NEWPORT CORPORATION

Notes to Consolidated Financial Statements

October 2, 2004

1. Basis of Presentation

The accompanying consolidated financial statements include the financial statements of the Company and its wholly owned subsidiaries. These financial statements are unaudited and have been prepared in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X. In the opinion of management, all adjustments (consisting of normal and recurring accruals and acquisition-related items) considered necessary for a fair presentation have been included.

The accompanying consolidated financial statements do not include certain footnotes and financial presentations normally required under generally accepted accounting principles and, therefore, should be read in conjunction with the consolidated financial statements and related notes contained in the Company's Annual Report on Form 10-K for the year ended December 31, 2003. The results for the interim period are not necessarily indicative of results for the full year ending January 1, 2005. The December 31, 2003 balances reported herein are derived from the audited consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2003.

Effective in the first quarter of 2004, the Company changed to a conventional 52/53-week accounting fiscal year. The Company's fiscal year will end on the Saturday closest to December 31, and its fiscal quarters will end on the Saturday closest to the end of each corresponding calendar quarter. As a result, for fiscal 2004, the Company's first, second and third quarters ended on April 3, 2004, July 3, 2004 and October 2, 2004, respectively. The Company's fiscal year will end on January 1, 2005.

Certain prior period amounts have been reclassified to conform to the current period presentation.

2. Acquisition

In July 2004, the Company acquired all of the issued and outstanding capital stock of Spectra-Physics, Inc. and certain related entities (collectively, Spectra-Physics). Spectra-Physics manufactures high-power semiconductor, solid-state and gas lasers, as well as other photonic components and devices used in a wide range of applications, including scientific research, industrial and microelectronic manufacturing and medical diagnostics. The combination creates a leading photonics company with an integrated technology mix.

The transaction was accounted for using the purchase method. The Company's results of operations for 2004 include the results of operations of Spectra-Physics from the date of acquisition on July 16, 2004.

Edgar Filing: NEWPORT CORP - Form 10-Q

The purchase price for Spectra-Physics was determined by arms-length negotiation between management and Thermo Electron Corporation, Spectra-Physics' former parent, taking into account a number of factors, including the value of the assets, the historical and projected financial performance of Spectra-Physics and the valuations of certain recently acquired companies with comparable businesses and financial performance.

The Company prepared a preliminary purchase price allocation for the acquisition in the third quarter of 2004 based on a preliminary valuation of intangible assets, an estimate of pension accounting pending a final actuarial valuation and preliminary income tax accounting. In addition, the Company is in the process of finalizing its exit plans related to certain acquired entities and has recorded a liability based upon preliminary plans approved by the Company's Board of Directors. The Company expects that these items will be resolved by the end of the second quarter of 2005. The excess of the purchase price over the estimated fair value of the net assets acquired of approximately \$178.0 million was recorded as goodwill, which is generally not deductible for tax purposes. The purchase agreement is subject to a net asset adjustment, whereby the purchase price is adjusted based upon the value of the net assets at the closing date compared with the net assets at December 31, 2003. The Company has estimated that this adjustment will result in payment to the Company of approximately \$25 million, which is included in *prepaid expenses and other current assets* in the accompanying consolidated balance sheet, and it is reflected in the figures below.

Table of Contents**NEWPORT CORPORATION****Notes to Consolidated Financial Statements****October 2, 2004**

Below is a summary of the purchase price, assets acquired and liabilities assumed:

(In thousands, except share amounts)

Consideration paid:	
Cash paid, net of asset adjustment receivable	\$ 174,927
3,220,300 shares of common stock, valued based upon the average price two days before and after the measurement date	48,079
Debt (\$50 million, 5% interest payable quarterly, principal due in full July 16, 2009, discounted to market value)	46,382
Other costs, primarily professional fees	5,661
	<u>\$ 275,049</u>
Assets acquired and liabilities assumed:	
Current assets	\$ 93,334
Goodwill	177,972
Purchased intangible assets (including in-process R&D of \$0.3 million)	58,400
Other assets	35,932
Current liabilities	(79,167)
Long-term liabilities	(11,422)
	<u>\$ 275,049</u>

The number of shares of the Company's common stock issued was determined by dividing \$50 million by the 20-day average closing price of the Company's common stock ending two days before the acquisition date of July 16, 2004. The fair value of the Company's common stock issued was determined using an average price of \$14.93, which was the average closing price of the Company's common stock two days before and after the measurement date of July 14, 2004.

The debt is valued at approximately \$46 million, based upon a discount in order to reflect a market rate of interest for similar debt with similar characteristics.

The Company valued the purchased intangible assets acquired using a preliminary valuation. Identifiable intangible assets consist of (in thousands):

<u>Identifiable Intangible Assets:</u>	Estimated	Weighted Average	Estimated
	Fair Value	Amortization	Annual
		Period	Amortization

Edgar Filing: NEWPORT CORP - Form 10-Q

Developed technology	\$ 24,500	14 years	1,801
Customer relationships	19,500	10 years	1,950
Backlog	2,200	6 months	2,200
<hr/>			
Amortizable purchased intangible assets	46,200		
Trademark/tradename	11,900	Indefinite	
<hr/>			
	\$ 58,100		
<hr/>			

The Company has also estimated that \$0.3 million of the purchase price represents purchased in-process technology that has not yet reached technological feasibility and has no alternative future use.

The financial information below summarizes the combined results of operations of the Company and Spectra-Physics, on a pro forma basis, as though the companies had been combined as of the beginning of each period presented. This pro forma financial information is presented for information purposes only and is not necessarily indicative of the results of operations that would have been achieved had the acquisition taken place at the beginning

Table of Contents

NEWPORT CORPORATION

Notes to Consolidated Financial Statements

October 2, 2004

of each period presented. The pro forma condensed combined statement of operations for the three months ended October 2, 2004 includes the historical results of the Company including Spectra-Physics from the date of acquisition on July 16, 2004, plus the historical results of Spectra-Physics from July 4, 2004 to July 16, 2004. The pro forma condensed combined statement of operations for the nine months ended October 2, 2004 includes these amounts plus the historical results of Spectra-Physics from January 1, 2004 through July 3, 2004. The pro forma condensed combined statement of operations for the three and nine months ended September 30, 2003 includes the historical results of the Company, plus the historical results of Spectra-Physics for the three and nine months ended September 27, 2003.

(In thousands)	Three Months Ended		Nine Months Ended	
	October 2,	September 30,	October 2,	September 30,
	2004	2003	2004	2003
Revenues	\$ 100,276	\$ 81,174	\$ 305,820	\$ 244,457
Net loss	(10,735)	(6,918)	(4,658)	(25,174)
Basic and diluted net loss per share	\$ (0.25)	\$ (0.16)	\$ (0.11)	\$ (0.60)

3. Revenue Recognition

Revenue is recognized after all significant obligations have been met, collectibility is probable and title has passed, which typically occurs upon shipment or completion of services. Revenue for products that require installation for which the installation is essential to functionality or is not deemed inconsequential or perfunctory are recognized upon completion of installation. Revenues for products that require installation where installation is not essential to functionality and is deemed inconsequential or perfunctory are recognized upon shipment with estimated installation costs accrued. However, if a portion of the revenue is not payable until installation is complete, the Company defers revenue up to the amount that is not payable. Revenues for training are deferred until the service is completed. Revenues for extended service contracts are recognized over the related contract periods.

Customers generally have 30 days from the original invoice date (generally 60 days for international customers) to return a standard catalog product purchase for exchange or credit. Catalog products must be returned in the original condition and meet certain other criteria. Product returns of catalog items have historically been insignificant and are charged against revenue in the period returned. Custom, option-configured and certain other products as defined in the terms and conditions of sale cannot be returned. For certain non-catalog products, the Company establishes a sales return reserve based on historical product returns.

4. Accounts and Notes Receivable

Edgar Filing: NEWPORT CORP - Form 10-Q

The Company records reserves for specific receivables deemed to be at risk for collection, as well as a reserve based on the Company's historical collections experience. The Company estimates the collectibility of customer receivables on an ongoing basis by reviewing past due invoices. A considerable amount of judgment is required in assessing the ultimate realization of these receivables, including the current credit-worthiness of each customer.

Certain of the Company's Japanese customers provide the Company with promissory notes on the due date of the receivable. The payment date of the promissory notes is generally 90 days from the original receivable due date. Subsequently, certain of these promissory notes are sold with recourse to one of four banks within Japan that the Company does business with as part of line of credit agreements. Such transactions are conducted in the ordinary course of business. For balance sheet presentation purposes, amounts due to the Company under such promissory notes are reclassified from accounts receivable to current notes receivable. At October 2, 2004, total promissory notes receivable amounted to \$5.1 million. Promissory notes sold with recourse are included in both current notes receivable and short-term obligations until the underlying note obligations are ultimately satisfied by payment of the note obligation by the customers to the banks. At October 2, 2004, such discounted note obligations included in overdraft borrowings were \$3.2 million. The Company did not have any notes receivable or notes sold with recourse outstanding at December 31, 2003.

Table of Contents

NEWPORT CORPORATION

Notes to Consolidated Financial Statements

October 2, 2004

5. Derivative Instruments

The Company recognizes all derivative financial instruments in the consolidated financial statements at fair value regardless of the purpose or intent for holding the instrument. The accounting for changes in the fair value (i.e., gains or losses) of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship and further, on the type of hedging relationship. The Company does not engage in currency speculation; however, the Company uses forward exchange contracts to mitigate the risks associated with certain foreign currency transactions entered into in the ordinary course of business, primarily foreign currency denominated receivables and payables. Such contracts do not qualify for hedge accounting and, accordingly, changes in fair values are reported in the statements of operations. The forward exchange contracts generally require the Company to exchange U.S. dollars for foreign currencies at maturity, at rates agreed to at the inception of the contracts. If the counterparties to the exchange contracts (AA or A+ rated banks) do not fulfill their obligations to deliver the contracted currencies, the Company could be at risk for any currency-related fluctuations. Transaction gains and losses are included in the statements of operations in *interest and other income, net*.

There were no foreign exchange contracts outstanding at October 2, 2004 or December 31, 2003.

6. Income Taxes

The Company provides for income taxes in interim periods based on the estimated effective income tax rate for the complete fiscal year. The income tax provision (benefit) is computed on the pretax income (loss) of the consolidated entities located within each taxing jurisdiction based on current tax law. Deferred taxes result from the future tax consequences associated with temporary differences between the amount of assets and liabilities recorded for tax and financial accounting purposes. A valuation allowance for deferred tax assets is recorded to the extent the Company cannot determine, in accordance with the provisions of Statement of Financial Accounting Standards No. 109, *Accounting for Income Taxes* (SFAS No. 109), that the ultimate realization of net deferred tax assets is more likely than not.

The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers taxable income in carryback years, the scheduled reversal of deferred tax liabilities, tax planning strategies and projected future taxable income in making this assessment. As of October 2, 2004, due to uncertainties surrounding the realization of the Company's cumulative federal and state net operating losses, the Company has recorded a valuation allowance against its gross deferred tax assets. For the foreseeable future, the Federal tax provision related to future earnings will be substantially offset by a reduction in the valuation reserve, and any future pretax losses will not be offset by a tax benefit due to the uncertainty of the recoverability of the deferred tax assets. Accordingly, current and future tax expense will consist primarily of certain required state income taxes and taxes in certain foreign jurisdictions.

The Company determined that a gross deferred tax liability is required to be established in order to account for differences between the tax and book basis of the acquired intangibles (other than goodwill) of Spectra-Physics. The gross deferred tax liability of Spectra-Physics is equal to the Company's recorded standalone net deferred tax asset of approximately \$14.9 million (recorded in prior periods) plus a deferred tax asset

Edgar Filing: NEWPORT CORP - Form 10-Q

recorded in the third quarter of approximately \$8.0 million, which was reflected as a reduction of goodwill. As a result, the Company's recorded deferred tax assets equal the acquired deferred tax liability, and net to zero on the accompanying consolidated balance sheet.

