(Title of Class)

Indicate the number of outstanding shares of each of the issuer s classes of capital or common stock as of the close of the period covered by the annual report.

As at March 31, 2013, 50,588,044 ordinary shares, par value 10 pence per share, were issued and outstanding, of which 49,947,822 ordinary shares were held in the form of American Depositary Shares, or ADSs. Each ADS represents one ordinary share.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

x Yes o No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

o Yes x No

Note Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those Sections.

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

x Yes o No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

o Yes o No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer o	Accelerated filer x	Non-accelerated filer o

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP o	International Financial Reporting Standards as issued by the International Accounting Standards Board x	Other o

If Other has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow: o Item 17 o Item 18

If this report is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). o Yes x No

CONVENTIONS USED IN THIS ANNUAL REPORT

In this annual report, references to US are to the United States of America, its territories and its possessions. References to UK are to the United Kingdom. References to India are to the Republic of India. References to China are to the People s Republic of China. References to South Africa are to the Republic of South Africa. References to $ or dollars or US dollars are to the legal currency of the US, references to rupees or Indian rupees are to the legal currency of India, references to pound sterling or £ are to the legal currency of the UK, references to pence are to the legal currency of Jersey, Channel Islands and references to Euro are to the legal currency of the European Monetary Union. Our financial statements are presented in US dollars. Prior to April 1, 2011, we prepared our financial statements in accordance with US generally accepted accounting principles, or US GAAP. With effect from April 1, 2011, we adopted the International Financial Reporting Standards and its interpretations, or IFRS , as issued by the International Accounting Standards Board, or the IASB . Our financial statements included in this annual report are prepared in accordance with IFRS, as issued by the IASB. Unless otherwise indicated, references to GAAP in this annual report are to IFRS, as issued by the IASB.

References to a particular fiscal year are to our fiscal year ended March 31 of that calendar year. Any discrepancies in any table between totals and sums of the amount listed are due to rounding.

In this annual report, unless otherwise specified or the context requires, the term WNS refers to WNS (Holdings) Limited, a public company incorporated under the laws of Jersey, Channel Islands, and the terms our company, we, our and us refer to WNS (Holdings) Limited and its subsidiaries.

In this annual report, references to Commission are to the United States Securities and Exchange Commission.

We also refer in various places within this annual report to revenue less repair payments, which is a non-GAAP financial measure that is calculated as (a) revenue less (b) in our auto claims business, payments to repair centers (1) for fault repair cases where we act as the principal in our dealings with the third party repair centers and our clients and (2) for non fault repair cases with respect to one client (whose contract with us has been terminated with effect from April 18, 2012) as more fully explained in Part I Item 5. Operating and Financial Review and Prospects Overview. This non-GAAP financial information is not meant to be considered in isolation or as a substitute for our financial results prepared in accordance with GAAP.

We also refer to information regarding the business process outsourcing, or BPO, industry, our company and our competitors from market research reports, analyst reports and other publicly available sources. Although we believe that this information is reliable, we have not independently verified the accuracy and completeness of the information. We caution you not to place undue reliance on this data.

This annual report also includes information regarding the business process outsourcing market from (1) the *Worldwide Offshore Key Horizontal BPO Services 2012-2016 Forecast* report dated November 2012 and the *Worldwide and U.S. Business Process Outsourcing Services 2012-2016 Forecast* report dated May 2012 by International Data Corporation, or IDC (which we refer to herein collectively as the IDC 2012 Reports), and (2) the *Quarterly Industry Review* report dated December 2012 by the National Association of Software and Services Companies, or NASSCOM, an industry association in India (which we refer to herein as the NASSCOM 2013 Report). The information contained in the IDC 2012 Reports and the NASSCOM 2013 Report represent data, research opinions or viewpoints published by IDC and by NASSCOM, respectively, and are not representations of fact. Each of the IDC 2012 Reports and the NASSCOM 2013 Report speaks as of its original publication date (and not as of the date of this annual report) and the opinions expressed in such reports are subject to change without notice.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This annual report contains forward-looking statements that are based on our current expectations, assumptions, estimates and projections about our company and our industry. The forward-looking statements are subject to various risks and uncertainties. Generally, these forward-looking statements can be identified by the use of forward-looking terminology such as anticipate, believe, estimate, expect, intend, will, project should and similar expressions. Those statements include, among other things, the discussions of our business strategy and expectations concerning our market position, future operations, margins, profitability, liquidity and capital resources, tax assessment orders and future capital expenditures. We caution you that reliance on any forward-looking statement inherently involves risks and uncertainties, and that although we believe that the assumptions on which our forward-looking statements are based are reasonable, any of those assumptions could prove to be inaccurate, and, as a result, the forward-looking statements based on those assumptions could be materially incorrect. These risks and uncertainties include but are not limited to:

Table of Contents

- worldwide economic and business conditions;
- political or economic instability in the jurisdictions where we have operations;
- regulatory, legislative and judicial developments;
- our ability to attract and retain clients;
- technological innovation;
- telecommunications or technology disruptions;
- future regulatory actions and conditions in our operating areas;
- our dependence on a limited number of clients in a limited number of industries;
- our ability to expand our business or effectively manage growth;
- our ability to hire and retain enough sufficiently trained employees to support our operations;
- negative public reaction in the US or the UK to offshore outsourcing;
- the effects of our different pricing strategies or those of our competitors;
- increasing competition in the business process outsourcing industry;

- our ability to successfully grow our revenue, expand our service offerings and market share and achieve accretive benefits from our acquisition of (1) Fusion Outsourcing Services (Proprietary) Limited, or Fusion (which we have renamed as WNS Global Services SA (Pty) Ltd following our acquisition) or (2) Aviva Global Services Singapore Pte. Ltd., or Aviva Global (which we have renamed as WNS Customer Solutions (Singapore) Private Limited, or WNS Global Singapore, following our acquisition) and our master services agreement with Aviva Global Services (Management Services) Private Limited, or Aviva MS, as described below;

- our liability arising from fraud or unauthorized disclosure of sensitive or confidential client and customer data;

- our ability to successfully consummate and integrate strategic acquisitions; and

- volatility of our ADS price.

These and other factors are more fully discussed in Part I Item 3. Key Information D. Risk Factors, Part I Item 5. Operating and Financial Review and Prospects and elsewhere in this annual report. In light of these and other uncertainties, you should not conclude that we will necessarily achieve any plans, objectives or projected financial results referred to in any of the forward-looking statements. Except as required by law, we do not undertake to release revisions of any of these forward-looking statements to reflect future events or circumstances.

PART I

ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISERS

Not applicable.

ITEM 2. OFFER STATISTICS AND EXPECTED TIMETABLE

Not applicable.

ITEM 3. KEY INFORMATION

A. Selected Financial Data

Our consolidated financial statements as at and for the years ended March 31, 2013, March 31, 2012 and March 31, 2011 included in this annual report have been prepared in conformity with IFRS, as issued by the IASB. Our consolidated financial statements as at and for the year ended March 31, 2011 were originally prepared in accordance with US GAAP and were restated in accordance with IFRS for comparative purpose only.

The following selected financial data should be read in conjunction with Part I Item 5. Operating and Financial Review and Prospects and our consolidated financial statements included elsewhere in this annual report.

Table of Contents

The following selected consolidated statement of income data for fiscal 2013, 2012 and 2011 and selected consolidated statement of financial position data as at March 31, 2013 and March 31, 2012 have been derived from our audited consolidated financial statements included elsewhere in this annual report. The selected consolidated statement of financial position data as at March 31, 2011 have been derived from our audited consolidated financial statements which are not included in this annual report.

	For the year ended March 31,		
	2013	2012	2011
	(US dollars in millions, except share and per share data)		
Consolidated Statement of Income Data:			
Revenue(1)	$ 460.3	$ 474.1	$ 616.3
Cost of revenue(1)(2)	311.0	340.9	490.0
Gross profit	149.3	133.2	126.2
Operating expenses:

The following table sets forth for the periods indicated selected consolidated financial data, non-GAAP financial data and operating data:

	For the year ended March 31, 2013	2012	2011
	(US dollars in millions, except percentages and employee data)		
Other Consolidated Financial Data:			
Revenue	$ 460.3	$ 474.1	$ 616.3
Gross profit as a percentage of revenue	32.4%	28.1%	20.5%
Operating income as a percentage of revenue	6.5%	5.9%	4.8%
Non-GAAP Financial Data:			
Revenue less repair payments(9)	$ 436.1	$ 395.1	$ 369.4
Gross profit as a percentage of revenue less repair payments	34.2%	33.7%	34.2%
Operating income as a percentage of revenue less repair payments	6.9%	7.1%	8.0%
Operating Data:			
Number of employees (at year end)	25,520	23,874	21,523

Notes:

(1) During fiscal 2012, we re-negotiated contracts with certain of our clients and repair centers in the auto claims business, whereby the primary responsibility for providing the services is borne by the repair centers instead of us and the credit risk that the client may not pay for the services is no longer borne by us. As a result of these changes, we are no longer considered to be the principal in providing the services. Accordingly, we no longer account for the amount received from these clients for payments to repair centers and the payments made to repair centers for cases referred by these clients as revenue and cost of revenue, respectively, resulting in lower revenue and cost of revenue. The contract re-negotiation process is ongoing and aimed at simplifying our accounting requirements.

Table of Contents

(2) Includes the following share-based compensation amounts:

	For the year ended March 31,		
	2013	2012	2011
	(US dollars in millions)		
Cost of revenue	$ 1.0	$ 1.0	$ 0.7
Selling and marketing expenses	$ 0.4	$ 0.4	$ 0.2
General and administrative expenses	$ 3.9	$ 3.9	$ 2.3

(3) Consists of funds held for clients, derivative assets and prepayments and other current assets.

(4) During the quarter ended March 31, 2013, the trade payables balance as at March 31, 2012 and 2011 have been revised to reflect an increase by $0.6 million, the deferred tax assets balance as at March 31, 2012 and 2011 have been revised to reflect an increase by $0.1 million and retained earnings as at March 31, 2012 and 2011 have been revised to reflect a decrease by $0.4 million, as discussed in note 2 (y) to our consolidated financial statements included elsewhere in this annual report.

(5) Consists of non-current portion of derivative assets and other non-current assets.

(6) Consists of provisions and accrued expenses, derivative liabilities, pension and other employee obligations, short term line of credit, deferred revenue, current taxes payable and other liabilities.

(7) Consists of non-current portion of derivatives liabilities, pension and other employee obligations, deferred revenue, deferred tax liabilities and other non-current liabilities.

(8) Consists of retained earnings and other components of equity.

(9) Revenue less repair payments is a non-GAAP financial measure which is calculated as (a) revenue less (b) in our auto claims business, payments to repair centers (1) for fault repair cases where we act as the principal in our dealings with the third party repair centers and our clients and (2) for non fault repair cases with respect to one client (whose contract with us has been terminated with effect from April 18, 2012) as discussed below in Part I Item 5. Operating and Financial Review and Prospects Overview and notes to our consolidated financial statements included elsewhere in this annual report. The following table reconciles our revenue (a GAAP financial measure) to revenue less repair payments (a non-GAAP financial measure) for the indicated periods:

	For the year ended March 31,		
	2013	2012	2011
	(US dollars in millions)		
Revenue (GAAP)	$ 460.3	$ 474.1	$ 616.3
Less: Payments to repair centers(a)	24.1	79.1	246.9
Revenue less repair payments (non-GAAP)	$ 436.1	$ 395.1	$ 369.4

Note:

(a) Consists of payments to repair centers in our auto claims business (1) for fault repair cases where we act as the principal in our dealings with the third party repair centers and our clients and (2) for non fault repair cases with respect to one client as discussed below.

We have two reportable segments for financial statement reporting purposes WNS Global BPO and WNS Auto Claims BPO. In our WNS Auto Claims BPO segment, we provide both fault and non fault repairs. For fault repairs, we provide claims handling and repair management services, where we arrange for automobile repairs through a network of third party repair centers. In our repair management services, where we act as the principal in our dealings with the third party repair centers and our clients, the amounts which we invoice to our clients for payments made by us to third party repair centers are reported as revenue. Where we are not the principal in providing the services, we record revenue from repair services net of repair cost. Since we wholly subcontract the repairs to the repair centers, we evaluate the financial performance of our fault repair business based on revenue less repair payments to third party repair centers, which is a non-GAAP financial measure. We believe that revenue less repair payments for fault repairs reflects more accurately the value addition of the business process outsourcing services that we directly provide to our clients.

For our non fault repairs business, we generally provide a consolidated suite of accident management services including credit hire and credit repair, and we believe that measurement of such business on a basis that includes repair payments in revenue is appropriate. Revenue including repair payments is therefore used as a primary measure to allocate resources and measure operating performance for accident management services provided in our non fault repairs business. For one client in our non fault repairs business (whose contract with us has been terminated with effect from April 18, 2012), we provide only repair management services where we wholly subcontract the repairs to the repair centers (similar to our fault repairs). Accordingly, we evaluate the financial performance of our business with this client in a manner similar to how we evaluate our financial performance for our fault repairs business, that is, based on revenue less repair payments. Our non fault repairs business where we provide accident management services accounts for a relatively small portion of our revenue for our WNS Auto Claims BPO segment.

Table of Contents

This non-GAAP financial information is not meant to be considered in isolation or as a substitute for our financial results prepared in accordance with GAAP. We believe that the presentation of this non-GAAP financial measure in this annual report provides useful information for investors regarding the financial performance of our business and our two reportable segments. Our revenue less repair payments may not be comparable to similarly titled measures reported by other companies due to potential differences in the method of calculation.

B. Capitalization and Indebtedness

Not Applicable.

C. Reason for the Offer and the Use of Proceeds

Not Applicable.

D. Risk Factors

This annual report contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of a number of factors, including those described in the following risk factors and elsewhere in this annual report. If any of the following risks actually occur, our business, financial condition and results of operations could suffer and the trading price of our ADSs could decline.

Risks Related to Our Business

The global economic conditions have been challenging and have had, and may continue to have, an adverse effect on the financial markets and the economy in general, which has had, and may continue to have, a material adverse effect on our business, our financial performance and the prices of our equity shares and ADSs.

