FORM 10-Q

x QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended March 31, 2010

Or

.. TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Transition Period From _____ to _____

Commission File Number 0-7406

PrimeEnergy Corporation

(Exact name of registrant as specified in its charter)

Edgar Filing: PRIMEENERGY CORP - Form 10-Q

Delaware **84-0637348**
(State or other jurisdiction of (I.R.S. employer
incorporation or organization) Identification No.)
One Landmark Square, Stamford, Connecticut 06901
(Address of principal executive offices)
(203) 358-5700
(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filings required for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if smaller reporting company) Smaller reporting company
Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares outstanding of each class of the Registrant's Common Stock as of May 11, 2010 was: Common Stock, \$0.10 par value, 3,026,397 shares.

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

March 31, 2010

(1) Interim Financial Statements:

The accompanying consolidated financial statements of PrimeEnergy Corporation ("PEC"), with the exception of the consolidated balance sheet at December 31, 2009, have not been audited by independent public accountants. In accordance with applicable SEC rules and regulations, the accompanying interim financial statements do not include all disclosures presented in annual financial statements and the reader should refer to the Company's Form 10-K for the year ended December 31, 2009 filed April 15, 2010. In the opinion of management, the accompanying interim consolidated financial statements reflect all adjustments necessary to present fairly the financial position at March 31, 2010 and the results of operations and cash flows for the three months ended March 31, 2010 and 2009. All such adjustments are of a normal recurring nature. Certain amounts presented in prior period financial statements have been reclassified for consistency with current period presentation. The results for interim periods are not necessarily indicative of annual results. For purposes of disclosure in the consolidated financial statements, subsequent events have been evaluated through May 17, 2010, the date the statements were issued.

Recently Adopted Accounting Standards

In January 2010, the Financial Accounting Standards Board (FASB) issued an Accounting Standards Update (ASU), Oil and Gas Reserve Estimation and Disclosures, which aligns the FASB's oil and gas reserve estimation and disclosure requirements with the requirements in SEC Release No. 33-8955, Modernization of Oil and Gas Reporting Requirements (the "Release") issued in December 2008. The ASU is effective for reporting periods ending on or after December 31, 2009. The provisions include changes to pricing used to estimate reserves (with the use of an average of the first-day-of-the-month price for the 12-month period, rather than a year-end price for determining whether reserves can be produced economically), an expanded definition of oil and gas producing activities to include nontraditional resources, and amended definitions of key terms such as "reliable technology" and "reasonable certainty" which are used in estimating proved oil and gas reserve quantities. The primary objectives of the revisions are to increase the transparency and information value of reserve disclosures and improve comparability among oil and gas companies. The adoption of these requirements did not significantly impact the reported value of the Company's reserves or its financial statements.

In February 2010, the FASB issued authoritative guidance on subsequent events that removes the requirement for an SEC filer to disclose the date through which subsequent events have been evaluated in both issued and revised financial statements. This guidance was effective upon issuance. The adoption of the subsequent events standard had no impact on our consolidated financial position, results of operations or cash flows.

In January 2010, the FASB issued changes clarifying existing disclosure requirements for fair value measurements and requiring gross presentation of activities within the reconciliation for the period, whereby entities must present separately information about purchases, sales, issuances and settlements. The update also added a new requirement to disclose fair value transfers in and out of Levels 1 and 2 and describe the reasons for the transfers. These changes were effective for financial statements issued for the first interim or annual reporting period beginning after December 15, 2009, except for gross presentation of the Level 3 reconciliation for the period, which will become effective for annual reporting periods beginning after December 15, 2010. There was no impact on the Company's consolidated financial position, results of operations or cash flows as a result of the adoption of the required provisions.

(2) Acquisitions and Dispositions

Historically the Company has repurchased the interests of the partners and trust unit holders in certain of the Partnerships, which consist primarily of oil and gas interests. The Company purchased such interests in an amount totaling \$1,000 for the three months ended March 31, 2010. There were no purchases of such interests for the three months ended March 31, 2009.

