EXPLANATORY NOTE

Restatement of Previously Issued Financial Statements

Amendment No. 1

On November 11, 2005, our chief executive officer and chief financial officer, in consultation with the audit committee of the board of directors, concluded that the previously issued financial statements contained in our quarterly report on Form 10-QSB for the quarter ended June 30, 2005 should not be relied upon. Specifically, they determined that certain expenses for activities related to products and services sold, totaling \$897,046 and \$742,572 for the three month periods ended June 30, 2005 and 2004, and \$1,779,618 and \$1,363,206 for the six month periods ended June 30, 2005 and 2004, should be reclassified from operating expenses to cost of sales. Reclassifications for these items were made and we restated these financial statements to make the necessary accounting corrections.

Also in this amendment, due to further guidance, we reclassified the portion of the proceeds from the issuance of preferred stock and warrants that was allocated to the par value of preferred stock (\$7,218) from permanent equity to temporary equity.

Amendment No. 2

On February 3, 2006, our chief executive officer and chief financial officer, in consultation with the audit committee of the board of directors, concluded that the previously issued controls and procedures disclosure on Form 10-QSB/A for the quarter ended June 30, 2005 should be amended for the reasons set forth below.

The registration process relating to the registration of the resale of shares of common stock by one of our stockholders, Barron Partners LP, has involved significant technical discussions with several accounting, regulatory and valuation experts. In our prior Form 10-QSB/A we disclosed a deficiency in internal control over financial reporting related to the need for additional qualified financial and accounting personnel. This deficiency was a result of our entering into the series of transactions that resulted in the subsequent public reporting of significant operations without personal with public reporting experience. In the process of discussions with regulatory experts, we determined to revise our internal control disclosure to note our controls were ineffective for the reasons previously disclosed and include more specifics as to the nature of the deficiency and our plans and timeframe for curing the deficiency.

Also, in view of this amendment, we have taken the opportunity to make certain other conforming changes to the Financial Statements. In 2005, we began reporting our operations under two operating segments and, consequently, adopted the provisions of SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*. As a result, the disclosures in Note 10 have been expanded to conform to the provisions of SFAS No. 131 regarding segment presentation. Finally, as a result of our recapitalization transaction effectuated on February 11, 2005 (see Note 2 to the Financial Statements) and discussions with regulatory experts we have reclassified certain amounts from retained earnings to paid-in capital.

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form 10QSB/A

We have also updated the financial statements for two subsequent events. One is a consulting arrangement entered into by the registrant for which it is anticipated payment will be made in the form of issuance of registrant's common stock in an amount equal to 3.5% of the outstanding common and preferred stock of the registrant immediately following the February 2005 merger. We are in the process of reaching a definitive agreement with respect to the consulting arrangement. The second subsequent event was the settlement of litigation relating to the merger. See Note 5 to the Financial Statements for more information on these subsequent events.

General

The adjustments reflected in this amendment do not affect income from operations or cash flows.

All amounts in this quarterly report on Form 10-QSB/A have been updated, as appropriate, to reflect these restatements. We did not update this quarterly report on Form 10-QSB/A for subsequent events occurring after the filing of our original quarterly report on Form 10-QSB on August 22, 2005, except as specifically noted above.

COMPUTER SOFTWARE INNOVATIONS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACTIVITIES

Description of business

Computer Software Innovations, Inc. (CSI, Company, we or us) is engaged in the business of development, sales, deployment and ongoing support of internally developed software applications. The Company is also engaged in providing technology solutions through the sales and distribution of computers, telephony, video conferencing, surveillance and instructional equipment and accessories and through offering a wide range of technology consulting services, including network and systems integration and computer support and maintenance services. The Company currently markets its products and services to a wide variety of governmental, education and not-for-profit entities in the Southeastern United States. The majority of the Company s business is with local governmental agencies and kindergarten through high school education entities.

Organization

CSI, (formerly VerticalBuyer, Inc.), a Delaware corporation, was incorporated on September 24, 1999. The Company currently trades in the over the counter market and is reported on the OTC Bulletin Board under the symbol CSWI.OB.

In the first quarter of 2005, we concluded a series of recapitalization transactions which began January 31, 2005 with a change in control due to the purchase of a majority of our common stock by Computer Software Innovations, Inc., a South Carolina corporation (CSI South Carolina). These transactions culminated on February 11, 2005 with the merger of CSI South Carolina into us, and our issuance of preferred stock, common stock, warrants and certain subordinated notes, and the change of our name to Computer Software Innovations, Inc. We refer to the Company prior to such merger as VerticalBuyer.

The series of transactions was accounted for as a reverse acquisition, in accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 141, Business Combinations, with CSI South Carolina being designated for accounting purposes as the acquirer, and the surviving corporation, VerticalBuyer, Inc., being designated for accounting purposes as the acquiree. The assets of CSI South Carolina as the accounting acquirer were recorded at their historical costs. The assets and liabilities of VerticalBuyer as the acquiree would have been recorded at fair value, but no assets or liabilities existed at the date of acquisition; and, accordingly, no goodwill was recorded in connection with the reverse acquisition. Costs associated with the reverse merger are expensed as incurred. Shares issued in the transaction are shown as outstanding for all periods presented and our activities are included only from the date of the transaction forward. Shareholders equity of CSI South Carolina, after giving effect for differences in par value, has been carried forward after the transaction.

The series of transactions culminating in the reverse acquisition and related financing are detailed in Note 2. ACQUISITION AND MERGER.

Basis of presentation

The consolidated financial statements include CSI Technology Resources, Inc., a wholly-owned subsidiary. CSI Technology Resources Inc., was acquired by CSI on May 1, 2000, and became the technology services segment of CSI. This subsidiary no longer has any significant operations or separate accounting, as all activities are now accounted for within CSI, except that certain vendor contracts are still in the name of CSI Technology Resources, Inc. At a future date, the name on these contracts may be converted and the subsidiary deactivated, subject to a review of any tax or legal implications. The consolidated balance sheet and the related statements of operations, capital accounts and cash flows are unaudited. Intercompany balances and transactions have been eliminated. The Company uses the accrual basis of accounting. In our opinion, all adjustments (consisting of normal recurring adjustments) necessary for fair presentation of the interim financial statements have been made. The accounting and reporting policies conform to accounting principles generally accepted in the United States of America.

Significant Accounting Issue and Potential Subsequent Event Affecting Basis of Presentation.

In the series of transactions referred to in Organization above and in Note 2, ACQUISITION AND MERGER, CSI issued warrants to Barron in connection with the issuance of preferred stock. The preferred stock transaction was entered into in accordance with a registration rights agreement. The agreement contains a liquidated damages clause which requires cash penalties equal to 25% of Barron's investment per annum if the Company's registration of stock does not become effective by June 11, 2005. Extra time has been required of the Company to consult with accounting, valuation and regulatory experts

Table of Contents

due to recent accounting guidance related to the registration rights agreement, and its liquidated damages clause. In recognition of the changes in guidance and the Company's efforts to address them, Barron has extended, until September 30, 2005, the deadline by which the Company's registration should become effective to avoid cash penalties. Since the liquidated damages are payable in cash, under EITF 00-19 Accounting for Derivative Financial Instruments Indexed to and Potentially Settled in a Company's Own Stock, a potential obligation (referred to under EITF 00-19 as a derivative financial instrument) exists until the registration is made effective. EITF 00-19 and current guidance consider the liquidated damages as an embedded part of the financial agreement creating the warrants. Accordingly, the entire proceeds of the preferred stock issuance, except for the par value, have been allocated to the warrants and recorded as a liability under the caption "Financial instrument" on the balance sheet until the Company's registration statement on Form SB-2 becomes effective. In addition, the Company is required to adjust the warrants to fair market value as of the end of each period. The difference is reported in "Other income (expense)" in the Statement of Operations. The par value of the preferred stock has been classified as temporary equity on the balance sheet. Accordingly, our net shareholders' equity as a result of this treatment is reported as a deficit of \$7.1 million. (See also Note 6.)

It was not the intent by either party to the transaction (CSI or Barron) that the registration rights agreement result in the majority of the proceeds from the preferred stock issuance and warrants being recorded as a liability rather than equity. The Company is in the process of negotiating an amendment to the liquidated damages provisions of the registration rights agreement to eliminate the accounting treatment of the proceeds (net of par value) as a liability. If successful, the liability and temporary equity will be reclassified to permanent equity and, assuming continued earnings from operations, our reported shareholders' deficit would be eliminated.

We will utilize our best efforts to complete the shares registration and renegotiate the registration rights agreement. However, there can be no assurance we will be successful in these efforts. (See also a detailed discussion of the potential impact on liquidity and cash flows in Part I, Item 2.)

Disclosure regarding segments

Prior to January 1, 2005, the Company reported as one operating segment, as the chief operating decision-maker reviewed the results of operations of the Company as a single enterprise. During the first quarter of 2005, in part because of the reverse acquisition, the Company began reporting its operations under two operating segments: the Software applications segment and the Technology solutions segment. Prior-year amounts have been reclassified to conform to the current period presentation.

Computer software costs

Computer software costs consist of internal software production costs capitalized under the provisions of SFAS No. 86, Accounting for the Costs of Computer Software to be Sold, Leased or Otherwise Marketed. Costs in the research and development of new software products and enhancements are expensed as incurred. Capitalized computer software costs are amortized over the economic life of the product, generally three years, using the straight-line method.

Revenue recognition

Revenue generated from products shipped is recognized when the risk and rights of ownership have passed to the customer. The Company, under certain conditions, permits its customers to return or exchange products. The provision for sales returns is recorded concurrently with

revenue recognition.

Revenues generated from service and support activities are recognized as the services are performed. Revenue generated from support service block contracts and maintenance contracts, generally collected in advance, are deferred and recognized as income when services are performed or on a straight line basis over the contractual life of the maintenance agreement. Deferred amounts are reported in deferred revenue.

The Company recognizes revenue in accordance with AICPA Statement of Position (SOP) 97-2 Software Revenue Recognition, as amended and modified by SOP 98-9, Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions. The Company recognizes license revenues when the product has been shipped or the access codes that allow for immediate possession of the software have been provided to the customer (collectively delivered), the fees are fixed or determinable, collectibility is probable and vendor-specific objective evidence (VSOE) of fair value exists to allocate the fee to the undelivered elements of the arrangement. VSOE is based on the price charged when an element is sold separately. In the case of an element not yet sold separately, the price, which does not change before the element is made generally available, is established by authorized management. If an acceptance period is required, the Company recognizes revenue upon customer acceptance or the expiration of the acceptance period after all other revenue recognition criteria under SOP 97-2 have been met. The Company's standard agreements do not contain product return rights.

Table of Contents

In accordance with Emerging Issues Task Force (EITF) 99-19, Reporting Revenue Gross as a Principal Versus Net as an Agent, the Company records revenues as net when the Company serves as an agent whereby the Company's supplier pays a commission to the Company but acts as the primary obligor in a transaction and as gross when the Company serves as a principal whereby the Company acts as the primary obligor in a transaction, has the latitude for establishing pricing and retains all the credit risk associated with such transaction.

Warranties

The Company's suppliers generally warrant the products distributed by the Company and allow returns of defective products, including those that have been returned to the Company by its customers. The Company does not independently warrant the products it distributes; however, the Company does warrant its services with regard to products that it configures for its customers and products that it builds from components purchased from other sources. Warranty expense is not material to the Company's financial statements.

Vendor programs

The Company receives volume incentives and rebates from certain manufacturers related to sales of certain products, which are recorded as a reduction of cost of goods sold when earned. The Company also receives manufacturer reimbursement for certain promotional and marketing activities that offset expenses incurred by the Company.

Income taxes

The Company uses the asset and liability method of accounting for income taxes. Income taxes are provided for the tax effects of transactions reported in the financial statements and consist of taxes currently due or refundable plus deferred income tax assets and liabilities. Deferred income tax assets and liabilities are recorded to recognize the income tax effect of the temporary differences in the method of reporting various items of income and expenses for financial reporting purposes and income tax purposes. The deferred income tax assets and liabilities at the end of the year are determined using the statutory tax rates expected to be in effect when the taxes are actually due or refundable.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Earnings (loss) per share

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form 10QSB/A

Basic earnings per share is computed by dividing net income by the weighted average number of common stock shares outstanding during the period. Diluted earnings per share is computed by dividing net income by the weighted average number of common and potential common shares outstanding during the period. All share amounts have been adjusted to give effect for the reverse stock split and change in number of shares in connection with the exchange of equity interests as a result of the reverse acquisition, by including all shares issued in the transaction as outstanding in the calculations for all periods presented, except where inclusion is anti-dilutive. Potential common shares were 9,842,872 for the quarter ended June 30, 2005 (consisting of shares underlying the preferred stock, warrants and options of 7,217,736, 2,369,361 and 255,776, respectively), and 9,747,560 for the six months ended June 30, 2005 (consisting of shares underlying the preferred stock, warrants and options of 7,217,736, 2,274,294 and 255,529, respectively). The shares underlying the outstanding warrants and options of 7,217,736 and 268,343, respectively, were outstanding for both the quarterly and six month periods ended June 30, 2005 and are reduced by application of the treasury stock method which assumes the proceeds from the exercise of the warrants and options are used to buy back shares off the market thereby reducing the number of outstanding shares for the earnings per share calculation. Generally accepted accounting principles (GAAP) require that in the case of thinly traded stock, management assess among other factors whether the market quoted price is representative of the price which would be effective were all shares issued in connection with various transactions, which would include the issuance of significant additional shares in dilutive transactions. Following consultation with accounting and valuation experts and applying the principle of conservatism, which is a basis of the dilution calculation under GAAP, management uses the higher of a cashflow based stock value computation based on comparisons to peer public companies, or the quoted market price, on a weighted average basis, for the repurchase of shares in the diluted earnings per share calculation. Once management, in consultation with its accounting and financial experts considers the stock no longer thinly traded, management will use the quoted market price exclusively.