Global economic conditions have been, and continue to be, challenging as certain adverse financial developments have caused a significant slowdown in the growth of the European, US and international financial markets, accompanied by a significant reduction in consumer and business spending worldwide. These adverse financial developments have included increased market volatility, tightening of liquidity in credit markets and diminished expectations for the global economy. Many key indicators of sustainable economic growth remain under pressure. Ongoing concerns over the pace of economic recovery in the US and its substantial debt burden, the ongoing European sovereign debt and economic crisis, the ability of certain countries to remain in the Eurozone, as well as concerns of slower economic growth in China and India, have contributed to increased volatility and diminished expectations for the European, US and global economies. The financial turmoil in Europe continues to be a threat to global capital markets and remains a challenge to global financial stability. If Greece, Ireland, Italy, Portugal and Spain or other countries require additional financial support or if sovereign credit ratings continue to decline, yields on the sovereign debt of certain countries may continue to increase, the cost of borrowing may increase and credit may become more limited. Even though the immediate negative impact on the US economy that could have resulted from a combination of certain tax increases and government budget cuts that were scheduled to become effective at the end of 2012 (commonly referred to as the fiscal cliff) were averted by the passing of the American Taxpayer Relief Act 2012 on January 1, 2013 and the suspension of the US debt ceiling through mid-May 2013, there continue to be concerns over the failure to achieve agreement on a long-term solution to the issues on government spending and its consequential impact on the increasing US national debt and rising debt ceiling, and its negative impact on the US economy. Further, there continue to be signs of economic weakness such as relatively high levels of unemployment in major markets including Europe and the US. Continuing conflicts and recent developments in North Korea, the Middle East, including Egypt, and Africa, may lead to additional acts of terrorism and armed conflict around the world, which may contribute to further economic instability in the global financial markets.

These economic conditions may affect our business in a number of ways. The general level of economic activity, such as decreases in business and consumer spending, could result in a decrease in demand for our services, thus reducing our revenue. The cost and availability of credit has been and may continue to be adversely affected by illiquid credit markets and wider credit spreads. Continued turbulence or uncertainty in the European, US and international financial markets and economies may adversely affect our liquidity and financial condition, and the liquidity and financial condition of our customers. If these market conditions continue or worsen, they may limit our ability to access financing or increase our cost of financing to meet liquidity needs, and affect the ability of our customers to use credit to purchase our services or to make timely payments to us, resulting in adverse effects on our financial condition and results of operations.

Furthermore, a weakening of the rate of exchange for the US dollar or the pound sterling (in which our revenue is principally denominated) against the Indian rupee (in which a significant portion of our costs are denominated) also adversely affects our results. Fluctuations between the pound sterling or the Indian rupee and the US dollar also expose us to translation risk when transactions denominated in pound sterling or Indian rupees are translated to US dollars, our reporting currency. For example, the pound sterling depreciated by 0.9% against the US dollar in fiscal 2013 as compared to the average exchange rate in fiscal 2012, and appreciated by 2.5% in fiscal 2012 as compared to the average exchange rate in fiscal 2011. Similarly, the Indian rupee depreciated by 13.5% against the US dollar in fiscal 2013 as compared to the average exchange rate in fiscal 2012, and depreciated by 5.2% in fiscal 2012 as compared to the average exchange rate in fiscal 2011.

Uncertainty about current global economic conditions could also continue to increase the volatility of our share price. We cannot predict the timing or duration of an economic slowdown or the timing or strength of a subsequent economic recovery generally or in our targeted industries, including the travel and insurance industry. If macroeconomic conditions worsen or the current global economic condition continues for a prolonged period of time, we are not able to predict the impact such worsening conditions will have on our targeted industries in general, and our results of operations specifically.

Table of Contents

A few major clients account for a significant portion of our revenue and any loss of business from these clients could reduce our revenue and significantly harm our business.

We have derived and believe that we will continue to derive in the near term a significant portion of our revenue from a limited number of large clients. In fiscal 2013 and 2012, our five largest clients accounted for 35.9% and 41.4% of our revenue and 37.9% and 40.5% of our revenue less repair payments, respectively. In fiscal 2013 and 2012, our three largest clients accounted for 30.8% and 34.1% of our revenue and 32.5% and 33.7% of our revenue less repair payments, respectively. In fiscal 2013, our largest client, Aviva International Holdings Limited, or Aviva, individually accounted for 16.9% and 17.8% of our revenue and revenue less repair payments, respectively, as compared to 17.3% and 20.7% in fiscal 2012, respectively. Any loss of business from any major client could reduce our revenue and significantly harm our business.

For example, in early 2012, as a result of concerns that the UK Competition Commission may ban the payment of referral fees by accident management companies to claims management companies and insurance companies in the provision of credit hire replacement vehicles and third-party vehicle repairs, one of our largest auto claims clients by revenue contribution in fiscal 2012 terminated its contract with us with effect from April 18, 2012. This client accounted for 10.4% and 7.5% of our revenue and 1.3% and 1.9% of our revenue less repair payments in fiscal 2012 and 2011, respectively. For more information, see Recent concerns over increases in car insurance premiums have led to investigations by the UK competition authority on whether any market practice, such as the payment of referral fees to accident management companies and insurance companies of non-fault drivers, restricts or distorts competition in connection with the provision of motor insurance, and also to the recent introduction of new laws banning the payment of referral fees for claims involving personal injury, which could have a material adverse effect on our non-fault repairs business in our auto claims business.

Our prior contracts with one of our major clients, Aviva, provided Aviva Global, which was Aviva s business process offshoring subsidiary, options to require us to transfer the relevant projects and operations of our facilities at Sri Lanka and Pune, India to Aviva Global. On January 1, 2007, Aviva Global exercised its call option requiring us to transfer the Sri Lanka facility to Aviva Global effective July 2, 2007. Effective July 2, 2007, we transferred the Sri Lanka facility to Aviva Global and we lost the revenue generated by the Sri Lanka facility. For the period from April 1, 2007 through July 2, 2007, the Sri Lanka facility contributed $2.0 million of revenue and in fiscal 2007, it accounted for 1.9% of our revenue and 3.0% of our revenue less repair payments. We may, in the future, enter into contracts with other clients with similar call options that may result in the loss of revenue that may have a material impact on our business, results of operations, financial condition and cash flows, particularly during the quarter in which the option takes effect.

We have, through our acquisition of Aviva Global in July 2008, resumed control of the Sri Lanka facility and we have continued to retain ownership of the Pune facility. Revenue from Aviva under our master services agreement with Aviva MS, or Aviva master services agreement, accounts for a significant portion of our revenue and we expect our dependence on Aviva to continue for the foreseeable future. The terms of the Aviva master services agreement provides for a committed amount of volume. However, notwithstanding the minimum volume commitment, there are also termination at will provisions which permit Aviva to terminate the agreement without cause with 180 days notice upon payment of a termination fee. These termination provisions dilute the impact of the minimum volume commitment.

In addition, the volume of work performed for specific clients is likely to vary from year to year, particularly since we may not be the exclusive outside service provider for our clients. Thus, a major client in one year may not provide the same level of revenue in any subsequent year. The loss of some or all of the business of any large client could have a material adverse effect on our business, results of operations, financial condition and cash flows. A number of factors other than our performance could cause the loss of or reduction in business or revenue from a client, and these factors are not predictable. For example, a client may demand price reductions, change its outsourcing strategy or move work in-house. A client may also be acquired by a company with a different outsourcing strategy that intends to switch to another business process outsourcing service provider or return work in-house.

Our revenue is highly dependent on clients concentrated in a few industries, as well as clients located primarily in Europe and the US. Economic slowdowns or factors that affect these industries or the economic environment in Europe or the US could reduce our revenue and seriously harm our business.

A substantial portion of our clients are concentrated in the insurance industry and the travel and leisure industry. In fiscal 2013 and 2012, 35.5% and 44.7% of our revenue, respectively, and 31.9% and 33.6% of our revenue less repair payments, respectively, were derived from clients in the insurance industry. During the same periods, clients in the travel and leisure industry contributed 20.5% and 18.8% of our revenue, respectively, and 21.5% and 22.6% of our revenue less repair payments, respectively. Our business and growth largely depend on continued demand for our services from clients in these industries and other industries that we may target in the future, as well as on trends in these industries to outsource business processes. Global economic conditions have been, and continue to be, challenging as certain adverse financial developments have caused a significant slowdown in the growth of the European, US and international financial markets, accompanied by a significant reduction in consumer and business spending worldwide. These adverse financial developments have included increased market volatility, tightening of liquidity in credit markets and diminished expectations for the global economy. Many key indicators of sustainable economic growth remain under pressure.

Table of Contents

Ongoing concerns over the pace of economic recovery in the US and its substantial debt burden, the ongoing European sovereign debt and economic crisis, the ability of certain countries to remain in the Eurozone, as well as concerns of slower economic growth in China and India, have contributed to increased volatility and diminished expectations for the European, US and global economies. The financial turmoil in Europe continues to be a threat to global capital markets and remains a challenge to global financial stability. If Greece, Ireland, Italy, Portugal and Spain or other countries require additional financial support or if sovereign credit ratings continue to decline, yields on the sovereign debt of certain countries may continue to increase, the cost of borrowing may increase and credit may become more limited. Even though the immediate negative impact on the US economy that could have resulted from a combination of certain tax increases and government budget cuts that were scheduled to become effective at the end of 2012 (commonly referred to as the fiscal cliff) were averted by the passing of the American Taxpayer Relief Act 2012 on January 1, 2013 and the suspension of the US debt ceiling through mid-May 2013, there continue to be concerns over the failure to achieve agreement on a long-term solution to the issues on government spending and its consequential impact on the increasing US national debt and rising debt ceiling, and its negative impact on the US economy. Further, there continue to be signs of economic weakness such as relatively high levels of unemployment in major markets including Europe and the US. Continuing conflicts and recent developments in North Korea, the Middle East, including Egypt, and Africa, may lead to additional acts of terrorism and armed conflict around the world, which may contribute to further economic instability in the global financial markets. Certain of our targeted industries are especially vulnerable to crises in the financial and credit markets and potential economic downturns. A downturn in any of our targeted industries, particularly the insurance or travel and leisure industries, a slowdown or reversal of the trend to outsource business processes in any of these industries or the introduction of regulation which restricts or discourages companies from outsourcing could result in a decrease in the demand for our services and adversely affect our results of operations. For example, as a result of the mortgage market crisis, in August 2007, FMFC, a US mortgage services client, filed a voluntary petition for relief under Chapter 11 of the US Bankruptcy Code. FMFC was a major client of Trinity Partners Inc. which we acquired in November 2005 from the First Magnus Group and became one of our major clients. In fiscal 2008 and 2007, First Magnus Financial Corporation, or FMFC accounted for 1.0% and 4.3% of our revenue, respectively, and 1.4% and 6.8% of our revenue less repair payments, respectively.

Further, the downturn in worldwide economic and business conditions has resulted in a few of our clients reducing or postponing their outsourced business requirements, which in turn has decreased the demand for our services and adversely affected our results of operations. In particular, our revenue is highly dependent on the economic environments in Europe and the US, which continue to show signs of economic weakness, such as relatively high levels of unemployment. In fiscal 2013 and 2012, 53.3% and 61.2% of our revenue, respectively, and 50.6% and 53.4% of our revenue less repair payments, respectively, were derived from clients located in the UK. During the same periods, 30.5% and 30.5% of our revenue, respectively, and 32.2% and 36.6% of our revenue less repair payments, respectively, were derived from clients located in North America (primarily the US). Further, during the same periods, 5.9% and 5.6% of our revenue, respectively, and 6.3% and 6.7% of our revenue less repair payments, respectively, were derived from clients in the rest of Europe. Any further weakening of the European or US economy will likely have a further adverse impact on our revenue.

Other developments may also lead to a decline in the demand for our services in these industries. Significant changes in the financial services industry or any of the other industries on which we focus, or a consolidation in any of these industries or acquisitions, particularly involving our clients, may decrease the potential number of buyers of our services. Any significant reduction in or the elimination of the use of the services we provide within any of these industries would result in reduced revenue and harm our business. Our clients may experience rapid changes in their prospects, substantial price competition and pressure on their profitability. Although such pressures can encourage outsourcing as a cost reduction measure, they may also result in increasing pressure on us from clients in these key industries to lower our prices which could negatively affect our business, results of operations, financial condition and cash flows.

We may fail to attract and retain enough sufficiently trained employees to support our operations, as competition for highly skilled personnel is significant and we experience significant employee attrition. These factors could have a material adverse effect on our business, results of operations, financial condition and cash flows.

The business process outsourcing industry relies on large numbers of skilled employees, and our success depends to a significant extent on our ability to attract, hire, train and retain qualified employees. The business process outsourcing industry, including our company, experiences high employee attrition. During fiscal 2013, 2012 and 2011, the attrition rate for our employees who have completed six months of employment with us was 35%, 38% and 43%, respectively. While our attrition rate for our employees who have completed six months of employment with us improved to 35% in fiscal 2013, we cannot assure you that our attrition rate will not increase. There is significant competition in the jurisdictions where our operation centers are located, including India, the Philippines and Sri Lanka, for professionals with the skills necessary to perform the services we offer to our clients. Increased competition for these professionals, in the business process outsourcing industry or otherwise, could have an adverse effect on us. A significant increase in the attrition rate among employees with specialized skills could decrease our operating efficiency and productivity and could lead to a decline in demand for our services.

In addition, our ability to maintain and renew existing engagements and obtain new business will depend largely on our ability to attract, train and retain personnel with skills that enable us to keep pace with growing demands for outsourcing, evolving industry standards and changing client preferences. Our failure either to attract, train and retain personnel with the qualifications necessary to fulfill the needs of our existing and future clients or to assimilate new employees successfully could have a material adverse effect on our business, results of operations, financial condition and cash flows.

Table of Contents

If we fail to maintain an effective system of internal control over financial reporting, we may not be able to accurately report our financial results or prevent or detect fraud. As a result, current and potential investors could lose confidence in our financial reporting, which could harm our business and have an adverse effect on our ADS price.

Effective internal control over financial reporting is necessary for us to provide reliable financial reports. The effective internal controls together with adequate disclosure controls and procedures are designed to prevent or detect fraud. Deficiencies in our internal controls may adversely affect our management s ability to record, process, summarize, and report financial data on a timely basis. As a public company, we are required by Section 404 of the Sarbanes-Oxley Act of 2002 to include a report of management s assessment on our internal control over financial reporting and an auditor s attestation report on our internal control over financial reporting in our annual report on Form 20-F.

Although management concluded that our company s disclosure controls and procedures and internal control over financial reporting were effective as at March 31, 2013 and 2012, it is possible that, in the future, material weaknesses could be identified in our internal controls over financial reporting and we could be required to further implement remedial measures. If we fail to maintain effective disclosure controls and procedures or internal control over financial reporting, we could lose investor confidence in the accuracy and completeness of our financial reports, which could have a material adverse effect on our ADS price.

Any changes in accounting standards can be difficult to predict and can materially impact how we report our financial results.

We have adopted IFRS, as issued by the IASB, with effect from April 1, 2011. From time to time, the IASB changes its standards that govern the preparation of our financial statements. For example, the IASB has proposed amendments to its standards that govern hedge accounting, and these amendments, if adopted as proposed, would significantly change the way option contracts are accounted for. There is no assurance that the amendments will be adopted as proposed or at all or on the timing of any such amendments. Changes in accounting standards are difficult to anticipate and can significantly impact our reported financial condition and the results of our operations.

We may be unable to effectively manage our growth and maintain effective internal controls, which could have a material adverse effect on our operations, results of operations and financial condition.

