CHICAGO RIVET & MACHINE CO.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. In the opinion of the Company, the accompanying unaudited interim financial statements contain all adjustments necessary to present fairly the financial position of the Company as of March 31, 2012 (unaudited) and December 31, 2011 (audited) and the results of operations and changes in cash flows for the indicated periods. Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted from these unaudited financial statements in accordance with applicable rules. Please refer to the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2011.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The results of operations for the three month period ended March 31, 2012 are not necessarily indicative of the results to be expected for the year.

Certain items in 2011 have been reclassified to conform to the presentation in 2012. These changes have no effect on the results of operations or the financial position of the Company.

2. The Company extends credit on the basis of terms that are customary within our markets to various companies doing business primarily in the automotive industry. The Company has a concentration of credit risk primarily within the automotive industry and in the Midwestern United States.

3. The Company is, from time to time, involved in litigation, including environmental claims and contract disputes, in the normal course of business. While it is not possible at this time to establish the ultimate amount of liability with respect to contingent liabilities, including those related to legal proceedings, management is of the opinion that the aggregate amount of any such liabilities, for which provision has not been made, will not have a material adverse effect on the Company's financial position.

4. The Company's effective tax rates were approximately 32.3% and 33.9% for the first quarter of 2012 and 2011, respectively. Rates were lower than the U.S. federal statutory rate primarily due to the Domestic Production Activities Deduction allowed under Internal Revenue Code Section 199.

The Company's federal income tax returns for the 2009, 2010 and 2011 tax years are subject to examination by the Internal Revenue Service (IRS). While it may be possible that a reduction could occur with respect to the Company's unrecognized tax benefits as an outcome of an IRS examination, management does not anticipate any adjustments that would result in a material change to the results of operations or financial condition of the Company. No statutes have been extended on any of the Company's federal income tax filings. The statute of limitations on the Company's 2009, 2010 and 2011 federal income tax returns will expire on September 15, 2013, 2014 and 2015, respectively.

The Company's state income tax returns for the 2009 through 2011 tax years remain subject to examination by various state authorities with the latest closing period on October 31, 2015. The Company is not currently under examination by any state authority for income tax purposes and no statutes for state income tax filings have been extended.

5. Inventories are stated at the lower of cost or net realizable value, cost being determined by the first-in, first-out method. A summary of inventories is as follows:

	March 31, 2012	December 31, 2011
Raw material	\$ 1,796,802	\$ 2,016,032
Work-in-process	2,106,113	1,984,368
Finished goods	1,723,031	1,760,640
	5,625,946	5,761,040

Edgar Filing: CHICAGO RIVET & MACHINE CO - Form 10-Q

Valuation reserves	(560,500)	(549,000)

CHICAGO RIVET & MACHINE CO.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Revenues for the first quarter of 2012 were \$9,200,318, an increase of \$1,385,950, or 17.7%, compared with \$7,814,368 recorded in last year's first quarter. The increase in sales reflects the continued improvement in our operations, as well as an increase in U.S. automotive production, upon which we rely for the majority of our revenue. The increase in revenue and continued emphasis on cost control measures have resulted in net income of \$493,734, or \$0.51 per share, in the first quarter of 2012 compared to net income of \$117,022, or \$0.12 per share, in the first quarter of 2011.

Fastener segment revenues were \$8,334,120 in the first quarter of 2012, an increase of \$1,224,465, or 17.2%, from the \$7,109,655 reported in the first quarter of 2011. This marks the tenth consecutive quarter of increased sales for the fastener segment compared with the year earlier quarter. With the majority of such revenues derived from the automotive industry, the segment benefited from better-than-expected domestic demand for autos and trucks during the current year. Part of the improved demand is attributable to a relatively mild winter in many parts of the country, which may have accelerated some purchasing decisions. Raw material costs were higher in the first quarter compared to last year, with the average price for steel, our primary raw material, increasing 4.4% compared to the first quarter of 2011. Other variable cost of sales items were little changed overall as a percentage of net sales due to cost control efforts. Fixed costs, while higher on an absolute dollar basis, accounted for a smaller percentage of net sales due to the higher level of sales achieved in the current year. The combination of higher sales and improved plant utilization offset higher raw material prices, contributing to an increase in segment gross margin of \$546,000.