7. Discontinued Operations

In March 2003, the Company shut down its Plymouth, Minnesota operation and liquidated the majority of the remaining assets. Results for 2003 include the treatment of the Company's former metrology business and its Minnesota operation as discontinued operations, reflecting the completed divestitures of those operations.

Table of Contents**NEWPORT CORPORATION****Notes to Consolidated Financial Statements****October 2, 2004****8. Inventories**

Inventories are stated at the lower of cost, determined on either a first in, first-out (FIFO) or average cost basis, or fair market value and include materials, labor and manufacturing overhead. The Company writes down excess and obsolete inventory to net realizable value. In assessing the ultimate realization of inventories, the Company makes judgments as to future demand requirements and compares those requirements with the current or committed inventory levels. Amounts required to reduce the carrying value of inventory to net realizable value are recorded as a charge to cost of sales.

Inventories consist of the following:

(In thousands)	October 2,	December 31,
	2004	2003
Raw materials and purchased parts	\$ 45,780	\$ 33,372
Work in process	22,532	7,463
Finished goods	19,491	14,019
Total inventories	\$ 87,803	\$ 54,854

9. Accrued Expenses and Other Current Liabilities

Accrued expenses and other current liabilities consist of the following:

(In thousands)	October 2,	December 31,
	2004	2003
Deferred revenue	\$ 8,102	\$ 1,357
Accrued warranty obligations	5,535	806
Accrued income taxes	5,436	3,937
Other	13,887	3,467
	\$ 32,960	\$ 9,567

10. Warranty

Unless otherwise stated in the Company's product literature or in its agreements with customers, products sold by the Company's Photonics and Precision Technologies Division generally carry a one-year warranty from the original invoice date on all product material and workmanship. Products of such division sold to original equipment manufacturer (OEM) customers generally carry longer warranties, typically 15 to 24 months. Products sold by the Company's Lasers Division generally carry warranties that vary by product and product component, but generally range from 90 days to two years. In certain cases, such warranties are limited by amount of usage of the product. Defective products will be either repaired or replaced, generally at the Company's option, upon meeting certain criteria. The Company accrues a provision for the estimated costs that may be incurred for warranties relating to a product as a component of cost of sales at the time revenue for that product is recognized.

The activity in accrued warranty obligations is as follows:

(In thousands)	Nine Months Ended	
	October 2,	September 30,
	2004	2003
Balance at beginning of year	\$ 806	\$ 2,047
Additions from business acquisition	4,504	
Additions charged to cost of sales	2,217	1,380
Warranty claims	(1,992)	(2,579)
Balance at end of period	\$ 5,535	\$ 848

Table of Contents

NEWPORT CORPORATION

Notes to Consolidated Financial Statements

October 2, 2004

Such amounts are included in *accrued expenses and other current liabilities* in the accompanying consolidated balance sheets.

11. Accrued Restructuring Costs

In the third quarter of 2004, the Company increased its estimate of the required liability for facility consolidations by \$0.7 million to reflect settlements of its remaining lease obligations for certain leases as well as revised estimates of future sublease income.

As of October 2, 2004, \$1.1 million of facility-related accruals remained under the Company's 2002 restructuring plan. All severance actions were completed in 2003 and a total of 331 employees were terminated under this plan.

The following table summarizes the Company's accrued restructuring costs under its 2002 restructuring plan:

<u>(In thousands)</u>	<u>Facility Consolidation</u>
Balance at December 31, 2003	\$ 1,687
Additions	684
Cash payments	(1,299)
Balance at October 2, 2004	\$ 1,072

The facility consolidation reserves will be paid over the associated lease terms, which expire at various dates between 2005 and 2008. At October 2, 2004 and December 31, 2003, \$0.7 million and \$1.1 million, respectively, of accrued restructuring costs were expected to be paid within one year and are reflected in current liabilities; and \$0.4 million and \$0.6 million, respectively, of accrued restructuring costs are included in long-term *accrued restructuring costs and other liabilities* in the accompanying consolidated balance sheets.

In connection with the acquisition of Spectra-Physics, the Company began to formulate an exit plan to consolidate certain locations and such preliminary plan was approved by the Company's Board of Directors. The Company is still finalizing this plan, which will include employee severance, relocation and facility closure costs. The Company expects to finalize such plan by the end of the second quarter of 2005.

Edgar Filing: NEWPORT CORP - Form 10-Q

The following table summarizes the activity in the accrued restructuring costs related to the purchase of Spectra-Physics, which primarily involve the payment of cash:

<u>(In thousands)</u>	<u>Employee</u>	<u>Facility</u>	<u>Total</u>
	<u>Relocation</u>	<u>Consolidation</u>	
	<u>and Severance</u>		
Liabilities assumed in purchase accounting	\$ 3,070	\$ 3,323	\$ 6,393
Cash payments	(104)		(104)
Accrued restructuring at October 2, 2004	\$ 2,966	\$ 3,323	\$ 6,289

The facility consolidation reserves will be paid over the associated lease terms, which expire at various dates between 2007 and 2011. At October 2, 2004, \$3.6 million of these accrued restructuring costs were expected to be paid within one year and are reflected in current liabilities; and \$2.7 million of accrued restructuring costs are included in long-term *accrued restructuring costs and other liabilities* in the accompanying consolidated balance sheets.

Table of Contents**NEWPORT CORPORATION****Notes to Consolidated Financial Statements****October 2, 2004****12. Short-Term Obligations**

At October 2, 2004, the Company had in place a \$5.0 million revolving line of credit expiring December 31, 2004. Certain of the marketable securities that are being managed by the lending institution collateralize the line of credit. The line bears interest at the prevailing prime rate, or the prevailing London Interbank Offered Rate (2.49% at October 2, 2004) plus 1.5%, at the Company's option, and an unused line fee of 0.25% per year. At October 2, 2004, there were no balances outstanding under the line of credit, with \$4.5 million available under the line, after considering outstanding letters of credit totaling \$0.5 million.

At October 2, 2004, the Company had in place two revolving lines of credit of 1.5 billion yen (\$13.5 million at October 2, 2004) at two Japanese banks expiring as follows: \$9.9 million on November 30, 2004 and \$3.6 million on March 31, 2005. The lines are not secured and bear interest at the prevailing bank rate. At October 2, 2004, we had \$13.5 million outstanding under these lines of credit, with no amounts available for borrowing. In addition to these lines of credit, the Company had three lines of credit of 800 million yen (\$7.2 million at October 2, 2004) to be used to sell notes receivable with recourse, which bear interest at the bank's prevailing rate. These lines have no expiration date. At October 2, 2004, we had \$3.2 million outstanding under these lines, with \$4.0 million available for the sale of notes receivable. The weighted average interest rate on all borrowings under these lines was 1.7%.

13. Interest and Other Income (Expense), Net

Interest and other income (expense), net, consist of the following:

(In thousands)	Three Months Ended		Nine Months Ended	
	October 2,	September 30,	October 2,	September 30,
	2004	2003	2004	2003
Interest and dividend income	\$ 375	\$ 1,446	\$ 2,974	\$ 5,225
Gains (losses) on sales of marketable securities, net	(1,749)	963	(1,489)	2,247
Investment write-down	(1,419)		(1,419)	
Interest expense	(804)	(14)	(884)	(206)
Bank and portfolio asset management fees	(109)	(181)	(379)	(583)
Foreign exchange losses, net	(74)	(29)	(20)	(327)
Other income (expense), net	45	55	47	(168)
Total interest and other income (expense), net	\$ (3,735)	\$ 2,240	\$ (1,170)	\$ 6,188

Edgar Filing: NEWPORT CORP - Form 10-Q

In the third quarter of 2004, the Company determined that a minority interest investment made in prior years in a semiconductor component manufacturer had incurred an other-than-temporary reduction in value. As a result, the Company wrote down the investment to its net realizable value, and incurred a loss of \$1.4 million. Such amount is included in other expense, net above for both the three and nine months ended October 2, 2004.

14. Accumulated Other Comprehensive Income and Comprehensive Loss

Accumulated other comprehensive income consists of the following:

<u>(In thousands)</u>	October 2,	December 31,
	2004	2003
Cumulative foreign currency translation gains	\$ 3,854	\$ 2,955
Unrealized losses on marketable securities	(93)	(3)
	<u>\$ 3,761</u>	<u>\$ 2,952</u>

Table of Contents

NEWPORT CORPORATION

Notes to Consolidated Financial Statements

October 2, 2004

The components of comprehensive loss, net of related tax, are as follows:

(In thousands)	Three Months Ended		Nine Months Ended	
	October 2,	September 30,	October 2,	September 30,
	2004	2003	2004	2003
Net loss	\$ (18,531)	\$ (2,925)	\$ (14,683)	\$ (11,146)
Foreign currency translation gain	1,192	641	899	4,772
Unrealized holding period gains (losses) arising during period	142	(994)	(1,580)	(138)
Less: reclassification adjustments for (gain) loss included in net loss	1,749	(963)	1,490	(2,247)
Comprehensive loss	\$ (15,448)	\$ (4,241)	\$ (13,874)	\$ (8,759)

15. Net Loss Per Share

The following table sets forth the numerator and denominator used in the computation of net loss per share:

(In thousands)	Three Months Ended		Nine Months Ended	
	October 2,	September 30,	October 2,	September 30,
	2004	2003	2004	2003
Numerator for basic and diluted net loss per share:				
Loss from continuing operations	\$ (18,531)	\$ (2,814)	\$ (14,683)	\$ (8,843)
Loss from discontinued operations		(111)		(2,303)
Net loss	\$ (18,531)	\$ (2,925)	\$ (14,683)	\$ (11,146)
Denominator for basic and diluted net loss per share:				
Weighted average shares outstanding	42,352	38,780	40,305	38,679
Weighted unvested restricted stock outstanding	(162)	(65)	(101)	(65)
Denominator for basic and diluted net loss per share:	42,190	38,715	40,204	38,614

Common stock equivalents of 1,456 and 1,847, respectively, have been excluded from the denominator for purposes of calculating diluted loss per share for the three and nine months ended October 2, 2004, and common stock equivalents of 2,033 and 2,376, respectively, have been excluded from the denominator for purposes of calculating diluted loss per share for the three and nine months ended September 30, 2003, as their inclusion would be antidilutive due to the net losses incurred.

16. Stock Based Compensation

The Company applies the intrinsic value based method of accounting prescribed by Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB 25) and related Interpretations in accounting for its stock-based compensation and complies with the disclosure provisions of Statement of Financial Accounting Standards No. 148, *Accounting for Stock-Based Compensation - Transition and Disclosure* (SFAS No. 148) and Statement of Financial Accounting Standards No. 123, *Accounting for Stock-Based Compensation* (SFAS No. 123). Accordingly, no compensation expense is recognized for employee stock options with exercise prices greater than or equal to the Company's stock price at the date of grant. Costs related to restricted stock grants, representing the difference between the grant date fair value of the award and the purchase price, if any, of the related shares, are fixed at the date of grant and amortized over the vesting period. Pro forma amounts adjusted for the effect of recording compensation cost related to the Company's stock option and employee stock purchase plans determined

Table of Contents

NEWPORT CORPORATION

Notes to Consolidated Financial Statements

October 2, 2004

based upon the fair value of awards under these plans as of the grant date, consistent with the methodology prescribed under SFAS No. 148 and SFAS No. 123, are presented below:

(In thousands, except per share data)	Three Months Ended		Nine Months Ended	
	October 2,	September 30,	October 2,	September 30,
	2004	2003	2004	2003
Net loss reported	\$ (18,531)	\$ (2,925)	\$ (14,683)	\$ (11,146)
Employee compensation expense under fair value method	(4,012)	(4,379)	(11,106)	(13,120)
Net loss pro forma	\$ (22,543)	\$ (7,304)	\$ (25,789)	\$ (24,266)
Basic and diluted net loss per share reported	\$ (0.44)	\$ (0.08)	\$ (0.37)	\$ (0.29)
Basic and diluted net loss per share pro forma	\$ (0.53)	\$ (0.19)	\$ (0.64)	\$ (0.63)
Diluted net loss per share reported	\$ (0.44)	\$ (0.08)	\$ (0.37)	\$ (0.29)
Diluted net loss per share pro forma	\$ (0.53)	\$ (0.19)	\$ (0.64)	\$ (0.63)
Shares used in computation of basic and diluted net loss per share reported and pro forma	42,190	38,715	40,204	38,614

The fair value of each option granted in 2004 was estimated as of the date of the grant using the Black-Scholes option pricing model with the following weighted-average assumptions: no annualized dividend yield; expected annual volatility of 64.3%; risk-free interest rate of 3.4%; expected life of 5 years; and expected turnover rate of 12.9%.

