on the Company's consolidated financial statements.

In August 2001, the FASB issued SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. SFAS No. 144 supersedes SFAS No. 121, *Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of*, and the accounting and reporting provisions of APB Opinion No. 30, *Reporting the Results of Operations - Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*, for the disposal of a segment of a business (as previously defined in that opinion). It also amends Accounting Research Bulletin No. 51, *Consolidated Financial Statements*, to eliminate the exception to consolidation for a subsidiary for which control is likely to be temporary. The provisions of SFAS No. 144 are effective for fiscal years beginning after December 15, 2001, and interim periods within those fiscal years. The application of SFAS No. 144 did not have a material impact on the Company's consolidated financial statements.

In April 2002, the FASB issued SFAS No. 145, *Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections*. SFAS No. 145 rescinds SFAS No. 4, which required all gains and losses from extinguishment of debt to be aggregated and, if material, classified as an extraordinary item, net of related income tax effect. As a result, the criteria for APB Opinion No. 30 will now be used to classify those gains and losses. SFAS No. 64 amended SFAS No. 4, and is no longer necessary because SFAS No. 4 has been rescinded. SFAS No. 44 was issued to establish accounting requirements for the effects of transition to the provisions of the Motor Carrier Act of 1980. Because the transition has been completed, SFAS No. 44 is no longer necessary. SFAS No. 145 amends SFAS No. 13 to require that certain lease modifications that have economic effects similar to sale-leaseback transactions be accounted for in the same manner as sale-leaseback transactions. SFAS No. 145 also makes technical corrections to existing pronouncements. The application of SFAS No. 145 did not have a material impact on the Company's consolidated financial statements.

In June 2002, the FASB issued SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*. SFAS No. 146 addresses financial accounting and reporting for costs associated with exit or disposal activities. It nullifies the Emerging Issues Task Force (EITF) Issue No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)*. SFAS No. 146 requires that a liability be recognized for those costs only when the liability is incurred, that is, when it meets the definition of a liability in the FASB's conceptual framework. It also establishes fair value as the objective for initial measurement of liabilities related to exit or disposal activities. The provisions of SFAS No. 146 are effective for exit or disposal activities that are initiated after December 31, 2002. The application of SFAS No. 146 is not expected to have a material impact on the Company's consolidated financial statements.

In October 2002, the FASB issued SFAS No. 147, *Acquisitions of Certain Financial Institutions - an Amendment of FASB Statements No. 72 and 144 and FASB Interpretation No. 9*. SFAS No. 147 removes acquisitions of financial institutions, except for transactions between two or more mutual enterprises, from the scope of both SFAS No. 72 (*Accounting for Certain Acquisitions of Banking or Thrift Institutions*) and FASB Interpretation No. 9 (*Applying APB Opinions No. 16 and 17 When a Savings and Loan Association or a Similar Institution Is Acquired in a Business Combination Accounted for by the Purchase Method*), and requires that those transactions be accounted for in accordance with SFAS No. 141 and 142. The requirement in paragraph 5 of SFAS No. 72 is no longer applicable to acquisitions within the scope of SFAS No. 147. SFAS No. 147 also amends SFAS No. 144 to include in its scope long-term customer-relationship intangible assets of financial institutions such as depositor- and borrower-relationship intangible assets and credit cardholder intangible assets. Paragraph 5 of SFAS No. 147 is effective for acquisitions for which the date of acquisition is on or after October 1, 2002. The provision in paragraph 6 related to accounting for the impairment or disposal of certain long-term customer-relationship intangible assets are effective on October 1, 2002. Transition provisions for previously recognized unidentifiable intangible assets in paragraphs 8-14 are effective on October 1, 2002. The application of SFAS No. 147 did not have a material impact on the Company's consolidated financial statements.

In November 2002, the FASB issued FASB Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others*. This interpretation elaborates on the disclosures to be made by a guarantor in its interim and annual financial statements about its obligations under certain guarantees that it has issued. It also clarifies that a guarantor is required to recognize, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing the guarantee. It also incorporates, without change, the guidance of FASB Interpretation No. 34, *Disclosure of Indirect Guarantees of Indebtedness of Others*, which is being superseded. The initial recognition and initial measurement provisions of this interpretation are applicable on a prospective basis to guarantees issued or modified after December 31, 2002, irrespective of the guarantor's fiscal year-end. The disclosure requirements in this interpretation are effective for financial statements of interim or annual periods ending after December 15, 2002. The interpretive guidance incorporated without change from Interpretation No. 34 continues to be required for financial statements for fiscal years ending after June 15, 1981, the effective date of Interpretation No. 34. The application of Interpretation No. 45 did not have a material impact on the Company's consolidated financial statements.