Since we were founded in April 1996, and especially since Warburg Pincus acquired a controlling stake in our company in May 2002, we have experienced growth and significantly expanded our operations. Our employees have increased to 25,520 as at March 31, 2013 from 15,084 as at March 31, 2007. In January 2008, we established a new delivery center in Romania, which we expanded in fiscal 2011. Our subsidiary, WNS Philippines Inc., established a delivery center in the Philippines in April 2008, which it expanded in fiscal 2010. Additionally, in fiscal 2010, we established a new delivery center in Costa Rica and streamlined our operations by consolidating our production capacities in various delivery centers in Bangalore, Mumbai and Pune. In fiscal 2013 we opened new facilities in Poland and Vishakhapatnam, or Vizag. We also expect our delivery center in South Carolina, US to be fully operational in fiscal 2014. We now have delivery centers across 9 countries in Costa Rica, India, the Philippines, Poland, Romania, South Africa, Sri Lanka, the UK and the US, including a subcontractor s delivery center in China. Further, in February 2011, we received in-principle approval for the allotment of a piece of land on lease for a term of 99 years, measuring 5 acres in Tiruchirapalli Navalpattu, special economic zone, or SEZ, in the state of Tamil Nadu, India from Electronics Corporation of Tamil Nadu Limited (ELCOT) for setting up delivery centers in future. We intend to further expand our global delivery capability, and we are exploring plans to do so in Asia Pacific and Latin America.

We have also completed numerous acquisitions. For example, in June 2012, we acquired Fusion, a leading BPO provider based in South Africa. Fusion provides a range of outsourcing services, including contact center, customer care and business continuity services, to both South African and international clients. With operations in Cape Town and Johannesburg, Fusion employed approximately 1,500 people as at June 30, 2012, which increased to 2,169 people as at March 31, 2013. In July 2008, we entered into a transaction with Aviva consisting of (1) a share sale and purchase agreement pursuant to which we acquired from Aviva all the shares of Aviva Global and (2) the Aviva master services agreement with Aviva MS pursuant to which we are providing BPO services to Aviva s UK business and Aviva s Irish subsidiary, Hibernian Aviva Direct Limited, and certain of its affiliates. Aviva Global was the business process offshoring subsidiary of Aviva. Through our acquisition of Aviva Global, we also added three facilities in Bangalore, Chennai and Sri Lanka in July 2008, and one facility in Pune in August 2008.

This growth places significant demands on our management and operational resources. In order to manage growth effectively, we must implement and improve operational systems, procedures and internal controls on a timely basis. If we fail to implement these systems, procedures and controls on a timely basis, we may not be able to service our clients needs, hire and retain new employees, pursue new business, complete future acquisitions or operate our business effectively. Failure to effectively transfer new client business to our delivery centers, properly budget transfer costs or accurately estimate operational costs associated with new contracts could result in delays in executing client contracts, trigger service level penalties or cause our profit margins not to meet our expectations or our historical profit margins. As a result of any of these problems associated with expansion, our business, results of operations, financial condition and cash flows could be materially and adversely affected.

Table of Contents

We may face difficulties as we expand our operations to establish delivery centers in onshore locations in the US and offshore in countries in which we have limited or no prior operating experience.

In June 2012, we acquired Fusion, a leading BPO provider with two delivery centers in South Africa. In May 2012, we announced our plans to establish a new delivery center in South Carolina in the US, which will be our first delivery center in North America. We expect this new delivery center to be fully operational in fiscal 2014. We intend to continue to expand our global footprint in order to maintain an appropriate cost structure and meet our clients delivery needs. We plan to establish additional onshore delivery centers in the US and offshore delivery centers in Africa, the Asia Pacific and Latin America, which may involve expanding into countries other than those in which we currently operate. We have limited prior experience in operating onshore delivery centers in the US. Our expansion plans may also involve expanding into less developed countries, which may have less political, social or economic stability and less developed infrastructure and legal systems. As we expand our business into new countries we may encounter regulatory, personnel, technological and other difficulties that increase our expenses or delay our ability to start up our operations or become profitable in such countries. This may affect our relationships with our clients and could have an adverse effect on our business, results of operations, financial condition and cash flows.

Our loan agreements impose operating and financial restrictions on us and our subsidiaries.

Our loan agreements contain a number of covenants and other provisions that, among other things, impose operating and financial restrictions on us and our subsidiaries. These restrictions could put a strain on our financial position. For example:

- they may increase our vulnerability to general adverse economic and industry conditions;
- they may require us to dedicate a substantial portion of our cash flow from operations to payments on our loans, thereby reducing the availability of our cash flow to fund capital expenditure, working capital and other general corporate purposes;
- they may require us to seek lenders consent prior to paying dividends on our ordinary shares;
- they may limit our ability to incur additional borrowings or raise additional financing through equity or debt instruments;
- they impose certain financial covenants on us that we may not be able to meet, which may cause the lenders to accelerate the repayment of the balance loan outstanding; and
- a reduction in revenue by more than 10% in two succeeding quarters due to a change in the largest shareholder of the company may also constitute an event of default under certain of our loan agreements.

Further, the restrictions contained in our loan agreements could limit our ability to plan for or react to market conditions, meet capital needs or make acquisitions or otherwise restrict our activities or business plans. Our ability to comply with the covenants of our loan agreements may be affected by events beyond our control, and any material deviations from our forecasts could require us to seek waivers or amendments of covenants or alternative sources of financing or to reduce expenditures. We cannot assure you that such waivers, amendments or alternative financing could be obtained, or if obtained, would be on terms acceptable to us.

To service our indebtedness and other potential liquidity requirements, we will require a significant amount of cash. Our ability to generate cash depends on many factors beyond our control and we may need to access the credit market to meet our liquidity requirements.

Our ability to make payments on our loans and to fund planned capital expenditures will depend on our ability to generate cash in the future. This, to a large extent, is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. Furthermore, given that the uncertainty over global economic conditions remains, there can be no assurance that our business activity will be maintained at our expected level to generate the anticipated cash flows from operations or that our credit facilities would be available or sufficient. If global economic uncertainties continue, we may experience a decrease in demand for our services, resulting in our cash flows from operations being lower than anticipated. This may in turn result in our need to obtain additional financing.

If we cannot service our loan agreements, we may have to take actions such as seeking additional equity or reducing or delaying capital expenditures, strategic acquisitions and investments. We cannot assure you that any such actions, if necessary, could be effected on commercially reasonable terms or at all.

The international nature of our business exposes us to several risks, such as significant currency fluctuations and unexpected changes in the regulatory requirements of multiple jurisdictions.

We have operations in Costa Rica, India, the Philippines, Poland, Romania, South Africa, Sri Lanka, the UK and the US, and we service clients across Asia, Europe, and North America. Our corporate structure also spans multiple jurisdictions, with our parent holding company incorporated in Jersey, Channel Islands, and intermediate and operating subsidiaries incorporated in Australia, Costa Rica, India, Mauritius, the Netherlands, the Philippines, Romania, South Africa, Singapore, Sri Lanka, the United Arab Emirates, the UK and the US. As a result, we are exposed to risks typically associated with conducting business internationally, many of which are beyond our control. These risks include:

Table of Contents

- significant currency fluctuations between the US dollar and the pound sterling (in which our revenue is principally denominated) and the Indian rupee (in which a significant portion of our costs are denominated);
- legal uncertainty owing to the overlap of different legal regimes, and problems in asserting contractual or other rights across international borders;
- potentially adverse tax consequences, such as scrutiny of transfer pricing arrangements by authorities in the countries in which we operate;
- potential tariffs and other trade barriers;
- unexpected changes in regulatory requirements;
- the burden and expense of complying with the laws and regulations of various jurisdictions; and
- terrorist attacks and other acts of violence or war.

The occurrence of any of these events could have a material adverse effect on our results of operations and financial condition.

Currency fluctuations among the Indian rupee, the pound sterling and the US dollar could have a material adverse effect on our results of operations.

Although substantially all of our revenue is denominated in pound sterling or US dollars, a significant portion of our expenses (other than payments to repair centers, which are primarily denominated in pound sterling) are incurred and paid in Indian rupees. We report our financial results in US dollars and our results of operations would be adversely affected if the Indian rupee appreciates against the US dollar or the pound sterling depreciates against the US dollar. The exchange rates between the Indian rupee and the US dollar and between the pound sterling and the US dollar have changed substantially in recent years and may fluctuate substantially in the future.

The average Indian rupee/US dollar exchange rate was approximately 54.38 per $1.00 in fiscal 2013, which represented a depreciation of the Indian rupee of 13.5% as compared with the average exchange rate of approximately 47.93 per $1.00 in fiscal 2012, which in turn represented a depreciation of the Indian rupee of 5.2% as compared with the average exchange rate of approximately 45.57 per $1.00 in fiscal 2011. The average pound sterling/US dollar exchange rate was approximately £0.63 per $1.00 in fiscal 2013, which represented a depreciation of the pound sterling of 0.9% as compared with the average exchange rate of approximately £0.63 per $1.00 in fiscal 2012, which in turn represented an appreciation of the pound sterling of 2.5% as compared with the average exchange rate of approximately £0.64 per $1.00 in fiscal 2011.

Our results of operations may be adversely affected if the Indian rupee appreciates significantly against the pound sterling or the US dollar or if the pound sterling depreciates against the US dollar. We hedge a portion of our foreign currency exposures using options and forward contracts. We cannot assure you that our hedging strategy will be successful or will mitigate our exposure to currency risk.

Recent concerns over increases in car insurance premiums have led to investigations by the UK competition authority on whether any market practice, such as the payment of referral fees to accident management companies and insurance companies of non-fault drivers, restricts or distorts competition in connection with the provision of motor insurance, and also to the recent introduction of new laws banning

the payment of referral fees for claims involving personal injury, which could have a material adverse effect on our non-fault repairs business in our auto claims business.

A number of aspects of the motor insurance sector are currently under review in the UK. The UK Office of Fair Trading, or the OFT, has conducted a market study of the UK private motor insurance market to investigate increases in car insurance premiums over the past two years. The study focused on the provision of repairs and replacement vehicles to drivers involved in road traffic accidents which were not their fault (or non-fault drivers). The OFT has provisionally decided that there are reasonable grounds to suspect that credit hire replacement vehicle arrangements and third-party vehicle repair arrangements for non-fault drivers are two factors that may be driving up insurance premiums. The OFT s market study has provisionally found that the practice of the payment of referral fees by accident management companies to claims management companies and insurance companies in the arrangements for the provision of credit hire replacement vehicles and third-party vehicle repairs to non-fault drivers appear to be inflating the cost of insurance claims. As a result, the OFT has provisionally decided to refer the matter to the UK Competition Commission for a more detailed investigation. The UK Competition Commission has the power to impose remedies or recommend legislative changes that could include a ban on the payment of referral fees in such arrangements.

In May 2012, the UK Legal Aid, Sentencing and Punishment of Offenders Act 2012, or the LASPO Act, was adopted. The provisions of the LASPO Act that prohibit the payment and receipt of referral fees by regulated professionals, such as solicitors, barristers, claims management companies and insurers, for claims involving personal injury, came into force in April 2013. The implementation of the ban on referral fees for claims involving personal injury cases pursuant to the LASPO Act is expected to have, and any other similar bans or restrictions imposed in future would likely have, a material adverse effect on the business of clients that are dependent on such referral fees. In turn, this would likely result in a loss of all or a material portion of the accident management services that we provide these clients in our non-fault repairs business. One of our largest auto claims clients by revenue contribution in fiscal 2012 that generates significant revenues through referral fees has terminated its contract with us with effect from April 18, 2012. This client accounted for 10.4% and 7.5% of our revenue and 1.3% and 1.9% of our revenue less repair payments in fiscal 2012 and 2011, respectively. We may lose some or all of the business from other clients that may be adversely affected by a ban on such referral fees.

Table of Contents

Our business may not develop in ways that we currently anticipate due to negative public reaction to offshore outsourcing, proposed legislation or otherwise.

We have based our strategy of future growth on certain assumptions regarding our industry, services and future demand in the market for such services. However, the trend to outsource business processes may not continue and could reverse. Offshore outsourcing is a politically sensitive topic in the UK, the US and elsewhere. For example, many organizations and public figures in the UK and the US have publicly expressed concern about a perceived association between offshore outsourcing providers and the loss of jobs in their home countries.

Such concerns have led to proposed measures in the US that are aimed at limiting or restricting outsourcing. There is also legislation that has been enacted or is pending at the state level in the US, with regard to limiting outsourcing. The measures that have been enacted to date are generally directed at restricting the ability of government agencies to outsource work to offshore business service providers. These measures have not had a significant effect on our business because governmental agencies are not a focus of our operations. However, some legislative proposals would, for example, require call centers to disclose their geographic locations, require notice to individuals whose personal information is disclosed to non-US affiliates or subcontractors, require disclosures of companies foreign outsourcing practices, or restrict US private sector companies that have federal government contracts, federal grants or guaranteed loan programs from outsourcing their services to offshore service providers. Such legislation could have an adverse impact on the economics of outsourcing for private companies in the US, which could in turn have an adverse impact on our business with US clients.

Such concerns have also led the UK and other European Union, or EU, jurisdictions to enact regulations which allow employees who are dismissed as a result of transfer of services, which may include outsourcing to non-UK or EU companies, to seek compensation either from the company from which they were dismissed or from the company to which the work was transferred. This could discourage EU companies from outsourcing work offshore and/or could result in increased operating costs for us.

In addition, there has been publicity about the negative experiences, such as theft and misappropriation of sensitive client data, of various companies that use offshore outsourcing, particularly in India.

Current or prospective clients may elect to perform such services themselves or may be discouraged from transferring these services from onshore to offshore providers to avoid negative perceptions that may be associated with using an offshore provider. Any slowdown or reversal of existing industry trends towards offshore outsourcing would seriously harm our ability to compete effectively with competitors that operate out of facilities located in the UK or the US.

Our executive and senior management team and other key team members in our business units are critical to our continued success and the loss of such personnel could harm our business.

Our future success substantially depends on the performance of the members of our executive and senior management team and other key team members in each of our business units. These personnel possess technical and business capabilities including domain expertise that are difficult to replace. There is intense competition for experienced senior management and personnel with technical and industry expertise in the business process outsourcing industry, and we may not be able to retain our key personnel due to various reasons, including the compensation philosophy followed by our company as described in Part I Item 6. Directors, Senior Management and Employees Compensation. Although we have entered into employment contracts with our executive officers, certain terms of those agreements may not be enforceable and in any event these agreements do not ensure the continued service of these executive officers. In the event of a loss of any key personnel, there is no assurance that we will be able to find suitable replacements for our key personnel within a reasonable time. The loss of key members of our senior management or other key team members, particularly to competitors, could have a material adverse effect on our business, results of operations, financial condition and cash flows. A loss of several members of our senior management at the same time or within a short period may lead to a disruption in the business of our company, which could materially adversely affect our performance.

Wage increases may prevent us from sustaining our competitive advantage and may reduce our profit margin.

