NATIONAL HOLDINGS CORPORATION AND SUBSIDIARIES**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 2006
(UNAUDITED)****NOTE 1. BASIS OF PRESENTATION**

The accompanying condensed consolidated financial statements of National Holdings Corporation (“National Holdings” or the “Company”) have been prepared in accordance with generally accepted accounting principles for interim financial statements and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and disclosures required for annual financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. The condensed consolidated financial statements as of December 31, 2006 and for the periods ended December 31, 2006 and December 31, 2005 are unaudited. The results of operations for the interim periods are not necessarily indicative of the results of operations for the fiscal year. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and related footnotes included thereto in the Company’s Annual Report on Form 10-K for the fiscal year ended September 30, 2006.

NOTE 2. STOCK BASED COMPENSATION

Effective October 1, 2005, the Company adopted FASB Statement of Financial Accounting Standard (“SFAS”) No. 123R “Share Based Payment.” This statement is a revision of SFAS Statement No. 123, and supersedes APB Opinion No. 25, and its related implementation guidance. SFAS 123R addresses all forms of share based payment (“SBP”) awards including shares issued under employee stock purchase plans, stock options, restricted stock and stock appreciation rights. Under SFAS 123R, SBP awards will result in a charge to operations that will be measured at fair value on the awards grant date, based on the estimated number of awards expected to vest over the service period. During the three months ended December 31, 2005, the Company granted 100,000 employee stock options with a fair value of \$33,000. No charge was recorded in the quarter ended December 31, 2005 as the expense incurred during the period associated with this grant was nominal. During the three months ended December 31, 2006, the Company granted 150,000 employee stock options with a fair value of \$96,400. No charge was recorded in the quarter ended December 31, 2006 as the expense incurred during the period associated with this grant was nominal.

The Black-Scholes option valuation model is used to estimate the fair value of the options granted. The model includes subjective input assumptions that can materially affect the fair value estimates. The model was developed for use in estimating the fair value of traded options that have no vesting restrictions and that are fully transferable. For example, the expected volatility is estimated based on the most recent historical period of time equal to the weighted average life of the options granted. Options issued under the Company's option plans have characteristics that differ from traded options. In management's opinion, this valuation model does not necessarily provide a reliable single measure of the fair value of its employee stock options. Principal assumptions used in applying the Black-Scholes model along with the results from the model were as follows:

	2006	2005
Assumptions:		
Risk-free interest rate	4.40%	4.40%
Expected life, in years	3.0	3.0
Expected volatility	122%	124%

A summary of the stock option activity as of December 31, 2006, and changes during the three month period then ended is presented below:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value

As of December 31, 2006, there was \$158,000 of total deferred compensation costs related to share-based compensation arrangements.

NOTE 4. CLEARING AGREEMENTS

In April 2005, the Company's wholly-owned subsidiary, National Securities Corporation ("National Securities") entered into a clearing agreement with National Financial Services LLC ("NFS") that became effective in June 2005. In the first quarter of fiscal year 2007, NFS paid National Securities a \$750,000 business credit that has been included in "Accounts Payable, Accrued Expenses and Other Liabilities" in the accompanying consolidated statements of financial condition as of December 31, 2006. The clearing agreement includes a termination fee if National Securities terminates the agreement without cause. Additionally, in June 2005, National Securities entered into a clearing agreement with Penson Financial Services, Inc. ("Penson") for the purpose of providing clearing services that are not provided by NFS. The Company believes that the overall effect of these clearing relationships will be beneficial to the Company's cost structure, liquidity and capital resources.

NOTE 5. CONTINGENCIES

In September 2006, the former chairman and chief executive officer of the Company, Steven A. Rothstein, commenced an arbitration against the current chairman and chief executive officer of the Company, Mark Goldwasser, in the matter *Rothstein et al. vs. Goldwasser*, NASD No. 06-04000. Rothstein is alleging fraud and inequitable conduct relating to his attempts to sell his investment in the Company in calendar year 2001, and is seeking approximately \$5,750,000 in damages. The Company is indemnifying Mr. Goldwasser in this action. The Company and Mr. Goldwasser believe this action is without merit, and intend to vigorously defend this action.

The Company is a defendant in various other arbitrations and administrative proceedings, lawsuits and claims seeking in the aggregate damages of approximately \$1,600,000. The Company believes such claims are substantially without merit, and estimates that its liability, primarily for defense costs, will approximate \$160,000 (exclusive of unspecified punitive damages related to certain claims and inclusive of expected insurance coverage). These matters arise in the normal course of business. The Company intends to vigorously defend itself in these actions, and believes that the eventual outcome of these matters will not have a material adverse effect on the Company. However, the ultimate outcome of these matters cannot be determined at this time. The amounts related to such matters that are reasonably estimable and which have been accrued at December 31, 2006 and 2005, is \$762,000 and \$245,000, respectively, and have been included in "Accounts Payable, Accrued Expenses and Other Liabilities" in the accompanying consolidated statements of financial condition. Approximately \$575,000 of the accrued legal fees at December 31, 2006 relates to the settlement of certain arbitrations. The Company has included in "Professional fees" litigation and NASD related expenses of \$789,000 and \$245,000 for the first quarter of fiscal year 2007 and 2006, respectively.