17. Defined Benefit Pension Plans*Defined Benefit Pension Plans*

Several of the Company's non-U.S. subsidiaries have defined benefit pension plans covering substantially all full-time employees at those subsidiaries. Some of the plans are unfunded, as permitted under the plans and applicable laws. For financial reporting purposes, the calculation of net periodic pension costs is based upon a number of actuarial assumptions, including a discount rate for plan obligations, an assumed rate of return on pension plan assets and an assumed rate of compensation increase for employees covered by the plan. All of these assumptions are based upon management's judgment, considering all known trends and uncertainties. Actual results that differ from these assumptions would impact future expense recognition and the cash funding requirements of our pension plans. Net periodic benefit costs for the plans in aggregate included the following components:

Edgar Filing: NEWPORT CORP - Form 10-Q

<u>(In thousands)</u>	<u>Nine Months Ended</u>	
	<u>October 2,</u>	<u>September 30,</u>
	<u>2004</u>	<u>2003</u>
Service cost	\$ 99	\$
Interest cost on benefit obligation	147	
Expected return on plan assets	(58)	
	<u>\$ 188</u>	<u>\$</u>

The above information includes only the period from the acquisition of Spectra-Physics on July 16, 2004.

Table of Contents**NEWPORT CORPORATION****Notes to Consolidated Financial Statements****October 2, 2004****18. Segment Reporting**

A new business segment, Lasers, has been added as a result of the Spectra-Physics acquisition. Newport's previously reported Industrial and Scientific Technologies Division (ISTD) has been combined with Spectra-Physics' Photonics business to create a new business segment, Photonics and Precision Technologies (PPT). All prior period financial information has been reclassified into these new segments. In the first quarter of 2004, the Company reclassified certain fiber optic communications product lines from its Advanced Packaging and Automation Systems (APAS) Division to the former ISTD. All prior periods have been restated to reflect this change in business segment reporting. Selected segment financial information follows:

(In thousands)	Photonics and Precision Technologies	Lasers	Advanced Packaging and Automation Systems	Total
Three Months Ended October 2, 2004:				
Sales to external customers	\$ 48,951	\$ 39,194	\$ 5,490	\$ 93,635
Segment income (loss)	9,634	3,051	(3,470)	9,215
Three Months Ended September 30, 2003:				
Sales to external customers	\$ 26,562	\$	\$ 4,917	\$ 31,479
Segment income (loss)	2,187		(4,129)	(1,942)
Nine Months Ended October 2, 2004:				
Sales to external customers	\$ 121,177	\$ 39,194	\$ 23,163	\$ 183,534
Segment income (loss)	17,548	3,051	(5,223)	15,376
Nine Months Ended September 30, 2003:				
Sales to external customers	\$ 81,144	\$	\$ 17,420	\$ 98,564
Segment income (loss)	5,559		(11,247)	(5,688)

The following reconciles segment loss to consolidated loss from continuing operations before income taxes:

(In thousands)	Three Months Ended		Nine Months Ended	
	October 2,	September 30,	October 2,	September 30,
	2004	2003	2004	2003
Segment income (loss)	\$ 9,215	\$ (1,942)	\$ 15,376	\$ (5,688)
Integration-related charges to cost of sales	(13,186)		(13,186)	
Unallocated operating expenses	(4,908)	(2,827)	(9,946)	(8,650)

Edgar Filing: NEWPORT CORP - Form 10-Q

Restructuring, impairment, integration and other charges	(4,985)	(285)	(4,985)	(693)
Interest and other income (expense), net	(3,735)	2,240	(1,170)	6,188
	<u> </u>	<u> </u>	<u> </u>	<u> </u>
Loss from continuing operations before income taxes	<u>\$ (17,599)</u>	<u>\$ (2,814)</u>	<u>\$ (13,911)</u>	<u>\$ (8,843)</u>

The Company measures operating income reported for each business segment, which includes only the costs that are directly attributable to the operations of that segment, and excludes certain corporate expenses, integration expenses, restructuring, impairment and other charges, interest and other expense, net and income taxes.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations for the Three and Nine Months Ended October 2, 2004 and September 30, 2003

INTRODUCTORY NOTE

This Quarterly Report on Form 10-Q contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 and we intend that such forward-looking statements be subject to the safe harbors created thereby. Words such as may, will, expect, believe, anticipate, intend, could, estimate, or continue or the negative or other thereof or comparable terminology are intended to identify forward-looking statements. In addition, any statements that refer to projections of our future financial performance, trends in our businesses, or other characterizations of future events or circumstances are forward-looking statements.

The forward-looking statements included herein are based on current expectations and involve a number of risks and uncertainties, all of which are difficult or impossible to predict accurately and many of which are beyond our control. As such, our actual results may differ significantly from those expressed in any forward-looking statements. Factors that may cause or contribute to such differences include, but are not limited to, those discussed in more detail under the subheading **RISKS RELATING TO OUR BUSINESS** on pages 27 through 36 of this Quarterly Report on Form 10-Q, and in Item 1 (Business) and Item 7 (Management's Discussion and Analysis of Financial Condition and Results of Operations) in our Annual Report on Form 10-K for the year ended December 31, 2003. Readers should carefully review these risks, as well as the additional risks described in other documents we file from time to time with the Securities and Exchange Commission. In light of the significant risks and uncertainties inherent in the forward-looking information included herein, the inclusion of such information should not be regarded as a representation by us or any other person that such results will be achieved, and readers are cautioned not to place undue reliance on such forward-looking information. We undertake no obligation to revise the forward-looking statements contained herein to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

The following is our discussion and analysis of certain significant factors that have affected our earnings and financial position during the periods included in the accompanying financial statements. This discussion compares the three- and nine-month periods ended October 2, 2004 and September 30, 2003. This discussion should be read in conjunction with the financial statements and associated notes.

ACQUISITION

In July 2004, we acquired all of the issued and outstanding capital stock of Spectra-Physics, Inc. and certain related entities (collectively, Spectra-Physics). Spectra-Physics manufactures high-power semiconductor, solid-state and gas lasers, as well as other photonic components and devices used in a wide range of applications, including scientific research, industrial and microelectronic manufacturing and medical diagnostics. The transaction was accounted for using the purchase method. Our results of operations for 2004 include the results of operations of Spectra-Physics from the date of acquisition on July 16, 2004. The acquisition has more than doubled the size of the company in terms of revenue, headcount and operating facilities. Accordingly, comparisons of amounts in prior periods may not be meaningful.

See further discussion in Note 2 of the Notes to Consolidated Financial Statements.

DISCONTINUED OPERATIONS

In March 2003, we shut down our Plymouth, Minnesota operation and liquidated the majority of the remaining assets. Results for the 2003 periods include the treatment of our former metrology business and our Minnesota operation as discontinued operations, reflecting the completed divestitures of those operations.

Table of Contents

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Management's Discussion and Analysis of Financial Condition and Results of Operations is based on our consolidated financial statements included in this Quarterly Report on Form 10-Q, which have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and related disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. On an ongoing basis, we evaluate these estimates and assumptions, including those related to allowance for doubtful accounts, inventory reserves, warranty obligations, restructuring reserves, asset impairment valuations and income tax valuations. We base these estimates on historical experience and on various other factors which we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. These estimates and assumptions by their nature involve risks and uncertainties, and may prove to be inaccurate. In the event that any of our estimates or assumptions are inaccurate in any material respect, it could have a material adverse effect on our reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods.

The following critical accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements.

Revenue Recognition

Revenue is recognized after all significant obligations have been met, collectibility is probable and title has passed, which typically occurs upon shipment or completion of services. Revenue for products that require installation for which the installation is essential to functionality or is not deemed inconsequential or perfunctory are recognized upon completion of installation. Revenues for products that require installation where installation is not essential to functionality and is deemed inconsequential or perfunctory are recognized upon shipment with estimated installation costs accrued. However, if a portion of the revenue is not payable until installation is complete, we defer revenue up to the amount that is not payable. Revenues for training are deferred until the service is completed. Revenues for extended service contracts are recognized over the related contract periods.

Customers generally have 30 days from the original invoice date (generally 60 days for international customers) to return a standard catalog product purchase for exchange or credit. Catalog products must be returned in the original condition and meet certain other criteria. Product returns of catalog items have historically been insignificant and are charged against revenue in the period returned. Custom, option-configured and certain other products as defined in the terms and conditions of sale cannot be returned. For certain non-catalog products, we establish a sales return reserve based on historical product returns.

Accounts and Notes Receivable

We record reserves for specific receivables deemed to be at risk for collection, as well as a reserve based on our historical collections experience. We estimate the collectibility of customer receivables on an ongoing basis by reviewing past due invoices. A considerable amount of judgment is required in assessing the ultimate realization of these receivables, including the current credit-worthiness of each customer.

Edgar Filing: NEWPORT CORP - Form 10-Q

Certain of our Japanese customers provide us with promissory notes on the due date of the receivable. The payment date of the promissory notes is generally 90 days from the original receivable due date. Subsequently, certain of these promissory notes are sold with recourse to one of four banks within Japan with which we do business. Such transactions are conducted in the ordinary course of business. For balance sheet presentation purposes, amounts due to us under such promissory notes are reclassified from accounts receivable to current notes receivable. At October 2, 2004, total promissory notes receivable amounted to \$5.1 million. Promissory notes sold with recourse are included in both current notes receivable and short-term obligations until the underlying note obligations are ultimately satisfied by payment of the note obligation by the customers to the banks. At October 2, 2004, such discounted note obligations included in overdraft borrowings were \$3.2 million. We did not have any notes receivable or notes sold with recourse outstanding at December 31, 2003.

Table of Contents

Pension Plans

Several of our non-U.S. subsidiaries have defined benefit pension plans covering substantially all full-time employees at those subsidiaries. Some of the plans are unfunded, as permitted under the plans and applicable laws. For financial reporting purposes, the calculation of net periodic pension costs is based upon a number of actuarial assumptions, including a discount rate for plan obligations, an assumed rate of return on pension plan assets and an assumed rate of compensation increase for employees covered by the plan. All of these assumptions are based upon our judgment, considering all known trends and uncertainties. Actual results that differ from these assumptions would impact future expense recognition and the cash funding requirements of our pension plans.

Inventories

We state our inventories at the lower of cost, determined on either a first in, first-out (FIFO) or average cost basis), or fair market value and include materials, labor and manufacturing overhead. We write down excess and obsolete inventory to net realizable value. In assessing the ultimate realization of inventories, we make judgments as to future demand requirements and compare those requirements with the current or committed inventory levels. We record any amounts required to reduce the carrying value of inventory to net realizable value as a charge to cost of sales.

Warranty

Unless otherwise stated in our product literature or in our agreements with our customers, products sold by our Photonics and Precision Technologies Division generally carry a one-year warranty from the original invoice date on all product material and workmanship. Products of such division sold to original equipment manufacturer (OEM) customers generally carry longer warranties, typically 15 to 24 months. Products sold by our Lasers Division generally carry warranties that vary by product and product component, but generally range from 90 days to two years. In certain cases, such warranties are limited by amount of usage of the product. Defective products will be either repaired or replaced, generally at our option, upon meeting certain criteria. We accrue a provision for the estimated costs that may be incurred for product warranties relating to a product as a component of cost of sales at the time revenue for that product is recognized. While we engage in extensive product quality programs and processes, including actively monitoring and evaluating the quality of our component suppliers, our warranty obligation is affected by product failure rates, material usage and service delivery costs incurred in correcting a product failure. Should actual product failure rates, material usage and/or service delivery costs differ from our estimates, revisions to the estimated warranty obligation would be required which could adversely affect our operating results.