(3) Restricted Cash and Cash Equivalents:

Restricted cash and cash equivalents include \$5,019,000 and \$5,497,000 at March 31, 2010 and December 31, 2009, respectively, of cash primarily pertaining to oil and gas revenue payments. There were corresponding accounts payable recorded at March 31, 2010 and December 31, 2009 for these liabilities. Both the restricted cash and the accounts payable are classified as current on the accompanying balance sheet.

(4) Additional Balance Sheet Information

Certain balance sheet amounts are comprised of the following:

	March 31, 2010	December 31, 2009
Accounts Receivable:		
Joint interest billing	\$ 2,079,000	\$ 2,411,000
Trade receivables	1,501,000	1,565,000
Oil and gas sales	8,153,000	7,774,000
Refundable prior years income taxes	2,426,000	2,466,000
Other	53,000	83,000
	14,212,000	14,299,000
Less: Allowance for doubtful accounts	445,000	423,000
Total	\$ 13,767,000	\$ 13,876,000
Accounts Payable:		
Trade	\$ 4,254,000	\$ 5,862,000
Royalty and other owners	8,825,000	9,920,000
Other	5,949,000	5,509,000
Total	\$ 19,028,000	\$ 21,291,000
Accrued Liabilities:		
Compensation and related expenses	\$ 2,357,000	\$ 2,009,000
Property costs	1,074,000	2,137,000
Income tax	229,000	170,000
Other	1,747,000	1,669,000
Total	\$ 5,407,000	\$ 5,985,000

(5) Property and Equipment:

Property and equipment at March 31, 2010 and December 31, 2009 consisted of the following:

	March 31, 2010	December 31, 2009
Proved oil and gas properties, at cost	\$ 443,170,000	\$ 441,035,000
Unproved oil and gas properties, at cost	1,322,000	1,322,000

Edgar Filing: PRIMEENERGY CORP - Form 10-Q

Less: Accumulated depletion and depreciation	277,488,000	268,514,000
	\$ 167,004,000	\$ 173,843,000
Field service equipment and other	19,555,000	19,462,000
Less: Accumulated depreciation	12,401,000	12,199,000
	\$ 7,154,000	\$ 7,263,000
Total net property and equipment	\$ 174,158,000	\$ 181,106,000

(6) Long-Term Bank Debt:

Prior to August 21, 2009 the Company's long-term debt consisted of an onshore facility owed to a syndicate of banks and an offshore facility owed to one principal lender. The agent for the syndicate of banks and principal lender was Guaranty Bank. On August 21, 2009, Guaranty Bank was closed by the Office of Thrift Suspension. Subsequently, the Federal Deposit Insurance Corporation (FDIC) was named Receiver. Loan administration and all deposit accounts were transferred to BBVA Compass from the FDIC at that time. BBVA Compass became the agent for the syndicate of banks holding the onshore credit facility and the lender for the offshore facility.

The Company has revolving lines of credit up to a total of \$360 million, consisting of a \$200 million credit facility (the offshore facility) and a \$160 million credit facility through a syndicate of banks (the onshore facility). The offshore facility's maturity date is October 1, 2010 and the onshore credit facility matures April 1, 2011. Availability under the credit facilities is based on the loan value assigned to PEC's oil and gas properties. The determination of the borrowing base is made by the lenders taking into consideration the estimated value of PEC's oil and gas properties in accordance with the lenders' customary practices for oil and gas loans. This process involves reviewing PEC's estimated proved reserves and their valuation. The borrowing base is re-determined semi-annually, and the available borrowing amount could be increased or decreased as a result of such redetermination. In addition, PEC and the lenders each have discretion at any time to have the borrowing base re-determined. A revision to PEC's reserves may prompt such a request on the part of the lenders, which could possibly result in a reduction in the borrowing base and availability under the credit facilities. If outstanding borrowings under either of the credit facilities exceed the applicable portion of the borrowing base, PEC would be required to repay the excess amount within a prescribed period. If the Company is unable to pay the excess amount, it would cause an event of default.

