T-MOBILE USA REPORTS STRONG RESULTS IN THE THIRD QUARTER

857,000 net new customers added in the third quarter of 2007

\$1.41 billion in Operating Income Before Depreciation and Amortization (OIBDA) in the third quarter of 2007, up 15.1% from the third quarter of 2006

ARPU of \$53, up from \$52 in the third quarter of 2006

Contract customer churn 2.0% in the third quarter, down from 2.3% in the third quarter of 2006

T-Mobile announced the proposed acquisition of SunCom Wireless in the quarter, expanding coverage to 98 of the top 100 markets in the U.S. (up by 11)

Bellevue, November 8, 2007 T-Mobile USA, Inc. (T-Mobile USA) today reported third quarter 2007 results. At the end of the quarter, the company had almost 28 million customers, adding 857,000 net new customers during the quarter. T-Mobile USA also reported ARPU of \$53 in the quarter, up from \$52 in the third quarter of 2006, OIBDA of \$1.41 billion, up 15.1% compared to the third quarter of 2006, and a reduction in contract customer churn to 2.0% from 2.3% in the third quarter of 2006.

Right around the beginning of the quarter, we introduced yet another in our series of breakthrough services aimed at bringing T-Mobile to greater numbers of new customers, said Robert Dotson, Chief Executive Officer and President of T-Mobile USA, Inc. Our new HotSpot@HomeSM service is changing the game by allowing customers to make unlimited calls from home over Wi-Fi while providing the best in-home wireless coverage possible. This

T-Mobile USA

12920 SE 38th Street

Bellevue, Washington 98006

Phone 1-800-318-9270

Internet <http://www.t-mobile.com>

service opens up an important new growth area for our company to go after, the displacement of landline telephone service with T-Mobile service. We also continue to add greater numbers of new customers onto myFavesSM with more than 3.5 million people on the service and growing.

T-Mobile USA continues to build on its role as a key component of Deutsche Telekom's strategy to grow abroad with mobile, said René Obermann, Chief Executive Officer, Deutsche Telekom. In the quarter, we reiterated our confidence in this business by working with the U.S. leadership team to reach an agreement to acquire SunCom Wireless, a compelling acquisition that fits nicely into our current footprint.

Customers

In the third quarter of 2007, T-Mobile USA added 857,000 net new customers, the same as in the second quarter of 2007, and up from 802,000 in the third quarter of 2006.

- i Contract customer net additions in the third quarter of 2007 made up 65% of customer growth, down from 80% in the second quarter of 2007 and 96% in the third quarter of 2006.

- i In July 2007 T-Mobile launched the FlexPaySM product. FlexPay is a program that opens access to T-Mobile's entire lineup of products and services to a greater number of new customers by letting people pay in advance for their services and handsets. FlexPay contributed a significant number of net customer additions in the quarter. There are two forms of the FlexPay product—one with and one without a contract. FlexPay customers with a contract are included in contract customers, and FlexPay customers without a contract are included in prepaid customers. Both products have ARPUs similar to existing contract customers. The higher prepaid share of net customer additions in the third quarter of 2007 was due in particular to the popularity of the no-contract version of FlexPay.

T-Mobile USA

12920 SE 38th Street

Bellevue, Washington 98006

Phone 1-800-318-9270

Internet <http://www.t-mobile.com>

- i myFavesSM continues to be very popular with our customers. At the end of the third quarter there were over 3.5 million myFaves customers, up from 2.5 million at the end of the second quarter.

Contract customers comprised 84% of T-Mobile USA's total customer base at September 30, 2007.

Churn

Contract customer churn was 2.0% in the third quarter of 2007, up from 1.8% in the second quarter of 2007 and down from 2.3% in the third quarter of 2006. The year over year decline in churn is primarily due to the introduction of two-year contracts in the second quarter of 2006.

Blended churn, including both contract and prepaid customers, was 2.9% in the third quarter of 2007, up from 2.7% in the second quarter of 2007 and down from 3.0% in the third quarter of 2006.

OIBDA and Net Income

T-Mobile USA reported OIBDA of \$1.41 billion in the third quarter of 2007, up from \$1.39 billion in the second quarter of 2007 and \$1.23 billion in the third quarter of 2006.

OIBDA margin was 32% in the third quarter of 2007, the same as in the second quarter of 2007 and the third quarter of 2006.

Net income for the third quarter of 2007 was \$526 million, up 50% from \$350 million in the second quarter of 2007 and down from \$1.79 billion in the third quarter of 2006.

- i The decrease in net income compared to the third quarter of 2006 was due to a \$1.5 billion non-cash income tax benefit realized in the third quarter of 2006.

