^{*}Fully or partially on loan.

^{**}See Note 3 in Notes for additional information on securities lending collateral and non-cash collateral.

[@]Illiquid security. At Feb. 28, 2015, the aggregate value of illiquid securities was \$483,000, which represents 0.48% of the Fund s net assets.

(Unaudited)

The Fund may invest in floating rate loans. In connection with these investments, the Fund may also enter into unfunded corporate loan commitments (commitments). Commitments may obligate the Fund to furnish temporary financing to a borrower until permanent financing can be arranged. In connection with these commitments, the Fund earns a commitment fee, typically set as a percentage of the commitment amount. The following unfunded loan commitments were outstanding at Feb. 28, 2015:

Unfunded Commitments

				Unrealized Appreciation
	Unfunde	d		
Borrower	Amount	t Cost	Value	(Depreciation)
Rite Aid Bridge Loan	\$200,00	0 \$200,000	\$201,000	\$1,000

Notes

Delaware Investments[®] Dividend and Income Fund, Inc. February 28, 2015 (Unaudited)

1. Significant Accounting Policies

The following accounting policies are in accordance with U.S. generally accepted accounting principles (U.S. GAAP) and are consistently followed by Delaware Investments[®] Dividend and Income Fund, Inc. (Fund). This report covers the period of time since the Fund s last fiscal year end.

Security Valuation Equity securities and Exchange-Traded Funds (ETFs), except those traded on the Nasdaq Stock Market, Inc. (Nasdag), are valued at the last quoted sales price as of the time of the regular close of the New York Stock Exchange on the valuation date. Securities and ETFs traded on the Nasdag are valued in accordance with the Nasdag Official Closing Price, which may not be the last sales price. If, on a particular day, an equity security or ETF does not trade, the mean between the bid and ask prices will be used, which approximates fair value. Securities listed on a foreign exchange are normally valued at the last quoted sales price on the valuation date. U.S. government and agency securities are valued at the mean between the bid and ask prices, which approximates fair value. Investment company securities are valued at net asset value per share, as reported by the underlying investment company. Other debt securities are valued based upon valuations provided by an independent pricing service or broker and reviewed by management. To the extent current market prices are not available, the pricing service may take into account developments related to the specific security, as well as transactions in comparable securities. Valuations for fixed income securities utilize matrix systems, which reflect such factors as security prices, yields, maturities, and ratings, and are supplemented by dealer and exchange quotations. Foreign currency exchange contracts and foreign cross currency exchange contracts are valued at the mean between the bid and ask prices, which approximates fair value. Interpolated values are derived when the settlement date of the contract is an interim date for which quotations are not available. Futures contracts are valued at the daily quoted settlement prices. Generally, other securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith under the direction of the Fund s Board of Directors. In determining whether market quotations are readily available or fair valuation will be used, various factors will be taken into consideration, such as market closures or suspension of trading in a security. The Fund may use fair value pricing more frequently for securities traded primarily in non-U.S. markets because, among other things, most foreign markets close well before the Fund values its securities, generally as of 4:00 p.m. Eastern time. The earlier close of these foreign markets gives rise to the possibility that significant events, including broad market moves, government actions or pronouncements, aftermarket trading, or news events may have occurred in the interim. Whenever such a significant event occurs, the Fund may frequently value foreign securities using fair value prices based on third-party vendor modeling tools (international fair value pricing).

2. Investments

U.S. GAAP defines fair value as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions. A three-level hierarchy for fair value measurements has been established based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity is own assumptions about the assumptions that market participants would use in pricing the asset or liability based on the best information available under the circumstances. The Fund is investment in its entirety is assigned a level based upon the observability of the inputs which are significant to the overall valuation. The three-level hierarchy of inputs is summarized below.