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

March 31, 2010

The credit facilities include terms and covenants that require the Company to maintain a minimum current ratio, tangible net worth, debt coverage ratio and interest coverage ratio, as defined, and restrictions are placed on the payment of dividends and the amount of treasury stock the Company may purchase. The credit facilities are collateralized by substantially all of the Company's assets. The Company is required to mortgage, and grant a security interest in, consolidated proved oil and gas properties. PEC also pledged the stock of several subsidiaries to the lenders to secure the credit facilities.

As of March 31, 2010, the onshore facilities borrowing base was \$100 million. As of March 31, 2010 the offshore facilities borrowing base was \$5.5 million with a monthly reduction of \$500 thousand which began in August 2009. The Company's borrowing rates in both facilities have a floor of 2% plus applicable margin rates that vary from 3% to 5% depending on which facility, the value of current borrowings and the actual available borrowing base. On March 1, 2010, the Company amended its onshore credit facility to formally include BBVA Compass as agent of the syndicate of banks holding the facility. Also included in this amendment is a reduction to the availability of the borrowing base which will begin June 1, 2010 in the amount of \$2 million.

At March 31, 2010, the outstanding balance of the Company's bank debt was \$81.33 million under the onshore credit facility, with an additional availability of \$18.67 million at a weighted average interest rate of 6.86%. Under the offshore credit facility the outstanding balance was \$5.5 million, with no further availability, at a weighted average interest rate of 6.07%. Total outstanding bank debt was \$86.83 million at March 31, 2010. The combined weighted average interest rates paid on outstanding bank borrowings subject to interest at the bank's base rate and on outstanding bank borrowings bearing interest based upon the LIBO rate were 6.09% during 2010 as compared to 4.43% during 2009.

The Company entered into interest rate hedge agreements to help manage interest rate exposure. These contracts include interest rate swaps. Interest rate swap transactions generally involve the exchange of fixed and floating rate interest payment obligations without the exchange of the underlying principal amounts. The Company entered into interest swap agreements for a period of two years, which commenced in April 2008, related to \$60 million of Company bank debt resulting in a fixed rate of 2.375% plus the Company's current applicable margin. The underlying debt contracts above are re-priced quarterly based upon the three-month LIBO rates, the Company's floor of 2% and the applicable margin per the onshore credit facility. Subsequent to March 31, 2010, these interest swap agreements expired in April 2010, and they have not been replaced.

Indebtedness to related parties non-current:

During the second quarter 2008, the Company's offshore subsidiary entered into a subordinated credit facility with a private lender with an availability of \$50 million. The private lender has specific collateral pledged under a separate credit agreement. The private lender is controlled by a director of the Company. Effective June 30, 2009, the private lender agreed to release the pledged collateral under this credit facility in favor of the offshore credit facility in exchange for a second lien position on all of the assets of the offshore subsidiary and a pledge from PEC to pay the outstanding balance under the facility in full after PEC's current bank debt is paid off and not take on any additional debt on its existing asset base. This amended facility will mature in January 2012, which will be accelerated if there is a change in control or management of PrimeEnergy Corporation, and bears interest at a rate of 10% per annum. As of March 31, 2010 advances from this facility amounted to \$20 million.

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

March 31, 2010

(7) Other Long-Term Obligations and Commitments:

Operating Leases:

The Company has several non-cancelable operating leases, primarily for rental of office space, that have a term of more than one year. The future minimum lease payments for the rest of the fiscal 2010 and thereafter for the operating leases are as follows.

	<i>Operating Leases</i>
2010	\$ 566,000
2011	384,000
2012	121,000
Total minimum payments	\$ 1,071,000

Rent expense for office space for the three months ended March 31, 2010 and 2009 was \$214,000 and \$123,000, respectively.