The 9,747,560 potential common shares are not used in the calculation of diluted loss per share for the six months period ended June 30, 2005 as the effect would be anti-dilutive. As a result of the merger, prior period per share amounts have been

Table of Contents

restated to reflect the stock split issuances and cancellation of common stock. Accordingly, the common shares outstanding for the quarterly and six month periods ended June 30, 2004 are 2,631,786. The number of shares used in the diluted earnings per share calculation for the quarterly and six month periods ended June 30, 2004 are 2,640,438 and 2,640,480, respectively, and include the dilutive effect of options outstanding at that time. The dilutive effect of the preferred stock and warrants issued in connection with the issuance of preferred stock after the reverse merger has not been included in the diluted earnings per share calculation for the quarterly and six months periods of the prior year as these were not outstanding at that time.

Stock-based compensation

The Company has stock based employee compensation plans, which are described more fully in Note 3. The Company accounts for stock based compensation using the fair value method prescribed in SFAS No. 123, Accounting for Stock Based Compensation, and related interpretations. No options or awards have been granted under the current plans. The Company accelerated the vesting and assumed the outstanding options of the predecessor plan (fixed stock option plan) of CSI South Carolina in connection with the reverse merger. No additional options will be issued under this fixed stock option plan. The Company has recognized compensation cost for its fixed stock option plan as all options granted under the plan had an exercise price less than the estimated market price of the underlying common stock on the date of grant.

The Company utilizes the Black-Scholes model to estimate the fair value of options granted.

Fair value of financial instruments

The Company's financial instruments include cash equivalents, accounts receivable, accounts payable, short-term debt and other financial instruments associated with the issuance of the common stock warrants attributable to the preferred stock capital investment in the Company in February of 2005. The carrying values of cash equivalents, accounts receivable and accounts payable approximate their fair value because of the short maturity of these instruments. The carrying amount of the Company's bank borrowings under its credit facility approximate fair value because the interest rates are reset periodically to reflect current market rates.

The Company's financial instruments also include a financial instrument in which a valuation for the warrants from the Barron Partners LP preferred stock financing agreement contained a registration rights agreement which contained a liquidating damages provision. Accordingly, a fair-value option pricing model was used to determine the fair value of those warrants which are classified as a financial instrument in the current liabilities section of the consolidated balance sheet. (See also Note 1, Significant Accounting Issue and Subsequent Event Affecting Basis of Presentation and Note 6.)

NOTE 2 ACQUISITION AND MERGER

In the first quarter of 2005, we concluded a series of recapitalization transactions which began January 31, 2005 with a change in control due to the purchase of a majority of our common stock by Computer Software Innovations, Inc., a South Carolina corporation (CSI South Carolina). These transactions culminated on February 11, 2005 with the merger of CSI South Carolina into us, and our issuance of preferred stock, common stock, warrants and certain subordinated notes, and the change of our name to Computer Software Innovations, Inc. We refer to the Company prior to such merger as VerticalBuyer.

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form 10QSB/A

The significant merger related cash activity in the order it occurred is as follows:

Purchase of VerticalBuyer shell company	\$ (415,024)
CSI South Carolina redemption of options for common stock	(899,144)
Initial cash payment of portion of CSI South Carolina \$3,460,000 dividends declared to shareholders	(960,000)
Proceeds from sale of preferred stock and warrants in merger	5,042,250
Proceeds from issuance of subordinated note to Barron	1,875,200
Payment of remaining outstanding dividends declared, from preferred stock and warrant proceeds	(2,500,000)
Payment of the first of the two sets of subordinated notes issued to shareholders in connection with merger	(3,624,800)
Payment of debt issuance costs for \$3,000,000 revolving credit facility	(83,800)
Initial borrowings under revolving credit facility	1,500,000
Partial payment on second set of shareholder (\$1,875,200) and Barron s (\$1,875,200) notes, from loan proceeds	(1,500,000)
	\$ (1,565,318)
Net effect of merger transactions on cash, and cash used for financing activities	\$ (1,565,318)

In addition to the cash used for financing activities related to the merger, the Company incurred approximately \$700,000 in legal and professional fees which were expensed.

The above transactions are described in more detail below.

Table of Contents

Change of Control. On January 31, 2005, approximately 77% of the ownership of the Company, known then as VerticalBuyer, Inc. (VerticalBuyer or VBYSR), which had been maintained as a corporate shell since it discontinued operations in September 2001, was acquired by CSI South Carolina for \$415,024.

Reverse Stock Split. On January 31, 2005, the board of directors of VerticalBuyer approved a 40 to 1 consolidation of shares or reverse stock split of its common stock in contemplation of a potential merger of VBYSR with CSI South Carolina. The reverse stock split was paid effective February 11, 2005 to shareholders of record as of February 10, 2005. Pursuant to the reverse stock split, every 40 shares of the VBYSR s common stock issued and outstanding on the record date was converted and combined into one share of post-split shares. The par value of all shares of common stock was maintained at \$0.001 per share. No fractional shares were issued, nor was any cash paid in lieu thereof. Rather, all fractional shares were rounded up to the next higher number of post-split shares and the same issued to any beneficial holder of such post-split shares which would have resulted in fractional shares. Accordingly, each beneficial holder of the common stock had the right to receive at least one post-split share.

Redemption of Options. Prior to the merger, CSI South Carolina, for \$899,144, redeemed options to purchase 738,195 shares, as allowed for under a stock option plan which had provided to certain non-executive employees options to purchase 1,065,746 shares of common stock. The 738,195 non-executive employees options redeemed represented 73.34% of the 1,006,538 options outstanding at the time of the merger. Pursuant to the plan, the option holders retained the remaining portion of their options.

Declaration of Dividends. Prior to the merger, CSI South Carolina also declared dividends to its five shareholders totaling \$3,460,000, of which \$960,000 was paid immediately in cash and \$2.5 million was recorded as subordinated dividend notes payable to each stockholder. These subordinated dividend notes payable were paid subsequent to the closing of the transaction and prior to the end of the first quarter from the proceeds of the issuance of preferred stock and warrants discussed below.

Name Change. On February 10, 2005, the VBYSR changed its name from VerticalBuyer, Inc to Computer Software Innovations, Inc., referred to herein as CSI or the Company.

Merger Agreement. On February 10, 2005, VBYSR entered into an Agreement and Plan of Merger (the Merger Agreement) with CSI South Carolina. The Merger Agreement provided that, upon the terms and conditions set forth in the agreement, CSI South Carolina would merge into CSI, with CSI continuing as the surviving corporation. The merger and related transactions were consummated on February 11, 2005 via the surrender (and cancellation) of CSI s shares in VerticalBuyer, representing 77% ownership of the common stock of VerticalBuyer before the merger, and an exchange by the five shareholders of CSI South Carolina of their shares in CSI South Carolina for shares in VerticalBuyer representing 96% ownership in VerticalBuyer (now known as CSI) following the merger, and the issuance of notes payable to the shareholders, and cash (as detailed below).

SFAS No. 141 Business Combinations states that, In identifying the acquiring entity in a combination effected through an exchange of equity interests, all pertinent facts and circumstances should be considered, and includes the following as significant factors in the decision process: which of the combining entities owners as a group retain the larger portion of voting rights, composition of the governing body and senior management positions, and the terms of the exchange of equity securities.

Following the merger, the former majority shareholders of CSI South Carolina as a group held 96% of the voting stock of the Company, occupied two of five board seats with the remaining three seats being filled by independent directors, and retained senior management positions of the combined company. Preferred stock issued subsequent to the merger sold to assist with the payment for shares and dividends payable to

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form 10QSB/A

the CSI South Carolina shareholders, cannot be converted to common stock in excess of 4.99% ownership within a period of 60 days. In addition, the preferred stock has no voting rights (except under limited circumstances under Delaware law) and generally no provisions granting rights with respect to the governance of the Company. Accordingly, under SFAS No. 141 Business Combinations, the merger of CSI South Carolina into us was considered to be a reverse acquisition, whereby CSI South Carolina is considered to be the acquirer even though it is not the surviving corporation. Accordingly, the assets and liabilities of CSI South Carolina continued to be recorded at their actual cost. The assets and liabilities of VerticalBuyer would have been recorded at fair value, but no assets or liabilities existed at the time of acquisition, and, therefore, no goodwill was recorded. Under reverse acquisition accounting, the financial statements of the surviving corporation (VerticalBuyer) are the financial statements of the acquirer (CSI South Carolina). Costs associated with the reverse acquisition are expensed as incurred. Shares issued in the transaction are shown as outstanding for all periods presented and our activities (activities of VerticalBuyer) are included only from the date of the transaction forward. Shareholders' equity of CSI-South Carolina, after giving effect for differences in par value, has been carried forward after the acquisition.

Table of Contents

Pursuant to the Merger Agreement, in the merger and related CSI dividend transactions, the former shareholders of CSI – South Carolina received, in exchange for their shares of common stock, approximately \$6.7 million of cash, subordinated notes aggregating approximately \$2.3 million to be repaid over the next fifteen months and 2,526,904 shares of common stock of the Company. The shares of VerticalBuyer’s common stock previously held by CSI – South Carolina, representing approximately 77 percent of VerticalBuyer’s issued and outstanding capital stock, were cancelled, as was the common stock of CSI – South Carolina. The remaining shareholders of VerticalBuyer retained their existing shares, subject to the 40 to 1 reverse stock split.

Preferred Stock Purchase Agreement. In connection with the merger, CSI entered into a Preferred Stock Purchase Agreement dated February 10, 2005 (the Preferred Stock Agreement) with Barron Partners LP (Barron), whereby CSI agreed to issue 7,217,736 shares of its newly created Series A convertible, non-voting preferred stock to Barron in exchange for payment of \$5,042,250. Each share of preferred stock is convertible into one share of common stock, subject to certain anti-dilution adjustments. The proceeds of the preferred stock issuance were used to pay the outstanding dividends declared by CSI – South Carolina and a portion of the subordinated notes. Barron has agreed, generally, not to convert at any time its preferred stock into shares of the Company common stock or exercise its warrants to purchase shares of common stock if and to the extent that Barron’s beneficial ownership of CSI common stock would exceed 4.99%, without giving the Company at least 61 days’ advance notice.

GAAP requires that in the case of thinly traded stock, management assess, among other factors, whether the market quoted price is representative of the price which would be effective were all shares issued in connection with various transactions, which would include having significant additional shares and liquidity in the market. Following consultation with accounting and valuation experts, management has used a cashflow based stock value computation based on comparisons to peer public companies and the market value of their shares near the date of the Company’s preferred stock and warrant transaction. The Company has used these comparables to calculate a per share market value of its shares as a public company with significant stock liquidity (the Adjusted Market Value).

The Adjusted Market Value of the shares has been used in the Black-Scholes calculation for valuing the warrants. Because the registration rights agreement contains a liquidated damages clause, the warrants are considered a liability under derivative accounting (see further discussion under the *Warrants* section below). The principles used under SFAS No. 150 – Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity require that the proceeds be allocated first to the liability portion of an instrument based on its fair market value and the remaining proceeds assigned to the equity portion. As the fair market value of the warrants exceeded the proceeds from the preferred shares and warrants offering, no proceeds, except for the par value of \$7,218 were allocated to the preferred stock. In addition, the par value of the preferred stock has been recorded as temporary equity on the Company’s Balance Sheet.

Warrants. Pursuant to the Preferred Stock Agreement, Barron was issued two warrants to purchase 7,217,736 shares of CSI’s common stock (the warrant shares). The respective exercise prices of the warrants are \$1.3972 and \$2.0958 per share, with each warrant exercisable for half of the total Warrant Shares. The terms and conditions of the warrants are identical except with respect to exercise price. Barron has agreed, generally, not to convert at any time its preferred stock into shares of the Company common stock or exercise its warrants to purchase shares of common stock if and to the extent that Barron’s beneficial ownership of CSI common stock would exceed 4.99%, without giving the Company at least 61 days’ advance notice.

As a result of the registration rights agreement that contains a liquidated damages clause, the Company is required to follow EITF 00-19, Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company’s Own Stock (see Note 6). In light of the required accounting treatment under EITF 00-19, the amount of proceeds allocated to the issuance of warrants (as discussed in the section entitled *Preferred Stock Purchase Agreement* immediately above) was recorded as a liability as of the date of the transaction. In addition, the difference between the amount allocated to the issuance of warrants and the fair market value of the warrants based on the Black-Scholes valuation method as of March 31, 2005 was recorded in the Statement of Operations in the line Unrealized loss on financial instrument in the Statement of Operations and as an adjustment to the line Financial Instrument in our Balance Sheet, to restate the warrants to fair market value as of that date. In each period thereafter, including the current quarter, the financial instrument is marked to market and changes in the value are recorded as adjustments in the Statement of Operations (see also Note 6).

Subordinated Promissory Notes. In connection with the merger, CSI issued six subordinated promissory notes payable, respectively, to Barron and the five former shareholders of CSI – South Carolina. All such notes are *pari passu* and rank equally in right of payment in the event of the bankruptcy or liquidation of CSI, or similar events, and are subordinated in right of payment to all other non-subordinated debt of CSI. Payments of principal and interest may be paid as agreed under such subordinated notes so long as, generally, CSI is not in default under any of its senior indebtedness.

