NOTES TO CONDENSED FINANCIAL STATEMENTS (Unaudited)

1. BASIS OF PRESENTATION

The accompanying unaudited condensed financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) and include all adjustments that, in the opinion of management, are necessary for a fair presentation of the results of the periods presented. All such adjustments are considered of a normal recurring nature. Quarterly results of operations are not necessarily indicative of annual results.

Certain financial information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. These unaudited condensed financial statements should be read in conjunction with the Company's audited financial statements for the year ended December 31, 2006 and the notes thereto contained in our Annual Report on Form 10-K for the year ended December 31, 2006.

2. REVENUE RECOGNITION

The Company recognizes revenue in accordance with accounting principles generally accepted in the United States of America, principally:

Statement of Position (SOP) No. 97-2, *Software Revenue Recognition*, issued by the American Institute of Certified Public Accountants (AICPA).

AICPA SOP No. 98-9, *Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions*.

Staff Accounting Bulletin (SAB) No. 101, *Revenue Recognition in Financial Statements*, issued by the United States Securities and Exchange Commission, as amended by SAB No. 104.

The Emerging Issues Task Force (EITF) Issue 00-3, *Application of AICPA Statement of Position 97-2 to Arrangements That Include the Right to Use Software Stored on Another Entities' Hardware*.

EITF Issue 03-5, *Applicability of AICPA Statement of Position 97-2 to Non-Software Deliverables in an Arrangement Containing More Than Incidental Software*.

The Company's revenue is generated from three sources:

the sale of information systems, which includes software, conversion and installation services, hardware, peripherals, forms and supplies.

the provision of system support services, which includes software application support, hardware maintenance, continuing education, application service provider (ASP) products, and internet service provider (ISP) products.

Edgar Filing: COMPUTER PROGRAMS & SYSTEMS INC - Form 10-Q

the provision of outsourcing services, which includes electronic billing, statement processing, payroll processing and business office outsourcing.

The Company enters into contractual obligations to sell hardware, perpetual software licenses, installation and training services, and maintenance services. Revenue from hardware sales is recognized upon shipment, when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable and collection is probable. Revenue from the perpetual software licenses and installation and training services are recognized using the residual method. The residual method allocates an amount of the arrangement to the elements for which fair value can be determined and any remaining arrangement consideration (the residual revenue) is then allocated to the delivered elements. The fair value of maintenance services is determined based on vendor specific objective evidence (VSOE) of fair value and is deferred and recognized as revenue ratably over the maintenance term. VSOE of fair value of maintenance services is determined by reference to the price the Company's customers are required to pay for the services when sold separately via renewals. The residual revenue is allocated to the perpetual license and installation and training services and is recognized over the term that the installation and training services are performed for the entire arrangement. The method of recognizing revenue for the perpetual license for the associated modules included in the arrangement and related installation and training services over the term the services are performed is on a module by module basis as the respective installation and training for each specific module is completed as this is representative of the pattern of provision of these services. The installation and training services are normally completed in three to four weeks.

Revenue derived from maintenance contracts primarily includes revenue from software application support, hardware maintenance, continuing education and related services. Maintenance contracts are typically sold for a separate fee with initial contract periods ranging from one to seven years, with renewal for additional periods thereafter. Maintenance revenue is recognized ratably over the term of the maintenance agreement.

The Company accounts for ASP contracts in accordance with the EITF 00-3, *Application of AICPA Statement of Position 97-2 to Arrangements That Include the Right to Use Software Stored on Another Entity's Hardware*. EITF 00-3 states that the software element of ASP services is covered by SOP 97-2 only if the customer has the contractual right to take possession of the software at any time during the hosting period without significant penalty and it is feasible for the customer to either run the software on its own hardware or contract with another party related to the vendor to host the software. Each ASP contract includes a system purchase and buyout clause, and this clause specifies the total amount of the system buyout.

Table of Contents

In addition, a clause is included which states that should the system be bought out by the customer, the customer would be required to enter into a general support agreement (for post contract support services) for the remainder of the original ASP term. Accordingly, the Company has concluded that ASP customers do not have the right to take possession of the system without significant penalty (i.e. the purchase price of the system), and thus ASP revenue of the Company does not fall within the scope of SOP 97-2. In accordance with SAB No. 104, revenue is recognized when the services are performed.

Revenue for ISP and outsourcing services are recognized in the period in which the services are performed.

Accordingly, investments are classified as available-for-sale securities and are reported at fair value, with unrealized gains and losses excluded from earnings and reported in a separate component of shareholder's equity. The Company's management determines the appropriate classifications of investments in fixed maturity securities at the time of acquisition and re-evaluates the classifications at each balance sheet date. The Company's investments in fixed maturity securities are classified as available-for-sale.

Investments are comprised of the following at June 30, 2007:

5. NET INCOME PER SHARE

The Company presents both basic and diluted earnings per share (EPS) amounts. Basic EPS is calculated by dividing net income by the weighted average number of common shares outstanding during the period presented. Diluted EPS amounts are based upon the weighted average number of common and common equivalent shares outstanding during the period presented. The Company uses the treasury stock method to calculate the impact of outstanding stock options and unvested restricted stock grants. Potentially dilutive shares are derived from outstanding stock options and unvested restricted stock grants that have an exercise price less than the weighted average market price of our common stock. Any options or restricted stock grants with an exercise price greater than the weighted average market price of our common stock are considered antidilutive and are excluded from the computation of diluted earnings per share. The difference between basic and diluted EPS is attributable to stock options. For the three month periods ended June 30, 2007 and 2006, these dilutive shares were 49,627 and 81,683, respectively. For the six month periods ended June 30, 2007 and 2006, these dilutive shares were 52,024 and 84,167, respectively. The number of unvested restricted stock grants considered antidilutive and thus excluded from the year to date dilutive earnings per share computation at June 30, 2007 were 111,009.

6. INCOME TAXES

The Company accounts for income taxes using the liability method in accordance with Statement of Financial Accounting Standards (SFAS) No. 109, *Accounting for Income Taxes*. Deferred income taxes arise from the temporary differences in the recognition of income and expenses for tax purposes. Deferred tax assets and liabilities are comprised of the following:

	June 30, 2007	December 31, 2006
Deferred tax assets:		
Accounts receivable	\$ 321,662	\$ 317,352

Effective January 1, 2007, the Company adopted the provisions of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. FIN 48 requires a company to determine whether it is more likely than not that a tax position will be sustained upon examination based upon the technical merits of the position. If the more-likely-than-not threshold is met, a company must measure the tax position to determine the amount to recognize in the financial statements. The application of income tax law is inherently complex. Laws and regulation in this area are voluminous and are often ambiguous. As such, we are required to make many subjective assumptions and judgments regarding our income tax exposures. Interpretations of and guidance surrounding income tax laws and regulations change over time. As such, changes in our subjective assumptions and judgments can materially affect amounts recognized in the balance sheets and statements of income.

At the adoption date of January 1, 2007, we had no unrecognized tax benefits which would affect our effective tax rate if recognized. At June 30, 2007, we have no unrecognized tax benefits.

The Company classifies interest and penalties arising from the underpayment of income taxes in the statement of income under general and administrative expenses. As of June 30, 2007, we have no accrued interest or penalties related to uncertain tax positions. The tax year 2006 federal return remains open to examination and the tax years 2003-2006 remain open to examination by other taxing jurisdictions to which we are subject.

7. STOCK BASED COMPENSATION

Effective January 1, 2006, the Company adopted the provisions of Statement of Financial Accounting Standards No. 123 (Revised 2004), *Share Based Payment* (SFAS No. 123R). SFAS No. 123R establishes accounting for stock-based awards exchanged for employee services. Accordingly, stock-based compensation cost is measured at grant date based on the fair value of the award, and is recognized as an expense over the employee's requisite service period. The Company previously applied Accounting Principles Board (APB) Opinion No. 25, *Accounting for Stock Issued to Employees*, and related Interpretations and provided pro forma disclosures of SFAS No. 123, *Accounting for Stock Based Compensation*. The Company elected to adopt the modified prospective application method as provided by SFAS No. 123R, and, accordingly, prior periods are not restated for the effects of SFAS No. 123R. The Company recorded compensation costs as the requisite service rendered for the unvested portion of previously issued awards that remain outstanding at the initial date of adoption and any awards issued, modified,

repurchased, or cancelled after the effective date of SFAS No. 123R.

2002 Stock Option Plan

Under the 2002 Stock Option Plan, the Company has authorized the issuance of equity-based awards for up to 865,333 shares of common stock to provide additional incentive to employees and officers. Pursuant to the plan, the Company can grant either incentive or non-qualified stock options. Options to purchase common stock under the 2002 Stock Option Plan have been granted to Company employees with an exercise price equal to the fair market value of the underlying shares on the date of grant.

Stock options granted under the 2002 Stock Option Plan to executive officers of the Company become vested as to all of the shares covered by such grant on the fifth anniversary of the grant date and expire on the seventh anniversary of the grant date. Stock options granted under the 2002 Stock Option Plan to employees other than executive officers become vested as to 50% of the shares covered by the option grant on the third anniversary of the grant date and as to 100% of such shares on the fifth anniversary of the grant date. In addition, options become vested upon termination of employment resulting from death, disability or retirement. Such options expire on the seventh anniversary of the grant date.

Under the methodology of SFAS No. 123, the fair value of the Company's stock options was estimated at the date of grant using the Black-Scholes option pricing model. The multiple option approach was used, with assumptions for expected option life of 5 years and 44% expected volatility for the market price of the Company's stock in 2002. An estimated dividend yield of 3% was used. The risk-free rate of return was determined to be 2.79% in 2002. No options have been granted in 2007.

A summary of stock option activity under the plan during the six month periods ended June 30, 2007 and 2006 is as follows:

Overview

We are a healthcare information technology company that designs, develops, markets, installs and supports computerized information technology systems to meet the unique demands of small and midsize hospitals. Our target market includes acute care community hospitals with 300 or fewer beds and small specialty hospitals. We are a single-source vendor providing comprehensive software and hardware products, complemented by data conversion, complete installation and extensive support. Our fully integrated, enterprise-wide system automates the management of clinical and financial data across the primary functional areas of a hospital. In addition, we provide services that enable our customers to outsource certain data-related business processes which we can perform more efficiently. We believe our products and services enhance hospital performance in the critical areas of clinical care, revenue cycle management, cost control and regulatory compliance. From our initial hospital installation in 1981, we have grown to serve more than 600 hospital customers across 46 states and the District of Columbia. In

Support and maintenance revenues increased by 8.2%, or \$0.9 million, to \$12.3 million for the three months ended June 30, 2007, from \$11.4 million for the three months ended June 30, 2006. This increase was attributable to an increase in recurring revenues as a result of a larger customer base and increased sales of add-on business to existing customers.

Table of Contents

Outsourcing revenues increased by 22.6%, or \$1.0 million, to \$5.3 million for the three months ended June 30, 2007, from \$4.3 million for the three months ended June 30, 2006. This increase was caused primarily by an increase of \$0.6 million in payroll related expenses as a result of an increase in the number of employees needed to support our growing business office outsourcing operations and electronic billing operations.
