Summary

OceanFirst Financial Corp. is the holding company for OceanFirst Bank (the "Bank"), a community bank serving Ocean and Monmouth Counties in New Jersey. The term the "Company" refers to OceanFirst Financial Corp., OceanFirst Bank and all of the Bank's subsidiaries on a consolidated basis. The Company's results of operations are primarily dependent on net interest income, which is the difference between the interest income earned on interest-earning assets, such as loans and investments, and the interest expense on interest-bearing liabilities, such as deposits and borrowings. The Company also generates non-interest income such as income from loan sales, loan servicing, loan originations, merchant credit card services, deposit accounts, trust and asset management services, the sale of investment products and other fees. The Company's operating expenses primarily consist of compensation and employee benefits, occupancy and equipment, marketing, data processing, federal deposit insurance and general and administrative expenses. The Company's results of operations are also significantly affected by general economic and competitive conditions, particularly changes in market interest rates, government policies and actions of regulatory agencies.

Interest-earning assets, both loans and securities, are generally priced against longer-term indices, while interest-bearing liabilities, primarily deposits and borrowings, are generally priced against shorter-term indices. Beginning in the second half of 2011 and through the first quarter of 2013, the Company's net interest margin has generally contracted as compared to prior linked periods. Due to the low interest rate environment, high loan refinance volume caused yields on loans and mortgage-backed securities to trend downward. At the same time, the Company's asset mix has shifted as higher-yielding loans have decreased due to prepayments and the sale of newly originated 30-year fixed-rate one-to-four family loans while lower yielding securities have increased. Based upon current economic conditions, the Federal Reserve has indicated that it intends to keep interest rates at current levels through mid 2015. As a result, management expects the low interest rate environment to continue beyond 2013, causing further pressure on the net interest margin. In addition to the interest rate environment, the Company's results are affected by national and local economic conditions. Recent economic indicators point to some improvement in the economy, which expanded moderately in 2011 and 2012, and in overall labor market conditions as the national unemployment rate in the first quarter of 2013 has improved over prior year levels. Despite these signs, the overall economy remains weak and the unemployment rate remains at elevated levels. Additionally, housing values remain significantly below their peak levels in 2006. These economic conditions have generally had an adverse impact on the Company's results of operations.

Highlights of the Company's financial results for the three months ended March 31, 2013 were as follows:

Total assets increased to \$2.304 billion at March 31, 2013, from \$2.269 billion at December 31, 2012. Mortgage-backed securities available for sale increased by \$49.3 million, to \$383.1 million at March 31, 2013, as compared to \$333.9 million at December 31, 2012. Loans receivable, net decreased \$21.8 million at March 31, 2013, as compared to December 31, 2012 primarily due to prepayments and the sale of newly originated 30-year fixed-rate one-to-four family loans.

Deposits increased by \$20.6 million at March 31, 2013, as compared to December 31, 2012. An increase of \$29.5 million in core deposits (i.e. all deposits excluding time deposits) was partly offset by a decline of \$8.9 million in time deposits.

Net income for the three months ended March 31, 2013 decreased to \$4.4 million, or \$0.26 per diluted share, as compared to net income of \$5.6 million, or \$0.31 per diluted share for the corresponding prior year period due to reductions in net interest income and the net (loss) gain on the sales of loans available for sale, partly offset by reductions in the provision for loan losses and operating expenses.

Net interest income for the three months ended March 31, 2013 decreased to \$17.2 million, as compared to \$19.1 million in the same prior year period, reflecting a lower net interest margin partly offset by greater interest-earning assets. The net interest margin decreased to 3.16% for the three months ended March 31, 2013, as compared to 3.52% for the corresponding prior year period.

The provision for loan losses was \$1.1 million for the three months ended March 31, 2013, as compared to \$1.7 million in the same prior year period. The Company's non-performing loans increased \$4.1 million, to \$47.4 million at March 31, 2013, from \$43.4 million at December 31, 2012. The increase was expected as it was related to loans adversely affected by superstorm Sandy which were identified and provided for in the fourth quarter of 2012.

Other income decreased \$902,000 for the three months ended March 31, 2013 as compared to the same prior year period. The net (loss) gain on the sales of loans available for sale for the three months ended March 31, 2013 was adversely impacted by an addition of \$975,000 to the reserve for repurchased loans as compared to an addition of \$150,000 in the same prior year period.

The Company remains well-capitalized with a tangible common equity ratio of 9.53%.

Edgar Filing: OCEANFIRST FINANCIAL CORP - Form 10-Q

Return on average stockholders' equity was 8.06% for the three months ended March 31, 2013, as compared to 10.38% for the corresponding prior year period.

Table of Contents**Analysis of Net Interest Income**

Net interest income represents the difference between income on interest-earning assets and expense on interest-bearing liabilities. Net interest income depends upon the relative amounts of interest-earning assets and interest-bearing liabilities and the interest rate earned or paid on them.

The following table sets forth certain information relating to the Company for the three months ended March 31, 2013 and 2012. The yields and costs are derived by dividing income or expense by the average balance of assets or liabilities, respectively, for the periods shown except where noted otherwise. Average balances are derived from average daily balances. The yields and costs include certain fees which are considered adjustments to yields.

	FOR THE THREE MONTHS ENDED MARCH 31,					
	2013			2012		
	AVERAGE BALANCE	INTEREST	AVERAGE YIELD/ COST (dollars in thousands)	AVERAGE BALANCE	INTEREST	AVERAGE YIELD/ COST

Net interest margin (4)			3.16%			3.52%

- (1) Amounts are recorded at average amortized cost.
- (2) Amount is net of deferred loan fees, undisbursed loan funds, discounts and premiums and estimated loss allowances and includes loans held for sale and non-performing loans.
- (3) Net interest rate spread represents the difference between the yield on interest-earning assets and the cost of interest-bearing liabilities.
- (4) Net interest margin represents net interest income divided by average interest-earning assets.

Comparison of Financial Condition at March 31, 2013 and December 31, 2012

Total assets at March 31, 2013 were \$2.304 billion, an increase of \$34.5 million, compared to \$2.269 billion at December 31, 2012.

Cash and due from banks increased by \$8.8 million, to \$71.4 million at March 31, 2013, as compared to \$62.5 million at December 31, 2012. Mortgage-backed securities available for sale increased by \$49.3 million, to \$383.1 million at March 31, 2013, as compared to \$333.9 million at December 31, 2012, as excess liquidity was invested.

Loans receivable, net decreased by \$21.8 million, to a balance of \$1.501 billion at March 31, 2013, as compared to a balance of \$1.523 billion at December 31, 2012, primarily due to prepayments and the sale of newly originated 30-year fixed-rate one-to-four family loans.

Total deposits increased \$20.6 million, to \$1.740 billion at March 31, 2013, from \$1.720 billion at December 31, 2012. The mix of deposits changed as non-interest-bearing deposits and savings deposits increased by \$22.7 million and \$29.8 million, respectively, while interest-bearing checking and time deposits decreased \$29.6 million and \$8.9 million, respectively. Securities sold under agreements to repurchase with retail customers increased by \$10.5 million, to \$71.3 million at March 31, 2013, from \$60.8 million at December 31, 2012.

Stockholders' equity at March 31, 2013 decreased to \$219.6 million, as compared to \$219.8 million at December 31, 2012, primarily due to the repurchase of 254,340 shares of common stock for \$3.6 million (average cost \$14.32) and the cash dividend on common stock, partly offset by net income and other comprehensive income.

