Item 8.01 Other Events.

On August 22, 2011, we announced that Health Canada has approved INCIVEK (telaprevir) tablets for a broad group of people with genotype 1 chronic hepatitis C with compensated liver disease, including cirrhosis. INCIVEK is approved in Canada for use in combination with pegylated-interferon and ribavirin, two other medicines approved to treat hepatitis C, and is indicated for people who are new to treatment, and for people who were treated previously but who did not achieve a sustained viral response. INCIVEK is approved in Canada for use in all three major groups of people who did not achieve a viral cure despite prior treatment including: relapsers, partial responders and null responders.