In December 2002, the FASB issued SFAS No. 148, *Accounting for Stock-Based Compensation - Transition and Disclosure - an amendment of FASB Statement No. 123*. SFAS No. 148 provides alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. In addition, it amends the disclosure requirements of SFAS No. 123 to require prominent disclosures in both annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results. The Company has elected to continue to apply the provisions of APB Opinion No. 25 for its stock option plan and provide the disclosure provisions of SFAS No. 148.

In January 2003, the FASB issued FASB Interpretation No. 46, Consolidation of Variable Interest Entities. This interpretation of Accounting Research Bulletin No. 51, Consolidated Financial Statements, addresses consolidation by business enterprises of variable interest entities. It explains how to identify variable interest entities and how an enterprise assesses its interest in a variable interest entity to decide whether to consolidate that entity. It requires existing unconsolidated variable interest entities to be consolidated by their primary beneficiaries if the entities do not effectively disperse risks among parties involved. This interpretation applies immediately to variable interest entities created after January 31, 2003, and to variable interest entities in which an enterprise obtains an interest after that date. It applies in the first fiscal year or interim period beginning after June 15, 2003, to variable interest entities in which an enterprise holds a variable interest that it acquired before February 1, 2003. The interpretation applies to public enterprises as of the beginning of the applicable interim or annual period, and it applies to nonpublic enterprises as of the end of the applicable annual period. The application of Interpretation No. 46 is not expected to have a material impact on the Company's consolidated financial statements.

INDEPENDENT AUDITORS REPORT

The Shareholders and Board of Directors of CPB Inc.:

We have audited the accompanying consolidated balance sheets of CPB Inc. and subsidiary as of December 31, 2002 and 2001, and the related consolidated statements of income, changes in shareholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 2002. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of CPB Inc. and subsidiary as of December 31, 2002 and 2001, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2002 in conformity with accounting principles generally accepted in the United States of America.

Equity compensation plans not approved by security holders			
Total	730,172	\$ 5.76	1,183,984

Information concerning security ownership of certain beneficial owners and management is incorporated by reference from the sections entitled **INTRODUCTION - Principal Shareholders**, and **ELECTION OF DIRECTORS** of the Company's Proxy Statement, which is filed as Exhibit No. 99.3 to this Annual Report on Form 10-K.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Information concerning certain relationships and related transactions is incorporated by reference from the section entitled **ELECTION OF DIRECTORS - Certain Transactions** of the Company's Proxy Statement, which is filed as Exhibit No. 99.3 to this Annual Report on Form 10-K.

ITEM 14. CONTROLS AND PROCEDURES

Edgar Filing: CENTRAL PACIFIC FINANCIAL CORP - Form 10-K/A

Within the 90-day period prior to the filing of this report, an evaluation was carried out under the supervision and with the participation of the Company's management, including the Chief Executive Officer (CEO) and Chief Financial Officer (CFO), of the effectiveness of our disclosure controls and procedures. Based on that evaluation, the CEO and CFO have concluded that the Company's disclosure controls and procedures (as defined in Rules 13a-14(c) and 15d-14(c) promulgated under the Securities Exchange Act of 1934, as amended) are effective. Subsequent to the date of their evaluation, there were no significant changes in the Company's internal controls or in other factors that could significantly affect the disclosure controls.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES, AND REPORTS ON FORM 8-K

Certification of the Principal Executive Officer

Pursuant to 15 U.S.C. 78m(a) of 78o(d),

As Adopted Pursuant to

Section 302 of the Sarbanes-Oxley Act of 2002

I, Clint L. Arnoldus, Chief Executive Officer of Central Pacific Financial Corp. (the Company), certify that:

- (1) I have reviewed this annual report on Form 10-K of the Company;
- (2) Based on my knowledge, this annual report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this annual report;
- (3) Based on my knowledge, the financial statements, and other financial information included in this annual report, fairly present in all material respects the financial condition, results of operations and cash flows of the Company as of, and for, the periods presented in this annual report;
- (4) The Company's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act rules 13a-14 and 15d-14) for the Company and we have:
 - (a) designed such disclosure controls and procedures to ensure that material information relating to the Company, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this annual report is being prepared;
 - (b) evaluated the effectiveness of the Company's disclosure controls and procedures as of a date within 90 days prior to the filing date of this annual report (the Evaluation Date); and
 - (c) presented in this annual report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;

(5) The Company's other certifying officers and I have disclosed, based on our most recent evaluation, to the Company's auditors and the audit committee of the Company's board of directors (or persons performing the equivalent functions):

(a) all significant deficiencies in the design or operation of internal controls which could adversely affect the Company's ability to record, process, summarize and report financial data and have identified for the Company's auditors any material weaknesses in internal controls; and

(b) any fraud, whether or not material, that involves management or other employees who have a significant role in the Company's internal controls; and

(6) The Company's other certifying officers and I have indicated in this annual report whether there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