Impairment of Assets

We assess the impairment of long-lived assets whenever events or changes in circumstances indicate that their carrying value may not be recoverable. The determination of related estimated useful lives and whether or not these assets are impaired involves significant judgments, related primarily to the future profitability and/or future value of the assets. Changes in our strategic plan and/or market conditions could significantly impact these judgments and could require adjustments to recorded asset balances. We hold minority interests in companies having operations or technologies in areas within or adjacent to our strategic focus, all of which are privately held and whose values are difficult to determine. We record an investment impairment charge in any reporting period where we believe an investment has experienced a decline in value that is other than temporary. Future changes in our strategic direction, adverse changes in market conditions or poor operating results of underlying investments could result in losses or an inability to recover the carrying value of the investments that may not be reflected in an investment's current carrying value, thereby possibly requiring an impairment charge in the future.

We perform annual impairment tests of our goodwill and other intangible assets in accordance with Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets* (SFAS No. 142). Under SFAS No. 142, goodwill is no longer amortized but is subject to impairment tests based upon a comparison of the fair

Table of Contents

value of each of our reporting units, as defined, and the carrying value of the reporting units' net assets, including goodwill. SFAS No. 142 requires a review for impairment at least annually or when circumstances exist that would indicate an impairment of such goodwill. We perform the annual impairment review in the fourth quarter of each year. The 2003 and 2002 annual reviews resulted in no additional impairment of the carrying value of goodwill. At October 2, 2004, we had goodwill of approximately \$235.6 million, and intangible assets of approximately \$59.1 million.

In the third quarter of 2004, we determined that a minority interest investment made in prior years in a semiconductor component manufacturer had incurred an other-than-temporary reduction in value. As a result, we wrote down the investment to its net realizable value, and incurred a loss of \$1.4 million. Such amount is included in *interest and other expense, net* above for both the three and nine months ended October 2, 2004.

Restructuring Reserves

In the third quarter of 2004, we increased our estimate of the required liability for facility consolidations by \$0.7 million to reflect settlements of our remaining lease obligations for certain leases as well as revised estimates of future sublease income.

As of October 2, 2004, \$1.1 million of facility-related accruals remained under our 2002 restructuring plan. All severance actions were completed in 2003 and a total of 331 employees were terminated under this plan.

The following table summarizes our accrued restructuring costs under this plan:

<u>(In thousands)</u>	<u>Facility Consolidation</u>
Balance at December 31, 2003	\$ 1,687
Additions	684
Cash payments	(1,299)
Balance at October 2, 2004	\$ 1,072

The facility consolidation reserves will be paid over the associated lease terms, which expire at various dates between 2005 and 2008. At October 2, 2004 and December 31, 2003, \$0.7 million and \$1.1 million, respectively, of accrued restructuring costs were expected to be paid within one year and are reflected in current liabilities; and \$0.4 million and \$0.6 million, respectively, of accrued restructuring costs are included in long-term *accrued restructuring costs and other liabilities* in the accompanying consolidated balance sheets.

In connection with the acquisition of Spectra-Physics, we began to formulate an exit plan to consolidate certain locations and the preliminary plan was approved by our Board of Directors. We are still finalizing this plan, which will include employee severance, relocation and facility closure costs. We expect to finalize this plan by the end of the second quarter of 2005.

Edgar Filing: NEWPORT CORP - Form 10-Q

The following table summarizes the activity in the accrued restructuring costs related to the purchase of Spectra-Physics:

<u>(In thousands)</u>	Employee		
	Relocation and Severance	Facility Consolidation	Total
Liabilities assumed in purchase accounting	\$ 3,070	\$ 3,323	\$ 6,393
Cash payments	(104)		(104)
Accrued restructuring at October 2, 2004	<u>\$ 2,966</u>	<u>\$ 3,323</u>	<u>\$ 6,289</u>

The facility consolidation reserves will be paid over the associated lease terms, which expire at various dates between 2007 and 2011. At October 2, 2004, \$3.6 million of these accrued restructuring costs were expected to be

Table of Contents

paid within one year and are reflected in current liabilities; and \$2.7 million of accrued restructuring costs are included in long-term *accrued restructuring costs and other liabilities* in the accompanying consolidated balance sheets.

Income Taxes

We provide for income taxes in interim periods based on the estimated effective income tax rate for the complete fiscal year. The income tax provision (benefit) is computed on the pretax income (loss) of the consolidated entities located within each taxing jurisdiction based on current tax law. Deferred taxes result from the future tax consequences associated with temporary differences between the recorded amounts of the assets and liabilities for tax and financial accounting purposes. A valuation allowance for deferred tax assets is recorded to the extent we cannot determine, in accordance with the provisions of Statement of Financial Accounting Standards No. 109, *Accounting for Income Taxes* (SFAS No. 109), that the ultimate realization of the net deferred tax assets is more likely than not.

We currently have significant deferred tax assets, which are subject to periodic recoverability assessments. We recorded a valuation reserve in the third quarter of 2002 against our deferred tax assets pursuant to SFAS No. 109, due to the uncertainty as to the timing and ultimate realization of those assets. As such, we did not recognize any tax benefit on the losses recorded in 2003 and recorded a valuation allowance against deferred tax assets for the current period. For the foreseeable future, the Federal tax provision related to future earnings will be substantially offset by a reduction in the valuation reserve, and any future pretax losses will not be offset by a tax benefit due to the uncertainty of the recoverability of the deferred tax assets. Accordingly, future tax expense will consist primarily of certain required state income taxes and taxes in certain foreign jurisdictions.

Realization of our deferred tax assets is principally dependent upon our achievement of future taxable income, the estimation of which requires significant management judgment. Our judgments regarding future profitability may change due to many factors, including future market conditions and our ability to successfully execute our business plans and/or tax planning strategies. These changes, if any, may require material adjustments to these deferred tax asset balances.

We have determined that a gross deferred tax liability is required to be established in order to account for differences between the tax and book basis of the acquired intangibles (other than goodwill) of Spectra-Physics. The gross deferred tax liability of Spectra-Physics is equal to our recorded standalone net deferred tax asset of approximately \$14.9 million (recorded in prior periods) plus a deferred tax asset recorded in the third quarter of approximately \$8.0 million, which was reflected as a reduction of goodwill. As a result, our recorded deferred tax assets equal the acquired deferred tax liability, and net to zero on the accompanying consolidated balance sheet.

Fiscal Year End

Effective beginning in the first quarter of 2004, we changed to a conventional 52/53-week accounting fiscal year. Our fiscal year will end on the Saturday closest to December 31, and our fiscal quarters will end on the Saturday closest to the end of each corresponding calendar quarter. As a result, for fiscal 2004, our first, second and third quarters ended on April 3, 2004, July 3, 2004 and October 2, 2004, respectively. Our fiscal year will end on January 1, 2005.

End Markets

In connection with our acquisition of Spectra-Physics, we realigned our end markets into four new customer markets: Scientific Research and Aerospace/Defense, Microelectronics (which is comprised primarily of semiconductor capital equipment customers), Life and Health Sciences and All Other End Markets (which includes general industrial and fiber optic communications customers). Our discussion will include comparisons to these end markets and all prior periods have been reclassified to conform to this realignment.

Table of Contents**RESULTS OF OPERATIONS**

The following table represents the results of operations for the periods indicated as a percentage of net sales:

	Percentage of Net Sales		Percentage of Net Sales	
	Three Months Ended		Nine Months Ended	
	October 2,	September 30,	October 2,	September 30,
	2004	2003	2004	2003
Net sales	100.0%	100.0%	100.0%	100.0%
Cost of sales	74.5	67.4	70.1	66.7
Gross profit	25.5	32.6	29.9	33.3
Selling, general and administrative expenses	31.4	34.5	28.1	34.2
Research and development expense	8.9	14.1	8.7	14.4
Operating loss	(14.8)	(16.0)	(6.9)	(15.3)
Interest and other income (expense), net	(4.0)	7.1	(0.7)	6.3
Loss from continuing operations before income taxes	(18.8)	(8.9)	(7.6)	(9.0)
Income tax provision	1.0		0.4	
Loss from continuing operations	(19.8)	(8.9)	(8.0)	(9.0)
Loss from discontinued operations		(0.4)		(2.3)
Net loss	(19.8)%	(9.3)%	(8.0)%	(11.3)%

Net Sales

Net sales for the quarter ended October 2, 2004 were \$93.6 million, an increase of 197.1% compared with \$31.5 million for the quarter ended September 30, 2003. Net sales for the nine months ended October 2, 2004 were \$183.5 million, an increase of 86.1% compared with \$98.6 million in the corresponding period of 2003. The sales increases in both periods were due primarily to the addition of Spectra-Physics sales from the acquisition date of July 16, 2004, which contributed \$50.1 million in the third quarter and nine-month periods. In addition, our existing business saw increases in demand compared with the 2003 periods in each of our end markets.

Sales for the quarter ended October 2, 2004 to our scientific research and aerospace/defense markets were \$34.3 million, an increase of \$21.5 million, or 168.0%, compared with the corresponding prior-year period. Sales to these markets in the nine months ended October 2, 2004 were \$62.3 million, an increase of \$26.6 million, or 74.5%, compared with the corresponding period in 2003. The sales increases in both periods were

Edgar Filing: NEWPORT CORP - Form 10-Q

due primarily to the addition of Spectra-Physics sales from the July 16, 2004 acquisition date, which contributed \$19.4 million in the third quarter and nine-month periods. The increases were also attributable to the overall strength of the economy, our further penetration of the research market, sales of the new products we released during 2003 and 2004, and greater governmental spending on research, defense and homeland security, which led to higher demand for the components and subsystems we sell to customers in this market.

Sales to customers in the microelectronics market for the quarter ended October 2, 2004 were \$28.1 million, reflecting an increase of \$17.1 million, or 155.5%, compared with the corresponding prior-year period. Sales to this market in the nine months ended October 2, 2004 were \$67.4 million, an increase of \$29.8 million, or 79.3%, compared with the corresponding period in 2003. The sales increases in both periods were due primarily to the addition of Spectra-Physics sales from the July 16, 2004 acquisition date, which contributed \$11.4 million in the third quarter and nine-month periods. In addition, the increases compared with both prior-year periods reflected heightened demand by semiconductor manufacturers for capital equipment, which led to higher demand for the components, subsystems and robots we sell to this market, offset in part by a reduction in sales of the turnkey systems we sell to back-end packaging customers in this market.

Sales to the life and health sciences market for the quarter ended October 2, 2004 totaled \$15.7 million, reflecting an increase of \$13.0 million, or 481.5%, compared with the corresponding prior-year period. Sales to this market in the

Table of Contents

nine months ended October 2, 2004 were \$23.5 million, an increase of \$15.8 million, or 205.2%, compared with the corresponding period in 2003. The sales increases in both periods were due primarily to the addition of Spectra-Physics sales from the July 16, 2004 acquisition date, which contributed \$11.2 million in the third quarter and nine-month periods. The increase was also attributable to higher sales of products to one of our largest customers in this market in the 2004 periods.

Sales for the quarter ended October 2, 2004 to our other end markets were \$15.5 million, an increase of \$10.5 million, or 210.0%, compared with the corresponding prior-year period. Sales to these markets in the nine months ended October 2, 2004 were \$30.3 million, an increase of \$12.7 million, or 72.2%, compared with the corresponding period in 2003. The sales increases in both periods were due primarily to the addition of Spectra-Physics sales from the July 16, 2004 acquisition date, which contributed \$8.1 million in the third quarter and nine-month periods. The increases were also attributable to the overall strength of the economy.