Table of Contents

The Barron note provides that CSI will pay to Barron \$1,875,200, with interest accruing at the prime rate plus two percent. The principal on the note must be paid in full on or before May 10, 2006. Any past due and unpaid amounts bear interest at the rate of 15% per annum until paid in full. The amount outstanding under this note totaled \$1,125,200 at June 30, 2005.

The aggregate principal sum borrowed under the notes payable by CSI to the five former shareholders of CSI South Carolina is \$1,875,200, or \$375,040 per individual. Other than the principal amount borrowed, the terms of the notes are substantially identical to the note payable to Barron. Amounts outstanding under these notes totaled \$1,125,200 at June 30, 2005.

Also in connection with the merger, CSI issued five promissory notes payable to the five former shareholders of CSI South Carolina as additional consideration related to the equity exchange totaling \$3,624,800. These amounts were paid immediately following the merger from proceeds from the issuance of the preferred stock and warrants and the \$1,875,200 subordinated note issued to Barron.

Merger Expenses and Other. Expenses for the merger consisted of legal and professional fees, commissions and compensation expense related to the merger. Of the \$759,283 in fees, \$275,000 was paid to a third-party broker, Liberty Company, LLC, as a commission for its assistance in the preferred stock sale and warrant issuance. No commission was paid to Barron, the investment group which purchased the preferred stock and received the warrants. The remaining fees of \$484,283 consisted of merger related fees paid principally for legal and accounting services.

Compensation expense related to the early redemption of stock options was \$631,174, consisting of \$899,144 cash compensation less unearned compensation expense of \$267,970 eliminated upon the redemption. Related payroll benefit costs of \$47,766, were also paid by CSI South Carolina. The \$631,174 is included in the line item Stock option compensation and the \$47,766 is included in the line item Other selling, general and administrative expenses in CSI's Consolidated Statements of Operations for the six months ended June 30, 2005.

NOTE 3 STOCK-BASED COMPENSATION PLAN, WARRANTS AND ADDITIONAL PAID-IN-CAPITAL

The Company assumed in the merger the stock based compensation plan of CSI- South Carolina as described below. The compensation cost that had been charged to income for the plan totaled approximately \$5,000 for the three months and approximately \$10,000 for the six months ended June 30, 2004. No compensation cost was recorded for the three or six month periods ended June 30, 2005, as all compensation cost related to the 1,006,538 options outstanding as of the beginning of the period had previously been expensed.

At the time of the merger, the CSI South Carolina plan provided for the granting of options to purchase common stock, with a maximum term of ten years, at the option price on the date of grant. Management determined at the time of grant whether options vested immediately or at the end of a three year vesting period. Under the plan, options for 1,065,746 shares had been granted to employees, of which 59,208 options were cancelled and 1,006,538 were outstanding under the plan at the time of merger.

In connection with and immediately prior to the merger with VerticalBuyer, CSI South Carolina for \$899,144 redeemed options to purchase 797,403 shares pursuant to the terms of the plan. Under such plan, certain non-executive employees had been awarded options to purchase 1,065,746 shares of common stock. The 797,403 non-executive employees options redeemed represented 73.34% of the 1,006,538 options outstanding at the time of the merger. Compensation expense related to the early redemption of stock options was \$631,174, consisting of the \$899,144 cash payment less unearned compensation expense of \$267,970 eliminated upon the redemption. Employer FICA and medicare, and additional expenses related to this transaction totaling \$47,766, were also paid by CSI South Carolina. Pursuant to the plan, the option holders

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form 10QSB/A

retained the remaining 268,343 options. The board of directors of the surviving corporation, CSI, at its discretion, provided that the options would be assumed and exercisable for shares of CSI common stock at the exchange ratio applicable to the five CSI South Carolina shareholders in the merger.

The fair value of options was estimated at the grant date using the Black-Scholes option-pricing model with the following weighted-average assumptions for grants in 2003: dividend rate of zero percent for all years, risk-free interest rate of 4.8 percent, expected lives of 10 years, and volatility of 0.35 percent.

Table of Contents

VerticalBuyer also had an option plan, with shares available for issuance at the time of the merger. However, all options under the plan had expired, and the plan was cancelled, on March 24, 2005. Subsequent to the end of the first quarter, our board of directors approved a new plan for the award of stock-based compensation to employees, directors and consultants. The plan provides for the award of options, restricted stock or stock appreciation rights at the discretion of the compensation committee of the board of up to an aggregate of 1,100,000 shares. As of the filing date of this report, no awards have been granted or are outstanding under the new plan.

In February of 2005, the Company issued 7,217,736 warrants exercisable for common stock to Barron as part of a preferred stock financing. The warrants have a term of five years. The Company used a fair-value option pricing model to value these stock warrants. Pursuant to EITF 00-19,

Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock, the value of these warrants has been recorded as a liability in the current liabilities section of the consolidated balance sheet until the Company has obtained an effective registration statement. Upon the effectiveness of the registration statement, the value of the shares may be recorded as additional paid-in capital.

The following tables summarize the stock-based compensation, warrants and Additional paid-in capital for the period:

(a) Stock options

No options were issued or exercised during the three or six month periods ended June 30, 2005 or 2004. As of June 30, 2005 and 2004, the Company had the following stock options outstanding:

Detail	Number of Options	Weighted Average Exercise Price	Expiration
Options assumed in reverse merger	268,343	\$ 0.12	November 1, 2012

(b) Warrants

The following summarizes the warrant activity for the affected periods:

Detail	Black-Scholes Valuation (\$)	Number of Warrants	Exercise Price	Expiration
Balance December 31, 2004				
Barron Warrant Group 1	\$ 4,619,352	3,608,868	\$ 1.3972	February 11, 2010
Barron Warrant Group 2	3,608,868	3,608,868	\$ 2.0958	February 11, 2010

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form 10QSB/A

Balance June 30, 2005	\$ 8,228,220	7,217,736
-----------------------	--------------	-----------

(c) Additional paid-in-capital

Included in additional paid-in-capital are the following items:

Detail		
Additional paid-in capital related to common stock		\$ 77,368
Purchase of VerticalBuyer shell		(415,024)
Warrants ⁽¹⁾		_____
Balance June 30, 2005		\$ (337,656)

⁽¹⁾ Recorded in the Company's Balance Sheet as a liability under the line item financial instrument due to a cash liquidated damages penalty in a Registration Rights Agreement entered into in connection with the issuance of the warrants, until such time as the registration of the shares becomes effective, or the registration rights agreement is appropriately amended as discussed previously and in Note 6 Financial Instrument below.

NOTE 4 LONG-TERM AND SHORT-TERM DEBT AND OFF-BALANCE SHEET INSTRUMENTS

On March 17, 2005, CSI entered into a revolving credit facility with a financial institution. Fees for the transaction were \$83,800. The \$3,000,000 facility allows the Company to borrow up to 80% of accounts receivable balances. The total balance borrowed may not to exceed \$3,000,000. Loans bear interest at Libor rate plus 0.275% (5.86% at June 30, 2005), payable monthly and mature on March 17, 2006. The facility is collateralized by substantially all the assets of the Company. Immediately upon entering into the loan agreement, the Company borrowed \$1,500,000, which was used for the paydown of a portion of the subordinated notes issued in connection with the merger. There was \$1,051,000 outstanding and \$1,949,000 available under the facility as of June 30, 2005. Under the facility, CSI is subject to restrictive covenants, the primary terms

Table of Contents

of which restrict incurring debt, making loans, changing approved executive compensation arrangements or making distributions or investments which would violate the restrictive covenants in the loan agreement. The agreement with our lender also requires the achievement of a debt to EBITDA (Earnings Before Interest Taxes, Depreciation and Amortization a non-GAAP, financial measure which takes GAAP net income and adds back in interest, taxes, depreciation and amortization) ratio of not more than 2.5:1 measured on a quarterly rolling twelve months basis by June 30, 2005, EBITDA of not less than \$2,000,000 by year-end 2005 and a minimum tangible net worth of \$1,500,000 including subordinated debt by year-end 2005. As of the end of the current quarter, the Company would not have met the minimum tangible net worth requirements, due to the classification of the warrants as a liability as described below, and there can be no assurance that we will do so by the effective dates prescribed in the covenants.

During the preparation of its first quarter unaudited financial statements, the Company determined that pursuant to EITF 00-19, Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock, the value of the warrants issued in conjunction with our preferred stock in February 2005 should be recorded as a current liability on our consolidated balance sheet until the Company has obtained an effective registration statement pursuant to the terms of the registration rights agreement entered into with the holder of the warrants and the preferred stock at the time of issuance. This accounting treatment is explained in more detail in Part I of this report, in Item 1, in footnotes 1, 2, and 6 to our consolidated unaudited financial statements, and in Item 2. Such information is incorporated into this note by reference.

As a result of such accounting treatment for the warrants as a liability, our net worth was reduced at June 30, 2005 from a net deficit of \$0.1 million to a deficit of \$7.1 million. When we entered into our \$3 million bank revolving credit facility on March 17, 2005, the accounting for the warrants described above was not anticipated. As a result, the Company, as a condition to such loan arrangement, represented that it had a net worth of \$600,000 or greater, counting as equity for the purposes of such calculation subordinated indebtedness of \$2.3 million. Taking into account the new accounting treatment for the warrants, we now believe that the representation of a minimum net worth of \$600,000 made at the closing of the credit facility was not correct and that we may be in technical default under our bank credit facility as a result. The bank has granted us a waiver with respect to any such default until August 30, 2005. Pursuant to the waiver, we are obligated to achieve a minimum net worth of \$600,000 or more as of such date and at quarter end thereafter, again counting subordinated debt as equity for the purposes of such calculation. As discussed in Part I, Item 2, we are currently in negotiations with the holder of the preferred stock and warrants to amend the liquidated damages provisions contained in the registration rights agreement in such a way as to eliminate the current accounting treatment which causes the warrants to be classified as a liability. Likewise, such accounting treatment would be eliminated upon the registration statement which is the subject of the registration rights agreement becoming effective with the SEC and thereby foreclosing during the period of such effectiveness the operation of the liquidated damages provisions. Although management anticipates that through one or both of these alternatives it will be able to eliminate the current accounting for the warrants and comply with the requirements of the bank waiver, we can give no assurances that we will in fact successfully comply with the requirements of the bank waiver and avoid again being in default under our bank credit facility. If the Company remains in technical default of this covenant, in light of management's ongoing efforts to resolve the issues surrounding the liability classification of the warrants, while not assured, management believes the bank will grant an additional waiver.

As of June 30, 2005, and at August 18, 2005, there were outstanding draws totaling \$1,051,000 and \$1,261,000, respectively, under our bank credit facility. Pursuant to our agreements with the bank, upon an event of default, it may accelerate and require the repayment of all amounts under the credit facility. It may also decline to make further advances. At June 30, 2005 and August 18, 2005, \$1.9 million and \$1.4 million respectively, were available for future advances under the facility.

We do not believe that any related default or adverse effect was triggered under any other material agreement of the Company as a consequence of any potential loan default under our bank credit facility described above.

The Company also has subordinated notes payable to shareholders. See Note 2.

As of June 30, 2005, for the prior reporting periods, and through the filing date, CSI had no off-balance sheet instruments.

NOTE 5 COMMITMENTS AND CONTINGENCIES AND SUBSEQUENT EVENTS

(a) Integrated Tek Solutions Lawsuit

On April 4, 2005, Integrated Tek Solutions, Inc. filed a lawsuit against the Company alleging breach of contract, fraud, negligent misrepresentation and promissory estoppel. The action arose out of a letter of intent pursuant to which a predecessor to the plaintiff conducted negotiations relating to a potential acquisition of CSI South Carolina s common stock. The defendants in the lawsuit included some of the Company s officers and directors. The complaint sought damages up to \$60 million in the aggregate.

On December 28, 2005, the suit was settled by all parties involved. As part of the settlement, the plaintiff released all claims against all defendants in exchange for payment of \$600,000. The Company contributed \$200,000 toward this payment with

Table of Contents

each of the five individual current and former officers of the Company contributing \$20,000. The remaining \$300,000 was paid by the other defendants in the suit. Although the Company maintained the suit was without merit, the Company believed the settlement was prudent in view of the cost of continuing litigation. None of the portion of the settlement payment made by the Company was covered by any of the Company's insurance policies.

At June 30, 2005, the Company believed that the plaintiff's claims were without merit, and intended to vigorously defend the action. While the Company subsequently settled, at June 30, 2005 it was not reasonably possible for us to estimate a range of liability related to the outcome of the litigation. Accordingly, no costs related to the litigation were accrued as of June 30, 2005.

(b) United States Department of Justice Subpoena

The U.S. Department of Justice (Atlanta Antitrust Division) served Computer Software Innovations, Inc. with an April 27, 2005 subpoena *duces tecum* in Matter No. 60-514191-0017 requesting the Company's production of documents relating to the federal E-Rate program. The E-Rate Program is a government program providing funding for telecommunications, internet access and internal connections for schools that have a very high free and reduced lunch rate count. It is the Company's understanding that similar inquiries have been directed to numerous other companies associated with the E-Rate program. No allegations concerning any impropriety by the Company have been made. However, the Antitrust Division's collection of information from the hundreds of subpoenas it has issued to various E-Rate Program affiliates may eventually result in further inquiry or possible antitrust and/or related allegations. The Company has produced the requested information, and awaits direction from the Antitrust Division as to whether anything further is required of the Company. The Company intends to comply with all further direction, and management does not anticipate any allegations as a result of these inquiries.