Table of Contents

Comparison of Operating Results for the Three Months Ended March 31, 2013 and March 31, 2012

General

Net income for the three months ended March 31, 2013 decreased to \$4.4 million, or \$0.26 per diluted share, as compared to net income of \$5.6 million, or \$0.31 per diluted share for the corresponding prior year period due to reductions in net interest income and the net (loss) gain on the sales of loans available for sale, partly offset by reductions in the provision for loan losses and operating expenses.

Interest Income

Interest income for the three months ended March 31, 2013 was \$20.1 million, as compared to \$22.9 million for the three months ended March 31, 2012. The yield on interest-earning assets declined to 3.69% for the three months ended March 31, 2013, as compared to 4.21% for the same prior year period. For the three months ended March 31, 2012, the yield on loans receivable benefited from commercial loan prepayment fees of \$254,000, most of which was related to a single large commercial loan, which increased the yield on interest-earning assets by 5 basis points. Prepayment fee income for the three months ended March 31, 2013 was \$32,000. Average interest-earning assets increased by \$2.8 million for the three months ended March 31, 2013, as compared to the same prior year period. The increase in average interest-earning assets was primarily due to the increase in average short-term investments which increased \$36.1 million for the three months ended March 31, 2013 and to the increase in average investment and mortgage-backed securities available for sale, which collectively increased \$9.3 million. These increases were partly offset by a decrease in average loans receivable, net, of \$41.8 million for the quarter ended March 31, 2013, as compared to the same prior year period.

Interest Expense

Interest expense for the three months ended March 31, 2013 was \$2.9 million as compared to \$3.8 million for the three months ended March 31, 2012. The cost of interest-bearing liabilities decreased to 0.61% for the three months ended March 31, 2013 as compared to 0.79% in the same prior year period. Average interest-bearing liabilities decreased by \$19.8 million for the three months ended March 31, 2013, as compared to the same prior year period. The decrease was due to declines in average borrowed funds of \$31.7 million and average time deposits of \$34.8 million for the three months ended March 31, 2013 as compared to the same prior year period, partly offset by an increase in average transaction deposits of \$46.7 million.

Net Interest Income

Net interest income for the three months ended March 31, 2013 decreased to \$17.2 million, as compared to \$19.1 million in the same prior year period, reflecting a lower net interest margin partly offset by slightly higher interest-earning assets. The net interest margin decreased to 3.16% for the three months ended March 31, 2013, from 3.52% in the same prior year period due to a change in the mix of average interest-earning assets from higher-yielding loans receivable into lower-yielding short-term investments and investment and mortgage-backed securities available for sale. High loan refinance volume also caused yields on loans and mortgage-backed securities to trend downward.

Provision for Loan Losses

For the three months ended March 31, 2013, the provision for loan losses was \$1.1 million as compared to \$1.7 million for the corresponding prior year period. The decrease for the quarter ended March 31, 2013 was partly due to a reduction of \$573,000 in net charge-offs for the three months ended March 31, 2013 as compared to the same prior year period and a reduction in loans receivable, net at March 31, 2013 as compared to December 31, 2012. Although non-performing loans increased \$4.1 million at March 31, 2013, as compared to December 31, 2012, all of the increase, \$4.5 million, relates to loans adversely affected by superstorm Sandy. These loans were identified at December 31, 2012 and potential losses were provided for at that time.

Other Income

Other income decreased to \$3.4 million for the three months ended March 31, 2013, as compared to \$4.3 million in the same prior year period. Higher fees and service charges and an improvement in the net gain (loss) from other real estate owned was offset by a decrease in the net (loss) gain on sales of loans available for sale. Effective January 1, 2013, income from the origination of reverse mortgage loans of \$166,000 is classified as part of fees and service charges as compared to inclusion in the net (loss) gain on the sales of loans in the prior period as the Bank no longer closes these loans in its name. For the three months ended March 31, 2013, the net (loss) gain on the sales of loans decreased \$1.1 million to a loss of \$174,000, due to an increase in the provision for repurchased loans, a decrease in loan sale volume and the reclassification of reverse mortgage income. The net (loss) gain on the sales of loans for the three months ended March 31, 2013 was adversely impacted by an

Edgar Filing: OCEANFIRST FINANCIAL CORP - Form 10-Q

addition of \$975,000 to the reserve for repurchased loans as compared to an addition of \$150,000 in the same prior year period. (Refer to Note 6. Reserve for Repurchased Loans and Loss Sharing Obligations.) For the quarter ended March 31, 2013, fees and service charges, exclusive of the \$166,000 in fees on reverse mortgage loans, decreased \$16,000, due to a reduction in fees from investment services and deposit accounts partly offset by increases in bankcard services and trust revenue. Finally, the net gain (loss) from other real estate owned improved \$52,000 for the quarter ended March 31, 2013, as compared to the same prior year period.

Table of Contents

Operating Expenses

Operating expenses decreased by \$275,000, to \$12.7 million, for the three months ended March 31, 2013, as compared to \$12.9 million for the corresponding prior year period primarily due to a reduction in the incentive plan accrual.

Provision for Income Taxes

Income tax expense was \$2.4 million for the three months ended March 31, 2013, as compared to \$3.1 million for the same prior year period. The effective tax rate was 35.1% for the three months ended March 31, 2013 as compared to 35.7% in the same prior year period.

Liquidity and Capital Resources

The Company's primary sources of funds are deposits, principal and interest payments on loans and mortgage-backed securities, proceeds from the sale of loans, FHLB and other borrowings and, to a lesser extent, investment maturities. While scheduled amortization of loans is a predictable source of funds, deposit flows and mortgage prepayments are greatly influenced by interest rates, economic conditions and competition. The Company has other sources of liquidity if a need for additional funds arises, including various lines of credit.

At March 31, 2013 and December 31, 2012, the Company had no overnight borrowings from the FHLB. The Company periodically utilizes overnight borrowings to fund short-term liquidity needs. The Company had total FHLB borrowings of \$225.0 million at March 31, 2013 and December 31, 2012.

The Company's cash needs for the three months ended March 31, 2013 were primarily satisfied by principal payments on loans and mortgage-backed securities, proceeds from the sale of mortgage loans held for sale, proceeds from maturities of investment securities available for sale, deposit growth and short-term borrowings. The cash was principally utilized for loan originations and the purchase of investment and mortgage-backed securities. The Company's cash needs for the three months ended March 31, 2012 were primarily satisfied by principal payments on loans and mortgage-backed securities and proceeds from the sale of mortgage loans held for sale. The cash was principally utilized for loan originations, the purchase of investment and mortgage-backed securities, to fund deposit outflow and reduce FHLB borrowings.

In the normal course of business, the Company routinely enters into various off-balance-sheet commitments, primarily relating to the origination and sale of loans. At March 31, 2013, outstanding commitments to originate loans totaled \$59.7 million; outstanding unused lines of credit totaled \$243.5 million; and outstanding commitments to sell loans totaled \$11.7 million. The Company expects to have sufficient funds available to meet current commitments arising in the normal course of business.

Time deposits scheduled to mature in one year or less totaled \$129.4 million at March 31, 2013. Based upon historical experience management estimates that a significant portion of such deposits will remain with the Company.

The Company has a detailed contingency funding plan and comprehensive reporting of funding trends on a monthly and quarterly basis which is reviewed by management. Management also monitors cash on a daily basis to determine the liquidity needs of the Bank. Additionally, management performs multiple liquidity stress test scenarios on a quarterly basis. The Bank continues to maintain significant liquidity under all stress scenarios.