- Level 1 inputs are quoted prices in active markets for identical investments. (Examples: equity securities, open-end investment companies, futures contracts, exchange-traded options contracts)
- Level 2 other observable inputs, including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks, and default rates), or other market-corroborated inputs. (Examples: debt securities, government securities, swap contracts, foreign currency exchange contracts, foreign securities utilizing international fair value pricing, broker-quoted securities, fair valued securities)

Level 3 Significant unobservable inputs, including the Fund s own assumptions used to determine the fair value of investments. (Examples: broker-quoted securities, fair valued securities)
12 NQ-DDF [2/15] 4/15 (14209)

(Unaudited)

Level 3 investments are valued using significant unobservable inputs. The Fund may also use an income-based valuation approach in which the anticipated future cash flows of the investment are discounted to calculate fair value. Discounts may also be applied due to the nature or duration of any restrictions on the disposition of the investments. Valuations may also be based upon current market prices of securities that are comparable in coupon, rating, maturity, and industry. The derived value of a Level 3 investment may not represent the value which is received upon disposition and this could impact the results of operations.

The following table summarizes the valuation of the Fund s investments by fair value hierarchy levels as of Feb. 28, 2015:

	Level 1	Level 2	Level 3	Total
Common Stock	\$ 85,657,579	\$	\$	\$ 85,657,579
Convertible Preferred Stock ¹	2,136,002	652,704	35,385	2,824,091
Corporate Debt		45,808,101		45,808,101
Senior Secured Loans		2,018,043		2,018,043
Limited Partnership	1,839,212			1,839,212
Preferred Stock ¹	358,840	403,063		761,903
Warrant	2,204			2,204
Short-Term Investments		2,348,556		2,348,556
Securities Lending Collateral		6,614,956		6,614,956
Total	\$ 89,993,837	\$ 57,845,423	\$ 35,385	\$ 147,874,645

The securities that have been deemed worthless on the Schedule of investments are considered to be Level 3 securities in this table.

¹Security type is valued across multiple levels. Level 1 investments represent exchange-traded investments, Level 2 investments represent investments with observable inputs or matrix-priced instruments, and Level 3 investments represent investments without observable inputs. The amounts attributed to Level 1 investments, Level 2 investments, and Level 3 investments represent the following percentages of the total market value of these security types:

	Level 1	Level 2	Level 3	Total
Convertible Preferred Stock	75.64%	23.11%	1.25%	100.00%
Preferred Stock	47.10%	52.90%		100.00%

As a result of utilizing international fair value pricing as of Dec. 31, 2014, a portion of the portfolio was categorized as Level 2.

During the period ended Feb. 28, 2015, there were no transfers between Level 1 investments, Level 2 investments, or Level 3 investments that had a significant impact to the Fund. This does not include transfers between Level 1 investments and Level 2 investments due to the Fund utilizing international fair value pricing during the period. In accordance with the Fair Valuation Procedures described in Note 1, international fair value pricing of securities in the Fund occurs when market volatility exceeds an established rolling threshold. If the threshold is exceeded on a given date, then prices of international securities (those that traded on exchanges that close at a different time than the time that the Fund s net asset value is determined) will be established using a separate pricing feed from a third-party vendor designed to establish a price for each such security as of the time that the Fund s net asset value is determined. Further, international fair value pricing uses other observable market-based inputs in place of the closing exchange price due to the events occurring after the close of the exchange or market on which the investment is principally traded, causing a change in classification between levels. The Fund s policy is to recognize transfers between levels at the beginning of the reporting period.

A reconciliation of Level 3 investments is presented when the Fund has a significant amount of Level 3 investments at the beginning, interim, or end of the period in relation to net assets. Management has determined not to provide additional disclosure on Level 3 inputs since the Level 3 investments are not considered significant to the Fund s net assets at the end of the period.