NOTE 6. DIVIDENDS ON CONVERTIBLE PREFERRED STOCK

The holders of the Company's Series A convertible preferred stock, that are convertible into the Company's common stock at \$1.25 per share, are entitled to receive dividends on a quarterly basis at a rate of 9% per annum, per share. Such dividends are cumulative and accrue whether or not declared by the Company's Board of Directors, but are payable only when, as and if declared by the Company's Board of Directors. At December 31, 2006, the amount of accumulated dividends on the Company's 35,316 issued and outstanding shares of Series A preferred stock was approximately \$239,000.

The holders of the Company's Series B Convertible preferred stock, convertible into the Company's common stock at \$.75 per share, are entitled to receive dividends on a quarterly basis at a rate of 10% per annum per share. Such dividends are cumulative and are payable only when declared by the Company's Board of Directors. In December 2006, the Company's Board of Directors declared a cash dividend of \$25,000 payable to the holders of the Series B

preferred stock that was paid in January 2007.

NOTE 7. INCOME PER COMMON SHARE

Basic income per share is computed on the basis of the weighted average number of common shares outstanding. Diluted income per share is computed on the basis of the weighted average number of common shares outstanding plus the potential dilution that would occur if securities or other contracts to issue common shares were exercised or converted.

The following table sets forth the components used in the computation of basic and diluted income per common share:

	Three Months Ended

For the three-month period ended December 31, 2006, 7,829,644 shares attributable to outstanding Series A and B Preferred Stock, convertible notes, stock options and warrants were excluded from the calculation of diluted net income per share because if included the effect would be antidilutive.

Accounts payable, accrued expenses and other liabilities as of December 31, 2006 and September 30, 2006, respectively, consist of the following:

In the first quarter of fiscal year 2007, the Company formed a new wholly owned subsidiary, National Holdings Mortgage Corporation that will operate a mortgage broker business. RESULTS OF OPERATIONS

Three Months Ended December 31, 2006 Compared to Three Months Ended December 31, 2005

The Company's first quarter of fiscal year 2007 resulted in an increase in revenues, and a greater increase in expenses compared to the same period last year. As a result, the Company reported a net loss of \$85,000 compared with net income of \$259,000 for the first quarters of fiscal years 2007 and 2006, respectively. This represents a decline of \$344,000 from the prior period.

	Three Months Ended December 31,		Increase (Decrease)	
	2006	2005	Amount	Percent
Commissions	\$ 8,422,000	\$ 7,157,000	\$ 1,265,000	18%

Investment banking	556,000	3,052,000	(2,496,000)	(82%)
Interest and dividends	566,000	686,000	(120,000)	(17%)
Transfer fees and clearance services	1,010,000	762,000	248,000	33%
Other	434,000	173,000	261,000	151%
	\$ 14,286,000	\$ 13,691,000	\$ 595,000	4%

Total revenues increased \$595,000, or 4%, in the first quarter of fiscal year 2007 to \$14,286,000 from \$13,691,000 in the first quarter of fiscal year 2006. During the first quarter of fiscal year 2007, total trading volume increased by approximately 11%, compared to the first quarter of fiscal year 2006. The increase in revenues and trading volume is due to the stronger securities market in fiscal year 2007 and the Company's re-entry into market making activities. Commission revenue increased \$1,265,000, or 18%, to \$8,422,000 from \$7,157,000 during the first quarter of fiscal year 2007 compared with the same period in fiscal year 2006. Net dealer inventory gains, which includes profits on proprietary trading, market making activities and customer mark-ups and mark-downs, increased \$1,437,000, or 77%, to \$3,298,000 from \$1,861,000 during the first quarter of fiscal year 2007 compared with the same period in fiscal year 2006. The increase is due to the Company's re-entry into market making activities and increased trading activity in foreign securities. During the first quarter of fiscal year 2007, revenues from proprietary trading increased \$959,000, or 52%, to \$2,800,000 from \$1,841,000 in the first quarter of fiscal year 2006, revenues from market making activities increased to \$447,000 from \$0 in the first quarter of fiscal year 2006, and revenues from customer

mark-ups and mark-downs increased \$31,000, or 155%, to \$51,000 from \$20,000 in the first quarter of fiscal year 2006.