Domestic and international sales by end market were as follows:

Domestic Sales:	Three Months Ended			
	October 2,	September 30,		Percentage
	2004	2003	Increase	Increase
(In thousands)				
Scientific research and aerospace/defense	\$ 18,268	\$ 7,913	\$ 10,355	130.9%
Microelectronics	22,057	10,347	11,710	113.2
Life and health sciences	10,077	2,470	7,607	308.0
Other end markets	4,785	1,318	3,467	263.1
Total domestic sales	\$ 55,187	\$ 22,048	\$ 33,139	150.3%

International Sales:	Three Months Ended			
	October 2,	September 30,		Percentage
	2004	2003	Increase	Increase
(In thousands)				
Scientific research and aerospace/defense	\$ 16,061	\$ 4,872	\$ 11,189	229.7%
Microelectronics	5,999	700	5,299	757.0
Life and health sciences	5,657	226	5,431	2,403.1
Other end markets	10,731	3,633	7,098	195.4
Total international sales	\$ 38,448	\$ 9,431	\$ 29,017	307.7%

Domestic Sales:	Nine Months Ended		Increase	Percentage

Table of Contents

International Sales:	Nine Months Ended			
	October 2,	September 30,	Percentage	
	2004	2003	Increase	Increase
(In thousands)				
Scientific research and aerospace/defense	\$ 28,374	\$ 15,036	\$ 13,338	88.7%
Microelectronics	7,978	3,921	4,057	103.5
Life and health sciences	6,734	822	5,912	719.2
Other end markets	20,538	11,074	9,464	85.5
Total international sales	\$ 63,624	\$ 30,853	\$ 32,771	106.2%

Geographically, sales to European customers in the third quarter of 2004 were \$18.4 million, an increase of \$13.1 million, or 247.2%, and sales in the nine months ended October 2, 2004 were \$32.3 million, an increase of \$14.4 million, or 80.4%, compared with the corresponding prior-year periods. Sales to Pacific Rim customers in the third quarter of 2004 were \$15.8 million, an increase of \$12.5 million, or 378.8%, and sales in the nine months ended October 2, 2004 were \$24.4 million, an increase of \$14.1 million, or 136.9%, compared with the corresponding prior-year periods. Third quarter sales to other international customers were \$4.2 million, an increase of \$3.4 million, or 425.0%, and sales to these customers in the nine months ended October 2, 2004 were \$6.9 million, an increase of \$4.2 million, or 155.6%, compared with the respective prior-year periods. The increases in sales to international customers in the 2004 periods compared with the corresponding 2003 periods were due primarily to the addition of Spectra-Physics sales from the July 16, 2004 acquisition date, which contributed \$26.5 million to international sales in the 2004 periods.

The results of our international operations are subject to currency fluctuations. As the value of the U.S. dollar weakens relative to other currencies, sales in those currencies convert to more U.S. dollars; conversely, when the value of the U.S. dollar strengthens relative to other currencies, sales in those countries convert to fewer U.S. dollars. Currency fluctuations did not have a material impact on our results for the 2004 periods compared with the corresponding 2003 periods.

We expect net sales for the fourth quarter of 2004 to increase over the third quarter due to historically strong fourth quarter sales to the scientific research market, as well as the addition of Spectra-Physics sales for a full quarter, offset in part by a slight decrease in sales to the microelectronics market. However, our business is subject to risks arising from market conditions in our primary end markets, as well as from general economic conditions.

We expect that our sales to the scientific research and aerospace/defense markets will increase in the fourth quarter of 2004 compared with the third quarter level due to the historical seasonality in the scientific research market. Overall, we expect that our sales to these markets will fluctuate from period to period in line with changes in overall research and defense spending levels, but will increase over time as we increase our penetration of these markets.

We expect our sales to the microelectronics market to decrease in the fourth quarter of 2004 compared with the third quarter level and remain flat to slightly down for the next few quarters thereafter, consistent with the overall trend in this market. However, the duration and extent of this downturn is difficult to predict and represents a significant uncertainty with respect to our future operating results.

Edgar Filing: NEWPORT CORP - Form 10-Q

We expect our sales to the life and health sciences market for the fourth quarter to increase slightly compared with the third quarter due to the addition of a full quarter of Spectra-Physics sales. In general, we expect our sales to this market to fluctuate on a quarter to quarter basis in the short term due to our concentration of significant OEM customers in this market, but to increase over time as we increase our penetration of this market.

Gross Margin

Gross margin for the quarter ended October 2, 2004 was 25.5%, compared with a gross margin of 32.6% in the corresponding period in 2003. Gross margin for the nine months ended October 2, 2004 was 29.9%, compared with a gross margin of 33.3% in the corresponding period of 2003. Gross margin for the third quarter was positively

Table of Contents

impacted by the addition of Spectra-Physics sales from the July 16, 2004 acquisition date, but this impact was more than offset by charges to cost of sales for acquisition, integration and other items. These included a charge of \$6.7 million related to acquired inventory that was written up to a normal selling margin in accordance with Statement of Financial Accounting Standards No. 141 and sold during the quarter, a charge of \$4.7 million for inventory that we wrote off and disposed of due to facility consolidations and an impairment charge of \$1.5 million for a technology investment deemed non-strategic as a result of the acquisition of Spectra-Physics.

We expect our gross margin to improve significantly in the fourth quarter of 2004 compared with the third quarter level, but to again be impacted, to a lesser extent, by adjustments to cost of sales for acquisition, integration and other items. In general, we expect that our gross margin will fluctuate in future periods due to factors including absorption of fixed overhead due to sales volumes and production activity, product mix and the proportion of sales to OEM customers, material costs, changes in the carrying value of inventory and manufacturing efficiencies. In particular, because a significant portion of our manufacturing overhead is fixed in the short term, the impact of increases or decreases in sales on our gross margin will likely not be in proportion to the changes in net sales.

Selling, General and Administrative (SG&A) Expense

SG&A expense for the quarter ended October 2, 2004 totaled \$29.4 million, or 31.4% of net sales, compared with \$10.9 million, or 34.5% of net sales, for the third quarter of 2003. SG&A expense for the nine months ended October 2, 2004 totaled \$51.6 million, or 28.1% of net sales, compared with \$33.7 million, or 34.2% of net sales, for the corresponding period in 2003. The increase in SG&A expenses was attributable primarily to the addition of \$9.9 million of SG&A expense of Spectra-Physics from the July 16, 2004 acquisition date, and to acquisition, integration and restructuring charges, including \$1.6 million for amortization of purchased intangibles and \$1.0 million for impairment of fixed assets at facilities impacted by consolidation. In addition, SG&A expense was impacted by an increase in variable selling expenses in the first half of 2004 associated with the higher sales volume, increased accounting and auditing fees due to our increased size, and outside consulting fees related to compliance with Section 404 of the Sarbanes Oxley Act of 2002.

We expect that SG&A expense for the fourth quarter will increase slightly compared with the third quarter level due to the addition of Spectra-Physics SG&A expenses for a full quarter, and to again be impacted significantly by acquisition and integration charges, and by outside consulting fees relating to compliance with Section 404 of the Sarbanes-Oxley Act of 2002. In general, we expect that SG&A expense will fluctuate as a percentage of sales in the future based on our sales level in any given period. Because a significant portion of our SG&A expense is fixed in the short term, these fluctuations will likely not be in proportion to the changes in net sales.

Research and Development (R&D) Expense

R&D expense for the quarter ended October 2, 2004 totaled \$8.3 million, or 8.9% of net sales, compared with \$4.4 million, or 14.1% of net sales, for the third quarter of 2003. R&D expense for the nine months ended October 2, 2004 totaled \$16.0 million, or 8.7% of net sales, compared with \$14.2 million, or 14.4% of net sales, for the corresponding period in 2003. The higher R&D expense was attributable primarily to the addition of expenses for Spectra-Physics from the acquisition date of July 16, 2004, which were \$4.3 million, offset in part by reductions in R&D spending in the fiber optic communications area, as well as by the results of our efforts to maximize the focus and efficiency of our R&D activities.

We expect that R&D expense will increase in the fourth quarter of 2004 compared with the third quarter level due to the addition of the R&D expense of Spectra-Physics for a full quarter. In addition, we believe that the continued development and advancement of our key products and technologies is critical to our future success, and we intend to continue to invest in key R&D initiatives, while working to ensure that the efforts

Edgar Filing: NEWPORT CORP - Form 10-Q

are focused and the funds are deployed efficiently. In general, we expect that R&D expense as a percentage of net sales will fluctuate in the future based on our sales level in any given period. Because of our commitment to continued product development, and because a significant portion of our R&D expense is fixed in the short term, these fluctuations will likely not be in proportion to the changes in net sales.

Page 24

Table of Contents

Interest and Other Income (Expense), Net

Interest and other expense, net, totaled \$3.7 million for the third quarter of 2004, compared with interest and other income, net of \$2.2 million in the third quarter of 2003. Interest and other expense, net, totaled \$1.2 million for the nine months ended October 2, 2004, compared with interest and other income, net of \$6.2 million in the corresponding period in 2003. Interest and other income (expense), net, was negatively impacted by a charge of \$1.7 million for losses on sales of marketable securities prior to their maturity in order to fund the cash portion of the purchase price for Spectra-Physics, and by a charge of \$1.4 million for the loss on a minority interest investment in a semiconductor component manufacturer that incurred an other-than-temporary reduction in value. In addition, it was negatively impacted by lower interest income earned due to lower cash balances, higher interest expense due to the debt issued to fund the purchase price of Spectra-Physics, and interest expense on lines of credit assumed in the acquisition.

We expect to incur interest and other expense, net, in the fourth quarter of 2004, primarily for interest expense incurred on short-term and long-term debt.

Income Taxes

The effective tax rate from continuing operations for the quarter ended October 2, 2004 was an expense of 5.3%, versus 0.0% in the corresponding prior-year period, and was an expense of 5.5% in the first nine months of 2004, compared with 0.0% in the corresponding prior-year period. We have recorded a valuation reserve against our deferred tax assets pursuant to SFAS No. 109, due to the uncertainty as to the timing and ultimate realization of those assets. As such, for the foreseeable future, the Federal tax provision related to future earnings will be substantially offset by a reduction in the valuation reserve, and any future pretax losses will not be offset by a tax benefit due to the uncertainty of the recoverability of the deferred tax assets. Accordingly, current and future tax expense will consist primarily of certain required state income taxes and taxes in certain foreign jurisdictions.

Overall, we expect our tax rate to increase compared with the third quarter 2004 level due to increased state income taxes, as well as additional taxes payable in foreign jurisdictions, resulting primarily from our acquisition of Spectra-Physics.

LIQUIDITY AND CAPITAL RESOURCES

Net cash provided by our operating activities of \$11.1 million for the nine months ended October 2, 2004 was attributable primarily to the cash provided by of our results of operations, a decrease in inventories and an increase in accrued expenses due to the timing of payments, offset in part by an increase in accounts and notes receivable as a result of an increase in sales at the end of the third quarter and cash paid for accrued restructuring costs.

Net cash provided by investing activities of \$0.1 million for the nine months ended October 2, 2004 consisted primarily of net proceeds from the sale of marketable securities of \$206.9 million, offset primarily by net cash used in the acquisition of Spectra-Physics of \$203.7 million and net purchases of property, plant and equipment of \$2.7 million.

Edgar Filing: NEWPORT CORP - Form 10-Q

Net cash provided by financing activities of \$5.0 million for the nine months ended October 2, 2004 consisted of proceeds of \$3.5 million received from the issuance of common stock in connection with stock option and employee stock purchase plans and proceeds from short-term borrowings of \$1.8 million, offset in part by payments of capital lease obligations of \$0.3 million.

At October 2, 2004, we had cash and cash equivalents of \$28.1 million and marketable securities of \$48.7 million. The majority of these securities are invested in one portfolio managed by a professional investment management firm, under the oversight of our senior financial management team. Such portfolio manager invests the funds allocated in accordance with our Investment Policy, which is reviewed regularly by our senior financial management and the Audit Committee of our Board of Directors. Our cash portfolio balances declined by over \$200 million in the third quarter of 2004 due to the cash paid to acquire Spectra-Physics, and we expect to use additional cash in the fourth quarter for acquisition, integration and related items. However, we expect that we will generate positive cash

Table of Contents

flow in the fourth quarter due to expected cash provided by operating activities plus the expected cash payment of approximately \$25 million related to a receivable for the net asset adjustment related to the acquisition of Spectra-Physics. We expect that our cash balances will fluctuate in the future based on factors such as cash used in or provided by ongoing operations, acquisitions or divestitures, investments in other companies, share repurchases, capital expenditures and contractual obligations, and changes in interest rates.

