Table of Contents

Delaware Enhanced Global Dividend
and Income Fund

Semiannual report

May 31, 2015

The figures in the semiannual report for Delaware Enhanced Global Dividend and Income Fund represent past results, which are not a guarantee of future results. A rise or fall in interest rates can have a significant impact on bond prices. Funds that invest in bonds can lose their value as interest rates rise.

Closed-end fund

*Allocation includes all investments except for short-term investments.

The percentage of net assets exceeds 100.00% because the Fund utilizes a line of credit with The Bank of New York Mellon, as described in Note 5 in Notes to financial statements. The Fund utilizes leveraging techniques in an attempt to obtain a higher return for the Fund. There is no assurance that the Fund will achieve its investment objectives through the use of such techniques.

Table of Contents

Schedule of investments

Delaware Enhanced Global Dividend and Income Fund

- v Securities have been classified by type of business. Aggregate classification by country of origin has been presented in Security type / sector and country allocations on page 2.
100% of the income received was in the form of additional cash.
- = Security is being fair valued in accordance with the Fund's fair valuation policy. At May 31, 2015, the aggregate value of fair valued securities was \$35,265, which represents 0.02% of the Fund's net assets. See Note 1 in Notes to financial statements.
- ≠ The rate shown is the effective yield at the time of purchase.
 - Principal amount shown is stated in U.S. dollars unless noted that the security is denominated in another currency.
 - Non-income-producing security.
 - Variable rate security. The rate shown is the rate as of May 31, 2015. Interest rates reset periodically.
- D Securities have been classified by country of origin.
 - « Senior secured loans generally pay interest at rates which are periodically redetermined by reference to a base lending rate plus a premium. These base lending rates are generally: (i) the prime rate offered by one or more U.S. banks, (ii) the lending rate offered by one or more European banks such as the London Interbank Offered Rate (LIBOR), and (iii) the certificate of deposit rate. Senior secured loans may be subject to restrictions on resale. Stated rate in effect at May 31, 2015.
 - ϕ Step coupon bond. Coupon increases or decreases periodically based on a predetermined schedule. Stated rate in effect at May 31, 2015.

Unfunded Commitments

The Fund may invest in floating-rate loans. In connection with these investments, the Fund may also enter into unfunded corporate loan commitments (commitments). Commitments may obligate the Fund to furnish temporary financing to a borrower until permanent financing can be arranged. In connection with these commitments, the Fund earns a commitment fee, typically set as a percentage of the commitment amount. The following unfunded loan commitments were outstanding at May 31, 2015:

Borrower	Unfunded Amount	Cost	Value	Unrealized Appreciation (Depreciation)
Informatica Bridge Loan	\$410,000	\$ 410,000	\$ 410,000	\$
SS&C Technologies Bridge Loan	415,000	415,000	415,000	
Total			\$ 825,000	\$

- ¹ Ratios have been annualized and total return and portfolio turnover have not been annualized.
- ² The average shares outstanding method has been applied for per share information.
- ³ Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed for the purpose of this calculation, to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely, total investment return based on net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods.
- ⁴ The ratio of interest expense to adjusted average net assets (excluding debt outstanding) for the six months ended May 31, 2015 and years ended Nov. 30, 2014, 2013, 2012, 2011, and 2010 were 0.32%, 0.27%, 0.27%, 0.42%, 0.31%, and 0.33%, respectively.
- ⁵ The ratio of expenses before interest expense to adjusted average net assets (excluding debt outstanding) for the six months ended May 31, 2015 and years ended Nov. 30, 2014, 2013, 2012, 2011, and 2010 were 1.12%, 1.13%, 1.15%, 1.19%, 1.28%, and 1.22%, respectively.
- ⁶ The ratio of net investment income to adjusted average net assets (excluding debt outstanding) for the six months ended May 31, 2015 and years ended Nov. 30, 2014, 2013, 2012, 2011, and 2010 were 3.82%, 3.21%, 3.38%, 3.57%, 3.76%, and 3.73%, respectively.

Notes to financial statements

Delaware Enhanced Global Dividend and Income Fund

May 31, 2015 (Unaudited)

Delaware Enhanced Global Dividend and Income Fund (Fund) is organized as a Delaware statutory trust, and is a diversified closed-end management investment company under the Investment Company Act of 1940, as amended. The Fund's shares trade on the New York Stock Exchange (NYSE) under the symbol DEX.

The primary investment objective of the Fund is to seek current income, with a secondary objective of capital appreciation.

1. Significant Accounting Policies

The following accounting policies are in accordance with U.S. generally accepted accounting principles (U.S. GAAP) and are consistently followed by the Fund.

Security Valuation Equity securities and exchange-traded funds (ETFs), except those traded on the Nasdaq Stock Market, Inc. (Nasdaq), are valued at the last quoted sales price as of the time of the regular close of the NYSE on the valuation date. Securities and ETFs traded on the Nasdaq are valued in accordance with the Nasdaq Official Closing Price, which may not be the last sales price. If, on a particular day, an equity security or ETF does not trade, the mean between the bid and ask prices will be used, which approximates fair value. Securities listed on a foreign exchange are normally valued at the last quoted sales price on the valuation date. Open-end investment company securities are valued at net asset value per share, as reported by the underlying investment company. U.S. government and agency securities are valued at the mean between the bid and ask prices, which approximates fair value. Other debt securities are valued based upon valuations provided by an independent pricing service or broker and reviewed by management. To the extent current market prices are not available, the pricing service may take into account developments related to the specific security, as well as transactions in comparable securities. Valuations for fixed income securities utilize matrix systems, which reflect such factors as security prices, yields, maturities, and ratings, and are supplemented by dealer and exchange quotations. For asset-backed securities, collateralized mortgage obligations, commercial mortgage securities and U.S. government agency mortgage securities, pricing vendors utilize matrix pricing which considers prepayment speed, attributes of the collateral, yield or price of bonds of comparable quality, coupon, maturity, and type as well as broker/dealer-supplied prices. Foreign currency exchange contracts and foreign cross currency exchange contracts are valued at the mean between the bid and ask prices, which approximates fair value. Interpolated values are derived when the settlement date of the contract is an interim date for which quotations are not available. Futures contracts are valued at the daily quoted settlement prices. Generally, other securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith under the direction of the Fund's Board of Trustees (Board). In determining whether market quotations are readily available or fair valuation will be used, various factors will be taken into consideration, such as market closures or suspension of trading in a security. The Fund may use fair value pricing more frequently for securities traded primarily in non-U.S. markets because, among other things, most foreign markets close well before the Fund values its securities, generally as of 4:00 p.m. Eastern time. The earlier close of these foreign markets gives rise to the possibility that significant events, including broad market moves, government actions or pronouncements, aftermarket trading, or news events may have occurred in the interim. Whenever such a significant event occurs, the Fund may value foreign securities using fair value prices based on third-party vendor modeling tools (international fair value pricing).

Federal and Foreign Income Taxes No provision for federal income taxes has been made as the Fund intends to continue to qualify for federal income tax purposes as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended, and make the requisite distributions to shareholders. The Fund evaluates tax positions taken or expected to be taken in the course of preparing the Fund's tax returns to determine whether the tax positions are more likely-than-not of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold are recorded as a tax benefit or expense in the current year. Management has analyzed the Fund's tax positions taken for all open federal income tax years (Nov. 30, 2011 - Nov. 30, 2014), and has concluded that no provision for federal income tax is required in the Fund's financial statements. In regard to foreign taxes only, the Fund has open tax years in certain foreign countries in which it invests that may date back to the inception of the Fund.

Distributions The Fund has implemented a managed distribution policy. Under the policy, the Fund is managed with a goal of generating as much of the distribution as possible from net investment income and short-term capital gains. The balance of the distribution will then come from long-term capital gains to the extent permitted, and if necessary, a return of capital. Even though the Fund may realize current year capital gains, such gains may be offset, in whole or in part, by the Fund's capital loss carryovers from prior years. For federal income tax purposes, the effect of such capital loss carryovers may be to convert (to the extent of such current year gains) what would otherwise be non-taxable returns of capital into distributions taxable as ordinary income. The use of such capital loss carryovers in this circumstance will produce no tax benefit for shareholders, and the capital loss carryovers available to offset future capital gains of the Fund will be reduced. Under the Regulated Investment Company Modernization Act of 2010 (Act), this tax effect attributable to the Fund's capital loss carryovers (the conversion of returns of capital into distributions taxable as ordinary income) no longer applies to net capital losses of the Fund arising in Fund tax years beginning

Table of Contents

after Nov. 30, 2011. The actual determination of the source of the Fund's distributions can be made only at year end. Shareholders should receive written notification regarding the actual components and tax treatments of all Fund distributions for the calendar year 2015 in early 2016.

Repurchase Agreements The Fund may purchase certain U.S. government securities subject to the counterparty's agreement to repurchase them at an agreed upon date and price. The counterparty will be required on a daily basis to maintain the value of the collateral subject to the agreement at not less than the repurchase price (including accrued interest). The agreements are conditioned upon the collateral being deposited under the Federal Reserve book-entry system with the Fund's custodian or a third-party sub-custodian. In the event of default or bankruptcy by the other party to the agreement, retention of the collateral may be subject to legal proceedings. All open repurchase agreements as of the date of this report were entered into on May 29, 2015.

To Be Announced Trades (TBA) The Fund may contract to purchase or sell securities for a fixed price at a transaction date beyond the customary settlement period (examples: when issued, delayed delivery, forward commitment, or TBA transactions) consistent with the Fund's ability to manage its investment portfolio and meet redemption requests. These transactions involve a commitment by the Fund to purchase or sell securities for a predetermined price or yield with payment and delivery taking place more than three days in the future, or after a period longer than the customary settlement period for that type of security. No interest will be earned by the Fund on such purchases until the securities are delivered or the transaction is completed; however, the market value may change prior to delivery.

Foreign Currency Transactions Transactions denominated in foreign currencies are recorded at the prevailing exchange rates on the valuation date in accordance with the Fund's prospectus. The value of all assets and liabilities denominated in foreign currencies is translated daily into U.S. dollars at the exchange rate of such currencies against the U.S. dollar. Transaction gains or losses resulting from changes in exchange rates during the reporting period or upon settlement of the foreign currency transaction are reported in operations for the current period. The Fund generally bifurcates that portion of realized gains and losses on investments in debt securities which is due to changes in foreign exchange rates from that which is due to changes in market prices of debt securities. That portion of gains (losses) is included on the Statement of operations under Net realized gain (loss) on foreign currencies. For foreign equity securities, these changes are included on the Statement of operations under Net realized and unrealized gain on investments. The Fund reports certain foreign currency related transactions as components of realized gains (losses) for financial reporting purposes, whereas such components are treated as ordinary income (loss) for federal income tax purposes.

Use of Estimates The Fund is an investment company in conformity with U.S. GAAP. Therefore, the Fund follows the accounting and reporting guidelines for investment companies. The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the fair value of investments, the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates and the differences could be material.

Other Expenses directly attributable to the Fund are charged directly to the Fund. Other expenses common to various funds within the Delaware Investments® Family of Funds are generally allocated among such funds on the basis of average net assets. Management fees and some other expenses are paid monthly. Security transactions are recorded on the date the securities are purchased or sold (trade date) for financial reporting purposes. Costs used in calculating realized gains and losses on the sale of investment securities are those of the specific securities sold. Dividend income is recorded on the ex-dividend date and interest income is recorded on the accrual basis. Discounts and premiums on debt securities are accreted or amortized to interest income, respectively over the lives of the respective securities using the effective interest method. Realized gains (losses) on paydowns of asset- and mortgage-backed securities are classified as interest income. Distributions received from investments in real estate investment trusts (REITs) are recorded as dividend income on the ex-dividend date, subject to reclassification upon notice of the character of such distributions by the issuer. Foreign dividends are also recorded on the ex-dividend date or as soon after the ex-dividend date that the Fund is aware of such dividends, net of all tax withholdings, a portion of which may be reclaimable. Withholding taxes and reclaims on foreign dividends have been recorded in accordance with the Fund's understanding of the applicable country's tax rules and rates. The Fund may pay foreign capital gain taxes on certain foreign securities held, which are reported as components of realized losses for financial reporting purposes, whereas such components are treated as ordinary loss for federal income tax purposes.

The Fund may receive earnings credits from its custodian when positive cash balances are maintained, which may be used to offset custody fees. There were no such earnings credits for the six months ended May 31, 2015.

Notes to financial statements

Delaware Enhanced Global Dividend and Income Fund**2. Investment Management, Administration Agreements and Other Transactions with Affiliates**

In accordance with the terms of its investment management agreement, the Fund pays Delaware Management Company (DMC), a series of Delaware Management Business Trust, and the investment manager, an annual fee of 0.95%, of the adjusted average daily net assets of the Fund. For purposes of the calculation of investment management fees, adjusted average daily net assets excludes the line of credit liability.

Delaware Investments Fund Services Company (DIFSC), an affiliate of DMC, provides fund accounting and financial administration oversight services to the Fund. For these services, DIFSC's fees are calculated based on the aggregate daily net assets (excluding the line of credit liability) of the Delaware Investments® Family of Funds at the following annual rate: 0.0050% of the first \$30 billion; and 0.0045% of the next \$10 billion; 0.0040% of the next \$10 billion; and 0.0025% of aggregate average daily net assets in excess of \$50 billion. The fees payable to DIFSC under the service agreement described above are allocated among all Funds in the Delaware Investments Family of Funds on a relative net asset value basis. For the six months ended May 31, 2015, the Fund was charged \$6,900 for these services. This amount is included on the Statement of operations under Accounting and administration expenses.

As provided in the investment management agreement, the Fund bears a portion of the cost of resources shared with DMC, including the cost of internal personnel of DMC and its affiliates that provide legal, tax, and regulatory reporting services to the Fund. For the six months ended May 31, 2015, the Fund was charged \$18,820 for internal legal, tax, and regulatory reporting services provided by DMC and/or its affiliates' employees. This amount is included on the Statement of operations under Legal fees.

Trustees' fees include expenses accrued by the Fund for each Trustee's retainer and meeting fees. Certain officers of DMC and DIFSC are Officers and/or Trustees of the Fund. These Officers and Trustees are paid no compensation by the Fund.

3. Investments

For the six months ended May 31, 2015, the Fund made purchases and sales of investment securities other than short-term investments as follows:

Purchases other than U.S. government securities	\$ 72,028,651
Purchases of U.S. government securities	3,428,699
Sales other than U.S. government securities	76,652,769
Sales of U.S. government securities	3,292,647

At May 31, 2015, the cost of investments for federal income tax purposes has been estimated since final tax characteristics cannot be determined until fiscal year end. At May 31, 2015, the cost of investments and unrealized appreciation (depreciation) were as follows:

Cost of investments	\$ 276,524,231
Aggregate unrealized appreciation	\$ 41,665,273
Aggregate unrealized depreciation	(23,681,112)
Net unrealized appreciation	\$ 17,984,161

For federal income tax purposes, capital loss carryforwards may be carried forward and applied against future capital gains. Capital loss carryforwards remaining at Nov. 30, 2014, will expire as follows: \$15,939,445 expires in 2016 and \$22,248,222 expires in 2017.

Table of Contents

On Dec. 22, 2010, the Act was enacted, which changed various technical rules governing the tax treatment of regulated investment companies. The changes were generally effective for taxable years beginning after the date of enactment. Under the Act, the Fund is permitted to carry forward capital losses incurred in taxable years beginning after the date of enactment for an unlimited period. Additionally, post-enactment capital loss carryforwards will retain their character as either short-term or long-term capital losses rather than being considered all short-term as permitted under previous regulation. There are no losses incurred that will be carried forward under the Act.

U.S. GAAP defines fair value as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions. A three-level hierarchy for fair value measurements has been established based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability based on the best information available under the circumstances. The Fund's investment in its entirety is assigned a level based upon the observability of the inputs which are significant to the overall valuation. The three-level hierarchy of inputs is summarized below.

Level 1 Inputs are quoted prices in active markets for identical investments. (Examples: equity securities, open-end investment companies, futures contracts, exchange-traded options contracts)

Level 2 Other observable inputs, including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks, and default rates) or other market-corroborated inputs. (Examples: debt securities, government securities, swap contracts, foreign currency exchange contracts, foreign securities utilizing international fair value pricing, broker-quoted securities, fair valued securities)

Level 3 Significant unobservable inputs, including the Fund's own assumptions used to determine the fair value of investments. (Examples: broker-quoted securities, fair valued securities)

Level 3 investments are valued using significant unobservable inputs. The Fund may also use an income-based valuation approach in which the anticipated future cash flows of the investment are discounted to calculate fair value.

Discounts may also be applied due to the nature or duration of any restrictions on the disposition of the investments. Valuations may also be based upon current market prices of securities that are comparable in coupon, rating, maturity, and industry. The derived value of a Level 3 investment may not represent the value which is received upon disposition and this could impact the results of operations.

Total	\$ 74,204,257	\$ 220,244,192	\$ 59,943	\$ 294,508,392

¹Security type is valued across multiple levels. Level 1 investments represent exchange-traded investments, Level 2 investments represent investments with observable inputs or matrix-priced investments, and Level 3 investments represent investments without observable inputs. The amounts attributed to Level 1 investments, Level 2 investments, and Level 3 investments represent the following percentages of the total market value of these security types:

Table of Contents

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Convertible Preferred Stock	90.87%	8.55%	0.58%	100.00%
Preferred Stock	42.46%	57.54%		100.00%

The securities that have been deemed worthless on the Schedule of investments are considered to be Level 3 investments in these tables.

As a result of utilizing international fair value pricing at May 31, 2015, a portion of the Fund's common stock was categorized as Level 2.

During the six months ended May 31, 2015, there were no transfers between Level 1 investments, Level 2 investments, or Level 3 investments that had a significant impact to the Fund. This does not include transfers between Level 1 investments and Level 2 investments due to the Fund utilizing international fair value pricing during the period. In accordance with the fair valuation procedures described in Note 1, international fair value pricing of securities in the Fund occurs when market volatility exceeds an established rolling threshold. If the threshold is exceeded on a given date, then prices of international securities (those that traded on exchanges that close at a different time than the time that the Fund's net asset value is determined) are established using a separate pricing feed from a third-party vendor designed to establish a price for each such security as of the time that the Fund's net asset value is determined. Further, international fair value pricing uses other observable market-based inputs in place of the closing exchange price due to the events occurring after the close of the exchange or market on which the investment is principally traded, causing a change in classification between levels. The Fund's policy is to recognize transfers between levels at the beginning of the reporting period.

A reconciliation of Level 3 investments is presented when the Fund has a significant amount of Level 3 investments at the beginning, interim, or end of the period in relation to the Fund's net assets. Management has determined not to provide additional disclosure on Level 3 inputs since the Level 3 investments are not considered significant to the Fund's net assets at the end of the period.

4. Capital Stock

Shares obtained under the Fund's dividend reinvestment plan are purchased by the Fund's transfer agent, Computershare, Inc. (Computershare), in the open market, if the shares of the Fund are trading at a discount to the Fund's net asset value on the dividend payment date. However, the dividend reinvestment plan provides that if the shares of the Fund are trading at a premium to the Fund's net asset value on the dividend payment date, the Fund will issue shares to shareholders of record at net asset value. During the six months ended May 31, 2015 and year ended

Nov. 30, 2014, the Fund did not issue any shares under the Fund's dividend reinvestment plan.

5. Line of Credit

For the six months ended May 31, 2015, the Fund borrowed a portion of the money available to it pursuant to a \$87,000,000 Credit Agreement with The Bank of New York Mellon (BNY Mellon) that was scheduled to expire on June 24, 2015. Effective June 19, 2015, the Fund entered into a new Credit Agreement that is scheduled to terminate on June 17, 2016. The terms of the new Credit Agreement are substantially the same as the terms in the expiring agreement. Depending on market conditions, the amount borrowed by the Fund pursuant to the Credit Agreement may be reduced or possibly increased in the future.

At May 31, 2015, the par value of loans outstanding was \$87,000,000, at a variable interest rate of 1.03%. During the six months ended May 31, 2015, the average daily balance of loans outstanding was \$87,000,000, at a weighted average interest rate of approximately 1.07%.

Interest on borrowings is based on a variable short-term rate plus an applicable margin. The commitment fee under both the new and expiring Credit Agreements is computed at a rate of 0.10% per annum on the unused balance. The loan is collateralized by the Fund's portfolio.

6. Derivatives

U.S. GAAP requires disclosures that enable investors to understand: (1) how and why an entity uses derivatives; (2) how they are accounted for; and (3) how they affect an entity's results of operations and financial position.

Foreign Currency Exchange Contracts The Fund may enter into foreign currency exchange contracts and foreign cross currency exchange contracts as a way of managing foreign exchange rate risk. The Fund may enter into these contracts to fix the U.S. dollar value of a security that it has agreed to buy or sell for the period between the date the trade was entered into and the date the security is delivered and paid for. The Fund may also use these contracts to hedge the U.S. dollar value of securities it already owns that are denominated in foreign currencies. In addition, the Fund may enter into these contracts to facilitate or expedite the settlement of portfolio transactions. The change in

(continues)

Notes to financial statements

Delaware Enhanced Global Dividend and Income Fund

6. Derivatives (continued)

value is recorded as an unrealized gain or loss. When the contract is closed, a realized gain or loss is recorded equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

The use of foreign currency exchange contracts and foreign cross currency exchange contracts does not eliminate fluctuations in the underlying prices of the securities, but does establish a rate of exchange that can be achieved in the future. Although foreign currency exchange contracts and foreign cross currency exchange contracts limit the risk of loss due to an unfavorable change in the value of the hedged currency, they also limit any potential gain that might result should the value of the currency change favorably. In addition, the Fund could be exposed to risks if the counterparties to the contracts are unable to meet the terms of their contracts. The Fund's maximum risk of loss from counterparty credit risk is the value of its currency exchanged with the counterparty. The risk is generally mitigated by having a netting arrangement between the Fund and the counterparty and by the posting of collateral by the counterparty to the Fund to cover the Fund's exposure to the counterparty. No foreign currency exchange contracts were outstanding at May 31, 2015.

During the six months ended May 31, 2015, the Fund entered into foreign currency exchange contracts to hedge the U.S dollar value of securities it already owns that are denominated in foreign currencies.

Futures Contracts A futures contract is an agreement in which the writer (or seller) of the contract agrees to deliver to the buyer an amount of cash or securities equal to a specific dollar amount times the difference between the value of a specific security or index at the close of the last trading day of the contract and the price at which the agreement is made. The Fund may use futures in the normal course of pursuing its investment objectives. The Fund may invest in futures contracts to hedge its existing portfolio securities against fluctuations in fair value caused by changes in interest rates or market conditions. Upon entering into a futures c