Asset Retirement Obligation:

A reconciliation of the liability for plugging and abandonment costs for the three months ended March 31, 2010 is as follows:

Asset retirement obligation	December 31, 2009	\$ 19,366,000
Liabilities incurred		
Liabilities settled		(292,000)
Accretion expense		227,000
Revisions in estimated liabilities		309,000
Asset retirement obligation	March 31, 2010	\$ 19,610,000

The Company's liability is determined using significant assumptions, including current estimates of plugging and abandonment costs, annual inflation of these costs, the productive life of wells and a risk-adjusted interest rate. Changes in any of these assumptions can result in significant revisions to the estimated asset retirement obligation. Revisions to the asset retirement obligation are recorded with an offsetting change to producing properties, resulting in prospective changes to depreciation, depletion and amortization expense and accretion of discount. Because of the subjectivity of assumptions and the relatively long life of most of the Company's wells, the costs to ultimately retire the wells may vary significantly from previous estimates.

(8) Contingent Liabilities:

The Company, as managing general partner of the affiliated Partnerships, is responsible for all Partnership activities, including the drilling of development wells and the production and sale of oil and gas from productive wells. The Company also provides the administration, accounting and tax preparation work for the Partnerships, and is liable for all debts and liabilities of the affiliated Partnerships, to the extent that the assets of a given limited Partnership are not sufficient to satisfy its obligations. As of March 31, 2010, the affiliated Partnerships have established cash reserves in excess of their debts and liabilities and the Company believes these reserves will be sufficient to satisfy Partnership obligations.

Edgar Filing: PRIMEENERGY CORP - Form 10-Q

The Company is subject to environmental laws and regulations. Management believes that future expenses, before recoveries from third parties, if any, will not have a material effect on the Company's financial condition. This opinion is based on expenses incurred to date for remediation and compliance with laws and regulations, which have not been material to the Company's results of operations.

From time to time, the Company is party to certain legal actions arising in the ordinary course of business. While the outcome of these events cannot be predicted with certainty, management does not expect these matters to have a materially adverse effect on the financial position or results of operations of the Company.

(9) Stock Options and Other Compensation:

In May 1989, non-statutory stock options were granted by the Company to four key executive officers for the purchase of shares of common stock. At March 31, 2010 and 2009, options on 767,500 shares were outstanding and exercisable at prices ranging from \$1.00 to \$1.25. According to their terms, the options have no expiration date.

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

March 31, 2010

(10) Related Party Transactions:

The Company, as managing general partner or managing trustee, makes an annual offer to repurchase the interests of the partners and trust unit holders in certain of the Partnerships or Trusts. The Company purchased such interests in an amount totaling \$1,000 for the three months ended March 31, 2010. There were no purchases of such interests for the three months ended March 31, 2009.

Treasury stock purchases in any reported period may include shares from a related party. Purchases from related parties during the first quarter of 2010 included 2,000 shares purchased for a total consideration of \$70,000. There were no related party treasury stock purchases during the three months ended March 31, 2009.

Receivables from related parties consist of reimbursable general and administrative costs, lease operating expenses and reimbursement for property development and related costs. These receivables are due from joint venture partners, which may include members of the Company's Board of Directors.

Payables owed to related parties primarily represent receipts collected by the Company as agent for the joint venture partners, which may include members of the Company's Board of Directors, for oil and gas sales net of expenses. Also included in due to related parties is the amount of accrued interest owed to a related party, a company controlled by a director of the Company, with whom the Company's offshore subsidiary entered into a credit agreement. The agreement provides for a loan of \$20 million at a rate of 10% per annum and is secured by a second lien position of all the assets of the offshore subsidiary. Included at each of March 31, 2010 and December 31, 2009 was \$170,000 of accrued interest on the related party loan.