At October 2, 2004, we had in place a \$5.0 million revolving line of credit expiring December 31, 2004. Certain of the marketable securities that are being managed by the lending institution collateralize the line of credit. The line bears interest at the prevailing prime rate, or the prevailing London Interbank Offered Rate (2.49% at October 2, 2004) plus 1.5%, at our option, and an unused line fee of 0.25% per year. At October 2, 2004, there were no balances outstanding under the line of credit, with \$4.5 million available under the line, after considering outstanding letters of credit totaling \$0.5 million.

At October 2, 2004, we had in place two revolving lines of credit of 1.5 billion yen (\$13.5 million at October 2, 2004) at two Japanese banks expiring as follows: \$9.9 million on November 30, 2004 and \$3.6 million on March 31, 2005. The lines are not secured and bear interest at the prevailing bank rate. At October 2, 2004, we had \$13.5 million outstanding under these lines of credit, with no amounts available for borrowing. In addition to these lines of credit, we had three lines of credit of 800 million yen (\$7.2 million at October 2, 2004) to be used to sell notes receivable with recourse, which bear interest at the bank's prevailing rate. These lines have no expiration date. At October 2, 2004, we had \$3.2 million outstanding under these lines, with \$4.0 million available for the sale of notes receivable. The weighted average interest rate on all borrowings under these lines was 1.7%.

In 2003, we announced that our board of directors had approved a share repurchase program. The Board authorized us to purchase up to 3.9 million shares, or 10% of our then outstanding stock. The purchases may be made from time to time in the open market or in privately negotiated transactions, and the timing and amount of the purchases will be based on factors including our share price, cash balances, expected cash requirements and general business and market conditions. During 2003, we repurchased 285,529 shares under this program at a cost of \$4.5 million. We have not made any purchases under this program in 2004, and any future purchases will depend on the aforementioned factors.

On July 16, 2004, we acquired all of the issued and outstanding capital stock of Spectra-Physics. The purchase price was comprised of \$200 million in cash, a \$50 million promissory note issued to Thermo Electron Corporation bearing 5% interest payable quarterly with principal payable in full on July 16, 2009, and 3.2 million shares of our common stock. The purchase price is subject to a net asset adjustment, whereby the purchase price is adjusted based upon the net assets at the closing date compared with the net assets at December 31, 2003. We have estimated that this adjustment will result in payment to us of approximately \$25 million, which we expect to receive in the fourth quarter of 2004.

We believe our current working capital position, together with our expected future cash flows from operations will be adequate to fund our operations in the ordinary course of business, anticipated capital expenditures, debt payment requirements and other contractual obligations for the foreseeable future. However, this belief is based upon many assumptions and is subject to numerous risks (see *Risks Relating To Our Business*, on pages 27-36), and there can be no assurance that we will not require additional funding in the future.

We have no present agreements or commitments with respect to any material acquisitions of other businesses, products, product rights or technologies or any material capital expenditures. However, we will continue to evaluate acquisitions of and/or investments in products, technologies, capital equipment or improvements or companies that complement our business and may make such acquisitions and/or investments in the future. Accordingly, there can be no assurance that we will not need to obtain additional sources of capital in the future to finance any such acquisitions and/or investments. We cannot assure you that any such financing would be available, or that, if available, such financing would be obtainable on terms favorable to us and would not be dilutive.

Table of Contents

RISKS RELATING TO OUR BUSINESS

The following is a summary of certain risks we face in our business. They are not the only risks we face. Additional risks of which we are not presently aware or that we currently believe are immaterial may also harm our business and results of operations. The trading price of our common stock could decline due to the occurrence of any of these risks, and investors could lose all or part of their investment. In assessing these risks, investors should also refer to the other information contained or incorporated by reference in our other filings with the Securities and Exchange Commission, including our Annual Report on Form 10-K for the year ended December 31, 2003 and our Quarterly Report on Form 10-Q for the quarter ended October 2, 2004, including our consolidated financial statements and related notes included therein.

We may not be able to effectively or completely integrate the business and operations of Spectra-Physics, which may cause the market price of our common stock to decline significantly.

In connection with our acquisition of Spectra-Physics, we face several significant challenges in integrating the business and operations of Spectra-Physics with our own. We may not be able to achieve the integration in an effective, complete, timely or cost-efficient manner. The acquisition of Spectra-Physics approximately doubled our size, including with respect to revenue, number of employees and facilities. The acquisition and integration of Spectra-Physics with our operations involves substantial risks, including:

our overall ability to integrate and manage Spectra-Physics operations, products and personnel;

our ability to integrate the products of Spectra-Physics so that they complement our own;

our ability to continue the production and development of the Spectra-Physics products and underlying technology;

our ability to manufacture and sell the Spectra-Physics products;

a decline in the demand for the Spectra-Physics products in the marketplace;

our ability to retain and expand the customer base of Spectra-Physics;

customer dissatisfaction or performance problems with the Spectra-Physics products;

our ability to integrate the international operations of Spectra-Physics, particularly in those countries in which we have not had prior operations;

our ability to retain key personnel who remained employed with Spectra-Physics following the acquisition, and our ability to replace key personnel who did not remain employed with Spectra-Physics following the acquisition;

our ability to expand our financial and management controls and reporting systems and procedures to integrate and manage Spectra-Physics;

our ability to realize expected synergies resulting from the acquisition;

diversion of management's time and attention;

administrative integration and elimination of redundancies;

assumption of unknown or contingent liabilities, or other unanticipated events or circumstances;

Table of Contents

our ability to maintain the competitiveness of Spectra-Physics and its products and technology in the marketplace;

The business and operations of Spectra-Physics may not achieve the anticipated revenues and operating results. We may in the future choose to close or divest certain sectors or divisions of Spectra-Physics, which could require us to record losses relating to such closures or divestitures. Any of the foregoing risks could materially harm our business, financial conditions and results of operations.

In addition, we expect to continue to pursue acquisitions of other companies, technologies and complementary product lines in the future to expand our product offerings and technology base to further our strategic goals. We expect that we would face the same and other similar risks as referenced above in connection with any such future acquisitions.

Our operating results are difficult to predict, and if we fail to meet the expectations of investors and/or securities analysts, the market price of our common stock will likely decline significantly.

Our operating results in any given quarter have fluctuated and will likely continue to fluctuate. These fluctuations are typically unpredictable and can result from numerous factors including:

fluctuations in our customers' capital spending, industry cyclicality (particularly in the semiconductor industry), levels of government funding available to our customers, and other economic conditions within the markets we serve;

demand for our products and the products sold by our customers;

the level of orders within a given quarter and preceding quarters;

the timing and level of cancellations and delays of orders for our products;

the timing of product shipments within a given quarter;

our timing in introducing new products;

variations in the mix of products we sell in each of the markets in which we do business;

changes in our pricing policies or in the pricing policies of our competitors or suppliers;

market acceptance of any new or enhanced versions of our products;

the availability and cost of key components and raw materials we use to manufacture our products;

Edgar Filing: NEWPORT CORP - Form 10-Q

our ability to manufacture a sufficient quantity of our products to meet customer demand;

fluctuations in foreign currency exchange rates;

timing of new product introductions by our competitors; and

our levels of expenses.

We may in the future choose to change prices, increase spending, or add or eliminate products in response to actions by competitors or in an effort to pursue new market opportunities. These actions may also adversely affect our business and operating results and may cause our quarterly results to be lower than the results of previous quarters.

Page 28

Table of Contents

We often recognize a substantial portion of our sales in the last month of the quarter. Thus, unexpected variations in timing of sales, particularly for our higher priced, higher margin products such as our laser products, can cause significant fluctuations in our quarterly operating results. Orders expected in one quarter could shift to another period due to changes in the anticipated timing of customers' purchase decisions or rescheduled delivery dates requested by our customers. Our operating results for a particular quarter or year may be adversely affected if our customers, particularly our largest customers, cancel or reschedule orders, or if we cannot fill orders in time due to unexpected delays in manufacturing, testing, shipping, and product acceptance. Also, we base our manufacturing on our forecasted product mix for the quarter. If the actual product mix varies significantly from our forecast, we may not be able to fill some orders during that quarter, which would result in delays in the shipment of our products and could shift sales to a subsequent period. In addition, our expenses for any given quarter are typically based on expected sales, and if sales are below expectations in any given quarter, the adverse impact of the shortfall on our operating results may be magnified by our inability to adjust spending quickly to compensate for the shortfall.

Due to these and other factors, we believe that quarter-to-quarter comparisons of results from operations, or any other similar period-to-period comparisons, should not be construed as reliable indicators of our future performance. In any period, our results may be below the expectations of market analysts and investors, which would likely cause the trading price of our common stock to drop.

We are highly dependent on the semiconductor equipment industry, which is volatile and unpredictable.

A substantial portion of our current and expected future business comes from sales of subsystem and laser products to manufacturers of semiconductor fabrication, metrology and wafer inspection equipment and sales of capital equipment to integrated semiconductor device manufacturers. The semiconductor market has historically been characterized by sudden and severe cyclical variations in product supply and demand. The timing, severity and duration of these market cycles are difficult to predict, and we may not be able to respond effectively to these cycles. The continuing uncertainty in this market severely limits our ability to predict our business prospects or financial results in this market.

During industry downturns, our revenues from this market will decline suddenly and significantly. Our ability to rapidly and effectively reduce our cost structure in response to such downturns is limited by the fixed nature of many of our expenses in the near term and by our need to continue our investment in next-generation product technology and to support and service our products. In addition, due to the relatively long manufacturing lead times for some of the systems and, subsystems we sell to this market, we may incur expenditures or purchase raw materials or components for products we cannot sell. Accordingly, downturns in the semiconductor capital equipment market may materially harm our operating results. Conversely, when upturns in this market occur, we must be able to rapidly and effectively increase our manufacturing capacity to meet increases in customer demand that may be extremely rapid, and if we fail to do so we may lose business to our competitors and our relationships with our customers may be harmed.

A limited number of customers account for a significant portion of our sales to the semiconductor market, and we are highly dependent on the success of their products.

We rely on a limited number of customers for a significant portion of our sales to the semiconductor capital equipment market. Our top five customers in this market comprised approximately 59.9%, 72.5%, 75.2% and 61.1% of our sales to this market for the first nine months of 2004 (which include Spectra-Physics' results of operations for the portion of the third quarter after July 16, 2004), and for the fiscal years ended December 31, 2003, 2002 and 2001, respectively, and our top two customers accounted for approximately 40.0%, 51.6%, 54.3% and 38.5%, respectively, of our sales to this market in these periods. One customer of both Newport and Spectra-Physics in this market, KLA-Tencor Corporation, comprised 10.2% of our consolidated net sales in 2003. No other single customer comprised more than 10% of net sales during these periods. In the back-end packaging portion of this market, two customers constituted substantially all of our sales to this portion during 2003, and these customers have significantly decreased their capital spending in the first nine months of 2004 compared with the corresponding period in 2003. If any of our principal customers discontinues its relationship with us, replaces us as a vendor for certain products or suffers

Edgar Filing: NEWPORT CORP - Form 10-Q

downturns in its business, our business and results of operations could be harmed significantly. In addition, because a relatively small number of companies dominate the front-end equipment and back-end packaging portions of this market, and because those companies rarely change vendors in the middle of a product's life cycle, it may be particularly difficult for us to replace these customers if we lose their business.

Page 29

Table of Contents

The semiconductor capital equipment market is characterized by rapid technological change, frequent product introductions, changing customer requirements and evolving industry standards. Because our customers face uncertainties with regard to the growth and requirements of these markets, their products and components may not achieve, or continue to achieve, anticipated levels of market acceptance. If our customers are unable to deliver products that gain market acceptance, it is likely that these customers will not purchase our products or will purchase smaller quantities of our products. We often invest substantial resources in developing our systems and, subsystems in advance of significant sales of these systems and/or, subsystems to such customers. A failure on the part of our subsystem customers' products to gain market acceptance, or a failure of the semiconductor capital equipment market to grow would have a significant negative effect on our business and results of operations.

