QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For quarterly period ended March 31, 2012

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 001-35021

EVANS BANCORP, INC.

(Exact name of registrant as specified in its charter)

Edgar Filing: EVANS BANCORP INC - Form 10-Q

New York
(State or other jurisdiction of
incorporation or organization)

16-1332767
(I.R.S. Employer
Identification No.)

14 -16 North Main Street,
Angola, New York
(Address of principal executive offices)

14006
(Zip Code)

(716) 926-2000

(Registrant's telephone number, including area code)

Not applicable

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if smaller reporting company) Smaller reporting company
Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date:

Common Stock, \$.50 par value: 4,135,586 shares as of April 25, 2012

PART 1 FINANCIAL INFORMATION

ITEM 1 FINANCIAL STATEMENTS

EVANS BANCORP, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

THREE MONTHS ENDED MARCH 31, 2012 AND 2011

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting and reporting policies followed by Evans Bancorp, Inc. (the Company), a financial holding company, and its two direct, wholly-owned subsidiaries: (i) Evans Bank, National Association (the Bank), and the Bank's subsidiaries, Evans National Leasing, Inc. (ENL), Evans National Holding Corp. (ENHC) and Suchak Data Systems, LLC (SDS); and (ii) Evans National Financial Services, LLC (ENFS), and ENFS's subsidiary, The Evans Agency, LLC (TEA) and TEA's subsidiaries, Frontier Claims Services, Inc. (FCS) and ENB Associates Inc. (ENBA), in the preparation of the accompanying interim unaudited consolidated financial statements conform with U.S. generally accepted accounting principles (GAAP) and with general practice within the industries in which it operates. Except as the context otherwise requires, the Company and its direct and indirect subsidiaries are collectively referred to in this report as the Company.

The accompanying consolidated financial statements are unaudited. In the opinion of management, all adjustments necessary for a fair presentation of the Company's financial position and results of operations for the interim periods have been made. Certain reclassifications have been made to the 2011 unaudited consolidated financial statements to conform to the presentation used in 2012.

The results of operations for the three month period ended March 31, 2012 are not necessarily indicative of the results to be expected for the full year. The accompanying unaudited consolidated financial statements should be read in conjunction with the Audited Consolidated Financial Statements and the Notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2011. The Company has evaluated subsequent events for potential recognition and/or disclosure through the date of filing.

Table of Contents**2. SECURITIES**

The amortized cost of securities and their approximate fair value at March 31, 2012 and December 31, 2011 were as follows:

Total securities	\$ 99,650	\$ 4,161	(\$ 19)	\$ 103,792

Available for sale securities with a total fair value of \$84.7 million and \$76.7 million at March 31, 2012 and December 31, 2011, respectively, were pledged as collateral to secure public deposits and for other purposes required or permitted by law.

Table of Contents

The Company uses the Federal Home Loan Bank of New York (FHLBNY) as its primary source of overnight funds and also has several long-term advances with FHLBNY. The Company had a total of \$22.0 million in borrowed funds with FHLBNY at March 31, 2012 and December 31, 2011, respectively. The Company has placed sufficient collateral in the form of residential and commercial real estate loans at FHLBNY that meet FHLB collateral requirements. As a member of the Federal Home Loan Bank (FHLB) System, the Bank is required to hold stock in FHLBNY. The Bank held \$1.8 million in FHLBNY stock as of March 31, 2012 and December 31, 2011, respectively, at fair value.

The scheduled maturities of debt and mortgage-backed securities at March 31, 2012 are summarized below. All maturity amounts are contractual maturities. Actual maturities may differ from contractual maturities because certain issuers have the right to call or prepay obligations with or without call premiums.

	Amortized cost	Estimated fair value
	(in thousands)	
Debt securities available for sale:		
Due in one year or less	\$ 17,572	\$ 17,599
Due after one year through five years	18,116	18,838
Due after five years through ten years	24,357	25,486
Due after ten years	9,443	10,322
	69,488	72,245
Mortgage-backed securities available for sale	35,224	36,412
Total available for sale securities	\$ 104,712	\$ 108,657
Debt securities held to maturity:		
Due in one year or less	\$ 2,665	\$ 2,657
Due after one year through five years	547	558
Due after five years through ten years	35	37
Due after ten years	588	595
Total held to maturity securities	\$ 3,835	\$ 3,847

Information regarding unrealized losses within the Company's available for sale securities at March 31, 2012 and December 31, 2011, is summarized below. The securities are primarily U.S. government-guaranteed agency securities or municipal securities. All unrealized losses are considered temporary and related to market interest rate fluctuations.

In regard to municipal securities, the Company's general investment policy is that in-state securities must be rated at least Moody's Baa (or equivalent) at the time of purchase. The Company reviews the ratings report and municipality financial statements and prepares a pre-purchase analysis report before the purchase of any municipal securities. Out-of-state issues must be rated by Moody's at least Aa (or equivalent) at the time of purchase. The Company did not own any out-of-state municipal bonds at March 31, 2012 or December 31, 2011. Bonds rated below A

Edgar Filing: EVANS BANCORP INC - Form 10-Q

are reviewed periodically to ensure their continued credit worthiness. While purchase of non-rated municipal securities is permitted under the Company's investment policy, such purchases are limited to bonds issued

Table of Contents

by municipalities in the Company's general market area. Those municipalities are typically customers of the Bank whose financial situation is familiar to management. The financial statements of the issuers of non-rated securities are reviewed by the Bank and a credit file of the issuers is kept on each non-rated municipal security with relevant financial information.

Although concerns have been raised in the marketplace recently about the health of municipal bonds, the Company has not experienced any credit troubles in this portfolio and does not believe any credit troubles are imminent. Aside from the non-rated municipal securities to local municipalities discussed above that are considered held-to-maturity, all of the Company's available-for-sale municipal bonds are investment-grade government obligation (G.O.) bonds. G.O. bonds are generally considered safer than revenue bonds because they are backed by the full faith and credit of the government while revenue bonds rely on the revenue produced by a particular project. All of the Company's municipal bonds are issued by municipalities in New York State. To the Company's knowledge, there has never been a default of a NY G.O. in the history of the state. The Company believes that its risk of loss on default of a G.O. municipal bond for the Company is relatively low. However, historical performance does not guarantee future performance.

Management has assessed the securities available for sale in an unrealized loss position at March 31, 2012 and December 31, 2011 and determined the decline in fair value below amortized cost to be temporary. In making this determination, management considered the period of time the securities were in a loss position, the percentage decline in comparison to the securities' amortized cost, and the financial condition of the issuer (primarily government or government-sponsored enterprises). In addition, management does not intend to sell these securities and it is not more likely than not that the Company will be required to sell these securities before recovery of their amortized cost. Management believes the decline in fair value is primarily related to market interest rate fluctuations and not to the credit deterioration of the individual issuers.

The Company has not recorded any other-than-temporary impairment charges in 2012 or 2011, with the gross unrealized losses at an immaterial level, amounting to less than 0.1% of the total fair value of the securities portfolio at March 31, 2012 and December 31, 2011. Nevertheless, it remains possible that there could be deterioration in the asset quality of the securities portfolio in the future. The credit worthiness of the Company's portfolio is largely reliant on the ability of U.S. government sponsored agencies such as FHLB, Federal National Mortgage Association (FNMA), Government National Mortgage Association (GNMA), and Federal Home Loan Mortgage Corporation (FHLMC), and municipalities throughout New York State to meet their obligations. In addition, dysfunctional markets could materially alter the liquidity, interest rate, and pricing risk of the portfolio. The relatively stable past performance is not a guarantee for similar performance of the Company's securities portfolio going forward.

3. FAIR VALUE MEASUREMENTS

The Company follows the provisions of ASC Topic 820, Fair Value Measurements and Disclosures. Those provisions relate to financial assets and liabilities carried at fair value and fair value disclosures related to financial assets and liabilities. ASC Topic 820 defines fair value and specifies a hierarchy of valuation techniques based on the nature of the inputs used to develop the fair value measures. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

There are three levels of inputs to fair value measurements:

Level 1, meaning the use of quoted prices for identical instruments in active markets;

Level 2, meaning the use of quoted prices for similar instruments in active markets or quoted prices for identical or similar instruments in markets that are not active or are directly or indirectly observable; and

Level 3, meaning the use of unobservable inputs.
Observable market data should be used when available.

