UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For fiscal year ended, SEPTEMBER 30, 2004

Commission file number 1-9965

KEITHLEY INSTRUMENTS, INC.

(Exact name of registrant as specified in its charter)

Ohio
(State or other jurisdiction of incorporation or organization)

34-0794417
(I.R.S. Employer Identification No.)

28775 Aurora Road, Solon, Ohio
(Address of principal executive offices)

44139
(Zip Code)

Registrant's telephone number, including area code (440) 248-0400

Securities registered pursuant to Section 12(b) of the Act:

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

Common Shares, Without Par Value
(Title of each class)

New York Stock Exchange
(Name of exchange on which registered)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is an accelerated filer (as defined in Rule 12b-2 of the Act).

Yes No

The aggregate market value of the Common Shares of the Registrant held by non-affiliates was \$280.6 million and the aggregate market value of the Class B Common Shares of the Registrant held by non-affiliates was \$.4 million for a total aggregate market value of all classes of Common Shares held by non-affiliates of \$281.0 million at March 31, 2004, the registrant's most recently completed second fiscal quarter. While the Class B Common Shares are not listed for public trading on any exchange or market system, shares of that class are convertible into Common Shares at any time on a share-for-share basis. The market values indicated were calculated based upon the last sale price of the Common Shares as reported by the New York Stock Exchange on March 31, 2004, which was \$20.71.

As of December 1, 2004 there were outstanding 14,072,607 Common Shares, without par value, and 2,150,502 Class B Common Shares, without par value.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Proxy Statement for the registrant's Annual Meeting of Shareholders to be held on February 12, 2005 (the 2005 Annual Meeting) are incorporated by reference in Part III in this Annual Report on Form 10-K (this Annual Report) and are identified under the appropriate items in this Annual Report.

PART I.

ITEM 1 - BUSINESS.

General

Keithley Instruments, Inc. is a corporation that was founded in 1946 and organized under the laws of the State of Ohio on October 1, 1955. Its principal executive offices are located at 28775 Aurora Road, Solon, Ohio 44139; telephone (440) 248-0400. References herein to the Company, Keithley, we or our are to Keithley Instruments, Inc. and its subsidiaries unless the context indicates otherwise.

Our website is www.keithley.com. We make our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed with or furnished to the U.S. Securities and Exchange Commission available to the public free of charge through our website as soon as reasonably practicable after making such filings.

Keithley's business is to design, develop, manufacture and market complex electronic instruments and systems geared to the specialized needs of electronics manufacturers for high-performance production testing, process monitoring, product development and research. Our primary products are integrated systems used to source, measure, connect, control or communicate electrical direct current (DC), radio frequency (RF) or optical signals. Our customers are engineers, technicians and scientists in manufacturing, product development and research functions. During fiscal 2004, approximately 30 percent of our orders were received from the semiconductor industry. Approximately 15 percent came from research and education customers. Approximately 20 percent came from the wireless customer group. Approximately 25 percent came from the electronic components and subassemblies manufacturers customer group, which includes customers in automotive, computer and peripherals, medical equipment, aerospace and defense, and manufacturers of components other than optoelectronic components. Less than 5 percent came from the optoelectronics customer group, with the remainder coming from customers in a variety of other industries. Although our products vary in capability, sophistication, use, size and price, they generally test, measure and analyze electrical, RF, optical or physical properties. As such, we consider our business to be in a single industry segment.

Business Strategy

Our strategy for sales growth is straightforward. We have focused our efforts on identifying test applications in segments of the electronics industry that have high rates of technology change, long-term growth in demand, a meaningful market size, and leverage to our measurement capabilities and/or other test applications. Additionally, new products are an important factor in our sales growth strategy.

We work closely with our customers to build partnerships in order to anticipate their current and future measurement needs. A thorough understanding of their applications coupled with our precision measurement technology enables us to add value to our customers' processes improving the quality, throughput and yield of their products, as well as to determine which test applications we will choose to serve. We also can increase sales by adding new customers to our existing customer base utilizing our applications expertise. In addition to production test customers, we also recognize the importance of traditional research customers. Whether these customers are doing basic or applied research in a university or an industrial laboratory, they give us a first-hand look at new industry trends and technologies, and they permit us to establish

long-lasting relationships.

We leverage our applications expertise and product platforms to other industries. Keithley technology is deployed in hundreds of applications where the most accurate and precise measurements are required, known as high-reliability measurements, in such fields as high-performance production test, military/aerospace, medical electronics and automotive electronics. By concentrating on interrelated industries and product technologies, we are able to gain insight into measurement problems experienced by one set of customers that can be solved for others. Our applications knowledge and technology solutions in one area build credibility as we expand to related fields, often using the same measurement platforms that are proven among a variety of customers.

We regularly invest 10 to 13 percent of net sales on developing new products. We believe this gives us a competitive advantage by delivering a solution that meets customer needs without adding features and costs that are not required or desired by the customer.

Product Offerings

We have approximately 500 products used to source, measure, connect, control or communicate DC, RF or optical signals. Product offerings include integrated systems solutions and instruments and PC plug-in boards that can be used as system components or stand-alone solutions. Prices per product vary. Parametric test systems used by semiconductor wafer manufacturers generally range in price from \$150,000 to \$500,000 depending upon the configuration specified by the customer. Our semiconductor characterization system ranges in price from \$30,000 to \$75,000 depending upon the configuration and options. Bench top instruments generally range in price from \$1,000 to \$10,000 on a stand-alone basis and from \$15,000 to \$25,000 when used as a system. Switch systems generally range in price from \$2,000 to \$50,000. PC plug-in boards are used for process control and data collection applications, and in production test for machine builders and system integrators. Selling prices generally range from \$200 to \$4,000.

~ 2 ~

Table of Contents

New Products During Fiscal Year 2004

We develop new products for specific industry applications and for general purposes to serve a larger customer constituency. New products introduced during fiscal 2004 included the following:

We introduced three new products to expand our product offering for research and education customers with the Model 2182A Nanovoltmeter, Model 6220 DC Current Source and Model 6221 AC and DC Current Source. The Model 2182A Nanovoltmeter is optimized for making low noise measurements in metrology, nanotechnology, superconductivity, and other low voltage/resistance research applications. The Models 6220/6221 Current Sources combine ease of use with exceptionally low current noise. The 2182A brings a powerful new set of capabilities to researchers when used in conjunction with our model 6220 or 6221, which allows users to make resistance, pulsed I-V and differential conductance measurements. The combination also is useful in many nanotechnology applications because of its ability to measure resistance while dissipating very little power in the device under test.

We introduced two new products specifically designed to serve the semiconductor industry. The Model S470 Parametric Test System is optimized for production testing of 200mm wafers at the 130nm CMOS node and below. Based on our production-proven Model S400 Series testers, the Model S470 provides a low cost-per-pin solution for our customers in both technology development and process monitoring. It is available with options such as RF testing at up to 40GHz, adaptive test software that automates first-level process diagnostics, and SECS/GEM for 200mm factory automation. The S680DC/RF Parametric Test System is the latest addition to our S600 Series family. The S680 is designed to help chipmakers of all sizes control their testing costs by increasing throughput and increasing equipment reuse. In addition, we upgraded our popular Model 4200 Semiconductor Characterization System with our Keithley Test Environment-Interactive (KTEI) software v5.0. Model 4200-SCS users will now have a standard test system for running stress-measure and reliability tests for device lifetime analysis and quality assurance in addition to semiconductor characterization tests.

We expanded the capabilities of our Model 2800 for the wireless industry. The GSM option for the 2800 RF Power Analyzer enables the 2800 to make GSM transmitter modulation quality measurements in addition to the complete suite of spectral power measurements already provided. This enables the 2800 to test more mobile phone handset types on a single production line.

The Model 2790A SourceMeter[®] Airbag Inflator DC Electrical Test System is designed to meet the testing requirements for airbag inflators and modules in one compact, cost-effective package for the automotive industry.

We also introduced two new cards for our Model 4500 Multi-Channel I-V Test System to appeal to a broader range of customers for automated testing in multi-head (multi-device under test) production test environments.

We continued to invest in solutions for emerging measurement needs such as nanotechnology with the introduction of our Nanotech Toolkit. The Nanotech Toolkit is a dedicated characterization system for use with our Model 4200-SCS and was specifically designed for a variety of tests that assist researchers in making the very precise and complex electrical measurements associated with nanotechnology.

Geographic Markets and Distribution

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

During fiscal 2004, all of the Company's products were manufactured in Ohio and were sold throughout the world in over 70 countries. The Company's principal markets are the United States, Europe and the Pacific Basin.

In the United States, our products are sold by our own sales personnel and through direct marketing and catalog mailings. Outside the U.S., we market our products directly in countries in which we have sales offices and through distributors or manufacturers' representatives in other countries. Keithley has subsidiary sales and service offices located in Great Britain, Germany, France, the Netherlands, Switzerland, Italy and Japan. We also have sales offices in Belgium, Finland, Sweden, China, Korea, Taiwan, India and Singapore. Sales in markets outside the above named locations are made through independent sales representatives and distributors.

Sources and Availability of Raw Materials

Our products require a wide variety of electronic and mechanical components, most of which are purchased. We have multiple sources for the vast majority of the components and materials we use; however, there are some instances where the components are obtained from a sole-source supplier. If a sole-source supplier ceased to deliver, we could experience a temporary adverse impact on operations; however, we believe alternative sources could be developed quickly. Although shortages of purchased materials and components have been experienced from time to time, these items have generally been available as needed.

~ 3 ~

Table of Contents

Patents

Electronic instruments of the nature we design, develop and manufacture generally cannot be patented in their entirety. Although we hold patents with respect to certain of our products, we do not believe our business is dependent to any material extent upon any single patent or group of patents, because of the rapid rate of technological change in the industry.

Seasonal Trends and Working Capital Requirements

Our business is not subject to significant seasonal trends. However, many of the industries we serve, including but not limited to the semiconductor industry, the wireless communications industry, the optoelectronics industry and other sectors of the global electronics industry, have historically been cyclical. We do not have any unusual working capital requirements.

Customers

Our customers generally are involved in production test, engineering research and development, electronic service or repair, and educational and governmental research. During the fiscal year ended September 30, 2004, no one customer accounted for more than 10% of our sales. We do not believe that the loss of any one customer would materially affect our sales or net income.

Backlog

Our backlog of unfilled orders amounted to approximately \$15,973,000 as of September 30, 2004 and approximately \$14,506,000 as of September 30, 2003. We expect that substantially all of the orders included in the 2004 backlog will be delivered during fiscal 2005. While past experience indicates that a portion of orders included in backlog may be canceled, we do not believe that cancellations will materially affect our future sales or net income.

Competition

The Company competes on the basis of quality, performance, service and price, with quality and performance frequently being dominant. There are many firms in the world engaged in the manufacture of electronic measurement instruments, some of which are larger and have greater financial resources than the Company. In general, we compete with a number of companies in specialized areas of other test and measurement products and one large broad line measurement products supplier, Agilent Technologies, Inc.

Research and Development

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

Our engineering development activities are directed toward the development of new products that will complement, replace or add to the products currently included in our product line. We do not perform basic research, but on an ongoing basis we utilize new component and software technologies in the development of our products. The highly technical nature of our products and the rapid rate of technological change in the industry require a large and continuing commitment to engineering development efforts. Product development expenses were \$15,017,000 in 2004, \$13,488,000 in 2003 and \$13,987,000 in 2002, or approximately 11%, 13% and 14% of net sales, respectively, for each of the last three fiscal years.

Government Regulations

We believe our current operations and uses of property, plant and equipment conform in all material respects to applicable laws and regulations. Keithley has not experienced, nor do we anticipate, any material claim or material capital expenditure in connection with environmental laws and other regulations.

Employees

As of September 30, 2004, the Company employed approximately 632 persons, 173 of whom were located outside the United States. None of our employees are covered under the terms of a collective bargaining agreement, and we believe that relations with our employees are good.

Foreign Operations and Export Sales

Information related to foreign and domestic operations and export sales is contained in Note L of the Notes to the Consolidated Financial Statements included in Item 8 of this Annual Report.

Keithley has significant revenues from outside the United States which increase the complexity and risk to the Company. These risks include increased exposure to the risk of foreign currency fluctuations and the potential economic and political impacts from conducting business in foreign countries. With the exception of changes in the value of foreign currencies, which is not possible to predict, we believe our foreign subsidiaries and other larger international markets are in countries where the economic and political climate generally is stable.