Assembly equipment segment revenues increased by \$161,485, or 22.9%, from \$704,713 in the first quarter of 2011 to \$866,198 in 2012. A greater number of machines shipped in the current year quarter compared with the first quarter of 2011, accounting for the majority of the sales increase, however, tools and machine parts sales also registered gains. Although materials prices were up from a year earlier, by keeping employment levels relatively unchanged, the increase in sales resulted in an improvement of assembly equipment segment margins of approximately \$88,000 over the first quarter of 2011.

Selling and administrative expenses during the first quarter of 2012 were \$1,391,598, an increase of \$106,593, compared to the first quarter of 2011. The change is primarily due to a \$44,000 increase in profit sharing expense, related to improved operating results, and a \$30,000 increase in office supplies and maintenance expense, principally related to computer system upgrades. The remaining net increase in the quarter comprises various smaller items. Compared to net sales, selling and administrative expenses for the first quarter declined from 16.4% in 2011 to 15.1% in 2012.

Working capital amounted to \$15.5 million as of March 31, 2012, an increase of approximately \$.5 million from the beginning of the current year. The largest component of the net change in the first quarter was accounts receivable, which increased by \$1.8 million due to the greater sales activity during the quarter, compared to the fourth quarter of 2011. Partially offsetting this change was an increase of \$.6 million in accounts payable and accrued expenses since the beginning of the year. These balances are consistent with the level of activity during the quarter. The net result of these changes and other cash flow items on cash and certificates of deposit was a decrease of \$.6 million, to \$6 million, as of March 31, 2012. Management believes that current cash, cash equivalents and operating cash flow will provide adequate working capital for the foreseeable future.

We are pleased to report solid improvement in sales and profits in the first quarter of 2012, compared with the previous quarter and the first quarter of 2011. However, our outlook is tempered due to conditions over which we have little control, including a persistently low growth rate in the domestic economy, for which current forecasts offer little hope for significant improvement in the near-term, and threats to the automotive supply chain that could interrupt the strong demand we have experienced early this year. A recent explosion at a manufacturing facility in Germany that makes a resin used in several safety-critical components, while not having a direct impact on our production capability, was initially thought to be serious enough to disrupt domestic vehicle production due to its limited availability. While not as dramatic as last year's earthquake in Japan, these occurrences highlight the interconnected nature of the global automotive supply chain. Amidst these concerns, we have been able to maintain our sound financial condition while pursuing opportunities to profitably grow our revenues and improve our bottom line. We will continue to make adjustments to our activities which we feel are necessary based on conditions in our markets, while maintaining the high level of quality and reliability of service our customers demand.

This discussion contains certain forward-looking statements which are inherently subject to risks and uncertainties that may cause actual events to differ materially from

Table of Contents

those discussed herein. Factors which may cause such differences in events include, those disclosed under Risk Factors in our Annual Report on Form 10-K and in the other filings we make with the United States Securities and Exchange Commission. These factors, include among other things: conditions in the domestic automotive industry, upon which we rely for sales revenue, the intense competition in our markets, the concentration of our sales to two major customers, the price and availability of raw materials, labor relations issues, losses related to product liability, warranty and recall claims, costs relating to environmental laws and regulations, the loss of the services of our key employees and difficulties in achieving cost savings. Many of these factors are beyond our ability to control or predict. Readers are cautioned not to place undue reliance on these forward-looking statements. We undertake no obligation to publish revised forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

Item 4. Controls and Procedures.

(a) Disclosure Controls and Procedures. The Company's management, with the participation of the Company's Chief Executive Officer and President, Chief Operating Officer and Treasurer (the Company's principal financial officer), has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based on such evaluation, the Company's Chief Executive Officer and President, Chief Operating Officer and Treasurer have concluded that, as of the end of such period, the Company's disclosure controls and procedures are effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act.

(b) Internal Control Over Financial Reporting. There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
