Explanatory Note

Item 2.06 Material Impairments

Lannett Company, Inc. (the Company), is analyzing and exploring various financing and operational courses to improve the Company's base business, including a focus on nearer term opportunities and an overall strategic shift toward the Company's core competencies and optimization of its cost structure. In connection therewith, the Company approved a plan in September 2018 to sell the active pharmaceutical ingredient manufacturing and distribution business of its Cody Laboratories subsidiary (the Cody API business). As part of its decision, the Company considered (i) the Cody API business's timeline to profitability, (ii) continuing investment needed to be competitive and (iii) the reduction to the Company's operating expenses, estimated to be approximately \$18 million on an annualized basis, that would result from a sale of the Cody API business. Excluded from the sale will be the manufacturing of the finished dosage form of the Company's Cocaine Hydrochloride product line.

As a result of the approval of the plan to sell the Cody API business, all of the assets, excluding the Cocaine Hydrochloride product line mentioned above, and all of the liabilities associated with the Cody API business, will be classified as assets and liabilities held for sale on the Company's Consolidated Balance Sheet as of September 30, 2018, with such assets and liabilities recorded at fair value less costs to sell. As a result of a fair value analysis of the Cody API business, the Company determined that there would be an impairment of the assets held for sale in the estimated range of \$27 million to \$33 million. This impairment will result in a noncash charge to earnings in the first quarter of fiscal 2019 and has no impact on the Company's financial covenant leverage ratio.