Under the Company's stock repurchase program, shares of OceanFirst Financial Corp. common stock may be purchased in the open market and through other privately negotiated transactions, from time-to-time, depending on market conditions. The repurchased shares are held as treasury stock for general corporate purposes. For the three months ended March 31, 2013, the Company repurchased 254,340 shares of common stock at a total cost of \$3.6 million compared with repurchases of 113,500 at a cost of \$1.6 million for the three months ended March 31, 2012. At March 31, 2013, there were 580,444 shares remaining to be repurchased under the existing stock repurchase program.

Cash dividends on common stock declared and paid during the first three months of 2013 were \$2.1 million, as compared to \$2.2 million in the same prior year period. On April 17, 2013, the Board of Directors declared a quarterly cash dividend of twelve cents (\$0.12) per common share. The dividend is payable on May 10, 2013, to stockholders of record at the close of business on April 29, 2013.

The primary sources of liquidity specifically available to OceanFirst Financial Corp., the holding company of OceanFirst Bank, are capital distributions from the banking subsidiary and the issuance of preferred and common stock and long-term debt. For the three months ended March 31, 2013, the Company received a dividend payment of \$4.0 million from the Bank. At March 31, 2013, the Company had received notice from the Federal Reserve Bank of Philadelphia that it does not object to the payment.

Table of Contents

of \$8.0 million in dividends from the Bank to the Holding Company over the next two quarters, although the Federal Reserve Bank reserved the right to revoke the approval at any time if a safety and soundness concern arises throughout the period. The Company's ability to continue to pay dividends will be largely dependent upon capital distributions from the Bank, which may be adversely affected by capital constraints imposed by the applicable regulations. The Company cannot predict whether the Bank will be permitted under applicable regulations to pay a dividend to the Company. If the Bank is unable to pay dividends to the Company, the Company may not have the liquidity necessary to pay a dividend in the future or pay a dividend at the same rate as historically paid, or be able to meet current debt obligations. At March 31, 2013, OceanFirst Financial Corp. held \$17.8 million in cash and \$5.7 million in investment securities available for sale.

As of March 31, 2013, the Bank exceeded all regulatory capital requirements as follows (in thousands):

	Actual		Required	
	Amount	Ratio	Amount	Ratio
Tangible capital	\$ 216,350	9.40%	\$ 34,531	1.50%
Core capital	216,350	9.40	92,082	4.00
Tier 1 risk-based capital	216,350	15.04	57,574	4.00
Total risk-based capital	234,361	16.29	115,147	8.00

The Bank is considered a well-capitalized institution under the Prompt Corrective Action Regulations.

At March 31, 2013, the Company maintained tangible common equity of \$219.6 million, for a tangible common equity to assets ratio of 9.53%.

Off-Balance-Sheet Arrangements and Contractual Obligations

In the normal course of operations, the Company engages in a variety of financial transactions that, in accordance with generally accepted accounting principles, are not recorded in the financial statements. These transactions involve, to varying degrees, elements of credit, interest rate, and liquidity risk. Such transactions are used for general corporate purposes or for customer needs. Corporate purpose transactions are used to help manage credit, interest rate, and liquidity risk or to optimize capital. Customer transactions are used to manage customers' requests for funding. These financial instruments and commitments include unused lines of credit and commitments to extend credit. The Company also has outstanding commitments to sell loans amounting to \$11.7 million.

The following table shows the contractual obligations of the Company by expected payment period as of March 31, 2013 (in thousands):

Contractual Obligation	Total	Less than one year	1-3 years	3-5 years	More than 5 years
Debt Obligations	\$ 323,811	\$ 142,311	\$ 149,000	\$ 10,000	\$ 22,500
Commitments to Originate Loans	59,671	59,671			
Commitments to Fund Unused Lines of Credit	243,457	243,457			

Commitments to originate loans and commitments to fund unused lines of credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company's exposure to credit risk is represented by the contractual amount of the instruments.

Table of Contents**Non-Performing Assets**

The following table sets forth information regarding the Company's non-performing assets consisting of non-performing loans and Other Real Estate Owned (OREO). It is the policy of the Company to cease accruing interest on loans 90 days or more past due or in the process of foreclosure.

	March 31, 2013	December 31, 2012
	(dollars in thousands)	
Non-performing loans:		
Real estate one-to-four family	\$ 29,567	\$ 26,521
Commercial real estate	12,718	11,567
Construction		
Consumer	4,680	4,540
Commercial	472	746
Total non-performing loans	47,437	43,374
OREO, net	2,813	3,210
Total non-performing assets	\$ 50,250	\$ 46,584
Delinquent loans 30-89 days	\$ 14,782	\$ 11,437
Allowance for loan losses as a percent of total loans receivable	1.34%	1.32%
Allowance for loan losses as a percent of total non-performing loans	43.20	47.29
Non-performing loans as a percent of total loans receivable	3.11	2.80
Non-performing assets as a percent of total assets	2.18	2.05

The Company's non-performing loans increased \$4.1 million at March 31, 2013, as compared to December 31, 2012 due to the impact of superstorm Sandy which caused substantial disruption in the Bank's market area on October 29 and 30, 2012. The Bank increased its allowance for loan losses at December 31, 2012 by \$1.8 million in expectation of increasing levels of non-performing loans for borrowers impacted by superstorm Sandy. The Bank previously identified 124 loans totaling \$30.1 million which were adversely impacted by the storm. At March 31, 2013, the status of these loans was as follows:

	Amount (000's)
Loans repaid or brought current	\$ 19,421
Loans for which the Bank granted a temporary repayment plan under which the borrower is performing	4,494
Loan is 30-89 days delinquent	1,705
Loan is 90 days or more delinquent	4,469
	\$ 30,089

Included in the non-performing loan total at March 31, 2013 was \$19.3 million of troubled debt restructured loans, as compared to \$18.2 million of troubled debt restructured loans at December 31, 2012. Non-performing loans are concentrated in one-to-four family loans which comprise 62.3% of the total. At March 31, 2013, the average weighted loan-to-value ratio of non-performing one-to-four family loans, after any related charge-offs, was 60% using appraisal values at time of origination and 78% using updated appraisal values. Appraisals are updated for all non-performing residential loans secured by real estate and subsequently updated annually if the loan remains delinquent for an extended period. At March 31, 2013, the average weighted loan-to-value ratio of the total one-to-four family loan portfolio was 56% using appraisal values at time of origination. The largest non-performing loan relationship consists of several credits to a single borrower with an aggregate balance of \$6.3 million which was criticized due to poor, but improving, operating results. The loans are collateralized by commercial and residential real estate, all business assets and also carry a personal guarantee. An appraisal performed in May 2011 values the real estate collateral at \$9.3

Edgar Filing: OCEANFIRST FINANCIAL CORP - Form 10-Q

million. In November 2011, the Company entered into a troubled debt restructuring with the borrower which reduced the interest rate in exchange for additional collateral. The loan was renewed in December 2012 at comparable terms. The borrower is current as to payments under the restructured terms but remains classified as a non-accrual loan due to continued uncertainty about the borrower's ability to service the debt. The Company's non-performing loans remain at elevated levels partly due to the extended foreclosure process in the State of New Jersey. The protracted foreclosure process delays the Company's ability to resolve non-performing loans through the sale of the underlying collateral.

Table of Contents

The Company classifies loans and other assets in accordance with regulatory guidelines as follows (in thousands):

	March 31, 2013	December 31, 2012
Loans and other assets excluding investment securities:		
Special Mention	\$ 10,120	\$ 6,245
Substandard	67,175	65,039
Doubtful	865	1,081
Investment securities:		
Substandard		25,000

The largest Special Mention loan at March 31, 2013 is a commercial real estate mortgage to a local builder for \$1.8 million which was current as to payments. The loan is well collateralized by residential property and several vacant lots. The largest Substandard loan relationship is the marina credit for \$6.3 million noted above. The largest Doubtful asset with a balance of \$862,000 is a portion of a commercial real estate loan to a self-storage facility. The remaining balance of \$1.3 million is rated Substandard. In September 2011, the Company entered into a troubled debt restructuring with the borrower which reduced the interest rate and extended the payment term. All scheduled payments under the restructured terms have been made since that date. In addition to loan classifications, the Company previously classified select investment securities as Substandard, representing the amount with a credit rating below investment grade from one of the internationally recognized credit rating services. These securities have consistently remained current as to principal and interest payments. During the first quarter of 2013, the Company performed, with the assistance of an independent expert, a detailed analysis relating to the collectability of these securities. The analysis concluded that the issuers of these securities have an adequate capacity to meet financial commitments as originally agreed for the projected life of the security, the risk of default is low and the full and timely repayment of principal and interest is expected.

Critical Accounting Policies

Note 1 to the Company's Audited Consolidated Financial Statements for the year ended December 31, 2012 included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012 (the 2012 Form 10-K), as supplemented by this report, contains a summary of significant accounting policies. Various elements of these accounting policies, by their nature, are inherently subject to estimation techniques, valuation assumptions and other subjective assessments. Certain assets are carried in the consolidated statements of financial condition at fair value or the lower of cost or fair value. Policies with respect to the methodologies used to determine the allowance for loan losses, the reserve for repurchased loans and the valuation of Mortgage Servicing Rights and judgments regarding securities impairment are the most critical accounting policies because they are important to the presentation of the Company's financial condition and results of operations. These judgments and policies involve a higher degree of complexity and require management to make difficult and subjective judgments which often require assumptions or estimates about highly uncertain matters. The use of different judgments, assumptions and estimates could result in material differences in the results of operations or financial condition. These critical accounting policies and their application are reviewed periodically and, at least annually, with the Audit Committee of the Board of Directors.

Private Securities Litigation Reform Act Safe Harbor Statement

In addition to historical information, this quarterly report contains certain forward-looking statements within the meaning of the Private Securities Reform Act of 1995 which are based on certain assumptions and describe future plans, strategies and expectations of the Company. These forward-looking statements are generally identified by use of the words believe, expect, intend, anticipate, estimate, project, will, may, view, opportunity, potential, or similar expressions or expressions of confidence. The Company's ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors which could have a material adverse effect on the operations of the Company and its subsidiaries include, but are not limited to, changes in interest rates, general economic conditions, levels of unemployment in the Bank's lending area, real estate market values in the Bank's lending area, the level of prepayments on loans and mortgage-backed securities, legislative/regulatory changes, monetary and fiscal policies of the U.S. Government including policies of the U.S. Treasury and the Board of Governors of the Federal Reserve System, the quality or composition of the loan or investment portfolios, demand for loan products, deposit flows, competition, demand for financial services in the Company's market area and accounting principles and guidelines. These risks and uncertainties are further discussed in the Company's Annual Report on Form 10-K for the year ended December 31, 2012 and subsequent securities filings and should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. The Company does not undertake and specifically disclaims any obligation to publicly release the result of any revisions which may be made to any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events. Further description of the risks and uncertainties to the business are included in Item 1, Business and Item 1A, Risk Factors of the Company's 2012 Form 10-K and Item 1A of this Form 10-Q.

Table of Contents**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

The Company's interest rate sensitivity is monitored through the use of an interest rate risk (IRR) model. The following table sets forth the amounts of interest-earning assets and interest-bearing liabilities outstanding at March 31, 2013, which were anticipated by the Company, based upon certain assumptions, to reprice or mature in each of the future time periods shown.

At March 31, 2013, the Company's one-year gap was positive 0.63% as compared to positive 0.90% at December 31, 2012.

At March 31, 2013 (dollars in thousands)	3 Months or Less	More than 3 Months to 1 Year	More than 1 Year to 3 Years	More than 3 Years to 5 Years	More than 5 Years	Total
Interest-earning assets: (1)						
Interest-earning deposits and short-term investments	\$ 50,614	\$	\$	\$	\$	\$ 50,614
Investment securities	60,518	41,621	87,830	27,928	4,992	222,889
FHLB stock					17,120	17,120
Mortgage-backed securities	66,220	57,547	119,127	79,304	51,191	373,389
Loans receivable (2)	304,675	404,338	421,810	176,069	215,116	1,522,008
Total interest-earning assets	482,027	503,506	628,767	283,301	288,419	2,186,020
Interest-bearing liabilities:						
Money market deposit accounts	24,523	9,740	21,453	16,218	52,863	124,797
Savings accounts	56,661	24,770	49,686	37,607	117,091	285,815
Interest-bearing checking accounts	500,797	61,004	113,075	92,680	142,991	910,547
Time deposits	47,810	81,610	42,038	39,585	6,308	217,351
FHLB advances	46,000	25,000	144,000	10,000		225,000
Securities sold under agreements to repurchase	71,311					71,311
Other borrowings	22,500		5,000			27,500
Total interest-bearing liabilities	769,602	202,124	375,252	196,090	319,253	1,862,321
Interest sensitivity gap (3)	\$ (287,575)	\$ 301,382	\$ 253,515	\$ 87,211	\$ (30,834)	\$ 323,699
Cumulative interest sensitivity gap	\$ (287,575)	\$ 13,807	\$ 267,322	\$ 354,533	\$ 323,699	\$ 323,699
Cumulative interest sensitivity gap as a percent of total interest-earning assets	(13.16)%	0.63%	12.23%	16.22%	14.81%	14.81%

- (1) Interest-earning assets are included in the period in which the balances are expected to be redeployed and/or repriced as a result of anticipated prepayments, scheduled rate adjustments, and contractual maturities.
- (2) For purposes of the gap analysis, loans receivable includes loans held for sale and non-performing loans gross of the allowance for loan losses, unamortized discounts and deferred loan fees.
- (3) Interest sensitivity gap represents the difference between interest-earning assets and interest-bearing liabilities.

Additionally, the table below sets forth the Company's exposure to interest rate risk as measured by the change in net portfolio value (NPV) and net interest income under varying rate shocks as of March 31, 2013 and December 31, 2012. All methods used to measure interest rate sensitivity involve the use of assumptions, which may tend to oversimplify the manner in which actual yields and costs respond to changes in market interest rates. The Company's interest rate sensitivity should be reviewed in conjunction with the financial statements and notes thereto contained in the 2012 Form 10-K.

Edgar Filing: OCEANFIRST FINANCIAL CORP - Form 10-Q

Item 4. Controls and Procedures

The Company's management, including the Company's principal executive officer and principal financial officer, have evaluated the effectiveness of the Company's disclosure controls and procedures, as such term is defined in Rule 13a-15(e) and 5d-15(e) promulgated under the Securities Exchange Act of 1934, as amended, (the Exchange Act). Based upon their evaluation, the principal executive officer and principal financial officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective. Disclosure controls and procedures are the controls and other procedures that are designed to ensure that the information required to be disclosed in the reports that the Company files or submits under the Exchange Act with the Securities and Exchange Commission (SEC) (1) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (2) is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. In addition, based on that evaluation, there were no changes in the Company's internal control over financial reporting during the quarter ended March 31, 2013 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents**OceanFirst Financial Corp.****Notes To Unaudited Consolidated Financial Statements****Note 1. Basis of Presentation**

The accompanying unaudited consolidated financial statements include the accounts of OceanFirst Financial Corp. (the Company) and its wholly-owned subsidiary, OceanFirst Bank (the Bank), and its wholly-owned subsidiaries, Columbia Home Loans, LLC (Columbia), OceanFirst REIT Holdings, Inc., OceanFirst Services, LLC and 975 Holdings, LLC. The operations of Columbia were shuttered in late 2007.

The interim consolidated financial statements reflect all normal and recurring adjustments which are, in the opinion of management, considered necessary for a fair presentation of the financial condition and results of operations for the periods presented. The results of operations for the three months ended March 31, 2013 are not necessarily indicative of the results of operations that may be expected for all of 2013. In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the statements of financial condition and the results of operations for the period. Actual results could differ from these estimates.

Certain information and note disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted, pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC).

These unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company's Annual Report to Stockholders on Form 10-K for the year ended December 31, 2012.

Note 2. Earnings per Share

The following reconciles shares outstanding for basic and diluted earnings per share for the three months ended March 31, 2013 and 2012 (in thousands):

	Three months ended March 31,	
	2013	2012
Weighted average shares issued net of Treasury shares	17,832	18,651
Less: Unallocated ESOP shares	(459)	(493)
Unallocated incentive award shares and shares held by deferred compensation plan	(88)	(94)
Average basic shares outstanding	17,285	18,064
Add: Effect of dilutive securities:		
Shares held by deferred compensation plan	39	44
Average diluted shares outstanding	17,324	18,108

For the three months ended March 31, 2013 and 2012, antidilutive stock options of 1,109,000 and 2,043,000, respectively, were excluded from earnings per share calculations.

Note 3. Investment Securities Available for Sale

The amortized cost and estimated market value of investment securities available for sale at March 31, 2013 and December 31, 2012 are as follows (in thousands):

March 31, 2013

Edgar Filing: OCEANFIRST FINANCIAL CORP - Form 10-Q

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Market Value
U.S. agency obligations	\$ 138,030	\$ 855	\$	\$ 138,885
State and municipal obligations	24,867	38	(16)	24,889

Equity investments	4,992	424	(123)	5,293
	\$ 223,953	\$ 1,374	\$ (11,734)	\$ 213,593

There were no realized gains or losses on the sale of investment securities available for sale for the three months ended March 31, 2013 and 2012.

The amortized cost and estimated market value of investment securities available for sale, excluding equity investments, at March 31, 2013 by contractual maturity, are shown below (in thousands). Actual maturities will differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties. At March 31, 2013, investment securities available for sale with an amortized cost and estimated market value of \$55.0 million and \$45.1 million, respectively, were callable prior to the maturity date.

	Amortized Cost	Estimated Market Value
March 31, 2013		
Less than one year	\$ 47,139	\$ 47,410
Due after one year through five years	115,758	116,364
Due after five years through ten years		
Due after ten years	55,000	45,087
	\$ 217,897	\$ 208,861

The estimated market value and unrealized loss for investment securities available for sale at March 31, 2013 and December 31, 2012 segregated by the duration of the unrealized loss are as follows (in thousands):

	Less than 12 months		12 months or longer		Total	
	Estimated Market Value	Unrealized Losses	Estimated Market Value	Unrealized Losses	Estimated Market Value	Unrealized Losses
March 31, 2013

\$ 17,182 \$ (204) \$ 43,470 \$ (11,530) \$ 60,652 \$ (11,734)

Table of Contents

At March 31, 2013, the amortized cost, estimated market value and credit rating of the individual corporate debt securities in an unrealized loss position for greater than one year are as follows (in thousands):

Security Description	Amortized Cost	Estimated Market Value	Credit Rating Moody's/S&P
BankAmerica Capital	\$ 15,000	\$ 11,925	Ba2/BB+
Chase Capital	10,000	8,350	Baa2/BBB
Wells Fargo Capital	5,000	4,225	A3/A-
Huntington Capital	5,000	3,950	Baa3/BB+
Keycorp Capital	5,000	4,100	Baa3/BBB-
PNC Capital	5,000	4,262	Baa2/BBB
State Street Capital	5,000	4,200	A3/BBB+
SunTrust Capital	5,000	4,075	Baa3/BB+
	\$ 55,000	\$ 45,087	

At March 31, 2013, the market value of each corporate debt security was below cost. However, the estimated market value of the corporate debt securities portfolio increased over prior periods. The corporate debt securities are issued by other financial institutions with credit ratings ranging from a high of A3 to a low of Ba2 as rated by one of the internationally recognized credit rating services. These floating-rate securities were purchased during the period May 1998 to September 1998 and have paid coupon interest continuously since issuance. Floating-rate debt securities such as these pay a fixed interest rate spread over 90-day LIBOR. Following the purchase of these securities, the required spread increased for these types of securities causing a decline in the market price. The Company concluded that unrealized losses on available for sale securities were only temporarily impaired at March 31, 2013. In concluding that the impairments were only temporary, the Company considered several factors in its analysis. The Company noted that each issuer made all the contractually due payments when required. There were no defaults on principal or interest payments and no interest payments were deferred. All of the financial institutions were also considered well-capitalized. Recently, credit spreads have decreased for these types of securities and market prices have improved. Based on management's analysis of each individual security, the issuers appear to have the ability to meet debt service requirements over the life of the security. Furthermore, although these investment securities are available for sale, the Company does not have the intent to sell these securities and it is more likely than not that the Company will not be required to sell the securities. The Company has held the securities continuously since 1998 and expects to receive its full principal at maturity in 2028 or prior if called by the issuer. The Company has historically not actively sold investment securities and does not utilize the securities portfolio as a source of liquidity. The Company's long range liquidity plans indicate adequate sources of liquidity outside the securities portfolio.

Capital markets in general and the market for these corporate securities in particular have been disrupted since the second half of 2007. In its analysis, the Company considered that the severity and duration of unrecognized losses was at least partly due to the illiquidity caused by market disruptions. Since that time, markets have stabilized partly due to steps taken by the U.S. Treasury, the Federal Reserve Board, the Federal Deposit Insurance Corporation and foreign central banks to restore liquidity and confidence in the capital markets. Each of these issuers has been able to raise capital in recent years and the fair values of these securities have increased since the lows reached in the second half of 2008.

Due to the reasons noted above, especially the continuing restoration of the capital markets, the improved valuation of the corporate securities portfolio from the 2008 lows, the capital position of the issuers and the uninterrupted payment of all contractually due interest, management has determined that only a temporary impairment existed at March 31, 2013.

Note 4. Mortgage-Backed Securities Available for Sale

The amortized cost and estimated market value of mortgage-backed securities available for sale at March 31, 2013 and December 31, 2012 are as follows (in thousands):

March 31, 2013	Amortized Cost	Gross Unrealized	Gross Unrealized	Estimated Market
----------------	----------------	------------------	------------------	------------------

Edgar Filing: OCEANFIRST FINANCIAL CORP - Form 10-Q

		Gains	Losses	Value
FHLMC	\$ 150,415	\$ 1,586	\$ (103)	\$ 151,898
FNMA	222,189	8,144	(84)	230,249
GNMA	785	202		987
	\$ 373,389	\$ 9,932	\$ (187)	\$ 383,134

Table of Contents

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Market Value
December 31, 2012				
FHLMC	\$ 118,294	\$ 1,284	\$ (53)	\$ 119,525
FNMA	204,296	9,017	(11)	213,302
GNMA	824	206		1,030
	\$ 323,414	\$ 10,507	\$ (64)	\$ 333,857

There were no gains or losses realized on the sale of mortgage-backed securities available for sale for the three months ended March 31, 2013 and 2012.

The contractual maturities of mortgage-backed securities available for sale vary; however, the effective lives are expected to be shorter than the contractual maturity date due to principal prepayments.

The estimated market value and unrealized loss for mortgage-backed securities available for sale at March 31, 2013 and December 31, 2012, segregated by the duration of the unrealized loss are as follows (in thousands):

	Less than 12 months		12 months or longer		Total	
	Estimated Market Value	Unrealized Losses	Estimated Market Value	Unrealized Losses	Estimated Market Value	Unrealized Losses
March 31, 2013						
FHLMC	\$ 32,086	\$ (103)	\$ \$		\$ 32,086	\$ (103)
FNMA	19,659	(84)			19,659	(84)
	\$ 51,745	\$ (187)	\$ \$		\$ 51,745	\$ (187)

	Less than 12 months		12 months or longer		Total	
	Estimated Market Value	Unrealized Losses	Estimated Market Value	Unrealized Losses	Estimated Market Value	Unrealized Losses
December 31, 2012						
FHLMC	\$ 16,186	\$ (53)	\$ \$		\$ 16,186	\$ (53)
FNMA	4,871	(11)			4,871	(11)
	\$ 21,057	\$ (64)	\$ \$		\$ 21,057	\$ (64)

The mortgage-backed securities are issued and guaranteed by either FHLMC or FNMA, corporations which are chartered by the United States Government and whose debt obligations are typically rated AA+ by one of the internationally-recognized credit rating services. FHLMC and FNMA have been under the conservatorship of the Federal Housing Financial Agency since September 8, 2008. The conservatorships have no specified termination date. Also, FHLMC and FNMA have entered into Stock Purchase Agreements, which following the issuance of Senior Preferred Stock and Warrants to the United States Treasury, provide FHLMC and FNMA funding commitments from the United States Treasury. The Company considers the unrealized losses to be the result of changes in interest rates which over time can have both a positive and negative impact on the estimated market value of the mortgage-backed securities. Although these mortgage-backed securities are available for sale, the Company does not intend to sell these securities and it is more likely than not that the Company will not be required to sell the securities before recovery of their amortized cost. As a result, the Company concluded that unrealized losses on these available for sale securities were only temporarily impaired at March 31, 2013.

Table of Contents**Note 5. Loans Receivable, Net**

Loans receivable, net at March 31, 2013 and December 31, 2012 consisted of the following (in thousands):

	March 31, 2013	December 31, 2012
Real estate:		
One-to-four family	\$ 784,929	\$ 802,959
Commercial real estate, multi family and land	470,504	475,155
Residential construction	10,947	9,013
Consumer	192,606	198,143
Commercial	63,747	57,967
Total loans	1,522,733	1,543,237
Loans in process	(4,846)	(3,639)
Deferred origination costs, net	3,969	4,112
Allowance for loan losses	(20,494)	(20,510)
Loans receivable, net	\$ 1,501,362	\$ 1,523,200

At March 31, 2013 and December 31, 2012, loans in the amount of \$47,437,000 and \$43,374,000, respectively, were three or more months delinquent or in the process of foreclosure and the Company was not accruing interest income on these loans. There were no loans ninety days or greater past due and still accruing interest. Non-accrual loans include both smaller balance homogenous loans that are collectively evaluated for impairment and individually classified impaired loans.

The Company defines an impaired loan as all non-accrual commercial real estate, multi-family, land, construction and commercial loans in excess of \$250,000. Impaired loans also include all loans modified as troubled debt restructurings. At March 31, 2013, the impaired loan portfolio totaled \$38,312,000 for which there was a specific allocation in the allowance for loan losses of \$3,143,000. At December 31, 2012, the impaired loan portfolio totaled \$37,546,000 for which there was a specific allocation in the allowance for loan losses of \$2,554,000. The average balance of impaired loans for the three months ended March 31, 2013 and 2012 was \$38,187,000 and \$28,733,000, respectively.

An analysis of the allowance for loan losses for the three months ended March 31, 2013 and 2012 is as follows (in thousands):

	Three months ended March 31,	
	2013	2012
Balance at beginning of period	\$ 20,510	\$ 18,230
Provision charged to operations	1,100	1,700
Charge-offs	(1,361)	(1,800)
Recoveries	245	111
Balance at end of period	\$ 20,494	\$ 18,241

Table of Contents

The following table presents an analysis of the allowance for loan losses for the three months ended March 31, 2013 and 2012 and the balance in the allowance for loan losses and the recorded investment in loans by portfolio segment and based on impairment method as of March 31, 2013 and December 31, 2012 (in thousands):

	Residential Real Estate	Commercial Real Estate	Consumer	Commercial	Unallocated	Total

Construction and land	472	482
Consumer	4,680	4,540
Commercial	472	746
	\$ 47,437	\$ 43,374

As used in these footnotes, loans Originated by mortgage company are mortgage loans originated under the Bank's underwriting guidelines by the Bank's shuttered mortgage company, and retained as part of the Bank's mortgage portfolio. These loans have significantly higher delinquency rates than similar loans originated by the Bank. Loans Originated by mortgage company non-prime are subprime or Alt-A loans which were originated for sale into the secondary market by the Bank's shuttered mortgage company.

The following table presents the aging of the recorded investment in past due loans as of March 31, 2013 and December 31, 2012 by class of loans (in thousands):

	30-59 Days Past Due	60-89 Days Past Due	Greater than 90 Days Past Due	Total Past Due	Loans Not Past Due	Total

					\$ 1,497,711	\$ 1,543,237

The Company categorizes all commercial and commercial real estate loans, except for small business loans, into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation and current economic trends, among other factors. This analysis is performed on a quarterly basis. The Company uses the following definitions for risk ratings:

Special Mention. Loans classified as Special Mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the Bank's credit position at some future date.

Table of Contents

Substandard. Loans classified as Substandard are inadequately protected by the current net worth and paying capacity of the borrower or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.

Doubtful. Loans classified as Doubtful have all the weaknesses inherent in those classified as Substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Loans not meeting the criteria above that are analyzed individually as part of the above described process are considered to be Pass rated loans. Loans not rated are included in groups of homogeneous loans. As of March 31, 2013 and December 31, 2012, and based on the most recent analysis performed, the risk category of loans by class of loans is as follows (in thousands):

	Pass	Special Mention	Substandard	Doubtful	Total
March 31, 2013					
Commercial real estate:					
Commercial	\$ 423,915	\$ 1,775	\$ 30,963	\$ 862	\$ 457,515
Construction and land	12,011	506	472		12,989
Commercial	63,374		373		63,747
	\$ 499,300	\$ 2,281	\$ 31,808	\$ 862	\$ 534,251

December 31, 2012					
Commercial real estate:					
Commercial	\$ 429,393	\$ 1,775	\$ 31,275	\$ 844	\$ 463,287
Construction and land	10,880	506	482		11,868
Commercial	57,341		391	235	57,967
	\$ 497,614	\$ 2,281	\$ 32,148	\$ 1,079	\$ 533,122

For residential and consumer loan classes, the Company evaluates credit quality based on the aging status of the loan, which was previously presented, and by payment activity. The following table presents the recorded investment in residential and consumer loans based on payment activity as of March 31, 2013 and December 31, 2012 (in thousands):

	Originated by Bank	Originated by mortgage company	Residential Real Estate Originated by mortgage company non-prime	Residential construction	Consumer
March 31, 2013