Table of Contents**FINANCIAL INSTRUMENTS MEASURED AT FAIR VALUE ON A RECURRING BASIS**

The following table presents for each of the fair-value hierarchy levels as defined in this footnote, those financial instruments which are measured at fair value on a recurring basis at March 31, 2012 and December 31, 2011:

	Level 1	Level 2	Level 3	Fair Value
March 31, 2012				
Securities available-for-sale:				
U.S. Treasury and other U.S. government agencies	\$	\$ 40,257	\$	\$ 40,257
States and political subdivisions		31,988		31,988
Mortgage-backed securities		36,412		36,412
Mortgage servicing rights			454	454
December 31, 2011				
Securities available-for-sale:				
U.S. Treasury and other U.S. government agencies	\$	\$ 30,252	\$	\$ 30,252
States and political subdivisions		32,326		32,326
Mortgage-backed securities		37,403		37,403
Mortgage servicing rights			407	407
Securities available for sale				

Fair values for securities are determined using independent pricing services and market-participating brokers. The Company's independent pricing service utilizes evaluated pricing models that vary by asset class and incorporate available trade, bid and other market information for structured securities, cash flow and, when available, loan performance data. Because many fixed income securities do not trade on a daily basis, the evaluated pricing applications apply information as applicable through processes, such as benchmarking of like securities, sector groupings, and matrix pricing, to prepare evaluations. In addition, model processes, such as the Option Adjusted Spread model, are used to assess interest rate impact and develop prepayment scenarios. The models and the process take into account market convention. For each asset class, a team of evaluators gathers information from market sources and integrates relevant credit information, perceived market movements and sector news into the evaluated pricing applications and models. The company's service provider may occasionally determine that it does not have sufficient verifiable information to value a particular security. In these cases the Company will utilize valuations from another pricing service.

Management believes that it has a sufficient understanding of the third party service's valuation models, assumptions and inputs used in determining the fair value of securities to enable management to maintain an appropriate system of internal control. On a quarterly basis the Company reviews changes in the market value of its security portfolio. Individual changes in valuations are reviewed for consistency with general interest rate movements and any known credit concerns for specific securities. Additionally, on an annual basis the Company has its entire security portfolio priced by a second pricing service to determine consistency with another market evaluator. If, on the Company's review or in comparing with another servicer, a material difference between pricing evaluations were to exist, the Company may submit an inquiry to the servicing provider regarding the data used to value a particular security. If the Company determines it has market information that would support a different valuation than the initial evaluation it can submit a challenge for a change to that security's valuation. There were no material differences in valuations noted in 2012 or 2011.

Securities available for sale are classified as Level 2 in the fair value hierarchy as the valuation provided by the third-party provider uses observable market data.

Mortgage servicing rights

Mortgage servicing rights (MSRs) do not trade in an active, open market with readily observable prices. Accordingly, the Company obtains the fair value of the MSRs using a third-party pricing provider. The provider determines the fair value by discounting projected net servicing cash flows of the remaining servicing portfolio. The valuation model used by the provider considers market loan prepayment predictions and other economic factors which management considers to be significant unobservable inputs. The fair value of MSRs is mostly affected by changes in mortgage interest rates since rate changes cause the loan prepayment acceleration factors to increase or decrease. All assumptions are market driven. Management has a sufficient understanding of the third party service's valuation models, assumptions and inputs used in determining the fair value of MSRs to enable management to maintain an appropriate system of internal control. Mortgage servicing rights are classified within Level 3 of the fair value hierarchy as the valuation is model driven and primarily based on unobservable inputs.

Table of Contents

The following table summarizes the changes in fair value for mortgage servicing rights during the three month periods ended March 31, 2012 and 2011, respectively:

	Three months ended March 31,	
	2012	2011
Beginning balance, December 31	\$ 407	\$ 388
(Losses) gains included in earnings	(7)	4
Additions from loan sales	54	43
Ending balance, March 31	\$ 454	\$ 435

Quantitative information about the significant unobservable inputs used in the fair value measurement of MSRs at the respective dates is as follows:

	3/31/2012	3/31/2011
Servicing fees	0.25%	0.25%
Discount rate	10.09%	10.13%
Prepayment rate (CPR)	15.48%	11.20%

FINANCIAL INSTRUMENTS MEASURED AT FAIR VALUE ON A NONRECURRING BASIS

The Company is required, on a nonrecurring basis, to adjust the carrying value of certain assets or provide valuation allowances related to certain assets using fair value measurements. The following table presents for each of the fair-value hierarchy levels as defined in this footnote, those financial instruments which are measured at fair value on a nonrecurring basis at March 31, 2012 and December 31, 2011:

	Level 1	Level 2	Level 3	Fair Value
March 31, 2012				
Impaired loans	\$	\$	\$ 11,344	\$ 11,344
December 31, 2011				
Impaired loans	\$	\$	\$ 10,311	\$ 10,311

Impaired loans

The Company evaluates and values impaired loans at the time the loan is identified as impaired, and the fair values of such loans are estimated using Level 3 inputs in the fair value hierarchy. Each loan's collateral has a unique appraisal and management's discount of the value is based on factors unique to each impaired loan. The significant unobservable input in determining the fair value is management's subjective discount on appraisals of the collateral securing the loan, which ranges from 10%-50%. Collateral may consist of real estate and/or business assets including equipment, inventory and/or accounts receivable and the value of these assets is determined based on appraisals by qualified licensed appraisers hired by the Company. Appraised and reported values may be discounted based on management's historical knowledge, changes in market conditions from the time of valuation, estimated costs to sell, and/or management's expertise and knowledge of the client and the client's business.

The Company has an appraisal policy in which appraisals are obtained upon a commercial loan being downgraded on the Company internal loan rating scale to a 5 (special mention) or a 6 (substandard) depending on the amount of the loan, the type of loan and the type of collateral. All impaired commercial loans are either graded a 6 or 7 on the internal loan rating scale. For consumer loans, the Company obtains appraisals when a loan becomes 90 days past due or is determined to be impaired, whichever occurs first. Subsequent to the downgrade or reaching 90 days past due, if the loan remains outstanding and impaired for at least one year more, management may require another follow-up appraisal. Between receipts of updated appraisals, if necessary, management may perform an internal valuation based on any known changing conditions in the marketplace such as sales of similar properties, a change

Table of Contents

in the condition of the collateral, or feedback from local appraisers. Impaired loans had a gross value of \$13.0 million, with a valuation allowance of \$1.7 million, at March 31, 2012, compared to a gross value for impaired loans of \$11.9 million, with a valuation allowance of \$1.6 million, at December 31, 2011.

FAIR VALUE OF FINANCIAL INSTRUMENTS

At March 31, 2012 and December 31, 2011, the estimated fair values of the Company's financial instruments, including those that are not measured and reported at fair value on a recurring basis or nonrecurring basis, were as follows:

	March 31, 2012		December 31, 2011	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(in thousands)		(in thousands)	
Financial assets:				
Level 1:				
Cash and cash equivalents	\$ 43,868	\$ 43,868	\$ 14,678	\$ 14,678
Level 2:				
Available for sale securities	108,657	108,657	99,981	99,981
FHLB and FRB stock	3,255	3,255	3,255	3,255
Level 3:				
Held to maturity securities	3,835	3,847	3,802	3,811
Loans and leases, net	568,910	600,061	571,910	602,534
Mortgage servicing rights	454	454	407	407
Financial liabilities:				
Level 1:				
Demand deposits	\$ 114,423	\$ 114,423	\$ 118,037	\$ 118,037
NOW deposits	62,077	62,077	50,761	50,761
Regular savings deposits	334,010	334,010	313,777	313,777
Muni-vest deposits	29,542	29,542	20,161	20,161
Junior subordinated debentures	11,330	11,330	11,330	11,330
Commitments to extend credit	111	111	161	161
Securities sold under agreement to repurchase	8,680	8,680	9,010	9,010
Level 2:				
Other borrowed funds	22,000	22,860	22,000	22,988
Level 3:				
Time deposits	109,629	113,089	113,467	116,666

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practical to estimate that value.

Cash and Cash Equivalents. For these short-term instruments, the carrying amount is a reasonable estimate of fair value. Cash and Cash Equivalents includes interest-bearing deposits at other banks.

FHLB and FRB stock. The carrying value of FHLB and FRB stock approximate fair value.

Securities held to maturity. The Company holds certain municipal bonds as held-to-maturity. These bonds are generally small in dollar amount and are issued only by certain local municipalities within the Company's market area. The original terms are negotiated directly and on an individual basis consistent with our loan and credit guidelines. These bonds are not traded on the open market and management intends to hold the bonds to maturity. The fair value of held-to-maturity securities is estimated by discounting the future cash flows using the current rates at which similar agreements would be made with municipalities with similar credit ratings and for the same remaining maturities.

Table of Contents

Loans and Leases, net. The fair value of fixed rate loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities, net of the appropriate portion of the allowance for loan losses. For variable rate loans, the carrying amount is a reasonable estimate of fair value. This fair value calculation is not necessarily indicative of the exit price, as defined in ASC 820.

Deposits. The fair value of demand deposits, NOW accounts, muni-vest accounts and regular savings accounts is the amount payable on demand at the reporting date. The fair value of time deposits is estimated using the rates currently offered for deposits of similar remaining maturities.

Junior Subordinated Debentures. The carrying amount of Junior Subordinated Debentures is a reasonable estimate of fair value due to the fact that they bear a floating interest rate that adjusts on a quarterly basis.

Commitments to extend credit and standby letters of credit. As described in Note 8 - Contingent Liabilities and Commitments to these Unaudited Consolidated Financial Statements, the Company was a party to financial instruments with off-balance sheet risk at March 31, 2012 and December 31, 2011. Such financial instruments consist of commitments to extend permanent financing and letters of credit. If the options are exercised by the prospective borrowers, these financial instruments will become interest-earning assets of the Company. If the options expire, the Company retains any fees paid by the counterparty in order to obtain the commitment or guarantee. The fees collected for these commitments are recorded as unearned commitment fees in Other Liabilities. The carrying value approximates the fair value.

Securities Sold Under Agreement to Repurchase. The fair value of the securities sold under agreement to repurchase approximates its carrying value.

Other Borrowed Funds. The fair value of the short-term portion of other borrowed funds approximates its carrying value. The fair value of the long-term portion of other borrowed funds is estimated using a discounted cash flow analysis based on the Company's current incremental borrowing rates for similar types of borrowing arrangements.

4. LOANS, LEASES, AND THE ALLOWANCE FOR LOAN AND LEASE LOSSES

Loan and Lease Portfolio Composition

The following table presents selected information on the composition of the Company's loan and lease portfolio as of the dates indicated:

	March 31, 2012	December 31, 2011
	(in thousands)	
Mortgage loans on real estate:		
Residential Mortgages	\$ 71,702	\$ 73,579
Commercial and multi-family	311,105	306,683
Construction-Residential	2,524	2,392
Construction-Commercial	29,389	27,887
Home equities	55,041	54,673
Total real estate loans	469,761	465,214
Direct financing leases	4,512	6,021
Commercial and industrial loans	103,107	109,513
Consumer loans	1,456	1,677
Other	490	586
Net deferred loan origination costs	374	394
Total gross loans	579,700	583,405
Allowance for loan losses	(10,790)	(11,495)
Loans, net	\$ 568,910	\$ 571,910

Table of Contents

The Bank sells certain fixed rate residential mortgages to FNMA, while maintaining the servicing rights for those mortgages. During the three month period ended March 31, 2012, the Bank sold mortgages to FNMA totaling \$6.2 million, as compared with \$7.3 million sold during the three month period ended March 31, 2011. At March 31, 2012, the Bank had a loan servicing portfolio principal balance of \$67.0 million upon which it earns servicing fees, as compared with \$62.4 million at December 31, 2011. The value of the mortgage servicing rights for that portfolio was \$0.5 million at March 31, 2012 and \$0.4 million at December 31, 2011. Residential mortgage loans held-for-sale were \$1.4 million at March 31, 2012, compared with \$3.6 million at December 31, 2011. The Company has never been contacted by FNMA to repurchase any loans due to improper documentation or fraud.

As noted in Note 1, these financial statements should be read in conjunction with the Audited Consolidated Financial Statements and the Notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2011. Disclosures related to the basis for accounting for loans and leases, the method for recognizing interest income on loans and leases, the policy for placing loans and leases on nonaccrual status and the subsequent recording of payments and resuming accrual of interest, the policy for determining past due status, a description of the Company's accounting policies and methodology used to estimate the allowance for loan and lease losses, the policy for charging off loans and leases, the accounting policies for impaired loans, and more descriptive information on the Company's credit risk ratings are all contained in the Notes to the Audited Consolidated Financial Statements in the Annual Report on Form 10-K for the year ended December 31, 2011. Unless otherwise noted in this Form 10-Q, the policies and methodology described in the Annual Report for the year ended December 31, 2011 are consistent with those utilized in the three months ended March 31, 2012.

Credit Quality Indicators

The Bank monitors the credit risk in its loan portfolio by reviewing certain credit quality indicators (CQI). The primary CQI for its commercial mortgage and C&I portfolios is the individual loan's credit risk rating. The following list provides a description of the credit risk ratings that are used internally by the Bank when assessing the adequacy of its allowance for loan and lease losses:

1-3-Pass

4-Watch

5-O.A.E.M. (Other Assets Especially Mentioned) or Special Mention

6-Substandard

7-Doubtful

8-Loss

The Company's consumer loans, including residential mortgages and home equities, are not individually risk rated or reviewed in the Company's loan review process. Consumers are not required to provide the Company with updated financial information as is a commercial customer. Consumer loans also carry smaller balances. Given the lack of updated information since the initial underwriting of the loan and small size of individual loans, the Company uses delinquency status as the credit quality indicator for consumer loans.

Table of Contents

The following tables provide data, at the class level, of credit quality indicators of certain loans and leases for the dates specified:

Note: Loan and lease balances do not include \$264 thousand in net deferred loan and lease origination costs as of March 31, 2011.

In the first quarter of 2012, the Company changed its methodology for reserving for non-accruing residential mortgages and home equities. Previously, estimated loss percentages were applied to pools of non-accruing residential mortgages and home equity loans. The Company now evaluates required loss reserves on an individual loan basis. This change resulted from the Company's successful efforts to obtain more information about the financial status of borrowers and the fair value of loan collateral. The change from reserving for non-accruing residential mortgages and home equities on an individual basis versus a pooled approach resulted in a reduction of allowance for loan and lease losses of \$0.1 million.

There were no other changes in the Company's allowance for loan and lease loss methodology in the first quarter of 2012.

Table of Contents**Impaired Loans and Leases**

The following tables provide data, at the class level, of impaired loans and leases as of the dates indicated:

	Recorded Investment	Unpaid Principal Balance	At March 31, 2012 Related Allowance	Average Recorded Investment (in thousands)	Interest Income Foregone	Interest Income Recognized

Total non-performing loans and leases to total assets	1.68%	2.05%
Total non-performing loans and leases to total loans and leases	2.25%	2.60%

Table of Contents**Troubled debt restructurings**

The Company had \$8.1 million in loans and leases that were restructured in a troubled debt restructuring (TDR) at March 31, 2012, compared with \$7.7 million at December 31, 2011. \$7.4 million and \$7.1 million of those balances were in non-accrual status at March 31, 2012 and December 31, 2011, respectively. Any TDR that is placed on non-accrual is not reverted back to accruing status until the borrower makes timely payments as contracted for at least six months. Those loans and leases that are in accruing status have shown evidence of performance for at least six months as of March 31, 2012 and December 31, 2011. None of the restructurings were made under a government assistance program. Two commercial mortgages with a combined balance of \$0.3 million are covered under the Bank's loss-sharing arrangement with the FDIC. These restructurings were allowed in an effort to maximize the Company's ability to collect on loans and leases where borrowers were experiencing financial difficulty. Modifications made to loans in a troubled debt restructuring did not have a material impact on the Company's net income for the quarters ended March 31, 2012 and 2011. The reserve for an impaired TDR is based upon the present value of the future expected cash flows discounted at the loan's original effective rate or upon the fair value of the collateral less costs to sell, if the loan is deemed collateral dependent. As of March 31, 2012, there were no commitments to lend additional funds to debtors owing loans or leases whose terms have been modified in TDRs. The following tables summarize the loans and leases that were classified as troubled debt restructurings as of the dates indicated:

	March 31, 2012 (\$ in thousands)			
	Total	Nonaccruing	Accruing	Related Allowance
Commercial and industrial	\$ 1,667	\$ 1,600	\$ 67	\$ 538
Residential real estate:				
Residential				
Construction				
Commercial real estate:				
Commercial and multi family	5,469	5,469		438
Construction				
Home equities	327		327	
Direct financing leases	606	369	237	264
Consumer loans

Other				
Total troubled restructured loans and leases	\$ 7,731	\$ 7,059	\$ 672	\$ 1,102

Table of Contents

The following table shows the data for TDR activity for the three month period ended March 31, 2012:

		March 31, 2012 (\$ in thousands)	
	Number of Contracts	Pre- Modification Outstanding Recorded Investment	Post- Modification Outstanding Recorded Investment
Troubled Debt Restructurings			
Commercial and Industrial	2	\$ 256	\$ 256
Residential Real Estate:			
Residential			
Construction			
Commercial Real Estate:			
Commercial and Multi-Family	1	85	85
Construction			
Home Equities			
Direct financing leases			
Consumer loans			
Other			

The general practice of the Bank is to work with borrowers so that they are able to pay back their loan or lease in full. If a borrower continues to be delinquent or cannot meet the terms of a TDR and the loan or lease is determined to be uncollectible, the loan or lease will be charged off. The following table presents loans and leases which were classified as TDR s during the previous 12 months which have defaulted during the three month period ended March 31, 2012:

	Three Months Ended March 31, 2012 (\$ in thousands)	
Troubled Debt Restructurings	Number of Contracts	Recorded Investment
That Subsequently Defaulted		
Commercial and Industrial	4	\$ 1,272
Residential Real Estate:		
Residential		
Construction		
Commercial Real Estate:		
Commercial and Multi-Family	6	4,289
Construction		
Home Equities		
Direct financing leases		

Covered Loans and the Related Allowance

On July 24, 2009, the Bank entered into a definitive purchase and assumption agreement with the FDIC under which the Bank assumed approximately \$51.0 million in liabilities, consisting almost entirely of deposits, and purchased substantially all of the assets of Waterford Village Bank. The loan portfolio acquired in the transaction was \$42.0 million. The loans acquired in that acquisition are referred to as covered loans because they are covered by a loss sharing agreement with the FDIC. The agreement calls for the FDIC to reimburse the Bank for 80% of losses

Table of Contents

up to \$5.6 million and to reimburse the Bank for 95% of losses beyond that threshold. At acquisition, the Company marked the covered loan portfolio to its market value and the allowance for loan and lease losses related to the covered loans was zero. Since acquisition, management has provisioned for any incremental increases in estimated credit losses due to deterioration in specific loans or increased risk factors on pools of loans. As a result of the FDIC guarantees, the provision for loan and lease losses and the allowance for loan and lease losses at March 31, 2012 and December 31, 2011 are presented net of FDIC guarantees related to covered loans. The following table depicts the allowance for loan and lease losses related to covered loans as of March 31, 2012 and December 31, 2011:

	March 31, 2012	December 31, 2011
	(in thousands)	
Covered loans	\$ 25,483	\$ 26,429
Incremental estimated credit losses since acquisition	702	506
FDIC guarantee	(562)	(405)
Allowance for loan and lease losses	\$ 140	\$ 101

5. PER SHARE DATA

The common stock per share information is based upon the weighted average number of shares outstanding during each period. The Company had 4,674 and 10,661 dilutive shares for the three month periods ended March 31, 2012 and 2011, respectively.

Potential common shares that would have the effect of increasing diluted earnings per share are considered to be anti-dilutive and not included in calculating diluted earnings per share. For the three months periods ended March 31, 2012 and 2011, there were approximately 203,394 and 153,150 shares, respectively, that were not included in calculating diluted earnings per share because their effect was anti-dilutive.

6. OTHER COMPREHENSIVE INCOME

The following tables display the components of other comprehensive income (loss):

	Three months ended March 31, 2012		
	Before-Tax Amount	Income Tax (Provision) Benefit	Net-of-Tax Amount
Unrealized loss on investment securities	(\$ 188)	\$ 73	(\$ 115)
Defined benefit pension plans:			
Amortization of prior service cost	22	(8)	14
Amortization of actuarial loss	43	(17)	26
Total	65	(25)	40
Other Comprehensive Loss	(\$ 123)	\$ 48	(\$ 75)

Table of Contents

	Three months ended March 31, 2011		
	Before-Tax Amount	Income Tax (Provision) Benefit	Net-of-Tax Amount
Unrealized gain on investment securities	\$ 202	(\$ 78)	\$ 124
Defined benefit pension plans:			
Amortization of prior service cost	22	(8)	14
Amortization of actuarial loss	10	(4)	6
Total	32	(12)	20
Other Comprehensive Income	\$ 234	(\$ 90)	\$ 144

7. SEGMENT INFORMATION

The Company is comprised of two primary business segments, banking and insurance agency activities. The following tables set forth information regarding these segments for the three month periods ended March 31, 2012 and 2011.

	Three Months Ended March 31, 2012		
	(in thousands)		
	Banking Activities	Insurance Agency Activities	Total
Net interest income (expense)	\$ 6,883	(\$ 31)	\$ 6,852
Provision for loan and lease losses	(249)		(249)
Net interest income (expense) after provision for loan and lease losses	7,132	(31)	7,101
Non-interest income	1,344		1,344
Insurance service and fees		1,945	1,945
Non-interest expense	5,668	1,241	6,909
Income before income taxes	2,808	673	3,481
Income tax provision	842	260	1,102
Net income	\$ 1,966	\$ 413	\$ 2,379

Table of Contents

	Three Months Ended March 31, 2011		
	(in thousands)		
	Insurance		
	Banking Activities	Agency Activities	Total
Net interest income (expense)	\$ 6,327	(\$ 30)	\$ 6,297
Provision for loan and lease losses	488		488
Net interest income (expense) after provision for loan and lease losses	5,839	(30)	5,809
Non-interest income	1,372		1,372
Insurance service and fees		2,089	2,089
Non-interest expense	5,282	1,323	6,605
Income before income taxes	1,929	736	2,665
Income tax provision	506	284	790
Net income	\$ 1,423	\$ 452	\$ 1,875

8. CONTINGENT LIABILITIES AND COMMITMENTS

The unaudited consolidated financial statements do not reflect various commitments and contingent liabilities, which arise in the normal course of business, and which involve elements of credit risk, interest rate risk and liquidity risk. These commitments and contingent liabilities consist of commitments to extend credit and standby letters of credit. A summary of the Bank's commitments and contingent liabilities is as follows:

	March 31, 2012	December 31, 2011
	(in thousands)	
Commitments to extend credit	\$ 144,337	\$ 134,204
Standby letters of credit	3,352	3,429
Total	\$ 147,689	\$ 137,633

Commitments to extend credit and standby letters of credit include some exposure to credit loss in the event of nonperformance of the customer. The Bank's credit policies and procedures for credit commitments and financial guarantees are the same as those for extensions of credit that are recorded on the Company's unaudited consolidated balance sheets. Because these instruments have fixed maturity dates, and because they may expire without being drawn upon, they do not necessarily represent cash requirements of the Bank. The Bank has not incurred any losses on its commitments and has not recorded a reserve for its commitments during the past two years.

Certain lending commitments for construction residential mortgage loans are considered derivative instruments under the guidelines of GAAP. The changes in the fair value of these commitments, due to interest rate risk, are not recorded on the consolidated balance sheets as the fair value of these derivatives is not considered material.

The Company is subject to possible litigation proceedings in the normal course of business. As of March 31, 2012 and December 31, 2011, there were no claims pending against the Company that management considered material.

Table of Contents**9. NET PERIODIC BENEFIT COSTS**

On January 31, 2008, the Bank froze its defined benefit pension plan. The plan covered substantially all Company employees. The plan provides benefits that are based on the employees' compensation and years of service. Under the freeze, eligible employees will receive at retirement the benefits already earned through January 31, 2008, but have not accrued any additional benefits since then. As a result, service cost is no longer incurred.

The Bank used an actuarial method of amortizing prior service cost and unrecognized net gains or losses which result from actual expense and assumptions being different than those that are projected. The amortization method the Bank used recognized the prior service cost and net gains or losses over the average remaining service period of active employees.

The Bank also maintains a nonqualified supplemental executive retirement plan covering certain members of the Company's senior management. The Bank uses an actuarial method of amortizing unrecognized net gains or losses which result from actual expense and assumptions being different than those that are projected. The amortization method the Bank uses recognizes the net gains or losses over the average remaining service period of active employees.

The Bank intends to contribute \$250 thousand to the defined benefit pension plan in the second quarter of 2012.

The following table presents the net periodic cost for the Bank's defined benefit pension plan and supplemental executive retirement plan for the three month periods ended March 31, 2012 and 2011:

	Three months ended March 31, (in thousands)			
	Pension Benefits		Supplemental Executive Retirement Plan	
	2012	2011	2012	2011
Service cost	\$	\$	\$ 45	\$ 45
Interest cost	53	54	38	47
Expected return on plan assets	(57)	(57)		
Amortization of prior service cost			22	22
Amortization of the net loss	16	7	27	3
Net periodic cost	\$ 12	\$ 4	\$ 132	\$ 117

10. RECENT ACCOUNTING PRONOUNCEMENTS

Accounting Standards Update (ASU) 2011-03, *Reconsideration of Effective Control for Repurchase Agreements*. This ASU relates to accounting for repurchase agreements (repos) and other agreements that both entitle and obligate a transferor to repurchase or redeem financial assets before their maturity. During the global economic crisis, capital market participants questioned the necessity and usefulness of the collateral maintenance guidance for the transferor's ability criterion when determining whether a repo should be accounted for as a sale or as a secured borrowing. The amendments in this ASU remove from the assessment of effective control (1) the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee, and (2) the collateral maintenance implementation guidance related to that criterion. The new guidance is effective for interim and annual periods beginning after December 15, 2011. The Company adopted this ASU effective January 1, 2012, which did not have a significant impact on the Company's repo accounting.

Table of Contents

ASU 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and International Financial Reporting Standards (IFRS)*. The new standard was issued to provide largely identical guidance about fair value measurement and disclosure requirements for IFRS and U.S. GAAP. The new guidance clarifies that the application of the highest and best use and valuation premise concepts are not relevant when measuring the fair value of financial assets or liabilities. This ASU also requires new and enhanced disclosures on the quantification and valuation process for significant unobservable inputs, transfers between Levels 1 and 2 and the categorization of all fair value measurements in the fair value hierarchy, even when those measurements are only for disclosure purposes. The Company adopted this ASU effective January 1, 2012. The enhanced disclosures are at Note 3, Fair Value Measurements.

ASU 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*. The objective of this ASU is to improve the comparability, consistency, and transparency of financial reporting and to increase the prominence of items reported in other comprehensive income. To increase the prominence of items reported in other comprehensive income and to facilitate the convergence of U.S. GAAP and IFRS, the Financial Accounting Standards Board (FASB) decided to eliminate the option to present components of other comprehensive income as part of the statement of changes in shareholders' equity. The amendments require that all non-owner changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In the two-statement approach, the first statement should present total net income and its components followed consecutively by a second statement that should present total other comprehensive income, the components of other comprehensive income, and the total of comprehensive income. The amendments in this ASU will be applied retrospectively. The amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. In this interim period ended March 31, 2012, the Company has adopted this ASU and elected to use the two-statement approach.

ASU No. 2011-08, *Intangibles-Goodwill and Other (Topic 350): Testing Goodwill for Impairment*. This ASU permits an entity to make a qualitative assessment of whether it is more likely than not that a reporting unit's fair value is less than its carrying amount before applying the two-step goodwill impairment test. If an entity concludes it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, it need not perform the two-step impairment test. The ASU is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The Company adopted this ASU effective January 1, 2012. The Company will evaluate the need for a two-step goodwill impairment test each period subsequent to adoption. The Company typically performs its goodwill impairment test as of December 31st on an annual basis. As there were no triggering events in the quarter ended March 31, 2012, management did not test goodwill for impairment. The Company does not expect adoption of this ASU to have a material effect on its financial statements.

ASU No. 2011-12, *Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05*. ASU No. 2011-12 defers the effective date of the requirement to present separate line items on the income statement for reclassification adjustments of items out of accumulated other comprehensive income into net income for all periods presented. The ASU does not change the other requirements of FASB ASU No. 2011-05, *Presentation of Comprehensive Income*. Entities are still required to present reclassification adjustments within other comprehensive income either on the face of the statement that reports other comprehensive income or in the notes to the financial statements. The requirement to present comprehensive income in either a single continuous statement or two consecutive condensed statements remains for both annual and interim reporting. The deferral of the requirement for the presentation of reclassification adjustments is intended to be temporary until the FASB reconsiders the operational concerns and needs of financial statement users.

The Company adopted the amendments in this Update at the same time as ASU 2011-05, which is effective beginning in the interim period ended March 31, 2012. As the Company had no reclassification adjustments within other comprehensive income, this Update had no impact on its financial statements.

Table of Contents

ITEM 2 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Quarterly Report on Form 10-Q may contain certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act), that involve substantial risks and uncertainties. When used in this report, or in the documents incorporated by reference herein, the words anticipate, believe, estimate, expect, intend, may, plan, seek, and similar expressions identify such forward-looking statements. These forward-looking statements include statements regarding the Company's business plans, prospects, growth and operating strategies, statements regarding the asset quality of the Company's loan and investment portfolios, and estimates of the Company's risks and future costs and benefits.

These forward-looking statements are based largely on the expectations of the Company's management and are subject to a number of risks and uncertainties, including but not limited to general economic conditions, either nationally or in the Company's market areas, that are worse than expected; increased competition among depository or other financial institutions; inflation and changes in the interest rate environment that reduce the Company's margins or reduce the fair value of financial instruments; changes in laws or government regulations affecting financial institutions, including changes in regulatory fees and capital requirements; the Company's ability to enter new markets successfully and capitalize on growth opportunities; the Company's ability to successfully integrate acquired entities; changes in accounting pronouncements and practices, as adopted by financial institution regulatory agencies, the Financial Accounting Standards Board and the Public Company Accounting Oversight Board; changes in consumer spending, borrowing and saving habits; changes in the Company's organization, compensation and benefit plans; and other factors discussed elsewhere in this Quarterly Report on Form 10-Q, as well as in the Company's periodic reports filed with the SEC, in particular the Risk Factors discussed in Item 1A of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2011. Many of these factors are beyond the Company's control and are difficult to predict.

Because of these and other uncertainties, the Company's actual results, performance or achievements could differ materially from those contemplated, expressed or implied by the forward-looking statements contained herein. Forward-looking statements speak only as of the date they are made. The Company undertakes no obligation to publicly update or revise forward-looking information, whether as a result of new, updated information, future events or otherwise.

APPLICATION OF CRITICAL ACCOUNTING ESTIMATES

The Company's Unaudited Consolidated Financial Statements included in this Quarterly Report on Form 10-Q are prepared in accordance with U.S. GAAP and follow general practices within the industries in which it operates. Application of these principles requires management to make estimates, assumptions and judgments that affect the amounts reported in the Company's Unaudited Consolidated Financial Statements and Notes. These estimates, assumptions and judgments are based on information available as of the date of the Unaudited Consolidated Financial Statements. Accordingly, as this information changes, the Unaudited Consolidated Financial Statements could reflect different estimates, assumptions and judgments. Certain policies inherently have a greater reliance on the use of estimates, assumptions and judgments, and as such, have a greater possibility of producing results that could be materially different than originally reported. Estimates, assumptions and judgments are necessary when assets and liabilities are required to be recorded at fair value, when a decline in the value of an asset not carried on the financial statements at fair value warrants an impairment write-down or valuation reserve to be established, or when an asset or liability needs to be recorded contingent upon a future event. Carrying assets and liabilities at fair value inherently results in more financial statement volatility. The fair values and the information used to record valuation adjustments for certain assets and liabilities are based either on quoted market prices or are provided by other third-party sources, when available. When third-party information is not available, valuation adjustments are estimated in good faith by management primarily through the use of internal cash flow modeling techniques. Refer to Note 3 Fair Value Measurements to the Company's Unaudited Consolidated Financial Statements included in Item 1 of this Quarterly Report on Form 10-Q for further detail on fair value measurement.

Significant accounting policies followed by the Company are presented in Note 1 Organization and Summary of Significant Accounting Policies to the Audited Consolidated Financial Statements included in Item 8 in its Annual

Table of Contents

Report on Form 10-K for the year ended December 31, 2011. These policies, along with the disclosures presented in the other Notes to the Company's Audited Consolidated Financial Statements contained in its Annual Report on Form 10-K and in this financial review, provide information on how significant assets and liabilities are presented in the Company's Unaudited Consolidated Financial Statements and how those values are determined.

Based on the valuation techniques used and the sensitivity of financial statement amounts to the methods, assumptions and estimates underlying those amounts, management has identified the determination of the allowance for loan and lease losses and valuation of goodwill to be the accounting areas that require the most subjective or complex judgments, and as such, could be most subject to revision as new information becomes available.

Allowance for Loan and Lease Losses

The allowance for loan and lease losses represents management's estimate of probable losses in the Company's loan and lease portfolio. Determining the amount of the allowance for loan and lease losses is considered a critical accounting estimate because it requires significant judgment on the part of management and the use of estimates related to the amount and timing of expected future cash flows on impaired loans and leases, estimated losses on pools of homogeneous loans and leases based on historical loss experience and consideration of current economic trends and conditions, all of which may be susceptible to significant change. The loan and lease portfolio also represents the largest asset type on the Company's Unaudited Consolidated Balance Sheets. Note 1 to the Audited Consolidated Financial Statements included in Item 8 in the Company's Annual Report on Form 10-K for the year ended December 31, 2011, describes the methodology used to determine the allowance for loan and lease losses.

Goodwill

The amount of goodwill reflected in the Company's Unaudited Consolidated Financial Statements is required to be tested by management for impairment on at least an annual basis. The test for impairment of goodwill on the identified reporting unit is considered a critical accounting estimate because it requires judgment on the part of management and the use of estimates related to the growth assumptions and market multiples used in the valuation model. The goodwill impairment testing is typically performed annually on December 31st. No impairment charges were incurred in the most recent test and the fair value of the tested reporting unit substantially exceeded its fair value.

ANALYSIS OF FINANCIAL CONDITION

Loan and Lease Activity

Total loans and leases declined to \$579.7 million at March 31, 2012, reflecting a \$3.7 million or 0.6% decrease from December 31, 2011. The national direct financing lease portfolio declined \$1.5 million during the first quarter to \$4.5 million at March 31, 2012 as the Company ceased lease originations in the second quarter of 2009 and is winding down the portfolio and exiting this business line.

Core loans, defined as total loans less leases, were \$575.2 million at March 31, 2012, a \$2.2 million, or 0.4% decrease from \$577.4 million at December 31, 2011. The large amount of loans closed in the fourth quarter of 2011 left the Company's loan pipeline relatively lighter to start 2012. Average net loans and leases increased \$11.0 million, or 1.9%, from \$557.9 million in the fourth quarter of 2011 to \$568.9 million in the first quarter of 2012. Compared with gross core loan balances of \$519.2 million at March 31, 2011, the growth rate over the past twelve months has been 10.8%.

Loans secured by real estate were \$469.8 million at March 31, 2012, an increase of \$4.6 million or 1.0% from December 31, 2011. The strongest growth was in commercial and multi-family real estate loans, which increased \$4.4 million or 1.4% in the first quarter of 2012. Commercial real estate lending has long been a strength of the Bank and its loan officers and the historical strong performance continued in the first quarter of 2012.

Residential mortgages decreased \$1.9 million from \$73.6 million at December 31, 2011 to \$71.7 million at March 31, 2012. The Company has sold the majority of its originated residential mortgage loans as long-term fixed rate mortgage loan rates remain near all-time historic lows. This, along with prepayments from existing customers re-financing their homes, has resulted in the decrease in residential mortgage balances in the first quarter of 2012.

Table of Contents

Residential mortgage originations declined to \$7.3 million in originations in the 2012 first quarter, compared with \$9.0 million in last year's first quarter as the Company was less aggressive in pricing its mortgage products in this year's first quarter.

The Bank sells certain fixed rate residential mortgages to FNMA, while maintaining the servicing rights for those mortgages. During the three month period ended March 31, 2012, the Bank sold mortgages to FNMA totaling \$6.2 million, as compared with \$7.3 million sold during the three month period ended March 31, 2011. At March 31, 2012, the Bank had a loan servicing portfolio principal balance of \$67.0 million upon which it earns servicing fees, as compared with \$62.4 million at December 31, 2011. The value of the mortgage servicing rights for that portfolio was \$0.5 million at March 31, 2012 and \$0.4 million at December 31, 2011. Residential mortgage loans held-for-sale were \$1.4 million at March 31, 2012, compared with \$3.6 million at December 31, 2011. The Company has never been contacted by FNMA to repurchase any loans due to improper documentation or fraud.

The Company continues to focus on commercial and industrial (C&I) lending as a way to diversify its loan portfolio, which has historically experienced strong growth rates in real estate loans. However, the Company faces the headwinds of a low growth economy and a very competitive local market. With line of credit usage down at March 31, 2012 compared with December 31, 2011, C&I loans declined from \$109.5 million to \$103.1 million.

Leasing Portfolio

As noted above, management made the strategic decision in April 2009 to exit the national direct financing lease business and market the portfolio for sale. This decision resulted in the classification of the leasing portfolio as held-for-sale and the portfolio being marked to its market value at June 30, 2009. The mark-to-market adjustment was \$7.2 million. At September 30, 2009, management determined to keep the lease portfolio and service it to maturity, terminated its plans to actively market the portfolio for sale, and the portfolio was placed back into held-for-investment at the revised carrying amount as of June 30, 2009. The difference between the principal value and the carrying value, initially created by the mark-to-market adjustment at June 30, 2009, reduces over time as individual leases deteriorate, become uncollectible, and are written off. The allowance for lease losses was zero at June 30, 2009 when the portfolio was classified as held-for-sale and reported at its fair market value. With the portfolio classified as held-for-investment at March 31, 2012, the portfolio has been evaluated in accordance with the Company's normal credit review policies in determining the appropriate allowance for lease losses. During the first quarter of 2012, \$47 thousand in leases were written off and the difference between the principal value and carrying value of the leases declined from \$0.5 million to \$0.4 million. The first quarter write-offs were at their lowest point in the last five quarters. Non-performing leases of \$1.0 million at March 31, 2012 declined from \$1.2 million at December 31, 2011 and \$2.1 million at March 31, 2011. With both leasing write-offs and non-accruing lease balances declining, management determined that the allowance for leasing losses should decrease by \$0.4 million as of March 31, 2012. The following table illustrates the write-off and allowance activity related to the leasing portfolio over the past five quarters.

Table of Contents

	(\$ in thousands)

Credit Quality of Loan Portfolio

Total non-performing loans and leases, defined as accruing loans and leases greater than 90 days past due and non-accrual loans and leases, totaled \$13.0 million, or 2.25% of total loans and leases outstanding, at March 31, 2012, compared with \$15.2 million, or 2.60% of total loans and leases outstanding at December 31, 2011. There were several reasons for the decline in non-performing loans and leases.

The first reason related to two commercial constructions loans which totaled \$1.2 million. These loans were converted to permanent loans that were current and accruing as of March 31, 2012, but were 90 days past their maturity date as of December 31, 2011 due to administrative delays in closing the permanent loans. Second, two previously non-accrual residential construction loans with a combined balance of \$0.2 million were converted to permanent residential mortgage loans and were current and performing as of March 31, 2012. Third, a commercial and multi-family loan with a balance of \$0.3 million as of December 31, 2011 was paid off in the first quarter of 2012. Fourth, as previously discussed, the performance of the leasing portfolio has continued to improve with non-accrual leases declining \$0.2 million in the quarter. Finally, \$0.1 million of non-accrual C&I loans and \$0.1 million in non-accrual home equities were charged off in the first quarter, further reducing non-performing loans.

The allowance for loan and lease losses totaled \$10.8 million or 1.86% of total loans and leases outstanding at March 31, 2012, as compared with \$11.5 million or 1.97% of total loans and leases outstanding at December 31, 2011. The decrease in the allowance over the prior year end resulted from a \$0.4 million release of reserves on the leasing portfolio and net charge-offs of \$0.5 million in the three month period ended March 31, 2012, partially offset by a \$0.2 million provision for loan losses. The provision resulted from the charge-off of two loans that exceeded the reserve associated with those loans. The \$0.5 million in net charge-offs equates to a 0.32% annualized ratio as a percentage of net loans and leases. This compares with a 0.03% ratio in the fourth quarter of 2011 and 0.33% in the first quarter of 2011.

Table of Contents

The coverage ratio of the allowance for loan and lease losses to non-performing loans and leases increased from 76% at December 31, 2011 to 83% at March 31, 2012. There are two factors that significantly influence these ratios. The first factor is the covered loan portfolio acquired in the Waterford transaction which are covered by an FDIC loss-sharing agreement that guarantees 80% of any losses incurred in the portfolio. The second factor is the leasing portfolio, which carries significantly higher risk, but also has the remaining mark to consider as depicted in the table above. The following table depicts the allowance and non-performing ratios by segregating the covered and non-covered loan portfolios and the leasing portfolio as of the following dates:

	March 31, 2012 (\$ in thousands)					
	Balance	Allowance for loan and lease losses	Non- performing loans and leases	Allowance for loan and lease losses/Total loans and leases	Non- performing loans and leases/ Total loans and leases	Allowance for loan and lease losses/Non- performing loans and leases
Non-covered loans	\$ 549,705	\$ 10,067	\$ 9,627	1.83%	1.75%	104.57%
Covered loans	25,483	140	2,464	0.55%	9.67%	5.68%
Leases	4,512	583	950	12.92%	21.05%	61.37%
Total	\$ 579,700	\$ 10,790	\$ 13,041	1.86%	2.25%	82.74%

	December 31, 2011 (\$ in thousands)					
	Balance	Allowance for loan and lease losses	Non- performing loans and leases	Allowance for loan and lease losses/Total loans and leases	Non- performing loans and leases/ Total loans and leases	Allowance for loan and lease losses/Non- performing loans and leases

Total	\$ 583,405	\$ 11,495	\$ 15,176	1.97%	2.60%	75.74%

Investing Activities

Total securities were \$112.5 million at March 31, 2012, reflecting an \$8.7 million, or 8.4%, increase from \$103.8 million at December 31, 2011. The increase in securities balances is a result of deposit growth out-pacing loan growth in the first quarter of 2012. Management utilized some of the excess funds raised to purchase investment securities. Compared with December 31, 2011, as of March 31, 2012, the Company added \$10.0 million in U.S. Treasury and other U.S. government-sponsored agency bonds, while tax-advantaged municipal bonds decreased \$0.3 million, and U.S. government-sponsored mortgage-backed securities decreased \$1.0 million. Interest-bearing deposits at other banks, which consist of overnight funds kept at correspondent banks, increased from \$3.2 million at December 31, 2011 to \$31.9 million at March 31, 2012. \$23.6 million of the deposit growth in the first quarter is attributable to increases in municipal deposits. As most of that municipal deposit growth is likely seasonal due to inflows from tax receipts, management decided to keep the funds invested short-term. Securities and interest-bearing deposits at correspondent banks made up 18.4% of the Bank's total average interest earning assets in the first quarter of 2012, the same as in the fourth quarter of 2011.

The Company's highest concentration in its securities portfolio is in U.S. Treasury and other U.S. government-sponsored agency bonds at 35.8% of the portfolio at March 31, 2012, compared with 29.2% of the portfolio at December 31, 2011. Tax-advantaged municipal bonds comprised 31.9% of the total portfolio at March 31, 2012, compared with 34.8% at December 31, 2011, while the concentration in government-sponsored

Edgar Filing: EVANS BANCORP INC - Form 10-Q

mortgage-backed securities also declined from 36.0% at December 31, 2011 to 32.4% at March 31, 2012.

The credit quality of the securities portfolio as a whole is believed to be strong as the portfolio is in an overall unrealized net gain position, with no individual securities in a significant unrealized loss position. While interest rates remain near historic lows, the net unrealized gain position of the investment portfolio decreased slightly from \$4.1 million at December 31, 2011 to \$3.9 million at March 31, 2012.

Table of Contents

The Company monitors extension and prepayment risk in the securities portfolio to limit potential exposures. Available-for-sale securities with a total fair value of \$84.7 million and \$76.7 million at March 31, 2012 and December 31, 2011, respectively, were pledged as collateral to secure public deposits and for other purposes required or permitted by law. The Company has no direct exposure to subprime mortgages, nor does the Company hold private mortgage-backed securities, credit default swaps, or FNMA or FHLMC preferred stock investments in its investment portfolio.

Funding Activities

Total deposits at March 31, 2012 were \$649.7 million, reflecting a \$33.5 million, or 5.4%, increase from December 31, 2011. \$23.6 million of the growth occurred in municipal deposits. There is typically a seasonal spike in municipal deposits in the first quarter of the year due to tax receipt inflows at the municipalities. The municipal deposit growth was across various deposit categories: demand (\$2.1 million), NOW (\$7.6 million), regular savings (\$4.5 million), and muni-vest savings (\$9.4 million). Total demand deposits at March 31, 2012 were \$114.4 million, reflecting a \$3.6 million or 3.1% decrease from December 31, 2011. Demand deposit balances fluctuate day-to-day based on the high volume of transactions normally associated with the demand product, and therefore average demand deposit growth is a better measure of sustained growth. Average demand deposits of \$114.8 million during the three month period ended March 31, 2012 were 0.5% lower than the fourth quarter of 2011, but 12.8% higher than the prior year's first quarter. Most of the Company's growth in the past year in demand deposits has come from commercial customers.

The Company's retail deposit growth vehicle continues to be the complementary Better Checking and Better Savings products, which are included in the NOW and regular savings deposit categories on the Company's balance sheet, respectively. The Better Checking product is unique in the Bank's Western New York footprint as it pays a premium interest rate as a reward to customers who demonstrate a deep relationship with the Bank as evidenced by regular use of their debit card, use of direct deposit, and electronic statements. Overall, Better Checking deposits increased \$4.0 million for the first three months of the year. Regular savings deposits increased \$20.2 million, or 6.4%, in the first quarter of 2012. That growth is mostly a result of an increase in Better Savings deposits, offset by decreases in legacy savings products.

Time deposits were \$109.6 million at March 31, 2012, a decrease of \$3.9 million, or 3.4%, from \$113.5 million at December 31, 2011. While some long-term rates have risen recently, time deposit rates remain near historic lows. As a result, customers have continued to show a preference for liquid savings products over time deposits.

Other borrowings, which typically include the Bank's overnight line of credit and other advances with the FHLB NY, were \$22.0 million at March 31, 2012, the same as at December 31, 2011. Because the Company's deposit growth has outpaced its loan growth this year, the Bank has not needed to add to its wholesale borrowings.

Table of Contents**ANALYSIS OF RESULTS OF OPERATIONS****Average Balance Sheet**

The following tables present the significant categories of the assets and liabilities of the Company, interest income and interest expense, and the corresponding yields earned and rates paid for the periods indicated. The assets and liabilities are presented as daily averages. The average loan and lease balances include both performing and non-performing loans and leases. Investments are included at amortized cost. Yields are presented on a non-tax-equivalent basis.

Net interest margin	3.93%	4.05%
Interest rate spread	3.71%	3.80%

Table of Contents**Net Income**

Net income grew to \$2.4 million in the first quarter of 2012, up 27% from net income of \$1.9 million in the first quarter of 2011. The improvement in net income reflected a combination of higher net interest income and a release of provision for loan and lease losses in the first quarter of 2012. Growth in net-interest income resulted from growing interest earning assets and a \$0.7 million year-over-year reduction in the provision for loan and lease losses was mostly due to the declining balance and improving credit quality trends in the leasing portfolio. Return on average equity was 13.59% for the first quarter of 2012, compared with 11.71% in the first quarter of 2011.

Other Results of Operations

Net interest income was \$6.9 million for the 2012 first quarter, up 8.8% when compared with the first quarter of 2011, and flat when compared to the fourth quarter of 2011. Growth in net interest-earning assets drove the increase from the first quarter of 2011 and offset the net interest margin contraction relative to the same period. The linked fourth quarter contained a \$0.2 million in interest income from the recovery of a previously marked down commercial loan acquired as part of the Waterford transaction in 2009. Excluding this recovery, net interest income increased \$0.1 million, or 2.2%, from the prior year's fourth quarter.

Although the Bank experienced net interest margin compression throughout 2011 due to declining interest rates, net interest margin remained relatively strong at 3.93% for the first quarter of 2012, flat when compared to the linked fourth quarter of 3.92% (after adjusting for the one-time interest income adjustment) and down from 4.05% at March 31, 2011. As the low interest rate cycle continues, the Company's loan and investment portfolios re-price into lower yields as evidenced by a decrease in yield on interest-earning assets of 35 basis points from the first quarter 2011. The Company benefited from re-pricing its interest-bearing liabilities much earlier in the interest rate cycle, and these rates have fallen less than interest-earning assets in the past year. Correspondingly, the cost of interest-bearing liabilities for the Company declined 26 basis points in the first quarter of 2012 from the first quarter of 2011. Additionally, the Company has been successful in attracting new customers, with most of that success coming in the premium-rate Better Checking and Better Savings products. While these products have put some short-term pressure on the net interest margin, the Company expects to benefit in the long term from the deeper relationships that these products provide.

The provision for loan and lease losses decreased to a benefit of \$(0.2) million in the first quarter of 2012 from \$0.5 million in the first quarter of 2011. The provision benefitted from the release of \$(0.4) million related to the continued improvement in the leasing portfolio's performance as charge-offs and non-accruing leases declined during the quarter. This benefit was partially offset by the charge-off of a \$0.2 million commercial loan not previously identified as impaired. Given the slight decline in loan balances during the quarter, there was no provision for loan growth.

Non-interest income, which represented 32.4% of total revenue in the first quarter of 2012, declined 5.0%, or \$0.2 million, to \$3.3 million when compared with the first quarter of 2011 reflecting lower insurance agency revenue and a reduction in data center income. Data center income, which declined \$0.1 million from the prior year's first quarter, is from the Bank's wholly-owned subsidiary, Suchak Data Systems, LLC (SDS). SDS is a data processing company which was acquired by the Bank on December 31, 2008. The original contracted revenue generated by service agreements with other banks is expiring as expected. The Company is focusing on the original purpose for the purchase of SDS, which was to provide resources for its own internal bank processing needs. Insurance agency revenue of \$1.9 million was down \$0.1 million, or 6.9%, when compared with the 2011 first quarter due mostly to a decrease in profit sharing revenue from the insurance carriers. The lower profit sharing is driven by higher loss ratios related to lower premium levels.

Total non-interest expense was \$6.9 million in the first quarter of 2012, an increase of \$0.3 million, or 4.6%, from \$6.6 million in the first quarter of 2011. The largest component of the increase was salaries and employee benefits, which increased \$0.3 million, or 7.9%, to \$4.2 million in the first quarter of 2012 compared with the prior-year first quarter. This rise reflected merit increases awarded for 2011 performance, increased health care costs, and increased staff, including commercial loan officers. These increases were partially offset by lower occupancy costs mostly related to fully depreciated assets lowering depreciation expense and a reduction in FDIC insurance expense due to changes in the premium calculation adopted in the second quarter of 2011 by the FDIC.

Table of Contents

As a result of the increase in non-interest expense and the decrease in non-interest income, the efficiency ratio increased to 67.10% for the first quarter of 2012, from 66.36% for the first quarter of 2011.

Income tax expense for the quarter ended March 31, 2012 was \$1.1 million, representing an effective tax rate of 31.7%, compared with an effective tax rate of 29.6% in the first quarter of 2011. The effective tax rate increased because taxable income increased significantly while tax-exempt income was relatively flat.

CAPITAL

The Company consistently maintains regulatory capital ratios measurably above the federal well capitalized standard, including a Tier 1 leverage ratio of 9.74% at March 31, 2012 and 9.71% at December 31, 2011. Book value per share of the Company's common stock was \$17.06 at March 31, 2012, compared with \$16.72 at December 31, 2011. Tangible book value per share at March 31, 2012 was \$14.96, compared with \$14.60 at December 31, 2011. The increase in both book value and tangible book value per share is a result of the Company's \$2.4 million in net income, somewhat offset by the dividend declared in the first quarter of 2012.

On February 21, 2012, the Company declared a semi-annual cash dividend of \$0.22 per share on the Company's outstanding common stock. The dividend was paid on April 10, 2012 to shareholders of record as of March 20, 2012. The dividend was a 10% increase from the previous semi-annual dividend of \$0.20 paid on October 4, 2011.

LIQUIDITY

The Bank utilizes cash flows from the investment portfolio and federal funds sold balances to manage the liquidity requirements related to loan demand and deposit fluctuations. The Bank also has many borrowing options. As a member of the FHLB the Bank is able to borrow funds at competitive rates. Advances of up to \$124.3 million can be drawn on the FHLB via an Overnight Line of Credit Agreement between the Bank and the FHLB. An amount equal to 25% of the Bank's total assets could be borrowed through the advance programs under certain qualifying circumstances. The Bank also has the ability to purchase up to \$14.0 million in federal funds from its correspondent banks. By placing sufficient collateral in safekeeping at the Federal Reserve Bank, the Bank could borrow at the discount window. The Bank's liquidity needs also can be met by more aggressively pursuing time deposits, or accessing the brokered time deposit market, including the Certificate of Deposit Account Registry Service (CDARS) network. The Company's primary source of liquidity is dividends from the Bank. Additionally, the Company has access to capital markets as a funding source. The Company has accessed the capital markets as recently as May 2010 when it raised \$13.4 million in net proceeds in connection with its registered offering and sale of 1.2 million shares of common stock.

Cash flows from the Bank's investment portfolio are laddered, so that securities mature at regular intervals, to provide funds from principal and interest payments at various times as liquidity needs may arise. Contractual maturities are also laddered, with consideration as to the volatility of market prices. At March 31, 2012, approximately 18.0% of the Bank's securities had contractual maturity dates of one year or less and approximately 35.2% had maturity dates of five years or less.

Management, on an ongoing basis, closely monitors the Company's liquidity position for compliance with internal policies, and believes that available sources of liquidity are adequate to meet funding needs in the normal course of business. As part of that monitoring process, management calculates the 90-day liquidity each month by analyzing the cash needs of the Bank. Included in the calculation are liquid assets and potential liabilities. Management stresses the potential liabilities calculation to ensure a strong liquidity position. Included in the calculation are assumptions of some significant deposit run-off as well as funds needed for loan closings and investment purchases. At March 31, 2012, in the Company's internal stress test, the Company had net short-term liquidity of \$88.0 million as compared with \$82.6 million at December 31, 2011. Available assets of \$148.1 million, divided by public and purchased funds of \$133.0 million, resulted in a long-term liquidity ratio of 111% at March 31, 2012, compared with 99% at December 31, 2011.

Management does not anticipate engaging in any activities, either currently or in the long term, for which adequate funding would not be available and which would therefore result in significant pressure on liquidity. However, continued economic recession could negatively impact the Company's liquidity.

Table of Contents

The Company believes that the Bank maintains a sufficient level of U.S. government and government agency securities and New York State municipal bonds that can be pledged as collateral for municipal deposits.

ITEM 3 - QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Additional information responsive to this Item is contained in the Liquidity section of Management's Discussion and Analysis of Financial Condition and Results of Operations, which information is incorporated herein by reference.

Market risk is the risk of loss from adverse changes in market prices and/or interest rates of the Bank's financial instruments. The primary market risk the Company is exposed to is interest rate risk. The core banking activities of lending and deposit-taking expose the Bank to interest rate risk, which occurs when assets and liabilities reprice at different times and by different amounts as interest rates change. As a result, net interest income earned by the Bank is subject to the effects of changing interest rates. The Bank measures interest rate risk by calculating the variability of net interest income in future periods under various interest rate scenarios using projected balances for interest-earning assets and interest-bearing liabilities. Management's philosophy toward interest rate risk management is to limit the variability of net interest income to changes in net interest rates. The balances of financial instruments used in the projections are based on expected growth from forecasted business opportunities, anticipated prepayments of loans, and expected maturities of investment securities, loans and deposits. Management supplements the modeling technique described above with analysis of market values of the Bank's financial instruments and changes to such market values given changes in the interest rates.

The Bank's Asset-Liability Committee, which includes members of senior management, monitors the Bank's interest rate sensitivity with the aid of a model that considers the impact of ongoing lending and deposit taking activities, as well as interrelationships in the magnitude and timing of the repricing of financial instruments, including the effect of changing interest rates on expected prepayments and maturities. When deemed prudent, management has taken actions, and intends to do so in the future, to mitigate exposure to interest rate risk through the use of on- or off-balance sheet financial instruments. Possible actions include, but are not limited to, changing the pricing of loan and deposit products, and modifying the composition of interest-earning assets and interest-bearing liabilities, and other financial instruments used for interest rate risk management purposes.

The following table demonstrates the possible impact of changes in interest rates on the Bank's net interest income over a 12-month period of time:

SENSITIVITY OF NET INTEREST INCOME TO CHANGES IN INTEREST RATES

Changes in interest rates	Calculated increase	
	in projected annual net interest income	
	(in thousands)	
	March 31, 2012	December 31, 2011
+200 basis points	\$ 1,641	\$ 1,126
+100 basis points	1,750	1,452
-100 basis points	N/A	NM
-200 basis points	N/A	NM

Many assumptions were utilized by management to calculate the impact that changes in interest rates may have on the Bank's net interest income. The more significant assumptions related to the rate of prepayments of mortgage-related assets, loan and deposit volumes and pricing, and deposit maturities. The Bank assumed immediate changes in rates including 200 basis point rate changes. In the event that the 200 basis point rate changes cannot be achieved, the applicable rate changes are limited to lesser amounts such that interest rates cannot be less than zero. These assumptions are inherently uncertain and, as a result, the Bank cannot precisely predict the impact of changes in interest rates on net interest income. Actual results may differ significantly due to the timing, magnitude, and

Table of Contents

frequency of interest rate changes in market conditions and interest rate differentials (spreads) between maturity/repricing categories, as well as any actions such as those previously described, which management may take to counter such changes. In light of the uncertainties and assumptions associated with the process, the amounts presented in the table and changes in such amounts are not considered significant to the Bank's projected net interest income.

ITEM 4 - CONTROLS AND PROCEDURES

DISCLOSURE CONTROLS AND PROCEDURES

The Company's management, with the participation of the Company's principal executive officer and principal financial officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of March 31, 2012 (the end of the period covered by this Report). Based on that evaluation, the Company's principal executive and principal financial officers concluded that as of March 31, 2012 the Company's disclosure controls and procedures were effective.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

No changes in the Company's internal control over financial reporting were identified in connection with the evaluation required by paragraph (d) of Rule 13a-15 or Rule 15d-15 under the Exchange Act that occurred during the fiscal quarter ended March 31, 2012 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