Salaries and related benefits of our operations staff and other employees in India are among our most significant costs. Wage costs in India have historically been significantly lower than wage costs in the US and Europe for comparably skilled professionals, which has been one of our competitive advantages. However, rapid economic growth in India, increased demand for business process outsourcing to India, and increased competition for skilled employees in India may reduce this competitive advantage. In addition, if the US dollar or the pound sterling declines in value against the Indian rupee, wages in the US or the UK will further decrease relative to wages in India, which may further reduce our competitive advantage. We may need to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting the quantity and quality of employees that our business requires. Wage increases may reduce our profit margins and have a material adverse effect on our financial condition and cash flows.

Further, following our acquisitions of Aviva Global, Business Applications Associates Limited, or BizAps, and Chang Limited, our operations in the UK have expanded and our wage costs for employees located in the UK now represent a larger proportion of our total wage costs. Wage increases in the UK may therefore also reduce our profit margins and have a material adverse effect on our financial condition and cash flows.

Table of Contents

Our operating results may differ from period to period, which may make it difficult for us to prepare accurate internal financial forecasts and respond in a timely manner to offset such period to period fluctuations.

Our operating results may differ significantly from period to period due to factors such as client losses, variations in the volume of business from clients resulting from changes in our clients operations, the business decisions of our clients regarding the use of our services, delays or difficulties in expanding our operational facilities and infrastructure, changes to our pricing structure or that of our competitors, inaccurate estimates of resources and time required to complete ongoing projects, currency fluctuations and seasonal changes in the operations of our clients. For example, our clients in the travel and leisure industry experience seasonal changes in their operations in connection with the US summer holiday season, as well as episodic factors such as adverse weather conditions. Transaction volumes can be impacted by market conditions affecting the travel and insurance industries, including natural disasters, outbreak of infectious diseases or other serious public health concerns in Asia or elsewhere (such as the outbreak of the Influenza A (H7N9) virus in various parts of the world) and terrorist attacks. In addition, our contracts do not generally commit our clients to providing us with a specific volume of business.

In addition, the long sales cycle for our services, which typically ranges from three to 12 months, and the internal budget and approval processes of our prospective clients make it difficult to predict the timing of new client engagements. Commencement of work and ramping up of volume of work with certain new and existing clients have been slower than we had expected. Revenue is recognized upon actual provision of services and when the criteria for recognition are achieved. Accordingly, the financial benefit of gaining a new client may be delayed due to delays in the implementation of our services. These factors may make it difficult for us to prepare accurate internal financial forecasts or replace anticipated revenue that we do not receive as a result of those delays. Due to the above factors, it is possible that in some future quarters our operating results may be significantly below the expectations of the public market, analysts and investors.

Employee strikes and other labor-related disruptions may adversely affect our operations.

Our business depends on a large number of employees executing client operations. Strikes or labor disputes with our employees at our delivery centers may adversely affect our ability to conduct business. Our employees are not unionized, although they may in the future form unions. We cannot assure you that there will not be any strike, lock out or material labor dispute in the future. Work interruptions or stoppages could have a material adverse effect on our business, results of operations, financial condition and cash flows.

Failure to adhere to the regulations that govern our business could result in us being unable to effectively perform our services. Failure to adhere to regulations that govern our clients businesses could result in breaches of contract with our clients.

Our clients business operations are subject to certain rules and regulations such as the Gramm-Leach-Bliley Act, the Health Insurance Portability and Accountability Act and Health Information Technology for Economic and Clinical Health Act in the US and the Financial Services Act in the UK. Our clients may contractually require that we perform our services in a manner that would enable them to comply with such rules and regulations. Failure to perform our services in such a manner could result in breaches of contract with our clients and, in some limited circumstances, civil fines and criminal penalties for us. In addition, we are required under various Indian laws to obtain and maintain permits and licenses for the conduct of our business. If we fail to comply with any applicable rules or regulations, or if we do not maintain our licenses or other qualifications to provide our services, we may not be able to provide services to existing clients or be able to attract new clients and could lose revenue, which could have a material adverse effect on our business.

Our clients may terminate contracts before completion or choose not to renew contracts which could adversely affect our business and reduce our revenue.

The terms of our client contracts typically range from three to eight years. Many of our client contracts can be terminated by our clients with or without cause, with three to six months notice and, in most cases, without penalty. The termination of a substantial percentage of these contracts could adversely affect our business and reduce our revenue. Contracts that will expire on or before March 31, 2014 (including work orders/statement of works that will expire on or before March 31, 2014 although the related master services agreement has been renewed) represented approximately 22.8% of our revenue and 20.3% of our revenue less repair payments from our clients in fiscal 2013. Failure to meet contractual requirements could result in cancellation or non-renewal of a contract. Some of our contracts may be terminated by the client if certain of our key personnel working on the client project leave our employment and we are unable to find suitable replacements. In addition, a contract termination or significant reduction in work assigned to us by a major client could cause us to experience a higher than expected number of unassigned employees, which would increase our cost of revenue as a percentage of revenue until we are able to reduce or reallocate our headcount. We may not be able to replace any client that elects to terminate or not renew its contract with us, which would adversely affect our business and revenue. For example, one of our largest auto claims clients by revenue contribution in fiscal 2012 has terminated its contract with us with effect from April 18, 2012. This client accounted for 10.4% and 7.5% of our revenue and 1.3% and 1.9% of our revenue less repair payments in fiscal 2012 and 2011, respectively. For more information, see Recent concerns over increases in car insurance premiums have led to investigations by the UK competition authority on whether any market practice, such as the payment of referral fees to accident management companies and insurance companies of non-fault drivers, restricts or distorts competition in connection with the provision of motor insurance, and also to the introduction of new laws banning the payment of referral fees for claims involving personal injury, which could have a material adverse effect on our non-fault repairs business in our auto claims business.

Table of Contents

Some of our client contracts contain provisions which, if triggered, could result in lower future revenue and have an adverse effect on our business.

In many of our client contracts, we agree to include certain provisions which provide for downward revision of our prices under certain circumstances. For example, certain contracts allow a client in certain limited circumstances to request a benchmark study comparing our pricing and performance with that of an agreed list of other service providers for comparable services. Based on the results of the study and depending on the reasons for any unfavorable variance, we may be required to make improvements in the service we provide or to reduce the pricing for services to be performed under the remaining term of the contract. Some of our contracts also provide that, during the term of the contract and for a certain period thereafter ranging from six to twelve months, we may not provide similar services to certain or any of their competitors using the same personnel. These restrictions may hamper our ability to compete for and provide services to other clients in the same industry, which may result in lower future revenue and profitability.

Some of our contracts specify that if a change in control of our company occurs during the term of the contract, the client has the right to terminate the contract. These provisions may result in our contracts being terminated if there is such a change in control, resulting in a potential loss of revenue. Some of our client contracts also contain provisions that would require us to pay penalties to our clients if we do not meet pre-agreed service level requirements. Failure to meet these requirements could result in the payment of significant penalties by us to our clients which in turn could have an adverse effect on our business, results of operations, financial condition and cash flows.

If our pricing structures do not accurately anticipate the cost and complexity of performing our work, our profitability may be negatively affected.

The terms of our client contracts typically range from three to eight years. In many of our contracts, we commit to long-term pricing with our clients, and we negotiate pricing terms with our clients utilizing a range of pricing structures and conditions. Depending on the particular contract, these include input-based pricing (such as full-time equivalent-based pricing arrangements), fixed-price arrangements, output-based pricing (such as transaction-based pricing), outcome-based pricing, and contracts with features of all these pricing models. Our pricing is highly dependent on our internal forecasts and predictions about our projects and the marketplace, which are largely based on limited data and could turn out to be inaccurate. If we do not accurately estimate the costs and timing for completing projects, our contracts could prove unprofitable for us or yield lower profit margins than anticipated. Some of our client contracts do not allow us to terminate the contracts except in the case of non-payment by our client. If any contract turns out to be economically non-viable for us, we may still be liable to continue to provide services under the contract.

We intend to focus on increasing our service offerings that are based on non-linear pricing models (such as fixed-price and outcome-based pricing models) that allow us to price our services based on the value we deliver to our clients rather than the headcount deployed to deliver the services to them. Non-linear revenues may be subject to short term pressure on margins as initiatives in developing the products and services take time to deliver. The risk of entering into non-linear pricing arrangements is that if we fail to properly estimate the appropriate pricing for a project, we may incur lower profits or losses as a result of being unable to execute projects with the amount of labor we expected or at a margin sufficient to recover our initial investments in our solutions. While non-linear pricing models are expected to result in higher revenue productivity per employee and improved margins, they also mean that we bear the risk of cost overruns, wage inflation, fluctuations in currency exchange rates and failure to achieve clients business objectives in connection with these projects. Although we use our internally developed methodologies and processes and past project experience to reduce the risks associated with estimating, planning and performing transaction-based pricing, fixed-price and outcome-based pricing projects, if we fail to estimate accurately the resources required for a project, future wage inflation rates or currency exchange rates, or if we fail to meet defined performance goals or objectives, our profitability may suffer.

We have recently entered into a subcontracting arrangement for the delivery of services in China. We have in the past and may in the future enter into subcontracting arrangements for the delivery of services in jurisdictions where we do not have delivery centers. We could face greater risk when pricing our outsourcing contracts, as our outsourcing projects typically entail the coordination of operations and workforces with our subcontractor, and utilizing workforces with different skill sets and competencies. Furthermore, when outsourcing work we assume responsibility for our subcontractors performance. Our pricing, cost and profit margin estimates on outsourced work may include anticipated long-term cost savings from transformational and other initiatives that we expect to achieve and sustain over the life of the outsourcing contract. There is a risk that we will under price our contracts, fail to accurately estimate the costs of performing the work or fail to accurately assess the risks associated with potential contracts. In particular, any increased or unexpected costs, delays or failures to achieve anticipated cost savings, or unexpected risks we encounter in connection with the performance of this work, including those caused by factors outside our control, could make these contracts less profitable or unprofitable, which could have an adverse effect on our profit margin.

Our profitability will suffer if we are not able to maintain our pricing and asset utilization levels and control our costs.

Our profit margin, and therefore our profitability, is largely a function of our asset utilization and the rates we are able to recover for our services. An important component of our asset utilization is our seat utilization rate, which is the average number of work shifts per day, out of a maximum of three, for which we are able to utilize our work stations, or seats. During fiscal 2013 and 2012, we incurred significant expenditures to increase our number of seats by establishing additional delivery centers or expanding production capacities in our existing delivery centers. If we are not able to maintain the pricing for our services or an appropriate seat utilization rate, without corresponding cost reductions, our profitability will suffer. The rates we are able to recover for our services are affected by a number of factors, including our clients perceptions of our ability to add value through our services, competition, introduction of new services or products by us or our competitors, our ability to accurately estimate, attain and sustain revenue from client contracts, margins and cash flows over increasingly longer contract periods and general economic and political conditions.

Table of Contents

Our profitability is also a function of our ability to control our costs and improve our efficiency. As we increase the number of our employees and execute our strategies for growth, we may not be able to manage the significantly larger and more geographically diverse workforce that may result, which could adversely affect our ability to control our costs or improve our efficiency. Further, because there is no certainty that our business will ramp up at the rate that we anticipate, we may incur expenses for the increased capacity for a significant period of time without a corresponding growth in our revenues. Commencement of work and ramping up of volume of work with certain new and existing clients have been slower than we had expected. If our revenue does not grow at our expected rate, we may not be able to maintain or improve our profitability.

We face competition from onshore and offshore business process outsourcing companies and from information technology companies that also offer business process outsourcing services. Our clients may also choose to run their business processes themselves, either in their home countries or through captive units located offshore.

The market for outsourcing services is very competitive and we expect competition to intensify and increase from a number of sources. We believe that the principal competitive factors in our markets are price, service quality, sales and marketing skills, and industry expertise. We face significant competition from our clients own in-house groups including, in some cases, in-house departments operating offshore or captive units. Clients who currently outsource a significant proportion of their business processes or information technology services to vendors in India may, for various reasons, including diversifying geographic risk, seek to reduce their dependence on any one country. We also face competition from onshore and offshore business process outsourcing and information technology services companies. In addition, the trend toward offshore outsourcing, international expansion by foreign and domestic competitors and continuing technological changes will result in new and different competitors entering our markets. These competitors may include entrants from the communications, software and data networking industries or entrants in geographic locations with lower costs than those in which we operate.

Some of these existing and future competitors have greater financial, human and other resources, longer operating histories, greater technological expertise, more recognizable brand names and more established relationships in the industries that we currently serve or may serve in the future. In addition, some of our competitors may enter into strategic or commercial relationships among themselves or with larger, more established companies in order to increase their ability to address client needs, or enter into similar arrangements with potential clients. Increased competition, our inability to compete successfully against competitors, pricing pressures or loss of market share could result in reduced operating margins which could harm our business, results of operations, financial condition and cash flows.

We have incurred losses in the past. We may not be profitable in the future.

We incurred losses in each of the three fiscal years from fiscal 2003 through fiscal 2005. We expect our selling, general and administrative expenses to increase in future periods. If our revenue does not grow at a faster rate than these expected increases in our expenses, or if our operating expenses are higher than we anticipate, we may not be profitable and we may incur losses.

If we cause disruptions to our clients businesses, provide inadequate service or are in breach of our representations or obligations, our clients may have claims for substantial damages against us. Our insurance coverage may be inadequate to cover these claims and, as a result, our profits may be substantially reduced.

Most of our contracts with clients contain service level and performance requirements, including requirements relating to the quality of our services and the timing and quality of responses to the client s customer inquiries. In some cases, the quality of services that we provide is measured by quality assurance ratings and surveys which are based in part on the results of direct monitoring by our clients of interactions between our employees and our client s customers. Failure to consistently meet service requirements of a client or errors made by our associates in the course of delivering services to our clients could disrupt the client s business and result in a reduction in revenue or a claim for substantial damages against us. For example, some of our agreements stipulate standards of service that, if not met by us, will result in lower payment to us. In addition, in connection with acquiring new business from a client or entering into client contracts, our employees may make various representations, including representations relating to the quality of our services, abilities of our associates and our project management techniques. A failure or inability to meet a contractual requirement or our representations could seriously damage our reputation and affect our ability to attract new business or result in a claim for substantial damages against us.

Our dependence on our offshore delivery centers requires us to maintain active data and voice communications between our main delivery centers in Costa Rica, India, the Philippines, Poland, Romania, South Africa, Sri Lanka, the UK and the US, our subcontractor s delivery center in China, our international technology hubs in the UK and the US and our clients offices. Although we maintain redundant facilities and communications links, disruptions could result from, among other things, technical and electricity breakdowns, computer glitches and viruses and adverse weather conditions. Any significant failure of our equipment or systems, or any major disruption to basic infrastructure like power and telecommunications in the locations in which we operate, could impede our ability to provide services to our clients, have a negative impact on our reputation, cause us to lose clients, reduce our revenue and harm our business.