~ 4 ~

Table of Contents**ITEM 2 - PROPERTIES.**

The Company's principal administrative, sales, marketing, manufacturing and development activities are conducted at two Company-owned buildings in Solon, Ohio. The two buildings total approximately 200,000 square feet and sit on approximately 33 acres of land. The Company also owns another 50,000 square foot building on 5.5 acres of land adjacent to its executive offices. This facility is currently being leased to others, but is available for expansion should additional space be required. The Company also maintains a number of sales and service offices in the United States and overseas. We believe the facilities owned and leased are well maintained, adequately insured and suitable for their present and intended uses.

ITEM 3 - LEGAL PROCEEDINGS.

We are subject to various litigation matters and claims that occur in the normal course of business. While the results of such litigation matters and claims cannot be predicted with certainty, management believes that their final outcome will not have a material adverse impact on the financial position or results of operations of the Company.

ITEM 4 - SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

No matter was submitted to a vote of security holders during the fourth quarter of the fiscal year covered by this report.

EXECUTIVE OFFICERS OF THE REGISTRANT:

Certain information regarding our executive officers is set forth below:

<u>Name</u>	<u>Position</u>	<u>Age</u>
Joseph P. Keithley	Chairman of the Board of Directors, President and Chief Executive Officer	55
Philip R. Etsler	Vice President Human Resources	54
Alan S. Gaffney	Vice President Commercial Marketing and Information Systems	34
Mark A. Hoersten	Vice President Business Management	46
Larry L. Pendergrass	Vice President New Product Development	49
John A. Pesec	Vice President Worldwide Sales and Support	44
Mark J. Plush	Vice President and Chief Financial Officer	55
Linda C. Rae	Senior Vice President and General Manager	39
Gabriel A. Rosica	Executive Vice President	64

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

Debra A. Sibila Corporate Controller

44

Joseph P. Keithley was elected Chairman of the Board of Directors in February 1991. He was elected Chief Executive Officer in November 1993, and President in May 1994. He has been a Director since 1986, and was elected Vice Chairman of the Board in February 1988. Mr. Keithley joined the Company in 1976 and held various positions in production, customer service, sales and marketing prior to being elected Vice President of Marketing in 1986.

Philip R. Etsler has been Vice President of Human Resources since February 1990. He joined the Company in January 1986 as Personnel Director, which was an executive officer position.

Alan S. Gaffney was elected Vice President Commercial Marketing and Information Systems in May 2003. He joined Keithley in July 1999 as Direct Marketing Manager. He became Director of Worldwide Communications and Marketing Support in May 2000. Prior to joining Keithley, Mr. Gaffney held the position of Sales and Marketing Manager at Diebold, Inc., a global provider of self-service transaction solutions, security systems and services to financial institutions, retailers, colleges and universities, healthcare facilities and utilities.

Mark A. Hoersten was elected Vice President Business Management in May 2003. He joined Keithley in June 1980 as a Design Engineer and held various positions in product development and marketing until September 1997 when Mr. Hoersten became the Director of Marketing. He was promoted to Telecommunications Test Business Manager in July 1999, and General Manager in April 2001.

Larry L. Pendergrass joined Keithley in May 2003 as Vice President, New Product Development. Prior to joining Keithley, Mr. Pendergrass had over 20 years experience in research and development, product development, and manufacturing engineering in various roles including Section Manager, Project Manager and Project Leader with Agilent Technologies and Hewlett-Packard.

John A. Pesec was elected Vice President Worldwide Sales and Support in September 2002. Mr. Pesec joined Keithley in July 1990 and held various positions including Director of Pacific Basin Operations from February 1995 to January 1998, Director Semiconductor Sales from January 1998 to March 1999, Director of Sales from March 1999 to April 2001, and Managing Director Worldwide Sales from April 2001 to September 2002.

Mark J. Plush was elected Vice President and Chief Financial Officer in October 1998. Mr. Plush joined the Company in March 1982 as Controller and was elected an executive officer in February 1989.

~ 5 ~

Table of Contents

Linda C. Rae was elected Senior Vice President and General Manager in May 2003. Ms. Rae joined Keithley in September 1995 as a Product Marketer and held various marketing positions including Component Test Business Manager from July 1999 to June 2000, Business Manager of Optoelectronics from June 2000 to April 2001, and General Manager from April 2001 to May 2003.

Gabriel A. Rosica was elected Executive Vice President in April 2001. He joined Keithley in February of 1996 as General Manager and became Senior Vice President in January 1997. Prior to joining the Company, Mr. Rosica was a member of the Company's Board of Directors from 1993 to 1996. While serving on the Company's Board, he held various positions with Bailey Controls Company including Chief Operating Officer, Senior Vice President of Systems Operations, and Senior Vice President, Americas, Pacific & Far East of Elsas Bailey.

Debra A. Sibila was elected a Corporate Officer in May 2004. She joined Keithley in July 2003 as Corporate Controller. Prior to joining Keithley Instruments, Inc., Ms. Sibila was Division Controller for Goodrich Power Systems, which was acquired from TRW. Ms. Sibila was with TRW for 20 years and held a variety of accounting and finance positions.

PART II.**ITEM 5 - MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.**

The Company's Common Shares trade on the New York Stock Exchange under the symbol KEI. The high and low prices shown below are sales prices of the Company's Common Shares as reported on the NYSE. There is no established public trading market for the Class B Common Shares; however, they are readily convertible on a one-for-one basis into Common Shares.

Fiscal 2004	High	Low	Cash Dividends Per Common Share	Cash Dividends Per Class B Common Share
First Quarter	\$ 19.16	\$ 14.16	\$.0375	\$.0300
Second Quarter	25.73	18.35	.0375	.0300
Third Quarter	22.90	19.23	.0375	.0300
Fourth Quarter	22.07	15.61	.0375	.0300
Fiscal 2003				
First Quarter	\$ 13.92	\$ 8.01	\$.0375	\$.0300
Second Quarter	14.13	9.90	.0375	.0300
Third Quarter	15.20	10.60	.0375	.0300
Fourth Quarter	17.84	13.90	.0375	.0300

The approximate number of shareholders of record of Common Shares and Class B Common Shares, including those shareholders participating in the Dividend Reinvestment Plan, as of December 1, 2004 was 2,473 and 4, respectively.

Equity Compensation Plan Information as of September 30, 2004

Plan category	Number of securities to be issued upon exercise of outstanding options (a)	Weighted-average exercise price of outstanding options (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders	3,404,846	\$ 19.88	1,811,012 ⁽¹⁾
Equity compensation plans not approved by security holders			
Total	3,404,846	\$ 19.88	1,811,012⁽¹⁾

⁽¹⁾ Includes 247,638 shares available for issuance under the 1993 Employee Stock Purchase and Dividend Reinvestment Plan.

Purchases of Equity Securities

On December 10, 2003, the Company announced its Board of Directors had approved an open market stock repurchase program (the 2003 program). Under the terms of the 2003 program, the Company may purchase up to 2,000,000 Common Shares, which represented approximately 13 percent of the outstanding shares at the time the program was approved, over a three-year period. The purpose of the 2003 program is to

~ 6 ~

Table of Contents

offset the dilutive effect of stock option and stock purchase plans. Common Shares held in treasury may be reissued in settlement of stock purchases under these plans. The 2003 program replaced the prior program, which expired in December 2003 and had substantially the same terms as the 2003 program. There were no shares repurchased in fiscal 2004. During fiscal 2003, the Company repurchased 243,200 shares at an average price per share of \$11.41 under the repurchase program that expired in December 2003.

ITEM 6 - SELECTED FINANCIAL DATA.

The following table sets forth consolidated selected financial data for the Company. The financial data should be read in conjunction with the Financial Statements and Notes thereto, included in Item 8 of this Annual Report, and with Management's Discussion and Analysis of Financial Condition and Results of Operations, included in Item 7 of this Annual Report.

(In thousands of dollars except for per share data)	For the years ended September 30,				
	2004	2003	2002	2001	2000
Operating Results:

Forward-Looking Statements

Certain of the matters and subject areas discussed in this Annual Report on Form 10-K contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical information provided herein are forward-looking statements. Forward-looking statements generally include words such as anticipates, expects, believes, intends, estimates, and similar expressions, and include those statements regarding our expectations, intentions and beliefs with regard to the future, including our efforts involving lean manufacturing, ERP and CRM system implementations, order cancellations, cost reduction efforts, conditions of the electronics industry, general economic conditions, technology or other trends and known uncertainties. These forward-looking statements involve certain risks and uncertainties that could cause actual results to differ materially from those anticipated in the forward-looking statements as a result of many factors, including those more fully described under the caption Factors That May Affect Future Results and elsewhere in this Annual Report. These forward-looking statements reflect management's analysis, judgment, belief or expectation only as of the date hereof. We assume no obligation to update any forward-looking statements.

General

Our business is to design, develop, manufacture and market complex electronic instruments and systems geared to the specialized needs of electronics manufacturers for high-performance production testing, process monitoring, product development and research. Our primary products are integrated systems used to source, measure, connect, control or communicate electrical DC, RF or optical signals. Our customers are engineers, technicians and scientists in manufacturing, product development and research functions. During fiscal 2004, approximately 30 percent of total orders were received from the semiconductor industry. Approximately 15 percent came from research and education customers. Approximately 20 percent came from the wireless customer group. Approximately 25 percent came from the electronic components and subassemblies manufacturers customer group, which includes customers in automotive, computers and peripherals, medical equipment, aerospace and defense, and manufacturers of components other than optoelectronic components. Less than 5 percent came from the optoelectronics customer group, with the remainder coming from customers in a variety of other industries. Although our products vary in capability, sophistication, use, size and price, they generally test, measure and analyze electrical, RF, optical or physical properties. As such, we consider our business to be in a single industry segment.

Beginning in the second half of fiscal year 2001, an economic downturn affecting the worldwide electronics industry had a negative impact on many of the industries we serve, including but not limited to the semiconductor industry, the wireless communications industry, the optoelectronics industry, and electronic components and subassemblies manufacturers. During much of fiscal 2003, conditions continued to negatively affect our customers and, therefore, our results. However, during the fourth quarter of fiscal 2003 we noted an improved environment in the electronics industry. During fiscal 2004, we noted improving conditions in the health of our customers and we experienced sequential growth throughout the year. However, we continue to believe that our ability to achieve a higher level of orders in the future will be driven by our customers' spending patterns as they invest in new capacity or upgrade their lines for their new product offerings, as well as our ability to gain market share.

Effective April 1, 2002, we began serving our Japanese customers through a direct sales force, the majority of which are Japanese nationals. Prior to April 1, 2002, we sold our products through a Japanese distributor, who in turn, sold them to end-customers. The effect of going direct

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

increased net sales and gross profits as we previously sold our products to the Japanese distributor at a discount. However, selling, general and administrative expenses have increased.

Effective January 1, 2003, we began to sell our products in the United States through a direct sales force. Prior to January 1, 2003, we sold our products through sales representatives to which we paid a commission. The change in our sales channel allowed us to build a sales network of focused, highly trained sales engineers who specialize in measurement expertise and problem-solving for customers and enhanced our ability to sell not only in the United States, but to U.S. companies with foreign manufacturing operations. During the first quarter of fiscal 2003, we incurred approximately \$600 in one-time costs as we paid both commissions to sales representatives and salaries to our own sales employees. We expect that selling through our own sales force in the United States will be favorable to earnings during times of strong U.S. sales and unfavorable during times of depressed U.S. sales as a greater portion of U.S. selling costs are now fixed. During fiscal 2004, we saw the financial benefits from leveraging our selling and support costs.

Beginning near the end of fiscal 2002, we began to incur costs in preparation for the transition to new ERP (Enterprise Resource Planning) and CRM (Customer Relationship Management) software systems. We went live with Phase 1 of ERP in the United States on May 1, 2003, with minimal disruptions to our business. We continued our ERP and CRM implementations throughout fiscal 2004 and will finalize implementation in fiscal 2005. The financial impact of the ERP and CRM projects was a charge to selling, general and administrative expenses of approximately \$889 in fiscal 2004, \$735 in fiscal 2003 and approximately \$12 in 2002, including depreciation expense of the software and other expenses that are not capitalizable under the respective accounting guidance. Included in capital expenditures was \$336, \$1,719 and \$676 in fiscal 2004, 2003 and 2002, respectively, related to the ERP and CRM systems.

~ 8 ~

Table of Contents

Over the last two to three years, we have made major changes to the way we purchase and manufacture through our adoption of lean manufacturing principles. As we have progressed with the implementation, we have seen significant improvements in our lean manufacturing processes. Customer lead times are shorter resulting in improved on-time customer delivery and inventory turns. During fiscal 2003, manufacturing costs increased due to the lean manufacturing implementation. However, during fiscal 2004, we have lowered our cost to manufacture, which contributed to the gross profit margin improvement during the fiscal year.

During fiscal 2004, the Company increased its investment in new product development, particularly for RF products, by opening a west coast development center.

Critical Accounting Policies and Estimates

Management has identified the Company's critical accounting policies. These policies have the potential to have a more significant impact on our financial statements, either because of the significance of the financial statement item to which they relate, or because they require judgment and estimation due to the uncertainty involved in measuring, at a specific point in time, events which will be settled in the future.

Use of estimates:

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the reported financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from those estimates.

Revenue recognition:

The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable and collectibility is reasonably assured. Generally, these criteria are met at the time the product is shipped under FOB shipping terms. Upon shipment, a provision is made for estimated costs that may be incurred for product warranties and sales returns. When other significant obligations remain after products are delivered, revenue is recognized only after such obligations are fulfilled.

Inventories:

Inventories are stated at the lower of cost or market. Cost is determined based on a currently-adjusted standard, which approximates actual cost on a first-in, first-out basis. We periodically review our recorded inventory and estimate a reserve for obsolete or slow-moving items. Such estimates are difficult to make under current economic conditions. If actual demand and market conditions are less favorable than those projected by management, additional reserves may be required. If actual market conditions are more favorable than anticipated, our cost of sales will be lower than expected in that period.

Income taxes:

Keithley is subject to taxation from federal, state and international jurisdictions. The annual provision for income taxes and the determination of the resulting deferred tax assets and liabilities involves a significant amount of judgment by management. Judgment also is applied in determining whether the deferred tax assets will be realized in full or in part. In evaluating our ability to recover our deferred tax assets, we consider all available positive and negative evidence including our past operating results, the existence of cumulative losses in the most recent fiscal years, and our forecast of future taxable income. In determining future taxable income, we are responsible for assumptions utilized including the amount of federal, state and international pretax operating income, the reversal of book versus tax differences, and the implementation of feasible and prudent tax planning strategies. These assumptions require significant judgment about the forecasts of future taxable income and are consistent with the plans and estimates we are using to manage the underlying business. A valuation allowance against deferred tax assets has been established related to foreign tax credits and research and development credits which may not be realized due to the uncertainty of future profit levels or foreign source income. We intend to maintain this valuation allowance until sufficient positive evidence exists to support reversal of the valuation allowance, until such credits are realized or until such credits expire. Our income tax expense (benefit) recorded in the future will be reduced to the extent of offsetting decreases in our valuation allowance. The realization of our remaining deferred tax assets is primarily dependent upon forecasted future taxable income. Any significant reduction in estimated forecasted future taxable income may require that we record an additional valuation allowance against our deferred tax assets. An increase in the valuation allowance would result in additional income tax expense in such period and could have a significant impact on our future earnings. In addition, the calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax regulations in various tax jurisdictions. We recognize potential liabilities for anticipated tax issues based upon our estimate of whether additional taxes will be due. If payment of these amounts ultimately proves to be unnecessary, the reversal of the liabilities would result in tax benefits being recognized in the period when we determine the liabilities are no longer necessary. If our estimate of tax liabilities proves to be less than the ultimate assessment, a further charge to income tax expense would result.

Pension plan:

Retirement benefit plans are a significant cost of doing business that represent obligations that will be ultimately settled far in the future and therefore are subject to estimation. Pension accounting is intended to reflect the recognition of future benefit costs over the employee's approximate service period based on the terms of the plans and the investment and funding decisions made by us. We are required to make assumptions regarding such variables as the expected long-term rate of return on assets and the discount rate applied to determine service cost and interest cost to arrive at pension income or expense for the year. As the rate of return on plan assets assumption is a long-term estimate, it can differ materially from the actual return realized on plan assets in any given year, especially when markets are highly volatile. We have analyzed

Table of Contents

the rates of return on assets used and determined that the rates we use are reasonable based on the plans' historical performance relative to the overall markets in the countries where the plans are effective, as well as the plans' asset mix between equities and fixed income investments. Assumed discount rates are used in measurements of the projected, accumulated and vested benefit obligations and the service and interest cost components of net periodic pension cost. We make estimates of discount rates to reflect the rates at which the pension benefits could be effectively settled. In making those estimates, management evaluates rates of return on high-quality, fixed-income investments currently available and expected to be available during the period to maturity of the pension benefits. Management will continue to assess the expected long-term rate of return on plan assets and discount rate assumptions for both the U.S. plan and non-U.S. plan based on relevant market conditions as prescribed by accounting principles generally accepted in the U.S. and will make adjustments to the assumptions as appropriate. Pension income or expense is allocated to Cost of goods sold, Selling, general and administrative expenses, and Product development expenses in the Consolidated Statements of Operations.

Stock compensation plans:

We have two active stock option plans and an employee stock purchase plan. We have chosen the disclosure provisions of Statement of Financial Accounting Standards No. 148, *Accounting for Stock-based Compensation Transition and Disclosure* an amendment of FASB Statement No. 123 (SFAS 148), and as such, no compensation cost for the stock option and stock purchase plans has been recognized in the consolidated financial statements, except in certain cases when stock options were granted below the market price of the underlying stock on the date of grant or variable accounting is required under applicable accounting guidance. For disclosure purposes, the valuation of stock issued to employees requires management to determine estimates for the expected life of the options, the expected risk-free interest rate during the expected life of the option, the expected volatility of the stock price over the expected life of the option, and the expected dividend yield. These estimations are significant factors in the valuation model, and actual results could differ materially from these estimates. We currently use the Black-Scholes model to value options. On March 31, 2004, the FASB issued an exposure draft, *Share-Based Payment*, that would eliminate the ability to account for share-based compensation transactions using APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and would require instead that such transactions be accounted for using a fair-value-based method and require companies to record compensation expense for stock option and most stock purchase plans. A final statement is expected to be released in late 2004. Currently, the provisions of the exposure draft would be effective for the Company beginning with the fourth quarter of fiscal 2005.

Results of Operations

The following discussion should be read in conjunction with the Financial Statements and Supplementary Data included in Item 8 of this Annual Report.

Percent of net sales for the years ended September 30:

	<u>2004</u>	<u>2003</u>	<u>2002</u>
Net sales	100.0	100.0	100.0
Cost of goods sold	38.9	44.7	43.8
Selling, general and administrative expenses	39.6	46.6	46.7
Product development expenses	10.7	12.6	14.4
Severance charges		0.8	1.5
Operating income (loss)	10.8	(4.7)	(6.4)

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

Investment income	(0.4)	(0.8)	(1.4)
Interest expense	0.1	0.2	0.2
	<u> </u>	<u> </u>	<u> </u>
Income (loss) before income taxes	11.1	(4.1)	(5.2)
Provision (benefit) for income taxes	3.0	(0.2)	(2.0)
	<u> </u>	<u> </u>	<u> </u>
Net income (loss)	8.1	(3.9)	(3.2)
	<u> </u>	<u> </u>	<u> </u>

Net income for 2004 was \$11,381, or \$0.69 per diluted share. The current year's tax rate was 26.8% as a result of the utilization of tax credits and benefits from extraterritorial income exclusion. The net loss for 2003 was \$4,192, or \$0.27 per share. Included in the 2003 results, was the establishment of a tax valuation allowance in the income tax provision of \$1,822 or \$0.12 per share and severance charges of \$845 pretax, or \$0.03 per share after taxes. The net loss was \$3,080, or \$0.20 per share in 2002 including \$1,461 pretax for severance charges or \$0.06 per share after taxes.

Net sales were \$140,248 in 2004 compared with \$106,718 in 2003 and \$96,922 in 2002. Net sales increased 31% in 2004 from 2003. Approximately four percentage points of the 31 percent increase were due to the effect of a weaker U.S. dollar. Net sales increased 10% in 2003 from 2002 with approximately half of the increase due to a weaker U.S. dollar versus foreign currencies. The downturn in the electronics industry had a negative effect on results for all of 2002 and into 2003. Throughout 2004, we noted improving conditions in the health of our customers and the electronics industry as a whole. Geographically, sales were up 28% in the United States and the Pacific Basin, and up 33% in Europe during 2004. In 2003, sales were down 10% in the United States, up 13% in Europe, and up 45% in the Pacific Basin region from 2002.

Cost of goods sold as a percentage of net sales was 38.9%, 44.7% and 43.8% in 2004, 2003 and 2002, respectively. The improvement in 2004 was due to spreading fixed manufacturing costs over higher sales volume, lower manufacturing costs as a result of the progress we made in fine-tuning

~ 10 ~

Table of Contents

our lean manufacturing process and improved product mix. The increase in 2003 was due to higher costs related to the lean manufacturing startup and a less favorable product mix, partially offset by higher margins in Japan as a result of moving to a direct sales force and better margins in Europe due to a weaker U.S. dollar. Cost of goods sold in 2002 was negatively impacted by product mix, as well as spreading fixed costs over lower manufacturing volumes. This was partially offset by a weaker U.S. dollar. Foreign exchange hedging had a minimal effect on cost of goods sold in 2004, 2003 and 2002.

Selling, general and administrative expenses of \$55,533 increased 12% in 2004 from \$49,786 in 2003, and increased 10% in 2003 from \$45,263 in 2002. Selling, general and administrative expenses as a percentage of net sales were 39.6%, 46.6% and 46.7%, in 2004, 2003 and 2002, respectively. The increase in 2004 over 2003 was due primarily to higher incentive costs and commissions due to our strong financial performance in fiscal 2004. Additionally, the weaker U.S. dollar increased costs in Europe and Japan. The increase in 2003 over 2002 was due primarily to higher sales and support costs related to the Japanese sales office that opened April 1, 2002, higher one-time costs related to the U.S. sales force during the first quarter as we paid commissions to sales representatives and salaries to our own sales employees, higher costs in Europe due to a weaker U.S. dollar, and additional costs associated with the ERP and CRM implementations.

Product development expenses of \$15,017 increased 11% from \$13,488 in 2003, and decreased 4% in 2003 from \$13,987 in 2002. Product development expenses as a percentage of net sales were 10.7%, 12.6% and 14.4%, in 2004, 2003 and 2002, respectively. The increase in 2004 was due primarily to the increase in the investment in our west coast RF development group. Additionally, product development expenses increased due to higher incentive costs that are tied to financial performance. The decrease in 2003 from 2002 was due primarily to more engineering time being spent in manufacturing for lean manufacturing startup support.

During fiscal 2003, we recorded \$845 pretax, or \$.03 per share after taxes, for severance charges relating to a reduction in force of 23 individuals, or less than 5% of the worldwide work force. The majority of the individuals were in sales or sales support functions. During fiscal 2002, we recorded a \$1,461 pretax charge, or \$.06 per share after taxes, for severance relating to a reduction in force of 44 individuals, or approximately 7 percent of the worldwide work force, the majority of which were in manufacturing. The charges in both years include salaries and vacation pursuant to each individual's severance agreement, payroll taxes, health insurance and pension costs. Cash payments of \$406, \$579 and \$1,224 were made for severance in 2004, 2003 and 2002, respectively. At September 30, 2004 and 2003, \$107 and \$503, respectively, was included in the Accrued payroll and related expenses caption of the consolidated Balance Sheets related to severance. (See Note J.)

Interest income was \$540 in 2004, \$896 in 2003 and \$1,389 in 2002. Lower interest rates and lower average cash and short-term investments levels accounted for the decrease in 2004 from 2003 and in 2003 from 2002. Interest expense was \$92 in 2004, \$210 in 2003 and \$205 in 2002. The decrease in 2004 from 2003 was due primarily to favorable mark-to-market adjustments on the Company's interest rate swap agreement.

The tax rate for fiscal 2004 was 26.8%, compared to the prior year's rate (which was a benefit) of 3.9%. The 2004 rate is below the statutory rate due mainly to the extraterritorial income exclusion benefit and R&D credit utilization. We recorded a tax benefit for 2003 at a 3.9% effective rate. The benefit was lower than the statutory tax rate primarily due to the establishment of a valuation allowance for certain tax credits where we determined it is more likely than not that the deferred tax asset related to those credits would not be realized. (See Note I.) The effective tax rate for 2002 was 39.0%. The benefit rate was higher than the statutory tax rate due to foreign tax credit carryforwards.

Our financial results are affected by foreign exchange rate fluctuations. Generally, a weakening U.S. dollar causes the price of our products to be more attractive in foreign markets and favorably impacts our sales and earnings. A strengthening U.S. dollar has an unfavorable effect. This foreign exchange effect cannot be precisely isolated since many other factors affect our foreign sales and earnings. These factors include product offerings and pricing policies of Keithley and our competition, whether competition is foreign or U.S. based, changes in technology, product and customer mix, and local and worldwide economic conditions.

We utilize hedging techniques designed to mitigate the short-term effect of exchange rate fluctuations on operations and balance sheet positions by entering into foreign exchange forward contracts. We do not speculate in foreign currencies or derivative financial instruments, and hedging techniques do not increase our exposure to foreign exchange rate fluctuations.

Liquidity and Capital Resources

Net cash provided by operating activities was \$15,045 in fiscal 2004. Cash and cash equivalents increased \$712 to \$16,451 at September 30, 2004. Short-term investments increased \$12,042 to \$32,112 at September 30, 2004. Cash and short term investments were used to purchase \$4,072 of property, plant and equipment, to pay \$2,335 in dividends, to contribute \$2,000 to the United States pension plan, and to fund the working capital needs of our business. Total debt of \$440 at September 30, 2004 increased \$31 from September 30, 2003.

The Company's credit agreement, which expires March 31, 2005, is a \$10,000 debt facility (\$440 outstanding at September 30, 2004) that provides unsecured, multi-currency revolving credit at various interest rates based on Prime or LIBOR. We are required to pay a facility fee of 0.25% on the total amount of the commitment. Additionally, we have a number of other credit facilities in various currencies aggregating \$5,000 (\$0 outstanding at September 30, 2004). We intend to extend the terms of the credit agreement with the bank or seek to enter into a new credit agreement to provide access to capital should the need arise beyond March 31, 2005.

~ 11 ~

Table of Contents

At September 30, 2004, we had total unused lines of credit with domestic and foreign banks aggregating \$14,560, all of which was short-term. Under certain provisions of the debt agreements, we are required to comply with various financial ratios and covenants. We were in compliance with all such debt covenants, as amended, at September 30, 2004 and during each of the three years then ended.

Our current stock repurchase program expires on December 31, 2006. Under the current program we may repurchase an additional 2,000,000 Common Shares through December 31, 2006. The current program replaces the prior program, which expired in December 2003.

During 2005, we expect to finance capital spending, working capital requirements and the stock repurchase program with cash and short-term investments on hand and cash provided by operations. Capital expenditures in fiscal 2005 are expected to approximate \$4,000 to \$5,000.

Set forth below is a table of information with respect to the Company's contractual obligations as of September 30, 2004:

Contractual Obligations	Payments Due by Period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Short-Term Debt	\$ 440	\$ 440	\$	\$	\$
Operating Lease Obligations	5,521	2,258	2,167	883	213
Payments Under Deferred Compensation Agreements ⁽¹⁾	1,190	751	186	186	67
Total Contractual Obligations	\$ 7,151	\$ 3,449	\$ 2,353	\$ 1,069	\$ 280

⁽¹⁾ Includes amounts due under a deferred compensation agreement with a retiring executive. Amounts exclude additional interest that will be earned from September 30, 2004 through the time of payment. Other executives and directors are included in this plan, however, as retirement dates are uncertain, they are excluded from the above table.

Off-Balance Sheet Arrangements

The Company has no off-balance sheet arrangements.

Recent Accounting Pronouncements

In December 2003, the FASB issued FASB Interpretation Number 46-R (FIN 46-R), Consolidation of Variable Interest Entities. FIN 46-R, which modifies certain provisions and effective dates of FIN 46 and sets forth criteria to be used in determining whether an interest in a variable interest entity should be consolidated. These provisions are based on the general premise that if a company controls another entity through interests other than voting interests, that company should consolidate the controlled entity. The FIN 46-R modification did not have any impact on the Company's consolidated financial statements.

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

At the November 12-13, 2003 meeting, the EITF reached a consensus on Issue 03-1, "The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments," that certain quantitative and qualitative disclosures should be required for debt and marketable equity securities classified as available-for-sale or held-to-maturity under SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities" and that are impaired at the balance sheet date but for which an other-than-temporary impairment has not been recognized. The Company adopted the disclosure requirements in fiscal year 2004. Other provisions of this pronouncement are being considered for revision by the EITF.

In December 2003, the FASB issued SFAS No. 132 (revised 2003), "Employers' Disclosures about Pensions and Other Postretirement Benefits," an amendment of FASB Statements No. 87, 88, and 106, and a revision of FASB Statement No. 132. SFAS No. 132 (revised 2003) revises employers' disclosures about pension plans and other postretirement benefit plans. It does not change the measurement or recognition of those plans required by SFAS No. 87, "Employers' Accounting for Pensions," SFAS No. 88, "Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits," and SFAS No. 106, "Employers' Accounting for Postretirement Benefits Other Than Pensions." The new rules require additional disclosures about the assets, obligations, cash flows, and net periodic benefit cost of defined benefit pension plans and other postretirement benefit plans. The required information will be provided separately for pension plans and for other postretirement benefit plans. The new disclosures are included in the Company's fiscal year 2004 consolidated financial statements.

In December 2003, the SEC issued SAB 104, "Revenue Recognition," which codifies, revises and rescinds certain sections of SAB 101, "Revenue Recognition," in order to make this interpretive guidance consistent with current authoritative accounts and audit guidance and SEC rules and regulations. The changes noted in SAB 104 did not have a material effect on the Company's consolidated results of operations, financial position or cash flows.

~ 12 ~

Table of Contents

On March 31, 2004, the FASB issued an exposure draft, *Share-Based Payment*, that would eliminate the ability to account for share-based compensation transactions using APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and would require instead that such transactions be accounted for using a fair-value-based method and require companies to record compensation expense for stock option and most stock purchase plans. A final statement is expected to be released in late 2004. Currently, the provisions of the exposure draft would be effective for the Company beginning with the fourth quarter of fiscal 2005.

Factors That May Affect Future Results

Statements included in the sections entitled *General*, and *Liquidity and Capital Resources* of Management's Discussion and Analysis of Financial Condition and Results of Operations, and elsewhere in this report constitute forward-looking statements, as that term is defined in the Private Securities Litigation Reform Act of 1995. Forward-looking statements generally include words such as *anticipates*, *expects*, *believes*, *intends*, *estimates*, and similar expressions. Such statements are subject to risks and uncertainties that could cause actual results to differ materially from those projected including those discussed below. Except as otherwise required by applicable securities laws, the Company disclaims any intention or obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Many of the industries we serve, including but not limited to the semiconductor industry, the wireless communications industry, the optoelectronics industry, and precision electronic components and subassemblies manufacturers, have historically been very cyclical and have experienced periodic downturns. The downturns have had, and may have in the future, a material adverse impact on our customers' demand for equipment, including test and measurement equipment. The severity and length of a downturn also may affect overall access to capital, which could adversely affect the Company's customers. In addition, the factors leading to and the severity and length of a downturn are difficult to predict and there can be no assurance that we will appropriately anticipate changes in the underlying end markets we serve or that any recent increased levels of business activity will continue as a trend into the future. In addition, our orders are cancelable by customers, and consequently, orders outstanding at the end of a reporting period may not result in realized sales in the future.

If we fail to appropriately manage our cost structure to reallocate resources to areas that will provide the best long-term benefits to our customers and shareholders our reporting results will be adversely affected. For instance, we may not be able to reduce our manufacturing costs, while increasing our product development investments for RF technologies, and we may experience unfavorable shifts in product mix or reductions in demand for a product that limit our ability to spread manufacturing costs over high sales volume.

Our business relies on the development of new high technology products and services to provide solutions to our customers' complex measurement needs. This requires anticipation of customers' changing needs and emerging technology trends. We must make long-term investments and commit significant resources before knowing whether our expectations will eventually result in products that achieve market acceptance. We incur significant expenses developing new products that may or may not result in significant sources of revenue and earnings in the future. If these expenses do not result in future earnings, our operating results will be adversely affected.

In many cases our products compete directly with those offered by other manufacturers. If any of our competitors were to develop products or services that are more cost-effective or technically superior, demand for our product offerings could slow.

Our products contain large quantities of electronic components and subassemblies that in some cases are supplied through sole or limited source third-party suppliers. As a result, there can be no assurance that parts and supplies will be available in a timely manner and at reasonable prices. Additionally, our inventory is subject to risks of changes in market demand for particular products. Our inability to obtain critical parts and

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

supplies or any resulting excess and/or obsolete inventory could have an adverse impact on our results of operations.

We currently have subsidiaries or sales offices located in 15 countries including the United States, and non-U.S. sales accounted for approximately two-thirds of our revenue during fiscal 2004. Our future results could be adversely affected by several factors relating to our international sales operations, including changes in foreign currency exchange rates, political unrest, wars and acts of terrorism, changes in other economic or political conditions, trade protection measures, import or export licensing requirements, unexpected changes in regulatory requirements and natural disasters. Any of these factors could have a negative impact on our revenue and operating results.

The gross margin improvements in fiscal 2004 represent the benefits from our lean manufacturing initiative in our manufacturing facilities, which are located in Solon, Ohio. We incurred start-up costs for this initiative during fiscal 2002 and fiscal 2003, which adversely affected gross margins. We may not experience future benefits if we are unable to continue to effectively fine-tune this initiative, and we could incur additional costs in the future, having a negative impact on gross margin, if new initiatives are needed to further improve manufacturing and execution efficiencies.

We pay taxes in several jurisdictions throughout the world. We utilize available tax credits and other tax planning strategies in an effort to minimize our overall tax liability. Our estimated tax rate for fiscal 2005 could change from what is currently anticipated due to changes in tax laws of various countries, changes in our overall tax planning strategy, or countries where earnings or losses are incurred. At September 30, 2004, we had a valuation allowance against certain deferred tax assets and had not established valuation allowances against other deferred tax assets based on tax strategies planned to mitigate the risk of impairment to these assets. Accordingly, if facts or financial results were to change thereby impacting the likelihood of realizing the deferred tax assets, our tax rate and therefore our earnings could be adversely affected.

~ 13 ~

Table of Contents

Throughout fiscal 2004 and into fiscal 2005, we have continued our implementation of ERP and CRM systems. Our results could be adversely affected if we are unable to implement the systems without significant interruptions in accounting systems, order entry, billing, manufacturing and other customer support functions.

On January 1, 2003, we began to use our own employees, rather than sales representatives, to sell our products in the United States. This action increased our fixed costs, and our results could be adversely affected during times of depressed sales.

Other risk factors include but are not limited to changes in our customer and product mix, which affects our gross margins, credit risk of customers, potential litigation, claims, regulatory and administrative proceedings arising in the normal course of business, as well as terrorist activities and armed conflicts.

ITEM 7A QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

The Company is exposed to a variety of risks, including foreign currency fluctuations, interest rate fluctuations and changes in the market value of its short-term investments. In the normal course of business, we employ established policies and procedures to manage our exposure to fluctuations in foreign currency values and interest rates.

The Company is exposed to foreign currency exchange rate risk primarily through transactions denominated in foreign currencies. We currently utilize foreign exchange forward contracts or option contracts to sell foreign currencies to fix the exchange rates related to near-term sales and effectively fix our margins. Generally, these contracts have maturities of three months or less. Our policy is to only enter into derivative transactions when we have an identifiable exposure to risk, thus not creating additional foreign currency exchange rate risk. In our opinion, a 10 percent adverse change in foreign currency exchange rates would not have a material effect on these instruments and therefore our results of operations, financial position or cash flows.

The Company also has an interest rate swap instrument originally entered into to mitigate the risk of interest rate changes related to long-term debt. The agreement effectively fixes the interest rate on a notional \$3,000 of variable rate debt; however, the interest rate swap instrument was determined to be an ineffective hedge and accordingly, changes in the fair market value of the interest rate swap are recorded in the Company's records as income or expense. The instrument expires September 19, 2005. In management's opinion, a 10 percent adverse change in interest rates would not have a material effect on this instrument and therefore on our results of operations, financial position or cash flows.

The Company maintains a short-term investment portfolio consisting of United States government backed notes and bonds, corporate notes and bonds, and mutual funds consisting primarily of government notes and bonds. An increase in interest rates would decrease the value of certain of these investments. However, in management's opinion, a 10 percent increase in interest rates would not have a material impact on our results of operations, financial position or cash flows.

ITEM 8 FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Keithley Instruments, Inc.

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations, shareholders' equity and cash flows present fairly, in all material respects, the financial position of Keithley Instruments, Inc. and its subsidiaries at September 30, 2004 and 2003, and the results of their operations and their cash flows for each of the three years in the period ended September 30, 2004, in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In Thousands of Dollars Except for Per-Share Data)

Note A - Summary of Significant Accounting Policies

Principles of consolidation

The consolidated financial statements include the accounts of Keithley Instruments, Inc. and its subsidiaries. Intercompany transactions have been eliminated.

Nature of operations

Keithley's business is to design, develop, manufacture and market complex electronic instruments and systems geared to the specialized needs of electronics manufacturers for high-performance production testing, process monitoring, product development and research. Our primary products are integrated systems used to source, measure, connect, control or communicate electrical DC, RF or optical signals. Although our products vary in capability, sophistication, use, size and price, they generally test, measure and analyze electrical, RF, optical or physical properties. As such, we consider our business to be in a single industry segment.

Revenue recognition

The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable and collectibility is reasonably assured. Generally, these criteria are met at the time the product is shipped under FOB shipping terms. Upon shipment, a provision is made for estimated costs that may be incurred for product warranties and sales returns. When other significant obligations remain after products are delivered, revenue is recognized only after such obligations are fulfilled.

Foreign currency translation

Our revenues, costs and expenses, and assets and liabilities are exposed to changes in foreign currency exchange rates as a result of our global operations. For those subsidiaries that operate in a local currency functional environment, all assets and liabilities are translated into U.S. dollars using current exchange rates, and revenues and expenses are translated using weighted average exchange rates in effect during the period. Resulting translation adjustments are reported as a separate component of accumulated comprehensive income in shareholders' equity. For those entities that operate in a U.S. dollar functional currency environment, foreign currency assets and liabilities are remeasured into U.S. dollars at

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

current exchange rates. Gains or losses from foreign currency remeasurement are generally immaterial and are included in the Selling, general and administrative expenses caption of the consolidated statements of operations.

Advertising

Advertising production and placement costs are expensed when incurred. Advertising expenses were \$7,223, \$7,000 and \$6,363 in 2004, 2003 and 2002, respectively.

Product development expenses

Expenditures for product development are charged to expense as incurred. These expenses include the cost of computer software, an integral part of certain products. The Company's policy is to expense all software development costs because of the short-time frame between technological feasibility and commercialization. In addition, based upon the rapid change in technology, the amortization periods for any capitalized costs would be relatively short, however, the Company continually reviews the materiality and financial statement classification of computer software expenditures in accordance with SFAS No. 86, Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed.

Cash and cash equivalents

The Company considers all highly liquid investments with maturities of three months or less when purchased to be cash equivalents. Cash flows resulting from hedging transactions are classified in the same category as the cash flows from the item being hedged.

Accounts receivable and allowance for doubtful accounts

Trade accounts receivable are recorded at the invoiced amount and do not bear interest. The allowance for doubtful accounts is our best estimate of the amount of probable credit losses in our existing accounts receivable. We determine the allowance based on historical write-off experience by industry and regional economic data. We review our allowance for doubtful accounts monthly and all account balances are reviewed for collectibility. Account balances are charged off against the allowance when we feel it is probable the receivable will not be recovered. We do not have any off-balance sheet credit exposure related to our customers. The changes in the allowance for doubtful accounts for fiscal years 2004, 2003, and 2002 are as follows:

	<u>2004</u>	<u>2003</u>	<u>2002</u>
Balance at beginning of year	\$ 458	\$ 412	\$ 597
Additions	24	73	25
Write-offs, net of recoveries	(35)	(42)	(218)
Foreign exchange revaluation	7	15	8
	<u> </u>	<u> </u>	<u> </u>
Balance at end of year	\$ 454	\$ 458	\$ 412
	<u> </u>	<u> </u>	<u> </u>

Table of Contents

Inventories

Inventories are stated at the lower of cost (determined by the first-in, first-out method) or market.

Property, plant and equipment

Property, plant and equipment are stated at cost. Depreciation is provided over periods approximating the estimated useful lives of the assets. Substantially all manufacturing, laboratory and office equipment is depreciated by the double declining balance method over periods of 3 to 10 years. Buildings are depreciated by the straight-line method over periods of 23 to 45 years. Leasehold improvements are amortized over the shorter of the asset lives or the terms of the leases. Depreciation expense was \$4,010, \$3,595 and \$3,297 in fiscal 2004, 2003 and 2002, respectively.

Capitalized software

Certain internal and external costs incurred to acquire or create internal use software are capitalized in accordance with AICPA Statement of Position 98-1, Accounting for the Costs of Computer Software Developed or Obtained for Internal Use. Capitalized software is included in property, plant and equipment and is depreciated over 3 to 5 years when development is complete.

Impairment of long-lived assets

Long-lived assets are reviewed for impairment when events or circumstances indicate costs may not be recoverable. Impairment exists when the carrying value of the assets is greater than the pretax undiscounted future cash flows expected to be provided by the asset. If impairment exists, the asset is written down to its fair value. Fair value is determined through quoted market values or through the calculation of the pretax present value of future cash flows expected to be provided by the asset.

Capital stock

The Company has two classes of stock. Each Class B Common Share has ten times the voting power of a Common Share, but the Class B Common Shares are entitled to cash dividends of no more than 80% of the cash dividends on the Common Shares. Holders of Common Shares, voting as a class, elect one-fourth of the Company's Board of Directors and participate with holders of Class B Common Shares in electing the balance of the Directors and in voting on all other corporate matters requiring shareholder approval. Additional Class B Common Shares may be issued only to holders of such shares for stock dividends or stock splits. These shares are convertible at any time to Common Shares on a one-for-one basis.

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

Included in the Common Shares held in treasury, at cost caption of the Consolidated Balance Sheets at September 30, 2004 and 2003, were shares repurchased through the Company's share repurchase programs, net of shares reissued (see Note C), and shares repurchased to settle non-employee Directors' fees deferred pursuant to the Keithley Instruments, Inc. 1996 Outside Directors Deferred Stock Plan. There were no shares remaining in treasury under the Company's share repurchase program at September 30, 2004, as these shares were reissued under stock option or stock purchase plans. The total number of shares held in treasury at September 30, 2004 and 2003 was 143,991 and 535,888, respectively.

Accumulated other comprehensive income

The components of accumulated other comprehensive income at September 30, 2004 and 2003 are as follows:

	<u>2004</u>	<u>2003</u>
Translation adjustment	\$ 519	\$ 300
Minimum pension liability adjustment	(18)	(20)
Net unrealized loss on derivative securities	(20)	(90)
Net unrealized investment gain (loss)	20	(92)
	<u> </u>	<u> </u>
Accumulated other comprehensive income	\$ 501	\$ 98

Income taxes

Deferred tax assets and liabilities are recognized under the liability method based upon the difference between the amounts reported for financial reporting and tax purposes. These deferred taxes are measured by applying current enacted tax rates. Valuation allowances are established when necessary to reflect the estimated amount of deferred tax assets that may not be realized based upon the Company's analysis of estimated future taxable income and establishment of tax strategies. Future taxable income, the results of tax strategies and changes in tax laws could impact these estimates. We have provided for estimated United States and foreign withholding taxes, less available tax credits, for the undistributed earnings of the non-U.S. subsidiaries as of September 30, 2004, 2003 and 2002.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the reported financial statements and the reported amounts of revenues and expenses during the reporting periods. Examples include the allowance for doubtful accounts, estimates of contingent liabilities, inventory valuation, pension plan assumptions, and the assessment of the valuation of deferred income taxes and income tax reserves. Actual results could differ from those estimates.

~ 20 ~

Table of Contents**Earnings per share, including pro forma effects of stock-based compensation**

Both Common Shares and Class B Common Shares are included in calculating earnings per share. The weighted average number of shares outstanding used in the calculation is set forth below:

	<u>2004</u>	<u>2003</u>	<u>2002</u>
Net income (loss) in thousands	\$ 11,381	\$ (4,192)	\$ (3,080)
Weighted average shares outstanding	15,926,839	15,487,435	15,686,557
Assumed exercise of stock options, weighted average of incremental shares	583,989		
Assumed purchase of stock under stock purchase plan, weighted average	33,161		
	<u>16,543,989</u>	<u>15,487,435</u>	<u>15,686,557</u>
Diluted shares adjusted weighted-average shares and assumed conversions	16,543,989	15,487,435	15,686,557
Basic earnings (loss) per share	\$ 0.71	\$ (0.27)	\$ (0.20)
Diluted earnings (loss) per share	\$ 0.69	\$ (0.27)	\$ (0.20)

Due to the net loss in fiscal 2003 and 2002, 459,674 and 589,100 are excluded from the dilutive calculation for the exercise of stock options and purchase of stock under the stock purchase plan, respectively.

The Company has elected to continue to account for stock issued to employees according to APB Opinion 25, Accounting for Stock Issued to Employees and its related interpretations. Under APB No. 25, no compensation expense is recognized in the Company's consolidated financial statements for employee stock options except in certain cases when stock options are granted below the market price of the underlying stock on the date of grant or variable accounting is required under applicable accounting guidance. Alternatively, under the fair value method of accounting provided for under SFAS No. 123, Accounting for Stock-Based Compensation and SFAS No. 148, Accounting for Stock-based Compensation Transition and Disclosure an amendment of FASB Statement No. 123, the measurement of compensation expense is based on the fair value of employee stock options or purchase rights at the grant or right date and requires the use of option pricing models to value the options.

The pro forma impact to both net income and earnings per share from calculating stock-related compensation expense consistent with the fair value alternative of SFAS 123 is indicated below:

	<u>2004</u>	<u>2003</u>	<u>2002</u>
Net income (loss)	\$ 11,381	\$ (4,192)	\$ (3,080)
Add: Stock-based employee compensation expense included in reported income/ loss, net of related tax effects	45	29	27
Deduct: Stock-based employee compensation expense determined under fair value based methods for all awards, net of related tax effects	(4,452)	(4,029)	(4,054)
	<u>\$ 6,974</u>	<u>\$ (8,192)</u>	<u>\$ (7,107)</u>
Pro forma net income (loss)	\$ 6,974	\$ (8,192)	\$ (7,107)
Pro forma earnings (loss) per share:			
Basic	\$ 0.44	\$ (0.53)	\$ (0.45)

Diluted	\$ 0.42	\$ (0.53)	\$ (0.45)
---------	---------	-----------	-----------

Derivatives and Hedging Activities

In accordance with the provisions of SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* (as amended), all of the Company's derivative instruments are recognized on the balance sheet at their fair value. To hedge sales, the Company currently utilizes foreign exchange forward contracts or option contracts to sell foreign currencies to fix the exchange rates related to near-term sales and effectively fix the Company's margins. Underlying hedged transactions are recorded at hedged rates, therefore realized and unrealized gains and losses are recorded when the hedged transactions occur. The Company also has an interest rate swap instrument, which expires September 19, 2005. The estimated fair value of the swap instrument is determined through quotes from the related financial institutions.

On the date the derivative contract is entered into, the Company designates its derivative as either a hedge of the fair value of a recognized asset or liability (fair value hedge), as a hedge of the variability of cash flows to be received (cash flow hedge), or as a foreign-currency cash flow hedge (foreign currency hedge). Changes in the fair value of a derivative that is highly effective as, and that is designated and qualifies as, a fair value hedge, along with the gain or loss on the hedged asset or liability that is attributable to the hedged risk are recorded in current period earnings. Changes in the fair value of a derivative that is highly effective and that is designed and qualifies as a cash flow hedge are recorded in other comprehensive income until earnings are affected by the transaction in the underlying asset. Changes in the fair value of derivatives that are highly effective and that qualify as foreign currency hedges are recorded in either current period income or other comprehensive income, depending on whether the hedge transaction is a fair value hedge or a cash flow hedge. At September 30, 2004, the foreign exchange forward contracts were designated as foreign currency cash flow hedges. The interest rate swap instrument was determined to be an ineffective hedge and accordingly, changes in its fair market value are recorded in the Company's records as income or expense in the interest expense line item.

~ 21 ~

Table of Contents

in the consolidated statements of operations. The Company recorded income (expense) of \$163, \$63 and \$(346) in 2004, 2003 and 2002, respectively for the interest rate swap fair market value.

The Company documents all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking various hedge transactions. The Company also assesses whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in cash flows of hedged items. When it is determined that a derivative is not highly effective as a hedge, the Company discontinues hedge accounting prospectively.

Reclassifications

Certain reclassifications have been made to prior year financial statements and the notes to conform to the current year presentation.

Recent accounting pronouncements

In December 2003, the FASB issued FASB Interpretation Number 46-R (FIN 46-R), Consolidation of Variable Interest Entities. FIN 46-R, which modifies certain provisions and effective dates of FIN 46, sets forth criteria to be used in determining whether an interest in a variable interest entity should be consolidated. These provisions are based on the general premise that if a company controls another entity through interests other than voting interests, that company should consolidate the controlled entity. FIN 46-R modification did not have any impact on the Company's consolidated financial statements.

At the November 12-13, 2003 meeting, the EITF reached a consensus on Issue 03-1, The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments, that certain quantitative and qualitative disclosures should be required for debt and marketable equity securities classified as available-for-sale or held-to-maturity under SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities and that are impaired at the balance sheet date but for which an other-than-temporary impairment has not been recognized. The Company adopted the disclosure requirements in fiscal year 2004. Other provisions of this pronouncement are being considered for revision by the EITF.

In December 2003, the FASB issued SFAS No. 132 (revised 2003), Employers' Disclosures about Pensions and Other Postretirement Benefits, an amendment of FASB Statements No. 87, 88, and 106, and a revision of FASB Statement No. 132. SFAS No. 132 (revised 2003) revises employers' disclosures about pension plans and other postretirement benefit plans. It does not change the measurement or recognition of those plans required by SFAS No. 87, Employers' Accounting for Pensions, SFAS No. 88, Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits, and SFAS No. 106, Employers' Accounting for Postretirement Benefits Other Than Pensions. The new rules require additional disclosures about the assets, obligations, cash flows, and net periodic benefit cost of defined benefit pension plans and other postretirement benefit plans. The required information will be provided separately for pension plans and for other postretirement benefit plans. The new disclosures are included in the Company's fiscal year 2004 consolidated financial statements.

In December 2003, the SEC issued SAB 104, Revenue Recognition, which codifies, revises and rescinds certain sections of SAB 101, Revenue Recognition, in order to make this interpretive guidance consistent with current authoritative accounts and audit guidance and SEC rules and regulations. The changes noted in SAB 104 did not have a material effect on the Company's consolidated results of operations, financial position or cash flows.

On March 31, 2004, the FASB issued an exposure draft, *Share-Based Payment*, that would eliminate the ability to account for share-based compensation transactions using APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and would require instead that such transactions be accounted for using a fair-value-based method and require companies to record compensation expense for stock option and most stock purchase plans. A final statement is expected to be released in late 2004. Currently, the provisions of the exposure draft would be effective for the Company beginning with the fourth quarter of fiscal 2005.

Note B Guarantor s Disclosure Requirements

Guarantee of original lease:

The Company has assigned the lease of its former office space in Reading, Great Britain to a third party. In the event the third party defaults on the monthly lease payments, the Company would be responsible for the payments until the lease expires on July 14, 2009. If the third party were to default, the maximum amount of future payments (undiscounted) the Company would be required to make under the guarantee would be approximately \$999 through July 14, 2009. The Company has not recorded any liability for this item, as it does not believe that it is probable that the third party will default on the lease payments.

Product warranties:

Generally, the Company's products are covered under a one-year warranty; however, certain products are covered under a three-year warranty. It is the Company's policy to accrue for all product warranties based upon historical in-warranty repair data. In addition, the Company accrues for specifically identified product performance issues. The Company also offers extended warranties for certain of its products for which revenue is recognized over the life of the contract period. The costs associated with servicing the extended warranties are expensed as incurred. The revenue, as well as the costs related to the extended warranties is immaterial for fiscal years 2004 and 2003.

~ 22 ~

Table of Contents

A reconciliation of the estimated changes in the aggregated product warranty liability for fiscal year 2004 and 2003 is as follows:

	<u>2004</u>	<u>2003</u>
Beginning balance	\$ 1,498	\$ 1,415
Accruals for warranties issued during the period	1,568	1,525
Accruals related to pre-existing warranties (including changes in estimates and expiring warranties)	(504)	(313)
Settlements made (in cash or in kind) during the period	(1,103)	(1,129)
	<u> </u>	<u> </u>
Ending balance	<u>\$ 1,459</u>	<u>\$ 1,498</u>

Note C Repurchase of Common Shares

On December 10, 2003, the Company announced its Board of Directors had approved an open market stock repurchase program (the 2003 program). Under the terms of the 2003 program, the Company may purchase up to 2,000,000 Common Shares, which represented approximately 13 percent of shares outstanding at the time the program was approved, over a three-year period. The purpose of the 2003 program is to offset the dilutive effect of stock option and stock purchase plans. Common Shares held in treasury may be reissued in settlement of stock purchases under these plans. The 2003 program replaces the prior program, which expired in December 2003 and had substantially the same terms as the 2003 program. The shares purchased in the prior fiscal year were acquired under the previous repurchase program.

The following table summarizes the Company's stock repurchase activity:

	<u>2004</u>	<u>2003</u>
Total number of shares purchased		243,200
Average price paid per share (including commissions)	\$	\$ 11.41
Identity of broker-dealer used to effect the purchases	N/A	Bear Stearns Securities Corp.
Number of shares purchased as part of a publicly announced repurchase program		243,200
Maximum number of shares that remain to be purchased under the program	2,000,000	1,223,800

There were no Common Shares remaining in treasury under the Company's share repurchase programs at September 30, 2004, as these shares were issued under stock option or stock purchase plans. Shares issued from treasury under these plans totaled 398,837 and 175,547 in fiscal 2004 and 2003, respectively.

Also, included in the Common shares held in treasury, at cost caption of the consolidated balance sheets are shares repurchased to settle non-employee Directors' fees deferred pursuant to the Keithley Instruments, Inc. 1996 Outside Directors Deferred Stock Plan. Shares held in treasury related to this plan at September 30, 2004 totaled 143,991.

Note D Short-term Investments

The Company classifies its short-term investments as available-for-sale, which requires they be recorded at fair market value with the resulting gains and losses included in Accumulated other comprehensive income on the Company's Consolidated Balance Sheets. Gross realized losses of \$129 and gross realized gains of \$56 were recognized on sales of marketable securities in fiscal year 2004 and 2003, respectively, using the specific identification method. There were no sales of marketable securities in fiscal 2002.

Short-term investments at September 30, 2004 were comprised of the following:

	<u>Adjusted cost</u>	<u>Unrealized gains</u>	<u>Unrealized losses</u>	<u>Market value</u>
Money market and auction instruments	\$ 2,500	\$	\$	\$ 2,500
U.S. government and agency securities	11,030	4	(8)	11,026
Corporate notes and bonds	18,551	35		18,586
Mutual funds				
Total short-term investments	\$ 32,081	\$ 39	\$ (8)	\$ 32,112

~ 23 ~

Table of Contents

Short-term investments at September 30, 2003 were comprised of the following:

	<u>Adjusted cost</u>	<u>Unrealized gains</u>	<u>Unrealized losses</u>	<u>Market value</u>
Money market and auction instruments	\$ 1	\$	\$	\$ 1
U.S. government and agency securities	3,023	5	(15)	3,013
Corporate notes and bonds	9,615	50	(68)	9,597
Mutual funds	7,569		(110)	7,459
	<u> </u>	<u> </u>	<u> </u>	<u> </u>
Total short-term investments	\$ 20,208	\$ 55	\$ (193)	\$ 20,070
	<u> </u>	<u> </u>	<u> </u>	<u> </u>

The mutual funds are comprised of investment-grade debt securities. The funds may invest in corporate, mortgage, asset-backed, municipal and U.S. government and agency securities. At September 30, 2004 and 2003, the securities, notes and bonds have maturity dates as follows:

	<u>2004</u>	<u>2003</u>
Less than 1 year	\$ 8,661	\$ 7,458
2 to 5 years	11,886	3,103
6 to 10 years	670	5,249
11 to 15 years	3,985	2,225
Greater than 15 years	6,910	2,035
	<u> </u>	<u> </u>
Total short-term investments	\$ 32,112	\$ 20,070
	<u> </u>	<u> </u>

The Company reviews investments in debt and equity securities for other than temporary impairment whenever the fair value of an investment is less than amortized cost and evidence indicates that an investment's carrying value is not recoverable within a reasonable period of time. In the evaluation of whether an impairment is other-than-temporary, the Company considers its ability and intent to hold the investment until the market price recovers, the reasons for the impairment, compliance with the Company's investment policy, the severity and duration of the impairment and expected future performance. Based on this evaluation, no impairment was considered to be other-than-temporary. The \$8 of unrealized losses for U.S. government and agency securities at September 30, 2004 relates to investments with a fair market value of approximately \$3,992.

Note E - Financing Arrangements

On March 30, 2004, the Company amended its credit agreement to extend the term to March 31, 2005 from March 30, 2004. The agreement is a \$10,000 debt facility (\$440 and \$382 outstanding at September 30, 2004 and 2003, respectively) that provides unsecured, multi-currency revolving credit at various interest rates based on Prime or LIBOR and for standby letters of credit (\$646 outstanding at September 30, 2004). The three-month LIBOR interest rate was 2.0% and 1.2% at September 30, 2004 and 2003, respectively. The Company is required to pay a facility fee of 0.25% on the total amount of the commitment. Additionally, the Company has a number of other credit facilities in various currencies aggregating \$5,000 (\$0 and \$27 outstanding at September 30, 2004 and 2003, respectively). The principal on these facilities is due monthly with a 30-day rollover provision and, the weighted average interest was 5.0% for debt outstanding under these facilities at September 30, 2004. The Company has \$13,914 available under the short-term lines of credit with domestic and foreign banks at September 30, 2004.

Under certain provisions of the debt agreements, the Company is required to comply with various financial ratios and covenants. The Company was in compliance with all such debt covenants, as amended, during each of the three years ended and at September 30, 2004.

The Company has an interest rate swap agreement with a commercial bank to effectively fix its interest rate on \$3,000 of variable rate debt. The agreement effectively fixes the interest rate on a notional \$3,000 of variable LIBOR rate debt at 6.4%, and expires September 19, 2005. The interest differential to be paid or received on the notional amount of the swap is recognized as paid over the term of the agreement. At September 30, 2004 interest rate levels, the swap requires the Company to make payments to the bank. The Company would pay the bank approximately \$120 to terminate the agreement. In accordance with the provisions of SFAS 133, the interest rate swap is recorded on the Company's Consolidated Balance Sheets at fair market value at September 30, 2004.

Note F - Foreign Currency

The functional currency for the Company's foreign subsidiaries is the applicable local currency. Income and expenses are translated into U.S. dollars at average exchange rates for the period. Assets and liabilities are translated at the rates in effect at the end of the period. Translation gains and losses are recognized in the accumulated other comprehensive income component of shareholders' equity.

Certain transactions of the Company and its foreign subsidiaries are denominated in currencies other than the functional currency. The Consolidated Statements of Operations include gains from such foreign exchange transactions of \$132, \$113 and \$79 for 2004, 2003 and 2002, respectively.

~ 24 ~

Table of Contents

At September 30, 2004, the Company had obligations under foreign exchange forward contracts to sell 1,900,000 Euros, 300,000 British pounds and 180,000,000 Yen at various dates through December 2004. In accordance with the provisions of SFAS 133, the foreign exchange forward contracts are recorded on the Company's Consolidated Balance Sheets. At September 30, 2004 and 2003, the fair market value of the contracts represented a liability to the Company of \$28 and \$167, respectively.

Note G - Employee Benefit Plans

The Company has noncontributory defined benefit pension plans covering all of its eligible employees in the United States and certain non-U.S. employees. Pension benefits are based upon the employee's length of service and a percentage of compensation. A summary of the components of net periodic pension cost based on a measurement date of June 30 for both the U.S. plan and the non-U.S. plan is shown below:

	<u>2004</u>	<u>2003</u>
Service cost-benefits earned during the period	\$ 1,418	\$ 1,499
Interest cost on projected benefit obligation	2,045	1,960
Expected return on plan assets	(2,625)	(2,494)
Amortization of transition asset	(22)	(25)
Amortization of prior service cost	183	180
	<u> </u>	<u> </u>
Net periodic pension cost	\$ 999	\$ 1,120
	<u> </u>	<u> </u>

The following table sets forth the funded status of the Company's plans at September 30, 2004 and 2003:

	<u>United States Plan</u>		<u>Non-U.S. Plan*</u>	
	<u>2004</u>	<u>2003</u>	<u>2004</u>	<u>2003</u>
Change in projected benefit obligations:				
Benefit obligation at beginning of year	\$ 28,626	\$ 25,650	\$ 4,624	\$ 3,985
Service cost	1,242	1,337	176	162
Interest cost	1,760	1,701	285	259
Actuarial (gain) loss	(1,504)	926	50	(370)
Benefits paid	(1,061)	(1,028)	(138)	(126)
Plan amendment		40		
Foreign currency exchange rate changes			314	714
	<u> </u>	<u> </u>	<u> </u>	<u> </u>
Benefit obligation at year end	\$ 29,063	\$ 28,626	\$ 5,311	\$ 4,624
	<u> </u>	<u> </u>	<u> </u>	<u> </u>
Change in plan assets:				
Fair value of plan assets at beginning of year	\$ 25,753	\$ 23,568	\$ 930	\$ 724
Actual return on pension assets	3,970	613	38	61
Employer contributions	1,000	2,600	51	27
Benefits paid	(1,061)	(1,028)	(20)	(18)

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

Foreign currency exchange rate changes			62	136
Fair value of plan assets at end of year	29,662	25,753	1,061	930
Funded status over (under) funded	599	(2,873)	(4,250)	(3,694)
Unrecognized actuarial loss (gain)	4,715	7,631	(393)	(445)
Additional employer contributions	1,000			
Unrecognized prior service cost	1,048	1,227	38	40
Unrecognized initial net (asset) obligation	(54)	(97)	84	99
Prepaid pension assets (pension liability) recognized in the Consolidated Balance Sheets	\$ 7,308	\$ 5,888	\$ (4,521)	\$ (4,000)

Amounts recognized in the Consolidated Balance Sheets at September 30, 2004 and 2003, consist of the following:

	United States Plan		Non-U.S. Plan*	
	2004	2003	2004	2003
Other assets (long-term)	\$ 7,308	\$ 5,888	\$	\$
Other long-term liabilities			(4,521)	(4,000)
Prepaid pension assets (pension liability) recognized	\$ 7,308	\$ 5,888	\$ (4,521)	\$ (4,000)

* The Company has purchased indirect insurance of \$4,279 which is expected to be available to the Company as non-U.S. pension liabilities of \$4,521 mature. The caption, Other assets, on the Company's Consolidated Balance Sheets includes \$4,279 and \$3,762 at September 30, 2004 and 2003, respectively, for this asset. In accordance with SFAS No. 87, Employers Accounting for Pensions, this Company asset is not included in the non-U.S. plan assets.

~ 25 ~

Table of Contents

The accumulated benefit obligation for all defined benefit plans was \$30,922 and \$29,796 at September 30, 2004 and 2003, respectively.

At September 30, 2004 and 2003, the Company's accumulated benefit obligation exceeded the fair value of plan assets for the non-U.S. plan. The projected benefit obligation, accumulated benefit obligation and fair value of plan assets for the non-U.S. Plan at September 30, 2004 were \$5,311, \$4,779, and \$1,061, respectively. The projected benefit obligation, accumulated benefit obligation and fair value of plan assets for the non-U.S. Plan at September 30, 2003 were \$4,624, \$3,920, and \$930, respectively.

Non-U.S. plan assets represent employee and Company contributions and are invested in a direct insurance contract payable to the individual participants. As of the measurement date, the plan assets allocations for the United States plan by asset category was as follows:

	June 30,	
	2004	2003
Equity securities	64%	66%
Debt securities	15	14
Market neutral hedge fund	15	7
Cash equivalent (money market fund)	3	10
All other	3	3
	100%	100%

The United States and non-U.S. Plan investment strategy is to emphasize total return, which is defined as the aggregate return from capital appreciation and dividends and interest income. The primary objective in the investment management of the Plans assets is the emphasis on consistency of growth; specifically, growth in a manner that protects Plan assets from excessive volatility in market value from year to year.

In determining the asset classes in which the Plans will invest, as well as the target weightings to each asset class, the Company gives consideration to several factors. These include historical risk and return statistics for each asset class and the statistical relationships between the asset classes. The Company also has recognized certain aspects specific to the Plans including the current funding status, the average age of employee participants, and the ability of the Company to make future contributions to the Plans.

The significant actuarial assumptions used to determine benefit obligations at September 30, 2004 and 2003 were as follows:

	2004	2003
United States Pension Plan:		
Discount rate	6.5%	6.25%
Rate of increase in compensation levels	3.5%	3.5%
Non-U.S. Pension Plan:		

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

Discount rate	5.25%	6.0%
Rate of increase in compensation levels	3.0%	4.5%

The significant actuarial assumptions used to determine net pension expense for fiscal years 2004, 2003 and 2002 were as follows:

	<u>2004</u>	<u>2003</u>	<u>2002</u>
United States Pension Plan:			
Discount rate	6.25%	6.75%	6.75%
Expected long-term rate of return on plan assets	8.25%	8.25%	8.25%
Rate of increase in compensation levels	3.5%	4.5%	4.5%
Non-U.S. Pension Plan:			
Discount rate	6.0%	6.0%	6.0%
Expected long-term rate of return on plan assets	7.0%	7.0%	7.0%
Rate of increase in compensation levels	4.5%	3.0%	4.5%

In determining its expected long-term rate-of-return-on-asset assumption for the fiscal year ending September 30, 2004, the Company considered historical experience, its asset allocation, expected future long-term rates of return for each major asset class, an assumed long-term inflation rate, and an asset performance simulator.

~ 26 ~

Table of Contents

Expected future benefit payments for both the United States and the non-U.S. plans are as follows:

2005	\$ 1,105
2006	\$ 1,179
2007	\$ 1,256
2008	\$ 1,342
2009	\$ 1,436
2010 - 2014	\$ 9,558

The Company expects to contribute approximately \$1,000 to \$2,000 to its pension plans in fiscal year 2005.

In addition to the defined benefit pension plan, the Company also maintains a retirement plan for all of its eligible employees in the United States under Section 401(k) of the Internal Revenue Code. The Company makes contributions to the 401(k) plan, and expense for this plan amounted to \$831, \$388 and \$397 in 2004, 2003 and 2002, respectively. Additionally, the Company has a profit sharing program which includes all eligible worldwide employees. U.S. employee participants at their discretion may opt for a cash payout or may defer the bonus in the 401(k) plan. Non-U.S. employees receive a cash payout. Expense (income) related to the additional profit sharing program amounted to \$248, \$0 and \$(255) in 2004, 2003 and 2002, respectively. The income in 2002 represents the true-up of expense recorded in 2001 based upon the final calculation of the profit sharing bonus.

The Company also has an unfunded supplemental executive retirement plan (SERP) for former key employees which includes retirement, death and disability benefits. Expense (income) recognized for these benefits was \$9, (\$194), and \$72 for 2004, 2003 and 2002, respectively. Liabilities of \$126 and \$122 were accrued in the Other long-term liabilities caption on the Company's Consolidated Balance Sheets to meet all SERP obligations at September 30, 2004 and 2003, respectively. The income in 2003 represents the reversal of a liability for a former participant.

Note H - Stock Plans**Stock Option Plans**

On February 16, 2002, the Company's shareholders approved the Keithley Instruments, Inc. 2002 Stock Incentive Plan. Under the terms of this plan, 3,000,000 Common Shares were reserved for the granting of options to officers and other key employees. This plan will expire on February 16, 2012. Under the 1992 Stock Incentive Plan, 5,400,000 of the Company's Common Shares were reserved for the granting of options to officers and other key employees. After February 8, 2002, no new grants could be issued from this plan. All options outstanding at the time of termination of either plan shall continue in full force and effect in accordance with their terms. The Compensation and Human Resources Committee of the Board of Directors administers the plans. Incentive stock options granted under the plans cannot be granted with an exercise price less than the fair market price at the date of the grant with an exercise period not to exceed ten years. Such grants generally become exercisable over a four year period. The option price under nonqualified stock options is determined by the Committee on the date the option is granted. Both plans also provide for restricted stock awards and stock appreciation rights.

The 1997 Directors' Stock Option Plan provides for the issuance of 850,000 of the Company's Common Shares to non-employee Directors. Under the terms of the plan, each non-employee Director is automatically granted an option to purchase 10,000 Common Shares at the close of each

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

annual shareholders meeting. The plan will expire on February 15, 2007. On February 15, 1997, the Company's Board of Directors terminated the 1992 Directors' Stock Option Plan. Prior to its termination, this plan provided for the issuance of 120,000 of the Company's Common Shares to non-employee Directors, with each non-employee Director automatically granted an option to purchase 1,200 Common Shares at the close of each annual shareholders meeting. All options outstanding at the time of termination of the plans shall continue in full force and effect in accordance with their terms. The option price for grants under both plans is the fair market value of a Common Share on the date of grant. The options under both plans are exercisable six months and one day after the date of grant and will expire after ten years.

~ 27 ~

Table of Contents**1993 Employee Stock Purchase Plan**

On February 5, 1994, the Company's shareholders approved the 1993 Employee Stock Purchase and Dividend Reinvestment Plan. The plan offers eligible employees the opportunity to acquire the Company's Common Shares at a discount and without transaction costs. Eligible employees can only participate in the plan on a year-to-year basis, must enroll prior to the commencement of each plan year, and in the case with U.S. employees, must authorize monthly payroll deductions. Non-U.S. employees submit their contribution at the end of the plan year. The purchase price of the Common Shares is 85 percent of the lower of the market price at the beginning or ending of the calendar plan year. A mid-year enrollment option is also available for new employees. The purchase price for the mid-year enrollees is 85 percent of the lower or the market price at the beginning of the mid-year period or ending of the calendar plan year. A total of 1,500,000 Common Shares were reserved for purchase under the plan, of which 247,638 remained available at September 30, 2004. Total shares may be increased with shareholder approval or the plan may be terminated when the shares are fully subscribed. No compensation expense is recorded in connection with the plan. In January 2004 and January 2003, 135,412 and 75,867 shares were purchased by employees under this plan at a price of \$10.63 per share.

Pro Forma Disclosure

See Note A for the pro forma effects had the Company adopted the fair value criteria provided in SFAS No. 123.

The pro forma weighted average fair value of options granted under stock option plans in 2004, 2003 and 2002 was \$8.10, \$6.51 and \$5.85, respectively. The fair value of options at the date of grant was estimated using the Black-Scholes model with the following weighted average assumptions:

	<u>2004</u>	<u>2003</u>	<u>2002</u>
Expected life (years)	4.5	4.2	3.7
Risk-free interest rate	3.5%	2.5%	3.3%
Volatility	51%	54%	55%
Dividend yield	1.0%	1.0%	1.0%

The pro forma weighted average fair value of purchase rights granted under the 1993 Employee Stock Purchase Plan in 2004, 2003 and 2002 was \$5.14, \$5.24 and \$9.01, respectively. The fair value of employees' purchase rights was estimated using the Black-Scholes model with the following assumptions:

	<u>2004</u>	<u>2003</u>	<u>2002</u>
Expected life (years)	1.0	1.0	1.0
Risk-free interest rate	1.1%	1.5%	2.7%
Volatility	50%	55%	58%
Dividend yield	1.0%	1.0%	0.9%

Table of Contents**Note I - Income Taxes**

For financial reporting purposes, income (loss) before income taxes includes the following components:

	<u>2004</u>	<u>2003</u>	<u>2002</u>
United States	\$ 8,974	\$ (6,711)	\$ (3,744)
Non-U.S.	6,567	2,350	(1,302)
	<u>\$ 15,541</u>	<u>\$ (4,361)</u>	<u>\$ (5,046)</u>

The provision (benefit) for income taxes is as follows:

	<u>2004</u>	<u>2003</u>	<u>2002</u>
Current:			
Federal	\$ 1,620	\$ 255	\$ 363
Non-U.S.	2,681	922	444
State and local	46	(80)	209
Total current	<u>4,347</u>	<u>1,097</u>	<u>1,016</u>
Deferred:			
Federal	(50)	(873)	(2,900)
Non-U.S.	(137)	(393)	(82)
Total deferred	<u>(187)</u>	<u>(1,266)</u>	<u>(2,982)</u>
Total provision (benefit)	<u>\$ 4,160</u>	<u>\$ (169)</u>	<u>\$ (1,966)</u>

Differences between the statutory United States federal income tax and the effective income tax rates are as follows:

	<u>2004</u>	<u>2003</u>	<u>2002</u>
Federal income tax at statutory rate	\$ 5,284	\$ (1,552)	\$ (1,683)
State and local income taxes	(103)	292	181
Tax on non-U.S. income	(284)	215	(317)
Foreign tax credit carryforwards	(98)	151	(746)
Valuation allowance	105	1,291	532
Other tax credit carryforwards	(281)	(495)	
Adjustment for prior years' taxes	(552)		

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

Other	<u>89</u>	<u>(71)</u>	<u>67</u>
Effective provision (benefit) for income taxes	<u>\$ 4,160</u>	<u>\$ (169)</u>	<u>\$ (1,966)</u>

~ 30 ~

Table of Contents

Significant components of the Company's deferred tax assets and liabilities as of September 30, 2004 and 2003 are as follows:

Deferred tax assets:	2004	2003
Nonqualified stock options	\$ 3,183	\$ 261
Capitalized research and development	9,347	3,032
Inventory	1,837	2,130
Deferred compensation	2,239	983
Tax credit carryforward	8,071	15,553
Depreciation	1,044	922
Warranty	487	502
Medical	157	175
Intangibles	105	121
State and local taxes	1,355	1,454
Foreign net operating losses	417	388
Other	1,301	869
Total deferred tax assets	29,543	26,390
Deferred tax liabilities:		
Pension contribution	2,558	2,061
Other	464	311
Total deferred tax liabilities	3,022	2,372
Valuation allowance	(2,627)	(2,332)
Net deferred tax assets	\$ 23,894	\$ 21,686

The net change in the net deferred tax assets as of September 30, 2004 compared to September 30, 2003 is primarily the result of utilization of federal net operating loss carryforwards, capitalization of research and development costs on prior returns and exercise of nonqualified stock options during the current year.

The valuation allowance relates to provisions for foreign tax credits, R&D credits, and certain foreign net operating losses which may not be realized due to the uncertainty of future profitability levels.

At September 30, 2004, the Company had tax credit carryforwards as follows:

		Year Expiration Commences
Alternative minimum tax credit	\$ 2,105	indefinite
Foreign tax credit	3,096	2012-2014

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

R&D credit	2,847	2005-2019
Capital loss deduction	23	2009
	<u> </u>	
	\$ 8,071	
	<u> </u>	

The Company recorded credits of \$3,721, \$346 and \$285 to additional paid-in-capital during the years ended September 30, 2004, 2003 and 2002, respectively, in connection with the tax benefit related to compensation deductions on the exercise of stock options.

Note J Severance Charges

During fiscal 2003, the Company recorded \$845 pretax, or \$.03 per share after taxes, for severance charges relating to a reduction in force of 23 individuals, or less than 5 percent of the worldwide work force. The majority of the individuals were in sales or sales support functions.

During fiscal 2002, the Company recorded a \$1,461 pretax charge, or \$.06 per share after taxes, for severance relating to a reduction in force of 44 individuals, or approximately 7 percent of the worldwide work force, the majority of which were in manufacturing. The charges in both years include salaries and vacation per each individual's severance agreement, payroll taxes, health insurance and pension costs. The accrued severance outstanding at September 30, 2002 was paid in full in 2003, without adjustment.

Table of Contents

At September 30, 2004 and 2003, \$107 and \$503, respectively, of accrued severance was included in the Accrued payroll and related expenses caption of the consolidated Balance Sheets.

A reconciliation of the changes in the aggregated accrued severance liability for fiscal years 2004 and 2003 is as follows:

	<u>2004</u>	<u>2003</u>
Beginning balance	\$ 503	\$ 237
Expense recognized and adjustments	(21)	845
Payments made	(406)	(579)
Foreign exchange revaluation	31	
	<u> </u>	<u> </u>
Ending balance	\$ 107	\$ 503
	<u> </u>	<u> </u>

Note K Commitments and Contingencies

The Company leases certain office and manufacturing facilities and office equipment under operating leases. Rent expense under operating leases (net of sublease income of \$160 in 2004, \$144 in 2003 and \$233 in 2002) was \$1,509, \$1,389 and \$1,622 for 2004, 2003 and 2002, respectively. Future minimum lease payments under operating leases are:

2005	\$ 2,258
2006	1,435
2007	732
2008	515
2009	368
After 2009	213
	<u> </u>
Total minimum operating lease payments	\$ 5,521
	<u> </u>

In the normal course of business, the Company is subject to various legal claims, actions, complaints and other matters. While the results of such matters cannot be predicted with certainty, management believes that their final outcome will not have a material adverse impact on the financial position or results of operations of the Company.

Note L Segment and Geographic Information

The Company's business is to develop test and measurement-based solutions to verify customers' product performance or aid in their product development process. The Company's customers are engineers, technicians and scientists in manufacturing, product development and research functions within a range of industries. Although the Company's products vary in capability, sophistication, use, size and price, they basically test,

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

measure and analyze electrical and physical properties, and in some cases RF or light. As such, the Company's management has determined that the Company operates in a single industry segment. The operations by geographic area are presented below. The basis for attributing revenues from external customers to a geographic area is the location of the customer.

	2004	2003	2002
Net sales:			
United States	\$ 44,588	\$ 34,926	\$ 38,984
Europe	47,704	35,866	31,698
Pacific Basin	39,492	30,818	21,268
Other	8,464	5,108	4,972
	\$ 140,248	\$ 106,718	\$ 96,922
Long-lived assets:			
United States	\$ 22,750	\$ 21,131	\$ 19,197
Germany	4,545	4,055	3,302
Other	756	738	680
	\$ 28,051	\$ 25,924	\$ 23,179

~ 32 ~

Table of Contents**Note M Unaudited Quarterly Results of Operations**

Following are the Company's unaudited quarterly results of operations for fiscal 2004 and 2003.

	<u>First</u>	<u>Second</u>	<u>Third</u>	<u>Fourth</u>
Fiscal 2004				
Net sales	\$ 29,742	\$ 33,989	\$ 36,822	\$ 39,695
Gross profit	17,599	21,332	22,893	23,819
Income before income taxes	1,578	3,805	4,788	5,370
Net income	1,089	2,625	3,177	4,490
Diluted earnings per share	.07	.16	.19	.27
Fiscal 2003				
Net sales	\$ 26,199	\$ 25,952	\$ 25,264	\$ 29,303
Gross profit	14,642	14,028	13,445	16,957
(Loss) income before income taxes ⁽¹⁾	(781)	(1,554)	(3,167)	1,141
Net loss ⁽¹⁾⁽²⁾	(507)	(923)	(1,926)	(836)
Diluted loss per share ⁽¹⁾⁽²⁾	(.03)	(.06)	(.12)	(.05)

⁽¹⁾ The third and fourth quarters of fiscal 2003 include pretax severance charges of \$535 and \$310, or \$.02 and \$.01 per share, respectively.

⁽²⁾ The fourth quarter of fiscal 2003 includes \$1,822, or \$.12 per share, in income tax expense related to the establishment of a valuation allowance for certain tax credits.

ITEM 9 - CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

ITEM 9A - CONTROLS AND PROCEDURES.

- (a) Management of the Company has evaluated, under the supervision and with the participation of the Company's Chief Executive Officer and Chief Financial Officer, the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this report pursuant to Rule 13a-15(b) under the Securities Exchange Act of 1934. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures are effective in ensuring that information required to be disclosed is recorded, processed, summarized and reported in a timely manner, and that information was accumulated and communicated to the Company's management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.
- (b) There has been no change in the Company's internal control over financial reporting that occurred during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

PART III.

ITEM 10 - DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT.

Information concerning the Company's directors, its audit committee, code of ethics, and compliance with Section 16(a) of the Exchange Act will be included in the Company's Proxy Statement for the Annual Meeting of Shareholders to be held February 12, 2005, to be filed with the Securities and Exchange Commission pursuant to Section 14(a) of the Securities Exchange Act of 1934 and is incorporated herein by reference.

The information required with respect to the executive officers of the Company is included under the caption "Executive Officers of the Registrant" in Item 1 of Part I of this Annual Report and incorporated herein by reference.

ITEM 11 - EXECUTIVE COMPENSATION.

See the caption "Executive Compensation and Benefits" in the Company's Proxy Statement to be used in conjunction with the February 12, 2005 Annual Meeting of Shareholders and to be filed with the Securities and Exchange Commission pursuant to Section 14(a) of the Securities Exchange Act of 1934, which section is incorporated herein by this reference.

ITEM 12 - SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT.

See the caption "Principal Shareholders" in the Company's Proxy Statement to be used in conjunction with the February 12, 2005 Annual Meeting of Shareholders and to be filed with the Securities and Exchange Commission pursuant to Section 14(a) of the Securities Exchange Act of 1934, which section is incorporated herein by this reference.

ITEM 13 - CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS.

James B. Griswold, a Director and nominee for Director, is a partner in the law firm of Baker & Hostetler LLP. Baker & Hostetler LLP served as general legal counsel to the Company during the fiscal year ended September 30, 2004, and is expected to render services in such capacity to the Company in the future.

ITEM 14 - PRINCIPAL ACCOUNTANT FEES AND SERVICES.

Edgar Filing: KEITHLEY INSTRUMENTS INC - Form 10-K

See the caption "Audit Fees" in the Company's Proxy Statement to be used in conjunction with the February 12, 2005 Annual Meeting of Shareholders and to be filed with the Securities and Exchange Commission pursuant to Section 14(a) of the Securities Exchange Act of 1934, which section is incorporated herein by this reference.

PART IV.

ITEM 15 - EXHIBITS AND FINANCIAL STATEMENT SCHEDULES.

(a)(1) Financial Statements

Our Consolidated Financial Statements and Notes thereto are included in Item 8 of this Annual Report.

(a)(2) Financial Statement Schedules

The following additional information should be read in conjunction with our Consolidated Financial Statements described in Item 15(a)(1):

Schedule II Valuation and Qualifying Accounts

Schedules other than those listed above are omitted because they are not required or not applicable, or because the information is furnished elsewhere in the consolidated financial statements or the notes thereto.

Report of Independent Registered Public Accounting Firm on Financial Statement Schedule

To the Board of Directors and Shareholders

of Keithley Instruments, Inc.

Our audits of the consolidated financial statements referred to in our report dated December 2, 2004, appearing in the fiscal 2004 Annual Report to Shareholders of Keithley Instruments, Inc. (which report and consolidated financial statements are incorporated by reference in this Annual Report on Form 10-K) also included an audit of the financial statement schedule listed as Schedule II of this Form 10-K. In our opinion, this financial statement schedule presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements.

/s/ PricewaterhouseCoopers LLP

Cleveland, Ohio

December 2, 2004

Table of Contents

SCHEDULE II

KEITHLEY INSTRUMENTS, INC.

VALUATION AND QUALIFYING ACCOUNTS

(In Thousands of Dollars)

<u>Column A</u>	<u>Column B</u>	<u>Column C</u>		<u>Column D</u>	<u>Column E</u>
<u>Description</u>	<u>Balance at</u>	<u>Charged to Costs</u>		<u>Deductions</u>	<u>Balance at End</u>
	<u>Beginning of Period</u>	<u>and</u>	<u>Charged to</u>		<u>of Period</u>
		<u>Expenses</u>	<u>other accounts</u>		
For the Year Ended September 30, 2004:					
Valuation allowance for deferred tax assets	\$ 2,332	\$ 105	\$ 190 ⁽¹⁾	\$	\$ 2,627
For the Year Ended September 30, 2003:					
Valuation allowance for deferred tax assets	\$ 532	\$ 1,822	\$ 510 ⁽²⁾	\$ (532) ⁽³⁾	\$ 2,332
For the Year Ended September 30, 2002:					
Valuation allowance for deferred tax assets	\$	\$ 532	\$	\$	\$ 532

(1) The valuation allowance relates to provision for foreign tax credits and certain foreign net operating losses which may not be realized due to the uncertainty of future profitability levels. Approximately \$190 of the valuation allowance recorded in fiscal 2004 was recorded as a reduction of shareholders' equity as foreign tax credits generated in the current year could not be utilized due to the benefit of nonqualified stock options.

(2) The valuation allowance relates to provision for foreign tax credits, R&D credits, and certain foreign net operating losses, which may not be realized due to the uncertainty of future profitability levels. Approximately \$510 of the valuation allowance recorded in fiscal 2003 was recorded as a reduction of shareholders' equity as foreign tax credits generated in that year could not be utilized due to the benefit of nonqualified stock options.

(3) The valuation allowance for Japanese taxes was no longer required as Japanese operations became profitable and utilized net operating loss carryforwards.