(11) Financial Instruments

Fair Value measurements:

Authoritative guidance on fair value measurements defines fair value, establishes a framework for measuring fair value and stipulates the related disclosure requirements. The Company follows a three-level hierarchy, prioritizing and defining the types of inputs used to measure fair value. The fair values of the Company's interest rate swaps, natural gas and crude oil price collars and swaps are designated as Level 3. The following fair value hierarchy table presents information about the Company's assets and liabilities measured at fair value on a recurring basis as of March 31, 2010 and December 31, 2009:

	Quoted Prices in Active Markets For Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of March 31, 2010
Assets				
Commodity derivative contracts			\$ 3,943,000	\$ 3,943,000
Total assets			\$ 3,943,000	\$ 3,943,000
Liabilities				
Commodity derivative contracts			\$ (4,024,000)	\$ (4,024,000)

Edgar Filing: PRIMEENERGY CORP - Form 10-Q

Interest rate derivative contracts	(93,000)	(93,000)
Total liability	\$ (4,117,000)	\$ (4,117,000)

	Quoted Prices in Active Markets For Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of December 31, 2009
Assets				
Commodity derivative contracts			\$ 879,000	\$ 879,000
Total assets			\$ 879,000	\$ 879,000
Liabilities				
Commodity derivative contracts			\$ (4,845,000)	\$ (4,845,000)
Interest rate derivative contracts			(335,000)	(335,000)
Total liability			\$ (5,180,000)	\$ (5,180,000)

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

March 31, 2010

The following table sets forth a reconciliation of changes in the fair value of financial assets and liabilities classified as level 3 in the fair value hierarchy for the three months ended March 31, 2010.

Net assets (liabilities) December 31, 2009	\$ (4,301,000)
Total realized and unrealized gains or losses:	
Included in earnings (a)	3,925,000
Included in other comprehensive income	445,000
Purchases, sales, issuances and settlements, net	(243,000)
Net assets (liabilities) March 31, 2010	\$ (174,000)

- (a) Amounts reported in net income are classified as oil and gas sales for commodity derivative instruments reported as cash flow hedges prior to July 1, 2009 and as a reduction to interest expense for interest rate swap instruments. Derivative instruments for periods after July 1, 2009 are reported in oil and gas sales as realized gain/loss and on a separately reported line item captioned unrealized gain/loss on derivative instruments.

Assuming no change in interest prices, after March 31, 2010, the Company would expect to reclassify to the statement of operations, over the next twelve months, \$60,000 in after-tax loss associated with interest rate swaps. This reclassification represents the net short-term payable associated with open swaps currently not reflected in earnings at March 31, 2010 related to anticipated interest expense.

Derivative Instruments:

In March 2008, the FASB issued guidance and amended the disclosure requirements for derivative and hedging activities. Entities are now required to provide greater transparency about how and why the entity uses derivative instruments, how the instruments and related hedged items are accounted for and how the instruments and related hedged items affect the financial position, results of operations and cash flows of the entity.

The Company is exposed to commodity price and interest rate risk, and management considers periodically the Company's exposure to cash flow variability resulting from the commodity price changes and interest rate fluctuations. Futures, swaps and options are used to manage the Company's exposure to commodity price risk inherent in the Company's oil and gas production operations. The Company does not apply hedge accounting to any of its commodity based derivatives. The application of hedge accounting for commodities was discontinued for periods after July 1, 2009. As a result, both realized and unrealized gains and losses associated with derivative instruments are recognized in earnings. If the derivatives previously reported as cash flow hedges had losses or gains not yet settled, these items would be reported in accumulated other comprehensive income until settlement occurs and reclassified appropriately from accumulated other comprehensive income into the statement of operations.

Interest rate swaps derivatives continue to be treated as cash-flow hedges and are used to fix or float interest rates on existing debt. The value of these interest rate swaps at March 31, 2010 is located in accumulated other comprehensive income and settlement of the swaps is recorded within interest expense.

Effect of derivative instruments on the consolidated balance sheet:

Edgar Filing: PRIMEENERGY CORP - Form 10-Q

	Balance Sheet Location	Fair Value	
		March 31, 2010	December 31, 2009
Asset Derivatives:			
<i>Derivatives designated as hedging instruments:</i>			
Crude oil commodity contracts	Current derivative contracts	\$	\$
Crude oil commodity contracts	Other assets		
Total		\$	\$
<i>Derivatives not designated as hedging instruments:</i>			
Natural gas commodity contracts	Current derivative contracts	\$ 3,417,000	\$ 657,000
Natural gas commodity contracts	Other assets	526,000	222,000
Total		\$ 3,943,000	\$ 879,000
Liability Derivatives:			
<i>Derivatives designated as hedging instruments:</i>			
Interest rate swap derivatives	Derivative liability short term	\$ (93,000)	\$ (335,000)
Interest rate swap derivatives	Derivative liability long term		
Total		\$ (93,000)	\$ (335,000)
<i>Derivatives not designated as hedging instruments:</i>			
Crude oil commodity contracts	Derivative liability short term	\$ (2,412,000)	\$ (1,953,000)
Crude oil commodity contracts	Derivative liability long term	(1,612,000)	(2,892,000)
Total		\$ (4,024,000)	\$ (4,845,000)
Total derivative instruments		\$ (174,000)	\$ (4,301,000)

Table of Contents

PrimeEnergy Corporation

Notes to Consolidated Financial Statements

March 31, 2010

Effect of derivative instruments on the consolidated statement of operations for the quarterly periods ended March 31, 2010 and 2009:

	Location of gain/loss reclassified from OCI into income	Amount of gain/loss reclassified from accumulated OCI into income	
		2010	2009
<i>Derivatives designated as cash-flow hedges</i>			
Interest rate swap derivatives	Interest expense	\$ (318,000)	\$ (108,000)
Crude oil commodity contracts	Oil and gas sales		1,227,000
		\$ (318,000)	\$ 1,119,000

	Location of gain/loss recognized in income	Amount of gain/loss recognized in income	
		2010	2009
<i>Derivatives not designated as cash-flow hedge instruments</i>			
Natural gas commodity contracts	Gain on derivative instruments	\$ 3,064,000	\$
Crude oil commodity contracts	Gain on derivative instruments	821,000	
Natural gas commodity contracts	Oil and gas sales	460,000	
Crude oil commodity contracts	Oil and gas sales	(7,000)	
		\$ 4,338,000	\$

(12) Earnings (Loss) Per Share:

Basic earnings (loss) per share are computed by dividing earnings (loss) available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflect per share amounts that would have resulted if dilutive potential common stock had been converted to common stock in gain periods. The following reconciles amounts reported in the financial statements:

	Three Months Ended March 31, 2010			Three Months Ended March 31, 2009		
	Net Income	Weighted Average Number of Shares Outstanding	Per Share Amount	Net Loss	Weighted Average Number of Shares Outstanding	Per Share Amount
Net income (loss) per common share	\$ 3,440,000	3,028,993	\$ 1.14	\$ (3,498,000)	3,044,745	\$ (1.15)
Effect of dilutive securities:						
Options (a)		739,725				
Diluted net income (loss) per common share	\$ 3,440,000	3,768,718	\$.91	\$ (3,498,000)	3,044,745	\$ (1.15)

Edgar Filing: PRIMEENERGY CORP - Form 10-Q

- (a) The dilutive effect of 767,500 outstanding stock purchase options is not considered for the three months ended March 31, 2009, due to the loss incurred for such period.

Table of Contents

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This discussion should be read in conjunction with the consolidated financial statements of the Company and notes thereto.

LIQUIDITY AND CAPITAL RESOURCES

Cash flow provided by operations for the three month period ended March 31, 2010 was \$10,670,000. Excluding the effects of significant unforeseen expenses or other income, our cash flow from operations fluctuates primarily because of variations in oil and gas production and prices or changes in working capital accounts. Our oil and gas production will vary based on actual well performance but may be curtailed due to factors beyond our control. Hurricanes in the Gulf of Mexico may shut down our production for the duration of the storm's presence in the Gulf or damage production facilities so that we cannot produce from a particular property for an extended amount of time. In addition, downstream activities on major pipelines in the Gulf of Mexico can also cause us to shut-in production for various lengths of time.

Our realized oil and gas prices vary due to world political events, supply and demand of products, product storage levels, and weather patterns. We sell the vast majority of our production at spot market prices. Accordingly, product price volatility will affect our cash flow from operations. To mitigate price volatility we sometimes lock in prices for some portion of our production through the use of financial instruments.

The Company's activities include development and exploratory drilling. The Company's strategy is to develop a balanced portfolio of drilling prospects that includes lower risk wells with a high probability of success and higher risk wells with greater economic potential. The Company plans on drilling in excess of 20 wells, mainly in the Permian Basin in West Texas.

The Company's strategy in 2010 is to continue to reduce its outstanding debt which decreased by approximately \$10,000,000 in 2009 and \$7,000,000 in the first quarter of 2010. This decreased leveraged position will better provide the Company the ability to participate in a significant acquisition, should the opportunity arise this year.

The Company has in place both a stock repurchase program and a limited partnership interest repurchase program. Spending under these programs in 2009 was \$565,000. The Company expects to continue spending under the programs in 2010. During the first quarter of 2010 the Company spent \$170,000 under these programs.

The Company currently maintains two credit facilities totaling \$360 million, with a combined current borrowing base of \$105.5 million. The bank reviews the borrowing base semi-annually and, at their discretion, may decrease or propose an increase to the borrowing base relative to a redetermined estimate of proved oil and gas reserves. Our oil and gas properties are pledged as collateral for the line of credit and we are subject to certain financial covenants defined in the agreement. We are currently in compliance with these financial covenants. If we do not comply with these covenants on a continuing basis, the lenders have the right to refuse to advance additional funds under the facility and/or declare all principal and interest immediately due and payable.

The Company's offshore subsidiary maintains a subordinated credit facility with a private lender controlled by a director of the Company. The facility provides availability of \$50 million and is secured by properties released by the bank and pledged under this agreement. The current advances under this credit facility are \$20 million due January 2012.

It is the goal of the Company to increase its oil and gas reserves and production through the acquisition and development of oil and gas properties. The Company also continues to explore and consider opportunities to further expand its oilfield servicing revenues through additional investment in field service equipment. However, the majority of the Company's capital spending is discretionary, and the ultimate level of expenditures will be dependent on the Company's assessment of the oil and gas business environment, the number and quality of oil and gas prospects available, the market for oilfield services, and oil and gas business opportunities in general.

Table of ContentsItem 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(CONTINUED)

RESULTS OF OPERATIONS

Revenues and net income during the three month period ended March 31, 2010, as compared to the same period in 2009 reflect the increased oil and gas sales, presented below, offset by depreciation and depletion of oil and gas properties. The table summarizes production volumes and average sales prices realized (including realized gains and losses from derivatives).

	Three Months Ended March 31,		
	2010	2009	Increase / (Decrease)
Barrels of Oil Produced	160,000	172,000	(12,000)
Average Price Received	\$ 75.06	\$ 44.10	\$ 30.96
Oil Revenue	\$ 12,010,000	\$ 7,575,000	\$ 4,435,000
Mcf of Gas Produced	1,538,000	1,871,000	(333,000)
Average Price Received	\$ 6.69	\$ 4.52	\$ 2.17
Gas Revenue	\$ 10,295,000	\$ 8,463,000	\$ 1,832,000
Total Oil & Gas Revenue	\$ 22,305,000	\$ 16,038,000	\$ 6,267,000

Oil and gas prices received excluding the impact of derivatives were:

	Three Months Ended March 31,		
	2010	2009	Increase / (Decrease)
Oil Price	\$ 75.11	\$ 36.96	\$ 38.15
Gas Price	\$ 6.39	\$ 4.52	\$ 1.87

The decrease in oil production reflects properties added during 2009 from our 2009 West Texas drilling program offset by the natural decline of existing properties. The decrease in gas production is primarily due to the natural decline of the offshore properties.

Lease operating expense for the three months of 2010 increased by \$642,000 or 7.8 % compared to 2009 due to increased production taxes related to higher commodity prices.

General and administrative expenses increased \$175,000 in the first three months of 2010 or 6.1% as compared to 2009 primarily due to increased rent and engineering expenses.

Field service income for the three months of 2010 decreased \$923,000 or 18.6% compared to 2009. Field service expense for the three month of 2010 decreased \$797,000 or 19.6% compared to 2009. These changes reflect decreased utilization and rates in South Texas and Oklahoma offset by increases in West Texas.

Depreciation, depletion and amortization expense decreased to \$9,638,000 in 2010 from \$11,768,000 in 2009 or 18.1%. This decrease is primarily related to the decrease in offshore production during the first quarter of 2010.

This Report contains forward-looking statements that are based on management's current expectations, estimates and projections. Words such as expects, anticipates, intends, plans, believes, projects and estimates, and variations of such words and similar expressions are intended such forward-looking statements. These statements constitute forward-looking statements within the meaning of Section 27A of the Securities

Edgar Filing: PRIMEENERGY CORP - Form 10-Q

Act of 1933, and are subject to the safe harbors created thereby. These statements are not guarantees of future performance and involve risks and uncertainties and are based on a number of assumptions that could ultimately prove inaccurate and, therefore, there can be no assurance that they will prove to be accurate. Actual results and outcomes may vary materially from what is expressed or forecast in such statements due to various risks and uncertainties. These risks and uncertainties include, among other things, the possibility of drilling cost overruns and technical difficulties, volatility of oil and gas prices, competition, risks inherent in the Company's oil and gas operations, the inexact nature of interpretation of seismic and other geological and geophysical data, imprecision of reserve estimates, and the Company's ability to replace and expand oil and gas reserves. Accordingly, stockholders and potential investors are cautioned that certain events or circumstances could cause actual results to differ materially from those projected.

Table of Contents

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is a smaller reporting company and no response is required pursuant to this Item.

Item 4. CONTROLS AND PROCEDURES

As of the end of the current reported period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rules 13a-15 and 15d-15 of the Securities Exchange Act of 1934 (the Exchange Act). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective with respect to the recording, processing, summarizing and reporting, within the time periods specified in the Commission's rules and forms, of information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act.

There were no significant changes in the Company's internal control over financial reporting that occurred during the first quarter of 2010 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

Not applicable.

Item 1A. RISK FACTORS

The Company is a smaller reporting company and no response is required pursuant to this Item.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

There were no sales of equity securities by the Company during the period covered by this report.

During the three months ended March 31, 2010, the Company purchased the following shares of common stock as treasury shares.

2010 Month	Number of Shares	Average Price Paid per share	Maximum Number of Shares that May Yet Be Purchased Under The Program at Month - End (1)
January	2,000	\$ 35.00	183,641
February	2,000	\$ 26.89	181,641
March	1,700	\$ 26.40	179,941
Total/Average	5,700	\$ 29.59	

(1) In December 1993, we announced that our board of directors authorized a stock repurchase program whereby we may purchase outstanding shares of our common stock from time-to-time, in open market transactions or negotiated sales. A total of 2,700,000 shares

Edgar Filing: PRIMEENERGY CORP - Form 10-Q

have been authorized, to date, under this program. Through March 31, 2010 we repurchased a total of 2,520,059 shares under this program for \$34,242,937 at an average price of \$13.59 per share. Additional purchases may occur as market conditions warrant. We expect future purchases will be funded with internally generated cash flow or from working capital.

Item 3. DEFAULTS UPON SENIOR SECURITIES
None

Item 4. RESERVED

Item 5. OTHER INFORMATION
None