Table of Contents

Under our contracts with our clients, our liability for breach of our obligations is generally limited to actual damages suffered by the client and capped at a portion of the fees paid or payable to us under the relevant contract. Although our contracts contain limitations on liability, such limitations may be unenforceable or otherwise may not protect us from liability for damages. In addition, certain liabilities, such as claims of third parties for which we may be required to indemnify our clients, are generally not limited under those agreements. Further, although we have professional indemnity insurance coverage, the coverage may not continue to be available on reasonable terms or in sufficient amounts to cover one or more large claims and our insurers may disclaim coverage as to any future claims. The successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or co-insurance requirements), could have a material adverse effect on our business, reputation, results of operations, financial condition and cash flows.

We are liable to our clients for damages caused by unauthorized disclosure of sensitive or confidential information, whether through a breach or circumvention of our or our clients computer systems and processes, through our employees or otherwise.

We are typically required to manage, utilize and store sensitive or confidential client data in connection with the services we provide. Under the terms of our client contracts, we are required to keep such information strictly confidential. Our client contracts do not include any limitation on our liability to them with respect to breaches of our obligation to maintain confidentiality on the information we receive from them. Although we seek to implement measures to protect sensitive and confidential client data, there can be no assurance that we would be able to prevent breaches of security. Further, some of our projects require us to conduct business functions and computer operations using our clients systems over which we do not have control and which may not be compliant with industry security standards. In addition, some of the client designed processes that we are contractually required to follow for delivering services to them and which we are unable to unilaterally change, could be designed in a manner that allows for control weaknesses to exist and be exploited. Any vulnerability in a client s system or client designed process, if exploited, could result in breaches of security or unauthorized transactions and result in a claim for substantial damages against us. If any person, including any of our employees, penetrates our or our clients network security or otherwise mismanages or misappropriates sensitive or confidential client data, we could be subject to significant liability and lawsuits from our clients or their customers for breaching contractual confidentiality provisions or privacy laws. Although we have insurance coverage for mismanagement or misappropriation of such information by our employees, that coverage may not continue to be available on reasonable terms or in sufficient amounts to cover one or more large claims against us, and our insurers may disclaim coverage as to any future claims. Penetration of the network security of our or our clients data centers or computer systems or unauthorized use or disclosure of sensitive or confidential client data, whether through breach of our or our clients computer systems, systems failure, loss or theft of assets containing confidential information or otherwise, could also have a negative impact on our reputation which would harm our business.

Fraud and significant security breaches in our or our clients computer systems and network infrastructure could adversely impact our business

Our business is dependent on the secure and reliable operation of our information systems, including those used to operate and manage our business and our clients information systems, whether operated by our clients themselves or by us in connection with our provision of services to them. Although we take adequate measures to safeguard against system-related and other fraud, there can be no assurance that we would be able to prevent fraud or even detect them on a timely basis, particularly where it relates to our clients information systems which are not managed by us. For example, we have identified incidences where our employees have allegedly exploited weaknesses in information systems as well as processes in order to misappropriate confidential client data and used such confidential data to record fraudulent transactions and have recently received communication from a client seeking, among others, an indemnity for any losses incurred by them on such a matter relating to their processes performed by us. We are generally required to indemnify our clients from third party claims arising out of such fraudulent transactions and our client contracts generally do not include any limitation on our liability to our clients losses arising from fraudulent activities by our employees. Accordingly, we may have significant liability arising from such fraudulent transactions which may materially affect our business and financial results. Although we have professional indemnity insurance coverage for losses arising from fraudulent activities by our employees, that coverage may not continue to be available on reasonable terms or in sufficient amounts to cover one or more large claims against us, and our insurers may also disclaim coverage as to any future claims. We may also suffer reputational harm as a result of fraud committed by our employees, or by our perceived inability to properly manage fraud related risks, which could in turn lead to enhanced regulatory oversight and scrutiny.

Our expansion into new markets may create additional challenges with respect to managing the risk of fraud due to the increased geographical dispersion and use of intermediaries. Our business also requires the appropriate and secure utilization of client and other sensitive information. We cannot be certain that advances in criminal capabilities (including cyber attacks or cyber intrusions over the internet, malware, computer viruses and the like), discovery of new vulnerabilities or attempts to exploit existing vulnerabilities in our or our clients systems, other data thefts, physical system or network break-ins or inappropriate access, or other developments will not compromise or breach the technology protecting our or our client s computer systems and networks that access and store sensitive information. Cyber threats, such as phishing and trojans, could intrude into our or our client s network to steal data or to seek sensitive information. Any intrusion into our network or our client s network (to the extent attributed to us or perceived to be attributed to us) that results in any breach of security could cause damage to our reputation and adversely impact our business and financial results. Although we have implemented security technology and operational procedures to prevent such occurrences, there can be no assurance that these security measures will be successful. A significant failure in security measures could have a material adverse effect on our business, reputation, results of operations and financial condition.

Our business could be materially and adversely affected if we do not protect our intellectual property or if our services are found to infringe on the intellectual property of others.

Our success depends in part on certain methodologies, practices, tools and technical expertise we utilize in designing, developing, implementing and maintaining applications and other proprietary intellectual property rights. In order to protect our rights in such intellectual properties, we rely upon a combination of nondisclosure and other contractual arrangements as well as trade secret, copyright and trademark laws. We also generally enter into confidentiality agreements with our employees, consultants, clients and potential clients, and limit access to and distribution of our proprietary information to the extent required for our business purpose.

India is a member of the Berne Convention, an international intellectual property treaty, and has agreed to recognize protections on intellectual property rights conferred under the laws of other foreign countries, including the laws of the United States. There can be no assurance that the laws, rules, regulations and treaties in effect in the United States, India and the other jurisdictions in which we operate and the contractual and other protective measures we take, are adequate to protect us from misappropriation or unauthorized use of our intellectual property, or that such laws will not change. We may not be able to detect unauthorized use and take appropriate steps to enforce our rights, and any such steps may not be successful. Infringement by others of our intellectual property, including the costs of enforcing our intellectual property rights, may have a material adverse effect on our business, results of operations and financial condition.

Our clients may provide us with access to, and require us to use, third party software in connection with our delivery of services to them. Our client contracts generally require our clients to indemnify us for any infringement of intellectual property rights or licenses to third party software when our clients provide such access to us. If the indemnities under our client contracts are inadequate to cover the damages and losses we suffer due to infringement of third party intellectual property rights or licenses to third party software to which we were given access, our business and results of operations could be adversely affected. We are also generally required, by our client contracts, to indemnify our clients for any breaches of intellectual property rights by our services. Although we believe that we are not infringing on the intellectual property rights of others, claims may nonetheless be successfully asserted against us in the future. The costs of defending any such claims could be significant, and any successful claim may require us to modify, discontinue or rename any of our services. Any such changes may have a material adverse effect on our business, results of operations and financial condition.

We may not succeed in identifying suitable acquisition targets or integrating any acquired business into our operations, which could have a material adverse effect on our business, results of operations, financial condition and cash flows.

Our growth strategy involves gaining new clients and expanding our service offerings, both organically and through strategic acquisitions. It is possible that in the future we may not succeed in identifying suitable acquisition targets available for sale or investments on reasonable terms, have access to the capital required to finance potential acquisitions or investments, or be able to consummate any acquisition or investments. Future acquisitions or joint ventures may also result in the incurrence of indebtedness or the issuance of additional equity securities, which may present difficulties in financing the acquisition or joint venture on attractive terms. The inability to identify suitable acquisition targets or investments or the inability to complete such transactions may affect our competitiveness and our growth prospects.

Table of Contents

Historically, we have expanded some of our service offerings and gained new clients through strategic acquisitions. For example, we acquired Aviva Global in July 2008, BizAps in June 2008, Chang Limited in April 2008, and Flovate Technologies Limited, or Flovate (which we subsequently renamed as WNS Workflow Technologies Limited), in June 2007. In March 2008, we entered into a joint venture with Advanced Contact Solutions, Inc., or ACS, a provider in BPO services and customer care in the Philippines, to form WNS Philippines Inc. In November 2011, we acquired ACS s shareholding in WNS Philippines Inc. and increased our share ownership from 65% to 100%. The lack of profitability of any of our acquisitions or joint ventures could have a material adverse effect on our operating results.

In addition, our management may not be able to successfully integrate any acquired business into our operations or benefit from any joint ventures that we enter into, and any acquisition we do complete or any joint venture we do enter into may not result in long-term benefits to us. For instance, if we acquire a company, we could experience difficulties in assimilating that company s personnel, operations, technology and software, or the key personnel of the acquired company may decide not to work for us. In June 2012, we acquired Fusion, a leading BPO provider based in South Africa. Fusion provides a range of outsourcing services, including contact center, customer care and business continuity services, to both South African and international clients. With operations in Cape Town and Johannesburg, Fusion employed approximately 1,500 people as at June 30, 2012 which increased to 2,169 people as at March 31, 2013. We cannot assure you that we will be able to successfully integrate Fusion s business operations with ours, or that we will be able to successfully leverage Fusion s assets to grow our revenue, expand our service offerings and market share or achieve accretive benefits from our acquisition of Fusion.

Further, we may receive claims or demands by the sellers of the entities acquired by us on the indemnities that we have provided to them for losses or damages arising from any breach of contract by us. Conversely, while we may be able to claim against the sellers on their indemnities to us for breach of contract or breach of the representations and warranties given by the sellers in respect of the entities acquired by us, there can be no assurance that our claims will succeed, or if they do, that we will be able to successfully enforce our claims against the sellers at a reasonable cost. Acquisitions and joint ventures also typically involve a number of other risks, including diversion of management s attention, legal liabilities and the need to amortize acquired intangible assets, any of which could have a material adverse effect on our business, results of operations, financial condition and cash flows.

We recorded a significant impairment charge to our earnings in fiscal 2008 and may be required to record another significant charge to earnings in the future when we review our goodwill, intangible or other assets for potential impairment.

As at March 31, 2013, we had goodwill and intangible assets of approximately $87.1 million and $92.1 million, respectively, which primarily resulted from the purchases of Fusion, Aviva Global, BizAps, Chang Limited, Flovate, Marketics Technologies (India) Private Limited, or Marketics, Town & Country Assistance Limited (which we subsequently rebranded as WNS Assistance) and WNS Global Services Private Limited, or WNS Global. Of the $92.1 million of intangible assets as at March 31, 2013, $84.0 million pertain to our purchase of Aviva Global. Under IFRS, we are required to review our goodwill, intangibles or other assets for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. In addition, goodwill, intangible or other assets with indefinite lives are required to be tested for impairment at least annually. We performed an impairment review and recorded a significant impairment charge to our earnings in fiscal 2008 relating to Trinity Partners Inc. If, for example, the insurance industry experiences a significant decline in business and we determine that we will not be able to achieve the cash flows that we had expected from our acquisition of Aviva Global, we may have to record an impairment of all or a portion of the $84.0 million of intangible assets relating to our purchase of Aviva Global. Although our impairment review of goodwill and intangible assets in fiscal 2013, 2012 and 2011 did not indicate any impairment, we may be required in the future to record a significant charge to earnings in our financial statements during the period in which any impairment of our goodwill or other intangible assets is determined. Such charges may have a significant adverse impact on our results of operations.

Our facilities are at risk of damage by natural disasters.

Our operational facilities and communication hubs may be damaged in natural disasters such as earthquakes, floods, heavy rains, tsunamis and cyclones. For example, during floods caused by typhoons in Manila, Philippines in September 2009, our delivery center was rendered inaccessible and our associates were not able to commute to the delivery center for a few days, thereby adversely impacting our provision of services to our clients. During the floods in Mumbai in July 2005, our operations were adversely affected as a result of the disruption of the city s public utility and transport services making it difficult for our associates to commute to our office. Such natural disasters may also lead to disruption to information systems and telephone service for sustained periods. Damage or destruction that interrupts our provision of outsourcing services could damage our relationships with our clients and may cause us to incur substantial additional expenses to repair or replace damaged equipment or facilities. We may also be liable to our clients for disruption in service resulting from such damage or destruction. While we currently have property damage insurance and business interruption insurance, our insurance coverage may not be sufficient. Furthermore, we may be unable to secure such insurance coverage at premiums acceptable to us in the future or secure such insurance coverage at all. Prolonged disruption of our services as a result of natural disasters would also entitle our clients to terminate their contracts with us.

Table of Contents

We are incorporated in Jersey, Channel Islands and are subject to Jersey rules and regulations. If the tax benefits enjoyed by our company are withdrawn or changed, we may be liable for higher tax, thereby reducing our profitability.

As a company incorporated in Jersey, Channel Islands, we operate under the zero-ten business tax regime and are not currently required to pay taxes in Jersey. Although we continue to enjoy the benefits of the zero-ten business tax regime, if Jersey tax laws change or the tax benefits we enjoy are otherwise withdrawn or changed, we may become liable for higher tax, thereby reducing our profitability.

Risks Related to Key Delivery Locations

A substantial portion of our assets and operations are located in India and we are subject to regulatory, economic, social and political uncertainties in India.

Our primary operating subsidiary, WNS Global, is incorporated in India, and a substantial portion of our assets and employees are located in India. We intend to continue to develop and expand our facilities in India. The Government of India, however, has exercised and continues to exercise significant influence over many aspects of the Indian economy. The Government of India has provided significant tax incentives and relaxed certain regulatory restrictions in order to encourage foreign investment in specified sectors of the economy, including the business process outsourcing industry. Those programs that have benefited us include tax holidays, liberalized import and export duties and preferential rules on foreign investment and repatriation. We cannot assure you that such liberalization policies will continue. The Government of India may also enact new tax legislation or amend the existing legislation that could impact the way we are taxed in the future. For more information, see New tax legislation and the results of actions by taxing authorities may have an adverse effect on our operations and our overall tax rate. Various other factors, including a collapse of the present coalition government due to the withdrawal of support of coalition members or the formation of a new unstable government with limited support, could trigger significant changes in India s economic liberalization and deregulation policies and disrupt business and economic conditions in India generally and our business in particular. Our financial performance and the market price of our ADSs may be adversely affected by changes in inflation, exchange rates and controls, interest rates, Government of India policies (including taxation regulations and policies), social stability or other political, economic or diplomatic developments affecting India in the future.

India has witnessed communal clashes in the past. Although such clashes in India have, in the recent past, been sporadic and have been contained within reasonably short periods of time, any such civil disturbance in the future could result in disruptions in transportation or communication networks, as well as have adverse implications for general economic conditions in India. Such events could have a material adverse effect on our business, the value of our ADSs and your investment in our ADSs.

If the tax benefits and other incentives that we currently enjoy are reduced or withdrawn or not available for any other reason, our financial condition would be negatively affected.

We have benefitted from, and continue to benefit from, certain tax holidays and exemptions in various jurisdictions in which we have operations.

In fiscal 2013 and 2012, our tax rate in India and Sri Lanka impacted our effective tax rate. We would have incurred approximately $0.8 million and $1.7 million in additional income tax expense on our operations in Sri Lanka and on our SEZ operations in India for fiscal 2013 and 2012, respectively, if the tax holidays and exemptions as described below had not been available for the respective years.

In fiscal 2011, our tax rate in India and, to a lesser extent, Sri Lanka significantly impacted our effective tax rate. We incurred minimal income tax expense on our operations in India and Sri Lanka in fiscal 2011 as a result of the tax holiday enjoyed by our delivery centers registered in the STPI in India and the tax exemption enjoyed in Sri Lanka as described below. We would have incurred approximately $14.0 million in additional income tax expense on our STPI operations in India and our operations in Sri Lanka, if the tax holiday and exemption had not been available for the period. The STPI tax holiday in India expired on April 1, 2011.

We expect our tax rate in India and Sri Lanka and, to a lesser extent, the Philippines to continue to impact our effective tax rate. Our tax rate in India have been impacted by the reduction in the tax exemption enjoyed by our delivery center located in Gurgaon under the SEZ scheme from 100.0% to 50.0% which started in fiscal 2013. However, we expect to expand the operations in our delivery centers located in other SEZs that are still in their initial five years of operations and therefore eligible for 100.0% income tax exemption.

In the past, the majority of our Indian operations were eligible to claim income tax exemption with respect to profits earned from export revenue from operating units registered under the Software Technology Parks of India, or STPI. The benefit was available for a period of 10 years from the date of commencement of operations, but not beyond March 31, 2011. Effective April 1, 2011, upon the expiration of this tax exemption, income derived from our operations in India became subject to the prevailing annual tax rate, which is currently 32.45%. Further, the Government of India, pursuant to the Finance Bill 2013, has proposed to increase the annual tax rate to 33.99%.

Further, in 2005, the Government of India implemented the Special Economic Zones Act, 2005, or the SEZ legislation, with the effect that taxable income of new operations established in designated SEZs may be eligible for a 15-year tax holiday scheme consisting of a complete tax holiday for the initial five years and a partial tax holiday for the subsequent ten years, subject to the satisfaction of certain capital investment conditions. Our delivery center located in Gurgaon, India and registered under the SEZ scheme is eligible for a 50.0% income tax exemption from fiscal 2013 until fiscal 2022. During fiscal 2012, we also started operations in delivery centers in Pune, Navi Mumbai and Chennai, India registered under the SEZ scheme, through which we are eligible for a 100.0% income tax exemption until fiscal 2016 and a 50.0% income tax exemption from fiscal 2017 until fiscal 2026.

Table of Contents

The SEZ legislation has been criticized on economic grounds by the International Monetary Fund and the SEZ legislation may be challenged by certain non-governmental organizations. It is possible that, as a result of such political pressures, the procedure for obtaining benefits under the SEZ legislation may become more onerous, the types of land eligible for SEZ status may be further restricted or the SEZ legislation may be amended or repealed. Moreover, there is continuing uncertainty as to the governmental and regulatory approvals required to establish operations in the SEZs or to qualify for the tax benefit. This uncertainty may delay our establishment of additional operations in the SEZs.

In addition to these tax holidays, our Indian subsidiaries are also entitled to certain benefits under relevant state legislation and regulations. These benefits include the preferential allotment of land in industrial areas developed by state agencies, incentives for captive power generation, rebates and waivers in relation to payments for transfer of property and registration (including for purchase or lease of premises) and commercial usage of electricity.

Since the adoption of the Indian Finance Act, 2007, we have become subject to minimum alternate tax, or MAT, and, since fiscal 2008, we have been required to pay additional taxes. The Government of India, pursuant to the Indian Finance Act, 2011, has also levied MAT on the book profits earned by the SEZ units at the prevailing tax rate, which is currently 20.01%. Further, the Government of India, pursuant to the Finance Bill 2013, has proposed to increase the tax rate to 20.96%. To the extent MAT paid exceeds the actual tax payable on our taxable income we would be able to offset such MAT credits from tax payable in the succeeding ten years, subject to the satisfaction of certain conditions. During fiscal 2013, we have offset $1.3 million of our MAT payments for earlier years from our increased tax liability based on our taxable income following the expiry of our tax holiday on STPI effective fiscal 2012.

Our operations in Sri Lanka are also eligible for tax exemptions. One of our Sri Lankan subsidiaries was eligible to claim income tax exemption with respect to profits earned from export revenue by our delivery center registered with the Board of Investment, Sri Lanka, or the BOI. This tax exemption expired in fiscal 2011, however, effective fiscal 2012; the Government of Sri Lanka has exempted the profits earned from export revenue from tax. This has enabled our Sri Lankan subsidiary to continue to claim tax exemption under the Sri Lanka Inland Revenue Act following the expiry of the tax exemption.

Our subsidiary in the Philippines, WNS Global Services Philippines, Inc., is also eligible to claim income tax exemption with respect to profits earned from export revenue by our delivery centers registered with the Philippines Economic Zone Authority. This tax exemption is available for four years from the date of grant of the tax exemption and will expire in fiscal 2014. During fiscal 2013, we started operations in a new delivery center in the Philippines which is also eligible for a tax exemption that will expire in fiscal 2017. Following the expiry of the tax exemption, income generated by WNS Global Services Philippines, Inc. will be taxed at the prevailing annual tax rate, which is currently 30.0%.

Our subsidiary in Costa Rica is also eligible for a 100.0% income tax exemption from fiscal 2010 until fiscal 2017 and a 50.0% income tax exemption from fiscal 2018 to fiscal 2021.

When any of our tax holidays or exemptions expire or terminate, or if the applicable government withdraws or reduces the benefits of a tax holiday or exemption that we enjoy, our tax expense may materially increase and this increase may have a material impact on our results of operations.

The applicable tax authorities may also disallow deductions claimed by us and assess additional taxable income on us in connection with their review of our tax returns.

New tax legislation and the results of actions by taxing authorities may have an adverse effect on our operations and our overall tax rate.

The Government of India may enact new tax legislation that could impact the way we are taxed in the future. For example, the Direct Taxes Code Bill, which was tabled in the Indian Parliament in August 2010, is intended to replace the Indian Income Tax Act, 1961. Under the Direct Taxes Code Bill, a non-Indian company with a place of effective management in India would be treated as a tax resident in India and would be consequently liable to tax in India on its global income. The Direct Taxes Code Bill, if enacted, also proposes to discontinue the existing profit based incentives for SEZ units operational after March 31, 2014 and replace them with investment based incentive for SEZ units operational after that date. The implications of the Direct Taxes Code, if enacted, on our operations are presently still unclear and may result in a material increase in our tax liability.

Further, the Government of India, pursuant to the Indian Finance Act 2012, has clarified that, with retrospective effect from April 1, 1962, any income accruing or arising directly or indirectly through the transfer of capital assets situated in India will be taxable in India. If any of our transactions are deemed to involve the direct or indirect transfer of a capital asset located in India, such transactions could be investigated by the Indian tax authorities, which could lead to the issuance of tax assessment orders and a material increase in our tax liability. For example, in December 2012, we received a request from the relevant income tax authority in India for information relating to our acquisition in July 2008 from Aviva of all the shares of Aviva Global, which owned subsidiaries with assets in India and Sri Lanka. No allegation or demand for payment of additional tax relating to that transaction has been made yet. The Government of India has issued guidelines on General Anti Avoidance Rule, or the GAAR, which is expected to be effective April 1, 2015, and which is intended to curb sophisticated tax avoidance. Under the GAAR, a business arrangement will be deemed an impermissible avoidance arrangement if the main purpose of the arrangement is to obtain tax benefits. Although the full implications of the GAAR are presently still unclear, if we are deemed to have violated any of its provisions, we may face an increase to our tax liability.

Table of Contents

The Government of India, the US or other jurisdictions where we have a presence could enact new tax legislation which would have a material adverse effect on our business, results of operations and financial condition. In addition, our ability to repatriate surplus earnings from our delivery centers in a tax-efficient manner is dependent upon interpretations of local laws, possible changes in such laws and the renegotiation of existing double tax avoidance treaties. Changes to any of these may adversely affect our overall tax rate, or the cost of our services to our clients, which would have a material adverse effect on our business, results of operations and financial condition.

We are subject to transfer pricing and other tax related regulations and any determination that we have failed to comply with them could materially adversely affect our profitability.

Transfer pricing regulations to which we are subject require that any international transaction among our company and its subsidiaries, or the WNS group enterprises, be on arm s-length terms. Transfer pricing regulations in India have been extended to cover specified Indian domestic transactions as well. We believe that the international and India domestic transactions among the WNS group enterprises are on arm s-length terms. If, however, the applicable tax authorities determine that the transactions among the WNS group enterprises do not meet arms length criteria, we may incur increased tax liability, including accrued interest and penalties. This would cause our tax expense to increase, possibly materially, thereby reducing our profitability and cash flows.

We may be required to pay additional taxes in connection with audits by the Indian tax authorities.

From time to time, we receive orders of assessment from Indian tax authorities assessing additional taxable income on us and/or our subsidiaries in connection with their review of our tax returns. We currently have orders of assessment for fiscal 2003 through fiscal 2010 pending before various appellate authorities. These orders assess additional taxable income that could in the aggregate give rise to an estimated 2,827.3 million ($52.1 million based on the exchange rate on March 31, 2013) in additional taxes, including interest of 1,029.4 million ($19.0 million based on the exchange rate on March 31, 2013).

These orders of assessment allege that the transfer prices we applied to certain of the international transactions between WNS Global, one of our Indian subsidiaries, and our other wholly-owned subsidiaries were not on arm s length terms, disallow a tax holiday benefit claimed by us, deny the set off of brought forward business losses and unabsorbed depreciation and disallow certain expenses claimed as tax deductible by WNS Global. As at March 31, 2013, we have provided a tax reserve of 910.4 million ($16.8 million based on the exchange rate on March 31, 2013) primarily on account of the Indian tax authorities denying the set off of brought forward business losses and unabsorbed depreciation. We have appealed against these orders of assessment before higher appellate authorities. For more details on these assessments, see Part I Item 5. Operating and Financial Review and Prospects Tax Assessment Orders.

In addition, we currently have orders of assessment pertaining to similar issues that have been decided in our favor by first level appellate authorities, vacating tax demands of 2,400.8 million ($44.2 million based on the exchange rate on March 31, 2013) in additional taxes, including interest of 748.7 million ($13.8 million based on the exchange rate on March 31, 2013). The income tax authorities have filed appeals against these orders at higher appellate authorities.

In case of disputes, the Indian tax authorities may require us to deposit with them all or a portion of the disputed amounts pending resolution of the matters on appeal. Any amount paid by us as deposits will be refunded to us with interest if we succeed in our appeals. We have deposited some portion of the disputed amount with the tax authorities and may be required to deposit the remaining portion of the disputed amount with the tax authorities pending final resolution of the respective matters.

As at March 31, 2013, corporate tax returns for fiscal years 2010 and thereafter remain subject to examination by tax authorities in India.

After consultation with our Indian tax advisors and based on the facts of these cases, certain legal opinions from counsel, the nature of the tax authorities disallowances and the orders from first level appellate authorities deciding similar issues in our favor in respect of assessment orders for earlier fiscal years, we believe these orders are unlikely to be sustained at the higher appellate authorities and we intend to vigorously dispute the orders of assessment.

In March 2009, we also received an assessment order from the Indian Service Tax Authority demanding payment of 348.1 million ($6.4 million based on the exchange rate on March 31, 2013) of service tax and related penalty for the period from March 1, 2003 to January 31, 2005. The assessment order alleges that service tax is payable in India on BPO services provided by WNS Global to clients based abroad as the export proceeds are repatriated outside India by WNS Global. In response to an appeal filed by us with the appellate tribunal against the assessment order in April 2009, the appellate tribunal has remanded the matter back to the lower tax authorities to be adjudicated afresh. Based on consultations with our Indian tax advisors, we believe this order of assessment is more likely than not to be upheld in our favor. We intend to continue to vigorously dispute the assessment.

No assurance can be given, however, that we will prevail in our tax disputes. If we do not prevail, payment of additional taxes, interest and penalties may adversely affect our results of operations, financial condition and cash flows. There can also be no assurance that we will not receive similar or additional orders of assessment in the future.

Table of Contents

Terrorist attacks and other acts of violence involving India or its neighboring countries could adversely affect our operations, resulting in a loss of client confidence and materially adversely affecting our business, results of operations, financial condition and cash flows.

Terrorist attacks and other acts of violence or war involving India or its neighboring countries may adversely affect worldwide financial markets and could potentially lead to economic recession, which could adversely affect our business, results of operations, financial condition and cash flows. South Asia has, from time to time, experienced instances of civil unrest and hostilities among neighboring countries, including India and Pakistan. In previous years, military confrontations between India and Pakistan have occurred in the region of Kashmir and along the India/Pakistan border. There have also been incidents in and near India such as the bombings of the Taj Mahal Hotel and Oberoi Hotel in Mumbai in 2008, a terrorist attack on the Indian Parliament, troop mobilizations along the India/Pakistan border and an aggravated geopolitical situation in the region. Such military activity or terrorist attacks in the future could influence the Indian economy by disrupting communications and making travel more difficult. Resulting political tensions could create a greater perception that investments in Indian companies involve a high degree of risk. Such political tensions could similarly create a perception that there is a risk of disruption of services provided by India-based companies, which could have a material adverse effect on the market for our services. Furthermore, if India were to become engaged in armed hostilities, particularly hostilities that were protracted or involved the threat or use of nuclear weapons, we might not be able to continue our operations.

Restrictions on entry visas may affect our ability to compete for and provide services to clients in the US and the UK, which could have a material adverse effect on future revenue.

The vast majority of our employees are Indian nationals. The ability of some of our executives to work with and meet our European and North American clients and our clients from other countries depends on the ability of our senior managers and employees to obtain the necessary visas and entry permits. In response to previous terrorist attacks and global unrest, US and European immigration authorities have increased the level of scrutiny in granting visas. Immigration laws in those countries may also require us to meet certain other legal requirements as a condition to obtaining or maintaining entry visas. These restrictions have significantly lengthened the time requirements to obtain visas for our personnel, which has in the past resulted, and may continue to result, in delays in the ability of our personnel to meet with our clients. In addition, immigration laws are subject to legislative change and varying standards of application and enforcement due to political forces, economic conditions or other events, including terrorist attacks. We cannot predict the political or economic events that could affect immigration laws or any restrictive impact those events could have on obtaining or monitoring entry visas for our personnel. If we are unable to obtain the necessary visas for personnel who need to visit our clients   sites or, if such visas are delayed, we may not be able to provide services to our clients or to continue to provide services on a timely basis, which could have a material adverse effect on our business, results of operations, financial condition and cash flows.

If more stringent labor laws become applicable to us, our profitability may be adversely affected.

India has stringent labor legislation that protects the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes financial obligations on employers upon retrenchment. Though we are exempt from a number of these labor laws at present, there can be no assurance that such laws will not become applicable to the business process outsourcing industry in India in the future. In addition, our employees may in the future form unions. If these labor laws become applicable to our workers or if our employees unionize, it may become difficult for us to maintain flexible human resource policies, discharge employees or downsize, and our profitability may be adversely affected.

Risks Related to our ADSs

Substantial future sales of our shares or ADSs in the public market could cause our ADS price to fall.

Sales by us or our shareholders of a substantial number of our ADSs in the public market, or the perception that these sales could occur, could cause the market price of our ADSs to decline. These sales, or the perception that these sales could occur, also might make it more difficult for us to sell securities in the future at a time or at a price that we deem appropriate or to pay for acquisitions using our equity securities. As at March 31, 2013, we had 50,588,044 ordinary shares outstanding, including 49,947,822 shares represented by 49,947,822 ADSs. In addition, as at March 31, 2013, a total of 3,335,612 ordinary shares or ADSs are issuable upon the exercise or vesting of options and restricted share units, or RSUs, outstanding under our 2002 Stock Incentive Plan and our Second Amended and Restated 2006 Incentive Award Plan. All ADSs are freely transferable, except that ADSs owned by our affiliates may only be sold in the US if they are registered or qualify for an exemption from registration, including pursuant to Rule 144 under the Securities Act of 1933, as amended, or the Securities Act. The remaining ordinary shares outstanding may also only be sold in the US if they are registered or qualify for an exemption from registration, including pursuant to Rule 144 under the Securities Act.

The market price for our ADSs may be volatile.

The market price for our ADSs is likely to be highly volatile and subject to wide fluctuations in response to factors including the following:

Table of Contents

- announcements of technological developments;
- regulatory developments in our target markets affecting us, our clients or our competitors;
- actual or anticipated fluctuations in our operating results;
- changes in financial estimates by securities research analysts;
- changes in the economic performance or market valuations of other companies engaged in business process outsourcing;
- addition or loss of executive officers or key employees;
- sales or expected sales of additional shares or ADSs;
- loss of one or more significant clients; and
- a change in control, or possible change of control, of our company

In addition, securities markets generally and from time to time experience significant price and volume fluctuations that are not related to the operating performance of particular companies. These market fluctuations may also have a material adverse effect on the market price of our ADSs.

We may not be able to pay any dividends on our shares and ADSs.

We have never declared or paid any dividends on our ordinary shares. We cannot give any assurance that we will declare dividends of any amount, at any rate or at all. Because we are a holding company, we rely principally on dividends, if any, paid by our subsidiaries to us to fund our dividend payments, if any, to our shareholders. Any limitation on the ability of our subsidiaries to pay dividends to us could have a material adverse effect on our ability to pay dividends to you.

Any future determination to pay cash dividends will be at the discretion of our Board of Directors and will be dependent upon our results of operations and cash flows, our financial position and capital requirements, general business conditions, legal, tax, regulatory and any contractual restrictions on the payment of dividends and any other factors our Board of Directors deems relevant at the time.

Subject to the provisions of the Companies (Jersey) Law 1991, or the 1991 Law, and our Articles of Association, we may by ordinary resolution declare annual dividends to be paid to our shareholders according to their respective rights and interests in our distributable reserves. Any dividends we may declare must not exceed the amount recommended by our Board of Directors. Our board may also declare and pay an interim dividend or dividends, including a dividend payable at a fixed rate, if paying an interim dividend or dividends appears to the Board to be justified by our distributable reserves. We can only declare dividends if our directors who are to authorize the distribution make a prior statement that, having made full enquiry into our affairs and prospects, they have formed the opinion that:

- immediately following the date on which the distribution is proposed to be made, we will be able to discharge our liabilities as they fall due; and

- having regard to our prospects and to the intentions of our directors with respect to the management of our business and to the amount and character of the financial resources that will in their view be available to us, we will be able to continue to carry on business and we will be able to discharge our liabilities as they fall due until the expiry of the period of 12 months immediately following the date on which the distribution is proposed to be made or until we are dissolved under Article 150 of the 1991 Law, whichever first occurs.

Subject to the deposit agreement governing the issuance of our ADSs, holders of ADSs will be entitled to receive dividends paid on the ordinary shares represented by such ADSs. See Risks Related to Our Business Our loan agreements impose operating and financial restrictions on us and our subsidiaries.

Holders of ADSs may be restricted in their ability to exercise voting rights.

At our request, the depositary of the ADSs will mail to you any notice of shareholders meeting received from us together with information explaining how to instruct the depositary to exercise the voting rights of the ordinary shares represented by ADSs. If the depositary timely receives voting instructions from you, it will endeavor to vote the ordinary shares represented by your ADSs in accordance with such voting instructions. However, the ability of the depositary to carry out voting instructions may be limited by practical and legal limitations and the terms of the ordinary shares on deposit. We cannot assure you that you will receive voting materials in time to enable you to return voting instructions to the depositary in a timely manner. Ordinary shares for which no voting instructions have been received will not be voted.

As a foreign private issuer, we are not subject to the proxy rules of the Commission, which regulate the form and content of solicitations by US-based issuers of proxies from their shareholders. The form of notice and proxy statement that we have been using does not include all of the information that would be provided under the Commission s proxy rules.

Table of Contents

Holders of ADSs may be subject to limitations on transfers of their ADSs.

The ADSs are transferable on the books of the depositary. However, the depositary may close its transfer books at any time or from time to time when it deems necessary or advisable in connection with the performance of its duties. In addition, the depositary may refuse to deliver, transfer or register transfers of ADSs generally when the transfer books of the depositary are closed, or at any time or from time to time if we or the depositary deem it necessary or advisable to do so because of any requirement of law or of any government or governmental body or commission or any securities exchange on which the American Depositary Receipts, or ADRs, or our ordinary shares are listed, or under any provision of the deposit agreement or provisions of or governing the deposited shares, or any meeting of our shareholders, or for any other reason.

Holders of ADSs may not be able to participate in rights offerings or elect to receive share dividends and may experience dilution of their holdings, and the sale, deposit, cancellation and transfer of our ADSs issued after exercise of rights may be restricted.

If we offer our shareholders any rights to subscribe for additional shares or any other rights, the depositary may make these rights available to them after consultation with us. We cannot make rights available to holders of our ADSs in the US unless we register the rights and the securities to which the rights relate under the Securities Act, or an exemption from the registration requirements is available. In addition, under the deposit agreement, the depositary will not distribute rights to holders of our ADSs unless we have requested that such rights be made available to them and the depositary has determined that such distribution of rights is lawful and reasonably practicable. We can give no assurance that we can establish an exemption from the registration requirements under the Securities Act, and we are under no obligation to file a registration statement with respect to these rights or underlying securities or to endeavor to have a registration statement declared effective. Accordingly, holders of our ADSs may be unable to participate in our rights offerings and may experience dilution of your holdings as a result. The depositary may allow rights that are not distributed or sold to lapse. In that case, holders of our ADSs will receive no value for them. In addition, US securities laws may restrict the sale, deposit, cancellation and transfer of ADSs issued after exercise of rights.

We may be classified as a passive foreign investment company, which could result in adverse US federal income tax consequences to US Holders of our ADSs or ordinary shares.

Based on our financial statements and relevant market and shareholder data, we believe that we should not be treated as a passive foreign investment company for US federal income tax purposes, or PFIC, with respect to our most recently closed taxable year. However, the application of the PFIC rules is subject to uncertainty in several respects, and we cannot assure you that we will not be a PFIC for any taxable year. A non-US corporation will be a PFIC for any taxable year if either (i) at least 75% of its gross income for such year is passive income or (ii) at least 50% of the value of its assets (based on an average of the quarterly values of the assets) during such year is attributable to assets that produce passive income or are held for the production of passive income. A separate determination must be made after the close of each taxable year as to whether we were a PFIC for that year. Because the value of our assets for purposes of the PFIC test will generally be determined by reference to the market price of our ADSs and ordinary shares, fluctuations in the market price of the ADSs and ordinary shares may cause us to become a PFIC. In addition, changes in the composition of our income or assets may cause us to become a PFIC. If we are a PFIC for any taxable year during which a US Holder (as defined in Part I Item 10. Additional Information E. Taxation US Federal Income Taxation) holds an ADS or ordinary share, certain adverse US federal income tax consequences could apply to such US Holder.

We have certain anti-takeover provisions in our Articles of Association that may discourage a change in control.

Our Articles of Association contain anti-takeover provisions that could make it more difficult for a third party to acquire us without the consent of our Board of Directors. These provisions include:

- a classified Board of Directors with staggered three-year terms; and

- the ability of our Board of Directors to determine the rights, preferences and privileges of our preferred shares and to issue the preferred shares without shareholder approval, which could be exercised by our Board of Directors to increase the number of outstanding shares and prevent or delay a takeover attempt.

These provisions could make it more difficult for a third party to acquire us, even if the third party s offer may be considered beneficial by many shareholders. As a result, shareholders may be limited in their ability to obtain a premium for their shares.

It may be difficult for you to effect service of process and enforce legal judgments against us or our affiliates.

We are incorporated in Jersey, Channel Islands, and our primary operating subsidiary, WNS Global, is incorporated in India. A majority of our directors and senior executives are not residents of the US and virtually all of our assets and the assets of those persons are located outside the US. As a result, it may not be possible for you to effect service of process within the US upon those persons or us. In addition, you may be unable to enforce judgments obtained in courts of the US against those persons outside the jurisdiction of their residence, including judgments predicated solely upon the securities laws of the US.

Table of Contents

ITEM 4. INFORMATION ON THE COMPANY

A. History and Development of our Company

WNS (Holdings) Limited was incorporated as a private liability company on February 18, 2002 under the laws of Jersey, Channel Islands, and maintains a registered office in Jersey at Queensway House, Hilgrove Street, St Helier, Jersey JE1 1ES. We converted from a private limited company to a public limited company on January 4, 2006 when we acquired more than 30 shareholders as calculated in accordance with Article 17A of the 1991 Law. We gave notice of this to the Jersey Financial Services Commission, or JFSC, in accordance with Article 17(3) of the 1991 Law on January 12, 2006. Our principal executive office is located at Gate 4, Godrej & Boyce Complex, Pirojshanagar, Vikhroli (W), Mumbai 400 079, India, and the telephone number for this office is (91-22) 4095-2100. Our website address is *www.wns.com* . **Information contained on our website does not constitute part of this annual report.** Our agent for service in the US is our subsidiary, WNS North America Inc., 15 Exchange Place, 3rd, Floor, Suite 310, Jersey City, New Jersey 07302, US.

We began operations as an in-house unit of British Airways in 1996 and started focusing on providing business process outsourcing services to third parties in fiscal 2003. Warburg Pincus acquired a controlling stake in our company from British Airways in May 2002 and inducted a new senior management team. In fiscal 2003, we acquired Town & Country Assistance Limited, a UK-based automobile claims handling company, thereby extending our service portfolio beyond the travel and leisure industry to include insurance-based automobile claims processing. We subsequently rebranded the company as WNS Assistance, which is part of WNS Auto Claims BPO, our reportable segment for financial statement purposes. In fiscal 2004, we acquired the health claims management business of Greensnow Inc. In fiscal 2006, we acquired Trinity Partners Inc. (which we merged into our subsidiary, WNS North America Inc.), a provider of BPO services to financial institutions, focusing on mortgage banking. In August 2006, we acquired from PRG Airlines Services Limited, or PRG Airlines, its fare audit services business. In September 2006, we acquired from GHS Holdings LLC, or GHS, its financial accounting business. In May 2007, we acquired Marketics, a provider of offshore analytics services. In June 2007, we acquired Flovate, a company engaged in the development and maintenance of software products and solutions, which we subsequently renamed as WNS Workflow Technologies Limited. In March 2008, we entered into a joint venture with ACS, a provider in BPO services and customer care in the Philippines, to form WNS Philippines Inc. and in November 2011, we acquired ACS s shareholding in WNS Philippines Inc., which became our wholly-owned subsidiary. In April 2008, we acquired Chang Limited, an auto insurance claims processing services provider in the UK, through its wholly-owned subsidiary, Accidents Happen Assistance Limited, or AHA (formerly known as Call 24-7 Limited, or Call 24-7). In June 2008, we acquired BizAps, a provider of Systems Applications and Products, or SAP®, solutions to optimize the enterprise resource planning functionality for our finance and accounting processes. In July 2008, we entered into a transaction with Aviva consisting of (1) a share sale and purchase agreement pursuant to which we acquired from Aviva all the shares of Aviva Global and (2) the Aviva master services agreement (as varied by the variation agreement entered into in March 2009), pursuant to which we are providing BPO services to Aviva s UK business and Aviva s Irish subsidiary, Hibernian Aviva Direct Limited, and certain of its affiliates. Aviva Global was the business process offshoring subsidiary of Aviva. See Part I Item 5. Operating and Financial Review and Prospects Revenue Our Contracts for more details on this transaction. In June 2012, we acquired Fusion, a provider of a range of outsourcing services, including contact center, customer care and business continuity services, to both South African and international clients. Following our acquisition of Fusion, we have renamed it as WNS Global Services SA (Pty) Ltd.

In fiscal 2010, we restructured our organizational structure in order to streamline our administrative operations, achieve operational and financial synergies, and reduce the costs and expenses relating to regulatory compliance. This restructuring involved the merger of the following seven Indian subsidiaries of WNS Global into WNS Global through a Scheme of Amalgamation approved by an order of the Bombay High Court passed in August 2009 pursuant to the Indian Companies Act, 1956: Customer Operational Services (Chennai) Private Limited, Marketics, Noida Customer Operations Private Limited, or Noida, NTrance Customer Services Private Limited, WNS Customer Solutions (Private) Limited, or WNS Customer Solutions, WNS Customer Solutions Shared Services Private Limited and WNS Workflow Technologies (India) Private Limited. In another restructuring exercise, three of our subsidiaries, First Offshoring Technologies Private Limited, Hi-Tech Offshoring Services Private Limited and Servicesource Offshore Technologies Private Limited, were merged into WNS Global through a Scheme of Amalgamation approved by an order of the Bombay High Court passed in March 2010 pursuant to the Indian Companies Act, 1956. In fiscal

2011 and 2012, we restructured and rationalized our UK and US group companies, wherein three of our UK-based non-operating subsidiaries, Chang Limited, Town & Country Assistance Limited and BizAps, were voluntarily dissolved. In the US, two of our subsidiaries, WNS Customer Solutions North America Inc. and Business Application Associates Inc. were merged with and into WNS North America Inc. In fiscal 2012, we also incorporated a new subsidiary in the US, WNS Global Services Inc., and a new branch of WNS (Mauritius) Limited in the Dubai Airport Free Zone, United Arab Emirates, WNS Mauritius Limited ME (Branch), and de-registered our existing subsidiary WNS Global FZE in the Ras-Al-Khaimah Free Trade Zone, United Arab Emirates or UAE. In fiscal 2013 as part of our restructuring activities WNS Philippines Inc. was merged into WNS Global Services Philippines, Inc. and our Costa Rican subsidiary, WNS BPO Services Costa Rica, S.R.L. (formerly known as WNS BPO Services Costa Rica, S.A.), was transferred and is now a subsidiary of WNS North America Inc. In May 2012, WNS Global Services (UK) Limited, or WNS UK, established a branch in Poland, WNS Global Services (UK) Limited (Spółka Z Ograniczoną Odpowiedzialnością) Oddział W Polsce, Gdańsk. In March 2013, we also established a new branch of Business Applications Associates Beijing Ltd. in Guangzhou, China named Business Applications Associates Beijing Limited Guangzhou Branch. As a result of the various restructuring activities undertaken between fiscal 2010 and 2013, our organizational structure has been simplified, and now comprises 21 companies in 16 countries, including two branches in Poland and UAE. Of these 21 companies, WNS Cares Foundation, which is a wholly-owned subsidiary of WNS Global, is a not-for-profit organization registered under Section 25 of the Companies Act, 1956, India formed for the purpose of promoting corporate social responsibilities and not considered for the purpose of preparing our consolidated financial statements. In April 2012, we were awarded the Golden Peacock Award for Global Corporate Social Responsibility for 2011-2012 for our contribution through WNS Cares Foundation towards education of under privileged children.

