Introductory Note: Caution Concerning Forward-Looking Statements

This Quarterly Report on Form 10-Q and the Company's other communications and statements may contain forward-looking statements, including statements about the Company's beliefs, plans, objectives, goals, expectations, estimates, projections and intentions. These statements are subject to significant risks and uncertainties and are subject to change based on various factors, many of which are beyond the Company's control. The words "may," "could," "should," "would," "believe," "anticipate," "estimate," "expect," "intend," "plan," "target," "goal," and similar expressions are intended to identify forward-looking statements. All forward-looking statements, by their nature, are subject to risks and uncertainties. The Company's actual future results may differ materially from those set forth in its forward-looking statements. For information concerning these factors and related matters, see Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations," in this Report, and the following sections of the Company's Annual Report on Form 10-K for the year ended September 30, 2018: (a) Risk Factors in Part I, and (b) Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II. However, other factors besides those referenced could adversely affect the Company's results, and you should not consider any such list of factors to be a complete set of all potential risks or uncertainties. Any forward-looking statements made by the Company herein speak as of the date of this Quarterly Report. The Company does not undertake to update any forward-looking statement, except as required by law.

Unless the context otherwise indicates, all references in this Quarterly Report to the Company, Gencor, we, us, or or similar words are to Gencor Industries, Inc. and its subsidiaries.

GENCOR INDUSTRIES, INC.

Notes to Condensed Consolidated Financial Statements

For the Quarter Ended December 31, 2018

(Unaudited)

Note 1 Basis of Presentation

The accompanying condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all material adjustments (consisting of normal, recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the quarter ended December 31, 2018 are not necessarily indicative of the results that may be expected for the year ending September 30, 2019.

The accompanying Condensed Consolidated Balance Sheet at September 30, 2018 has been derived from the audited financial statements at that date but does not include all of the information and notes required by generally accepted accounting principles for complete financial statements.

For further information, refer to the consolidated financial statements and notes thereto included in the Gencor Industries, Inc. Annual Report on Form 10-K for the year ended September 30, 2018.

Accounting Pronouncements and Policies

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers* (Topic 606) (ASU 2014-09), amending its accounting guidance related to revenue recognition. Under this ASU and subsequently issued amendments, revenue is recognized to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Additional disclosures are required to provide the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. The standard is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2017. The Company adopted ASU 2014-09 in the first quarter of fiscal 2019. The Company elected to adopt the standard using the modified retrospective method. The adoption of ASU 2014-09 did not have a significant impact on its consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, *Leases* (Topic 842) (ASU 2016-02). With adoption of this standard, lessees will have to recognize most leases as a right-of-use asset and a lease liability on their balance sheet. For income statement purposes, the FASB retained a dual model, requiring leases to be classified as either operating or finance. Classification will be based on criteria that are similar to those applied in current lease accounting. ASU 2016-02 must be applied on a modified retrospective basis and is effective for fiscal years beginning after December 15, 2018, and interim periods within those years, with early adoption permitted. The Company does not expect the new accounting standard to have a significant impact on its financial results when adopted.

In May 2017, the FASB issued ASU 2017-09, *Compensation - Stock Compensation* (Topic 718): *Scope of Modification Accounting* (ASU 2017-09). The new guidance clarifies when a change to the terms or conditions of a share based

payment award must be accounted for as a modification. ASU 2017-09 is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2017, with early adoption permitted. The Company adopted ASU 2017-09 in the first quarter of its fiscal 2019. The adoption of ASU 2017-09 did not have a significant impact on its consolidated financial statements.

Note 2 Marketable Securities

Marketable debt and equity securities are categorized as trading securities and are thus marked to market and stated at fair value. Fair value is determined using the quoted closing or latest bid prices for Level 1 investments and market standard valuation methodologies for Level 2 investments. Realized gains and losses on investment

Table of Contents

transactions are determined by specific identification and are recognized as incurred in the condensed consolidated statements of income. Net unrealized gains and losses are reported in the condensed consolidated statements of income in the current period and represent the change in the fair value of investment holdings during the period.

Fair Value Measurements

The fair value of financial instruments is presented based upon a hierarchy of levels that prioritizes the inputs of valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

The fair value of marketable equity securities, mutual funds, exchange-traded funds, corporate bonds, government securities, and cash and money funds are substantially based on quoted market prices (Level 1). Corporate bonds are valued using market standard valuation methodologies, including: discounted cash flow methodologies, and matrix pricing or other similar techniques. The inputs to these market standard valuation methodologies include, but are not limited to: interest rates, credit standing of the issuer or counterparty, industry sector of the issuer, coupon rate, call provisions, maturity, estimated duration and assumptions regarding liquidity and estimated future cash flows. In addition to bond characteristics, the valuation methodologies incorporate market data, such as actual trades completed, bids and actual dealer quotes, where such information is available. Accordingly, the estimated fair values are based on available market information and judgments about financial instruments (Level 2). Fair values of the Level 2 investments are provided by the Company's professional investment management firm.

The following table sets forth, by level, within the fair value hierarchy, the Company's assets measured at fair value as of December 31, 2018:

	Fair Value Measurements			Total
	Level 1	Level 2	Level 3	
Equities	\$ 15,603,000	\$	\$	\$ 15,603,000
Mutual Funds	3,832,000			3,832,000
Exchange-Traded Funds	5,759,000			5,759,000
Corporate Bonds		39,273,000		39,273,000
Government Securities	38,900,000			38,900,000
Cash and Money Funds	1,078,000			1,078,000
Total	\$ 65,172,000	\$ 39,273,000	\$	\$ 104,445,000

Net unrealized losses recognized during the quarter ended December 31, 2018 on trading securities still held as of December 31, 2018 were \$(2,425,000). There were no transfers of investments between Level 1 and Level 2 during the quarter ended December 31, 2018. In the quarter ended December 2018, the Company invested an additional \$2.0 million of its operating cash in marketable securities.

The following table sets forth by level, within the fair value hierarchy, the Company's assets measured at fair value as of September 30, 2018:

Edgar Filing: GENCOR INDUSTRIES INC - Form 10-Q

	Fair Value Measurements			Total
	Level 1	Level 2	Level 3	
Equities	\$ 11,768,000	\$	\$	\$ 11,768,000
Mutual Funds	3,811,000			3,811,000
Exchange-Traded Funds	4,148,000			4,148,000
Corporate Bonds		29,884,000		29,884,000
Government Securities	53,883,000			53,883,000
Cash and Money Funds	564,000			564,000
Total	\$ 74,174,000	\$ 29,884,000	\$	\$ 104,058,000

Table of Contents

Net unrealized losses recognized during the quarter ended December 31, 2017 on trading securities still held as of December 31, 2017 were \$(184,000). There were no transfers of investments between Level 1 and Level 2 during the quarter ended December 31, 2017.

The carrying amounts of cash and cash equivalents, accounts receivable and accounts payable approximate fair value because of the short-term nature of these items.

Note 3 Inventories

Inventories are valued at the lower of cost or market, with cost being determined principally by using the last-in, first-out (LIFO) method and market defined as replacement cost for raw materials and net realizable value for work in process and finished goods. Appropriate consideration is given to obsolescence, excessive levels, deterioration, possible alternative uses and other factors in determining net realizable value. The cost of work in process and finished goods includes materials, direct labor, variable costs and overhead. The Company evaluates the need to record inventory adjustments on all inventories, including raw materials, work in process, finished goods, spare parts and used equipment. Used equipment acquired by the Company on trade-in from customers is carried at estimated net realizable value. Unless specific circumstances warrant different treatment regarding inventory obsolescence, the carrying value of inventories three to four years old is reduced by 50%, while the carrying value of inventories four to five years old is reduced by 75%, and the carrying value of inventories greater than five years old is reduced to zero. Inventory is typically reviewed for obsolescence on an annual basis computed as of September 30, the Company's fiscal year end. If significant known changes in trends, technology or other specific circumstances that warrant consideration occur during the year, then the impact on obsolescence is considered at that time.

Net inventories at December 31, 2018 and September 30, 2018 consist of the following:

	December 31, 2018	September 30, 2018
Raw materials	\$ 12,525,000	\$ 11,254,000
Work in process	651,000	1,020,000
Finished goods	7,037,000	5,924,000
Used equipment	16,000	16,000
	\$ 20,229,000	\$ 18,214,000

Note 4 Costs and Estimated Earnings in Excess of Billings

Costs and estimated earnings in excess of billings on uncompleted contracts as of December 31, 2018 and September 30, 2018 consist of the following:

	December 31, 2018	September 30, 2018
Costs incurred on uncompleted contracts	\$ 27,145,000	\$ 17,437,000
Estimated earnings	10,668,000	7,335,000

Edgar Filing: GENCOR INDUSTRIES INC - Form 10-Q

	37,813,000	24,772,000
Billings to date	24,494,000	12,872,000
Costs and estimated earnings in excess of billings	\$ 13,319,000	\$ 11,900,000

Table of Contents**Note 5 Earnings per Share Data**

The following table sets forth the computation of basic and diluted earnings per share for the quarters ended December 31, 2018 and 2017:

	December 31, 2018	December 31, 2017
Net income	\$ 313,000	\$ 2,346,000
Common Shares:		
Weighted-average common shares outstanding	14,541,000	14,458,000
Effect of dilutive stock options	158,000	265,000
Weighted-average diluted shares outstanding	14,699,000	14,723,000
Basic:		
Net income per share	\$ 0.02	\$ 0.16
Diluted:		
Net income per share	\$ 0.02	\$ 0.16

Basic earnings per share is based on the weighted-average number of shares outstanding. Diluted earnings per share is based on the sum of the weighted-average number of shares outstanding plus common stock equivalents.

Weighted-average shares issuable upon the exercise of stock options included in the diluted earnings per share calculation for the quarter ended December 31, 2018 were 317,000, which equates to 158,000 dilutive common stock equivalents. Weighted-average shares issuable upon the exercise of stock options included in the diluted earnings per share calculation for the quarter ended December 31, 2017 were 401,000, which equated to 265,000 dilutive common stock equivalents. Weighted-average shares issuable upon the exercise of stock options, which were not included in the diluted earnings per share calculations because they were anti-dilutive, were zero for the quarters ended December 31, 2018 and 2017.

Note 6 Customers with 10% (or greater) of Net Revenues

Four customers accounted for 24.7%, 22.9%, 14.8% and 13.7% of net revenues, respectively, for the quarter ended December 31, 2018. Net revenues for each of these four customers were less than 1% during the prior year comparative periods.

Four other customers accounted for 19.3%, 13.9%, 12.6% and 12.0% of net revenues, respectively, for the quarter ended December 31, 2017.

Note 7 Income Taxes

On December 22, 2017, the U.S. Tax Cuts and Jobs Act (the Tax Reform Act) was signed into law by President Donald Trump. The Tax Reform Act significantly lowered the U.S. corporate income tax rate from 35% to 21% effective January 1, 2018, while also repealing the deduction for domestic production activities for tax years

beginning after December 31, 2017, implementing a territorial tax system and imposing repatriation tax on deemed repatriated earnings of foreign subsidiaries. U.S. GAAP requires that the impact of tax legislation be recognized in the period in which the law was enacted. As a result of the Tax Reform Act, the Company recorded a tax benefit of \$0.7 million due to re-measurement of its deferred tax liability, in the three months ended December 31, 2017. The Company recorded an additional \$0.1 million of tax benefits related to the Tax Reform Act in the fourth quarter of fiscal 2018.

Table of Contents**Note 8 Revenue Recognition and Related Costs**

As discussed in Note 1, the Company adopted the provisions of ASU No. 2014-09 and related amendments effective for the quarter ended December 31, 2018 using the modified retrospective method. The adoption of this standard did not have a material impact on the timing or amounts of revenues recognized by the Company, and, as such, no cumulative effect adjustment was recorded with the adoption of the standard.

The following table disaggregates the Company's net revenue by major source for the quarter ended December 31, 2018:

Equipment sales recognized over time	\$ 16,353,000
Equipment sales recognized at a point in time	1,514,000
Parts and component sales	3,051,000
Freight revenue	402,000
Other	7,000
Net revenue	\$ 21,327,000

Revenues from contracts with customers for the design, manufacture and sale of custom equipment are recognized over time when the performance obligation is satisfied by transferring control of the equipment. Control of the equipment transfers over time as the equipment is unique to the specific contract and thus does not create an asset with an alternative use to the Company. Revenues and costs are recognized in proportion to actual labor costs incurred, as compared with total estimated labor costs expected to be incurred, during the entire contract. All incremental costs related to obtaining a contract are expensed as incurred as the amortization period is less than one year. Changes to total estimated contract costs or losses, if any, are recognized in the period in which they are determined.

Contract assets (excluding accounts receivable) under contracts with customers represent revenue recognized in excess of amounts billed on equipment sales recognized over time. These contract assets were \$13,319,000 at December 31, 2018 and are included in current assets as costs and estimated earnings in excess of billings on the Company's Condensed Consolidated Balance Sheet at December 31, 2018. The Company anticipates that all these contract assets at December 31, 2018, will be billed and collected within one year.

Revenues from all other contracts for the design and manufacture of equipment, for service and for parts sales, net of any discounts and return allowances, are recorded at a point in time when control of the goods or services has been transferred. Control of the goods or service typically transfers at time of shipment or upon completion of the service.

Payment for equipment under contract with customers is typically due prior to shipment. Payment for services under contract with customers is due as certain milestones are completed. Accounts receivable related to contracts with customers at December 31, 2018 was \$264,000.

Product warranty costs are estimated using historical experience and known issues and are charged to production costs as revenue is recognized. Provisions for estimated returns and allowances and other adjustments are provided for in the same period the related sales are recorded. Returns and allowances, which reduce product revenue, are estimated using historical experience.

Under certain contracts with customers, recognition of a portion of the consideration received may be deferred and recorded as a contract liability if the Company has to satisfy a future obligation, such as to provide installation assistance. There were no contract liabilities other than customer deposits at December 31, 2018. Customer deposits related to contracts with customers were \$3,397,000 at December 31, 2018, and are included in current liabilities on the Company's Condensed Consolidated Balance Sheet at December 31, 2018.

Table of Contents

The Company records revenues earned for shipping and handling as freight revenue at the time of shipment, regardless of whether or not it is identified as a separate performance obligation. The cost of shipping and handling is classified as cost of goods sold concurrently.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Gencor Industries, Inc. (the Company) is a leading manufacturer of heavy machinery used in the production of highway construction materials, synthetic fuels, and environmental control equipment. The Company's core products include asphalt plants, combustion systems and fluid heat transfer systems. The Company's products are manufactured in two facilities in the United States.

Because the Company's products are sold primarily to the highway construction industry, the business is seasonal in nature. Traditionally, the Company's customers do not purchase new equipment for shipment during the summer and fall months to avoid disrupting their peak season for highway construction and repair work. The majority of orders for the Company's products are thus received between October and February, with a significant volume of shipments occurring prior to June. The principal factors driving demand for the Company's products are the overall economic conditions, the level of government funding for domestic highway construction and repair, Canadian infrastructure spending, the need for spare parts, fluctuations in the price of crude oil (liquid asphalt, as well as fuel costs), and a trend towards larger plants resulting from industry consolidation.

On December 4, 2015, President Obama signed into law a five-year, \$305 billion transportation bill, Fixing America's Surface Transportation Act (the FAST Act). The FAST Act reauthorized the collection of the 18.4 cents per gallon gas tax that is typically used to pay for transportation projects. It also included \$70 billion from other areas of the federal budget to close a \$16 billion annual funding deficit. The bill includes spending of more than \$205 billion on roads and highways over five years. The 2016 funding levels are approximately 5% above 2015 projected funding, with annual increases between 2.0% and 2.5% from 2016 through 2020.

California's Senate Bill 1 (SB1), the Road Repair and Accountability Act of 2017, was signed into law on April 28, 2017. The legislative package invests \$54 billion over the next decade to fix roads, freeways and bridges in communities across California and puts more dollars towards transit and safety. These funds will be allocated to state and local projects.

In addition to government funding and overall economic conditions, fluctuations in the price of steel, which is a significant cost and product used in the manufacturing of most of the Company's equipment, may affect the Company's financial performance. The Company is subject to fluctuations in market prices for raw materials, such as steel. If the Company is unable to purchase materials it requires or is unable to pass on price increases to its customers or otherwise reduce its cost of goods sold, its business results of operations and financial condition may be adversely affected.

Also, an increase in the price of liquid asphalt could decrease demand for hot mix asphalt paving materials and certain of the Company's products. Increases in oil prices also drive up the cost of gasoline and diesel, which results in increased freight costs. Where possible, the Company will pass increased freight costs on to its customers. However, the Company may not be able to recapture all of the increased costs and thus could have a negative impact on the Company's financial performance.

The Company believes its strategy of continuing to invest in product engineering and development and its focus on delivering the highest quality products and superior service will strengthen the Company's market position. The Company continues to review its internal processes to identify inefficiencies and cost-reduction opportunities. The Company will continue to scrutinize its relationships with external suppliers to ensure it is achieving the highest quality materials and services at the most competitive cost.

Table of Contents

Results of Operations

Quarter Ended December 31, 2018 versus December 31, 2017

Net revenues for the quarters ended December 31, 2018 and December 31, 2017 were \$21,327,000 and \$23,122,000, respectively, a decrease of \$1,795,000. The decline in revenues reflects a moderate slowdown in orders from the significant growth in business over the prior year.

As a percent of sales, gross profit margins were 23.1% in the quarter ended December 31, 2018, compared to 22.0% in the quarter ended December 31, 2017. Gross profit margins increased as a result of the Company's cost management and operational improvements, implemented over the past few years.

Product engineering and development expenses increased slightly to \$723,000 for the quarter ended December 31, 2018 as compared to \$700,000 for the quarter ended December 31, 2017. Selling, general and administrative (SG&A) expenses decreased by \$502,000 to \$2,190,000 for the quarter ended December 31, 2018, compared to the quarter ended December 31, 2017. Reduced sales commissions and advertising and trade show expenses resulted in the decrease in SG&A expenses.

Operating income increased to \$2,004,000 for the quarter ended December 31, 2018, from \$1,691,000 for the quarter ended December 31, 2017, on improved gross margins and reduced SG&A expenses.

For the quarter ended December 31, 2018, interest and dividend income, net of fees, from the investment portfolio was \$534,000 as compared to \$293,000 in the quarter ended December 31, 2017. The increase was due to additional interest income from a significantly higher level of investments in corporate bonds and higher rates on United States Treasury bills. The net realized and unrealized losses on marketable securities were \$(2,147,000) for the quarter ended December 31, 2018 versus net gains of \$161,000 for the quarter ended December 31, 2017, which losses were due to a weak domestic stock market from October through December 2018.

The effective income tax rate for the quarter ended December 31, 2018 was 19.9%, compared to a benefit of 9.2% for the quarter ended December 31, 2017. The 2017 benefit resulted from a \$0.7 million adjustment to the net deferred tax liability, as a result of applying the lower corporate tax rates to comply with the recently enacted Tax Reform Act.

Net income for the quarter ended December 31, 2018 was \$313,000 or \$0.02 basic and diluted earnings per share versus net income of \$2,346,000 or \$0.16 basic and diluted earnings per share for the quarter ended December 31, 2017.

Liquidity and Capital Resources

The Company generates capital resources through operations and returns on its investments.

The Company had no long-term debt outstanding at December 31, 2018 or September 30, 2018. The Company does not currently require a credit facility. As of December 31, 2018, the Company had funded \$135,000 in cash deposits at insurance companies to cover collateral needs.

As of December 31, 2018, the Company had \$4,269,000 in cash and cash equivalents, and \$104,445,000 in marketable securities, including \$38,900,000 in government securities, \$39,273,000 in corporate bonds, \$15,603,000 in equities, \$3,832,000 in mutual funds, \$5,759,000 in exchange-traded funds and \$1,078,000 in cash and money funds. The marketable securities are invested through professional investment management firms. These securities

may be liquidated at any time into cash and cash equivalents.

The Company's backlog was \$34.8 million at December 31, 2018, compared to \$50.2 million at December 31, 2017. The Company's working capital (defined as current assets less current liabilities) was equal to \$136.2 million at December 31, 2018 and \$136.6 million at September 30, 2018. The significant purchases, sales and maturities of marketable securities shown on the condensed consolidated statements of cash flows reflect primarily the recurring

Table of Contents

purchase and sale of United States treasury bills. Cash used in operations during the quarter ended December 31, 2018 was \$3,082,000. Costs and estimated earnings in excess of billings increased \$1,419,000 and customer deposits decreased \$1,166,000, reflecting the timing of revenue recognition on customers contracts recognized over time, at December 31, 2018. Inventories increased by \$2,015,000, as several customer contracts recognized at a point in time were completed but delivery of the equipment was delayed at customer requests. Accounts payable increased by \$1,755,000 from increased raw material purchases for production to meet the current backlog of customer orders.

Cash used in investing activities for the quarter ended December 31, 2018 was \$661,000 related to capital expenditures, primarily for new manufacturing machinery used for handling and processing raw materials.

Seasonality

The Company is concentrated in the manufacturing of asphalt plants and related components, which is typically subject to a seasonal slow-down during the third and fourth quarters of the calendar year.

Forward-Looking Information

This Quarterly Report on Form 10-Q contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act), which represent the Company's expectations and beliefs, including, but not limited to, statements concerning gross margins, sales of the Company's products and future financing plans. These statements, by their nature, involve substantial risks and uncertainties, certain of which are beyond the Company's control. Actual results may differ materially depending on a variety of important factors, including the financial condition of the Company's customers, changes in the economic and competitive environments and demand for the Company's products.

For information concerning these factors and related matters, see the following sections of the Company's Annual Report on Form 10-K for the year ended September 30, 2018: (a) Risk Factors in Part I and (b) Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II. However, other factors besides those referenced could adversely affect the Company's results, and you should not consider any such list of factors to be a complete set of all potential risks or uncertainties. Any forward-looking statements made by the Company herein speak as of the date of this Report. The Company does not undertake to update any forward-looking statements, except as required by law.

Critical Accounting Policies, Estimates and Assumptions

The Company believes the following discussion addresses its most critical accounting policies, which are those that are most important to the portrayal of the financial condition and results of operations and require management's most difficult, subjective, or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. Accounting policies, in addition to the critical accounting policies referenced below, are presented in Note 1 to the Company's Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended September 30, 2018, under the heading Accounting Pronouncements and Policies.

Estimates and Assumptions

In preparing the Condensed Consolidated Financial Statements, the Company uses certain estimates and assumptions that may affect reported amounts and disclosures. Estimates and assumptions are used, among other places, when accounting for certain revenue (e.g., contract accounting), expense, and asset and liability valuations. The Company believes that the estimates and assumptions made in preparing the Condensed Consolidated Financial Statements are

reasonable, but are inherently uncertain. Assumptions may be incomplete or inaccurate and unanticipated events may occur. The Company is subject to risks and uncertainties that may cause actual results to differ from estimated results.

Table of Contents

Revenues & Expenses

As discussed in Note 1 to the Company's Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended September 30, 2018, under the heading "Accounting Pronouncements and Policies", the Company adopted the provisions of ASU No. 2014-09 and its related amendments effective for the quarter ended December 31, 2018 using the modified retrospective method. The adoption of this standard did not have a material impact on the timing or amounts of revenues recognized by the Company, and, as such, no cumulative effect adjustment was recorded with the adoption of the standard.

Revenues from contracts with customers for the design, manufacture and sale of custom equipment are recognized over time when the performance obligation is satisfied by transferring control of the equipment. Control of the equipment transfers over time as the equipment is unique to the specific contract and thus does not create an asset with an alternative use to the Company. Revenues and costs are recognized in proportion to actual labor costs incurred, as compared with total estimated labor costs expected to be incurred during the entire contract. All incremental costs related to obtaining a contract are expensed as incurred, as the amortization period is less than one year. Changes to total estimated contract costs or losses, if any, are recognized in the period in which they are determined.

Contract assets (excluding accounts receivable) under contracts with customers represent revenue recognized in excess of amounts billed on equipment sales recognized over time. These contract assets were \$13,319,000 at December 31, 2018 and are included in current assets as costs and estimated earnings in excess of billings on the Company's Condensed Consolidated Balance Sheet at December 31, 2018. The Company anticipates that all contract assets at December 31, 2018, will be billed and collected within one year.

Revenues from all other contracts for the design and manufacture of equipment, for service and for parts sales, net of any discounts and return allowances, are recorded at a point in time when control of the goods or services has been transferred. Control of the goods or service typically transfers at time of shipment or upon completion of the service.

Payment for equipment under contract with customers is typically due prior to shipment. Payment for services under contract with customers is due as certain milestones are completed. Accounts receivable related to contracts with customers at December 31, 2018 was \$264,000.

Product warranty costs are estimated using historical experience and known issues and are charged to production costs as revenue is recognized.

Under certain contracts with customers, recognition of a portion of the consideration received may be deferred and recorded as a contract liability if the Company has to satisfy a future obligation, such as to provide installation assistance. There were no contract liabilities other than customer deposits at December 31, 2018. Customer deposits related to contracts with customers were \$3,397,000 at December 31, 2018, and are included in current liabilities on the Company's Condensed Consolidated Balance Sheet at December 31, 2018.

The Company records revenues earned for shipping and handling as freight revenue at the time of shipment, regardless of whether or not it is identified as a separate performance obligation. The cost of shipping and handling is classified as cost of goods sold concurrently.

Provisions for estimated returns and allowances and other adjustments are provided for in the same period the related sales are recorded. Returns and allowances, which reduce product revenue, are estimated using historical experience.

All product engineering and development costs, and selling, general and administrative expenses are charged to operations as incurred. Provision is made for any anticipated contract losses in the period that the loss becomes evident.

Table of Contents

The allowance for doubtful accounts is determined by performing a specific review of all account balances greater than 90 days past due and other higher risk amounts to determine collectability and also adjusting for any known customer payment issues with account balances in the less-than-90-day past due aging buckets. Account balances are charged off against the allowance for doubtful accounts when they are determined to be uncollectable. Any recoveries of account balances previously considered in the allowance for doubtful accounts reduce future additions to the allowance for doubtful accounts.

Inventories

Inventories are valued at the lower of cost or market, with cost being determined principally by using the last-in, first-out (LIFO) method and market defined as replacement cost for raw materials and net realizable value for work in process and finished goods. Appropriate consideration is given to obsolescence, excessive levels, deterioration, possible alternative uses and other factors in determining net realizable value. The cost of work in process and finished goods includes materials, direct labor, variable costs and overhead. The Company evaluates the need to record inventory adjustments on all inventories, including raw materials, work in process, finished goods, spare parts and used equipment. Used equipment acquired by the Company on trade-in from customers is carried at estimated net realizable value. Unless specific circumstances warrant different treatment regarding inventory obsolescence, the carrying value of inventories three to four years old is reduced by 50%, while the carrying value of inventories four to five years old is reduced by 75%, and the carrying value of inventories greater than five years old is reduced to zero. Inventory is typically reviewed for obsolescence on an annual basis computed as of September 30, the Company's fiscal year end. If significant known changes in trends, technology or other specific circumstances that warrant consideration occur during the year, then the impact on obsolescence is considered at that time.

Investments

Marketable debt and equity securities are categorized as trading securities and are thus marked to market and stated at fair value. Fair value is determined using the quoted closing or latest bid prices for Level 1 investments and market standard valuation methodologies for Level 2 investments. Realized gains and losses on investment transactions are determined by specific identification and are recognized as incurred in the condensed consolidated statements of income. Net unrealized gains and losses are reported in the condensed consolidated statements of income and represent the change in the fair value of investment holdings during the period.

Long-Lived Asset Impairment

Property and equipment, and intangible assets subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset (or asset group) may not be recoverable. An impairment loss would be recognized when the carrying amount of an asset exceeds the estimated undiscounted cash flows expected to result from the use of the asset and its eventual disposition. The amount of the impairment loss to be recorded is calculated by the excess over its fair value of the asset's carrying value. Fair value is generally determined using a discounted cash flow analysis.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Not Applicable

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company's Chief Executive Officer and Chief Financial Officer evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act of 1934) as of the end of the period covered by this Quarterly Report. Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that, as of the end of the period covered by this Quarterly Report, the Company's disclosure controls and procedures are effective.

Because of inherent limitations, the Company's disclosure controls and procedures, no matter how well designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of such disclosure controls and procedures are met and no evaluation can provide absolute assurance that all control issues and instances of fraud, if any, within the Company has been detected.

Changes in Internal Control over Financial Reporting

The Company's management, including the Chief Executive Officer and Chief Financial Officer, has reviewed the Company's internal control over financial reporting. There were no changes in the Company's internal control over financial reporting during the quarter ended December 31, 2018 that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