A significant portion of our future growth is dependent on the growth of 300mm semiconductor wafer processes and flip chip packaging.

A significant portion of our expected future system and subsystem business in the semiconductor capital equipment market is comprised of products for the fabrication of 300mm semiconductor wafers. Wafer fabrication equipment for 300mm wafers is in an early stage of its adoption, and is expected to be driven by the need for the ability to manufacture more semiconductor chips at lower cost. The deployment of such equipment requires a significant capital investment by semiconductor manufacturers, and many semiconductor manufacturers have delayed plans to deploy such equipment until market conditions improve. In addition, recently certain industry analysts have recently forecasted more conservative capital equipment spending and slower adoption of new technologies by semiconductor manufacturers in future periods. If the demand for capital equipment for 300mm wafers does not increase, or increases more slowly than expected, demand for our system and subsystem products will likewise be adversely affected, and our business and results of operations could be harmed significantly.

In addition, a significant portion of our expected future capital equipment sales to the integrated semiconductor device manufacturing market is comprised of systems for flip chip bonding and other advanced die bonding techniques. Demand for these systems is expected to be driven in significant part by increases in demand for new technologies in industries such as communications and consumer electronics that require the use of such manufacturing techniques. Our customers in this market have significantly decreased their capital spending in the first nine months of 2004. If the demand for electronic devices requiring flip chip bonding or other advanced die bonding techniques does not increase, or increases more slowly than expected, demand for our capital equipment will likewise be adversely affected, and our business and results of operations could be harmed significantly.

Many of the markets and industries that we serve are subject to rapid technological change, and if we do not introduce new and innovative products or improve our existing products, our business and results of operations will be negatively affected.

Many of our markets are characterized by rapid technological advances, evolving industry standards, shifting customer needs and new product introductions and enhancements. Products in our markets often become outdated quickly and without warning. We depend to a significant extent upon our ability to enhance our existing products, to anticipate and address the demands of the marketplace for new and improved technology, either through internal development or by acquisitions, and to be price competitive. If we or our competitors introduce new or enhanced products, it may cause our customers to defer or cancel orders for our existing products. In addition, because certain of our markets experience severe cyclicalities in capital spending, if we fail to introduce new products in a timely manner we may miss market upturns, and may fail to have our subsystem products designed into our customers' products. We may not be successful in acquiring, developing, manufacturing or marketing new products on a timely or cost-effective basis. If we fail to adequately introduce new, competitive products on a timely basis, our business and results of operations would be harmed.

Table of Contents

We offer products for multiple industries and must face the challenges of supporting the distinct needs of each of the markets we serve.

We offer products for a number of markets, including semiconductor capital equipment, scientific research, aerospace and defense, life and health sciences and fiber optic communications. Because we operate in multiple markets, we must work constantly to understand the needs, standards and technical requirements of several different industries and must devote significant resources to developing different products for these industries. Product development is costly and time consuming. Many of our products are used by our customers to develop, manufacture and test their own products. As a result, we must anticipate trends in our customers' industries and develop products before our customers' products are commercialized. If we do not accurately predict our customers' needs and future activities, we may invest substantial resources in developing products that do not achieve broad market acceptance. Our decision to continue to offer products to a given market or to penetrate new markets is based in part on our judgment of the size, growth rate and other factors that contribute to the attractiveness of a particular market. If our product offerings in any particular market are not competitive or our analyses of a market are incorrect, our business and results of operations would be harmed.

Because the sales cycle for some of our products is long and difficult to predict, and certain of our orders are subject to rescheduling or cancellation, we may experience fluctuations in our operating results.

Many of our capital equipment, system and subsystem products are complex, and customers for these products require substantial time to make purchase decisions. These customers often perform, or require us to perform extensive configuration, testing and evaluation of our products before committing to purchasing them. The sales cycle for our capital equipment, system and subsystem products from initial contact through shipment typically varies, is difficult to predict and can last as long as one year. The orders comprising our backlog are often subject to cancellation and changes in delivery schedules by our customers without significant penalty. We have from time to time experienced order rescheduling and cancellations that have caused our revenues in a given period to be materially less than would have been expected based on our backlog at the beginning of the period. If we experience such rescheduling and/or cancellations in the future, our operating results will fluctuate from period to period. These fluctuations could harm our results of operations and cause our stock price to drop.

If we are delayed in introducing our new products into the marketplace, or if our new products contain defects, our operating results will suffer.

Because certain of our products, particularly lasers, are sophisticated and complex, we may experience delays in introducing new products or enhancements to our existing products. If we do not introduce our new products or enhancements into the marketplace in a timely fashion, our customers may choose to use competitors' products. In addition, because certain of our markets, such as the semiconductor equipment market, are highly cyclical in nature, if we fail to timely introduce new products in advance of an upturn in the market's cycle, we may be foreclosed from selling products to many customers until the next cycle. As such, our inability to introduce new or enhanced products in a timely manner could cause our business and results of operations to suffer. In addition, our products may contain defects or undetected errors. As a result, we could incur substantial expenses in fixing any defects or undetected errors, which could result in damage to our competitive position and harm our business and results of operations.

We face significant risks from doing business in foreign countries.

Our business is subject to risks inherent in conducting business internationally. For the first nine months of 2004 (which include Spectra-Physics results of operations for the portion of the third quarter after July 16, 2004), and for the years ended December 31, 2003, 2002 and 2001, our international revenues accounted for approximately 34.6%, 31.5%, 29.1% and 30.4%, respectively, of total net sales, with a substantial portion

Edgar Filing: NEWPORT CORP - Form 10-Q

of international sales originating in Europe. We expect that international revenues will continue to account for a significant percentage of total net sales for the foreseeable future, and that, in particular, the proportion of our sales to Asian customers will increase as a result of the purchase of Spectra-Physics. As a result of our international operations, we face various risks, which include:

adverse changes in the political or economic conditions in countries or regions where we manufacture or sell our products;

Page 31

Table of Contents

challenges of administering our business globally;

compliance with multiple and potentially conflicting regulatory requirements including export requirements, tariffs and other trade barriers;

longer accounts receivable collection periods;

overlapping, differing or more burdensome tax structures;

adverse currency fluctuations;

differing protection of intellectual property;

difficulties in staffing and managing each of our individual foreign operations;

increased risk of exposure to terrorist activities; and

trade restrictions and licensing requirements.

As a result of our international operations, fluctuations in foreign exchange rates could affect the sales price in local currencies of our products in foreign markets, potentially making our products less price competitive. In addition, exchange rate fluctuations could increase the costs and expenses of our foreign operations or require us to modify our current business practices. If we experience any of the risks associated with international business, our business and results of operations could be significantly harmed.

We face substantial competition, and if we fail to compete effectively, our operating results will suffer.

The markets for our products are intensely competitive, and we believe that competition from both new and existing competitors will increase in the future. We compete in several specialized markets, against a limited number of companies in each market. We also face competition in some of our markets from our existing and potential customers who have developed or may develop products that are competitive to ours, or who engage subcontract manufacturers to manufacture OEM subassembly products on their behalf. Many of our existing and potential competitors are more established, enjoy greater name recognition and possess greater financial, technological and marketing resources than we do. Other competitors are small and highly specialized firms that are able to focus on only one aspect of a market. We compete on the basis of product performance, features, quality, reliability and price and on our ability to manufacture and deliver our products on a timely basis. We may not be able to compete successfully in the future against existing or new competitors. In addition, competitive pressures may force us to reduce our prices, which could negatively affect our operating results. If we do not respond adequately to competitive challenges, our business and results of operations would be harmed.

Acquisitions of additional businesses, products or technologies we may make could negatively affect our business.

Edgar Filing: NEWPORT CORP - Form 10-Q

We have in the past, and expect in the future, to achieve growth through a combination of internally developed new products and acquisitions. In recent years we have acquired several companies and technologies, and we expect to continue to pursue acquisitions of other companies, technologies and complementary product lines in the future to expand our product offerings and technology base to further our strategic goals. Each of our recent acquisitions involves, and any future acquisition would involve risks, including:

a decline in demand by our customers for the products of the acquired business;

Page 32

Table of Contents

our ability to integrate and manage the acquired business operations, products and personnel;

our ability to retain key personnel of the acquired businesses;

our ability to manufacture and sell the products of the acquired businesses;

our ability to expand our financial and management controls and reporting systems and procedures to integrate and manage the acquired businesses;

our ability to realize expected synergies resulting from the acquisition;

diversion of management's time and attention;

customer dissatisfaction or performance problems with the products or services of an acquired firm;

assumption of unknown or contingent liabilities, or other unanticipated events or circumstances; and

the need to record significant charges or write down the carrying value of intangible assets, which could lower our earnings.

We cannot guarantee that any business that we may acquire will achieve the anticipated revenues and operating results. We have in the past and may in the future choose to close or divest certain acquired companies, which could require us to record losses relating to such closures or divestitures. Any of these risks could materially harm our business, financial condition and results of operations.

If we fail to protect our intellectual property and proprietary technology, we may lose our competitive advantage.

Our success and ability to compete depend in large part upon protecting our proprietary technology. We rely on a combination of patent, trademark and trade secret protection and nondisclosure agreements to protect our proprietary rights. The steps we have taken may not be sufficient to prevent the misappropriation of our intellectual property, particularly in foreign countries where the laws may not protect our proprietary rights as fully as in the United States. The patent and trademark law and trade secret protection may not be adequate to deter third party infringement or misappropriation of our patents, trademarks and similar proprietary rights. In addition, patents issued to us may be challenged, invalidated or circumvented. Our rights granted under those patents may not provide competitive advantages to us, and the claims under our patent applications may not be allowed. We have in the past and may in the future be subject to or may initiate interference proceedings in the United States Patent and Trademark Office, which can demand significant financial and management resources. The process of seeking patent protection can be time consuming and expensive and patents may not be issued from currently pending or future applications. Moreover, our existing patents or any new patents that may be issued may not be sufficient in scope or strength to provide meaningful protection or any commercial advantage to us. We may in the future initiate claims or litigation against third parties for infringement of our proprietary rights in order to determine the scope and validity of our proprietary rights or the proprietary rights of our competitors, which claims could result in costly litigation and the diversion of our technical and management personnel. For example, we have notified several manufacturers of semiconductor wafer handling robots and load ports that we believe that they are infringing upon certain of our U.S. patents, and may institute litigation against one or more of such companies in the future. We will take such actions where we believe that they are of sufficient strategic or economic importance to us to justify the cost.

We have experienced, and may in the future experience, intellectual property infringement claims.

We have from time to time received communications from third parties alleging that we are infringing certain trademarks, patents or other intellectual property rights held by them. Whenever such claims arise, we evaluate their merits. Any claims of infringement brought by third parties could result in protracted and costly litigation, and we

Table of Contents

could become subject to damages for infringement, or to an injunction preventing us from selling one or more of our products or using one or more of our trademarks. Such claims could also result in the necessity of obtaining a license relating to one or more of our products or current or future technologies, which may not be available on commercially reasonable terms or at all. Any intellectual property litigation and the failure to obtain necessary licenses or other rights or develop substitute technology could have a material adverse effect on our business, financial condition and results of operations. In addition, the terms of our customer contracts typically require us to indemnify the customer in the event of any claim of infringement brought by a third party based on our products. Any such claims of this kind may have a material adverse effect on our business, financial condition or results of operations.

If we are unable to attract new employees and retain and motivate existing employees, our business and results of operations will suffer.

Our ability to maintain and grow our business is directly related to the service of our employees in each area of our operations. Our future performance will be directly tied to our ability to hire, train, motivate and retain qualified personnel. Competition for personnel in the technology marketplace is intense, and if we are unable to hire sufficient numbers of employees with the experience and skills we need or to retain our employees, our business and results of operations would be harmed.

We rely on several sole-source and limited source suppliers.

We obtain some of the materials used to build our systems and subsystems, such as the sheet steel used in some of our vibration isolation tables, and the laser crystals used in certain of our laser products, from single or limited sources due to unique component designs as well as specialized quality and performance requirements needed to manufacture our products. If our components or raw materials are unavailable in adequate amounts at acceptable quality levels or are unavailable on satisfactory terms, we may be required to purchase them from alternative sources, if available, which could increase our costs and cause delays in the production and distribution of our products. If we do not obtain comparable replacement components from other sources in a timely manner, our business and results of operations will be harmed. Many of our suppliers require long lead-times to deliver the quantities of components that we need. If we fail to accurately forecast our needs, or if we fail to obtain sufficient quantities of components that we use to manufacture our products, then delays or reductions in production and shipment could occur, which would harm our business and results of operations.

Our products could contain defects, which would increase our costs and harm our business.

Certain of our products, especially our laser products, are inherently complex in design and require ongoing regular maintenance. Further, the manufacture of these products often involves a highly complex and precise process. As a result of the technical complexity of these products, changes in our or our suppliers' manufacturing processes or the inadvertent use of defective materials by us or our suppliers could adversely affect our manufacturing yields and product reliability, which could in turn harm our business, operating results, financial condition and customer relationships.

We provide warranties for our products, and we accrue allowances for estimated warranty costs at the time we recognize revenue for the sale of the products. The determination of such allowances requires us to make estimates of product return rates and expected costs to repair or replace the products under warranty. We establish warranty reserves based on historical warranty costs for our products. If actual return rates or repair and replacement costs differ significantly from our estimates, adjustments to recognize additional cost of sales may be required in future periods.

Edgar Filing: NEWPORT CORP - Form 10-Q

Our customers may discover defects in our products after the products have been fully deployed and operated under peak stress conditions. In addition, some of our products are combined with products from other suppliers, which may contain defects. As a result, should problems occur, it may be difficult to identify the source of the problem. If we are unable to identify and fix defects or other problems, we could experience, among other things:

loss of customers;

Page 34

Table of Contents

- increased costs of product returns and warranty expenses;
- damage to our brand reputation;
- failure to attract new customers or achieve market acceptance;
- diversion of development and engineering resources; or
- legal action by our customers.

The occurrence of any one or more of the foregoing factors could seriously harm our business, financial condition and results of operations.

Our products are subject to potential product liability claims.

We are exposed to significant risks for product liability claims if personal injury or death results from the use of our products. We may experience material product liability losses in the future. We maintain insurance against product liability claims. However, our insurance coverage may not continue to be available on terms that we accept, if at all. This insurance coverage also may not adequately cover liabilities that we incur. Further, if our products are defective, we may be required to recall or redesign these products. A successful claim against us that exceeds our insurance coverage level, or any claim or product recall, could have a material adverse effect on our business, financial condition and results of operations.

While we believe we currently have adequate internal control over financial reporting, we are required to evaluate our internal control over financial reporting under Section 404 of the Sarbanes-Oxley Act of 2002, and any adverse results from such evaluation could result in a loss of investor confidence in our financial reports and have an adverse effect on our stock price.

Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002 (Section 404), beginning with our Annual Report on Form 10-K for our fiscal year ending January 1, 2005, we will be required to furnish a report by our management on our internal control over financial reporting. This report will contain, among other matters, an assessment of the effectiveness of our internal control over financial reporting as of the end of our fiscal year, including a statement as to whether or not our internal control over financial reporting is effective. This assessment must include disclosure of any material weaknesses in our internal control over financial reporting identified by management. This report must also contain a statement that our auditors have issued an attestation report on management's assessment of such internal controls.

The Committee of Sponsoring Organizations of the Treadway Commission (COSO) provides a framework for companies to assess and improve their internal control systems. Auditing Standard No. 2 provides the professional standards and related performance guidance for auditors to attest to, and report on, management's assessment of the effectiveness of internal control over financial reporting under Section 404. Management's assessment of internal controls over financial reporting requires management to make subjective judgments and, particularly because Section 404 and Auditing Standard No. 2 are newly effective, some of the judgments will be in areas that may be open to interpretation and therefore the report may be uniquely difficult to prepare and our auditors may not agree with our assessments.

Edgar Filing: NEWPORT CORP - Form 10-Q

While we currently believe our internal control over financial reporting is effective, we are still performing the system and process documentation and evaluation needed to comply with Section 404, which is both costly and challenging, and, as permitted by the Securities and Exchange Commission, will not complete such work with respect to Spectra-Physics until 2005. During this process, if our management identifies one or more material weaknesses in our internal control over financial reporting, we will be unable to assert such internal control is effective. If we are unable to assert that our internal control over financial reporting is effective as of January 1, 2005 (or if our auditors are unable to attest that our management's report is fairly stated or they are unable to express an opinion on the effectiveness of our internal controls), we could lose investor confidence in the accuracy and completeness of our financial reports, which would have an adverse effect on our stock price. In addition, if any

Table of Contents

such unidentified material weaknesses were to result in a material misstatement or omission in our financial statements, we could be subject to civil and criminal penalties, which could have a material adverse effect on our business, financial condition and results of operations.

While we currently anticipate being able to satisfy the requirements of Section 404 in a timely fashion, we cannot be certain as to the timing of completion of our evaluation, testing and any required remediation due in large part to the fact that there is no precedent available by which to measure compliance with these new requirements. If we are not able to complete our assessment in a timely manner, we and our auditors may be unable to conclude that our internal control over financial reporting is effective as of January 1, 2005.

Our financial results could be adversely affected by potential changes in the accounting rules governing the recognition of stock-based compensation expense.

We measure compensation expense for our employee stock compensation plans under the intrinsic value method of accounting prescribed by APB Opinion No. 25, Accounting for Stock Issued to Employees. Currently, the Financial Accounting Standards Board is considering changes to the accounting rules concerning the recognition of stock option compensation expense which would require us to account for equity compensation under the fair value method of accounting prescribed by SFAS No. 123, Accounting for Stock-Based Compensation. We provide disclosures of our operating results as if we had applied the fair value method of accounting on a pro forma basis in accordance with SFAS No. 148, Accounting for Stock-Based Compensation Transition and Disclosure. If these proposals are implemented, we and other companies currently using the intrinsic value method may be required to measure compensation expense using the fair value method, which would adversely affect our results of operations by significantly increasing our equity compensation expense.

Terrorism and acts of war and the associated economic uncertainties may negatively impact our business.

Terrorist attacks and military activities have created economic and political uncertainties, contributing to the recent global economic downturn. Future acts of terrorism or military action may create additional uncertainties and worsen or delay recovery of the global economy, which could negatively impact our business, financial condition or results of operations.

Natural disasters or power outages could disrupt or shut down our operations.

Our operations are susceptible to damages from earthquakes, floods, fire, loss of power or water supplies, or other similar contingencies. We have significant facilities in areas with above-average seismic activity. If any of our facilities were to experience a catastrophic loss or significant power outages, it could disrupt our operations, delay production, shipments and revenue, and result in large expenses to repair or replace the facility, any of which would harm our business. We are predominantly uninsured for losses and interruptions caused by earthquakes.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The principal market risks (i.e., the risk of loss arising from adverse changes in market rates and prices) to which we are exposed are foreign exchange rates which may generate translation and transaction gains and losses and interest rate risk.

Foreign Currency Risk

Operating in international markets sometimes involves exposure to volatile movements in currency exchange rates. The economic impact of currency exchange rate movements on our operating results is complex because such changes are often linked to variability in real growth, inflation, interest rates, governmental actions and other factors. These changes, if material, may cause us to adjust our financing and operating strategies. Consequently, isolating the effect of changes in currency does not incorporate these other important economic factors.

From time to time we use forward exchange contracts to mitigate the risks associated with certain foreign currency transactions entered into in the ordinary course of business, primarily foreign currency denominated receivables and payables. We do not engage in currency speculation. The forward exchange contracts generally require us to

Table of Contents

exchange U.S. dollars for foreign currencies at maturity, at rates agreed to at inception of the contracts. If the counterparties to the exchange contracts (AA or A+ rated banks) do not fulfill their obligations to deliver the contracted currencies, we could be at risk for any currency related fluctuations. Transaction gains and losses are included in our current net loss in our statement of operations. Net foreign exchange gains and losses were not material to our reported results of operations for the last three years.

Our operating income from international operations totaled \$3.2 million for the nine months ended October 2, 2004. As currency exchange rates change, translation of the income statements of international operations into U.S. dollars affects year-over-year comparability of operating results. We do not generally hedge translation risks because cash flows from international operations are generally reinvested locally. We do not enter into hedges to minimize volatility of reported earnings because we do not believe it is justified by the exposure or the cost.

Changes in currency exchange rates that would have the largest impact on translating future international operating profit include the euro, British pound, Japanese Yen, Canadian dollar and Taiwan dollar. We estimate that a 10% change in foreign exchange rates would not have had a material effect on reported net loss for the quarter ended October 2, 2004 or the nine months ended October 2, 2004. We believe that this quantitative measure has inherent limitations because, as discussed in the first paragraph of this section, it does not take into account any governmental actions or changes in either customer purchasing patterns or financing and operating strategies.

Interest Rate Risk

The interest rates we pay on certain of our debt instruments are subject to interest rate risk. Our unsecured line of credit bears interest at either the prevailing prime rate, or the prevailing London Interbank Offered Rate plus 1.5%, at our option. Our investments in marketable securities, which totaled \$48.7 million at October 2, 2004, are sensitive to changes in the general level of U.S. interest rates. We estimate that a 10% change in the interest rate earned on our investment portfolio or a 10% change in interest rates on our line of credit would not have had a material effect on our net loss for the quarter ended October 2, 2004, nor would it have had a material effect on our net loss for the nine months ended October 2, 2004.

The sensitivity analyses described in the interest rate and foreign exchange discussions above disregard the possibility that rates can move in opposite directions and that gains from one category may or may not be offset by losses from another category and vice versa.

Item 4. Controls and Procedures.

(a) Evaluation of Disclosure Controls and Procedures.

Our chief executive officer and our chief financial officer, after evaluating our disclosure controls and procedures (as defined in Securities Exchange Act of 1934 (the Exchange Act) Rules 13a-15(e) and 15-d-15(e)) as of the end of the period covered by this Quarterly Report on Form 10-Q (the Evaluation Date), have concluded that as of the Evaluation Date, our disclosure controls and procedures are effective to ensure that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms.

(b) Changes in Internal Control Over Financial Reporting.

There was no change in our internal control over financial reporting that occurred during the period covered by this Quarterly Report on Form 10-Q that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting. We continue to enhance our internal control over financial reporting, primarily by evaluating and enhancing our process and control documentation and increasing our systems security, in connection with our ongoing efforts to meet the requirements of Section 404 of the Sarbanes-Oxley Act of 2002. We discuss with and disclose these matters to the Audit Committee of our Board of Directors and our auditors.

Table of Contents**PART II OTHER INFORMATION****Item 2. Changes in Securities, Use of Proceeds and Issuer Purchases of Equity Securities.**

On July 16, 2004, we acquired all of the issued and outstanding capital stock of Spectra-Physics, Inc. and certain related entities from Thermo Electron Corporation (Thermo) pursuant to a Stock Purchase Agreement dated May 28, 2004 among us, Thermo and certain other related parties (the Stock Purchase Agreement). As part of the consideration under the Stock Purchase Agreement, we issued 3,220,300 shares of our common stock to Thermo Electron Corporation.

We did not employ any underwriters, brokers or finders in connection with such transaction. The securities were issued pursuant to an exemption from registration under the Securities Act of 1933, as amended (the Securities Act) in reliance on Section 4(2) of the Securities Act. Thermo represented to us its intention to acquire the securities for investment purposes only and not with a view to or for sale in connection with any public distribution thereof, and represented to us that it is an accredited investor as defined in Regulation D promulgated under the Securities Act. Appropriate legends were affixed to the instruments representing such securities.

Item 6. Exhibits.

Exhibit Number	Description of Exhibit
2.1	Stock Purchase Agreement dated May 28, 2004 by and among the Registrant, Thermo Electron Corporation and other related parties (incorporated by reference to Exhibit 2.1 to the Registrant's Current Report on Form 8-K filed on June 17, 2004).