Table of Contents

We are headquartered in Mumbai, India, and we have client service offices in New Jersey (US), New South Wales (Australia), London (UK), and Singapore and delivery centers in San Jose (Costa Rica), Bangalore, Chennai, Gurgaon, Mumbai, Nashik, Pune and Vizag (India), Manila (the Philippines), Gydnia (Poland), Bucharest (Romania), Cape Town and Johannesburg (South Africa), Colombo (Sri Lanka), Ipswich, Manchester and Mansfield (the UK), Houston, Texas and Columbia, South Carolina (the US).

We completed our initial public offering in July 2006 and our ADSs are listed on the New York Stock Exchange, or the NYSE, under the symbol WNS. In February 2012, in connection with our follow-on offering, we issued new ordinary shares in the form of ADSs, at a price of $9.25 per ADS, aggregating approximately $50.0 million and at the same time, Warburg Pincus divested 6,847,500 ordinary shares in the form of ADSs. In February 2013, Warburg Pincus sold its remaining 14,519,144 ordinary shares in the form of ADSs, thereby divesting its entire stake in our company.

Our capital expenditure in fiscal 2013, 2012 and 2011 amounted to $21.2 million, $21.2 million and $15.3 million, respectively. Our principal capital expenditure were incurred for the purposes of setting up new delivery centers, expanding existing delivery centers and developing new technology-enabled solutions to enable execution and management of clients business processes. We expect our capital expenditure needs in fiscal 2014 to be approximately $21.0 million, a significant amount of which we expect to spend on infrastructure build-out and the streamlining of our operations. The geographical distribution, timing and volume of our capital expenditures in the future will depend on new client contracts we may enter into or the expansion of our business under our existing client contracts. As at March 31, 2013, we had commitments for capital expenditures of $4.4 million relating to the purchase of property and equipment for our delivery centers. Of this committed amount, we plan to spend approximately $1.7 million in India, approximately $1.2 million in South Africa, approximately $0.6 million in the rest of the world, approximately $0.5 million in Europe (excluding the UK) and approximately $0.4 million in the UK. We expect to fund these estimated capital expenditures from cash generated from operating activities, existing cash and cash equivalents and use of existing credit facilities. See Part I Item 5. Operating and Financial Review and Prospects Liquidity and Capital Resources for more information.

B. Business Overview

We are a leading global provider of BPO services, offering comprehensive data, voice, analytical and business transformation services with a blended onshore, nearshore and offshore delivery model. We transfer the business processes of our clients to our delivery centers, located in Costa Rica, India, the Philippines, Poland, Romania, South Africa, Sri Lanka, the UK and the US, as well as to our subcontractor s delivery center in China, with a view to offer cost savings, operational flexibility, improved quality and actionable insights to our clients. We seek to help our clients transform their businesses by identifying business and process optimization opportunities through technology-enabled solutions, process design improvements, analytics and improved business understanding.

We win outsourcing engagements from our clients based on our domain knowledge of their business, our experience in managing the specific processes they seek to outsource and our customer-centric approach. Our company is organized into vertical business units in order to provide more specialized focus on each of the industries that we target, to more effectively manage our sales and marketing process and to develop in-depth domain knowledge. The major industry verticals we currently target are the insurance; travel and leisure; manufacturing, retail, consumer products, media and entertainment, telecommunication, or telecom, and diversified businesses; consulting and professional services; utilities; healthcare; banking and financial services; shipping and logistics; and public sector industries.

Our portfolio of services includes vertical-specific processes that are tailored to address our clients specific business and industry practices. In addition, we offer a set of shared services that are common across multiple industries, including customer care, finance and accounting, research and analytics, technology services and legal services. In fiscal 2013, we established a new horizontal unit that offers human resources outsourcing services.

We monitor our execution of our clients business processes against multiple performance parameters, and we aim to consistently meet and exceed these parameters in order to maintain and expand our client relationships. We aim to build long-term client relationships, and we typically sign multi-year contracts with our clients that provide us with recurring revenue. In fiscal 2013, 72 and 68 clients contributed more than $1 million to our revenue and revenue less repair payments, respectively. In fiscal 2012, 71 and 68 clients contributed more than $1 million to our revenue and revenue less repair payments, respectively.

As at March 31, 2013, we had 25,520 employees executing approximately 700 distinct business processes for our 236 clients.

Table of Contents

In fiscal 2013, our revenue was $460.3 million, our revenue less repair payments was $436.1 million and our profit was $21.4 million. Our revenue less repair payments is a non-GAAP financial measure. For a discussion of our revenue less repair payments and a reconciliation of our revenue less repair payments to revenue, see Part I Item 5. Operating and Financial Review and Prospects Overview.

Industry Overview

Companies are outsourcing a growing proportion of their business processes in order to reduce costs, increase process quality, increase flexibility, and improve business outcomes. Companies have shifted their BPO requirements from simpler processes such as call center related activities to a wider range of more complex business processes, including finance and accounting, research and analytics and industry-specific solutions. Companies are also asking their BPO providers to deliver higher-value services, such as process re-engineering and transformation services, which increase competitive advantage and have an impact on revenues as well as profits. In order to provide complex services and transformational capabilities, providers must increasingly leverage technology platform solutions, analytics and industry-specific knowledge to deliver better processes and business outcomes. These companies are also asking for more flexible business models that align the interests of the provider with those of the company, including transaction-based and outcome-based engagements. Many of these companies are outsourcing to offshore locations such as China, India and the Philippines to access a large, high quality and cost-effective workforce. They are also outsourcing to nearshore and onshore locations across the globe to mitigate risks and to take advantage of language capabilities and cultural alignment. We are a leading global provider in the BPO industry and believe that we are well positioned to benefit from these outsourcing trends with our blend of onshore, nearshore and offshore delivery capabilities.

The global business process outsourcing industry is a large and growing industry. According to the IDC 2012 Reports, the worldwide BPO market is estimated to have grown at a compound annual growth rate, or CAGR, of 3.5% from $143 billion in 2008 to $164 billion in 2012. IDC estimated that the worldwide BPO market will grow at a CAGR of 5.4% from 2012 to 2016, to $203 billion. Furthermore, the offshore-based BPO market is expected to continue to grow at a faster rate than the worldwide BPO market. According to IDC, the offshore-based BPO market is estimated to have grown at a CAGR of 17.5% from $3.1 billion in 2008 to $5.9 billion in 2012. In addition, IDC estimated that the worldwide offshore-based BPO market will grow at a CAGR of 20.4% from 2012 to 2016, to $12.4 billion.

Table of Contents

The following chart sets forth the estimated growth in revenue generated from worldwide offshore-based BPO services and worldwide BPO services:

Note: Years ending March 31

We believe that India is considered to be an attractive destination for offshore information technology, or IT, services and BPO services. According to the NASSCOM 2013 Report, India is a preferred offshore destination because of five key reasons:

- *scale and maturity* : more than 25 years of outsourcing experience;
- *a rich talent pool* : an annual technology talent output of approximately one billion;
- *competitiveness*: approximately 60-70% more cost efficient than source countries and approximately 15-20% lower than the next lowest offshoring destination;
- *customer centricity* : approximately 30-32% revenues from verticalized business process management services; and
- *strong ecosystem*: largest number of delivery centers, focused training and development and a secure environment.

Business process outsourcing typically requires a long-term strategic commitment for companies. The processes that companies outsource frequently are complex in nature, and tightly integrated with their core operations. These processes require a high degree of customization and, often, a multi-stage outsource transfer program. Companies therefore would incur high switching and other costs to transfer these processes back to their internal operations or to other business process outsourcing providers, whether onshore or offshore. As a result, once a business process outsourcing provider gains the confidence of a client, the resulting business relationship usually is characterized by multi-year contracts with predictable annual revenue.

Given the long-term, strategic nature of these engagements, companies undertake a rigorous process in evaluating their business process outsourcing provider. Based on our experience, a client typically seeks several key attributes in a business process outsourcing provider, including:

- domain knowledge and industry-specific expertise;
- process expertise across horizontal service offerings;
- ability to innovate, add new operational expertise and drive down costs;
- demonstrated ability to execute a diverse range of mission-critical and often complex business processes;
- global presence via onshore, nearshore and offshore delivery centers;
- capability to scale employees and infrastructure without a diminution in quality of service; and
- established reputation and industry leadership.

As the business process outsourcing industry evolves further, we believe that industry-specific knowledge, higher-value process expertise, a global delivery platform, scale, reputation and leadership will become increasingly important factors in this selection process.

Table of Contents

We believe that non-linear pricing models which allow BPO providers to price their services based on volume of transactions processed or the value delivered to companies will replace, in certain engagements, pricing models that are primarily based on headcount (often referred to as full-time equivalents, or FTEs), as companies look to align revenues and costs by paying for the value delivered to them rather than the efforts deployed to provide the services to them. Non-linear pricing models therefore create the incentive for BPO providers to improve the productivity of their employees and the efficiency of their operations.

Competitive Strengths

We believe that we have the competitive strengths necessary to maintain and enhance our position as a leading global provider of BPO services:

Well positioned for the evolving BPO market

The BPO industry, which started with the first wave of outsourced processes, such as call center customer service activities, has now expanded to include higher-value services that involve process re-engineering, management of mission-critical operations and business transformation. We believe that as companies have become more experienced with outsourcing, they generally look to outsource an increasing number of processes and to outsource increasingly complex and more vertical-specific processes. We believe that our industry-specific expertise, comprehensive portfolio of complex services, transformation capabilities, technology-enabled solutions and customer-centric approach position us at the forefront of the evolving BPO market. In addition, as companies increasingly look to diverse global delivery locations for their BPO services to mitigate risk and leverage language capabilities and cultural alignment, we believe we are well positioned to benefit from this trend with our blend of onshore, nearshore and offshore delivery capabilities.

Deep industry expertise

We have established deep expertise in the industries we target as a result of our legacy client relationships, acquisitions and the hiring of management with specific industry knowledge. We have developed methodologies, proprietary knowledge and industry-specific technology platforms applicable to our target industries that allow us to provide industry-focused solutions and be more responsive to customer needs within these industries.

In addition, we have organized our company into business units aligned along each of the industries on which we focus. By doing so, we are able to approach clients in each of our target industries with a combined sales, marketing and delivery effort that leverages our in-depth industry knowledge and industry-specific technology platforms.

For example, in our insurance vertical, we have specialized expertise in multiple insurance sub-sectors including property and casualty, auto and life. We offer various insurance-specific processes such as premium and policy administration, claims management, actuarial services and underwriting.

We have received numerous recognitions for our industry leadership including:

- Everest Group s 2012 PEAK Matrix for Insurance BPO Industry Leader in Insurance BPO
- HfS Research Industry Leader in Global Insurance BPO 2012
- International Data Corporation (IDC) A major player worldwide in Business Analytics BPO*
- Stevie® Awards for Sales and Customer Service 2013- Customer Service Management Team of the Year, Telesales Team of the Year and Contact Center of the Year (Up to 100 Seats)
- International Association of Outsourcing Professionals (IAOP) Ranked amongst the 2012 Global Outsourcing 100
- CISO 2012 Power List Ranked amongst top 15 companies
- CIO 100 Awards 2012 Top 100 Award and Networking Pioneer Special Award
- Golden Peacock Award Global Corporate Social Responsibility 2012
- Global CSR Award 2012 Excellence in Corporate Social Responsibility Practice Overall category
- The Medici Institute India The Medici Innovation Hall of Fame 2013 Award
- BPeSA Western Cape Contract Centre Awards 2012 Best Large Outsourced Contract Centre
- Asia Responsible Entrepreneurship Award (AREA) for Social Empowerment 2012

Comprehensive portfolio of complex services, higher-value transformational services and technology-enabled solutions

We seek to focus our service portfolio on more complex processes and solutions, and to evolve away from reliance on services that are less integral to our clients operations, such as telemarketing and technical helpdesks, which characterized the business process outsourcing industry in its early days. We also offer higher-value services such as transformation services, which are designed to help our clients to identify business and process optimization opportunities and leverage our industry and process expertise, technology solutions and analytics capabilities.

We also have developed and continue to develop technology-enabled solutions that utilize our proprietary software and licensed software in conjunction with our core business process outsourcing services. These integrated, technology-enabled solutions allow us to offer higher value, differentiated services which are more scalable and repeatable and create value for our clients through increased process efficiency and quality. We also collaborate with technology companies, combining their software platforms and expertise with our service capabilities to deliver business solutions to the marketplace. We believe these technology-enabled solutions will enable us to grow our revenue in a non-linear way by decoupling revenue growth from headcount growth.

For example, we offer various technology-enabled platforms as part of our broad suite of transformation services that also includes Consulting and Program Management Services, Process and Quality Services and Technology Services. For a large North American airline, we utilized our VERIFARE ® fare audit platform to streamline the airline s revenue recovery process, thereby allowing the airline to increase the amount of revenue recovered from inaccurate fare charges.

Proven global delivery platform

We deliver our services from 31 delivery centers around the world, located in Costa Rica, India, the Philippines, Poland, Romania, South Africa, Sri Lanka, the UK and the US, as well as through a subcontractor s delivery center in China. Our ability to offer services delivered from onshore, nearshore and offshore locations benefits our clients by providing them with high-quality services from scalable, efficient and cost-effective locations based on their requirements and process needs. It also provides our clients with the benefits of language capabilities, cultural alignment and risk mitigation in their outsourcing programs.

We believe the breadth of our delivery capability allows us to meet our clients needs, diversifies our workforce and allows us to access local talent pools around the world.

Our client-centric focus

We have a client-centric engagement model that leverages our industry-specific and shared-services expertise, flexible pricing models, client-partner relationship approach, as well as our global delivery platform to offer business solutions designed to meet our clients specific needs.

We have sought to enhance our value proposition to our clients by providing them with more flexible pricing models that align our objectives with those of our clients
