Coupon Make-Whole Payment Upon Conversion
On or After January 1, 2013

and Prior to July 1, 2017

If holders elect to convert some or all of their notes on or after January 1, 2013 and prior to July 1, 2017, holders will receive a coupon make-whole payment for the notes being converted.

This coupon make-whole payment will be equal to the sum of the present values of the lesser of:

1. eight semi-annual interest payments; or

2. the number of semi-annual interest payments that would have been payable on such converted notes from the last day through which interest was paid on the notes, or the issue date if no interest has been paid, to but excluding July 1, 2017.

The present values of the remaining interest payments will be computed using a discount rate equal to 2.0%.

If the conversion date falls after a record date and on or prior to the corresponding interest payment date, the amount of the coupon make-whole payment will be reduced by the amount of interest payable on such interest payment date to the holder of record of the converted notes at the close of business on the corresponding record date.

Gevo may pay any coupon make-whole payments either in cash or in its common stock, at Gevo's election. If Gevo elects to pay a coupon make-whole payment in its common stock, then the stock will be valued at 90% of the simple average of the daily volume weighted average prices of Gevo common stock for the 10 trading days ending on and including the trading day immediately preceding the conversion date.

less than \$4.95 per share (subject to adjustment in the same manner as the stock prices set forth in the column headings of the table above), the conversion rate will not be increased.

Notwithstanding the foregoing, in no event will the total number of shares of Gevo common stock issuable upon conversion exceed 202.0202 per \$1,000 principal amount of notes, subject to adjustments in the same manner as the conversion rate as set forth in the Preliminary Prospectus Supplement under Description of notes Conversion Rate Adjustments.