3. Securities Lending

The Fund, along with other funds in the Delaware Investments Family of Funds, may lend its securities pursuant to a security lending agreement (Lending Agreement) with BNY Mellon. At the time a security is loaned, the borrower must post collateral equal to the required percentage of the market value of the loaned security, including any accrued interest. The required percentage is: (1) 102% with respect to U.S. securities and

(Unaudited)

3. Securities Lending (continued)

foreign securities that are denominated and payable in U.S. dollars; and (2) 105% with respect to foreign securities. With respect to each loan, if on any business day the aggregate market value of securities collateral plus cash collateral held is less than the aggregate market value of the securities which are the subject of such loan, the borrower will be notified to provide additional collateral by the end of the following business day which, together with the collateral already held, will be not less than the applicable initial collateral requirements for such security loan. If the aggregate market value of securities collateral and cash collateral held with respect to a security loan exceeds the applicable initial collateral requirement, upon the request of the borrower, BNY Mellon must return enough collateral to the borrower by the end of the following business day to reduce the value of the remaining collateral to the applicable initial collateral requirement for such security loan. As a result of the foregoing, the value of the collateral held with respect to a loaned security on any particular day may be more or less than the value of the security on loan.

Cash collateral received is generally invested in the Delaware Investments Collateral Fund No. 1 (Collective Trust) established by BNY Mellon for the purpose of investment on behalf of funds managed by DMC that participate in BNY Mellon s securities lending program. The Collective Trust may invest in U.S. government securities and high-quality corporate debt, asset-backed and other money market securities, and in repurchase agreements collateralized by such securities, provided that the Collective Trust will generally have a dollar-weighted average portfolio maturity of 60 days or less. The Fund can also accept U.S. government securities and letters of credit (non-cash collateral) in connection with securities loans. In the event of default or bankruptcy by the lending agent, realization and/or retention of the collateral may be subject to legal proceedings. In the event the borrower fails to return loaned securities and the collateral received is insufficient to cover the value of the loaned securities and provided such collateral shortfall is not the result of investment losses, the lending agent has agreed to pay the amount of the shortfall to the Fund or, at the discretion of the lending agent, replace the loaned securities. The Fund continues to record dividends or interest, as applicable, on the securities loaned and is subject to changes in value of the securities loaned that may occur during the term of the loan. The Fund has the right under the Lending Agreement to recover the securities from the borrower on demand. With respect to security loans collateralized by non-cash collateral, the Fund receives loan premiums paid by the borrower. With respect to security loans collateralized by cash collateral, the earnings from the collateral investments are shared among the Fund, the security lending agent and the borrower. The Fund records security lending income net of allocations to the security lending agent, and the borrower.

The Collective Trust used for the investment of cash collateral received from borrowers of securities seeks to maintain a net asset value per unit of \$1.00, but there can be no assurance that it will always be able to do so. The Fund may incur investment losses as a result of investing securities lending collateral in the Collective Trust. This could occur if an investment in the Collective Trust defaulted or if it were necessary to liquidate assets in the Collective Trust to meet returns on outstanding security loans at a time when the Collective Trust s net asset value per unit was less than \$1.00. Under those circumstances, the Fund may not receive an amount from the Collective Trust that is equal in amount to the collateral the Fund would be required to return to the borrower of the securities and the Fund would be required to make up for this shortfall.

At Feb. 28, 2015, the value of securities on loan was \$8,657,696, for which the Fund received collateral, comprised of non-cash collateral (U.S. government securities) valued at \$2,372,364, and cash collateral of \$6,614,956. At Feb. 28, 2015, the value of invested collateral was \$6,614,956. Investments purchased with cash collateral are presented on the Schedule of investments under the caption Securities Lending Collateral.

4. Subsequent Events

Management has determined that no material events or transactions occurred subsequent to Feb. 28, 2015 that would require recognition or disclosure in the Fund s Schedule of investments.

14 NQ-DDF [2/15] 4/15 (14209)

Item 2. Controls and Procedures.

The registrant s principal executive officer and principal financial officer have evaluated the registrant s disclosure controls and procedures within 90 days of the filing of this report and have concluded that they are effective in providing reasonable assurance that the information required to be disclosed by the registrant in its reports or statements filed under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission.

There were no significant changes in the registrant s internal control over financial reporting that occurred during the registrant s last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the registrant s internal control over financial reporting.

Item 3. Exhibits.

File as exhibits as part of this Form a separate certification for each principal executive officer and principal financial officer of the registrant as required by Rule 30a-2(a) under the Act (17 CFR 270.30a-2(a)), exactly as set forth below:
