**PRESS RELEASE**

Amsterdam, 20 December 2013

**ING publishes historical trend data adjusted for upcoming changes in the ING Insurance reporting structure**

As previously announced, and in the context of the preparations of ING Insurance to become a stand-alone company through a base case Initial Public Offering (IPO), ING Insurance will change its reporting segmentation starting per the fourth quarter of 2013. The new reporting segmentation better aligns the businesses of ING Insurance with their governance and internal management. The historical trend data published today allows for easy comparison with fourth-quarter and full-year 2013 results that will be published on 12 February 2014.

The new segmentation for ING Insurance includes the businesses of ING Life Japan. As previously announced, these businesses are in scope of the base case IPO of ING Insurance and will therefore no longer be classified as held for sale and discontinued operations. In line with the above, the reporting segments for ING Insurance as of the fourth quarter 2013 are as follows:

Netherlands Life

Netherlands Non-life

Insurance Europe

Japan Life

Investment Management

Other

Japan Closed Block VA

In addition to the changed segmentation, ING Insurance will use Operating result of the ongoing business and Result before tax as its main financial performance indicators instead of Underlying result, reflecting the focus of ING Insurance on the operating results of the ongoing businesses. A reconciliation from Operating result to Underlying result is provided in the historical trend data.

The extra historical trend data can be downloaded via [ING.com](http://ING.com).