10

Investment banking revenue decreased \$2,496,000, or 82%, to \$556,000 from \$3,052,000 in the first quarter of fiscal year 2007 compared with the first quarter of fiscal year 2006. The decrease in investment banking revenues is attributable to the Company having completed more investment banking transactions in the first quarter of fiscal year 2006. Interest and dividend income decreased \$120,000 or 17%, to \$566,000 from \$686,000 in the first quarter of fiscal year 2007 compared with the same period last year. The decrease in interest income is attributable to lower margin debit balances resulting from a stricter margin policy imposed by our clearing firms. Transfer fees increased \$248,000, or 33%, to \$1,010,000 in the first quarter of fiscal year 2007 from \$762,000 in the first quarter of fiscal year 2006. The increase is due to the higher trading volume experienced during the current year's quarter.

Other revenue, consisting of asset management fees, miscellaneous transaction fees and trading fees and other investment income, increased \$261,000, or 151%, to \$434,000 from \$173,000 during the first quarter of fiscal year 2007 compared to the first quarter of fiscal year 2006. Commission expense as a percentage of net dealer inventory gains increased to 74% in the first quarter of fiscal year 2007 from 72% in the first quarter of fiscal year 2006. This increase is attributable to changes in the securities traded, and their related commission payouts. This decrease is due to the receipt of investment banking revenues in the first quarter of

Liquidity and Capital Resources

National Securities, as a registered broker-dealer, is subject to the SEC's Uniform Net Capital Rule 15c3-1 that requires the maintenance of minimum net capital. National Securities has elected to use the alternative standard method permitted by the rule. This requires that National Securities maintain minimum net capital equal to the greater of \$250,000 or a specified amount per security based on the bid price of each security for which National Securities is a market maker. At December 31, 2006, National Securities' net capital exceeded the requirement by \$1,665,000.

Advances, dividend payments and other equity withdrawals from the Company's subsidiary are restricted by the regulations of the SEC and other regulatory agencies. These regulatory restrictions may limit the amounts that a subsidiary may dividend or advance to the Company.

The Company extends unsecured credit in the normal course of business to its brokers. The determination of the appropriate amount of the reserve for uncollectible accounts is based upon a review of the amount of credit extended, the length of time each receivable has been outstanding, and the specific individual brokers from whom the receivables are due.

The objective of liquidity management is to ensure that the Company has ready access to sufficient funds to meet commitments, fund deposit withdrawals and efficiently provide for the credit needs of customers.

In April 2005, National Securities entered into a clearing agreement with NFS that became effective in June 2005. In the first quarter of fiscal year 2007, NFS paid National Securities a \$750,000 business credit that has been included in "Accounts Payable, Accrued Expenses and Other Liabilities" in the accompanying consolidated statements of financial condition as of December 31, 2006. The clearing agreement includes a termination fee if National Securities terminates the agreement without cause. Additionally, in June 2005, National Securities entered into a clearing agreement with Penson for the purpose of providing clearing services that are not provided by NFS. The Company believes that the overall effect of these clearing relationships will be beneficial to the Company's cost structure, liquidity and capital resources.

In the quarter ended December 31, 2006, the Company received proceeds of approximately \$132,000 from the exercise of outstanding warrants.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company's primary market risk arises from the fact that it engages in proprietary trading and historically made dealer markets in equity securities. Accordingly, the Company may be required to maintain certain amounts of inventories in order to facilitate customer order flow. The Company may incur losses as a result of price movements in these inventories due to changes in interest rates, foreign exchange rates, equity prices and other political factors. The Company is not subject to direct market risk due to changes in foreign exchange rates. However, the Company is subject to market risk as a result of changes in interest rates and equity prices, which are affected by global economic conditions. The Company manages its exposure to market risk by limiting its net long or short positions. Trading and inventory accounts are monitored daily by management and the Company has instituted position limits.

Credit risk represents the amount of accounting loss the Company could incur if counterparties to its proprietary transactions fail to perform and the value of any collateral proves inadequate. Although credit risk relating to various financing activities is reduced by the industry practice of obtaining and maintaining collateral, the Company maintains more stringent requirements to further reduce its exposure. The Company monitors its exposure to counterparty risk on a daily basis by using credit exposure information and monitoring collateral values. The Company maintains a credit committee, which reviews margin requirements for large or concentrated accounts and sets higher requirements or requires a reduction of either the level of margin debt or investment in high-risk securities or, in some cases,

requiring the transfer of the account to another broker-dealer.

13

The Company monitors its market and credit risks daily through internal control procedures designed to identify and evaluate the various risks to which the Company is exposed. There can be no assurance, however, that the Company's risk management procedures and internal controls will prevent losses from occurring as a result of such risks.