T-Mobile USA

12920 SE 38th Street

Bellevue, Washington 98006

Phone 1-800-318-9270

Internet <http://www.t-mobile.com>

Revenue

Service revenues, consisting of contract, prepaid, and roaming and other service revenues, rose to \$4.33 billion in the third quarter of 2007, up from \$4.20 billion in the second quarter of 2007 and \$3.72 billion in the third quarter of 2006.

- i The increase is due primarily to growth in the number of customers and year-on-year higher contract ARPU (Average Revenue Per User as defined in note 1 to the Selected Data, below).

Other revenues were \$82 million in the third quarter of 2007, slightly down from \$89 million in the second quarter of 2007 and down from \$147 million in the third quarter of 2006.

- i The major reason for the year on year fall in other revenues was the ongoing migration of AT&T's customers to its own network following the dissolution of our network sharing venture in early 2005.
- i In 2007, Wi-Fi revenues were reclassified to contract revenues and roaming and other service revenues (see note 8 to the Selected Data below for further explanation).

Total revenues, including service, equipment, and other revenues were \$4.89 billion in the third quarter of 2007, up from \$4.78 billion in the second quarter of 2007 and \$4.37 billion in the third quarter of 2006.

ARPU

Blended ARPU was \$53 in the third quarter of 2007, the same as the second quarter of 2007 and up from \$52 in the third quarter of 2006.

Contract ARPU was \$57 in the third quarter of 2007, the same as in the second quarter of 2007 and up from \$56 in the third quarter of 2006, driven by increasing data services revenues (see notes 1 and 8 to the Selected Data below).

Data services revenues were \$666 million in the third quarter of 2007, representing 15.4% of blended ARPU, or \$8.10 per customer, compared to 14.7% of blended ARPU, or \$7.80 per customer in the second quarter of 2007, and 11.3% of blended ARPU, or \$5.90 per customer in third quarter of 2006.

T-Mobile USA

12920 SE 38th Street

Bellevue, Washington 98006

Phone 1-800-318-9270

Internet <http://www.t-mobile.com>

i Strong growth in messaging revenue continued to be the most significant driver increasing data ARPU. The total number of SMS and MMS messages increased to almost 21 billion in the third quarter of 2007, compared to 18 billion in the second quarter of 2007 and 10 billion in the third quarter of 2006. Strong GPRS / EDGE access and usage revenues were another significant driver of the increase in data services revenues compared to the third quarter of 2006.

i In September T-Mobile USA launched the BlackBerry Curve, the first converged device enabled for the new HotSpot @Home service.

CPGA and CCPU

The average cost of acquiring a customer, Cost Per Gross Add (CPGA as defined in note 3 to the Selected Data, below) was \$280 in the third quarter of 2007, down from \$300 in the second quarter of 2007 and in the third quarter of 2006.

i The lower CPGA compared to the second quarter of 2007 is primarily due to the change in customer mix and lower advertising costs. The change in customer mix was also a significant reason for the decline in CPGA in the third quarter of 2007 versus the third quarter of 2006.

The average cash cost of serving customers, Cash Cost Per User (CCPU as defined in note 2 to the Selected Data, below), was \$26 per customer per month in the third quarter of 2007, up from \$25 in the second quarter of 2007 and the third quarter of 2006.

i CCPU in the third quarter was essentially in line with the second quarter of 2007, the reported increase is primarily due to rounding. Higher roaming costs were the primary reason for the increase in CCPU in the third quarter of 2007 compared to the third quarter of 2006.

T-Mobile USA

12920 SE 38th Street

Bellevue, Washington 98006

Phone 1-800-318-9270

Internet <http://www.t-mobile.com>

Capital Expenditures

Cash capital expenditures (see note 6 to the Selected Data below) were \$500 million in the third quarter of 2007, compared with \$546 million in the second quarter of 2007 and \$569 million in the third quarter of 2006.

- i The sequential reduction in cash capital expenditures was due to an increase in incurred capital spend being more than offset by cash payment timing differences.

T-Mobile USA continued its commitment to invest in network coverage and quality in the third quarter of 2007, adding almost 600 new cell sites, bringing the total number of cell sites at the end of the quarter to just over 37,000.

Other Highlights

T-Mobile USA announced the proposed acquisition of SunCom Wireless (SunCom) in September 2007. The acquisition will further enhance T-Mobile's network coverage in the southeastern United States and the Caribbean through the complementary addition of SunCom's markets and customers in North Carolina, South Carolina, Tennessee, Georgia, Puerto Rico and the U.S. Virgin Islands. SunCom operates a GSM/GPRS/EDGE network and has provided roaming service to T-Mobile in these markets since 2004. In October 2007, T-Mobile and SunCom received notification that the proposed acquisition received antitrust clearance from U.S. antitrust regulatory agencies. The transaction remains subject to Federal Communications Commission approval, SunCom shareholder approval, and other customary closing conditions. The closing of the proposed acquisition is expected during the first half of 2008.

In October 2007, T-Mobile again topped the overall ranking in the J.D. Power and Associates 2007 Customer Satisfaction Index Study, Vol. 2. T-Mobile USA ranked highest in five of the six regions (including four ties).

Since all companies do not calculate these figures in the same manner, the information contained in this press release may not be comparable to similarly titled measures reported by other companies.

- 1 Average Revenue Per User (ARPU) represents the average monthly service revenue we earn from our customers. ARPU is calculated by dividing service revenues for the specified period by the average customers during the period, and further dividing by the number of months in the period. We believe ARPU provides management with useful information to evaluate the recurring revenues generated from our customer base.

T-Mobile USA

12920 SE 38th Street

Bellevue, Washington 98006

Phone 1-800-318-9270

Internet <http://www.t-mobile.com>

Service revenues include contract, prepaid, and roaming and other service revenues, and do not include equipment sales and other revenues. Data services revenues is a component of service revenues. Per the consolidated financial statements below, other revenues include co-location rental income and wholesale revenues from the usage of our network in California, Nevada, and New York by AT&T customers, among other items, and are therefore not included in ARPU.

- 2 The average cash cost of serving customers, or Cash Cost Per User (CCPU) is a non-GAAP financial measure and includes all network and general and administrative costs as well as the subsidy loss unrelated to customer acquisition. Subsidy loss unrelated to customer acquisition includes upgrade handset costs offset by upgrade equipment revenues and other related direct costs. This measure is calculated as a per month average by dividing the total costs for the specified period by the average total customers during the period and further dividing by the number of months in the period. We believe that CCPU, which is a measure of the costs of serving a customer, provides relevant and useful information and is used by our management to evaluate the operating performance of our business.
- 3 Cost Per Gross Add (CPGA) is a non-GAAP financial measure and is calculated by dividing the costs of acquiring a new customer, consisting of customer acquisition costs plus the subsidy loss related to customer acquisition for the specified period, by gross customers added during the period. Subsidy loss related to customer acquisition consists primarily of the excess of handset and accessory costs over related revenues incurred to acquire new customers. We believe that CPGA, which is a measure of the cost of acquiring a customer, provides relevant and useful information and is used by our management to evaluate the operating performance of our business.
- 4 OIBDA is a non-GAAP financial measure, which we define as operating income before depreciation and amortization. In a capital-intensive industry such as wireless telecommunications, we believe OIBDA, as well as the associated percentage margin calculation, to be meaningful measures of our operating performance. OIBDA should not be construed as an alternative to operating income or net income as determined in accordance with GAAP, as an alternative to cash flows from operating activities as determined in accordance with GAAP or as a measure of liquidity. We use OIBDA as an integral part of our planning and internal financial reporting processes, to evaluate the performance of our senior management and to compare our performance with that of many of our competitors. We believe that operating income is the financial measure calculated and presented in accordance with GAAP that is the most directly comparable to OIBDA.
- 5 OIBDA margin is a non-GAAP financial measure, which we define as OIBDA (as described in note 4 above) divided by total revenues less equipment sales.
- 6 Capital expenditures include amounts paid by T-Mobile USA for purchases of property, plant and equipment.
- 7 The covered population statistic represents T-Mobile USA's GSM / GPRS 1900 voice and data network coverage, combined with roaming and other agreements.
- 8 Data ARPU is defined as total data revenues from contract customers, prepaid customers, and other data revenues, divided by average contract and prepaid customers during the period. Wi-Fi revenues have historically been reported in other (non-service) revenues. Beginning in the first quarter of 2007, Wi-Fi revenues are shown as a component of service revenues. As a result of this change, data ARPU was approximately \$0.60 higher in the third quarter of 2007. If this change was applied retrospectively it would have had similar impacts on data ARPU and data revenue in each of the four quarters of 2006. Since the impacts of this change on contract ARPU, blended ARPU, and service revenues are immaterial, these metrics have not been retroactively adjusted in prior periods.

Edgar Filing: DEUTSCHE TELEKOM AG - Form 6-K

Bellevue, Washington 98006

Phone 1-800-318-9270

Internet <http://www.t-mobile.com>

- 9 Cell sites are defined as the total number of sites in service at the end of the period, excluding small low power, low gain access sites. A site is in service when all equipment is installed and the site is integrated into the network. Prior quarter cell site information has been updated to align with this definition.