Edgar Filing: OCEANFIRST FINANCIAL CORP - Form 10-Q

The Company classifies certain loans as troubled debt restructurings (TDR) when credit terms to a borrower in financial difficulty are modified. The modifications may include a reduction in rate, an extension in term and/or the capitalization of past due amounts. Included in the non-accrual loan total at March 31, 2013 and December 31, 2012 were \$19,287,000 and \$18,160,000, respectively, of troubled debt restructurings. At March 31, 2013 and December 31, 2012, the Company has allocated \$2,410,000 and \$2,418,000, respectively, of specific reserves to loans which are classified as troubled debt restructurings. Non-accrual loans which become troubled debt restructurings are returned to accrual status after six months of performance. In addition to the troubled debt restructurings included in non-accrual loans, the Company also has loans classified as troubled debt restructurings which are accruing at March 31, 2013 and December 31, 2012, which totaled \$16,328,000 and \$17,733,000, respectively. Non-accruing and accruing troubled debt restructurings were adversely impacted at March 31, 2013 by \$2,877,000 and \$5,164,000, respectively, and at December 31, 2012 by \$1,704,000 and

Table of Contents

\$6,291,000, respectively, due to the implementation of new guidance issued by the Bank's regulator, the Office of the Comptroller of the Currency (OCC). The amount now includes one-to-four family and consumer loans where the borrower's obligation was discharged due to bankruptcy. The updated guidance requires the Company to include certain loans as troubled debt restructurings due to the discharge of the borrower's debt. These loans continue to make payments as agreed and the Bank retains its security interest in the real estate collateral. Troubled debt restructurings with six months of performance are considered in the allowance for loan losses similar to other performing loans. Troubled debt restructurings which are non-accrual or classified are considered in the allowance for loan losses similar to other non-accrual or classified loans.

The following table presents information about troubled debt restructurings which occurred during the three months ended March 31, 2013 and 2012, and troubled debt restructurings modified within the previous year and which defaulted during the three months ended March 31, 2013 and 2012 (dollars in thousands):

Which Subsequently Defaulted:	None	None

Note 6. Reserve for Repurchased Loans and Loss Sharing Obligations

An analysis of the reserve for repurchased loans and loss sharing obligations for the three months ended March 31, 2013 and 2012 is as follows (in thousands). The reserve is included in other liabilities in the accompanying statements of financial condition.

	Three months ended March 31,	
	2013	2012
Balance at beginning of period	\$ 1,203	\$ 705
Provision charged to operations	975	150
Loss on loans repurchased, settlements or payments under loss sharing arrangements	(695)	
Recoveries	205	

Balance at end of period	\$ 1,688	\$ 855
--------------------------	----------	--------

The reserve for repurchased loans and loss sharing obligations was established to provide for expected losses related to outstanding loan repurchase requests, additional repurchase requests which may be received on loans previously sold to investors and other loss sharing obligations. In establishing the reserve for repurchased loans and loss sharing obligations, the Company considered all types of sold loans. The Company prepares a comprehensive analysis of the adequacy of the reserve for repurchased loans and loss sharing obligations at each quarter-end. The reserve includes a specific loss estimate on the outstanding loan repurchase requests based on the estimated fair value of the underlying collateral modified by the likelihood of loss which was estimated based on historical experience. The reserve also includes a general loss estimate based on an estimate of loans likely to be returned for repurchase and the estimated loss on those loans. Finally, the reserve also includes

Table of Contents

an estimate of the Bank's obligation under a loss sharing arrangement with the Federal Home Loan Bank relating to loans sold into their Mortgage Partnership Finance (MPF) program. Under this program, the Bank and the FHLB share credit risk for loans sold. The first loss position, equal to 1% of the aggregate amount of the loan pool, is absorbed by the FHLB through a reduction in credit enhancement fees paid to the Bank. The second loss position, generally covering the next 1.5% to 4.0% of the aggregate loan pool, is absorbed by the Bank. Loan losses above the combination of these two thresholds are fully absorbed by the FHLB. In establishing the reserve, the Company considered recent and historical experience, product type and volume of loan sales and the general economic environment.

The reserve for repurchased loans and loss sharing obligations was \$1.7 million at March 31, 2013, a \$485,000 increase from December 31, 2012 due to a general provision of \$100,000 for repurchase requests, an additional provision relating to loans sold to the FHLB, incurred losses relating to the FHLB loan sales, a comprehensive settlement with one investor relating to existing and anticipated loan repurchase requests, and recoveries of previously charged-off amounts. For the three months ended March 31, 2013, the Bank recognized actual losses for the first time under the MPF program of \$245,000 on two loans in a single pool. In light of these realized losses, the Bank performed an analysis of additional loss exposure and determined that additional covered losses within that loan pool were likely and recorded an additional provision of \$875,000. The analysis also revealed the actual losses of \$245,000 and the general provision of \$875,000 related to asset quality deterioration in the loan pool should have been recognized in prior periods; however these amounts were not considered material to such periods. The Bank's maximum remaining loss exposure on all loans sold to the FHLB is \$1.8 million, although the Bank's reserve includes an estimate of expected future losses. Therefore, additional losses will only be recognized if loan performance deteriorates beyond expectations. The reserve was reduced by a cash payment of \$450,000 as part of a comprehensive settlement with a single investor which settled seven outstanding loan repurchase requests and terminated the right of the investor to make any future claims for repurchase. The anticipated loss on this comprehensive settlement was considered in establishing the reserve at December 31, 2012. The Bank also recognized \$205,000 in recoveries relating to amounts previously charged-off. At March 31, 2013, there were six outstanding loan repurchase requests which the Company is disputing on loans with a total principal balance of \$1.8 million, as compared to 12 outstanding loan repurchase requests with a principal balance of \$3.6 million at December 31, 2012.

Note 7. Deposits

The major types of deposits at March 31, 2013 and December 31, 2012 were as follows (in thousands):

Type of Account	March 31, 2013	December 31, 2012
Non-interest-bearing	\$ 201,784	\$ 179,074
Interest-bearing checking	910,547	940,190
Money market deposit	124,797	118,154
Savings	285,815	256,035
Time deposits	217,351	226,218
Total deposits	\$ 1,740,294	\$ 1,719,671

Included in time deposits at March 31, 2013 and December 31, 2012, is \$55,414,000 and \$57,871,000, respectively, in deposits of \$100,000 and over.

Note 8. Recent Accounting Pronouncements

Accounting Standards Update No. 2013-02, Comprehensive Income Reporting Amounts Reclassified Out of Accumulated Other Comprehensive Income requires an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component. In addition, an entity is required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amount reclassified is required under Generally Accepted Accounting Principles (GAAP) to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required under GAAP to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures required under GAAP that provide additional detail about those amounts. The standard is effective prospectively for reporting periods, including interim periods, beginning after December 15, 2012. For the three months ended March 31, 2013, the Company had no reclassifications out of accumulated other comprehensive income and into net income.

Note 9. Fair Value Measurements

Edgar Filing: OCEANFIRST FINANCIAL CORP - Form 10-Q

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair market measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or the most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact.

Table of Contents

The Company uses valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement costs). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability and developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability and developed based on the best information available in the circumstances. In that regard, a fair value hierarchy has been established for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. Movements within the fair value hierarchy are recognized at the end of the applicable reporting period. There were no transfers between the levels of the fair value hierarchy for the three months ended March 31, 2013. The fair value hierarchy is as follows:

Level 1 Inputs Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (for example, interest rates, volatilities, prepayment speeds, loss severities, credit risks and default rates) or inputs that are derived principally from or corroborated by observable market data by correlations or other means.

Level 3 Inputs Significant unobservable inputs that reflect an entity's own assumptions that market participants would use in pricing the assets or liabilities.

Assets and Liabilities Measured at Fair Value

A description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. Certain financial assets and financial liabilities are measured at fair value on a non-recurring basis, that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment).

Investments and Mortgage-Backed Securities

Securities classified as available for sale are reported at fair value utilizing Level 1 and Level 2 inputs. In general, fair value is based upon quoted market prices, where available. Most of the Company's investment and mortgage-backed securities, however, are fixed income instruments that are not quoted on an exchange, but are bought and sold in active markets. Prices for these instruments are obtained through third party pricing vendors or security industry sources that actively participate in the buying and selling of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing is a mathematical technique used principally to value certain securities without relying exclusively on quoted prices for the specific securities, but comparing the securities to benchmark or comparable securities.

Fair value estimates are made at a point in time, based on relevant market data as well as the best information available about the security. Illiquid credit markets have resulted in inactive markets for certain of the Company's securities. As a result, there is limited observable market data for these assets. Fair value estimates for securities for which limited observable market data is available are based on judgments regarding current economic conditions, liquidity discounts, credit and interest rate risks, and other factors. These estimates involve significant uncertainties and judgments and cannot be determined with precision. As a result, such calculated fair value estimates may not be realizable in a current sale or immediate settlement of the security.

The Company utilizes third party pricing services to obtain market values for its corporate bonds. Management's policy is to obtain and review all available documentation from the third party pricing service relating to their market value determinations, including their methodology and summary of inputs. Management reviews this documentation, makes inquiries of the third party pricing service and makes a determination as to the level of the valuation inputs. Based on the Company's review of the available documentation from the third party pricing service, management concluded that Level 2 inputs were utilized. The significant observable inputs include benchmark yields, reported trades, broker/dealer quotes, issuer spreads, benchmark securities and observations of equity and credit default swap curves related to the issuer.

Table of Contents**Other Real Estate Owned and Impaired Loans**

Other real estate owned, and loans measured for impairment based on the fair value of the underlying collateral are recorded at estimated fair value, less estimated selling costs of 20% and 15%, respectively. Fair value is based on independent appraisals.

The following table summarizes financial assets and financial liabilities measured at fair value as of March 31, 2013 and December 31, 2012, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (in thousands):

	Fair Value Measurements at Reporting Date Using:			
	Total Fair Value	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs
<u>March 31, 2013</u>				
Items measured on a recurring basis:				
Investment securities available for sale:				
U.S. agency obligations	\$ 138,885	\$	\$ 138,885	\$
State and municipal obligations	24,889		24,889	
Corporate debt securities	45,087		45,087	
Equity investments	5,685	5,685		
Mortgage-backed securities available for sale	383,134		383,134	
Items measured on a non-recurring basis:				
Other real estate owned	2,813			2,813
Loans measured for impairment based on the fair value of the underlying collateral	12,497			12,497

	Fair Value Measurements at Reporting Date Using:			
	Total Fair Value	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs
<u>December 31, 2012</u>				
Items measured on a recurring basis:				
Investment securities available for sale:				
U.S. agency obligations	\$ 139,050	\$	\$ 139,050	\$
State and municipal obligations	25,780		25,780	
Corporate debt securities	43,470		43,470	
Equity investments	5,293	5,293		
Mortgage-backed securities available for sale	333,857		333,857	
Items measured on a non-recurring basis:				
Other real estate owned	3,210			3,210
Loans measured for impairment based on the fair value of the underlying collateral	12,033			12,033

Assets and Liabilities Disclosed at Fair Value

A description of the valuation methodologies used for assets and liabilities disclosed at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy is set forth below.

Cash and Due from Banks

For cash and due from banks, the carrying amount approximates fair value.

Federal Home Loan Bank of New York Stock

The fair value for Federal Home Loan Bank of New York stock is its carrying value since this is the amount for which it could be redeemed. There is no active market for this stock and the Company is required to maintain a minimum investment based upon the outstanding balance of mortgage related assets and outstanding borrowings.

Loans

Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as residential mortgage, construction, consumer and commercial. Each loan category is further segmented into fixed and adjustable rate interest terms.

Fair value of performing and non-performing loans was estimated by discounting the future cash flows, net of estimated prepayments, at a rate for which similar loans would be originated to new borrowers with similar terms. Fair values estimated in this manner do not fully incorporate an exit price approach to fair value, but instead are based on a comparison to current market rates for comparable loans.

Table of Contents**Deposits Other than Time Deposits**

The fair value of deposits with no stated maturity, such as non-interest-bearing demand deposits, savings, and interest-bearing checking accounts and money market accounts are, by definition, equal to the amount payable on demand. The related insensitivity of the majority of these deposits to interest rate changes creates a significant inherent value which is not reflected in the fair value reported.

Time Deposits

The fair value of time deposits are based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities.

Securities Sold Under Agreements to Repurchase with Retail Customers

Fair value approximates the carrying amount as these borrowings are payable on demand and the interest rate adjusts monthly.

Borrowed Funds

Fair value estimates are based on discounting contractual cash flows using rates which approximate the rates offered for borrowings of similar remaining maturities.

The book value and estimated fair value of the Bank's significant financial instruments not recorded at fair value as of March 31, 2013 and December 31, 2012 are presented in the following tables (in thousands):

	Book Value	Fair Value Measurements at Reporting Date Using:		
		Level 1 Inputs	Level 2 Inputs	Level 3 Inputs
<u>March 31, 2013</u>				
Financial Assets:				
Cash and due from banks	\$ 71,361	\$ 71,361	\$	\$
Federal Home Loan Bank of New York stock	17,120			17,120
Loans receivable and mortgage loans held for sale	1,505,483			1,544,225
Financial Liabilities:				
Deposits other than time deposits	1,522,943		1,522,943	
Time deposits	217,351		222,070	
Securities sold under agreements to repurchase with retail customers	71,311	71,311		
Federal Home Loan Bank advances and other borrowings	252,500		257,677	
	Book Value	Fair Value Measurements at Reporting Date Using:		
		Level 1 Inputs	Level 2 Inputs	Level 3 Inputs
<u>December 31, 2012</u>				
Financial Assets:				
Cash and due from banks	\$ 62,544	\$ 62,544	\$	\$
Federal Home Loan Bank of New York stock	17,061			17,061
Loans receivable and mortgage loans held for sale	1,529,946			1,572,291
Financial Liabilities:				
Deposits other than time deposits	1,493,453		1,493,453	
Time deposits	226,218		231,445	
Securities sold under agreements to repurchase with retail customers	60,791	60,791		
Federal Home Loan Bank advances and other borrowings	252,500		258,577	

Limitations

Edgar Filing: OCEANFIRST FINANCIAL CORP - Form 10-Q

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because a limited market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other significant unobservable inputs. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Fair value estimates are based on existing balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. Significant assets and liabilities that are not considered financial assets or liabilities include deferred tax assets, and premises and equipment. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in the estimates.

Table of Contents**PART II. OTHER INFORMATION****Item 1. Legal Proceedings**

The Company is not engaged in any legal proceedings of a material nature at the present time. From time to time, the Company is a party to routine legal proceedings within the normal course of business. Such routine legal proceedings in the aggregate are believed by management to be immaterial to the Company's financial condition or results of operations.

Item 1A. Risk Factors

For a summary of risk factors relevant to the Company, see Part I, Item 1A, Risk Factors, in the 2012 Form 10-K. There were no material changes to risk factors relevant to the Company's operations since December 31, 2012.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On November 27, 2012, the Company announced its intention to repurchase up to 901,002 shares or 5% of its outstanding common stock. Information regarding the Company's common stock repurchases for the three month period ended March 31, 2013 is as follows:
