 Form 424B5  
 May 03, 2019  
Table of Contents

Filed Pursuant to Rule 424(b)5  
 Registration No. 333-231168

### CALCULATION OF REGISTRATION FEE

Title of Each Class of Securities to be Registered	Amount To Be Registered	Maximum Offering Price per Unit	Maximum Aggregate Offering Price(2)	Amount of Registration Fee(2)
2.00% Convertible Senior Notes due 2024	\$1,840,000,000(1)	100%	\$1,840,000,000	\$223,008.00
Common Stock, \$0.001 par value per share	(3)		(3)	(4)

- (1) Includes 2.00% Convertible Senior Notes due 2024 that may be purchased by the underwriters pursuant to their option to purchase additional 2.00% Convertible Senior Notes due 2024 to cover over-allotments, if any.
- (2) Calculated in accordance with Rule 457(r) under the Securities Act of 1933, as amended (the Securities Act ).
- (3) Includes an indeterminate number of shares of common stock issuable upon conversion of the convertible senior notes at the initial conversion price of approximately \$309.83 per share of common stock. Pursuant to Rule 416 under the Securities Act, such number of shares of common stock registered hereby shall include an indeterminate number of shares of common stock that may be issued in connection with a stock split, stock dividend, recapitalization or similar event.
- (4) Pursuant to Rule 457(i), there is no additional filing fee with respect to the shares of common stock issuable upon conversion of the convertible senior notes because no additional consideration will be received in connection with the exercise of the conversion privilege.

**Table of Contents**

**Prospectus Supplement to Prospectus dated May 1, 2019**

**Tesla, Inc.**

\$1,600,000,000

2.00% Convertible Senior Notes due 2024

Interest payable May 15 and November 15

We are offering \$1,600,000,000 principal amount of our 2.00% Convertible Senior Notes due 2024 (the "notes"). The notes will bear interest at a rate of 2.00% per year, payable semiannually in arrears on May 15 and November 15 of each year, beginning on November 15, 2019. The notes will mature on May 15, 2024.

Holder may convert their notes at their option at any time prior to the close of business on the business day immediately preceding February 15, 2024 only under the following circumstances: (1) during any calendar quarter commencing after the calendar quarter ending on September 30, 2019 (and only during such calendar quarter), if the last reported sale price of the common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price for the notes on each trading day; (2) during the five business day period after any five consecutive trading day period (the "measurement period") in which the trading price (as defined below) per \$1,000 principal amount of notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on each such trading day; or (3) upon the occurrence of specified corporate events. On or after February 15, 2024 until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their notes at any time. Upon conversion of notes, we will deliver cash, shares of our common stock or a combination of cash and shares of our common stock, at our election, as described in this prospectus supplement.

The conversion rate with respect to the notes will initially be 3.2276 shares of common stock per \$1,000 principal amount of notes (equivalent to an initial conversion price of approximately \$309.83 per share of common stock). The conversion rate will be subject to adjustment in some events but will not be adjusted for any accrued and unpaid interest. In addition, following certain corporate events that occur prior to the maturity date, we will increase the conversion rate for a holder who elects to convert its notes in connection with such a corporate event in certain circumstances.

We may not redeem the notes prior to the maturity date.

If we undergo a fundamental change, holders may require us to purchase for cash all or part of their notes at a purchase price equal to 100% of the principal amount of the notes to be purchased, plus accrued and unpaid interest to, but not including, the fundamental change purchase date.

The notes will be our senior unsecured obligations and will rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the notes, will rank equally in right of payment with any of our unsecured indebtedness that is not so subordinated (including our Existing Notes (as defined below)), will be effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness and will be structurally subordinated to all indebtedness and other liabilities (including trade payables) of our subsidiaries (including the SolarCity Convertible Notes (as defined below) and the amounts outstanding under the Subsidiary Credit Facilities (as defined below)).

Concurrently with this offering of notes, we are offering 3,086,419 shares of our common stock (or up to 3,549,381 shares of our common stock if the underwriters of that offering exercise in full their option to purchase additional shares), in an underwritten offering pursuant to a separate prospectus supplement. The closing of this offering of notes is not contingent upon the closing of the concurrent offering of common stock, and the closing of the concurrent offering of common stock is not contingent upon the closing of this offering.

Elon Musk, our Chief Executive Officer, has indicated his preliminary interest in purchasing up to 102,880 shares of our common stock in the concurrent common stock offering for a purchase price of approximately \$25.0 million at the public offering price.

We do not intend to apply to list the notes on any securities exchange or any automated dealer quotation system. Our common stock is listed on The Nasdaq Global Select Market under the symbol "TSLA". The last reported sale price of our common stock on the Nasdaq Global Select Market on May 2, 2019 was \$244.10 per share.

*Investing in the notes involves a high degree of risk. See Risk Factors beginning on page S-13 of this prospectus supplement, page 5 of the accompanying prospectus and in the reports we file with the Securities and Exchange Commission (the "SEC") pursuant to the Securities Exchange Act of 1934, as amended, incorporated by reference in this prospectus supplement for a discussion of certain risks that you should consider in connection with an investment in the notes.*

**Neither the Securities and Exchange Commission nor any other regulatory body has approved or disapproved of these securities or passed upon the accuracy or adequacy of this prospectus supplement or the accompanying prospectus. Any representation to the contrary is a criminal offense.**

**Per Note                      Total**

Public offering price(1)	\$ 1,000.00	\$ 1,600,000,000
Underwriting discount(2)	\$ 11.00	\$ 17,600,000
Proceeds, before offering expenses, to Tesla(1)	\$ 989.00	\$ 1,582,400,000

(1) Plus accrued interest, if any, from May 7, 2019.

(2) We have agreed to reimburse the underwriters for certain expenses in connection with this offering. See Underwriting.

We have granted the underwriters an option to purchase, exercisable within a 30-day period beginning on, and including, the date of this prospectus supplement, up to an additional \$240,000,000 principal amount of notes, solely to cover over-allotments, if any.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the notes or determined if this prospectus supplement or the accompanying prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

We expect that delivery of the notes will be made to investors in book-entry form through The Depository Trust Company on or about May 7, 2019.

**ABOUT THIS PROSPECTUS SUPPLEMENT**

You should rely only on the information contained, or incorporated by reference, in this prospectus supplement and the accompanying prospectus. Neither we nor the underwriters have authorized anyone to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. We are not, and the underwriters are not, making an offer to sell the securities in any jurisdiction where the offer or sale is not permitted or in which the person making such offer or solicitation is not qualified to do so or to any person to whom it is unlawful to make such offer or solicitation. You should not assume that the information in this prospectus supplement, the accompanying prospectus or any document incorporated by reference is accurate or complete as of any date other than the date of the applicable document. Our business, financial condition, results of operations and prospects may have changed since that date.

This document is in two parts. The first part is this prospectus supplement, which describes the specific terms of this offering and also adds to and updates information contained in the accompanying prospectus and the documents incorporated by reference into this prospectus supplement and the accompanying prospectus. The second part, the accompanying prospectus, gives more general information, some of which may not apply to this offering. Generally, when we refer to this prospectus, we are referring to both parts of this document combined. In this prospectus supplement, as permitted by law, we incorporate by reference information from other documents that we file with the Securities and Exchange Commission, or the SEC. This means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be a part of this prospectus supplement and the accompanying prospectus and should be read with the same care. When we update the information contained in documents that have been incorporated by reference by making future filings with the SEC, the information included or incorporated by reference in this prospectus supplement is considered to be automatically updated and superseded. In other words, in case of a conflict or inconsistency between information contained in this prospectus supplement and information in the accompanying prospectus or incorporated by reference into this prospectus supplement, you should rely on the information contained in the document that was filed later.

You should not consider any information in this prospectus supplement or the accompanying prospectus to be investment, legal or tax advice. You should consult your own counsel, accountants and other advisers for legal, tax, business, financial and related advice regarding the purchase of the notes offered by this prospectus supplement. If the description of the offering varies between this prospectus supplement and the accompanying prospectus, you should rely on the information contained in this prospectus supplement.

**Table of Contents**

**WHERE YOU CAN FIND MORE INFORMATION**

We have filed with the SEC a registration statement on Form S-3 under the Securities Act of 1933, as amended, or the Securities Act, with respect to the notes offered by this prospectus supplement. This prospectus supplement, filed as part of the registration statement, does not contain all the information set forth in the registration statement and its exhibits and schedules, portions of which have been omitted as permitted by the rules and regulations of the SEC. For further information about us, we refer you to the registration statement and to its exhibits and schedules.

We file annual, quarterly and current reports and other information with the SEC. The SEC maintains an internet website at [www.sec.gov](http://www.sec.gov) that contains periodic and current reports, proxy and information statements, and other information regarding registrants that are filed electronically with the SEC.

These documents are also available, free of charge, through the Investors section of our website, which is located at [www.tesla.com](http://www.tesla.com). Information contained on, or that can be accessed through, our website is not incorporated by reference into this prospectus supplement or the accompanying prospectus and you should not consider such information to be part of this prospectus supplement or the accompanying prospectus.

**Table of Contents**

**SPECIAL NOTE REGARDING FORWARD LOOKING STATEMENTS**

This prospectus supplement and the accompanying prospectus, including the documents incorporated or deemed to be incorporated by reference into this prospectus supplement and the accompanying prospectus, may include forward-looking statements within the meaning of Section 27A of the Securities Act and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. These forward-looking statements include, but are not limited to, statements concerning our strategy, future operations, future financial position, future revenues, projected costs, profitability, expected cost reductions, capital adequacy, expectations regarding demand and acceptance for our technologies, growth opportunities and trends in the market in which we operate, prospects, plans and objectives of management, and the statements set forth in Part I, Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations in our Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2019 and in our other filings with the SEC. The words anticipates, believes, could, estimates, expects, intends, plans, projects, will, would and similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words. We may not actually achieve the plans, intentions or expectations disclosed in our forward-looking statements and you should not place undue reliance on our forward-looking statements. Actual results or events could differ materially from the plans, intentions and expectations disclosed in the forward-looking statements that we make. These forward-looking statements involve risks and uncertainties that could cause our actual results to differ materially from those in the forward-looking statements, including, without limitation, the risks set forth in Part II, Item 1A, Risk Factors in our Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2019 and in our other filings with the SEC. We do not assume any obligation to update any forward-looking statements, except as required by law.

More information on potential factors that could affect our financial results is included from time to time in our SEC filings and reports, including the risks identified under the section titled Risk Factors in our periodic reports on Form 10-K and Form 10-Q that we file with the SEC. We disclaim any obligation to update information contained in these forward-looking statements whether as a result of new information, future events, or otherwise, except as required by law.

Although we undertake no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law, you are advised to consult any additional disclosures we make in our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K filed with the SEC. See Where You Can Find More Information.

**Table of Contents**

**SUMMARY**

*This summary highlights information contained elsewhere in this prospectus supplement, the accompanying prospectus and the documents incorporated by reference. This summary sets forth the material terms of this offering, but does not contain all of the information you should consider before investing in our notes. You should read carefully this entire prospectus supplement and the accompanying prospectus, including the documents incorporated by reference in this prospectus supplement and the accompanying prospectus, before making an investment decision to purchase our notes, especially the risks of investing in our notes discussed in the section titled *Risk Factors* in this prospectus supplement as well as the consolidated financial statements and notes to those consolidated financial statements incorporated by reference into this prospectus supplement and the accompanying prospectus. In addition, any reference to or description of our concurrent common stock offering herein is wholly subject to the other prospectus supplement pursuant to which shares of our common stock are being offered, and you should not rely on this prospectus supplement in making an investment decision to purchase shares of our common stock.*

**Tesla, Inc.**

Our mission is to accelerate the world's transition to sustainable energy. We design, develop, manufacture, lease and sell high-performance fully electric vehicles, solar energy generation systems and energy storage products. We also offer maintenance, installation, operation and other services related to our products.

Our production vehicle fleet includes our Model S premium sedan and our Model X SUV, which are our highest-performance vehicles, and our Model 3, a lower-priced sedan designed for the mass market. We continue to enhance our vehicle offerings with enhanced Autopilot options, internet connectivity and free over-the-air software updates to provide additional safety, convenience and performance features. In March 2019, we unveiled Model Y, a compact SUV utilizing the Model 3 platform, which we expect to produce at high volumes by the end of 2020. In April 2019, we also introduced the next generation of powertrain for Model S and Model X, with 370 and 325 miles (EPA) of maximum range, respectively. In addition, we have several future electric vehicles in our product pipeline, including Tesla Semi, a pickup truck and a new version of the Tesla Roadster.

We also sell and lease retrofit solar energy systems and sell renewable energy and energy storage products, and are ramping our Solar Roof product that combines solar energy generation with attractive, integrated styling. Our energy storage products, which we manufacture at Gigafactory 1, consist of Powerwall, mostly for residential applications, and Powerpack, for commercial, industrial and utility-scale applications.

In order to facilitate our continued growth, we are undertaking various initiatives. These include plans to develop Model Y and Tesla Semi, expand our Supercharger and vehicle service and repair networks, and invest in our manufacturing facilities, including Tesla Factory and our Gigafactories in Nevada, New York and Shanghai. In particular, Gigafactory Shanghai is a key strategic component for our growth in China, the largest electric vehicle market in the world, and we are proud to be the first wholly foreign-owned vehicle manufacturer in the country. As part of this project, we have agreed with the local government to spend approximately \$2 billion in capital expenditures over the next five years (which is already included in our capital expenditure plans), and to generate approximately \$270 million of annual tax revenues starting at the end of 2023. We believe the tax revenue target will be easily attainable even if our production were far lower than the volumes we are planning, although if we are unwilling or unable to meet such target or obtain periodic project approvals, we would be compensated for the remaining value of the land lease, buildings and fixtures and revert the site to the government.

S-1

**Table of Contents**

At this point in the history of Tesla, we have developed industry leading technology, cost and performance, and the most exciting product lineup in the world. With this foundation, we look forward to the next phase of growth as we expand and scale our operations.

We were incorporated in 2003 in Delaware. As of March 31, 2019, we and our subsidiaries had 40,853 full-time employees worldwide. We are headquartered in Palo Alto, California. Our principal executive offices are located at 3500 Deer Creek Road, Palo Alto, California 94304, and our telephone number at this location is (650) 681-5000. We completed our initial public offering in July 2010 and our common stock is listed on the Nasdaq Global Select Market under the symbol TSLA. Our website address is [www.tesla.com](http://www.tesla.com). Information contained on, or can be accessed through, our website is not incorporated by reference into this prospectus supplement or the accompanying prospectus and you should not consider such information to be part of this prospectus supplement or the accompanying prospectus.

The Tesla design logo, Tesla, Model S, Model X, Model 3, Model Y, Tesla Roadster, Tesla Semi and other trademarks or service marks of Tesla appearing in this prospectus supplement and the accompanying prospectus are the property of Tesla.

Table of Contents

**THE OFFERING**

<b>Issuer</b>	Tesla, Inc., a Delaware corporation.
<b>Securities</b>	\$1,600,000,000 aggregate principal amount of 2.00% Convertible Senior Notes due 2024 (plus up to an additional \$240,000,000 principal amount of additional notes that our underwriters have the option to acquire from us).
<b>Issue price</b>	100% plus accrued interest, if any, from May 7, 2019.
<b>Maturity</b>	The notes will mature on May 15, 2024, unless earlier converted or purchased.
<b>Interest</b>	<p>The notes will bear interest at a rate of 2.00% per year.</p> <p>Interest will accrue from May 7, 2019 and will be payable semiannually in arrears on May 15 and November 15 of each year, beginning on November 15, 2019.</p> <p>We will pay additional interest, if any, at our election as the sole remedy relating to the failure to comply with our reporting obligations as described under Description of Notes Events of Default .</p>
<b>Conversion rights</b>	<p>Holder may convert their notes at their option prior to the close of business on the business day immediately preceding February 15, 2024 in multiples of \$1,000 principal amount, only under the following circumstances:</p> <p>during any calendar quarter commencing after the calendar quarter ending on September 30, 2019 (and only during such calendar quarter), if the last reported sale price of our common stock for at least 20 trading days (whether or not consecutive) during</p>

a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day;

during the five business day period after any five consecutive trading day period (the measurement period ) in which the trading price (as defined under Description of Notes Conversion Rights Conversion upon Satisfaction of Trading Price Condition ) per \$1,000 principal amount of

S-3

**Table of Contents**

notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the applicable conversion rate on each such trading day; or

upon the occurrence of specified corporate events described under Description of Notes Conversion Rights Conversion upon Specified Corporate Events .

On or after February 15, 2024 until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their notes, in multiples of \$1,000 principal amount, at the option of the holder.

The conversion rate for the notes is initially 3.2276 shares per \$1,000 principal amount of notes (equivalent to an initial conversion price of approximately \$309.83 per share of common stock). The conversion rate will be subject to adjustment as described in this prospectus supplement.

Upon conversion of a note, we will satisfy our conversion obligation by paying or delivering, as applicable, cash, shares of our common stock or a combination of cash and shares of our common stock, at our election (as described herein). If we elect to satisfy our conversion obligation solely in cash or through payment and delivery, as the case may be, of a combination of cash and shares of our common stock, the amount of cash and shares of our common stock, if any, due upon conversion will be based on a daily conversion value (as described herein) calculated on a proportionate basis for each VWAP trading day (as described herein) in a 20 consecutive VWAP trading day observation period (as described herein). See Description of Notes Conversion Rights Settlement upon Conversion .

In addition, following certain corporate events that occur prior to the maturity date, we will increase the

applicable conversion rate for a holder who elects to convert its notes in connection with such a corporate event in certain circumstances, as described under Description of Notes Conversion Rights Adjustment to Conversion Rate upon Conversion in Connection with a Make Whole Fundamental Change .

S-4

**Table of Contents**

You will not receive any additional cash payment or additional shares representing accrued and unpaid interest, if any, upon conversion of a note, except in limited circumstances described under [Description of Notes Conversion Rights General](#) . Instead, interest will be deemed to be paid in full by the cash paid and, if applicable, shares of our common stock issued to the converting holder upon conversion.

**No redemption**

We may not redeem the notes prior to the maturity date, and no sinking fund is provided for the notes, which means that we are not required to retire the notes periodically.

**Fundamental change**

If we undergo a fundamental change (as defined in [Description of Notes Fundamental Change Permits Holders to Require Us to Purchase Notes](#) ), subject to certain conditions, holders may require us to purchase for cash all or part of their notes in principal amounts of \$1,000 or an integral multiple thereof. The fundamental change purchase price will be equal to 100% of the principal amount of the notes to be purchased, plus accrued and unpaid interest to, but not including, the fundamental change purchase date. See [Description of Notes Fundamental Change Permits Holders to Require Us to Purchase Notes](#) .

**Ranking**

The notes will be our senior unsecured obligations and will:

rank senior in right of payment to any of our indebtedness that is expressly subordinated in right of payment to the notes;

rank equally in right of payment with any of our unsecured indebtedness that is not so subordinated, including our 1.25% Convertible Senior Notes due 2021, 2.375% Convertible Senior Notes due 2022, and 5.30% Senior Notes due 2025 (our Existing Notes );

be effectively junior in right of payment to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness; and

be structurally subordinated to all indebtedness and other liabilities (including trade payables) of our subsidiaries (including the 1.625% Convertible Senior

S-5

**Table of Contents**

Notes due 2019 and Zero-Coupon Convertible Senior Notes due 2020 each issued by SolarCity Corporation ( SolarCity ) (collectively, the SolarCity Convertible Notes ) and the amounts outstanding under our subsidiaries credit facilities (the Subsidiary Credit Facilities ).

As of March 31, 2019, on an as-adjusted basis after giving effect to this offering (assuming that the underwriters do not exercise their option to purchase additional notes), Tesla, Inc. would have had approximately \$7.7 billion in outstanding indebtedness (which amount includes the face amount of the notes as well as the face value of our Existing Notes and outstanding balances under our senior secured asset-backed revolving credit agreement (the Credit Agreement )), \$1.9 billion of which was secured indebtedness, and our subsidiaries had approximately \$6.7 billion in liabilities outstanding (which amount includes the face amount of the outstanding SolarCity Convertible Notes and includes \$3.5 billion of non-recourse indebtedness), including trade payables and indebtedness to third parties at the full stated amount thereof but excluding intercompany indebtedness and other obligations and liabilities of a type not required to be reflected on a balance sheet of such subsidiaries and other consolidated entities in accordance with GAAP), all of which will be structurally senior to the notes with respect to claims on the assets and cash flows of our subsidiaries and other consolidated entities.

The indenture governing the notes does not limit the amount of debt that we or our subsidiaries may incur.

**Events of default**

Except as described under Description of Notes Events of Default, if an event of default occurs, the principal amount of the notes plus accrued and unpaid interest may be declared immediately due and payable, subject to certain conditions set forth in the indenture. These amounts automatically become due and payable in the case of certain types of bankruptcy or insolvency events of default involving Tesla, Inc.

**Book-entry form**

The notes will be issued in book-entry form and will be represented by permanent global certificates deposited with, or on behalf of, The

S-6

**Table of Contents**

Depository Trust Company ( DTC ) and registered in the name of a nominee of DTC. Beneficial interests in any of the notes will be shown on, and transfers will be effected only through, records maintained by DTC or its nominee and any such interest may not be exchanged for certificated securities, except in limited circumstances.

**Absence of a public market for the notes**

The notes are new securities and there is currently no established market for the notes. Accordingly, we cannot assure you as to the development or liquidity of any market for the notes. The underwriters have advised us that they currently intend to make a market in the notes. However, they are not obligated to do so, and they may discontinue any market making with respect to the notes without notice. We do not intend to apply for a listing of the notes on any securities exchange or any automated dealer quotation system.

**Nasdaq Global Select Market symbol for our common stock**

Our common stock is listed on the Nasdaq Global Select Market under the symbol TSLA .

**Trustee, paying agent and conversion agent**

U.S. Bank National Association.

**Convertible note hedge and warrant transactions**

In connection with the pricing of the notes, we entered into privately negotiated convertible note hedge transactions with one or more of the underwriters or their respective affiliates or other financial institutions ( hedge counterparties ). The convertible note hedge transactions will cover, subject to customary anti-dilution adjustments, the number of shares of our common stock that will initially underlie the notes. We also entered into warrant transactions with the hedge counterparties relating to the same number of shares of our common stock, with a strike price of \$607.50, subject to customary anti-dilution adjustments.

The convertible note hedge transactions are expected to reduce potential dilution to our common stock and/or offset potential cash payments we are required to make in excess of the principal amount upon any conversion of notes. However, the warrant transactions could separately have a dilutive effect to the extent that the market price per share of our common stock exceeds the

applicable strike price of the

S-7

**Table of Contents**

warrants on the applicable expiration dates unless, subject to the terms of the warrant transactions, we elect to cash settle the warrants.

If the underwriters exercise their option to purchase additional notes, we may enter into additional convertible note hedge and warrant transactions.

**Use of proceeds**

We expect to receive net proceeds from this offering of approximately \$1.6 billion (or approximately \$1.8 billion if the underwriters exercise in full their over-allotment option to purchase additional notes), after deducting the underwriting discounts and our estimated offering expenses. In addition, concurrently with this convertible note offering, we are offering 3,086,419 shares of common stock (3,549,381 shares if the underwriters exercise in full their option to purchase additional shares) pursuant to a separate prospectus supplement in an underwritten public offering. Through this convertible notes offering and our concurrent common stock offering we expect to receive net proceeds of approximately \$2.3 billion (up to \$2.7 billion if the underwriters exercise in full their options to purchase additional common stock and notes) after deducting underwriting discounts and our estimated offering expenses.

We intend to use the net proceeds from this convertible notes offering and our concurrent common stock offering to further strengthen our balance sheet, as well as for general corporate purposes. In addition, we will use approximately \$262.1 million of these proceeds (after such cost is partially offset by the proceeds from warrant transactions described in Description of Convertible Note Hedge and Warrant Transactions ) to pay the net cost of the convertible note hedge transactions entered into in connection with this convertible notes offering. See Use of Proceeds.

If the underwriters exercise their option to purchase additional notes, we may sell additional warrants and use a portion of the net proceeds from the sale of the additional notes, together with the proceeds from the additional warrants, to enter into additional convertible

note hedge transactions and for general corporate purposes.

S-8

**Table of Contents**

**Concurrent common stock offering**

Concurrently with this offering, we are offering 3,086,419 shares of our common stock (or 3,549,381 shares if the underwriters' option to purchase additional shares of common stock in such offering is exercised in full) in a public offering. This offering is not contingent upon the closing of the concurrent common stock offering and the concurrent common stock offering is not contingent upon the closing of this offering.

**Elon Musk share purchase**

Mr. Elon Musk, our Chief Executive Officer, has indicated his preliminary interest in purchasing up to 102,880 shares of our common stock for a purchase price of approximately \$25.0 million in the concurrent common stock offering at the public offering price.

**Risk factors**

See Risk Factors and other information included or incorporated by reference in this prospectus supplement and the accompanying prospectus for a discussion of factors you should consider carefully before investing in the notes.

**U.S. federal income tax considerations**

For material U.S. federal income tax consequences of the purchase, ownership, disposition and conversion of the notes, and the ownership and disposition of shares of our common stock into which the notes may be converted, see Material U.S. Federal Income Tax Considerations.

**Table of Contents****SUMMARY CONSOLIDATED FINANCIAL DATA**

The summary consolidated statements of operations data for the years ended December 31, 2016, 2017 and 2018 shown below are derived from our audited consolidated financial statements that are included in our Annual Report on Form 10-K for the year ended December 31, 2018, which is incorporated by reference into this prospectus supplement and should be read in conjunction with such consolidated financial statements and the notes thereto to fully understand factors that may affect the comparability of the information presented below. The summary consolidated statements of operations data for the quarterly period ended March 31, 2018 and 2019 and the summary consolidated balance sheet data as of March 31, 2019 shown below are derived from our unaudited consolidated financial statements that are included in our Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2019, which is incorporated by reference into this prospectus supplement and should be read in conjunction with such consolidated financial statements and the notes thereto to fully understand factors that may affect the comparability of the information presented below. The historical results presented below are not necessarily indicative of financial results to be achieved in future periods.

- (2) The results of operations include the impact of the adoption of the new revenue recognition accounting standard ASC 606 effective January 1, 2018. Prior periods have not been revised as we have adopted under the modified retrospective approach. See Note 2, *Summary of Significant Accounting Policies*, of the notes to the consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2018 incorporated by reference herein for additional information.
- (3) We acquired SolarCity on November 21, 2016. Our consolidated financial statements for the year ended December 31, 2016 include SolarCity's results of operations from the acquisition date of November 21, 2016 through December 31, 2016. See Note 3, *Business Combinations*, of the notes to the consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2018 incorporated by reference herein for additional information regarding this transaction.
- (4) Our basic net loss per share of common stock is calculated by dividing the net loss attributable to common stockholders by the weighted-average number of shares of common stock outstanding for the period. The diluted net loss per share of common stock is computed by dividing the net loss attributable to common stockholders by the weighted-average number of shares of common stock and, if dilutive, potential shares of common stock outstanding during the period. During the three months ended March 31, 2019, we increased net loss attributable to common stockholders by \$7.6 million to arrive at the numerator used to calculate net loss per share. This adjustment represents the difference between the cash we paid to a financing fund investor for their noncontrolling interest in one of our subsidiaries and the carrying amount of the noncontrolling interest on our consolidated balance sheet, in accordance with

ASC 260, *Earnings per Share*. Potential shares of common stock consist of employee share based awards, warrants to purchase shares of our common stock and the conversion of our Existing Notes and the SolarCity Convertible Notes, which are convertible into shares of our common stock as a result of our acquisition of SolarCity (using the treasury stock method or the if-converted method). For purposes of these calculations, potential shares of common stock have been excluded from the calculation of diluted net loss per share of common stock, when antidilutive.

Our consolidated balance sheet data as of March 31, 2019 is presented:

on an actual basis;

on an as-adjusted basis to give effect to this offering of notes (assuming the underwriters do not exercise their over-allotment option to purchase additional notes), after deducting the underwriting discount and our estimated offering expenses, and the application of the net proceeds from this offering and our concurrent common stock offering to pay the cost of the convertible note hedge and warrant transactions entered into in connection with this offering (after such cost is partially offset by the proceeds to us from the warrant transactions), as described in *Use of Proceeds* ; and

**Table of Contents**

on an as-further-adjusted basis to give effect to the sale of the shares in the concurrent common stock offering, (assuming the underwriters do not exercise their option to purchase additional shares) based on the public offering price of \$243.00 per share after deducting the underwriting discount and our estimated offering expenses.

	<b>As of March 31, 2019</b>		
	<b>Actual</b>	<b>As Adjusted for this Offering (unaudited) (in thousands)</b>	<b>As Further Adjusted for this Offering and the Concurrent Common Stock Offering</b>
<b>Consolidated Balance Sheet Data:</b>			
Cash and cash equivalents	\$ 2,198,169	\$ 3,517,889	\$ 4,254,882
Restricted cash(1)	484,629	484,629	484,629
Working (deficit) capital	(1,564,978)	\$ (245,258)	\$ 491,735
Property, plant and equipment, net	9,850,929	9,850,929	9,850,929
Total assets	28,912,524	\$ 30,232,244	\$ 30,969,237
Total current liabilities	9,242,800	9,242,800	9,242,800
Long-term debt and finance leases, net of current portion(2)	9,787,950	\$ 11,387,950	\$ 11,387,950
Resale value guarantees, net of current portion	211,390	211,390	211,390
Total stockholders' equity(3)	4,605,596	\$ 4,343,516	\$ 5,080,509

- (1) We maintain certain cash balances restricted as to withdrawal or use. Our restricted cash is comprised primarily of cash as collateral for our sales to lease partners with a resale value guarantee, letters of credit, real estate leases, insurance policies, credit card borrowing facilities and certain operating leases. In addition, restricted cash includes cash received from certain fund investors that have not been released for use by us and cash held to service certain payments under various secured debt facilities.
- (2) Reflects on an as-adjusted basis the issuance of \$1.60 billion aggregate principal amount of 2.00% Convertible Senior Notes due 2024 in this offering. In accordance with ASC 470-20, convertible debt that may be wholly or partially settled in cash is required to be separated into a liability and an equity component, such that interest expense reflects the issuer's nonconvertible debt interest rate. Upon issuance, a debt discount is recognized as a decrease in debt and an increase in equity. The debt component accretes up to the principal amount over the expected term of the debt. ASC 470-20 does not affect the actual amount that we are required to repay, and the amount shown above for the notes offered hereby is the aggregate principal amount of the notes without reflecting the debt discount or fees and expenses that we are required to recognize or the increase in additional paid-in capital on our consolidated balance sheet.
- (3) As noted in footnote (2), in accordance with ASC 470-20, convertible debt that may be wholly or partially settled in cash is required to be separated into a liability and an equity component, such that interest expense reflects the issuer's nonconvertible debt interest rate. Upon issuance, a debt discount is recognized as a decrease in debt and an increase in equity. The debt component accretes up to the principal amount over the expected term of the debt. ASC 470-20 does not affect the actual amount that we are required to repay, and the amount shown above for the notes offered hereby is the aggregate principal amount of the notes without reflecting the

debt discount or fees and expenses that we are required to recognize or the increase in additional paid-in capital on our consolidated balance sheet.

**Table of Contents**

**RISK FACTORS**

*Investing in our notes involves a high degree of risk. In addition to the other information contained in this prospectus supplement, the accompanying prospectus and in documents that we incorporate by reference, you should carefully consider the risks discussed below and in Part II, Item 1A, Risk Factors, in our Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2019 before making a decision about investing in our securities. The risks and uncertainties discussed below and in our Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2019 are not the only ones facing us. Additional risks and uncertainties not presently known to us, or that we currently see as immaterial, may also harm our business. If any of these risks occur, our business, financial condition and operating results could be harmed, the trading price of our notes and our common stock could decline and you could lose part or all of your investment.*

**Risks Related to the Ownership of Our Notes**

*Servicing our debt requires a significant amount of cash, and we may not have sufficient cash flow from our business to pay our obligations under the notes.*

Our ability to make scheduled payments of principal or to pay interest on or to refinance the notes depends on our future performance, which is subject to economic, financial, competitive and other factors, some of which are beyond our control. Our and our subsidiaries' outstanding indebtedness was approximately \$10.3 billion as of March 31, 2019 without giving effect to the notes to be issued in this offering. Of our total outstanding indebtedness, \$1.1 billion is due to mature in 2019 and \$819.8 million is due to mature in 2020. Our business may not continue to generate cash flow from operations in the future sufficient to satisfy our obligations under the notes. If we are unable to generate such cash flow, we may be required to adopt one or more alternatives, such as reducing or delaying investments or capital expenditures, selling assets, refinancing or obtaining additional equity capital on terms that may be onerous or highly dilutive. Our ability to refinance the notes will depend on the capital markets and our financial condition at such time. We may not be able to engage in any of these activities or engage in these activities on desirable terms, which could result in a default on the notes.

*The terms of the indenture governing the notes do not restrict us from incurring substantially more debt or taking other actions which would intensify the risks discussed above.*

We and our subsidiaries may be able to incur substantial additional debt in the future. We will not be restricted under the terms of the indenture governing the notes from incurring additional debt, securing existing or future debt, recapitalizing our debt or taking a number of other actions that are not limited by the terms of the indenture governing the notes that could have the effect of diminishing our ability to make payments on the notes when due.

*The notes will be effectively junior to any secured debt we may incur and structurally subordinated to any liabilities of our subsidiaries.*

The notes are our unsecured obligations exclusively and are not guaranteed by any of our subsidiaries. Our subsidiaries are separate and distinct legal entities and have no obligation, contingent or otherwise, to make payments on the notes or to make any funds available for that purpose. In addition, the indenture for the notes does not restrict us or our subsidiaries from incurring additional debt or other liabilities. Accordingly, the notes will rank senior in right of payment to any future indebtedness we may incur that is expressly subordinated in right of payment to the notes, will rank equally in right of payment with any of our liabilities that are not so subordinated (including our Existing Notes), will be effectively junior in right of payment to any secured indebtedness to the extent

---

**Table of Contents**

of the value of the assets securing such indebtedness and will be structurally subordinated to any indebtedness and other liabilities (including trade payables) of our subsidiaries (including the SolarCity Convertible Notes and amounts outstanding under the Subsidiary Credit Facilities). In the event of our bankruptcy, liquidation, reorganization or other winding up, our assets that secure any of our debt will be available to pay obligations on the notes only after such secured debt has been repaid in full. There may not be sufficient assets remaining to pay amounts due on any or all of the notes then outstanding.

Our right to receive assets from any of our subsidiaries upon its liquidation or reorganization, and the right of holders of the notes to participate in those assets, is structurally subordinated to claims of that subsidiary's creditors, including trade creditors. Even if we were a creditor of any of our subsidiaries, our rights as a creditor would be subordinate to any security interest in the assets of that subsidiary and any indebtedness of that subsidiary senior to that held by us. Furthermore, none of our subsidiaries will be under any obligation to make payments to us, and any payments to us would depend on the earnings or financial condition of our subsidiaries and various business considerations. Statutory, contractual or other restrictions may also limit our subsidiaries' ability to pay dividends or make distributions, loans or advances to us. For these reasons, we may not have access to any assets or cash flows of our subsidiaries to make payments on the notes.

As of March 31, 2019, on an as-adjusted basis after giving effect to this offering (assuming that the underwriters do not exercise their over-allotment option to purchase additional notes), Tesla, Inc. would have had approximately \$7.7 billion in outstanding indebtedness (which amount includes the face amount of the notes as well as the face value of our outstanding Existing Notes and outstanding balances under the Credit Agreement), \$1.9 billion of which was secured indebtedness, and our subsidiaries had approximately \$6.7 billion in liabilities outstanding (which amount includes the face amount of the outstanding SolarCity Convertible Notes and includes \$3.5 billion of non-recourse indebtedness), including trade payables but excluding intercompany indebtedness and other obligations and liabilities of a type not required to be reflected on a balance sheet of such subsidiaries and other consolidated entities in accordance with GAAP), all of which will be structurally senior to the notes with respect to claims on the assets and cash flows of our subsidiaries and other consolidated entities.

***The notes are not protected by restrictive covenants.***

The indenture governing the notes does not contain any financial or operating covenants or restrictions on the payments of dividends, the making of investments, the incurrence of indebtedness or the issuance, purchase or prepayment of securities by us or any of our subsidiaries. In addition, the limited covenants applicable to the notes do not require us to achieve or maintain any minimum financial results relating to our financial position or results of operations. The indenture contains no covenants or other provisions to afford protection to holders of the notes in the event of a fundamental change or other corporate transaction involving us except to the extent described under Description of Notes Fundamental Change Permits Holders to Require Us to Purchase Notes , Description of Notes Conversion Rights Adjustment to Conversion Rate upon Conversion in Connection with a Make Whole Fundamental Change and Description of Notes Consolidation, Merger and Sale of Assets . For these reasons, you should not consider the repurchase feature of the notes as a significant factor in evaluating whether to invest in the notes.

Our ability to recapitalize, incur additional debt and take a number of other actions that are not limited by the terms of the notes could have the effect of diminishing our ability to make payments on the notes when due, and require us to dedicate a substantial portion of our cash flow from operations to payments on our indebtedness, which would reduce the availability of cash flow to fund our operations, working capital and capital expenditures.

---

**Table of Contents**

***Some significant restructuring transactions may not constitute a fundamental change, in which case we would not be obligated to offer to purchase the notes.***

Upon the occurrence of a fundamental change, you have the right to require us to purchase your notes. However, the fundamental change provisions will not afford protection to holders of notes in the event of other transactions that could adversely affect the notes. For example, transactions such as leveraged recapitalizations, refinancings, restructurings, or acquisitions initiated by us may not constitute a fundamental change requiring us to purchase the notes. In the event of any such transaction, the holders would not have the right to require us to purchase the notes, even though each of these transactions could increase the amount of our indebtedness, or otherwise adversely affect our capital structure or any credit ratings, thereby adversely affecting the holders of notes.

***We may not have the ability to raise the funds necessary to settle conversions of the notes or to purchase the notes upon a fundamental change.***

Holders of the notes will have the right to require us to purchase their notes upon the occurrence of a fundamental change at a purchase price equal to 100% of the principal amount of the notes to be purchased, plus accrued and unpaid interest, if any, to, but not including, the fundamental change purchase date, as described under [Description of Notes Fundamental Change Permits Holders to Require Us to Purchase Notes](#) . In addition, unless we elect to deliver solely shares of our common stock, we will be required to make cash payments in respect of the notes being converted as described under [Description of Notes Conversion Rights Settlement upon Conversion](#) . However, we may not have enough available cash or be able to obtain financing at the time we are required to make purchases of notes surrendered therefor or notes being converted. In addition, our ability to purchase the notes or to pay cash upon conversions of the notes may be limited by law, by regulatory authority or by agreements governing our future indebtedness. Our failure to purchase notes at a time when the purchase is required by the indenture or to pay cash payable on future conversions of the notes as required by the indenture would constitute a default under the indenture. A default under the indenture or the fundamental change itself could also lead to a default under agreements governing our existing and future indebtedness. If the repayment of the related indebtedness were to be accelerated after any applicable notice or grace periods, we may not have sufficient funds to repay the indebtedness and purchase the notes or make cash payments upon conversions thereof.

***The conditional conversion feature of the notes, if triggered, may adversely affect our financial condition and operating results.***

In the event the conditional conversion feature of the notes is triggered, holders of notes will be entitled to convert the notes at any time during specified periods at their option. See [Description of Notes Conversion Rights](#) . If one or more holders elect to convert their notes, we may elect to settle all or a portion of our conversion obligation through the payment of cash, which could adversely affect our liquidity. In addition, even if holders do not elect to convert their notes, we could be required under applicable accounting rules to reclassify all or a portion of the outstanding principal of the notes as a current rather than long-term liability, which would result in a material reduction of our net working capital.

***Conversion of the notes may dilute the ownership interest of existing stockholders, including holders who had previously converted their notes, or may otherwise depress the price of our common stock.***

The conversion of some or all of the notes will dilute the ownership interests of existing stockholders to the extent we deliver shares upon conversion of any of the notes. Any sales in the public market of the common stock issuable upon such conversion could adversely affect prevailing

**Table of Contents**

market prices of our common stock. In addition, the existence of the notes may encourage short selling by market participants because the conversion of the notes could be used to satisfy short positions, or anticipated conversion of the notes into shares of our common stock could depress the price of our common stock.

***The conditional conversion feature of the notes could result in your receiving less than the value of our common stock into which the notes would otherwise be convertible.***

Prior to the close of business on the business day immediately preceding February 15, 2024, you may convert your notes only if specified conditions are met. If the specific conditions for conversion are not met, you will not be able to convert your notes, and you may not be able to receive the value of the cash and/or shares of our common stock into which the notes would otherwise be convertible.

***Upon conversion of the notes, you may receive less valuable consideration than expected because the value of our common stock may decline after you exercise your conversion right but before we settle our conversion obligation.***

Under the notes, a converting holder will be exposed to fluctuations in the value of our common stock during the period from the date such holder surrenders notes for conversion until the date we settle our conversion obligation.

Upon conversion, we have the option to pay or deliver, as the case may be, cash, shares of our common stock or a combination of cash and shares of our common stock to satisfy our conversion obligation. If we elect to satisfy our conversion obligation in cash or a combination of cash and shares of our common stock, the amount of consideration that you will receive upon conversion of your notes will be determined by reference to the volume-weighted average prices of our common stock for each VWAP trading day in a 20 VWAP trading day observation period. We will deliver the consideration due in respect of conversion on the second business day immediately following the relevant conversion date if we elect to deliver solely shares of our common stock or on the maturity date, in the case of conversion occurring after the record date immediately preceding the maturity date or the second business day immediately following the end of the applicable observation period if we elect to pay solely cash or pay and deliver a combination of cash and shares of our common stock. Accordingly, if the price of our common stock decreases during this period, the amount and/or value of consideration you receive will be adversely affected.

***The adjustment to the conversion rate for notes converted in connection with a make whole fundamental change may not adequately compensate you for any lost option value of your notes as a result of such transaction.***

If a make whole fundamental change occurs prior to the maturity date, under certain circumstances, we will increase the applicable conversion rate by a number of additional shares of our common stock for notes converted in connection with such make whole fundamental change. The increase in the applicable conversion rate will be determined based on the date on which the specified corporate transaction becomes effective and the price paid (or deemed to be paid) per share of our common stock in such transaction, as described below under [Description of Notes Conversion Rights Adjustment to Conversion Rate upon Conversion in Connection with a Make Whole Fundamental Change](#) . The adjustment to the applicable conversion rate for notes converted in connection with a make whole fundamental change may not adequately compensate you for any lost option value of your notes as a result of such transaction. In addition, if the price of our common stock in the transaction is greater than \$2,500.00 per share or less than \$243.00 per share (in each case, subject to adjustment), no adjustment will be made to the applicable conversion rate. Moreover, in no event will the conversion rate per \$1,000 principal amount of notes as a result of this adjustment

---

**Table of Contents**

exceed 4.1152 shares of common stock, subject to adjustments in the same manner as the conversion rate as set forth under Description of Notes Conversion Rights Conversion Rate Adjustments .

Our obligation to increase the conversion rate upon the occurrence of a make whole fundamental change could be considered a penalty, in which case the enforceability thereof would be subject to general principles of reasonableness and equitable remedies.

***The fundamental change repurchase feature of the notes may delay or prevent an otherwise beneficial attempt to take over our company.***

The terms of the notes require us to repurchase the notes in the event of a fundamental change. A takeover of our company would trigger an option of the holders of the notes to require us to repurchase the notes. This may have the effect of delaying or preventing a takeover of our company that would otherwise be beneficial to investors in the notes. See Description of Notes Fundamental Change Permits Holders to Require Us to Purchase Notes.

***The conversion rate of the notes may not be adjusted for all dilutive events.***

The conversion rate is subject to adjustment for certain events, including, but not limited to, the issuance of certain stock dividends on our common stock, the issuance of certain rights or warrants to holders of our common stock, subdivisions or combinations of our common stock, distributions of capital stock, indebtedness, or assets to holders of our common stock, cash dividends and certain issuer tender or exchange offers as described under Description of Notes Conversion Rights Conversion Rate Adjustments. However, the conversion rate will not be adjusted for other events, such as a third-party tender or exchange offer or an issuance of common stock for cash or in connection with an acquisition, that may adversely affect the trading price of the notes or our common stock. We are not restricted from issuing additional common stock during the term of the notes and have no obligation to consider the interests of holders of the notes in deciding whether to issue common stock. An event that adversely affects the value of the notes may occur, and that event may not result in an adjustment to the applicable conversion rate.

***Regulatory actions may adversely affect the trading price and liquidity of the notes.***

We expect that many investors in, and potential purchasers of, the notes will employ, or seek to employ, a convertible arbitrage strategy with respect to the notes. Investors that employ a convertible arbitrage strategy with respect to convertible debt instruments typically implement that strategy by selling short the common stock underlying the convertible notes and dynamically adjusting their short position while they hold the notes. Investors may also implement this strategy by entering into swaps on our common stock in lieu of or in addition to short selling the common stock. As a result, any specific rules regulating equity swaps or short selling of securities or other governmental action that interferes with the ability of market participants to effect short sales or equity swaps with respect to our common stock could adversely affect the ability of investors in, or potential purchasers of, the notes to conduct the convertible arbitrage strategy that we believe they will employ, or seek to employ, with respect to the notes. This could, in turn, adversely affect the trading price and liquidity of the notes.

The SEC and other regulatory and self-regulatory authorities have implemented various rules and may adopt additional rules in the future that may impact those engaging in short selling activity involving equity securities (including our common stock). Such rules and actions include Rule 201 of SEC Regulation SHO, which generally restricts short selling when the price of a covered security triggers a circuit breaker by falling 10% or more from the security's closing price as of the end of regular trading hours on the prior day, the adoption by the Financial Industry Regulatory Authority, Inc.

**Table of Contents**

( FINRA ) and the national securities exchanges of a Limit Up-Limit Down mechanism, which prevents trades in individual listed equity securities from occurring outside of specific price bands during regular trading hours, the imposition of market-wide circuit breakers that halt trading of securities for certain periods following specific market declines, and the implementation of certain regulatory reforms required by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. Any governmental or regulatory action that restricts the ability of investors in, or potential purchasers of, the notes, to effect short sales of our common stock, borrow our common stock, or enter into swaps on our common stock could adversely affect the trading price and liquidity of the notes.

***The convertible note hedge and warrant transactions may affect the value of the notes and our common stock.***

In connection with the pricing of the notes, we entered into convertible note hedge and warrant transactions with the hedge counterparties. The convertible note hedge transactions cover, subject to customary anti-dilution adjustments, the number of shares of our common stock that will initially underlie the notes. The convertible note hedge transactions are expected to reduce the potential dilution and/or offset potential cash payments we are required to make in excess of the principal amount upon conversion of the notes. We also entered into warrant transactions with the hedge counterparties relating to the same number of shares of our common stock, subject to customary anti-dilution adjustments. However, the warrant transactions could separately have a dilutive effect on our common stock to the extent that the market price per share of our common stock exceeds the applicable strike price of the warrants on the applicable expiration dates unless, subject to the terms of the warrant transactions, we elect to cash settle the warrants. If the underwriters exercise their option to purchase additional notes, we may enter into additional convertible note hedge transactions and additional warrant transactions.

In connection with establishing their initial hedge of the convertible note hedge and warrant transactions, the hedge counterparties or their affiliates expect to enter into various derivative transactions with respect to our common stock concurrently with or shortly after the pricing of the notes, including with certain investors in the notes. This activity could increase (or reduce the size of any decrease in) the market price of our common stock or the notes at that time.

In addition, the hedge counterparties or their affiliates may modify their hedge positions by entering into or unwinding various derivatives with respect to our common stock and/or purchasing or selling our common stock or other securities of ours in secondary market transactions following the pricing of the notes and prior to the maturity of the notes (and are likely to do so during any observation period related to a conversion of notes). This activity could also cause or prevent an increase or a decrease in the market price of our common stock or the notes, which could affect your ability to convert the notes and, to the extent the activity occurs during any observation period related to a conversion of notes, it could affect the amount and value of the consideration that you will receive upon conversion of the notes.

In addition, if any such convertible note hedge and warrant transactions fail to become effective, whether or not this offering of notes is completed, the hedge counterparties (or their affiliates) may unwind their hedge positions with respect to our common stock, which could adversely affect the price of our common stock and the value of the notes.

We do not make any representation or prediction as to the direction or magnitude of any potential effect that the transactions described above may have on the price of the notes or the shares of our common stock. In addition, we do not make any representation that the hedge counterparties will engage in these transactions or that these transactions, once commenced, will not be discontinued without notice.

---

**Table of Contents*****Volatility in the market price and trading volume of our common stock could adversely impact the trading price of the notes.***

The stock market in recent years has experienced significant price and volume fluctuations that have often been unrelated to the operating performance of companies. The market price of our common stock could fluctuate significantly for many reasons, including in response to the risks described in this section, elsewhere in the accompanying prospectus, this prospectus supplement or the documents we have incorporated by reference in the accompanying prospectus and this prospectus supplement or for reasons unrelated to our operations, such as reports by industry analysts, investor perceptions or negative announcements by our customers, competitors or suppliers regarding their own performance, as well as industry conditions and general financial, economic and political instability. A decrease in the market price of our common stock would likely adversely impact the trading price of the notes. The market price of our common stock could also be affected by possible sales of our common stock by investors who view the notes as a more attractive means of equity participation in us and by hedging or arbitrage trading activity that we expect to develop involving our common stock. This trading activity could, in turn, affect the trading prices of the notes. Holders who receive common stock upon conversion of the notes will also be subject to the risk of volatility and depressed prices of our common stock.

The ability of holders of the notes to convert the notes prior to the close of business on the business day immediately preceding February 15, 2024 is conditioned on, among other events, the closing price of our common stock reaching and maintaining a closing price no less than a specified threshold for a given period of time, the trading price of the notes falling below a certain level or the occurrence of specified corporate events or distributions. If the closing price threshold is not satisfied, the trading price of the notes does not fall below the relevant threshold and none of the specified distributions or corporate events that would permit a holder to convert occurs, holders would not be able to convert notes except during the period on and after February 15, 2024 and prior to the maturity date.

***Future sales of our common stock in the public market could lower the market price for our common stock and adversely impact the trading price of the notes.***

In the future, we may sell additional shares of our common stock to raise capital. In addition, a substantial number of shares of our common stock are reserved for issuance upon conversion of the notes and our Existing Notes, the exercise of our outstanding warrants, the warrants we expect to enter into in connection with this offering, our outstanding stock options, the vesting of our outstanding restricted stock units, or pursuant to the Company's Form S-4 (File No. 333-229749) filed in connection with our pending acquisition of Maxwell Technologies, Inc. We cannot predict the size of future issuances or the effect, if any, that they may have on the market price for our common stock. The issuance and sale of substantial amounts of common stock, or the perception that such issuances and sales may occur, could adversely affect the trading price of the notes and the market price of our common stock and impair our ability to raise capital through the sale of additional equity securities. As of March 31, 2019, after giving effect to our concurrent offering of common stock (without giving effect to any additional shares issuable if the underwriters option to purchase additional shares in connection therewith is exercised), there would have been 176.8 million shares of our common stock outstanding, which will be freely transferable without restriction or further registration under the federal securities laws, except for any shares held by our affiliates, sales of which will be limited by Rule 144 under the Securities Act, absent registration under the Securities Act and for certain limited contractual restrictions applicable to certain shares.

---

**Table of Contents**

***The accounting method for convertible debt securities that may be settled in cash, such as the notes, may have a material effect on our reported financial results.***

Under Accounting Standards Codification 470-20, Debt with Conversion and Other Options, which we refer to as ASC 470-20, an entity must separately account for the liability and equity components of the convertible debt instruments (such as the notes) that may be settled entirely or partially in cash upon conversion in a manner that reflects the issuer's economic interest cost. The effect of ASC 470-20 on the accounting for the notes is that the equity component is required to be included in the additional paid-in capital section of stockholders' equity on our consolidated balance sheet, and the value of the equity component would be treated as original issue discount for purposes of accounting for the debt component of the notes. As a result, we will be required to record a greater amount of non-cash interest expense in current periods presented as a result of the amortization of the discounted carrying value of the notes to their face amount over the term of the notes. We will report lower net income (or greater net loss) in our financial results because ASC 470-20 requires interest to include both the current period's amortization of the debt discount and the instrument's coupon interest, which could adversely affect our reported or future financial results, the market price of our common stock and the trading price of the notes.

Holders may convert their notes at their option at any time prior to the close of business on the business day immediately preceding February 15, 2024 only under certain circumstances. For example, holders may convert their notes at their option during any quarter commencing after the quarter ending September 30, 2019 (and only during such quarter) if the last reported sale price of our common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding quarter is greater than or equal to 130% of the conversion price on each applicable trading day. If the notes become convertible prior to February 15, 2024 or if we are required to offer to repurchase the notes following the occurrence of a fundamental change, we may be required to reclassify our notes and the related debt issuance costs as current liabilities and certain portions of our equity to mezzanine equity under certain circumstances, which would have an adverse impact on our reported financial results for such quarter, and could have an adverse impact on the market price of our common stock and the trading price of the notes.

In addition, convertible debt instruments (such as the notes) that may be settled entirely or partly in cash are currently accounted for utilizing the treasury stock method if we have the ability and intent to settle in cash, the effect of which is that the shares issuable upon conversion of the notes are not included in the calculation of diluted earnings per share except to the extent that the conversion value of the notes exceeds their principal amount. Under the treasury stock method, for diluted earnings per share purposes, the transaction is accounted for as if the number of shares of common stock that would be necessary to settle such excess, if we elected to settle such excess in shares, are issued. We cannot be sure that we will be able to continue to demonstrate the ability or intent to settle in cash or that the accounting standards in the future will continue to permit the use of the treasury stock method. If we are unable to use the treasury stock method in accounting for the shares issuable upon conversion of the notes, then our diluted earnings per share would be adversely affected.

***Holders of notes will not be entitled to any rights with respect to our common stock, but will be subject to all changes made with respect to them.***

Holders of notes will not be entitled to any rights with respect to our common stock (including, without limitation, voting rights and rights to receive any dividends or other distributions on our common stock) prior to:

the conversion date relating to such notes if we have elected physical settlement; and

the last VWAP trading day of the applicable observation period if we have selected combination settlement;

S-20

---

**Table of Contents**

but to the extent the conversion consideration includes shares of our common stock, holders of notes will be subject to all changes affecting our common stock. For example, if an amendment is proposed to our certificate of incorporation or bylaws requiring stockholder approval and the record date for determining the stockholders of record entitled to vote on the amendment occurs prior to the conversion date related to a holder's conversion of notes if we have elected physical settlement or the last VWAP trading day of the applicable observation period related to a holder's conversion of notes if we have elected combination settlement, such holder will not be entitled to vote on the amendment, although such holder will nevertheless be subject to any changes affecting our common stock.

***We cannot assure you that an active trading market will develop for the notes.***

Prior to this offering, there has been no trading market for the notes, and we do not intend to apply to list the notes on any securities exchange or to arrange for quotation on any automated dealer quotation system. We have been informed by the underwriters that they intend to make a market in the notes after the offering is completed. However, the underwriters may cease their market-making at any time without notice. If the underwriters cease to act as market makers for the notes, we cannot assure you that another firm or person will make a market in the notes. In addition, the liquidity of the trading market in the notes, and the market price quoted for the notes, may be adversely affected by changes in the overall market for this type of security and by changes in our financial performance or prospects or in the prospects for companies in our industry generally. As a result, we cannot assure you that an active trading market will develop for the notes. If an active trading market does not develop or is not maintained, the market price and liquidity of the notes may be adversely affected. In that case you may not be able to sell your notes at a particular time or you may not be able to sell your notes at a favorable price.

***Any adverse rating of the notes may cause their trading price to fall.***

We do not intend to seek a rating on the notes. However, if a rating service were to rate the notes and if such rating service were to lower its rating on the notes below the rating initially assigned to the notes or otherwise announces its intention to put the notes on credit watch, the trading price of the notes could decline.

***You may be subject to tax if we make or fail to make certain adjustments to the applicable conversion rate of the notes even though you do not receive a corresponding cash distribution.***

The conversion rate is subject to adjustment in certain circumstances, including the payment of cash dividends or upon a make whole fundamental change. If the applicable conversion rate is adjusted as a result of a distribution that is taxable to our common stockholders, such as a cash dividend, you may be deemed to have received a dividend subject to U.S. federal income tax without the receipt of any cash. In addition, a failure to adjust (or to adjust adequately) the applicable conversion rate after an event that increases your proportionate interest in us could be treated as a deemed taxable dividend to you. If a make whole fundamental change occurs on or prior to the maturity date, under some circumstances, we will increase the applicable conversion rate for notes converted in connection with the make whole fundamental change. Such increase may also be treated as a distribution subject to U.S. federal income tax as a dividend. If you are a non-U.S. holder (as defined in Material U.S. Federal Income Tax Considerations), any deemed dividend would be subject to U.S. federal withholding tax at a 30% rate, or such lower rate as may be specified by an applicable treaty, which may be set off against subsequent payments on the notes. See Material U.S. Federal Income Tax Considerations.

---

**Table of Contents**

**Risks Related to Our Concurrent Common Stock Offering and Our Common Stock**

***The trading price of our common stock is likely to continue to be volatile.***

The trading price of our common stock has been highly volatile and could continue to be subject to wide fluctuations in response to various factors, some of which are beyond our control. Our common stock has experienced an intra-day trading high of \$387.46 per share and a low of \$231.13 per share over the last 52 weeks. The stock market in general, and the market for technology companies in particular, has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of those companies. In particular, a large proportion of our common stock has been and may continue to be traded by short sellers which may put pressure on the supply and demand for our common stock, further influencing volatility in its market price. Public perception and other factors outside of our control may additionally impact the stock price of companies like us that garner a disproportionate degree of public attention, regardless of actual operating performance. In addition, in the past, following periods of volatility in the overall market and the market price of a particular company's securities, securities class action litigation has often been instituted against these companies. Moreover, stockholder litigation like this has been filed against us in the past. While we are continuing to defend such actions vigorously, any judgment against us or any future stockholder litigation could result in substantial costs and a diversion of our management's attention and resources.

***We may fail to meet our publicly announced guidance or other expectations about our business, which could cause our stock price to decline.***

We provide guidance regarding our expected financial and business performance, such as projections regarding sales and production, as well as anticipated future revenues, gross margins, profitability and cash flows. Correctly identifying key factors affecting business conditions and predicting future events is inherently an uncertain process, and our guidance may not ultimately be accurate and has in the past been inaccurate in certain respects, such as the timing of new product manufacturing ramps. Our guidance is based on certain assumptions such as those relating to global and local economic conditions, anticipated production and sales volumes (which generally are not linear throughout a given period), average sales prices, supplier and commodity costs, and planned cost reductions. If our guidance is not accurate or varies from actual results due to our inability to meet our assumptions or the impact on our financial performance that could occur as a result of various risks and uncertainties, the market value of our common stock could decline significantly.

***Elon Musk has pledged shares of our common stock to secure certain bank borrowings. If these shares are sold pursuant to the pledges, such sales could cause our stock price to decline.***

Certain banking institutions have made extensions of credit to Elon Musk, our Chief Executive Officer. We are not a party to these loans, which are partially secured by pledges of a portion of the Tesla common stock currently owned by Mr. Musk. If the price of our common stock were to decline substantially and Mr. Musk were unable to avoid a sale of the pledged shares (for example, by contributing additional collateral or reducing his leverage), Mr. Musk may be forced by one or more of the banking institutions to sell shares of Tesla common stock under the terms of his loans. Any such sales could cause the price of our common stock to decline.

***Anti-takeover provisions contained in our governing documents, applicable laws and our convertible notes could impair a takeover attempt.***

Our certificate of incorporation and bylaws afford certain rights and powers to our board of directors that could contribute to the delay or prevention of an acquisition that it deems undesirable.

**Table of Contents**

While we have proposed, and our board of directors has recommended, two proposals to be voted on at our 2019 annual meeting of stockholders to mitigate the potential effect of certain of such provisions, there is no assurance that our stockholders will approve them. We are also subject to Section 203 of the Delaware General Corporation Law and other provisions of Delaware law that limit the ability of stockholders in certain situations to effect certain business combinations. In addition, the terms of our convertible notes require us to repurchase such notes in the event of a fundamental change, including a takeover of our company. Any of the foregoing provisions and terms that has the effect of delaying or deterring a change in control could limit the opportunity for our stockholders to receive a premium for their shares of our common stock, and could also affect the price that some investors are willing to pay for our common stock.

S-23

**Table of Contents**

**USE OF PROCEEDS**

We estimate that the net proceeds from the sale of the notes in this offering will be approximately \$1.6 billion, after deducting underwriting discounts and our estimated offering expenses. If the underwriters' over-allotment option to purchase additional notes in this offering is exercised in full, we estimate that the net proceeds from this offering will be approximately \$1.8 billion, after deducting underwriting discounts and estimated offering expenses that we must pay. In addition, concurrently with this convertible note offering, we are offering 3,086,419 shares of common stock (or up to 3,549,381 shares if the underwriters exercise in full their option to purchase additional shares) pursuant to a separate prospectus supplement in an underwritten public offering. Through this convertible notes offering and our concurrent common stock offering we expect to receive net proceeds of approximately \$2.3 billion (up to approximately \$2.7 billion if the underwriters exercise in full their options to purchase additional common stock and notes after deducting underwriting discounts and our estimated offering expenses).

We intend to use the net proceeds from this convertible notes offering and our concurrent common stock offering to further strengthen our balance sheet, as well as for general corporate purposes. In addition, we will use approximately \$262.1 million of these proceeds (after such cost is partially offset by the proceeds from warrant transactions described in [Description of Convertible Note Hedge and Warrant Transactions](#) ) to pay the net cost of the convertible note hedge transactions entered into in connection with this convertible notes offering. If the underwriters exercise their option to purchase additional notes, we may sell additional warrants and use a portion of the net proceeds from the sale of the additional notes, together with the proceeds from the additional warrants, to enter into additional convertible note hedge transactions and for general corporate purposes. Pending use of the proceeds as described above, we intend to invest the proceeds in highly liquid cash equivalents or United States government securities.

---

**Table of Contents**

**DESCRIPTION OF NOTES**

We will issue the notes under the base indenture dated as of May 22, 2013 between Tesla, Inc. (f/k/a Tesla Motors, Inc.) and U.S. Bank National Association, as trustee (the trustee), as supplemented by a supplemental indenture relating to the notes (the base indenture, as so supplemented, the indenture), which will be dated as of the date of initial issuance of the notes. You may request copies of the base indenture and the supplemental indenture from us as described under Information Incorporated By Reference.

This description of the notes supplements and, to the extent it is inconsistent, replaces the description of the general provisions of the notes and the base indenture in the accompanying prospectus. The terms of the notes include those expressly set forth in the indenture and those made part of the indenture by reference to the Trust Indenture Act of 1939, as amended (the Trust Indenture Act).

The following description is a summary of the material provisions of the notes and the indenture and is not complete. This summary is subject to, and is qualified by reference to, all the provisions of the notes and the indenture, including the definitions of certain terms used in the indenture. We urge you to read these documents because they, and not this description, define your rights as a holder of the notes.

For purposes of this description, references to:

we, our and us refer only to Tesla, Inc. and not to its subsidiaries;

open of business refers to 9:00 a.m., New York City time, on a business day;

close of business refers to 5:00 p.m., New York City time, on a business day;

business day refers to any day other than a Saturday, a Sunday or other day on which banking institutions are authorized or required by law, regulation or executive order to close or be closed in the State of New York;

notes refer, unless the context otherwise requires, to each \$1,000 principal amount of 2.00% Convertible Senior Notes due 2024 offered hereby; and

common stock refers to our common stock, par value \$0.001 per share, subject to Conversion Rights Recapitalizations, Reclassifications and Changes of Our Common Stock below.

Unless the context otherwise requires, all references to interest in this prospectus supplement include additional interest, if any, payable at our election as the sole remedy relating to the failure to comply with our reporting obligations as described under Events of Default.

**General**

The notes will:

be our general unsecured, senior obligations;

initially be limited to an aggregate principal amount of \$1,600,000,000 (or \$1,840,000,000 if the underwriters' option to purchase additional notes is exercised in full);

bear cash interest from May 7, 2019 at an annual rate of 2.00%, payable semiannually in arrears on May 15 and November 15 of each year, beginning on November 15, 2019;

not be redeemable prior to maturity;

S-25

## **Table of Contents**

be subject to purchase by us at the option of the holders following a fundamental change (as defined below under **Fundamental Change Permits Holders to Require Us to Purchase Notes** ), at a purchase price equal to 100% of the principal amount of the notes to be purchased, plus accrued and unpaid interest to, but not including, the fundamental change purchase date;

mature on May 15, 2024, unless earlier converted or purchased;

be issued in denominations of \$1,000 and multiples of \$1,000; and

be represented by one or more registered notes in global form, but in certain limited circumstances may be represented by notes in definitive form. See **Book-Entry, Settlement and Clearance** .

Subject to satisfaction of certain conditions and during the periods described below, the notes may be converted at an initial conversion rate of 3.2276 shares of common stock per \$1,000 principal amount of notes (equivalent to an initial conversion price of approximately \$309.83 per share of common stock). The conversion rate is subject to adjustment if certain events occur.

We will settle conversions of notes by paying or delivering, as the case may be, cash, shares of our common stock or a combination of cash and shares of our common stock, at our election, as described under **Conversion Rights Settlement upon Conversion** . You will not receive any separate cash payment for interest, if any, accrued and unpaid to the conversion date except under the limited circumstances described below.

The indenture does not limit the amount of debt that may be issued by us or our subsidiaries under the indenture or otherwise. The indenture does not contain any financial covenants and does not restrict us from paying dividends or issuing or repurchasing our other securities. Other than restrictions described under **Fundamental Change Permits Holders to Require Us to Purchase Notes** and **Consolidation, Merger and Sale of Assets** below and except for the provisions set forth under **Conversion Rights Adjustment to Conversion Rate upon Conversion in Connection with a Make Whole Fundamental Change** , the indenture does not contain any covenants or other provisions designed to afford holders of the notes protection in the event of a highly leveraged transaction involving us or in the event of a decline in our credit rating as the result of a takeover, recapitalization, highly leveraged transaction or similar restructuring involving us that could adversely affect such holders.

We do not intend to list the notes on any securities exchange or any automated dealer quotation system.

The notes will not be guaranteed by any of our subsidiaries. No sinking fund is provided for the notes. The notes will not be subject to defeasance.

## **Additional Notes**

We may, without the consent of the holders, reopen the indenture and issue additional notes under the indenture with the same terms as the notes offered hereby (except for any differences in the issue date, the issue price, initial interest payment date and interest accrued prior to the issue date of such additional notes) in an unlimited aggregate principal amount; *provided* that if any such additional notes are not fungible with the notes initially offered hereby for U.S. federal income tax purposes, such additional notes will have one or more separate CUSIP numbers.

---

**Table of Contents**

**Purchase and Cancellation**

We will cause all notes surrendered for payment, repurchase (including as described below, but not including notes repurchased pursuant to cash-settled swaps or other derivatives), registration of transfer or exchange or conversion, if surrendered to any of our agents, subsidiaries or affiliates, to be delivered to the trustee for cancellation, and they will no longer be considered outstanding under the indenture. All notes delivered to the trustee shall be cancelled promptly by the trustee. No notes shall be authenticated in exchange for any notes cancelled as provided in the indenture.

We may, to the extent permitted by law, and directly or indirectly (regardless of whether such notes are surrendered to us), repurchase notes in the open market or otherwise, whether by us or our subsidiaries or through a private or public tender or exchange offer or through counterparties to private agreements, including by cash-settled swaps or other derivatives.

**Payments on the Notes; Paying Agent and Registrar; Transfer and Exchange**

We will pay the principal of, and interest on, notes in global form registered in the name of or held by The Depository Trust Company ( DTC ) or its nominee in immediately available funds to DTC or its nominee, as the case may be, as the registered holder of such global note.

We will pay the principal of any certificated notes at the office or agency designated by us for that purpose. We have initially designated the trustee as our paying agent and registrar and its corporate trust office as a place where notes may be presented for payment or for registration of transfer. We may, however, change the paying agent or registrar without prior notice to the holders of the notes, and we may act as paying agent or registrar.

Interest on certificated notes will be payable (i) to holders holding certificated notes having an aggregate principal amount of \$5,000,000 or less, by check mailed to the holders of these notes and (ii) to holders holding certificated notes having an aggregate principal amount of more than \$5,000,000, either by check mailed to each holder or, upon application by such a holder to the registrar not later than the relevant regular record date, by wire transfer in immediately available funds to that holder's account within the United States, which application shall remain in effect until the holder notifies, in writing, the registrar to the contrary.

A holder of notes may transfer or exchange notes as described under Book-Entry, Settlement and Clearance . However, we are not required to transfer or exchange any note surrendered for conversion or required purchase.

The registered holder of a note will be treated as its owner for all purposes.

**Interest**

The notes will bear cash interest at a rate of 2.00% per year until maturity. Interest on the notes will accrue from their first date of initial issuance or from the most recent date on which interest has been paid or duly provided for. Interest will be payable semiannually in arrears on May 15 and November 15 of each year, beginning on November 15, 2019.

Interest will be paid to the person in whose name a note is registered at the close of business on May 1 or November 1 (whether or not a business day), as the case may be, immediately preceding the relevant interest payment date (each, a regular record date ). Interest on the notes will be computed on the basis of a 360-day year composed of twelve 30-day months, and, for a partial month, on the basis of the number of days actually elapsed in a 30-day month.

---

**Table of Contents**

If any interest payment date, the maturity date or any earlier required purchase date upon a fundamental change falls on a day that is not a business day, the required payment will be made on the next succeeding business day and no interest on such payment will accrue in respect of the delay.

**Ranking**

The notes will be our general unsecured obligations that rank senior in right of payment to any future indebtedness that is expressly subordinated in right of payment to the notes. The notes will rank equally in right of payment with all of our existing and future liabilities that are not so subordinated, including our Existing Notes. The notes will be effectively junior to any of our secured indebtedness to the extent of the value of the assets securing such indebtedness. In the event of our bankruptcy, liquidation, reorganization or other winding up, our assets that secure secured debt will be available to pay obligations on the notes only after all indebtedness under such secured debt has been repaid in full. The notes will be structurally subordinated to all indebtedness and other liabilities (including trade payables) of our subsidiaries (including the SolarCity Convertible Notes and the amounts outstanding under the Subsidiary Credit Facilities). We advise you that there may not be sufficient assets remaining to pay amounts due on any or all the notes then outstanding.

As of March 31, 2019, on an as-adjusted basis after giving effect to this offering (assuming that the underwriters do not exercise their option to purchase additional notes) and to the use of proceeds thereof to pay the net cost of the convertible note hedge transactions entered into concurrently with the offering, as described under *Use of Proceeds*, Tesla, Inc. would have had approximately \$7.7 billion in outstanding indebtedness (which amount includes the face amount of the notes as well as the face value of our outstanding Existing Notes and outstanding balances under the Credit Agreement), \$1.9 billion of which was secured indebtedness, and our subsidiaries had approximately \$6.7 billion in liabilities outstanding (including trade payables and indebtedness to third parties at the full stated amount thereof but excluding intercompany indebtedness and other obligations and liabilities of a type not required to be reflected on a balance sheet of such subsidiaries and other consolidated entities in accordance with GAAP), all of which will be structurally senior to the notes with respect to claims on the assets and cash flows of our subsidiaries and other consolidated entities.

**No Redemption**

We are not permitted to redeem the notes prior to their maturity.

**Conversion Rights**

***General***

Prior to the close of business on the business day immediately preceding February 15, 2024 (the *Free Conversion Date*), holders may convert any or all of their notes only upon satisfaction of one or more of the conditions described under the headings *Conversion upon Satisfaction of Sale Price Condition*, *Conversion upon Satisfaction of Trading Price Condition*, and *Conversion upon Specified Corporate Events*. On or after the Free Conversion Date until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert any or all of their notes at any time.

The conversion rate will initially be 3.2276 shares of common stock per \$1,000 principal amount of notes (equivalent to an initial conversion price of approximately \$309.83 per share of common stock). The conversion rate with respect to the notes and the conversion price for notes in effect at any given time are referred to as the *applicable conversion rate* and the *applicable conversion price*.

---

**Table of Contents**

respectively, and will be subject to adjustment as described below. The applicable conversion price at any given time will be computed by dividing \$1,000 by the applicable conversion rate at such time. A holder may convert fewer than all of such holder's notes so long as the notes converted are an integral multiple of \$1,000 principal amount. The trustee will initially act as the conversion agent.

Upon conversion of a note, we will satisfy our conversion obligation by paying or delivering, as applicable, cash, shares of our common stock or a combination of cash and shares of our common stock, at our election, all as set forth below under "Settlement upon Conversion". If we elect to satisfy our conversion obligation solely in cash or through payment and delivery, as the case may be, of a combination of cash and shares of our common stock, the amount of cash and shares of our common stock, if any, due upon conversion will be based on a daily conversion value (as defined below under "Settlement upon Conversion") calculated on a proportionate basis for each VWAP trading day (as defined below under "Settlement upon Conversion") in a 20 consecutive VWAP trading day observation period (as defined below under "Settlement upon Conversion").

If a holder of notes has submitted notes for purchase upon a fundamental change, the holder may convert those notes only if that holder first validly withdraws its purchase notice.

Upon conversion, you will not receive any separate cash payment for accrued and unpaid interest, if any, except as described below. Our payment and delivery to you of the cash and/or shares of our common stock, as applicable, issued to the converting holder upon conversion will be deemed to satisfy in full our obligation to pay:

the principal amount of the note; and

accrued and unpaid interest, if any, to, but not including, the relevant conversion date.

As a result, accrued and unpaid interest, if any, to, but not including, the relevant conversion date will be deemed to be paid in full rather than cancelled, extinguished or forfeited.

Notwithstanding the immediately preceding paragraph, if notes are converted after the close of business on a regular record date for the payment of interest, but prior to the open of business on the immediately following interest payment date, holders of such notes at the close of business on such regular record date will receive the full amount of interest payable on such notes on the corresponding interest payment date notwithstanding the conversion. Notes surrendered for conversion during the period from the close of business on any regular record date to the open of business on the immediately following interest payment date must be accompanied by funds equal to the amount of interest payable on the notes so converted (regardless of whether the converting holder was the holder of record on the corresponding regular record date); *provided* that no such payment need be made:

for conversions following the regular record date immediately preceding the maturity date;

if we have specified a fundamental change purchase date that is after a regular record date and on or prior to the corresponding interest payment date; or

to the extent of any overdue interest, if any overdue interest exists at the time of conversion with respect to such note.

For the avoidance of doubt, all holders on the regular record date immediately preceding the maturity date will receive and retain the full interest payment due on the maturity date regardless of whether their notes are converted following such regular record date.

We will not issue fractional shares of our common stock upon conversion of notes. Instead, we will deliver cash in lieu of any fractional share as described under Settlement Upon Conversion .

S-29

---

**Table of Contents**

If a holder converts notes, we will pay any documentary, stamp or similar issue or transfer tax due on any issuance of any shares of our common stock upon the conversion, unless the tax is due because the holder requests any such shares to be issued in a name other than the holder's name, in which case the holder will pay that tax.

Holders may surrender their notes for conversion under the following circumstances:

***Conversion upon Satisfaction of Sale Price Condition***

Prior to the close of business on the business day immediately preceding the Free Conversion Date, a holder may surrender all or a portion of its notes for conversion during any calendar quarter commencing after the calendar quarter ending on September 30, 2019 (and only during such calendar quarter), if the last reported sale price of our common stock for at least 20 trading days (whether or not consecutive) during the period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the applicable conversion price on each applicable trading day.

The last reported sale price of our common stock on any date means the closing sale price per share (or if no closing sale price is reported, the average of the bid and ask prices or, if more than one in either case, the average of the average bid and the average ask prices) on that date as reported in composite transactions for the relevant stock exchange (as defined below). If our common stock is not listed, quoted or traded on any U.S. securities exchange or any other market, the last reported sale price will be the average of the mid-point of the last bid and ask prices for our common stock on the relevant date from each of at least three nationally recognized independent investment banking firms selected by us for this purpose.

Trading day means a day on which:

trading in our common stock (or other security for which a last reported sale price must be determined) generally occurs on the relevant stock exchange, and

a last reported sale price for our common stock (or last reported sale price for such other security) is available on the relevant stock exchange; *provided, however*, if our common stock (or such other security) is not listed, quoted or traded on any U.S. securities exchange or any other market, trading day means a business day .

Relevant stock exchange means The NASDAQ Global Select Market or, if our common stock (or other security for which a last reported sale price must be determined) is not then listed on The NASDAQ Global Select Market, the principal other U.S. national or regional securities exchange on which our common stock (or such other security) is then listed or, if our common stock (or such other security) is not then listed on a U.S. national or regional securities exchange, the over-the-counter market, as reported by OTC Markets Group Inc. or similar organization or, if our common stock is not then quoted by OTC Markets Group Inc. or similar organization, the principal other market on which our common stock (or such other security) is then traded.

***Conversion upon Satisfaction of Trading Price Condition***

Prior to the close of business on the business day immediately preceding the Free Conversion Date, a holder of notes may surrender all or a portion of its notes for conversion during the five business day period after any five consecutive trading day period (the measurement period ) in which the trading price per \$1,000 principal amount of notes, as determined following a request by a holder of notes in accordance with the procedures described below, for each

trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the

S-30

---

**Table of Contents**

applicable conversion rate on each such trading day, subject to compliance with the procedures and conditions described below concerning the bid solicitation agent's obligation to make a trading price determination.

The trading price of the notes on any date of determination means the average of the secondary market bid quotations obtained by the bid solicitation agent for \$5,000,000 principal amount of notes at approximately 3:30 p.m., New York City time, on such determination date from three independent nationally recognized securities dealers we select; *provided* that if three such bids cannot reasonably be obtained by the bid solicitation agent but two such bids are obtained, then the average of the two bids shall be used, and if only one such bid can reasonably be obtained by the bid solicitation agent, that one bid shall be used. If the bid solicitation agent cannot reasonably obtain at least one bid for \$5,000,000 principal amount of notes from a nationally recognized securities dealer, then the trading price per \$1,000 principal amount of notes will be deemed to be less than 98% of the product of the last reported sale price of our common stock and the applicable conversion rate.

The bid solicitation agent (if other than us) shall have no obligation to determine the trading price per \$1,000 principal amount of notes unless we have requested such determination, and we shall have no obligation to make such request (or, if we are acting as bid solicitation agent, we shall have no obligation to determine the trading price) unless a holder of a note provides us with reasonable evidence that the trading price per \$1,000 principal amount of notes would be less than 98% of the product of the last reported sale price of our common stock and the applicable conversion rate. At such time, we shall instruct the bid solicitation agent to (or, if we are acting as bid solicitation agent, we shall) determine the trading price per \$1,000 principal amount of notes beginning on the next trading day and on each successive trading day until the trading price per \$1,000 principal amount of notes is greater than or equal to 98% of the product of the last reported sale price of our common stock and the applicable conversion rate. If the trading price condition has been met on any trading day, we will so notify the holders, the trustee and the conversion agent (if other than the trustee) on such trading day. If, at any time after the trading price condition has been met, the trading price per \$1,000 principal amount of notes is greater than or equal to 98% of the product of the last reported sale price of our common stock and the applicable conversion rate for such date, we will promptly so notify the holders, the trustee and the conversion agent (if other than the trustee). If we do not, when we are required to, instruct the bid solicitation agent to (or, if we are acting as bid solicitation agent, we do not) obtain bids, or if we give such instruction to the bid solicitation agent and the bid solicitation agent fails to make such determination, then, in either case, the trading price per \$1,000 principal amount of notes will be deemed to be less than 98% of the product of the last reported sale price of our common stock and the applicable conversion rate on each trading day of such failure.

We will initially act as the bid solicitation agent.

***Conversion upon Specified Corporate Events***

***Certain Distributions***

If, prior to the close of business on the business day immediately preceding the Free Conversion Date, we elect to:

distribute to all or substantially all holders of our common stock any rights, options or warrants (other than in connection with a stockholder rights plan) entitling them, for a period of not more than 45 calendar days from the declaration date for such distribution, to subscribe for or purchase shares of our common stock at a price per share that is less than the average of the last reported sale prices of our common stock for the 10 consecutive trading day period ending on, and including, the trading day immediately preceding the declaration date for such distribution; or

---

**Table of Contents**

distribute to all or substantially all holders of our common stock our assets, debt securities or rights to purchase our securities, which distribution has a per share value, as reasonably determined by our board of directors or a committee thereof, exceeding 10% of the last reported sale price of our common stock on the trading day immediately preceding the declaration date for such distribution, then, in either case, we must notify the holders of the notes at least 30 scheduled trading days prior to the ex-dividend date (as defined below) for such issuance or distribution.

Once we have given such notice, holders may surrender all or a portion of their notes for conversion at any time until the earlier of the close of business on the business day immediately preceding the ex-dividend date for such issuance or distribution, and our declaration that such issuance or distribution will not take place.

Ex-dividend date means the first date on which the shares of our common stock trade on the relevant stock exchange, regular way, without the right to receive the issuance, dividend or distribution in question from us or, if applicable, from the seller of our common stock on the relevant stock exchange (in the form of due bills or otherwise) as determined by the relevant stock exchange.

***Certain Corporate Events***

Prior to the close of business on the business day immediately preceding the Free Conversion Date, if:

a transaction or event that constitutes a fundamental change (as defined under Fundamental Change Permits Holders to Require Us to Purchase Notes ) occurs;

a transaction or event that constitutes a make whole fundamental change (as defined under Adjustment to Conversion Rate upon Conversion in Connection with a Make Whole Fundamental Change ) occurs; or

we are a party to a consolidation, merger, combination, statutory or binding share exchange or similar transaction involving us pursuant to which our common stock would be converted into, or exchanged for, cash, securities or other property or assets, or any sale, conveyance, lease or other transfer or similar transaction in one transaction or a series of transactions of all or substantially all of the consolidated assets of ours and our subsidiaries, taken as a whole, the notes may be surrendered by a holder for conversion at any time from or after the date that is 30 scheduled trading days prior to the anticipated effective date of the transaction (or, if later, the business day after we give notice of such transaction) until the close of business on the 35th trading day after the actual effective date of such transaction or, if such transaction also constitutes a fundamental change, until the close of business on the business day immediately preceding the relevant fundamental change purchase date.

We will notify holders, the trustee and the conversion agent (if other than the trustee) as promptly as practicable following the date we publicly announce such transaction; *provided* that we will deliver such notice in no event later than the actual effective date.

If a holder has already delivered a purchase notice as described under Fundamental Change Permits Holders to Require Us to Purchase Notes with respect to a note, the holder may not surrender that note for conversion until the holder has validly withdrawn the purchase notice in accordance with the relevant provisions of the indenture. If a holder submits its notes for required purchase, the holder's right to withdraw the purchase notice and convert the notes that are subject to required purchase will terminate at the close of business on the business day immediately preceding

the relevant fundamental change purchase date.

S-32

**Table of Contents**

***Conversions on or After the Applicable Free Conversion Date***

On or after the Free Conversion Date, a holder may convert all or a portion of its notes at any time prior to the close of business on the second scheduled trading day immediately preceding the maturity date.

***Conversion Procedures***

If you hold a beneficial interest in a global note, to convert you must comply with DTC's procedures for converting a beneficial interest in a global note and, if required, pay funds equal to interest payable on the next interest payment date to which you are not entitled.

If you hold a certificated note, to convert you must:

complete and manually sign the conversion notice on the back of the note, or a facsimile of the conversion notice;

deliver the conversion notice, which is irrevocable, and the note to the conversion agent;

if required, furnish appropriate endorsements and transfer documents; and

if required, pay funds equal to interest payable on the next interest payment date to which you are not entitled, as described under **Conversion Rights General**.

We will pay any documentary, stamp or similar issue or transfer tax on the issuance of any shares of our common stock upon conversion of the notes, unless the tax is due because the holder requests such shares to be issued in a name other than the holder's name, in which case the holder will pay the tax.

We refer to the date you comply with the relevant procedures for conversion described above as the **conversion date**.

***Settlement upon Conversion***

Upon conversion of any note, we may choose to pay or deliver, as the case may be:

cash ( **cash settlement** );

shares of our common stock ( **physical settlement** ); or

a combination of cash and shares of our common stock ( **combination settlement** ), as described below.

We refer to each of these settlement methods as a **settlement method**.

All conversions of notes occurring on or after the Free Conversion Date will be settled using the same relative proportion of cash and/or shares of our common stock as all other conversions occurring on or after the Free Conversion Date. We will inform holders, the trustee and the conversion agent (if other than the trustee) of the settlement method we elect for any conversions occurring on or after the Free Conversion Date no later than the Free Conversion Date. If we do not timely elect a settlement method, we will no longer have the right to elect cash settlement or physical settlement and we will be deemed to have elected combination settlement in respect of our conversion obligation, as described below, and the specified dollar amount (as defined below) per \$1,000 principal amount of notes will be equal to \$1,000. If we elect combination settlement but we do not timely notify converting holders of the specified dollar amount per \$1,000 principal amount of notes, such specified dollar amount will be deemed to be \$1,000.

S-33

**Table of Contents**

Except for any conversions of notes that occur on or after the Free Conversion Date, we will use the same settlement method (including the same relative proportion of cash and/or shares of our common stock) for all conversions occurring on the same conversion date, but we will not have any obligation to use the same settlement method with respect to conversions that occur on different conversion dates. That is, we may choose for notes converted on one conversion date to settle conversions in physical settlement, and choose for notes converted on another conversion date cash settlement or combination settlement. If we elect a settlement method, we will inform holders so converting, the trustee and the conversion agent (if other than the trustee) of the settlement method we have selected no later than the close of business on the second trading day immediately following the related conversion date. If we do not timely elect a settlement method, we will no longer have the right to elect cash settlement or physical settlement with respect to that conversion date and we will be deemed to have elected combination settlement in respect of our conversion obligation, as described below, and the specified dollar amount (as defined below) per \$1,000 principal amount of notes will be equal to \$1,000. If we elect combination settlement but we do not timely notify converting holders of the specified dollar amount per \$1,000 principal amount of notes, such specified dollar amount will be deemed to be \$1,000.

Settlement amounts will be computed as follows:

if we elect physical settlement, we will deliver to the converting holder in respect of each \$1,000 principal amount of notes being converted a number of shares of our common stock equal to the applicable conversion rate (plus cash in lieu of any fractional share of our common stock issuable upon conversion);

if we elect cash settlement, we will pay to the converting holder in respect of each \$1,000 principal amount of notes being converted cash in an amount equal to the sum of the daily conversion values (as defined below under Definitions ) for each of the 20 consecutive VWAP trading days (as defined below under Definitions ) during the related observation period (as defined below under Definitions ); and

if we elect (or are deemed to have elected) combination settlement, we will pay or deliver, as the case may be, to the converting holder in respect of each \$1,000 principal amount of notes being converted a settlement amount equal to the sum of the daily settlement amounts for each of the 20 consecutive VWAP trading days during the relevant observation period (plus cash in lieu of any fractional share of our common stock issuable upon conversion).

If more than one note is surrendered for conversion at any one time by the same holder, the conversion obligation with respect to such notes shall be computed on the basis of the aggregate principal amount of the notes surrendered.

The daily settlement amount , for each of the 20 consecutive VWAP trading days during the applicable observation period, shall consist of:

cash equal to the lesser of (i) the maximum cash amount per \$1,000 principal amount of notes to be received upon conversion as specified (or deemed specified) in the notice specifying our chosen settlement method (the specified dollar amount ), divided by 20 (such quotient, the daily measurement value ) and (ii) the daily conversion value; and

if the daily conversion value exceeds the daily measurement value, a number of shares of our common stock equal to (i) the difference between the daily conversion value and the daily measurement value, divided by (ii) the daily VWAP (as defined below under Definitions ) for such VWAP trading day.

S-34

## **Table of Contents**

Except as described under Adjustment to Conversion Rate upon Conversion in Connection with a Make Whole Fundamental Change and Recapitalizations, Reclassifications and Changes of Our Common Stock, we will deliver the consideration due in respect of conversion of the notes on:

if we elect physical settlement, on the second business day immediately following the relevant conversion date for any conversion occurring prior to the record date immediately preceding the maturity date or on the maturity date, for any conversion occurring on or after the record date immediately preceding the maturity date, or

the second business day immediately following the last VWAP trading day of the relevant observation period, in the case of any cash settlement or combination settlement.

We will pay cash in lieu of any fractional share of common stock issuable upon conversion of the notes based on:

the daily VWAP on the relevant conversion date, in the case of physical settlement; and

the daily VWAP on the last VWAP trading day of the relevant observation period, in the case of combination settlement.

Each conversion will be deemed to have been effected as to any notes surrendered for conversion on the conversion date; *provided, however*, that the person in whose name any shares of our common stock shall be issuable upon such conversion will be treated as the holder of record of such shares as of the close of business on the conversion date, in the case of physical settlement, or the last VWAP trading day of the relevant observation period, in the case of combination settlement.

## ***Definitions***

The daily conversion value means, for each of the 20 consecutive trading days during the observation period, 1/20th of the product of:

the conversion rate on such VWAP trading day; and

the daily VWAP on such VWAP trading day.

The daily VWAP means, for each of the 20 consecutive trading days during the applicable observation period, the per share volume-weighted average price as displayed under the heading Bloomberg VWAP on Bloomberg page TSLA.Q <EQUITY> AQR (or its equivalent successor if such page is not available) in respect of the period from the scheduled open of trading until the scheduled close of trading of the primary trading session on such VWAP trading day (or if such volume-weighted average price is unavailable, the market value of one share of our common stock on such VWAP trading day reasonably determined, using a volume-weighted average method, by a nationally recognized independent investment banking firm retained for this purpose by us). The daily VWAP will be determined without regard to after-hours trading or any other trading outside of the regular trading session trading hours.

The observation period with respect to any note surrendered for conversion means:

if the relevant conversion date occurs prior to the Free Conversion Date, the 20 consecutive VWAP trading day period beginning on, and including, the second VWAP trading day immediately succeeding such conversion date; and

if the relevant conversion date occurs on or after the Free Conversion Date, the 20 consecutive VWAP trading day period beginning on, and including, the 21st scheduled trading day immediately preceding the maturity date (if such scheduled trading day is not a VWAP trading day, the immediately following VWAP trading day).

S-35

**Table of Contents**

VWAP trading day means a day on which:

there is no market disruption event (as defined below); and

trading in our common stock generally occurs on the relevant stock exchange.

If our common stock is not listed or admitted for trading on any relevant stock exchange, VWAP trading day means a business day .

Market disruption event means:

a failure by the relevant stock exchange to open for trading during its regular trading session; or

the occurrence or existence prior to 1:00 p.m., New York City time, on any scheduled trading day for our common stock for more than one half-hour period in the aggregate during regular trading hours of any suspension or limitation imposed on trading (by reason of movements in price exceeding limits permitted by the relevant stock exchange or otherwise) in our common stock or in any options contracts or future contracts relating to our common stock.

Scheduled trading day means a day that is scheduled to be a trading day on the relevant stock exchange. If our common stock is not listed, quoted or traded on any U.S. securities exchange or any other market, scheduled trading day means a business day .

***Conversion Rate Adjustments***

The conversion rate will be adjusted as described below, except that we will not make any adjustments to the applicable conversion rate if holders of the notes participate (other than in the case of a share split or share combination), as a result of holding the notes, and contemporaneously with common stock holders, in any of the transactions described below as if such holders of the notes held a number of shares of our common stock equal to the applicable conversion rate, multiplied by the principal amount (expressed in thousands) of notes held by such holder, without having to convert their notes.

- (1) If we exclusively issue shares of our common stock as a dividend or distribution on shares of our common stock, or if we effect a share split or share combination, the applicable conversion rate will be adjusted based on the following formula:

$$CR_1 = CR_0 \times \frac{OS_1}{OS_0}$$

where,

Edgar Filing: Tesla, Inc. - Form 424B5

- $CR_0$  = the applicable conversion rate in effect immediately prior to the open of business on the ex-dividend date of such dividend or distribution, or immediately prior to the open of business on the effective date of such share split or share combination, as applicable;
- $CR_1$  = the applicable conversion rate in effect immediately after the open of business on such ex-dividend date or effective date, as applicable;
- $OS_0$  = the number of shares of our common stock outstanding immediately prior to the open of business on such ex-dividend date or effective date, as applicable; and
- $OS_1$  = the number of shares of our common stock outstanding immediately after giving effect to such dividend, distribution, share split or share combination.

S-36

**Table of Contents**

Any adjustment made under this clause (1) shall become effective immediately after the open of business on the ex-dividend date for such dividend or distribution, or immediately after the open of business on the effective date for such share split or share combination, as applicable. If any dividend or distribution of the type described in this clause (1) is declared but not so paid or made, or the outstanding shares of common stock are not so split or combined, as the case may be, the applicable conversion rate shall be immediately readjusted, effective as of the date our board of directors or a committee thereof determines not to pay such dividend or distribution or to effect such share split or share combination, to the conversion rate that would then be in effect if such dividend or distribution or share split or share combination had not been declared.

- (2) If we distribute to all or substantially all holders of our common stock any rights, options or warrants (other than pursuant to a stockholder rights plan, so long as such rights have not separated from the shares of common stock) entitling them, for a period of not more than 45 calendar days from the declaration date for such distribution, to subscribe for or purchase shares of our common stock at a price per share that is less than the average of the last reported sale prices of our common stock for the 10 consecutive trading day period ending on, and including, the trading day immediately preceding the declaration date for such distribution, the applicable conversion rate will be increased based on the following formula:

$$CR_1 = CR_0 \times \frac{(OS_0 + X)}{(OS_0 + Y)}$$

where,

- $CR_0$  = the applicable conversion rate in effect immediately prior to the open of business on the ex-dividend date for such distribution;
- $CR_1$  = the applicable conversion rate in effect immediately after the open of business on such ex-dividend date;
- $OS_0$  = the number of shares of our common stock outstanding immediately prior to the open of business on such ex-dividend date;
- X = the total number of shares of our common stock issuable pursuant to such rights, options or warrants; and
- Y = the number of shares of our common stock equal to the aggregate price payable to exercise such rights, options or warrants, divided by the average of the last reported sale prices of our common stock over the 10 consecutive trading day period ending on, and including, the trading day immediately preceding the declaration date for such distribution of such rights, options or warrants.

Any increase made under this clause (2) will be made successively whenever any such rights, options or warrants are distributed and shall become effective immediately after the open of business on the ex-dividend date for such distribution. To the extent that shares of common stock are not delivered after the expiration of such rights, options or warrants, the applicable conversion rate shall be decreased to the conversion rate that would then be in effect had the increase with respect to the distribution of such rights, options or warrants been made on the basis of delivery of only the number of shares of common stock actually delivered. If such rights, options or warrants are not so distributed, or

if no such rights, options or warrants are exercised prior to their expiration, the applicable conversion rate shall be decreased to the conversion rate that would then be in effect if such distribution had not occurred.

For the purpose of this clause (2) and for the purpose of the first bullet point under Conversion upon Specified Corporate Events Certain Distributions , in determining whether any rights, options or

S-37

**Table of Contents**

warrants entitle the holders to subscribe for or purchase shares of our common stock at less than such average of the last reported sale prices for the 10 consecutive trading day period ending on, and including, the trading day immediately preceding the declaration date for such distribution, and in determining the aggregate offering price of such shares of common stock, there shall be taken into account any consideration received by us for such rights, options or warrants and any amount payable on exercise or conversion thereof, the value of such consideration, if other than cash, to be determined by our board of directors or a committee thereof.

- (3) If we distribute shares of our capital stock, evidences of our indebtedness, other assets or property of ours or rights, options or warrants to acquire our capital stock or other securities, to all or substantially all holders of our common stock, excluding:

dividends or distributions as to which an adjustment was effected pursuant to clause (1) or (2) above;

dividends or distributions paid exclusively in cash as to which an adjustment was effected pursuant to clause (4) below;

distributions of reference property in a transaction described in Recapitalizations, Reclassifications and Changes of Our Common Stock ;

except as otherwise described below, rights issued pursuant to a stockholder rights plan of ours; and

spin-offs as to which the provisions set forth below in this clause (3) shall apply;  
then the applicable conversion rate will be increased based on the following formula:

$$CR_1 = CR_0 \times \frac{SP_0}{(SP_0 - FMV)}$$

where,

$CR_0$  = the applicable conversion rate in effect immediately prior to the open of business on the ex-dividend date for such distribution;

$CR_1$  = the applicable conversion rate in effect immediately after the open of business on such ex-dividend date;

$SP_0$  = the average of the last reported sale prices of our common stock over the 10 consecutive trading day period ending on, and including, the trading day immediately preceding the ex-dividend date for such

distribution; and

FMV = the fair market value (as determined by our board of directors or a committee thereof) of the shares of capital stock, evidences of indebtedness, assets, property, rights, options or warrants distributed with respect to each outstanding share of our common stock as of the open of business on the ex-dividend date for such distribution.

Any increase made under the portion of this clause (3) above will become effective immediately after the open of business on the ex-dividend date for such distribution. If such distribution is not so paid or made, the applicable conversion rate shall be decreased to be the conversion rate that would then be in effect if such distribution had not been declared.

Notwithstanding the foregoing, if FMV (as defined above) is equal to or greater than  $S_0$  (as defined above), in lieu of the foregoing increase, each holder of a note shall receive, in respect of each \$1,000 principal amount thereof, at the same time and upon the same terms as holders of our common stock, the amount and kind of our capital stock, evidences of our indebtedness, other assets or

S-38

**Table of Contents**

property of ours or rights, options or warrants to acquire our capital stock or other securities that such holder would have received if such holder owned a number of shares of common stock equal to the applicable conversion rate in effect on the ex-dividend date for the distribution.

If we issue rights, options or warrants that are only exercisable upon the occurrence of certain triggering events, then:

we will not adjust the conversion rate pursuant to the clauses above until the earliest of these triggering events occurs; and

we will readjust the conversion rate to the extent any of these rights, options or warrants are not exercised before they expire.

With respect to an adjustment pursuant to this clause (3) where there has been a payment of a dividend or other distribution on our common stock of shares of capital stock of any class or series, or similar equity interest, of or relating to a subsidiary or other business unit, that are, or, when issued, will be, listed or admitted for trading on a U.S. national securities exchange, which we refer to as a spin-off, the applicable conversion rate will be increased based on the following formula:

$$CR_1 = CR_0 \times \frac{FMV + MP_0}{MP_0}$$

where,

$CR_0$  = the applicable conversion rate in effect immediately prior to the end of the valuation period (as defined below);

$CR_1$  = the applicable conversion rate in effect immediately after the valuation period;

$FMV$  = the average of the last reported sale prices of the capital stock or similar equity interest distributed to holders of our common stock applicable to one share of our common stock (determined by reference to the definition of last reported sale price set forth under Conversion upon Satisfaction of Sale Price Condition as if references therein to our common stock were to such capital stock or similar equity interest) over the first 10 consecutive trading day period after, and including, the ex-dividend date of the spin-off (the valuation period); *provided* that if there is no last reported sale price of the capital stock or similar equity interest distributed to holders of our common stock on such ex-dividend date, the valuation period shall be the first 10 consecutive trading day period after, and including, the first date such last reported sale price is available; and

$MP_0$  = the average of the last reported sale prices of our common stock over the valuation period.

The adjustment to the applicable conversion rate under the preceding paragraph will be determined on the last trading day of the valuation period, but will be given effect at the open of business on the ex-dividend date for such spin-off. Notwithstanding the foregoing, in respect of any conversion during the valuation period, references in the preceding

paragraph with respect to 10 trading days shall be deemed to be replaced with such lesser number of trading days as have elapsed between the ex-dividend date of such spin-off and the conversion date in determining the conversion rate. If the ex-dividend date for the spin-off is less than 10 trading days prior to, and including, the end of the observation period in respect of any conversion, references in the preceding paragraph to 10 trading days will be deemed to be replaced, solely in respect of that conversion, with such lesser number of trading days as have elapsed from, and including, the ex-dividend date for the spin-off to, and including, the last trading day of such observation period. If such spin-off does not occur, the

S-39

**Table of Contents**

conversion rate shall be decreased to be the conversion rate that would then be in effect if such distribution had not been declared, effective as of the date on which our board of directors or a committee thereof determines not to consummate such spin-off.

- (4) If we pay any cash dividend or distribution to all or substantially all holders of our common stock, the applicable conversion rate will be adjusted based on the following formula:

$$CR_1 = CR_0 \times \frac{SP_0}{(SP_0 - C)}$$

where,

$CR_0$  = the applicable conversion rate in effect immediately prior to the open of business on the ex-dividend date for such dividend or distribution;

$CR_1$  = the applicable conversion rate in effect immediately after the open of business on the ex-dividend date for such dividend or distribution;

$SP_0$  = the last reported sale price of our common stock on the trading day immediately preceding the ex-dividend date for such dividend or distribution; and

$C$  = the amount in cash per share we distribute to all or substantially all holders of our common stock.

Any increase to the applicable conversion rate made under this clause (4) shall become effective immediately after the open of business on the ex-dividend date for such dividend or distribution. If such dividend or distribution is not so paid, the applicable conversion rate shall be decreased, effective as of the date our board of directors or a committee thereof determines not to make or pay such dividend or distribution, to be the applicable conversion rate that would then be in effect if such dividend or distribution had not been declared.

Notwithstanding the foregoing, if  $C$  (as defined above) is equal to or greater than  $SP_0$  (as defined above), in lieu of the foregoing increase, each holder of a note shall receive, for each \$1,000 principal amount of notes, at the same time and upon the same terms as holders of shares of our common stock, the amount of cash that such holder would have received if such holder owned a number of shares of our common stock equal to the applicable conversion rate on the ex-dividend date for such cash dividend or distribution.

- (5) If we make or any of our subsidiaries makes a payment in respect of a tender or exchange offer for our common stock, to the extent that the cash and value of any other consideration included in the payment per share of common stock exceeds the last reported sale prices of our common stock on the trading day next succeeding the last date on which tenders or exchanges may be made pursuant to such tender or exchange offer, the applicable conversion rate will be increased based on the following formula:

$$CR_1 = CR_0$$

$$\times \frac{AC + (SP_1 \times OS_1)}{(OS_0 \times SP_1)}$$

where,

$CR_0$  = the applicable conversion rate in effect immediately prior to the open of business on the trading day next succeeding the date such tender or exchange offer expires;

$CR_1$  = the applicable conversion rate in effect immediately after the open of business on the trading day next succeeding the date such tender or exchange offer expires;

S-40

**Table of Contents**

- AC = the aggregate value of all cash and any other consideration (as determined by our board of directors or a committee thereof) paid or payable for shares purchased in such tender or exchange offer;
- OS<sub>0</sub> = the number of shares of our common stock outstanding immediately prior to the consummation of the purchase of all shares accepted for purchase or exchange in such tender or exchange offer;
- OS<sub>1</sub> = the number of shares of our common stock outstanding immediately after the consummation of the purchase of all shares accepted for purchase or exchange in such tender or exchange offer; and
- SP<sub>1</sub> = the average of the last reported sale prices of our common stock over the 10 consecutive trading day period commencing on, and including, the trading day next succeeding the date such tender or exchange offer expires.

The increase to the applicable conversion rate under the preceding paragraph will be determined at the close of business on the 10th trading day immediately following, and including, the trading day next succeeding the date such tender or exchange offer expires, but will be given effect at the open of business on the trading day next succeeding the date such tender or exchange offer expires. Notwithstanding the foregoing, in respect of any conversion within the 10 trading days immediately following, and including, the trading day next succeeding the expiration date of any tender or exchange offer, references in the preceding paragraph with respect to 10 trading days shall be deemed replaced with such lesser number of trading days as have elapsed between the expiration date of such tender or exchange offer and the conversion date in determining the conversion rate. In addition, if the trading day next succeeding the expiration date is less than 10 trading days prior to, and including, the end of the observation period in respect of any conversion, references in the preceding paragraph to 10 trading days shall be deemed to be replaced, solely in respect of that conversion, with such lesser number of trading days as have elapsed from, and including, the trading day next succeeding the expiration date to, and including, the last trading day of such observation period. For the avoidance of doubt, no adjustment under this clause (5) will be made if such adjustment would result in a decrease in the applicable conversion rate.

In the event that we or one of our subsidiaries is obligated to purchase shares of common stock pursuant to any such tender offer or exchange offer, but we or such subsidiary is permanently prevented by applicable law from effecting any such purchases, or all such purchases are rescinded, then the conversion rate shall again be adjusted to be the conversion rate that would then be in effect if such tender offer or exchange offer had not been made.

Adjustments to the applicable conversion rate will be calculated to the nearest 1/10,000th of a share. We will not be required to make an adjustment in the applicable conversion rate unless the adjustment would require a change of at least 1% in the applicable conversion rate. However, we will carry forward any adjustment that is less than 1% of the applicable conversion rate, take such carried-forward adjustments into account in any subsequent adjustment, and make such carried forward adjustments, regardless of whether the aggregate adjustment is less than 1%, (a) annually on the anniversary of the first date of issue of the notes and (b) otherwise (1) upon conversion of any notes or (2) prior to any fundamental change purchase date, unless such adjustment has already been made.

If we have a rights plan in effect upon conversion of the notes into common stock, you will receive, in addition to any shares of common stock received in connection with such conversion, the rights under the rights plan. However, if, prior to any conversion, the rights have separated from the shares of common stock in accordance with the provisions of the applicable rights plan, the applicable conversion rate will be adjusted at the time of separation as if we distributed to all holders of our

---

**Table of Contents**

common stock, shares of our capital stock, evidences of indebtedness, assets, property, rights, options or warrants as described in clause (3) above, subject to readjustment in the event of the expiration, termination or redemption of such rights.

Notwithstanding the foregoing, if a conversion rate adjustment becomes effective on any ex-dividend date as described above, and a holder that has converted its notes on or after such ex-dividend date and on or prior to the related record date would be treated as the record holder of shares of our common stock as of the related conversion date as described under Settlement upon Conversion based on an adjusted conversion rate for such ex-dividend date, then, notwithstanding the foregoing conversion rate adjustment provisions, the conversion rate adjustment relating to such ex-dividend date will not be made for such converting holder. Instead, such holder will be treated as if such holder were the record owner of the shares of our common stock on an unadjusted basis and participate in the related dividend, distribution or other event giving rise to such adjustment.

As used in this section, effective date means the first date on which the shares of our common stock trade on the relevant stock exchange, regular way, reflecting the relevant share split or share combination, as applicable.

As used in this section, record date means, with respect to any dividend, distribution or other transaction or event in which the holders of our common stock (or other applicable security) have the right to receive any cash, securities or other property or in which our common stock (or such other security) is exchanged for or converted into any combination of cash, securities or other property, the date fixed for determination of holders of our common stock (or such other security) entitled to receive such cash, securities or other property (whether such date is fixed by our board of directors or a duly authorized committee thereof, statute, contract or otherwise).

Except as stated herein, we will not adjust the applicable conversion rate for the issuance of shares of our common stock or any securities convertible into or exchangeable for shares of our common stock or the right to purchase shares of our common stock or such convertible or exchangeable securities. Further, the applicable conversion rate will not be adjusted:

upon the issuance of any shares of our common stock pursuant to any present or future plan providing for the reinvestment of dividends or interest payable on our securities and the investment of additional optional amounts in shares of our common stock under any plan;

for ordinary course of business stock repurchases that are not tender offers referred to in clause (5) of the adjustments above, including structured or derivative transactions, pursuant to a stock repurchase program approved by our board of directors;

upon the issuance of any shares of our common stock or options, warrants or rights to purchase those shares pursuant to any present or future employee, director or consultant benefit plan or program of, or assumed by, us or any of our subsidiaries;

upon the issuance of any shares of our common stock pursuant to any option, warrant or right or exercisable, exchangeable or convertible security not described in the preceding bullet and outstanding as of the date the notes were first issued;

for a change in the par value of our common stock; or

for accrued and unpaid interest, if any.

We are permitted to increase the applicable conversion rate of the notes by any amount for a period of at least 20 business days if our board of directors or a committee thereof determines that such increase would be in our best interest. We may also (but are not required to) increase the applicable conversion rate to avoid or diminish income tax to holders of our common stock or rights to

S-42

---

**Table of Contents**

purchase shares of our common stock in connection with a dividend or distribution of shares (or rights to acquire shares) or similar event.

A holder may, in some circumstances, including a distribution of cash dividends to holders of our shares of common stock, be deemed to have received a distribution subject to U.S. federal income tax as a result of an adjustment or the nonoccurrence of an adjustment to the conversion rate. Any applicable withholding taxes (including backup withholding) may be withheld from interest and payments upon conversion, repurchase or maturity of the notes, or if any withholding taxes (including backup withholding) are paid on behalf of a holder, those withholding taxes may be set off against payments of cash or common stock, if any, payable on the notes to such holder. For a discussion of the U.S. federal income tax treatment of an adjustment to the conversion rate, see *Material U.S. Federal Income Tax Considerations* .

***Recapitalizations, Reclassifications and Changes of Our Common Stock***

In the case of:

any recapitalization, reclassification or change of our common stock (other than changes resulting from a subdivision or combination);

any consolidation, merger, combination, statutory or binding share exchange or similar transaction involving us; or

sale, conveyance, lease or other transfer or similar transaction to a third party of all or substantially all of the consolidated assets of ours and our subsidiaries, taken as a whole, in each case as a result of which our common stock would be converted into, or exchanged for, cash, securities or other property or assets (any such event, a share exchange event and any such cash, securities or other property or assets, reference property , and the amount of reference property that a holder of one share of our common stock immediately prior to such transaction would have been entitled to receive upon the occurrence of such transaction, a unit of reference property ), then we or the successor or purchasing company, as the case may be, will execute with the trustee, without the consent of the holders, a supplemental indenture providing that, at and after the effective time of the transaction, a holder's right to convert a note into cash and, if applicable, shares of our common stock will be changed into the right to convert a note into cash and, if applicable, units of reference property. However, at and after the effective time of the transaction:

we will continue to have the right to determine the form of consideration to be paid or delivered, as the case may be, upon conversion of the notes as set forth under *Settlement upon Conversion* ;

any amount payable in cash upon conversion of the notes as set forth under *Settlement upon Conversion* will continue to be payable in cash;

any shares of our common stock that we would have been required to deliver upon conversion of the notes as set forth under Settlement upon Conversion will instead be deliverable in the units of reference property that a holder of that number of shares of our common stock would have received in such transaction; and

the daily VWAP will be calculated based on the value of a unit of reference property; *provided, however,* that if the holders receive only cash in such transaction, then for all conversions that occur after the effective date of such transaction (i) the consideration due upon conversion of each \$1,000 principal amount of notes shall be solely cash in an amount equal to the applicable conversion rate in effect on the conversion date (as may be increased by any additional shares as described under Adjustment to Conversion Rate upon Conversion in

## **Table of Contents**

Connection with a Make Whole Fundamental Change ), multiplied by the price paid per share of common stock in such transaction and (ii) settlement will occur on the second business day immediately following the conversion date.

Such supplemental indenture will also provide for anti-dilution and other adjustments that are as nearly equivalent as possible to the adjustments set described under Conversion Rate Adjustments above. If the notes become convertible into reference property, we will notify the holders, the trustee and the conversion agent (if other than the trustee), and we will issue a press release containing the relevant information or publish the information on our website or through such other public medium as we may use at that time.

If the reference property in respect of any such transaction includes shares of stock, securities or other property or assets of a company other than us or the successor or purchasing corporation, as the case may be, in such transaction, such other company will also execute such supplemental indenture, and such supplemental indenture will contain such additional provisions to protect the interests of the holders, including the right of holders to require us to purchase their notes upon a fundamental change as described under Fundamental Change Permits Holders to Require Us to Purchase Notes below, as the board of directors (or an authorized committee thereof) reasonably considers necessary by reason of the foregoing.

For purposes of the foregoing, if the transaction causes our common stock to be converted into, or exchanged for, the right to receive more than a single type of consideration (determined based in part upon any form of stockholder election), the amount and kind of reference property into which the notes will be convertible will be deemed to be the weighted average of the types and amounts of consideration received by the holders of our common stock that affirmatively make such an election. We will notify holders, the trustee and the conversion agent (if other than the trustee) of the weighted average as soon as practicable after such determination is made.

We will agree in the supplemental indenture not to become a party to any such transaction unless its terms are consistent with the foregoing.

### ***Adjustments of Prices***

Whenever any provision of the indenture requires us to calculate the last reported sale prices, the daily VWAPs, the daily conversion values or the daily settlement amounts over a span of multiple days (including an observation period and, if applicable, the period for determining the stock price for purposes of a make whole fundamental change), our board of directors or a committee thereof will make appropriate adjustments to each to account for any adjustment to the applicable conversion rate that becomes effective, or any event requiring an adjustment to the applicable conversion rate where the ex-dividend date, effective date or expiration date, as the case may be, of the event occurs, at any time during the period when the last reported sale prices, the daily VWAPs, the daily conversion values or the daily settlement amounts are to be calculated.

### ***Adjustment to Conversion Rate upon Conversion in Connection with a Make Whole Fundamental Change***

If the effective date (as defined below) of a make whole fundamental change (as defined below) occurs prior to the maturity date of the notes and a holder elects to convert its notes in connection with such make whole fundamental change, we will, under certain circumstances, increase the applicable conversion rate for the notes so surrendered for conversion by a number of additional shares of common stock (the additional shares ), as described below.

A make whole fundamental change means any transaction or event that constitutes a fundamental change defined below in clause (1), (2) or (4) under the definition of fundamental change

S-44

**Table of Contents**

in Fundamental Change Permits Holders to Require Us to Purchase Notes , after giving effect to any exceptions or exclusions from such definition but without regard to the proviso in clause (2) of the definition thereof.

A conversion of notes will be deemed for these purposes to be in connection with such make whole fundamental change if the notice of conversion (or, in the case of a global note, the relevant notice of conversion in accordance with DTC's applicable procedures) is received by the conversion agent from, and including, the effective date of the make whole fundamental change up to the close of business on the business day immediately preceding the related fundamental change purchase date (or, in the case of a make whole fundamental change that would have been a fundamental change but for subclause (a) of the proviso in clause (2) of the definition thereof, the 35th trading day immediately following the effective date of such make whole fundamental change).

If the consideration for our common stock in any make whole fundamental change described in clause (2) of the definition of fundamental change is composed entirely of cash, for any conversion of notes following the effective date of such make whole fundamental change, the conversion obligation will be calculated based solely on the stock price (as defined below) for the transaction and will be deemed to be an amount of cash per \$1,000 principal amount of converted notes equal to the applicable conversion rate (including any adjustment as described in this section), multiplied by such stock price. In such event, the conversion obligation will be determined and paid to holders in cash on the second business day following the conversion date.

We will notify holders, the trustee and the conversion agent (if other than the trustee) of the effective date of any make whole fundamental change and issue a press release announcing such effective date or publish the information on our website or through such other public medium as we may use at that time no later than five business days after such effective date.

The number of additional shares, if any, by which the applicable conversion rate will be increased will be determined by reference to the applicable table below, based on the date on which the make whole fundamental change occurs or becomes effective (the effective date ) and the price (the stock price ) paid (or deemed to be paid) per share of our common stock in the make whole fundamental change. If the holders of our common stock receive in exchange for their common stock only cash in a make whole fundamental change described in clause (2) of the definition of fundamental change, the stock price shall be the cash amount paid per share. Otherwise, the stock price shall be the average of the last reported sale prices of our common stock over the five trading day period ending on, and including, the trading day immediately preceding the effective date of the make whole fundamental change.

The stock prices set forth in the column headings of the tables below will be adjusted as of any date on which the applicable conversion rate is otherwise adjusted. The adjusted stock prices will equal the stock prices immediately prior to such adjustment, multiplied by a fraction, the numerator of which is the applicable conversion rate immediately prior to the adjustment giving rise to the stock price adjustment and the denominator of which is the applicable conversion rate as so adjusted. The number of additional shares will be adjusted in the same manner and at the same time as the applicable conversion rate as set forth under Conversion Rate Adjustments .

**Table of Contents**

The following table sets forth the number of additional shares to be added to the conversion rate per \$1,000 principal amount of notes in connection with a make whole fundamental change:

Effective Date	Stock Price											
	\$243.00	\$260.00	\$280.00	\$309.83	\$350.00	\$400.00	\$500.00	\$750.00	\$1,000.00	\$1,500.00	\$2,000.00	\$2,500.00
May 7, 2019	0.8876	0.7790	0.6738	0.5508	0.4306	0.3279	0.2080	0.0926	0.0520	0.0199	0.0066	0.0000
May 15, 2020	0.8876	0.7738	0.6591	0.5270	0.4006	0.2958	0.1790	0.0759	0.0425	0.0165	0.0055	0.0000
May 15, 2021	0.8876	0.7565	0.6306	0.4883	0.3560	0.2509	0.1418	0.0570	0.0322	0.0129	0.0043	0.0000
May 15, 2022	0.8876	0.7248	0.5836	0.4284	0.2909	0.1894	0.0961	0.0371	0.0217	0.0090	0.0030	0.0000
May 15, 2023	0.8876	0.6708	0.5034	0.3284	0.1893	0.1032	0.0438	0.0179	0.0111	0.0047	0.0016	0.0000
May 15, 2024	0.8876	0.6185	0.3438	0.0000	0.0000	0.0000	0.0000	0.0000	0.0000	0.0000	0.0000	0.0000

The exact stock price and effective date may not be set forth in the tables above, in which case:

if the stock price is between two stock prices in the applicable table or the effective date is between two effective dates in the applicable table, the number of additional shares will be determined by a straight-line interpolation between the number of additional shares set forth for the higher and lower stock prices and the earlier and later effective dates based on a 365-day year, as applicable;

if the stock price is greater than \$2,500.00 per share, (subject to adjustment in the same manner as the stock prices set forth in the column headings of the tables above), no additional shares will be added to the applicable conversion rate; and

if the stock price is less than \$243.00 per share (subject to adjustment in the same manner as the stock prices set forth in the column headings of the tables above), no additional shares will be added to the applicable conversion rate.

Notwithstanding the foregoing, in no event will the conversion rate per \$1,000 principal amount of notes exceed 4.1152 shares of common stock, subject to adjustment in the same manner as the applicable conversion rate as set forth under **Conversion Rate Adjustments**.

Our obligation to increase the applicable conversion rate could be considered a penalty, in which case the enforceability thereof would be subject to general principles of reasonableness and equitable remedies.

### **Fundamental Change Permits Holders to Require Us to Purchase Notes**

If a fundamental change (as defined below in this section) occurs at any time, holders will have the right, at their option, to require us to purchase for cash all of their notes, or any portion of the principal thereof that is equal to \$1,000 or an integral multiple of \$1,000 on the fundamental change purchase date, which will be a date specified by us that is not less than 20 or more than 35 business days following the date of our fundamental change notice as described below or, if we fail to specify a fundamental change purchase date, the 35th business day following the date of our fundamental change notice (without prejudice to any rights or remedies holders may have on account of such failure).

The fundamental change purchase price we are required to pay will be equal to 100% of the principal amount of the notes to be purchased, plus accrued and unpaid interest to, but not including, the fundamental change purchase date (unless the fundamental change purchase date falls after a regular record date but on or prior to the interest payment date to which such regular record date relates, in which case we will instead pay the full amount of accrued and unpaid interest to the holder of record on such regular record date, and the fundamental change purchase price will be equal to 100% of the principal amount of the notes to be purchased).

S-46

**Table of Contents**

A fundamental change will be deemed to have occurred at the time after the notes are originally issued if any of the following occurs:

- (1) a person or group within the meaning of Section 13(d) of the Exchange Act, other than us, our wholly owned subsidiaries or our or their employee benefit plans, files a Schedule TO or any schedule, form or report under the Exchange Act disclosing that such person or group has become the direct or indirect beneficial owner, as defined in Rule 13d-3 under the Exchange Act, of our common equity representing more than 50% of the voting power of our common equity;
- (2) the consummation of (A) except as set forth in clause (B) below, any recapitalization, reclassification or change of our common stock (other than changes resulting from a subdivision or combination) as a result of which our common stock would be converted into, or exchanged for, cash, securities or other property or assets; (B) any consolidation, merger, combination, statutory or binding share exchange or similar transaction involving us pursuant to which our common stock will be converted into cash, securities or other property or assets; or (C) any sale, conveyance, lease or other transfer or similar transaction in one transaction or a series of related transactions of all or substantially all of the consolidated assets of ours and our subsidiaries, taken as a whole, to any person other than one or more of our subsidiaries; *provided, however*, that neither (a) a transaction described in clause (A) or (B) in which the holders of all classes of our common equity immediately prior to such transaction own, directly or indirectly, more than 50% of all classes of common equity of the continuing or surviving corporation or transferee or the parent thereof immediately after such transaction in substantially the same proportions as such ownership immediately prior to such transaction nor (b) any merger of us solely for the purpose of changing our jurisdiction of incorporation that results in a reclassification, conversion or exchange of outstanding shares of common stock solely into shares of common stock of the surviving entity shall be a fundamental change pursuant to this clause (2);
- (3) our stockholders approve any plan or proposal for the liquidation or dissolution of us; or
- (4) our common stock (or other common stock underlying the notes) ceases to be listed or quoted on any of the NASDAQ Global Select Market, NASDAQ Global Market or New York Stock Exchange (or any of their respective successors).

A transaction or transactions described in clause (1) or clause (2) above will not constitute a fundamental change, however, if at least 90% of the consideration received or to be received by our common stockholders (excluding cash payments for fractional shares or pursuant to statutory appraisal rights) in connection with such transaction or transactions consists of shares of common stock or depositary receipts representing common equity interests, in each case, that are listed or quoted on any of the NASDAQ Global Select Market, NASDAQ Global Market or New York Stock Exchange (or any of their respective successors) or will be so listed or quoted when issued or exchanged in connection with such transaction or transactions (these securities being referred to as publicly traded securities) and, as a result of such transaction or transactions, the notes become convertible into such public traded securities, excluding cash payments for fractional shares or pursuant to statutory appraisal rights (subject to the provisions set forth above under Conversion Rights Settlement upon Conversion). For purposes of the definition of a fundamental change, any transaction or event that constitutes a fundamental change under both clause (1) and clause (2) without giving effect to the proviso in clause (2) above will be deemed to be solely a fundamental change under clause (2) of

such definition (subject to the proviso to clause (2)).

S-47

**Table of Contents**

On or before the 20th business day after the occurrence of a fundamental change, we will provide to all holders of the notes and the trustee and paying agent a notice of the occurrence of the fundamental change and of the resulting purchase right. Such notice shall state, among other things:

the events causing the fundamental change;

the effective date of the fundamental change;

the last date on which a holder may exercise the purchase right;

the fundamental change purchase price;

the fundamental change purchase date;

the name and address of the paying agent and the conversion agent, if applicable;

the applicable conversion rate and any adjustments to the applicable conversion rate;

that the notes with respect to which a fundamental change purchase notice has been delivered by a holder may be converted only if the holder withdraws the fundamental change purchase notice in accordance with the terms of the indenture; and

the procedures that holders must follow to require us to purchase their notes.

Simultaneously with providing such notice, we will issue a press release or publish the information on our website or through such other public medium as we may use at that time.

Notwithstanding the foregoing, we will not be required to repurchase, or to make an offer to repurchase, the notes upon a fundamental change if a third party makes such an offer in the same manner, at the same time and otherwise in compliance with the requirements for an offer made by us as set forth above and such third party purchases all notes properly surrendered and not validly withdrawn under its offer in the same manner, at the same time and otherwise in compliance with the requirements for an offer made by us as set forth above.

To exercise the fundamental change purchase right, you must deliver, on or before the close of business on the business day immediately preceding the fundamental change purchase date, the notes to be purchased, duly endorsed for transfer, together with a written purchase notice, to the paying agent. Each purchase notice must state:

if certificated, the certificate numbers of your notes to be delivered for purchase;

the portion of the principal amount of notes to be purchased, which must be \$1,000 or an integral multiple thereof; and

that the notes are to be purchased by us pursuant to the applicable provisions of the notes and the indenture. If the notes are not in certificated form, the purchase notice given by each holder must comply with applicable DTC procedures.

Holders may withdraw any purchase notice (in whole or in part) by a written notice of withdrawal delivered to the paying agent prior to the close of business on the business day immediately preceding the fundamental change purchase date. The notice of withdrawal shall state:

the principal amount of the withdrawn notes, which must be \$1,000 aggregate principal amount or an integral multiple thereof;

if certificated notes have been issued, the certificate numbers of the withdrawn notes; and

**Table of Contents**

the principal amount, if any, which remains subject to the purchase notice, which must be \$1,000 aggregate principal amount or an integral multiple thereof.

If the notes are not in certificated form, the withdrawal notice given by each holder must comply with applicable DTC procedures.

We will be required to purchase the notes on the fundamental change purchase date. Holders who have exercised the purchase right will receive payment of the fundamental change purchase price on the later of:

the fundamental change purchase date; and

the time of book-entry transfer or the delivery of the notes.

If the paying agent holds money sufficient to pay the fundamental change purchase price of the notes on the fundamental change purchase date, then, with respect to the notes that have been properly surrendered for purchase and not validly withdrawn:

the notes will cease to be outstanding and interest will cease to accrue (whether or not book-entry transfer of the notes is made or whether or not the notes are delivered to the paying agent); and

all other rights of the holder will terminate (other than (x) the right to receive the fundamental change purchase price and (y) if the fundamental change purchase date falls after a regular record date but on or prior to the related interest payment date, the right of the holder of record on such regular record date to receive the related interest payment).

In connection with any purchase offer pursuant to a fundamental change purchase notice, we will, if required:

comply with the provisions of the tender offer rules under the Exchange Act that may then be applicable;

file a Schedule TO or any other required schedule under the Exchange Act; and

otherwise comply with all federal and state securities laws in connection with any offer by us to purchase the notes;

in each case, so as to permit the rights and obligations under this Fundamental Change Permits Holders to Require Us to Purchase Notes to be exercised in the time and in the manner specified in the indenture.

No notes may be purchased by us at the option of the holders upon a fundamental change if the principal amount of the notes has been accelerated (other than in connection with a default in the payment of the fundamental change purchase price), and such acceleration has not been rescinded, on or prior to such date.

The purchase rights of the holders could discourage a potential acquirer of us. The fundamental change purchase feature, however, is not the result of management's knowledge of any specific effort to obtain control of us by any means or part of a plan by management to adopt a series of anti-takeover provisions.

The term fundamental change is limited to specified transactions and may not include other events that might adversely affect our financial condition. In addition, the requirement that we offer to purchase the notes upon a fundamental change may not protect holders in the event of a highly leveraged transaction, reorganization, merger or similar transaction involving us.

---

## **Table of Contents**

The definition of fundamental change includes a phrase relating to the sale, conveyance, lease or other transfer of all or substantially all of the consolidated assets of ours and our subsidiaries, taken as a whole. There is no precise, established definition of the phrase substantially all under applicable law. Accordingly, the ability of a holder of the notes to require us to purchase its notes as a result of the sale, conveyance, lease or other transfer of less than all of the consolidated assets of ours and our subsidiaries, taken as a whole, may be uncertain.

If a fundamental change were to occur, we may not have enough funds to pay the fundamental change purchase price. Our ability to purchase the notes for cash may be limited by restrictions on our ability to obtain funds for such purchase through dividends from our subsidiaries, the terms of our then existing borrowing arrangements or otherwise. See Risk Factors Risks Related to the Ownership of Our Notes We may not have the ability to raise the funds necessary to settle conversions of the notes or to purchase the notes upon a fundamental change. If we fail to purchase the notes when required following a fundamental change, we will be in default under the indenture. In addition, the indentures governing our Existing Notes, the Credit Agreement, the indentures governing the SolarCity Convertible Notes and the Subsidiary Credit Facilities include, and other indebtedness that we may incur in the future may include, similar change in control provisions permitting our holders to accelerate or to require us to purchase our indebtedness upon the occurrence of similar events or on some specific dates.

### **Exchange in Lieu of Conversion**

When a holder surrenders its notes for conversion, we may, at our election (an exchange election), direct the conversion agent to surrender, on or prior to the second business day following the conversion date, such notes to a financial institution designated by us for exchange in lieu of conversion. In order to accept any notes surrendered for conversion, the designated institution must agree to timely deliver, in exchange for such notes, cash, shares of our common stock or any combination thereof that would otherwise be due upon conversion as described above under

Conversion Rights Settlement upon Conversion (the conversion consideration). If we make an exchange election, we will, by the close of business on the second business day following the relevant conversion date, notify the holder surrendering its notes for conversion that we have made the exchange election and we will notify the designated financial institution of the relevant deadline for delivery of the conversion consideration.

Any notes exchanged by the designated institution will remain outstanding. If the designated institution agrees to accept any notes for exchange but does not timely deliver the related conversion consideration, or if such designated financial institution does not accept the notes for exchange, we will deliver the relevant conversion consideration as if we had not made an exchange election.

Our designation of a financial institution to which the notes may be submitted for exchange does not require such institution to accept any notes.

### **Consolidation, Merger and Sale of Assets**

The indenture provides that we may not consolidate with or merge with or into, or convey, transfer or lease all or substantially all of our properties and assets to, any person, which we refer to as a successor person, unless:

we are the surviving corporation or the successor person (if other than us) is a corporation organized and validly existing under the laws of any U.S. domestic jurisdiction and expressly assumes our obligations under the notes and the indenture;

## **Table of Contents**

immediately after giving effect to the transaction, no event of default, and no event which, after notice or lapse of time, or both, would become an event of default, shall have occurred and be continuing under the indenture; and

certain other conditions specified in the indenture are met.

For the avoidance of doubt, notwithstanding the foregoing, the sale, conveyance or transfer of intellectual property and similar or related assets and our equity ownership interests in foreign subsidiaries to one or more of our subsidiaries, in each case, in connection with our global tax optimization strategies in conjunction with business operations will not be considered all or substantially all of our properties and assets .

Upon any such consolidation, merger, conveyance, transfer or lease in which there is a successor person, such successor person shall succeed to, and may exercise every right and power of, ours under the indenture, and we shall be discharged from our obligations under the notes and the indenture except in the case of any such lease.

Although these types of transactions are permitted under the indenture, certain of the foregoing transactions could constitute a fundamental change permitting each holder to require us to purchase the notes of such holder as described above.

### **Events of Default**

Each of the following is an event of default with respect to the notes:

- (1) default in any payment of interest on any note when due and payable and the default continues for a period of 30 days;
- (2) default in the payment of principal of any note when due and payable at its stated maturity, upon any required purchase, upon declaration of acceleration or otherwise;
- (3) our failure to comply with our obligation to convert the notes in accordance with the indenture upon exercise of a holder's conversion right for a period of five business days;
- (4) our failure to comply with our obligations under Consolidation, Merger and Sale of Assets ;
- (5) our failure to give a fundamental change notice as described under Fundamental Change Permits Holders to Require Us to Purchase Notes with respect to the notes when due;
- (6) our failure for 60 days after written notice from the trustee or the holders of at least 25% in principal amount of the notes then outstanding has been received to comply with any of our other agreements contained in the notes or the indenture;

- (7) default by us or any of our significant subsidiaries with respect to any mortgage, agreement or other instrument under which there may be outstanding, or by which there may be secured or evidenced, any indebtedness for money borrowed in excess of \$500 million (or its foreign currency equivalent) in the aggregate of us and/or any such subsidiary, whether such indebtedness now exists or shall hereafter be created, constituting a failure to pay the principal of any such debt when due and payable at its stated maturity, upon required purchase, upon declaration of acceleration or otherwise, unless such principal is paid (or the indebtedness with respect thereto is discharged) or such payment of such principal is waived or is otherwise no longer due and payable or such acceleration is rescinded or annulled, prior to a date that is 30 days after written notice from the trustee or the holders of at least 25% in principal amount of the notes (*provided, however*, that if such principal is

S-51

**Table of Contents**

paid (or the indebtedness with respect thereto is discharged) or such payment of such principal is waived or is otherwise no longer due and payable or such acceleration is rescinded or annulled, then the event of default by reason of the failure to pay such principal when due shall be deemed not to have occurred); and

- (8) certain events of bankruptcy, insolvency, or reorganization of us, any of our significant subsidiaries (as defined below).

A significant subsidiary is a subsidiary that is a significant subsidiary as defined in Article 1, Rule 1-02 of Regulation S-X promulgated by the SEC, *provided* that in the case of a subsidiary that meets the criteria of clause (3) thereof but not clause (1) or (2) thereof, such subsidiary shall not be a significant subsidiary unless such subsidiary's income from continuing operations before income taxes, extra items and cumulative effect of changes in accounting principles exclusive of amounts attributable to any non-controlling interests for the last completed fiscal year prior to the date of such determination exceeds \$150 million.

If an event of default occurs and is continuing with respect to the notes (other than an event of default described in clause (8) above with respect to us (and not with respect to a significant subsidiary)), the trustee by notice to us, or the holders of at least 25% in principal amount of the outstanding notes, by notice to us and the trustee may declare 100% of the principal of and accrued and unpaid interest on all the notes to be due and payable; upon such a declaration, such principal and any accrued and unpaid interest will be due and payable immediately. Upon an event of default described in clause (8) above with respect to us (and not with respect to a significant subsidiary), 100% of the aggregate principal amount and accrued and unpaid interest will automatically be due and payable immediately.

Notwithstanding the foregoing, the indenture will provide that, to the extent we elect, the sole remedy for an event of default relating to (i) our failure to file with the trustee pursuant to Section 314(a)(1) of the Trust Indenture Act any documents or reports that we are required to file with the SEC pursuant to Section 13 or 15(d) of the Exchange Act or (ii) our failure to comply with our obligations as set forth under Reports below, will after the occurrence of such an event of default consist exclusively of the right to receive additional interest on the notes at a rate equal to (x) 0.25% per annum of the principal amount of the notes outstanding for the first 180 days of the 360-day period on which such event of default is continuing beginning on, and including, the date on which such an event of default first occurs and (y) 0.50% per annum of the principal amount of the notes outstanding for the last 180 days of such 360-day period as long as such event of default is continuing. If we so elect, such additional interest will be payable in the same manner and on the same dates as the stated interest payable on the notes. If the event of default relating to the reporting obligations is not cured or waived prior to such 361st day, on the 361st day after such event of default such additional interest will cease to accrue and the notes will be subject to acceleration as provided above. The provisions of the indenture described in this paragraph will not affect the rights of holders of notes in the event of the occurrence of any other event of default. In the event we do not elect to pay the additional interest following an event of default in accordance with this paragraph or we elected to make such payment but do not pay the additional interest when due, the notes will be immediately subject to acceleration as provided above.

In order to elect to pay the additional interest as the sole remedy during the first 360 days after the occurrence of an event of default relating to the failure to comply with the reporting obligations in accordance with the immediately preceding paragraph, we must notify all holders of notes, the trustee and the paying agent of such election on or before the close of business on the date on which such event of default first occurs. Upon our failure to timely give such notice, the notes will be immediately subject to acceleration as provided above.

---

**Table of Contents**

If any portion of the amount payable on the notes upon acceleration is considered by a court to be unearned interest (through the allocation of the value of the instrument to the embedded warrant or otherwise), the court could disallow recovery of any such portion.

The holders of a majority in principal amount of the outstanding notes may waive all past defaults (except with respect to nonpayment of principal or interest, the failure to deliver the consideration due upon conversion or any other provision that requires the consent of each affected holder to amend) and rescind any such acceleration and its consequences if (i) rescission would not conflict with any judgment or decree of a court of competent jurisdiction and (ii) all existing events of default, other than the nonpayment of the principal of and interest on the notes that have become due solely by such declaration of acceleration, have been cured or waived.

Each holder shall have the right to receive payment or delivery, as the case may be, of:

the principal (including the fundamental change purchase price, if applicable) of;

accrued and unpaid interest, if any, on; and

the consideration due upon conversion of, its notes, on or after the respective due dates expressed or provided for in the indenture, or to institute suit for the enforcement of any such payment or delivery, as the case may be, and such right to receive such payment or delivery, as the case may be, on or after such respective dates shall not be impaired or affected without the consent of such holder.

Subject to the provisions of the indenture relating to the duties of the trustee, if an event of default occurs and is continuing, the trustee will be under no obligation to exercise any of the rights or powers under the indenture at the request or direction of any of the holders of the notes unless such holders have offered to the trustee indemnity or security satisfactory to it against any loss, liability or expense. Except to enforce the right to receive payment of principal or interest when due, or the right to receive payment or delivery of the consideration due upon conversion, no holder may pursue any remedy with respect to the indenture or the notes unless:

- (1) such holder has previously given the trustee notice that an event of default is continuing;
- (2) holders of at least 25% in principal amount of the outstanding notes have requested the trustee to pursue the remedy;
- (3) such holders have offered the trustee security or indemnity reasonably satisfactory to it against any loss, liability or expense;
- (4)

the trustee has not complied with such request within 60 days after the receipt of the request and the offer of security or indemnity; and

- (5) the holders of a majority in principal amount of the outstanding notes have not given the trustee a direction that, in the opinion of the trustee, is inconsistent with such request within such 60-day period.

Subject to certain restrictions, the holders of a majority in principal amount of the outstanding notes are given the right to direct the time, method and place of conducting any proceeding for any remedy available to the trustee or of exercising any trust or power conferred on the trustee.

We are required to deliver to the trustee, within 30 days after the occurrence thereof, written notice of any events which would constitute defaults, their status and what action we are taking or proposing to take in respect thereof; *provided* that no notice shall be required to the extent that the event that would constitute a default has been cured or waived. The indenture provides that in the

## **Table of Contents**

event an event of default has occurred and is continuing, the trustee will be required in the exercise of its powers to use the degree of care that a prudent person would use in the conduct of its own affairs. The trustee, however, may refuse to follow any direction that conflicts with law or the indenture or that the trustee determines is unduly prejudicial to the rights of any other holder of notes or that would involve the trustee in personal liability. Prior to taking any action under the indenture at our instruction, the trustee will be entitled to indemnification satisfactory to it against all losses and expenses caused by taking or not taking such action.

The indenture provides that if a default occurs and is continuing and is known to the trustee, the trustee must send to each holder of notes notice of the default within 90 days after it occurs. Except in the case of a default in the payment of principal of or interest on any note or a default in the payment or delivery of the consideration due upon conversion, the trustee may withhold notice if and so long as the trustee in good faith determines that withholding notice is in the interests of the holders of the notes. In addition, we are also required to deliver to the trustee, within 120 days after the end of each fiscal year, a certificate indicating whether the signers thereof know of any default that occurred during the previous year.

### **Modification and Amendment**

We and the trustee may amend or supplement the indenture and the notes with the consent of the holders of a majority in aggregate principal amount of the outstanding notes. In addition, the holders of a majority in aggregate principal amount of the outstanding notes may waive our compliance in any instance with any provision of the indenture without notice to the other holders of notes. However, no amendment, supplement or waiver may be made without the consent of each holder of outstanding notes affected thereby if such amendment, supplement or waiver would:

change the stated maturity of the principal of or any interest on the notes;

reduce the principal amount of or interest on the notes;

reduce the fundamental change purchase price of any note or amend or modify the provisions with respect to the purchase rights of the holders as described above under Fundamental Change Permits Holders to Require Us to Purchase Notes in a manner adverse to holders of notes;

reduce the amount of principal payable upon acceleration of the maturity of the notes;

change the currency of payment of principal of (including the fundamental change purchase price) or interest on the notes, or change any note's place of payment;

impair the right of any holder to receive payment of principal of and interest on such holder's notes, or consideration due upon conversion, on or after the due dates therefor or to institute suit for the enforcement of any payment on, or with respect to, the notes or the consideration due upon conversion;

change the ranking of the notes;

impair or adversely affect the right of holders to convert notes or otherwise modify the provisions with respect to conversion, or reduce the conversion rate, subject to such modifications as are required under the indenture;  
or

modify provisions with respect to modification, amendment or waiver (including waiver of events of default), except to increase the percentage required for modification, amendment or waiver or to provide for consent of each affected holder of notes.

S-54

**Table of Contents**

We and the trustee may amend or supplement the indenture or the notes without notice to, or the consent of, the holders of the notes:

to cure any ambiguity, omission, defect or inconsistency in the indenture or in the notes in a manner that does not adversely affect holders of the notes;

to provide for the assumption by a successor corporation of our obligations under the indenture and the notes, in accordance with the provisions of the indenture described above under Consolidation, Merger and Sale of Assets ;

to make provisions with respect to conversion rights of the holders of the notes as described under Conversion Rights Recapitalizations, Reclassifications and Changes of Our Common Stock in accordance with the applicable provisions of the indenture;

to appoint a successor trustee with respect to the notes;

to add guarantees with respect to the notes;

to secure the notes;

to add to our covenants for the benefit of the holders of the notes or surrender any right or power conferred upon us;

to make any change that does not adversely affect the rights of any holder of the notes;

to comply with any requirement of the SEC in connection with the qualification of the indenture under the Trust Indenture Act; or

to conform the provisions of the indenture or the notes to any provision of the Description of Notes section in the preliminary prospectus supplement, as supplemented by the related pricing term sheet.

Holders do not need to approve the particular form of any proposed amendment. It will be sufficient if such holders approve the substance of the proposed amendment. After an amendment under the indenture becomes effective, we are required to send to the holders of the notes a notice briefly describing such amendment. However, the failure to give such notice to all the holders, or any defect in the notice, will not impair or affect the validity of the amendment.

**Discharge**

We may satisfy and discharge our obligations under the indenture by delivering to the registrar for cancellation all outstanding notes, or by depositing with the trustee or delivering to the holders of the notes, as applicable, after all of the notes have become due and payable, whether at maturity or at any fundamental change purchase date, and/or have been converted (and the related conversion settlement amounts have been determined), cash or cash and, if applicable, shares of common stock (solely to satisfy conversions), as applicable, sufficient to pay all of the outstanding notes and/or satisfy all conversions, as the case may be, and pay all other sums payable under the indenture by us. Such discharge is subject to terms contained in the indenture.

### **Calculations in Respect of Notes**

Except as otherwise provided above, we will be responsible for making all calculations called for under the notes. These calculations include, but are not limited to, determinations of the last reported sale prices of our common stock, daily VWAPs, daily conversion values, daily settlement amounts, accrued interest payable on the notes, additional interest, if any, payable on the notes and the conversion rate of the notes. We will make all these calculations in good faith and, absent manifest

S-55

## **Table of Contents**

error, our calculations will be final and binding on holders of notes. We will provide a schedule of our calculations to each of the trustee and the conversion agent, and each of the trustee and the conversion agent is entitled to rely conclusively upon the accuracy of our calculations without independent verification. The trustee will forward our calculations to any holder of notes upon the request of that holder.

## **Reports**

The indenture provides that any documents or reports that we are required to file with the SEC pursuant to Section 13 or 15(d) of the Exchange Act (excluding any such information, documents or reports, or portions thereof, subject to confidential treatment and any correspondence with the SEC) must be filed by us with the trustee within 15 days after the same are required to be filed with the SEC (giving effect to any grace period provided by Rule 12b-25 or any successor rule under the Exchange Act). Documents filed by us with the SEC via the EDGAR system (or any successor thereto) will be deemed to be filed with the trustee as of the time such documents are filed via EDGAR (though the trustee shall have no obligation to determine whether such documents have been filed via EDGAR).

## **Trustee**

U.S. Bank National Association is the trustee, registrar, paying agent and conversion agent. U.S. Bank National Association, in each of its capacities, including without limitation as trustee, registrar, paying agent and conversion agent, assumes no responsibility for the accuracy or completeness of the information concerning us or our affiliates or any party other than itself contained in this document or the related documents or for any failure by us or any other such party to disclose events that may have occurred and may affect the significance or accuracy of such information.

We maintain banking relationships in the ordinary course of business with the trustee and its affiliates.

## **Governing Law**

The indenture provides that it and the notes will be governed by, and construed in accordance with, the laws of the State of New York.

## **Book Entry, Settlement and Clearance**

### ***The Global Notes***

The notes will be initially issued in the form of one or more registered notes in global form, without interest coupons (the *global notes*). Upon issuance, each of the global notes will be deposited with the trustee as custodian for DTC and registered in the name of Cede & Co., as nominee of DTC.

Ownership of beneficial interests in a global note will be limited to persons who have accounts with DTC ( *DTC participants* ) or persons who hold interests through DTC participants. We expect that under procedures established by DTC:

upon deposit of a global note with DTC's custodian, DTC will credit portions of the principal amount of the global note to the accounts of the DTC participants designated by the underwriters; and

**Table of Contents**

ownership of beneficial interests in a global note will be shown on, and transfer of ownership of those interests will be effected only through, records maintained by DTC (with respect to interests of DTC participants) and the records of DTC participants (with respect to other owners of beneficial interests in the global note).

Beneficial interests in global notes may not be exchanged for notes in physical, certificated form except in the limited circumstances described below.

***Book Entry Procedures for the Global Notes***

All interests in the global notes will be subject to the operations and procedures of DTC. We provide the following summary of those operations and procedures solely for the convenience of investors. The operations and procedures of DTC are controlled by that settlement system and may be changed at any time. Neither we nor the underwriters are responsible for those operations or procedures.

DTC has advised us that it is:

a limited purpose trust company organized under the laws of the State of New York;

a banking organization within the meaning of the New York State Banking Law;

a member of the Federal Reserve System;

a clearing corporation within the meaning of the Uniform Commercial Code; and

a clearing agency registered under Section 17A of the Exchange Act.

DTC was created to hold securities for its participants and to facilitate the clearance and settlement of securities transactions between its participants through electronic book-entry changes to the accounts of its participants. DTC's participants include securities brokers and dealers, including the underwriters; banks and trust companies; and clearing corporations and other organizations. Indirect access to DTC's system is also available to others such as banks, brokers, dealers and trust companies; these indirect participants clear through or maintain a custodial relationship with a DTC participant, either directly or indirectly. Investors who are not DTC participants may beneficially own securities held by or on behalf of DTC only through DTC participants or indirect participants in DTC.

So long as DTC's nominee is the registered owner of a global note, that nominee will be considered the sole owner or holder of the notes represented by that global note for all purposes under the indenture. Except as provided below, owners of beneficial interests in a global note:

will not be entitled to have notes represented by the global note registered in their names;

will not receive or be entitled to receive physical, certificated notes; and

will not be considered the owners or holders of the notes under the indenture for any purpose, including with respect to notices or the giving of any direction, instruction or approval to the trustee under the indenture. As a result, each investor who owns a beneficial interest in a global note must rely on the procedures of DTC to exercise any rights of a holder of notes under the indenture (and, if the investor is not a participant or an indirect participant in DTC, on the procedures of the DTC participant through which the investor owns its interest).

Payments of principal and interest with respect to the notes represented by a global note will be made by the trustee to DTC's nominee as the registered holder of the global note. Neither we nor the

S-57

**Table of Contents**

trustee (including in its capacity as paying agent) will have any responsibility or liability for the payment of amounts to owners of beneficial interests in a global note, for any aspect of the records relating to or payments made on account of those interests by DTC, or for maintaining, supervising or reviewing any records of DTC relating to those interests.

Payments by participants and indirect participants in DTC to the owners of beneficial interests in a global note will be governed by standing instructions and customary industry practice and will be the responsibility of those participants or indirect participants and DTC.

Transfers between participants in DTC will be effected under DTC's procedures and will be settled in same day funds.

***Certificated Notes***

Notes in physical, certificated form will be issued and delivered (a) to each person that DTC identifies as a beneficial owner of the related notes only if: (i) DTC notifies us at any time that it is unwilling or unable to continue as depository for the global notes and a successor depository is not appointed within 90 days; or (ii) DTC ceases to be registered as a clearing agency under the Exchange Act and a successor depository is not appointed within 90 days; or (b) if an event of default with respect to the notes has occurred and is continuing and any beneficial owner requests that its beneficial interest in the notes be exchanged for notes in physical, certificated form, to such beneficial owner in an amount corresponding to such beneficial interest.

**Table of Contents**

**DESCRIPTION OF CONVERTIBLE NOTE HEDGE AND WARRANT TRANSACTIONS**

In connection with the pricing of the notes, we entered into convertible note hedge transactions with one or more of the underwriters or their respective affiliates or other financial institutions (the hedge counterparties ). The convertible note hedge transactions will cover, subject to anti-dilution adjustments substantially similar to those applicable to the notes, the number of shares of our common stock that are initially underlying the notes. Concurrently with entering into the convertible note hedge transactions, we also entered into warrant transactions with the hedge counterparties relating to the same number of shares of our common stock, with a strike price of \$607.50, subject to customary anti-dilution adjustments.

We intend to use approximately \$262.1 million of the net proceeds from this offering and our concurrent common stock offering to pay the cost of the convertible note hedge transactions (after such cost is partially offset by the proceeds to us from the warrant transactions). If the underwriters exercise their option to purchase additional notes, we may sell additional warrants and use a portion of the proceeds from the sale of the additional notes, together with the proceeds from the sale of the additional warrants, to enter into additional convertible note hedge transactions.

The convertible note hedge transactions are expected generally to reduce the potential dilution and/or offset potential cash payments in excess of the principal amount upon conversion of the notes in the event that the market price per share of our common stock, as measured under the terms of the convertible note hedge transactions for th