(c) Non-employee Director Compensation

At this time, non-employee directors do not receive any cash compensation for serving on the Company's board of directors. However, it is the Company's intention to compensate the non-employee directors with awards of restricted common stock under its 2005 Incentive Compensation Plan. The awards have not yet been made, pending confirmation of final terms. However, it is anticipated that such awards would aggregate approximately 196,992 shares.

(d) Consulting Arrangement

The Company has entered into a consulting arrangement with Robert F. Steel and Kenneth A. Steel of Lamont, Illinois, for Messrs. Steel to advise the Company on the development and implementation of strategic business plans, to assist management in developing marketing and growth strategies, and to assist management in seeking out and analyzing potential acquisition opportunities. Although the parties have not yet reached or executed a definitive agreement, the general terms of the arrangement call for a term of three years. In exchange for such services, we anticipate compensating Messrs. Steel in the form of shares of common stock, equal to approximately 3.5% in the aggregate of the outstanding common and preferred stock of the Company following the consummation of the February 2005 merger. The Company continues to negotiate a definitive agreement with respect to the consulting arrangement.

NOTE 6 FINANCIAL INSTRUMENT

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form 10QSB/A

In February of 2005, the Company issued 7,217,736 warrants to Barron Partners LP as part of a preferred stock financing. The warrants have a term of five years. The Company used a Black-Scholes fair-value option-pricing model to value these stock warrants. Assumptions used in calculation of the Black-Scholes model as of June 30, 2005 were an average expected life of the warrants in years of 0.75, an expected volatility of 75%, a risk-free interest rate (zero coupon U.S. Treasury Note) of 3.29%, and a dividend rate of zero percent. The average expected life was based on discussions with the warrant holder as to the potential timing of an exercise. Because the company does not have significant float, we used a 75% volatility factor based on its review of historical changes in the common stock prices of public companies which are peers or of similar size, and the discount was obtained from web postings by the U.S. Treasury. A dividend rate of zero percent was used as the company has no plans to pay dividends for the foreseeable future. Pursuant to EITF 00-19, Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock, the value of these warrants has been recorded as a liability in the current liabilities section of the consolidated balance sheet until the Company has obtained an effective registration statement.

Upon the effectiveness of the registration statement, the value of the shares may be recorded as additional paid-in capital. In light of the required accounting treatment under EITF 00-19, the entire portion of the proceeds of the preferred stock financing allocated to warrants was recorded as a liability. The Company is also required to value the fair market price of the financial instrument as of the end of each reporting period. The Company used the Black-Scholes model in calculating fair market value and believes the amount recorded for the financial instrument as of June 30, 2005 approximates fair value. The changes in fair market value (subsequent to the initial recording of the liability based on the allocation of proceeds) have been recorded as adjustments in the line `Unrealized loss on financial instrument` in the Statement of Operations for all periods presented.

Table of Contents

The preferred stock transaction was entered into in accordance with a registration rights agreement. The agreement contains a liquidated damages clause which requires cash penalties equal to 25% of Barron's investment per annum if the Company's registration of stock does not become effective by June 11, 2005. Extra time has been required of the Company to consult with accounting, valuation and regulatory experts due to recent accounting guidance related to the registration rights agreement and its liquidated damages clause. In recognition of the changes in guidance and the Company's efforts to address them, Barron has extended, until September 30, 2005, the deadline by which the Company's registration should become effective to avoid cash penalties. Since the liquidated damages are payable in cash, under EITF 00-19 "Accounting for Derivative Financial Instruments Indexed to and Potentially Settled in a Company's Own Stock," a potential obligation (referred to under EITF 00-19 as "a derivative financial instrument") exists until the registration is made effective. Accordingly, the entire proceeds of the preferred stock issuance, except for the par value, have been recorded as a liability on the balance sheet. The par value of the preferred stock has been classified as temporary equity on the accompanying balance sheet. Accordingly, our net shareholders' equity as a result of this treatment is reported as a deficit of \$7.1 million.

It was not the intent by either party to the transaction (CSI or Barron) that the registration rights agreement result in the majority of the proceeds from the preferred stock issuance and warrants being recorded as a liability rather than as equity. The Company is in the process of negotiating an amendment to the liquidated damages provisions of the registration rights agreement to eliminate the accounting treatment of the proceeds (net of par value) as a liability. If successful, the liability and temporary equity will be reclassified to permanent equity and, assuming continued earnings from operations, our reported shareholders' deficit would be eliminated.

We will utilize our best efforts to complete the shares registration and renegotiate the registration rights agreement. However, there can be no assurance we will succeed in these efforts. (See also a detailed discussion of the potential impact on liquidity and cash flows in Part I, Item 2.)

NOTE 7 - SEGMENT INFORMATION

Prior to January 1, 2005, CSI - South Carolina reported as one operating segment, as the chief operating decision-maker reviewed the results of operations of the Company as a single enterprise. Subsequent to December 31, 2004, CSI - South Carolina, and as a result of the merger, CSI, began reporting its operations under two operating segments. Prior-year amounts have been reclassified to conform to the current period segment presentation. Costs related to the reverse acquisition have been excluded from segment results, as no significant operations were added in connection with the reverse acquisition.

Below is a description of the types of products and services from which each reportable segment derives its revenues.

CSI is organized into the two segments: software applications and technology solutions.

Software applications segment

Through our Software applications segment, we develop, sell, deploy and provide ongoing support of proprietary software applications.

Technology solutions segment

Through our Technology solutions segment, we provide technology solutions through the sales and distribution of computers and accessories and offer a wide range of technology consulting services, including network and systems integration and computer support and maintenance services.

Factors management used to identify our segments:

CSI's reportable segments are analyzed separately because of the differences in margin routinely generated by the major products within each group, and the differences in which sales and investment decisions may be made to evaluate existing or potential new products. Through its software applications segment, the Company develops, sells, deploys and provides ongoing support of software applications. Through its technology solutions segment, the Company provides technology solutions through the sale and distribution of computers and accessories and offers a wide range of technology consulting services, including network and systems integration and computer support and maintenance services.

There are no significant transactions between reportable segments. The total of Segment net sales and service revenue from all segments is equal to Net sales as reported in our Consolidated Income Statements. Sales and Cost of sales are included in each segment's income as reported in our Consolidated income statements. Accordingly, the total of the segments' Gross profit is equal to Gross profit in our Consolidated Income Statements. Operating expenses are allocated to segment income based on estimate of sales and administrative time spent on each segment. None of the income or loss items following

Table of Contents

Operating income in our Consolidated Statements of Operations are allocated to our segments, since they are reviewed separately by management. Certain non-recurring items (those items occurring for reasons which have not occurred in the prior 2 years and are not likely to reoccur in 2 years), stock-based compensation costs and compliance costs are generally excluded from management's analysis of profitability by segment and the Company's segment presentation. Accordingly, the total of Segment income from all segments, less non-recurring, stock-based compensation and compliance items, if any, is equal to Operating income as reported in our Consolidated Income Statements.

The total of Segment assets for all segments is equal to Total Assets as reported in our Consolidated Balance Sheets. The Company allocates shared assets related to liquidity (e.g. cash, accounts receivable and inventory) based on each segments percent of revenues to total consolidated revenues. Capitalized computer software costs are allocated to the software segment. Fixed assets, net, are allocated on the same basis as operating expenses (or by time spent on each segment as discussed above), since support equipment usage is generally tied to time utilized. All other assets are generally allocated on the same bases.

The following tables summarize information about segment profit and loss for the three and six month periods ended June 30, 2005 and 2004 and assets allocated to segments as of June 30, 2005 and 2004.

	Software Applications	Technology Solutions	Total Company

Item 2. Management's Discussion and Analysis or Plan of Operation.

Overview

We are a developer of software applications and a provider of technology solutions, focused primarily on the needs of organizations that employ fund accounting. Our client base consists principally of municipalities, school districts and local government organizations.

Strategy

Our overall business mission is to deliver innovative software applications and technology solutions backed by high-quality service and support, as we expand our client base. A strong referral base has been key to our success and will continue to play a vital role in our growth. Our focus is on nurturing long-standing relationships with existing customers while establishing relationships with new customers in our current and new geographic regions.

Organization

Prior to January 1, 2005, the Company reported as one operating segment, as the chief operating decision-maker reviewed the results of operations of the Company as a single enterprise.

Currently our business efforts are focused on two key operating segments: internally developed software applications and related service and support (our Software applications segment), and other technology solutions and related service and support (our Technology solutions segment). Subsequent to December 31, 2004, the Company has begun reporting separately for these two operating segments. Prior-year amounts have been reclassified to conform to the current period presentation.

Software applications segment

Our Software applications segment develops accounting and administrative software applications that are designed for organizations that employ fund accounting. These organizations are primarily municipalities, school districts and local governments. Specific software modules include:

General (or Fund) Ledger;

Accounts Payable;

Purchasing;

Payroll;

Personnel;

Employee Absence/Substitutes;

Inventory;

Utility Billing; and

Other specialty modules designed for government markets.

Our Software applications segment includes a staff of software developers, implementers, trainers, sales personnel and applications support specialists focused primarily on the development, sales, deployment and support of our in-house software products. From time-to-time they also provide support for the Technology solutions segment.

Typically, sales of software and related services generate significantly higher margins than sales of hardware. Because our revenues in our software applications segment result from sales and support of software products developed for resale, and are coupled with a relatively small volume of related hardware sales (also referred to as software and related services), our software applications segment produces higher margins than our technology solutions segment. Conversely, revenues in our

Table of Contents

technology solutions segment result primarily from hardware sales, and relatively smaller amount of integration services (also referred to hardware sales and related services). Accordingly, our technology solutions segment produces lower margins than our software applications segment.

Technology solutions segment

Our technology solutions segment has a staff of certified engineers capable of providing a broad range of technology solutions to our client base, including, but not limited to:

Technology planning (developing plans to purchase or upgrade computers, telephone equipment, cabling and software);

Hardware/software installations;

Cabling (installation of wiring and wireless devices to link computer networks and telephones);

System integration (installation of computers and configuration of software to enable systems to communicate with and understand each other);

Wide area networking (linking a group of two or more computer systems over a large geographic area, usually by telephone lines or the internet);

Wireless networking (linking a group of two or more computer systems by radio waves);

IP telephony and IP surveillance (sending voice calls and surveillance across the internet using internet protocol (IP), a standard method for capturing information in packets);

Project management (overseeing installation of computers, telephone equipment, cabling and software);

Support and maintenance (using Novell, Microsoft, Cisco and Citrix certified engineers and other personnel to fix problems);

System monitoring (proactively monitoring computers and software to detect problems); and

Education technologies, including distance learning and classroom learning tools.

In addition to our engineers, our technology solutions segment includes a staff of sales persons, project managers and product specialists. Our technology solutions segment also purchases and resells products from a variety of manufacturers including but not limited to Hewlett Packard, Cisco, Microsoft, Novell, Promethean, Tandberg and DIVR, and supports the Software applications segment, as needed.

The combination of traditionally low margin sales of hardware with the sales of services results in a much lower margin for the Technology services segment when compared to the Software applications segment.

We believe the combined efforts of our technology solutions segment with that of our Software applications segment provide CSI with a competitive advantage in the education and government markets.

For a discussion of the results of the reported segments, see the section entitled "Segment Information" below.

Acquisitions

A significant reason for the merger in February 2005 was to allow for access to public capital markets as a source for funding to provide for our ability to grow through acquisitions. In addition, the merger facilitated the sale of warrants, which are a significant potential source of capital (subject to cashless exercise provisions). Our competitive markets are occupied by a number of competitors, many substantially larger than we, and with significantly greater geographic reach. We believe that to remain competitive we must take advantage of acquisition opportunities that arise that may help us achieve greater geographic presence and economies of scale, and whenever appropriate, expand our technological capabilities.

We believe our markets contain a number of attractive acquisition candidates and foresee expanding through acquisitions of one or more of the following types of organizations:

Cabling and infrastructure. CSI currently outsources cabling services.

Commercial (Fortune 100 and Small Business) focus products and services. Many of CSI's current technology solutions translate to the corporate market, especially IP telephony, IP surveillance, video conferencing and network security.

Table of Contents

High level professional services (consulting). We believe this type of acquisition would enhance CSI's offering of technology planning and project management.

Our business strategy provides that we will examine the potential acquisition of companies and businesses within our industry. We will carefully analyze a target's potential to complement our product mix, expand our existing revenue base, improve our margins, expand our geographic coverage, strengthen our management team and ultimately improve shareholder returns. We are unable to predict the nature, size or timing of any acquisition. We can give no assurance that we will reach agreement or procure the financial resources necessary to fund any acquisition, or be able to successfully integrate or improve returns as a result of any such acquisition.

We continued to pursue potential acquisitions during the interim period. However, the Company has not entered into agreements for which the likelihood of their resulting in an acquisition has been determined by management as of the date of this report as probable other than the merger activity discussed in the section entitled "Recent Developments" below.

Cautionary Statement Regarding Forward-Looking Information

Statements that are not reported financial results or other historical information are forward-looking statements. Forward-looking statements include, for example, statements about our business outlook, assessment of market conditions, strategies, future plans, future sales, prices for our major products, inventory levels, capital spending and tax rates. These forward-looking statements are not guarantees of future performance. These statements are based on management's expectations that involve a number of business risks and uncertainties, any of which could cause actual results to differ materially from those expressed in or implied by the forward-looking statements. In addition to specific factors described in connection with any particular forward-looking statement, factors that could cause actual results to differ materially include, but are not limited to, those described under the caption "Cautionary Statement Regarding Forward-Looking Information" in CSI's annual report on Form 10-KSB for the year ended December 31, 2004, and from time to time, in our other filings with the Securities and Exchange Commission. In addition, other risks could adversely affect us, as it is not possible for us to predict or assess all risks. We disclaim any obligation to publicly update or revise any forward-looking statements even if our situation changes in the future.

Critical Accounting Policies and Estimates

The following discussion and analysis provides information that we believe is useful in understanding our operating results, cash flows and financial condition presented in our unaudited Consolidated Financial Statements included in this quarterly report. Our significant accounting policies are described in Note 1 to the Consolidated Financial Statements in CSI's annual report on Form 10-KSB. CSI's critical accounting policies and estimates are described under the caption "Critical Accounting Policies and Estimates" in CSI's annual report on Form 10-KSB.

The preparation of financial statements in conformity with generally accepted accounting principles requires us to make estimates, assumptions and judgments and rely on projections of future results of operations and cash flows. We base our estimates and assumptions on historical data and other assumptions that we believe are reasonable under the circumstances. These estimates and assumptions affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities in our financial statements. In addition, they affect the reported amounts of revenues and expenses during the reporting period.

Our judgments are based on our assessment as to the effect certain estimates, assumptions of future trends or events may have on the financial condition and results of operations reported in our Consolidated Financial Statements. It is important that the reader of our financial statements

understand that actual results could differ materially from these estimates, assumptions, projections and judgments.

Significant Accounting Issue and Potential Subsequent Event Affecting Basis of Presentation.

In the series of transactions referred to in Organization above and in Note 2, ACQUISITION AND MERGER, CSI issued warrants to Barron in connection with the issuance of preferred stock. In connection with this issuance, we entered into a registration rights agreement. The agreement contains a liquidated damages clause which requires cash penalties equal to 25% of Barron's investment per annum if the Company's registration of stock does not become effective by June 11, 2005. Extra time has been required of the Company to consult with accounting, valuation and regulatory experts due to recent accounting guidance related to the registration rights agreement and its liquidated damages clause. In recognition of the changes in guidance and the Company's efforts to address them, Barron has extended, until September 30, 2005, the deadline by which the Company's registration should become effective to avoid cash penalties. Since the liquidated damages are payable in cash, under EITF 00-19 Accounting for Derivative Financial Instruments Indexed to and Potentially Settled in a Company's Own Stock, a potential obligation (referred to under EITF 00-19 as a derivative financial instrument) exists

Table of Contents

until the registration is made effective. Accordingly, the entire proceeds of the preferred stock issuance, except for the par value, have been allocated to the warrants and recorded as a liability on the balance sheet until the Company's registration statement on Form SB-2 becomes effective. Accordingly, our net shareholders' equity as a result of this treatment is reported as a deficit of \$7.1 million. (See also Note 6.)

It was not the intent by either party to the transaction (CSI or Barron) that the registration rights agreement result in the majority of the proceeds from the preferred stock issuance and warrants being recorded as a liability rather than equity. The Company is in the process of negotiating an amendment to the liquidated damages provisions of the registration rights agreement to eliminate the accounting treatment of the proceeds (net of par value) as a liability. If successful, the liability will be reclassified to equity and, assuming continued earnings from operations, our reported shareholders' deficit would be eliminated.

We will utilize our best efforts to complete the shares registration and renegotiate the registration rights agreement. However, there can be no assurance we will succeed in these efforts. (See also a detailed discussion of the potential impact on liquidity and cash flows in Part I, Item 2.)

See also the application of accounting pronouncements to the merger activity discussed in the "Recent Developments" section below.

Overview of Financial Performance

Our revenues for the second quarter of 2005 were \$7,298,428, a decrease of \$628,843 or 7.9% compared to the same quarter of the prior year. The decrease was due to a decrease in hardware sales, partially offset by a small increase in software sales. The decrease in hardware sales came primarily from a substantial sale of printers and fax machines, generally lower margin products, which occurred in the prior year, but did not reoccur in the current year. The decline in sales of these relatively low margin products were partially offset by a significant increase in higher margin products, including internet-protocol based telephony products and instructional hardware. This favorable change in product mix resulted in an increase in the gross profit of \$372,359 or 17.2% to \$2,537,871. Operating income improved from the prior year by \$166,748 or 15.3% to \$1,255,817. The improvement in operating income was significantly less than the improvement in gross margin due to continuing compliance costs associated with the ongoing efforts of the Company to register shares as agreed in the Company's sale of preferred shares and warrants (discussed further below) and other public reporting requirements. Modest increases in a variety of other costs, including salaries and wages and travel as a result of expansion of the Company's geographic sales reach also reduced the impact of the product mix improvements on operating income. Net income decreased \$6,199 or 1.0%, to \$588,590 due to an unrealized loss on warrants to purchase common stock and increases in compliance and other costs, partially offset by the significant improvement in product mix. Due to the liquidated damages provision in the Company's registration rights agreement (previously discussed), the outstanding warrants are reported as a liability and adjusted to fair market value each period end, with a corresponding charge to the income statement. This is a non-cash charge, which does not affect cash flows or income from operations. The unrealized loss on the warrants to purchase common stock was \$108,266 in the second quarter. Without this item, net income for the six months would have been approximately \$100,000 or 17.2% ahead of the same period of the prior year.

Our revenues for the first six months of 2005 were \$11,390,732, \$48,617 or 0.4% lower than the first six months of 2004. The decrease was due to the significant sale of printers and fax machines in the second quarter of the prior year which did not reoccur in the current year. A decline in new software sales, partially offset by an increase in software support revenues contributed to the decline. The decline in new software sales resulted from a temporary decline in sales personnel and efforts through the merger. The sales effort has now been refocused and included an increase in sales personnel.

The decline in lower margin printer and fax machine sales was almost entirely offset by an improvement in product mix with increased sales of internet-protocol based telephony products and instructional hardware at higher margins, and an increase in support revenues. The favorable

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form 10QSB/A

change in product mix resulted in an increase in gross profit of \$232,862 or 6.7% to \$3,695,566.

Notwithstanding the improvement in gross profit, operating income decreased from the prior year by \$1,260,712 or 86.0% to \$202,528 due to the legal and professional fees and option compensation incurred in the first quarter of 2005 in connection with the reverse acquisition (detailed below) and continuing compliance costs associated with the ongoing efforts of the Company to register shares as required by the registration rights agreement with the holder of our preferred shares and warrants and other public reporting requirements (as discussed below).

Net income also decreased \$2,716,511 or 317.5% to a net loss of \$1,860,853 as a result of the significant reverse acquisition, share registration efforts and compliance costs, and an unrealized loss on warrants to purchase common stock. \$3,084,922 of this charge occurred in the first quarter of 2005 and reflected the initial markup of the warrants to market following their issuance on February 11, 2005. \$108,266 was recorded in the second quarter, for a total charge of \$3,193,188 for the six months ended June 30, 2005. Without these special items, warrants and reverse acquisition related costs, net income for the six months would have been approximately \$1.9 million or 223.8% ahead of the same period of the prior year.

Table of Contents**Consolidated Results of Operations for three months ended June 30, 2005 versus June 30, 2004**

The following table and discussion sets forth the change in sales and the major items impacting the change in operating income for the three month period ended June 30, 2005 compared to the three month period ended June 30, 2004.

	Three Months Ended		
	June 30,	June 30,	Increase
	2005	2004	(Decrease)
NET SALES AND SERVICE REVENUE	\$ 7,298,428	\$ 7,927,271	\$ (628,843)
GROSS PROFIT	2,537,871	2,165,512	372,359
OPERATING INCOME	1,255,817	1,089,069	166,748
SIGNIFICANT ITEMS THAT INCREASED (DECREASED) OPERATING INCOME			
Gross Profit:			
Sales			\$ (628,843)
Purchased hardware and software components			1,155,676
Salaries, wages and benefits			(144,480)
Other			(9,994)
			372,359
Operating Expenses:			
Salaries, wages and benefits			86,317
Professional and legal compliance costs			(220,303)
Travel and mobile costs			(36,573)
Other			(35,052)
			\$ 166,748

Revenue

Our revenues for the second quarter of 2005 were \$7,298,428, a decrease of \$628,843 or 7.9% compared to the same quarter of the prior year. This net decrease includes a \$666,691 or 9.8% decrease in hardware sales and services through the technology solutions segment and a \$37,848 or 3.4% increase in software sales and services through the Software solutions segment. The decrease in the Technology solutions segment came from a decrease in sales of lower margin printers and faxes partially offset by increases in the sales of higher margin internet protocol based telephone products and instructional hardware. The increase in the Software solutions segment was due to an increase in support contract revenue partially offset by a decline in new software sales from the temporary reduction in sales staff earlier in the year. Late in the second quarter the Company hired several additional software sales personnel to eliminate the temporary reduction and to expand its geographic reach.

Gross Profit

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form 10QSB/A

Gross profit was \$2,537,871 for the second quarter of 2005, an increase of \$372,359 or 17.2% over the same period of the prior year. The gross margin percentage for the second quarter was 34.8% in 2005 versus 27.3% in 2004. The increase in margin is attributed to the favorable change in product mix. Hardware (Technology solutions segment) sales of relatively high margin products increased during the quarter while the sale of a substantial amount of low margin products in the prior year did not reoccur. The benefit from the higher margin product sales offset the impact of the large prior year order which did not occur and an increase in labor costs to deliver more complex products.

Operating Expenses

Operating expenses were \$1,282,053 for the second quarter of 2005, an increase of \$205,610 or 19.1% over the same quarter of the prior year. The above table analyzes the major items that account for this increase. The majority of the increase is reflected in compliance costs related to the Company becoming a public reporting entity in 2005. These costs were not incurred in 2004 as the Company was then private. Salaries and wages decreased, primarily due to the absence of executive level bonuses in the current year which were paid in the prior year. The increase in Other SG&A expenses came primarily from insurance cost increases related to being a public company and an increase in taxable sales.

Table of Contents**Operating Income**

Operating income for the second quarter of 2005 was \$1,255, 817, an improvement of \$166,748 or 15.3% over the same period of the prior year, due to the significant improvement in margins during the quarter, partially offset by the increases in expenses discussed above.

Segment information

Prior to January 1, 2005, the Company reported as one operating segment, as the chief operating decision-maker reviewed the results of operations of the Company as a single enterprise. Subsequent to December 31, 2004, the Company began reporting its operations under two operating segments. Prior-year amounts have been reclassified to conform to the current period segment presentation.

CSI is organized into the two segments: Software applications and Technology solutions.

Software applications segment

Through our Software applications segment, we develop, sell, deploy and provide ongoing support of proprietary software applications.

	Three Months Ended		
	June 30,	June 30,	Increase
	2005	2004	(Decrease)
NET SALES AND SERVICE REVENUE	\$ 1,142,039	\$ 1,104,191	\$ 37,848
GROSS PROFIT	640,637	709,636	(68,999)

Software sales improved and salaries and wages increased, both as the temporary reduction in sales staff in the first quarter of 2005 was remedied with the hiring of additional sales personnel for increased geographic presence, and with an increase in enhanced support contracts the increase in salaries and wages in operating expenses was offset by the absence of executive level bonuses which were given in the prior year. Gross profit and segment income declined as the increase in expenses more than offset the improvement in sales.

Technology solutions segment

Through our Technology solutions segment, we provide technology solutions through the sales and distribution of computers and accessories . We offer a wide range of technology consulting services, including network and systems integration and computer support and maintenance services.

Table of Contents

Sales decreased primarily from a substantial sale of printers and fax machines in the prior year, which did not reoccur in the current year. The decline in sales was offset by a favorable improvement in costs as a result of the reduction in lower margin printing products sales being partially offset by a significant increase in sales of higher margin products, including internet-protocol based telephony solutions and instructional hardware. The improvement in product mix resulted in an increase in both gross profit and segment income.

The tables below summarize the segment information discussed above to the consolidated amounts reported and previously discussed. The tables reconcile information about segment profit and loss for the three month periods ended June 30, 2005 and 2004. (For a discussion of changes in segment assets see the segment discussions under the result of operations for the six months periods ended June 30, 2005 and 2004.)

	Software Applications	Technology Solutions	Total Company
Three months ended June 30, 2005:

Reconciliation of Segment income (non-GAAP measure) to operating income per consolidated Statements of Operations (GAAP measure):

Certain non-recurring items (those items occurring for reasons which have not occurred in the prior 2 years and are not likely to reoccur in 2 years) and compliance costs are generally excluded from management's analysis of profitability by segment and the Company's segment presentation. The following reconciliation presents separately those costs related to the merger and compliance costs, which have not been included in the analysis of segment income. Detailed discussions related to the merger costs have been previously discussed under Summary of Merger Transactions. In addition, due to the public reporting requirements, we have incurred significant compliance-related professional and legal costs. These costs were not incurred in the prior years because CSI-South Carolina was not a reporting company at that time.

Table of Contents

Interest and other income and expenses

Interest expense increased \$77,199 in the second quarter of 2005 compared to the second quarter of 2004 due to the addition of borrowings in connection with the reverse acquisition. As of June 30, 2005, we had outstanding draws of \$1,051,000 under our bank credit facility bearing interest at 5.86125% (Libor plus 0.275%). We also had outstanding subordinated notes payable to Barron and the five former CSI-South Carolina shareholders totaling \$2,250,400 and bearing interest at 7.75% (the Prime Rate as reported by Bank of America plus 2%). The Company had no funded debt at June 30, 2004.

Unrealized loss on warrants increased \$108,266, due to an increase in the fair market value of the warrants based on the Black-Scholes valuation method. For a discussion of the accounting for the warrants see Critical Accounting Policies and Estimates *Significant Accounting Issue and Subsequent Event Affecting Basis of Presentation* above. No loss on warrants was recorded in 2004 as no warrants were outstanding at that time.

Income Taxes

Income taxes for the second quarter of 2005 were \$481,762, \$15,087 or 3.0% lower than the same period of the prior year. The decrease relates to the decline in pretax profits from the items noted above.

Net Income (Loss) and EPS

Net income decreased \$6,199 or 1.0%, to \$588,590 due to an unrealized loss on warrants to purchase common stock and increases in compliance and other costs, partially offset by the significant improvement in product mix. Due to the liquidated damages provision in the Company's registration rights agreement (previously discussed), the outstanding warrants are reported as a liability and adjusted to fair market value each period end, with a corresponding charge to the income statement. This is a non-cash charge, which does not affect cash flows or income from operations. The unrealized loss on the warrants to purchase common stock was \$108,266 in the second quarter. Without this item, net income for the six months would have been approximately \$100,000 or 17.2% ahead of the same period of the prior year.

Basic earnings per share declined from \$0.23 per share in the second quarter of 2004 to \$0.22 in the second quarter of 2005, with improvements in gross profit and income from operations offset by increases in compliance costs and the unrealized loss on warrants. On a fully diluted basis, earnings per share were flat at \$0.05 per share for the second quarters of both the prior and current years.

Consolidated Results of Operations for six months ended June 30, 2005 versus six months ended June 30, 2004

The following table and discussion sets forth the change in sales and the major items impacting the change in operating income for the six month period ended June 30, 2005 compared to the six month period ended June 30, 2004.

	Six Months Ended		
	June 30,	June 30,	Increase
	2005	2004	(Decrease)

			\$ (1,260,712)

Table of Contents

Revenue

Our revenues for the first six months of 2005 were \$11,390,732, \$48,617 or 0.4% lower than the first six months of 2004. The change resulted from the increase in sales for the first quarter of \$580,226 over the same prior year period offset by a \$628,843 decrease in the second quarter. Sales of higher margin internet-protocol based telephony equipment and instructional hardware increased substantially through the first and second quarters, but were more than offset in the second quarter by a drop in lower margin printing and fax machine sales due to a large order in the prior year which did not reoccur in the current year. An increase in services by the technology solutions segment and increased sales of higher margin products offset the lack of a similar order in 2005; however, a decline in new software sales, partially offset by an increase in software support revenues resulted in a net decrease in overall revenues. The decline in new software sales resulted from a temporary decline in sales personnel and efforts through the merger. The sales effort has now been refocused including an increase in software sales personnel.

Gross Profit

Gross profit was \$3,695,566 for the first six months of 2005, an increase of \$232,862 or 6.7% over the same period of the prior year. The gross margin percentage was 32.4% for the first six months of 2005 versus 30.3% for the same period of 2004. The increase in margin is attributed to a favorable change in product mix. The decline in sales of lower margin products coupled with the significant change in product mix from lower to higher margin products resulted in a net decrease in technology hardware costs of \$717,672 or 11.2%. The decrease in costs from product mix more than offset the negative impact from the reduced sales of lower margin products and an increase in labor costs to deliver more complex products, and resulted in a substantial margin and operating income improvement.

Operating Expenses

Operating expenses were \$3,490,038 for the first six months of 2005, an increase of \$1,493,575 or 74.8% over the same period of the prior year. The above table analyzes the major items that account for this increase. The majority of the increase is reflected in two non-recurring costs associated with the merger and recapitalization of CSI. These items and the related impact on Other selling, general and administrative (SG&A) expenses are discussed in *Reverse Acquisition Costs* and *Stock Option Compensation* below. The addition of legal and professional compliance costs in connection with the Company becoming a public reporting entity in early 2005 added to the increase. Salaries and wages decreased, primarily due to the absence of senior executive bonus compensation in early 2005 compared to bonuses given in 2004. The absence of the bonus in 2005 was in consideration of other monies received by the senior executives in connection with the Company's merger in early 2005.

Reverse acquisition costs included \$275,000 in commissions paid to a third-party broker, Liberty Company, LLC for their assistance in the preferred stock sale and warrant issuance. No commission was paid to Barron, the investment group which purchased the preferred stock and received the warrants. The remaining \$484,283 consisted of merger related fees paid principally for legal and accounting services.

Stock option compensation represents cost incurred to redeem certain stock options held by key management employees of CSI in connection with the merger. In August 2000, CSI approved and implemented an equity incentive plan pursuant to which eight non-executive employees were granted options to purchase 1,065,746 shares of common stock of CSI, of which 59,208 had been previously cancelled and 1,006,538 were outstanding as of December 31, 2004. Immediately prior to the merger, CSI cancelled options to purchase 797,403 shares and paid the option holders \$899,144 as compensation for the cancellation, and reduced unearned stock compensation for the redemption by \$267,970, for net compensation expense of \$631,174 during the period. Employer FICA and medicare, additional expenses related to this transaction totaling \$47,766, were also paid by CSI and are included in Other selling, general and administrative costs in our Statement of Operations.

Operating Income

Operating income for the six months ended June 30, 2005 was \$205,528, a decline of \$1,260,712 or 86.0% compared to the same period of the prior year due primarily to the significant increases in costs related to the reverse merger related costs and public reporting activities.

Segment information

Software applications segment

Other miscellaneous			(6,125)
			<u>\$ (302,838)</u>

Software applications segment sales decreased primarily due to lower software sales in the first quarter, partially offset by an improvement in the second quarter and an increase in sales of enhanced support agreements. The lower first quarter software sales were due to a temporary reduction in sales staff and the delay of certain software installations into the second quarter.

Salaries and wages in cost of sales increased primarily due to the addition of the .Net Microsoft SQL (application programming language and database conversion) team in mid-2004, partially offset by a decline in salaries and wages in operating expenses from a temporary decline in sales staff. The staff has been subsequently expanded to support a greater effort and an expanded geographic reach.

			<u>\$ 700,652</u>

Technology solutions segment sales increased modestly for the first six months of 2005 versus the same period of 2004 due to additional engineering services sold and a significant decrease in printer and fax sales offset by increased sales of higher margin products, primarily internet-protocol based telephony solutions and instructional hardware. The shift in product mix to higher margin products resulted in a significant decrease in hardware costs and improvements in segment income.

Salaries, wages and benefits increased in connection with increased engineering services sold, partially offset by a temporary decline in salaries, wages and benefits in operating expenses from personnel turnover.

The following tables summarize the segment information discussed above to the consolidated amounts reported and previously discussed. The table also presents the segment assets information. Increases in segment assets came primarily from an increase in deferred tax assets in connection with the recording of the financial instrument related to the issuance of the warrants in connection with the reverse merger (approximately \$1.2 million), and taxes receivable as a result of the loss recorded from the impact of legal and stock redemption related expenses related to the reverse merger. In the prior year the company had a current tax payable of approximately \$100,000 versus a current tax receivable of \$500,000 in the current year. For a discussion of the accounting for the warrants see Critical Accounting Policies and Estimates - *Significant Accounting Issue and Subsequent Event Affecting Basis of Presentation* above.

The following tables reconcile information about segment profit and loss for the six month periods ended June 30, 2005 and 2004 and assets allocated to segments as of June 30, 2005 and 2004.

	Software Applications	Technology Solutions	Total Company

Professional and legal compliance costs	(220,303)	
OPERATING INCOME Per Statement of Operations	\$ 205,528	\$ 1,466,240

Interest and other income and expenses

Interest expense increased \$114,644 in the first six months of 2005 compared to the first six months of 2004 due to the addition of borrowings in connection with the reverse acquisition. The Company had no funded debt at June 30, 2004.

Unrealized loss on warrants to purchase common stock was \$3,193,188 for the first six months of 2005. For a discussion of the accounting for the warrants see Critical Accounting Policies and Estimates - *Significant Accounting Issue and Subsequent Event Affecting Basis of Presentation* above. No loss on warrants was recorded in 2004 as no warrants were outstanding at that time.

Income Taxes

Income taxes were recorded as a net benefit of \$1,235,328 for the first six months of 2005, and declined \$1,852,745 compared to the first six months of 2004. The decline was due primarily to the loss resulting from the expenses related to the reverse acquisition activity, and the

warrants, as discussed previously.

Net Income (Loss) and EPS

Net income decreased \$(2,716,511) or 317.5% to a net loss of \$1,860,853 as a result of the significant reverse acquisition, share registration efforts and compliance costs, and an unrealized loss on warrants to purchase common stock. \$3,084,922 of this charge occurred in the first quarter of 2005 and represented the initial markup of the warrants to fair market value following their issuance on February 11, 2005. \$108,266 was recorded in the second quarter, for a total charge of \$3,193,188 for the six months ended June 30, 2005. Without these special items, warrants and reverse acquisition related costs, net income for the six months would have been approximately \$1.9 million or 223.8% ahead of the same period of the prior year.

Basic earnings per share declined from \$0.33 per share in the first six months of 2004 to a loss of \$0.71 in the first six months of 2005, with improvements in gross profit overshadowed by increases in compliance costs and the unrealized loss on warrants. For the same reasons, on a fully diluted basis, earnings per share declined from \$0.07 per share in the first six months of 2004 to a loss of \$0.71 per share for the first six months of 2005.

Liquidity and Capital Resources

Cash declined from \$3,656,477 at December 31, 2004 to zero (\$0) at June 30, 2005, and was coupled with an increase in debt from zero (\$0) at December 31, 2004 to borrowings of \$1,051,000 at June 30, 2005. These changes were due primarily to the

Table of Contents

merger related activity during the first quarter. The cash changes were also the result of a significant increase in accounts receivable partially offset by increases in accounts payable and deferred revenues. These changes in working capital accounts are common changes from year-end as the Company bills a significantly greater portion of its service contracts and delivers more product around mid-year, since many of the local city and schools it serves have a June 30 fiscal year-end.

The cash balance at June 30, 2004 was \$1,722,573 with no debt, compared to a balance of zero at June 30, 2005, and a draw of \$1,051,000 on the line of credit. Prior to the merger, the Company generally had a significant cash balance which it used to fund operating needs. Due to the significant cash requirement from the merger related activity, the Company is currently funding operations with the use of its line of credit facility. The primary change over the prior year is due to a decrease in accounts payable in the second quarter of 2005 compared to the same quarter of the prior year, and the merger related activity. A significant purchase of printer and fax machines by a large customer in the second quarter of 2004, which was temporarily supported through increased accounts payable did not reoccur in 2005. This sales and related purchase was for low margin product so the change in net income was small and, accordingly, did not proportionately decrease cash flows. The merger related activity is detailed in Note 2 to the Consolidated Financial Statements, summarized earlier in this item above and again in the table below.

Cash from Operating Activities

Cash used for operating activities totaled \$1,221,807 in the first six months of 2005 compared to cash provided by operating activities of \$319,485 in the first six months of 2004. The decrease of \$1,541,292 is due primarily to the legal and professional fees, stock option compensation and taxes related to the reverse acquisition and the significant decrease in accounts payable from the reduction in sales of low margin products, previously discussed. Without the effect of the reverse acquisition related transactions, cash used by operating activities in the first six months of 2005 would have been \$752,822, or \$1,072,307 lower than the prior year due to the change in accounts payable.

Changes since year end to balance sheet items related to operating activities are as follows:

Increases in the consolidated balance sheet line items for accounts receivable and accounts payable were a result of the increased hardware sales and related purchases previously discussed. Increased hardware demand and timing of sales also resulted in an increase in inventories. The increase in deferred revenue is in connection with a significant increase in support agreements previously discussed, which are deferred over the life of the agreement. The change in taxes from a payable balance to a receivable balance is the result of the tax refund provided for the loss incurred in the first quarter due to the costs related to the merger transaction, partially offset by provisions in the second quarter.

Cash from Investing Activities

Cash used for investing activities totaled \$420,352 in the first six months of 2005 compared to \$352,636 in the first six months of 2004. The increase of \$67,716 is due primarily to the continued investment in development in the .Net version of CSI's major software modules, and is reflected in the increase in computer software costs in the consolidated balance sheet.

Cash from Financing Activities

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form 10QSB/A

Cash used for financing activities netted to \$2,014,318 in the first six months of 2005 compared to no financing needs or repayments in the first six months of 2004. The increase of \$2,014,318 is due entirely to activities related to the reverse acquisition, which have been summarized earlier in management's discussions above and in Note 2 to the Consolidated Financial Statements, except for a repayment of \$449,000 on the line of credit facility's initial balance of \$1,500,000 drawn in connection with the merger. Changes in the balance sheet line items for other assets (from deferred financing fees), bank line of credit, subordinated notes payable to shareholders and shareholders' equity (deficit) are all a result of the merger related transactions detailed in Note 2 above and in the consolidated statement of changes in shareholders' equity (deficit).

In addition to the changes related to the merger transaction, the following additional significant non-cash change impacted the balance sheet. The Financial instrument (warrants) increased significantly from the initial allocation of proceeds from the preferred stock and warrants issuance and an increase in the fair market value of the warrants.

The significant merger related activity in the order it occurred is as follows:

Purchase of VerticalBuyer shell company	\$(415,024) ⁽¹⁾
CSI - South Carolina redemption of options for common stock	(899,144)
Initial cash payment of portion of CSI - South Carolina \$3,460,000 dividends declared to shareholders	(960,000)
Proceeds from sale of warrants in merger	5,042,250
Proceeds from issuance of subordinated note to Barron	1,875,200
Payment of remaining outstanding dividends declared, from preferred stock and warrant proceeds	(2,500,000)
Payment on one of the two sets of subordinated notes (\$3,624,800) and (\$1,875,200) issued to shareholders in connection with merger	(3,624,800)
Payment of debt issuance costs for \$3,000,000 revolving credit facility	(83,800)
Initial borrowings under revolving credit facility	1,500,000
Payment on second set of shareholder and Barron's notes from loan proceeds	(1,500,000)
	\$ (1,565,318)
Net effect of merger transactions on cash, and cash used for financing activities	\$ (1,565,318)

- (1) Consists of \$450,000 aggregate agreed-upon purchase price (including approximately \$5,000 used to satisfy outstanding liabilities of VerticalBuyer) and an additional \$20,000 paid to Maximum Ventures to offset its legal and accounting expenses, net of the \$50,000 contribution by Barron and a \$5,000 allowance to help defray our legal and professional expenses.

Table of Contents

In addition to the cash used for financing activities related to the merger, the Company incurred approximately \$700,000 in legal and professional fees which were expensed and are included in the discussion of cash used for operating activities above.

Credit Arrangements

During the first quarter, in order to support the activities of the reverse acquisition, the Company entered into a \$3,000,000 line of credit facility whereby the Company can borrow up to 80% of accounts receivables balances, not to exceed the total facility limit of \$3,000,000. Loans bear interest at Libor rate plus 0.275%, (5.86% at June 30, 2005), payable monthly and mature on March 17, 2006. Immediately upon entering into the loan agreement, the Company borrowed \$1,500,000 which was used for the paydown of a portion of the subordinated notes issued in connection with the merger. Under the facility CSI is subject to restrictive covenants, the primary terms of which restrict incurring debt, making loans, changing approved executive compensation arrangements or making distributions or investments which would violate the restrictive covenants in the loan agreement. The agreement with our lender also requires the achievement of a debt to EBITDA ratio of not more than 2.5:1 measured on a quarterly rolling twelve months by June 30, 2005, EBITDA of not less than \$2,000,000 by year-end 2005 and a minimum tangible net worth of \$1,500,000 including subordinated debt by year-end 2005. As of the end of the current quarter, the Company complied with the debt to EBITDA ratio but would not have met the minimum tangible net worth requirements, and there can be no assurance we will do so by the effective dates prescribed in the covenants. The Company has received a temporary waiver as discussed below. Were the Company not to meet its covenants or receive a waiver, it could be forced to seek other financing. The Company also has a significant commitments under the notes payable to the original five shareholders of CSI South Carolina and Barron, as a result of the reverse acquisition, totaling \$2,250,400, which will be due and payable in May of 2006.

During the preparation of its first quarter unaudited financial statements to be included in this Form 10-QSB, the Company determined that pursuant to EITF 00-19, Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock, the value of the warrants issued in conjunction with our preferred stock in February 2005 should be recorded as a current liability on our consolidated balance sheet until the Company has obtained an effective registration statement pursuant to the terms of the registration rights agreement entered into with the holder of the warrants and the preferred stock at the time of issuance. This accounting treatment is explained in more detail in Part I of this report, in Item 1 in footnotes 1, 2, and 6 to our consolidated unaudited financial statements, and in this item above.. Such information is incorporated into this item by reference.

As a result of such accounting treatment for the warrants as a liability, our net worth is reduced at June 30, 2005 from a net deficit of approximately \$0.1 million to a deficit of nearly \$7.1 million. When we entered into our \$3.0 million bank revolving credit facility on March 17, 2005, the accounting for the warrants described above was not anticipated. As a result, the Company, as a condition to such loan arrangement, represented that it had a net worth of \$600,000 or greater, counting as equity for the purposes of such calculation subordinated indebtedness of \$2.3 million. Taking into account the new accounting treatment for the warrants, we now believe that the representation of a minimum net worth of \$600,000 made at the closing of the credit facility was not correct and that we may have been in technical default under our bank credit facility. The bank has granted us a waiver with respect to any such default until August 31, 2005. Pursuant to the waiver, we are obligated to achieve a minimum net worth of \$600,000 or more as of such date and at quarter end thereafter, again counting subordinated debt as equity for the purposes of such calculation. As discussed above under Critical Accounting Policies and Estimates, we are currently in negotiations with the holder of the preferred stock and warrants to amend the liquidated damages provisions contained in the registration rights agreement in such a way as to eliminate the current accounting treatment which causes the warrants to be classified as a liability. Likewise, such accounting treatment would be eliminated upon the registration statement which is the subject of the registration rights agreement becoming effective with the SEC and thereby foreclosing during the period of such effectiveness the operation of the liquidated damages provisions. Although

Table of Contents

management anticipates that through one or both of these alternatives it will be able to eliminate the current accounting for the warrants and comply with the requirements of the bank waiver, we can give no assurances that we will in fact successfully comply with the requirements of the bank waiver and avoid being in default under our bank credit facility.

As of June 30, 2005, and at August 18, 2005, there were outstanding draws totaling \$1,051,000 and \$1,261,000, respectively, under our bank credit facility. Pursuant to our agreements with the bank, upon an event of default, it may accelerate and require the repayment of all amounts under the credit facility. It may also decline to make further advances. At June 30, 2005 and August 18, 2005, \$1.9 million and \$1.4 million respectively, were available for future advances under the facility.

We do not believe that any related default or adverse effect was triggered under any other material agreement of the Company as a consequence of any potential loan default under our bank credit facility described above.

Future Capital Needs and Resources.

Since inception, and prior to the merger, the Company has funded its operations through cash flow from operations.

Ongoing capital resources depend on a variety of factors, including our existing cash balance, availability under our line of credit facility, the cash flow generated from our operations and external financial sources that may be available. As of December 31, 2004, our capital resources included \$3.7 million of cash, which was impacted by the merger and related transactions described above. As a result, at June 30, 2005 our cash balance was zero, and we were funding our operations through the use of \$1,051,000 of our \$3 million line of credit. Our ability to generate sufficient operating cash flow is dependent upon, among other things:

the amount of revenue we are able to generate and collect from our customers;

the amount of operating expenses required to provide our services;

the cost of acquiring and retaining customers;

our ability to continue to grow our customer base; and

our ability to renew the line of credit or obtain replacement financing.

Customer support billings. We historically bill a significant portion of our service contracts late in the second quarter of the year. Historically, this amount has exceeded \$2,000,000. While revenue for service contracts is deferred over the life of the contract (typically over a year) significant cash is generated in the third quarter as a result of the service payments being billed and collected as payment for the entire future year's service. The Company borrows through its line of credit based on availability tied to its receivables. Cash collections are first used to pay down the line of credit. Thereafter, funds are available to be borrowed again based on our receivables position and line of credit limit as detailed below. Only if the line were to be paid down and working capital needs met would we have significant cash on our balance sheet.

Burden of Professional and Legal Compliance Costs. For the six months ended June 30, 2005, professional and legal compliance costs totaled \$220,303. These related primarily to compliance costs for the Company's transition to a public company, as well as legal and accounting costs for the registration of shares pursuant to the registration rights agreement. Management anticipates that the current level of expenses should abate upon the completion of the registration process and the effectiveness of the Company's registration statement with the Securities and Exchange Commission. Although the Company is hopeful that such registration can be completed in 2005, there can be no assurances that this will in fact occur and cost savings realized. Also, the compliance costs associated with public company status is significant, and management is uncertain as to the magnitude of any cost savings when and if the registration statement were to go effective.

Further, the Company was involved in litigation which is described in Part II, Item 1 of this report. As of June 30, 2005, the legal expenses associated with such lawsuit totaled approximately \$30,000.

Potential Liquidated Damages under the Registration Rights Agreement. Under the registration rights agreement with Barron Partners, the Company is obligated to cause the registration statement required thereunder to become effective on or before September 30, 2005. Upon the failure of the Company to fulfill such obligations, Barron is entitled to cash liquidated damages in an amount equal to an annual rate of 25% on its original preferred stock investment. This equates to a monthly payment of approximately \$105,000. Such liquidated damages would also be applicable for the failure of the Company to maintain the effectiveness of the registration statement. Although Barron Partners has been cooperative with the Company during the registration process, there can be no assurances that we will in fact be able to cause the registration statement to become effective and comply with the registration rights agreement and that Barron Partners will continue to waive non-compliance.

Table of Contents

Bank Credit Facility. In the coming year, we will rely on our \$3.0 million line of credit facility whereby the Company can borrow up to 80% of its receivable balance, not to exceed the total facility limit of \$3.0 million. As of June 30, 2005, our facility allows for borrowing up to \$3.0 million (based on adjustments for eligible receivables) of which \$1,051,000 was outstanding and \$1.9 Million was available for additional loan advances. At August 18, 2005, there was \$1.4 million available. (See also our discussions regarding default and waiver of loan covenants under Credit Arrangements above.)

The bank facility matures on March 17, 2006. Management believes that cash flow from operations may not be sufficient to repay both the bank credit facility in full as of such date and the subordinated promissory notes payable to shareholders in an aggregate amount of \$2.3 million which are due May 10, 2006. Management anticipates renewing the bank credit facility prior to its expiration date. In the alternative, the Company would attempt to refinance the credit facility with another lender. Although management currently believes that its existing lender will agree to a renewal of the facility, there can be no assurance that the Company's bank will in fact agree to a renewal or that replacement financing could be procured by the Company on favorable terms. Without the existing credit facility or a replacement, management also believes that the ability of the Company to fund working capital to support additional sales growth could be adversely affected.

Subordinated Promissory Notes. At June 30, 2005, subordinated promissory notes payable to shareholders totaled approximately \$2.3 million. As discussed above under Bank Credit Facility, management believes that operating cash flow may not be sufficient to both repay this bank credit facility in March upon its maturity and repay in full all of the subordinated promissory notes on the May 10, 2006 due date. As discussed above, management anticipates renewing the bank credit facility. If the Company were unable to do so, or replace such facility on acceptable terms, it may not be able to repay the subordinated notes. There can be no assurance as to what adverse collection actions the subordinated shareholders might take, whether the noteholders would agree to an extension and on what terms, and the impact such a default might otherwise have on the Company's other creditors and its financial condition.

Short Term Capital Requirements. We currently anticipate that our capital needs will principally consist of \$800,000 for software development and \$120,000 for capital expenditures.

Acquisitions. We are examining the potential acquisition of companies and businesses within our industry. We are unable to predict the nature, size or timing of any such acquisition, and accordingly are unable to estimate the capital resources which may be required. Any acquisition would be subject to our utilizing sources in addition to those described above. These alternative sources could include the issuance of our common stock or other securities in an acquisition, seller financing, and bank and other third party financing, among other things. We can give no assurance that, should the opportunity for a suitable acquisition arise, we will be able to procure the financial resources necessary to fund any such acquisition or that we will otherwise be able to conclude and successfully integrate any acquisition.

Potential Capital Inflow from Warrants Exercise. A significant amount of cash and capital for the Company would be generated by the exercise by Barron of its common stock Warrants. The exercise of Warrant A, with an exercise price of \$1.3972, would generate approximately \$5 million. The exercise of Warrant B, with an exercise price of \$2.0958, would generate approximately \$7.6 million. The exercise of the Warrants is in the sole discretion of Barron, subject to the restrictions in the preferred stock and the Warrants prohibiting Barron from beneficially holding greater than 4.99% of our outstanding common stock, at any time, which prohibition can be waived by Barron upon 61 days notice. Although we presume any decision by Barron to exercise the warrants or any portion would depend upon our stock price, results of operations and the long term outlook for the development of our business, among other things, we cannot predict if and when Barron may exercise the Warrants. Accordingly, there can be no assurance that Barron will exercise the Warrants and that we will receive any resulting capital.

The warrants may be exercised on a cashless basis, in which case the Company would receive no cash proceeds. However, Barron is prohibited from electing a cashless exercise until February 11, 2006, and is thereafter prohibited so long as there is an effective registration statement with respect to the shares underlying the warrants. Accordingly, it will be important in the future for us to maintain the effectiveness of the

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form 10QSB/A

registration statement covering the warrant shares in order to assure the receipt of equity capital from the exercise of the warrants. In addition, our failure to maintain the effectiveness of such a registration statement would subject the Company to liquidated damages mandated by the registration rights agreement in an amount equal to 25% per annum of the \$5,042,250 purchase price of the Series A convertible non-voting preferred stock. The payment of such liquidated damages over an extended period of time would have a substantial and adverse impact on the cash flows and capital resources of the Company.

Adequacy of Liquidity and Capital Resources. Based on the foregoing, our management believes that our cash flow from operations and existing bank credit facility will be adequate to fund our short term liquidity and capital needs. We believe that our current business plan for the organic growth of our business will not require any additional external funding and that we will be able to operate and grow our business while servicing our debt obligations. As previously noted, any acquisition would be dependent upon additional funding sources.

Table of Contents

In making our assessments of a fully-funded business plan, we have considered:

cash and cash equivalents on hand or available to our operations through our line of credit of \$1.9 million at June 30, 2005;

expected cash flow from operations;

the anticipated level of capital expenditures of \$120,000;

software development costs of \$800,000; and

our scheduled debt service.

If our business plans change, including as a result of changes in our products or technology, or if we decide to expand into additional markets, or if economic conditions in any of our markets generally arise and have a material effect on the cash flow or profitability of our business, or if we have a negative outcome for the debt covenants and are unable to obtain a waiver, then the anticipated cash needs of our business as well as the conclusions presented herein as to the adequacy of available sources of cash and timing of our ability to generate net income could change significantly. A decision not to exercise Warrants or a cashless exercise of the Warrants could result in the necessity to pursue other funding.

Any of these events or circumstances could involve significant additional funding needs in excess of the identified current available sources, and could require us to raise additional capital to meet these needs. However, our ability to seek additional capital, if necessary, is subject to a variety of additional factors that we cannot presently predict with certainty, including:

the commercial success of our operations;

the volatility and demand of the capital markets; and

the future market prices of our securities.

There is no guarantee CSI could obtain access to additional funding or at reasonable rates. The failure of CSI to meet covenant requirements, raise capital through the exercise of the Warrants or find or obtain other funding at reasonable rates, could have a negative impact on the business.

Recent Accounting Pronouncements

In December 2004, the FASB published SFAS No. 123 (revised 2004), *Share-Based Payment*. Statement 123(R) will provide investors and other users of financial statements with more complete and neutral financial information by requiring that the compensation cost relating to

share-based payment transactions be recognized in financial statements. That cost will be measured on the fair value of the equity or liability instruments issued. This Statement is the result of a two-year effort to respond to requests from investors and many others that the FASB improve the accounting for share-based payment arrangements with employees. Statement 123(R) replaces SFAS No. 123,

Accounting for Stock-Based Compensation, and supersedes APB Opinion No. 25, Accounting for Stock issued to Employees. SFAS No. 123, as originally issued in 1995, established as preferable a fair-value-based method of accounting for share-based payment transactions with employees. However, that Statement permitted entities the option of continuing to apply the guidance in Opinion 25, as long as the footnotes to financial statements disclosed what net income would have been had the preferable fair-value-based method been used. Although those disclosures helped to mitigate the problems associated with accounting under Opinion 25, many investors and other users of financial statements said that the failure to include employee compensation costs in the income statement impaired the transparency, comparability, and credibility of financial statements. Public Entities filing as small business issuers will be required to apply Statement 123(R) as of the first interim or annual reporting period that begins after December 15, 2005 (the fourth quarter of fiscal 2005 for the Company). In January 2005, we adopted the provisions of SFAS No. 123 (R). As our only active stock plan was already being accounted for using the fair value method prescribed in SFAS No. 123, Accounting for Stock Based Compensation, and related interpretations, including the recognition of compensation cost at the time of grant in the financial statements, and we were not using the disclosure only provisions of SFAS No. 123, the adoption of SFAS No. 123(R) has not had a material impact on the financial statements.

Item 3. Controls and Procedures.

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods required by the Securities and Exchange Commission, including, without limitation, those controls and procedures designed to ensure that such information is accumulated and communicated to our management to allow timely decisions regarding required disclosures.

Table of Contents

Our chief executive officer and chief financial officer evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rule 15d-15e under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of June 30, 2005. Based upon such evaluation, our chief executive officer and chief financial officer concluded that, as of the end of such period, the Company's disclosure controls and procedures were ineffective due to a significant deficiency in our internal controls over the application of existing accounting principles to new public reporting disclosures and particularly related to the application of GAAP to new transactions. The significant deficiency in our controls related to financial reporting was determined to exist on August 16, 2005, at which time the CFO in consultation with the CEO and the audit committee of the board of directors determined the Company still lacked sufficient internal resources to ensure compliance with new emerging issues, or to fully review its compliance in all areas of financial disclosure on a timely basis, following its inception of reporting as a public company and hiring of its first CFO with SEC reporting experience. Accordingly, it was also determined until such time as we had sufficient resources, we would be unable to declare our disclosure controls with regard to new public reporting disclosures effective. Such deficiency is discussed in *Deficiency Related to Qualified Financial and Accounting Personnel* below. This evaluation was subsequently modified due to the Company's decision on November 11, 2005 to restate its financial statements. Based on their analysis relating to and as of the date of such decisions, these officers concluded that our disclosure controls and procedures were not effective for the additional reasons described in *November 2005 Restatement of Financial Statements* and *January 2006 Restatement of Financial Statements* below.

Deficiency Related to Qualified Financial and Accounting Personnel

In March 2005, the Public Company Accounting Oversight Board, or PCAOB, defined a significant deficiency as a deficiency that results in more than a remote likelihood that a misstatement of the financial statements that is more than inconsequential will not be prevented or detected, or that a company will be unable to comply with laws and regulations, which includes the timely filing of required reports with the Securities and Exchange Commission. As a result of this new standard, our management noted in our most recent review a significant deficiency. Prior to February 11, 2005, we were a public shell with virtually no operations and had limited need for staff with highly technical accounting and public reporting expertise. In addition, our predecessor, Computer Software Innovations, Inc., a South Carolina corporation (CSI South Carolina) was a private company and likewise had no need for staff with technical accounting and public reporting expertise. In the first quarter of 2005, we entered into a complex merger and resumed public reporting of significant operations. Due to the time required to source, attract, negotiate and hire personnel with the necessary experience, we remained for several months without sufficient public reporting or technical expertise to resolve non-routine or complex accounting matters and public reporting requirements such as we encountered in the merger with CSI South Carolina. It was not until May 6, 2005 that we were able to hire a chief financial officer with prior public reporting experience who is accustomed to dealing with more complex accounting matters. The insufficient experience and only recent hiring of more experienced staff and the complexities of the accounting for the merger and related preferred stock and warrants transactions resulted in our having to file an extension on Form 12b-25 for the filing of this Form 10-QSB, and the amending of our first quarter Form 10-QSB.

We are working with the chief financial officer to enlist the resources necessary to assist in the handling of complex non-routine accounting issues and to meet public disclosure requirements in a timely fashion. Following consultation with the Company's Audit Committee and board of directors, the chief financial officer has received authority to engage outside accounting experts to support management in their review, interpretation, and implementation of significant changes in accounting and regulatory reporting requirements. The purpose is to provide additional technical resources (other than our independent auditors) to whom we may direct complex accounting issues for review, particularly in situations where the accounting treatment is unclear or extremely complex. While continuous improvements will be made into 2006 and 2007, based on our CFO's experience and with an increase in staff, we expect we will receive additional suggestions for improvement in controls during the process of implementing the Sarbanes-Oxley Act, will be implementing recommendations throughout the process and are unsure we will be able to entirely eliminate any possibility of a significant deficiency until we have completed this process. Even so, due to the increasing number and complexity of pronouncements, emerging issues and releases, we expect there will always be some risk related to financial disclosures, albeit mitigated following implementation of the Sarbanes-Oxley Act requirements, which we anticipate will be completed in 2007.

November 2005 Restatement of Financial Statements

Edgar Filing: COMPUTER SOFTWARE INNOVATIONS INC - Form 10QSB/A

On November 11, 2005, our chief executive officer and chief financial officer, in consultation with the audit committee of the board of directors, concluded that the previously issued financial statements contained in our amended quarterly report on Forms 10-QSB for the quarter ended June 30, 2005 should not be relied upon for the reasons set forth below and that we would need to restate the financial statements to make necessary accounting corrections. The decision to restate was made with the concurrence of our independent registered public accounting firm.

Table of Contents

In the process of reviewing our financial statements in comparison to accounting pronouncements and the disclosures of other entities, our chief financial officer identified that certain reclassifications were necessary to properly meet the disclosure requirements under generally accepted accounting principles. Primarily, certain items recorded in selling, general and administrative costs, including certain salaries and expenses and the amortization of capitalized software development costs, should have been recorded as components of cost of sales. Traditionally, the Company had only recorded the cost of purchased components as a part of cost of sales.

Also in the restatement, due to further guidance, we reclassified the portion of the proceeds from the issuance of preferred stock and warrants that was allocated to the par value of preferred stock (\$7,218) from permanent equity to temporary equity. The adjustments reflected in the restated financial statements do not affect net income or cash flows.

As a result of the need to restate our financial statements for the quarter ended June 30, 2005, we have amended our Form 10-QSB for that period. Furthermore, we have restated our assessment of the effectiveness of our controls and procedures for the second quarter.

January 2006 Restatement of Financial Statements

On February 3, 2006, our chief executive officer and chief financial officer, in consultation with the audit committee of the board of directors, concluded that the previously issued controls and procedures disclosure on Form 10-QSB/A for the quarter ended March 31, 2005 should be amended for the reasons set forth below.

The registration process resulted in significant technical discussions with several accounting, regulatory and valuation experts. In our prior Form 10-QSB/A we disclosed a deficiency in internal control over financial reporting related to the need for additional qualified financial and accounting personnel. This deficiency was a result of our entering into the series of transactions that resulted in the subsequent public reporting of significant operations without personal with public reporting experience. In the process of discussions with regulatory experts, we determined to revise our internal control disclosure to note specifically our controls were ineffective for the reasons previously disclosed and include more specifics as to the nature of the deficiency and our plans and timeframe for curing the deficiency.

Also, in view of this amendment, we have taken the opportunity to make certain other conforming changes to the Financial Statements. In 2005, we began reporting our operations under two operating segments and, consequently, adopted the provisions of SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*. As a result, the disclosures in Note 10 have been expanded to conform to the provisions of SFAS No. 131 regarding segment presentation. Finally, as a result of our recapitalization transaction effectuated on February 11, 2005 (see Note 2 to the Financial Statements) and discussions with regulatory experts we have reclassified certain amounts from retained earnings to paid-in capital.

We have also updated the notes to the financial statements for two subsequent events. One is a consulting arrangement entered into by the registrant for which it is anticipated payment will be made in the form of issuance of registrant's common stock in an amount equal to 3.5% of the outstanding common and preferred stock of the registrant immediately following the February 2005 merger. We are in the process of reaching a definitive agreement with respect to the consulting arrangement. The second subsequent event was the settlement of litigation relating to the merger. See Note 5 to the Financial Statements for more information on these subsequent events.

Changes in Internal Control over Financial Reporting

Other than as stated above, there were no other changes in the Company's internal control over financial reporting that occurred during the period ended June 30, 2005, that have materially affected and are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

Integrated Tek Solutions Lawsuit

As previously disclosed in a Current Report on Form 8-K dated April 22, 2005 and in our quarterly report on Form 10-QSB for the quarter ended March 31, 2005, on April 4, 2005, Integrated Tek Solutions, Inc. filed a lawsuit against us in the Supreme Court of the State of New York, County of New York, alleging breach of contract, fraud, negligent misrepresentation and promissory estoppel. We received notice of the suit on April 14, 2005. The action arose out of a letter of intent pursuant to which a predecessor to the plaintiff, Yasup, LLC, and a predecessor to us, Computer Software Innovations, Inc., a South Carolina corporation (CSI South Carolina) conducted negotiations relating to a potential acquisition of CSI South Carolina's capital stock by Yasup, LLC.

Table of Contents

We received an Amended Complaint on June 3, 2005, which added several new defendants. Some of our officers and directors were named as individual defendants in the suit. These included Nancy K. Hedrick, CEO and Director; Joe G. Black, former CFO; Thomas P. Clinton, Vice President of Sales and Director; Beverly N. Hawkins, Secretary and Vice President of Support Services; and William J. Buchanan, Treasurer and Vice President of Engineering. Ms. Hedrick and Ms. Hawkins and Messrs. Black, Clinton and Buchanan were also officers, directors and the shareholders of CSI South Carolina. Other defendants in the suit were Alan Marrullier, The Geneva Companies, Inc., Capital Access Group LLC, Barron Partners LP, Liberty Capital LLC, Andrew Worden, Philip Seifert, Ned Gelband and Lee Haskin, against whom allegations of tortious interference with contractual relations, aiding and abetting a fraud, and breach of contract were asserted. The Amended Complaint sought damages up to \$60 million in total.

Several of our officers and directors were named as individual defendants in the lawsuit. Accordingly, the potential existed for conflicts of interest between those officers and directors and the Company. In order to avoid potential conflicts, the board of directors felt that it was in our best interest to create a special litigation committee comprised of outside directors who were not named in the lawsuit, namely Anthony H. Sobel, Thomas V. Butta and Shaya Phillips. The special litigation committee, formed on July 8, 2005, was delegated the authority to manage the litigation. Furthermore, the special litigation committee retained independent counsel to represent it with respect to the Integrated Tek Solutions, Inc. matter.

On August 15, 2005, we filed and served responsive pleadings consisting of a Verified Answer, Defendants' First Request for Production and Deposition Subpoenas. Other parties had pending motions.

In connection with August 15, 2002 and February 6, 2003 agreements between CSI South Carolina and The Geneva Companies, Inc., we undertook the defense of The Geneva Companies, Inc. and Alan Marullier in the New York litigation effective October 28, 2005. The defense involved additional expense to us, although such expense was not significant. Our special litigation committee monitored this relationship in order to take appropriate action if a conflict developed.

As explained above, we undertook the defense of our officers and directors individually named in the lawsuit. We also advanced expenses to them. In accordance with Delaware law, those officers and directors executed an Undertaking and Affirmation pursuant to which the officers and directors agreed to repay any expenses advanced or indemnification paid with respect to the lawsuit if it is ultimately determined that the advancement of expenses or indemnification was improper under Delaware law.

On December 28, 2005, subsequent to the filing of the quarterly report for the period ended June 30, 2005, the suit was settled by all parties involved. As part of the settlement, the plaintiff released all claims against all defendants in exchange for payment of \$600,000. The Company contributed \$200,000 toward this payment with each of the five individual current and former officers of the Company contributing \$20,000 each. The remaining \$300,000 was paid by the other defendants in the suit. Although the Company maintained the suit was without merit, the Company believed the settlement to be prudent in view of the cost of continuing litigation. None of the portion of the settlement payment made by the Company was covered by any of the Company's insurance policies.
