Washington, D.C. 20549

FORM 6-K

REPORT OF FOREIGN PRIVATE ISSUER PURSUANT TO RULE 13A-16 OR 15D-16 OF THE
SECURITIES EXCHANGE ACT OF 1934

For the month of November 2016

Commission File Number: 000-50113

GOLAR LNG LIMITED
(Translation of registrant's name into English)

2nd Floor
S.E. Pearman Building
9 Par-la-Ville Road
Hamilton HM 11
Bermuda

(Address of principal executive office)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1): .

Note: Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7): .

Note: Regulation S-T Rule 101(b)(7) only permits the submission in paper of a Form 6-K if submitted to furnish a report or other document that the registrant foreign private issuer must furnish and make public under the laws of the jurisdiction in which the registrant is incorporated, domiciled or legally organized (the registrant's "home country"), or under the rules of the home country exchange on which the registrant's securities are traded, as long as the report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

INFORMATION CONTAINED IN THIS FORM 6-K REPORT

Included is the Overview and Operating and Financial Review for the six months ended June 30, 2016 and the unaudited condensed consolidated interim financial statements of Golar LNG Limited (the "Company" or "Golar") as of and for the six months ended June 30, 2016.

Exhibits

The following exhibits are filed as part of this report on Form 6-K:

The following financial information of Golar LNG Limited formatted in Extensible Business Reporting Language 101 (XBRL):

- i. Unaudited Consolidated Statements of Income for the six months ended June 30, 2016 and 2015;
- ii. Unaudited Consolidated Statements of Comprehensive Income for the six months ended June 30, 2016 and 2015;
- iii. Unaudited Consolidated Balance Sheets as of June 30, 2016 and December 31, 2015;
- iv. Unaudited Consolidated Statements of Cash Flows for the six months ended June 30, 2016 and 2015;
- v. Unaudited Consolidated Statements of Changes in Equity for the six months ended June 30, 2016 and 2015; and
- vi. Notes to the Unaudited Condensed Consolidated Financial Statements.

The information contained in this Report on Form 6-K is hereby incorporated by reference into the Company's registration statement on Form F-3 ASR (File no. 333-196992), which was filed with the U.S. Securities and Exchange Commission on June 24, 2014.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

GOLAR LNG LIMITED

UNAUDITED CONDENSED INTERIM FINANCIAL REPORT

Forward Looking Statements

This report and any other written or oral statements made by us or on our behalf may include forward-looking statements, which reflect our current views with respect to future events and financial performance. When used in this report, the words "believe", "anticipate", "intend", "estimate", "forecast", "project", "plan", "potential", "may", "should", "expect", and similar expressions identify forward-looking statements.

The forward-looking statements in this report are based upon various assumptions, many of which are based, in turn, upon further assumptions, including without limitation, management's examination of historical operating trends, data contained in our records and other data available from third parties. Although we believe that these assumptions were reasonable when made, because these assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond our control, we cannot assure you that we will achieve or accomplish these expectations, beliefs or projections. As a result, you are cautioned not to rely on any forward-looking statements.

In addition to these important factors and matters discussed elsewhere herein, important factors that, in our view, could cause actual results to differ materially from those discussed in the forward-looking statements include among other things:

changes in liquefied natural gas, or LNG, carrier, floating storage and regasification unit, or FSRU, or floating liquefaction natural gas vessel, or FLNG, market trends, including charter rates, vessel values or technological advancements;

- changes in our ability to retrofit vessels as FSRUs or FLNGs and in our ability to obtain financing for such conversions or our joint ventures on acceptable terms or at all;
- changes in the supply of or demand for LNG carriers, FSRUs or FLNGs;
- a material decline or prolonged weakness in rates for LNG carriers, FSRUs or FLNGs;
- changes in the performance of the pool in which certain of our vessels operate and the performance of our joint ventures;
- changes in trading patterns that affect the opportunities for the profitable operation of LNG carriers, FSRUs or FLNGs;
- the failure of West Africa Gas Limited ("WAGL") to commence its time charter for the Golar Tundra or any action by Golar LNG Partners LP ("Golar Partners" or "the Partnership"), to exercise its related put option;
- changes in the supply of or demand for LNG or LNG carried by sea;
- changes in the supply of or demand for natural gas generally or in particular regions;
- failure of our contract counterparties, including our joint venture co owners, to comply with their agreements with us;
- changes in our relationships with our counterparties, including our major chartering parties;
- changes in the availability of vessels to purchase and in the time it takes to construct new vessels;
- failures of shipyards to comply with delivery schedules or performance specifications on a timely basis or at all;
- our ability to integrate and realize the benefits of acquisitions;
- changes in our ability to sell vessels to Golar Partners, Golar Power Limited, or Golar Power;
- changes in our relationship with Golar Partners, Golar Power or OneLNG S.A.;
- changes to rules and regulations applicable to LNG carriers, FSRUs, FLNGs or other parts of the LNG supply chain;
- actions taken by regulatory authorities that may prohibit the access of LNG carriers, FSRUs or FLNGs to various ports;

our inability to achieve successful utilization of our expanded fleet or inability to expand beyond the carriage of LNG and provision of FSRUs, particularly through our innovative FLNG strategy, or GoFLNG, and our joint ventures; changes in our ability to obtain additional financing on acceptable terms or at all; increases in costs, including, among other things, crew wages, insurance, provisions, repairs and maintenance; changes in general domestic and international political conditions, particularly where we operate; a decline or continuing weakness in the global financial markets; challenges by authorities to the tax benefits we previously obtained under certain of our leasing agreements; and other factors listed from time to time in registration statements, reports or other materials that we have filed with or furnished to the Securities and Exchange Commission, or the Commission, including our most recent annual report on Form 20-F/A.

We caution readers of this report not to place undue reliance on these forward-looking statements, which speak only as of their dates. These forward looking statements are not guarantees of our future performance, and actual results and future developments may vary materially from those projected in the forward looking statements.

All forward-looking statements included in this report are made only as of the date of this report and, except as required by law, we assume no obligation to update any written or oral forward-looking statements made by us or on our behalf as a result of new

information, future events or other factors. If one or more forward-looking statements are updated, no inference should be drawn that additional updates will be made.

2

The following is a discussion of our financial condition and results of operations for the six months ended June 30, 2016 and 2015. Unless otherwise specified herein, references to "the Company", "Golar", "we", "us", and "our" refer to Golar LNG Limited and any one or more of its consolidated subsidiaries, or to all such entities. References to "Golar Partners" or the "Partnership" refer to Golar LNG Partners LP and to any one or more of its direct and indirect subsidiaries. References to "Golar Power" refer to Golar Power Limited and to any one or more of its direct and indirect subsidiaries. References to "OneLNG" refer to OneLNG S.A. You should read the following discussion and analysis together with the financial statements and related notes included elsewhere in this report. For additional information relating to our operating and financial review and prospects, including definitions of certain terms defined herein, please see our annual report on Form 20-F/A for the year ended December 31, 2015, which was filed with the Commission on November 10, 2016.

Overview

We are a midstream LNG company engaged primarily in the transportation, regasification, liquefaction and trading of LNG. We are engaged in the acquisition, ownership, operation and chartering of LNG carriers and FSRUs and the development of LNG projects, such as FLNGs, through our subsidiaries and affiliates.

As of November 10, 2016, we, together with our affiliates Golar Partners and Golar Power have a combined fleet of 26 vessels, comprised of 19 LNG carriers and seven FSRUs. Of these vessels, the Hilli is currently undergoing conversion to a FLNG, four vessels are in lay-up, including the Gimi and the Gandria, which are scheduled for conversion to FLNGs, the Golar Tundra is awaiting commencement of a long-term charter, and the remaining vessels are either on fixed or spot charters, including ten LNG carriers participating in the LNG carrier pool, the Cool Pool, or are available for employment. In addition, our affiliate Golar Power has one newbuilding commitment for the construction of a FSRU, which is scheduled for delivery in the fourth quarter of 2017.

Our vessels provide, or have provided, LNG shipping, storage and regasification services to leading players in the LNG industry including BG Group plc, Eni S.p.A, Petrobras Brasileiro S.A., Dubai Supply Authority, PT Pertamina (Pesero), Nigeria LNG Ltd and many others.

Our business is focused primarily on providing reliable, safe and cost efficient LNG shipping and FSRU operations. We are seeking to further develop our business in other midstream areas of the LNG supply chain with particular emphasis on innovative floating liquefaction solutions and power generation through the use of LNG as fuel.

Recent Developments

Since July 1, 2016, the significant developments that have occurred are as follows:

Restatement of comparative period for the six months ended June 30, 2015

As further described in note 35 to the consolidated financial statements in our recently filed annual report on form 20-F/A for the year ended December 31, 2015, as filed on November 10, 2016, we restated our consolidated financial statements to account for the various investments in Golar Partners since the deconsolidation date of December 13, 2012, as equity accounted for investments. The change in accounting for our investment in Golar Partners does not affect the market value of our investment, our cash flows, our covenant compliance or our liquidity. Accordingly, the comparative for the six month period ended June 30, 2015, has also been restated within these interim financial statements.

These interim financial statements should be read in conjunction with the company's restated audited financial statements for the year ended December 31, 2015 included in the Form 20-F/A.

Joint ventures

In June 2016, we entered into certain agreements forming a 50/50 joint venture with investment vehicles affiliated with the private equity firm Stonepeak Infrastructure Partners ("Stonepeak"). The joint venture company, Golar Power Limited ("Golar Power"), offers integrated LNG based downstream solutions, through the ownership and operation of FSRUs and associated terminal and power generation infrastructure.

The transaction closed in July 2016. At closing, Stonepeak acquired from us its 50% interest in Golar Power's ordinary shares for \$116 million and subscribed to \$100 million of Golar Power's preference shares. Golar Power's initial asset base includes the \$100 million invested by Stonepeak in connection with its purchase of preference shares, a 25% interest in Centrais Electricas de Sergipe S.A. ("CELSE"), a Brazilian corporation, which was formed for the purpose of constructing and operating a combined

cycle, gas fired, power plant with installed capacity of 1,515.6 megawatts located in the municipality of Barra dos Coqueiros in the State of Sergipe in Brazil, or the Sergipe project, FSRU newbuilding that is currently being constructed at Samsung shipyard, and our former subsidiaries that own two modern 160,000 cbm trifuel LNG carriers, the Golar Penguin and the Golar Celsius, suited for conversion to FSRUs.

In October 2016, Golar Power approved taking a Final Investment Decision, or FID, on the Sergipe project thereby enabling CELSE to enter into a lump-sum turn key EPC agreement with General Electric to build, maintain and operate the above described power plant in Brazil. In addition, Golar Power has also recently increased its ownership in the Sergipe project from 25% to 50% by acquiring additional interests in CELSE.

On July 25, 2016, we entered into a Joint Venture and Shareholders' Agreement with Schlumberger B.V. ("Schlumberger"), a subsidiary of Schlumberger Group, in connection with the formation of a joint venture, OneLNG, which is intended to offer an integrated upstream and midstream solution for the development of low cost gas reserves to LNG. OneLNG will be the exclusive vehicle for all projects that involve the conversion of natural gas to LNG and can utilize both Schlumberger's production management services and Golar's FLNG expertise. Golar holds 51% and Schlumberger the remaining 49% of the shares in OneLNG; however the control and management of OneLNG is shared in accordance with the terms of the Joint Venture and Shareholders' Agreement.

OneLNG was established with \$20 million in working capital that was contributed in proportion to each shareholder's ownership. Both parties have agreed that once a project suitable for OneLNG reaches final investment decision, both parties will be required to contribute a further \$250 million each in new equity. Subsequently, the parties will, on a project-by-project basis, discuss additional debt capital as required.

Both Golar and Schlumberger have agreed that any new FLNG business development will be initiated by OneLNG. If the Board of OneLNG chooses not to proceed with an identified project, Golar or Schlumberger are free to pursue the project independently.

Financings

On September 27, 2016 and October 21, 2016 we drew down an additional \$50 million on each of the respective dates in connection with the GoFLNG Hilli facility entered into in September 2015. To date we have drawn down \$250 million under this facility.

On September 30, 2016, our project partner on the Hilli FLNG Project received notice from the bank, which issued the letter of credit in accordance with the signed Perenco Tolling Agreement, notifying that the letter of credit is to expire on December 31, 2016. Together with the bank, we are progressing work streams to facilitate re-issuance of the letter of credit prior to its expiry. As of October 17, 2016, we received a written commitment from the bank allowing re-issuance of the letter of credit subject to certain conditions, in relation to our strategy for refinancing our convertible bonds.

Dividends

In August 2016, we declared a dividend of \$0.05 per share in respect of the quarter ended June 30, 2016 to holders of record on September 14, 2016, which was paid on or about October 3, 2016.

IDR reset

On October 14, 2016, we entered into an agreement with Golar Partners to exchange all of the existing incentive distribution rights ("Old IDRs") for the issuance of (i) a new class of incentive distributions rights ("New IDRs"), an aggregate of 2,994,364 common units and 61,109 general partner units on the closing date of the exchange and; (ii) an

aggregate of up to 748,592 additional common units and up to 15,278 general partner units ("Earn-Out Units") that may be issued subject to certain conditions. The Earn-Out Units represent an aggregate of 20% of the total units to be issued in connection with the transaction. The number of Earn-Out Units that will be issued is dependent on the distributions made by Golar Partners for the quarters ending December 31, 2016 through to September 30, 2018. The new IDRs provide for distribution "splits" between the IDR holders and the holders of common units equal to those applicable to the Old IDRs, which have been cancelled. However, the New IDRs provide for higher target distribution levels before distributions are payable with respect to the New IDRs, including an increase of the minimum quarterly distributions from \$0.3850 to \$0.5775 per common unit, effective with respect to the distribution for the quarter ended December 31, 2016.

Fortuna Project

In November 2016 OneLNGSM and Ophir Holdings & Ventures Ltd., or Ophir, signed a shareholders agreement to establish a joint operating company, or JOC, to develop a 2.6 trillion cubic feet gas concession offshore Equatorial Guinea. Subject to Final Investment Decision ("FID") the JOC, 66.2% owned by OneLNG and 33.8% by Ophir, is expected to own Ophir's share of Equatorial Guinea's Block R license, equivalent to approximately 2.2-2.5 million tons per annum of LNG over 15-20 years, and the FLNG vessel Gandria. As well as owning these assets the JOC will facilitate the financing, construction, development and operation of both the upstream and midstream components of this integrated project which is expected to cost \$2 billion to reach first gas. A FID, expected within the first half of 2017, is subject to agreement of final terms and execution of documentation for around \$1.2 billion of project debt financing, approval by the shareholders of Ophir Energy plc and approval by the government of Equatorial Guinea. Subject to FID, first gas is expected to be produced from the gas concession during the first half of 2020.

Operating and Financial Review

Six Month Period Ended June 30, 2016 Compared with the Six Month Period Ended June 30, 2015

Vessels operations segment

Average Daily TCE ⁽¹⁾ (to the closest \$100)	8,600	14,700	(6,100)	(41))%

(1) Time Charter Equivalent, or TCE, is a non-GAAP financial measure. See the section of this report entitled "Non-GAAP measures" for a discussion of TCE.

Operating revenues: Total operating revenues decreased by \$17.4 million to \$34.9 million for the six months ended June 30, 2016 compared to \$52.3 million for the same period in 2015. This was principally due to:

a decrease of \$4.3 million in revenue from the Golar Arctic as she was mostly off-hire during the first quarter of 2016 prior to the commencement of her two year floating storage unit charter on March 23, 2016 with New Fortress Energy in Jamaica;

a decrease of \$1.4 million from the Golar Eskimo relating to revenue earned prior to her disposal to Golar Partners in January 2015;

a decrease of \$9.7 million in revenue from the Golar Crystal and Golar Frost following the conclusion of their charters with Nigeria LNG in March 2016 and their subsequent entry into the Cool Pool; and

a decrease of \$1.7 million in management fee income to \$4.8 million from the provision of services to Golar Partners under our management and administrative services and fleet management agreements compared to \$6.5 million for the same period in 2015.

Vessel operating expenses: Vessel operating expenses increased by \$0.3 million to \$29.6 million for the six months ended June 30, 2016, compared to \$29.3 million for the same period in 2015, primarily due to an additional \$3.0

million of operating costs in relation to the Golar Tundra, which was delivered in November 2015. This was partially offset by:

a decrease of \$2.2 million in management fee costs due to our bringing in-house the technical operations of Golar Management Norway AS in connection with our acquisition of the remaining 40% interest in it in September 2015;

6

a decrease of \$0.4 million from Golar Eskimo in connection with her disposal to Golar Partners in January 2015; and lower operating costs from our vessels in lay-up, namely the Hilli, the Gimi, the Gandria and the Golar Viking.

As a result of lower revenue and higher voyage expenses incurred by most of our vessels within the period, we had a lower daily time charter equivalent, or TCE, for the six months ended June 30, 2016 of \$8,600 compared to \$14,700 for the same period in 2015. See the section of this report entitled "Non-GAAP measures" for a discussion of TCE.

Voyage, charterhire and commission expenses: Voyage, charterhire and commission expenses largely relate to charterhire expenses, fuel costs associated with commercial waiting time and vessel positioning costs. While a vessel is on-hire, fuel costs are typically paid by the charterer, whereas during periods of commercial waiting time, fuel costs are paid by us. The decrease in voyage, charterhire and commission expenses of \$21.9 million to \$23.3 million for the six months ended June 30, 2016 compared to \$45.1 million for the same period in 2015 was primarily due to:

a decrease of \$13.8 million in charterhire expense relating to the charter-back of the Golar Eskimo from Golar Partners. The charter-back arrangement with Golar Partners was in connection with the disposal of the Golar Eskimo in January 2015, with the arrangement ending at the end of June 2015. No comparable charterhire expense was therefore recognized in 2016; and

a decrease of \$8.2 million in charterhire expense relating to the charter-back of the Golar Grand from Golar Partners. The charter-back arrangement was pursuant to Golar Partners' exercise of its option in February 2015 under the Option Agreement executed in connection with the disposal of the vessel to Golar Partners in 2012. For the six months ended June 30, 2015, these costs included \$8.8 million of incremental liability arising from the re-measurement of Golar's guarantee obligation to Golar Partners.

Administrative expenses: Administrative expenses increased by \$5.0 million to \$19.1 million for the six months ended June 30, 2016 compared to \$14.1 million for the same period in 2015. This was primarily due to (i) an increase in salaries and benefits of \$2.9 million mainly as a result of an increase in headcount in connection with the bringing in-house of the technical operations of Golar Wilhelmsen (renamed Golar Management Norway AS) in September 2015; and (ii) an increase in legal and professional fees largely attributable to the general effect of expansion of our fleet and thus commercial activity and increase in business development activity.

Depreciation and amortization: Depreciation and amortization increased by \$3.3 million to \$39.1 million for the six months ended June 30, 2016 compared to \$35.8 million for the same period in 2015. This was primarily due to \$0.8 million of additional depreciation expense arising from our newbuildings delivered in the first quarter of 2015 (i.e. Golar Ice, Golar Kelvin and Golar Snow) and \$1.9 million of additional depreciation expense arising from the Golar Viking, which was sold on January 20, 2015 but subsequently reacquired on December 4, 2015, resulting in a full six months' depreciation charge in 2016.

Impairment of long-term assets: During the six months ended June 30, 2016, we realized an impairment charge amounting to \$1.7 million related to equipment classified as "Other long-term assets" due to the uncertainty of its future usage. There was no comparable charge for the same period in 2015.

Gain on disposals to Golar Partners (Restated): In January 2015, we sold 100% of our interests in the companies that own and operate the FSRU, the Golar Eskimo, to Golar Partners and recognized a provisional gain on disposal of \$103.6 million. The gain was finalized in the quarter ended December 31, 2015, resulting in an adjusted gain of \$102.4 million. The purchase consideration was \$390.0 million for the vessel and charter, less the assumed bank debt of \$162.8 million.

Loss on disposal of vessel held-for-sale: In February 2015, we sold the LNG carrier, Golar Viking, to PT Perusahaan Pelayaran Equinox, or Equinox, at a sale price of \$135.0 million resulting in a loss on disposal of \$5.8 million. There was no comparable transaction in 2016.

Impairment of vessel held-for-sale: In April 2015, we acquired the LNG vessel, LNG Abuja, for \$20.0 million. In July 2015, she was sold to a third party for \$19.0 million. Accordingly, for the period ended June 30, 2015, the vessel was classified as held-for-sale and we recognized an impairment loss of \$1.0 million.

Interest income: Interest income decreased by \$2.8 million to \$1.1 million for the six months ended June 30, 2016 compared to \$3.9 million for the same period in 2015. The decrease was primarily due to:

7

the higher interest income recognized in 2015 arising from the \$220 million Eskimo vendor loan provided to Golar Partners in January 2015 to partly finance its acquisition of the Golar Eskimo. The Eskimo vendor loan was repaid in full in November 2015, thus there is no comparable interest income in 2016; and the interest income earned on the loan facilities granted to Equinox in connection with their acquisition of the LNG carrier, Golar Viking, in February 2015. Following the impairment of the loan receivables in the third quarter of 2015, we ceased recognition of interest income. There was no comparable interest income in 2016.

Interest expense: Interest expense decreased by \$15.3 million to \$19.4 million for the six months ended June 30, 2016 compared to \$34.7 million for the same period in 2015 and is primarily due to higher capitalized interest of borrowing costs recognized in 2016 in respect of the Hilli FLNG conversion (see note 2 of our Unaudited Condensed Consolidated Financial Statements contained herein). This is partially offset by (i) higher interest expense arising on the loan facilities of the ICBC Finance Leasing Co. Ltd lessor variable interest entities; and (ii) additional interest on new financing facilities in connection with the Golar Tundra, Golar Seal and Golar Viking.

Other financial items: Other financial items decreased by \$75.2 million to a loss of \$56.4 million for the six months ended June 30, 2016 compared to a gain of \$18.9 million for the same period in 2015. The movement was primarily due to:

Net realized and unrealized (losses) gains on interest rate swap agreements: Net realized and unrealized losses on interest rate swaps increased to a loss of \$35.1 million for the six months ended June 30, 2016 from a loss of \$15.0 million for the same period in 2015, as set forth in the table below:

(in thousands of \$)	Six months ended June 30,			
	2016	2015	Change	% Change
Mark-to-market adjustment for interest rate swap derivatives	(29,390)	(6,598)	(22,792)	345 %
Interest expense on undesignated interest rate swaps	(5,741)	(8,381)	2,640	(31) %
	(35,131)	(14,979)	(20,152)	135 %

As of June 30, 2016, we have an interest rate swap portfolio with a notional amount of \$1.3 billion, none of which are designated as hedges for accounting purposes. The increase in mark-to-market losses from our interest rate swaps is due to the decrease in long-term swap rates for the six months ended June 30, 2016.

Unrealized (losses) gains on total return swap (or equity swap): In December 2014, we established a three month facility for a Stock Indexed Total Return Swap Programme or Equity Swap Line with the DNB Bank ASA in connection with a share buy back scheme. The facility has been subsequently extended to December 2016. The equity swap derivatives mark-to-market adjustment resulted in a net gain of \$3.4 million recognized in the six months ended June 30, 2016 compared to a net gain of \$34.9 million for the same period in 2015.

Impairment loss on loan receivable: Given the announcement of a negative Final Investment Decision from the Douglas Channel Project consortium, we reassessed the recoverability of the loan previously granted by Golar and accrued interest receivables from the Douglas Channel LNG Assets Partnership ("DCLAP") and concluded that DCLAP would not have the means to satisfy its obligations under the loan. Accordingly, during the six months ended June 30, 2016, we recognized an impairment charge of \$7.6 million.

Finance arrangement fees: Finance arrangement fees of \$0.1 million for the six months ended June 30, 2016 are in line with the same period in 2015.

Amortization of deferred financing costs and debt guarantee: The amortization of deferred financing costs of \$15.5 million for the six months ended June 30, 2016 increased by \$15.6 million compared to the same period in 2015. This

is primarily due to (i) the amortization of the deferred financing charges from our consolidated VIEs; (ii) out of period adjustment arising from the amortization of deferred financing costs (see note 2 of our Unaudited Condensed Consolidated Financial Statements contained herein) and (iii) the prior six months ended June 30, 2015 included the release of our debt guarantee provision of \$2.2 million pursuant to the refinancing of certain debt facilities in Golar Partners for which we had previously had provided a guarantee.

Income taxes: Income taxes relate principally to the taxation of U.K. based entities offset by the amortization of the deferred gains on the intra-group transfers on long-term assets resulting in an income tax credit.

Equity in net (losses) earnings of affiliates:

(in thousands of \$)	Six months ended June 30,			% Change
	2016	2015	Change	
		Restated		
Share of net (loss) earnings in Golar Partners	(5,525)	7,514	(13,039)	(174)%
Net gain on disposal of investments in Golar Partners	—	32,580	(32,580)	(100)%
Share of net (loss) earnings in other affiliates	(38)	77	(115)	(149)%
	(5,563)	40,171	(45,734)	(114)%

Our share of net earnings in Golar Partners is partially offset by a charge for the amortization of the basis difference in relation to the gain on loss of control recognized on deconsolidation in 2012.

The decrease of \$13.0 million in our share of net earnings in Golar Partners to a \$5.6 million loss for the six months ended June 30, 2016 compared to a \$7.5 million gain for the same period in 2015 was primarily due to:

- Golar Maria incurred off-hire time together with positioning costs during the first quarter of 2016 in connection with her scheduled drydocking; and
- higher unrealized mark-to-market losses arising on Golar Partners' interest rate swaps; and

The net gain on disposal of investments in Golar Partner of \$32.6 million relates to the disposal of 7.2 million common units in Golar Partners in January 2015.

Net income attributable to Golar LNG Ltd: As a result of the foregoing, we recognized a net loss of \$169.1 million and a net gain of \$49.6 million for the six months ended June 30, 2016 and 2015, respectively.

Net income attributable to non-controlling interests: During 2016, we were party to sale and leaseback arrangements for six vessels (2015: five) with subsidiaries of Chinese financial institutions. Each of these lessor entities are wholly-owned, newly formed special purpose vehicles ("SPVs"). We have determined that the lessor entities, that own the vessels, are variable interest entities. We refer to these as "VIEs" or the "Lessor VIEs". While we do not hold any equity investments in these Lessor VIEs, we are the primary beneficiary. Accordingly, these Lessor VIEs are consolidated into our financial results and thus the equity attributable to the financial institutions in their respective VIEs are included in non-controlling interests in our consolidated results.

LNG trading segment

(in thousands of \$)	Six months ended June 30,			% Change
	2016	2015	Change	
Other operating gains and losses	16	—	16	100 %
Net income	16	—	16	100 %

During the six months ended June 30, 2016, we entered into a Purchase and Sales Agreement to buy and sell LNG cargo. The LNG cargo was acquired from a third party and subsequently sold on a delivered basis to New Fortress Energy in March 2016 when the Golar Arctic was repositioning to Jamaica in preparation for her charter as a floating

storage unit with New Fortress Energy. There was no LNG trading activity for the six months ended June 30, 2015.

9

FLNG segment

	Six months ended June 30,			
(in thousands of \$)	2016	2015	Change	% Change
Administrative expenses	(2,124)	(2,043)	(81)	4 %
Net loss	(2,124)	(2,043)	(81)	4 %

The net loss for FLNG for the six months ended June 30, 2016 and 2015 amounted to \$2.1 million and \$2.0 million, respectively. This relates to FLNG project related expenses comprising of legal, professional and consultancy costs.

FLNG conversion

In September 2014, the Hilli was delivered to Keppel Shipyard Management ("Keppel") in Singapore for commencement of her FLNG conversion. The total estimated conversion, vessel and site commissioning cost for the Hilli, including contingency, is approximately \$1.3 billion.

As of June 30, 2016, the total costs incurred and capitalized in respect of the Hilli conversion amounted to \$619.8 million.

The total estimated conversion, vessel and site commissioning cost for the conversion of the Gimi and the Gandria, including contingency, is approximately \$1.2 billion and \$1.5 billion, respectively. As of June 30, 2016, we have made \$31.0 million of payments relating to long lead items ordered in preparation for the conversion of the Gimi to a FLNG. Conversion of each vessel is pending our issuance of our final notice to proceed with the conversions. The conversion agreements include certain cancellation provisions which, if exercised prior to December 2016, will allow the termination of the contracts and the recovery of previous milestone payments, less a cancellation fee.

Liquidity and Capital Resources

Our short-term liquidity requirements are primarily for the servicing of debt, working capital requirements (which includes our maturing convertible bonds), investments in Golar Power and OneLNG and conversion project related commitments due within the next 12 months. The short-term outlook in the LNG shipping market has improved over the last few months. Whilst certain challenges remain, there are signs of an anticipated recovery with a general improvement in utilization and hire rates being noted in the third quarter which is forecast to continue and we expect to gather momentum during the rest of the year and through to 2017. However, the extent and the pace of the recovery and the impact on the Company's results is unknown. Accordingly, we may require additional working capital for the continued operation of our vessels in the spot market (via the Cool Pool). The need for additional working capital is dependent upon the employment of all the vessels participating in the Cool Pool and fuel costs incurred during idle time. We remain responsible for manning and technical management of our vessels in the Cool Pool. We estimate that total forecast vessel operating expenses relating to our vessels in the Cool Pool (excluding the two vessels that form part of the Golar Power fleet) for the next 12 months is \$38.0 million, based on our historical average operating costs. However, we have no working capital requirements for the Hilli, which is currently undergoing conversion to a FLNG vessel, as progress payments are funded by the GoFLNG Hilli facility, but we do have limited working capital requirements for our four vessels that are currently in lay-up. On September 30, 2016, our project partner on the Hilli FLNG Project received notice from the bank, which issued the letter of credit in accordance with the signed Perenco Tolling Agreement, notifying that the letter of credit is to expire on December 31, 2016. Together with the bank, we are progressing work streams to facilitate re-issuance of the letter of credit prior to its expiry. As of October 17, 2016,

we received a written commitment from the bank allowing re-issuance of the letter of credit subject to certain conditions, in relation to our strategy for refinancing our convertible bonds.

As of the current date, we have a fleet of 15 vessels (including the Golar Grand, which we are obligated to charter back from Golar Partners until October 2017, and the Golar Tundra, which was sold to Golar Partners in May 2016 but by virtue of the put option in sale agreements, we are required to consolidate until the vessel commences operations under the Golar Tundra Time Charter with West Africa Gas Limited. This excludes the two vessels, the Golar Penguin and the Golar Celsius, as they form part of the Golar Power fleet. Of our fleet, one vessel is on a medium-term charter, one vessel has recently completed minor modifications in contemplation of the commencement of a long-term charter, eight vessels are operating in the spot market (via the Cool Pool), one vessel is currently undergoing conversion into a FLNG, and four vessels are in lay-up.

Whilst we completed the dropdown of the Golar Tundra to Golar Partners in May 2016, by virtue of the put option contained within the related sale agreements, we will continue to consolidate the entities that own and lease the Golar Tundra until her charter with WAGL commences. The Golar Tundra arrived in Ghana at the end of May 2016 and tendered its notice of readiness ("NOR") in mid June 2016, with payments under the contract commencing 30 days thereafter. However, as of the current date Golar Partners has been prevented from having Golar Tundra accepted due to delays on the terminal side. In the event delays continue for 120 days after NOR, then the FSRU is deemed accepted by WAGL. In the event WAGL contest their obligations under the charter, the Company has sought and received an opinion which supports its legal position in exercising its rights under the contract. In October 2016, in order to protect its legal position, we commenced arbitration proceedings against WAGL. We have however been informed by WAGL, that they have received Parliamentary approval for its Gas Sales Agreement with the Government of Ghana, the lack of which had been the major impediment to progress of the project

By virtue of the put option in the purchase agreement related to the Golar Tundra with Golar Partners, in the event the WAGL charter does not commence by May 2017, or no satisfactory mitigating arrangement is agreed, Golar Partners may require that Golar repurchase the Golar Tundra for the original purchase price agreed and paid of \$330 million, less the net lease obligations under the lease agreement with CMBL and net working capital adjustments.

As of June 30, 2016, we had cash and cash equivalents (including restricted cash and short-term receivables) of \$541.5 million, of which \$476.8 million is restricted cash and short-term receivable balances. Included within restricted cash is \$280 million in respect of the issuance of the letter of credit to our FLNG project partners, an aggregate of \$98.1 million cash collateral relating to requirements under our total return and interest rate swaps, and the balance which mainly relates to the cash belonging to our Lessor VIEs that we are required to consolidate under U.S. GAAP.

Since June 30, 2016, significant transactions impacting our cash flows include:

Receipts:

the receipt of \$13.2 million in August 2016, in respect of cash distributions for the quarter ended June 30, 2016 from Golar Partners in relation to our interests in its common and general partner units, subordinated units and incentive distribution rights, or IDRs, held at the relevant record date;

after settlement of related transaction fees and Golar's contribution to the working capital of Golar Power, we received \$103 million in July 2016 from the disposal of our 50% interest in Golar Power to Stonepeak. This excludes the cash that will remain within Golar Power, including the proceeds of \$100 million from the issuance of preference shares to Stonepeak. In addition, we received \$15.5 million in September from Golar Power following the release of a restricted cash deposit in connection with Golar Power's assumption of Golar Celsius' associated debt; and

the receipt of \$13.9 million in July 2016 in respect of monies released from cash restricted by the Cameroon FLNG guarantee. Thus after the release, the restricted cash that is remaining to collateralize the Cameroon FLNG guarantee is \$266.1 million;

Payments:

payments for our FLNG conversions are made in installments in accordance with our contract with Keppel. By virtue of the FLNG Hilli pre-delivery facility we executed in September 2015, we are able to time our drawdown on this facility with payments made, resulting in a cash neutral effect. Since July 1, 2016, we have received an additional \$100 million under the FLNG Hilli predelivery facility;

•

the payment of \$4.6 million in cash distributions to our shareholders in July 2016, in respect of the quarter ended March 31, 2016 and a further payment of \$4.7 million in October 2016, in respect of the quarter ended June 30, 2016; and

the payment of \$10.2 million as our initial capital contribution to OneLNG.

In relation to our convertible bonds, which are due to mature in March 2017, we are continuing to progress discussions with various financial institutions to explore our financing options, which may include an extension to the term of the bonds or refinancing the bonds with internal funds or proceeds from new secured credit facilities, debt or equity securities offered in the capital markets, or those of Golar Partners in connection with resetting the Golar Partners incentive distribution rights targets. As of June 30, 2016, the debt outstanding in respect of our convertible bonds was \$246.2 million.

As of June 30, 2016, we had one remaining newbuild contract for the construction of another FSRU with expected delivery in the last quarter of 2017. Consistent with the previous construction agreements with Samsung, the contract features milestone payment schedules with back-ended weighting on the delivery installments. As of June 30, 2016, the outstanding capital commitment in relation to this newbuilding was \$216.6 million. Pursuant to the closing of the Golar Power transaction with Stonepeak in July 2016, this newbuilding contract now forms part of Golar Power's asset base and capital commitments.

To satisfy our anticipated working capital requirements over the next 12 months, we remain in ongoing negotiations with financial institutions for the refinancing one or more of our newbuildings. However, given the challenging market conditions, albeit signs of an anticipated recovery have been observed, timing of these refinancings remains uncertain. While we believe we will be able to obtain the necessary funds from these refinancings, we cannot be certain that the proposed new credit facilities will be executed in time or at all. However, we have a track record of successfully financing and refinancing our vessels, even in the absence of term charter coverage, and our recent success has included the refinancing of the Golar Seal in March 2016, in connection with which we raised an additional \$48.7 million in additional cash. In addition to vessel refinancings, if market and economic conditions are favorable, we may also consider issuance of corporate debt or equity to increase liquidity. Furthermore, in June 2016, we entered into a joint venture agreement with Stonepeak, with respect to the funding of a new entity, Golar Power, under which Stonepeak has provided an initial investment commitment of \$291 million to develop Golar Power. Refer to section entitled "Recent Developments" contained herein for additional details. Upon closing of the transaction in July 2016, after settlement of related transaction fees and our working capital contribution to Golar Power, we received net proceeds of \$103 million⁽¹⁾. This excludes the cash that will remain within Golar Power, including the proceeds of \$100 million from the issuance of preference shares to Stonepeak. Accordingly, this transaction has significantly improved our liquidity position and materially reduced our funding requirements, including our capital commitments relating to our remaining FSRU newbuilding and those of the Sergipe power project in Brazil. In addition, under the Golar Power shareholders agreement, we and Stonepeak will agree to contribute additional funding to Golar Power, on a pro rata basis, including (i) an aggregate of \$150 million in the period through to the second half of 2018; and (ii) additional amounts as may be required by Golar Power, subject to the approval of its board of directors.

Our medium and long-term liquidity requirements are primarily for funding the investments for our conversion projects, and repayment of long-term debt balances. Sources of funding for our medium and long-term liquidity requirements include new loans, refinancing of existing financing arrangements, public and private debt offerings, potential sales of our interests in our vessel owning subsidiaries operating under long-term charters, and potential further sales of our holdings in the common units of Golar Partners, notwithstanding our plan to increase our shareholding⁽²⁾.

In connection with the conversion of the Hilli to a FLNG, we entered into the GoFLNG Hilli facility in September 2015. The GoFLNG Hilli facility is designed to fund up to 80% of the project cost and is split into two phases: a pre-delivery credit facility and post-delivery sale and leaseback financing. The first phase enables us to draw down up to 60% of the construction cost, however not more than \$700 million, from the pre-delivery facility to fund the ongoing conversion. The second phase is triggered upon the delivery of the converted Hilli from Keppel and the satisfaction of certain additional performance milestones, and will allow for the aggregate draw down of up to 80% of the construction cost, however not more than an aggregate of \$960 million. We expect that all remaining conversion and commissioning costs for the Hilli will be satisfied by this debt facility, but additional costs may arise. To date we have drawn down \$250 million under the pre-delivery facility. As of June 30, 2016, the outstanding capital commitments in relation to the Hilli conversion was \$577.7 million

We have also executed FLNG conversion contracts for both the Gimi and the Gandria. Both vessel conversion contracts provide us flexibility wherein certain beneficial cancellation provisions exist which, if exercised prior to December 31, 2016, will allow termination of the contracts and recovery of previous milestone payments, less

cancellation fees. In view of the prevailing uncertainty in the energy markets and the delay in the timing of the final investment decision of Ophir's Fortuna project to the fourth quarter of 2016, we do not intend to accelerate the conversion of either vessel before satisfactory financing and/or firm client contracts are in place.

⁽¹⁾ This includes transaction related fees of \$3.0 million from Magni Partners Limited. This fee represents compensation for salaries and administrative expenses for the Sergipe Project which Magni helped to develop since the beginning of 2015 and also in connection with the development and conclusion of the Stonepeak transaction.

⁽²⁾ In August 2015, the Board approved a unit purchase program under which we may purchase up to \$25 million worth of Golar LNG Partners L.P. outstanding common units over the next 12 months. As of June 30, 2016, we had purchased \$5.0 million worth of Golar LNG Partners L.P. common units.

Borrowing activities

For the three months ended June 30, 2016, we have entered into the following new debt facilities:

Tundra Lessor VIE Debt facilities

In April 2016, to reflect our entry into a long-term charter with WAGL, we drew down an additional \$25.5 million under the sale and leaseback financing facility (originally entered into in November 2015) with a subsidiary of CMBL ("Tundra Lessor VIE"). Tundra Lessor VIE is the legal owner of the Golar Tundra. As described in note 8, "Variable Interest Entities" of our unaudited condensed consolidated financial statements contained herein, Tundra Lessor VIE is determined to be a variable interest entity of which we are deemed to be the primary beneficiary and, as a result, we are required to consolidate the results of Tundra Lessor VIE. Although consolidated into our results, we have no control over the funding arrangements negotiated by Tundra Lessor VIE.

In April 2016, Tundra Lessor VIE refinanced its debt facilities and entered into long-term debt facilities (the "Tundra Lessor VIE Debt facilities"). The Tundra Lessor VIE Debt facilities bear interest at LIBOR plus a margin and are repayable as balloon payments on maturity. However, as of December 31, 2015 and onwards, the Tundra Lessor VIE Debt facilities have been classified within "liabilities held for sale - current" in connection with the disposal of the Golar Tundra to Golar Partners in May 2016. Refer to note 4, "Assets and Liabilities Held-for-sale" of our unaudited condensed consolidated financial statements contained herein.

Hilli Pre-delivery facility

During the three months ended June 30, 2016, we drew down an additional \$50 million under the debt facility such that as of June 30, 2016, the balance outstanding was \$150 million. For additional details on the facility, refer to the 20-F/A for the year ended December 31, 2015.

Security, Debt and Lease Restrictions

Certain of our financing agreements are collateralized by vessel mortgages and, in the case of some debt, pledges of shares by each guarantor subsidiary. In addition, under certain of our financing agreements, we have provided security in the form of general assignments covering insurances and earnings, account charges, charters and related stock pledges. The existing financing agreements impose operating and financing restrictions which may significantly limit or prohibit, among other things, our ability to incur additional indebtedness, create liens, sell capital shares of subsidiaries, make certain investments, engage in mergers and acquisitions, purchase and sell vessels, enter into time or consecutive voyage charters or pay dividends without the consent of the relevant lenders. In addition, lenders may accelerate the maturity of indebtedness under financing agreements and foreclose upon the collateral securing the indebtedness upon the occurrence of certain events of default, including a failure to comply with any of the covenants contained in the financing agreements. Many of our debt agreements contain certain covenants, which require compliance with certain financial ratios. Such ratios include maintaining positive working capital ratio, tangible net worth covenant and minimum free cash restrictions. With regards to cash restrictions, Golar has covenanted to retain at least \$50 million of cash and cash equivalents on a consolidated group basis. In addition, there are cross default provisions in certain of our and Golar Partners' loan and lease agreements.

In addition to mortgage security, we have also pledged 13.0 million of our holdings in the common units of Golar Partners against our convertible bonds.

Cash Flow

(in thousands of \$)	Six Months Ended			% Change
	2016	2015	Change	
Net cash used in operating activities	(59,204)	(76,180)	16,976	(22)%
Net cash used in investing activities	(5,944)	(83,885)	77,941	(93)%
Net cash provided by financing activities	24,633	343,483	(318,850)	(93)%
Net (decrease) increase in cash and cash equivalents	(40,515)	183,418	(223,933)	(122)%
Cash and cash equivalents at beginning of period	105,235	191,410	(86,175)	(45)%
Cash and cash equivalents at end of period	64,720	374,828	(310,108)	(83)%

Net cash used in operating activities was \$59.2 million for the six months ended June 30, 2016, compared to \$76.2 million for the same period in 2015, representing an improvement of \$17.0 million. The decrease in cash utilized in operating activities in 2016 was primarily due to no drydocking costs and improvement on the general timing of working capital in the six months ended June 30, 2016.

Net cash used in investing activities of \$5.9 million for the six months ended June 30, 2016 arose mainly due to:

13

• installment payments of \$19.2 million in respect of our newbuilding commitment for the construction of a FSRU;
• milestone payments of \$74.3 million in respect of the conversion of the Hilli to a FLNG;
• additions to vessels and equipment of \$13.3 million; and
• net cash outflows of \$5.4 million from restricted cash primarily due to the increase in cash collateral requirements provided against our total return equity swap.

This was partially offset by purchase consideration received of \$107.2 million from Golar Partners in respect of the sale of the Golar Tundra in May 2016.

Net cash used in investing activities of \$83.9 million for the six months ended June 30, 2015 arose mainly due to:

• installment payments in respect of our newbuilds of \$392.4 million, following the delivery of three newbuilds;
• milestone payments of \$64.5 million relating to the conversion of the Hilli to a FLNG; and
• payment of \$20 million relating to the acquisition of LNG Abuja.

This was partially offset by:

• consideration of \$126.9 million received from Golar Partners in respect of the sale of the Golar Eskimo in January 2015;
• net proceeds from the sale of 7,170,000 common units held in Golar Partners of \$207.4 million;
• receipt of \$20.0 million from Golar Partners in respect of settlement of the short-term revolving credit facility previously granted to them; and
• net cash inflows of \$39.1 million from restricted cash primarily due to the decrease in cash collateral requirements provided against our total return equity swap.

Net cash provided by financing activities is principally generated from funds from new debt, debt refinancings, debt repayments and cash dividends. Net cash provided by financing activities was \$24.6 million for the six months ended June 30, 2016 and arose primarily due to proceeds from short-term and long-term debts, including:

• \$100 million further drawdown on the GoFLNG Hilli facility in relation to the conversion of the Hilli to a FLNG; and an additional \$205.8 million of debt proceeds which refers to amounts drawn down by our lessor VIEs under their respective loan arrangements (see note 8, "Variable Interest Entities" of our unaudited condensed consolidated financial statements contained herein), in connection with our refinancing of the Golar Seal debt facility amounting to \$162.4 million, the releveraging of the Golar Tundra lease by \$25.5 million and the balance of \$17.9 million relating to short-term debt proceeds arising in the ICBCL lessor VIEs.

This was partially offset by:

• loan repayments of \$164.4 million, which includes the settlement of the balance outstanding on the refinanced Golar Seal facility of \$106.6 million in March 2016;
• payment of dividends of \$45.1 million;
• net cash outflows of \$59.1 million relating to restricted cash balances held by our lessor VIEs as well as the cash collateral requirements with respect to the Golar Celsius and Golar Crystal financing arrangements; and
• purchases of our common shares (treasury shares) in the Company amounting to an aggregate cost of \$8.2 million.

Net cash provided by financing activities for the six months ended June 30, 2015 of \$343.5 million arose primarily due to:

•

aggregate proceeds of \$552.6 million drawn down by our lessor VIEs under their respective loan arrangements in connection with our ICBC financing lease arrangements to finance the final installments of our newbuilds, namely the Golar Kelvin, Golar Snow and Golar Ice, less the payment of \$10.9 million of related financing costs; and \$4.5 million cash call proceeds from Keppel in respect of the conversion of the Hilli to a FLNG.

This was partially offset by:

- loan repayments of \$121.7 million, of which \$82.0 million related to the settlement of the Viking facility in preparation for the sale of the vessel in February 2015 to Equinox; and
- payment of dividends of \$80.9 million.

Non-GAAP measures

Time Charter Equivalent

The average time charter equivalent, or TCE, rate of our fleet is a measure of the average daily revenue performance of a vessel. For time charters, this is calculated by dividing total operating revenues (including revenue from The Cool Pool but excluding vessel and other management fee), less any voyage expenses, by the number of calendar days minus days for scheduled off-hire. Under a time charter, the charterer pays substantially all of the vessel voyage related expenses. However, we may incur voyage related expenses when positioning or repositioning vessels before or after the period of a time charter, during periods of commercial waiting time or while off-hire during drydocking. TCE rate is a standard shipping industry performance measure used primarily to compare period-to-period changes in an entity's performance despite changes in the mix of charter types (i.e. spot charters, time charters and bareboat charters) under which the vessels may be employed between the periods. We include average daily TCE, a non-GAAP measure, as we believe it provides additional meaningful information in conjunction with total operating revenues, the most directly comparable GAAP measure, because it assists our management in making decisions regarding the deployment and use of its vessels and in evaluating their financial performance. Our calculation of TCE may not be comparable to that reported by other entities. The following table reconciles our total operating revenues to average daily TCE:

	Six months ended June 30,	
(in thousands of \$ except number of days and average daily TCE)	2016	2015
Operating revenues	34,927	52,302
Less: Vessel and other management fee	(4,769)	(6,545)
Time and voyage charter revenues ⁽¹⁾	30,158	45,757
Voyage expenses ^{(1) (3)}	(11,750)	(12,892)
	18,408	32,865
Calendar days less scheduled off-hire days ⁽²⁾	2,149	2,229
Average daily TCE (to the closest \$100)	8,600	14,700

⁽¹⁾ This includes revenue and voyage expenses from the collaborative arrangement in respect of the Cool Pool amounting to \$5.9 million and \$2.8 million, respectively, for the six months ended June 30, 2016.

⁽²⁾ This excludes days when vessels are in lay-up, undergoing dry dock or undergoing conversion.

⁽³⁾ The TCE calculation excludes charterhire expenses for the six months ended June 30, 2016 and 2015, which arose on the charter-back of the Golar Grand and the Golar Eskimo from Golar Partners. We updated the previously reported TCE for the six months ended June 30, 2015, to align with this calculation.

⁽¹⁾ Contributed Surplus is 'capital' that can be returned to shareholders without the need to reduce share capital, thereby giving Golar greater flexibility when it comes to declaring dividends.

The accompanying notes are an integral part of these unaudited condensed consolidated financial statements.

GOLAR LNG LIMITED

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. GENERAL

Golar LNG Limited (the "Company" or "Golar") was incorporated in Hamilton, Bermuda on May 10, 2001 for the purpose of acquiring the liquefied natural gas ("LNG") shipping interests of Osprey Maritime Limited ("Osprey"), which was owned by World Shipholding Limited ("World Shipholding").

As of June 30, 2016, our fleet comprises of 16 LNG carriers (including the Golar Grand, which we have chartered back from Golar Partners until October 2017, and the Golar Tundra, which we sold to Golar Partners in May 2016 but we are required to consolidate until she commences service under the WAGL charter) and one Floating Storage Regasification Unit ("FSRU"). We also operate, under management agreements, Golar LNG Partners LP's ("Golar Partners" or the "Partnership") fleet of three LNG carriers (excluding the Golar Grand) and six FSRUs. Collectively with Golar Partners, our combined fleet is comprised of nineteen LNG carriers and seven FSRUs. In addition, we have one newbuilding commitment for the construction of a FSRU which is expected to be delivered in the last quarter of 2017.

In July 2014, we ordered our first Floating Liquefaction Natural Gas Vessel ("FLNG") based on the conversion of our existing LNG carrier, the Hilli. The Hilli is currently undergoing its FLNG conversion with an expected completion and redelivery date in 2017. We signed agreements for the conversion of the LNG carriers the Gimi and the Gandria to FLNGs in December 2014 and July 2015, respectively. However, we are yet to lodge our final notices to proceed on either of these vessels.

As used herein and unless otherwise required by the context, the terms "Golar", the "Company", "we", "our" and words of similar import refer to Golar or anyone or more of its consolidated subsidiaries, or to all such entities.

Going concern

The condensed consolidated financial statements have been prepared on a going concern basis. Our convertible bonds are due to mature in March 2017. As of June 30, 2016, the debt outstanding in respect of our convertible bonds was \$246.2 million. Accordingly, we are continuing to progress discussions with various financial institutions to explore our financing options, which may include an extension to the term of the bonds or refinancing the bonds with internal funds or proceeds from new secured credit facilities, debt or equity securities offered in the capital markets or those of Golar Partners in connection with the resetting of the Golar Partners incentive distribution rights targets. On September 30, 2016, our project partner on the Hilli FLNG Project received notice from the bank, which issued the letter of credit in accordance with the signed Perenco Tolling Agreement, notifying that the letter of credit is to expire on December 31, 2016. Together with the bank, we are progressing work streams to facilitate re-issuance of the letter of credit prior to its expiry. As of October 17, 2016, we received a written commitment from the bank allowing re-issuance of the letter of credit subject to certain conditions, in relation to our strategy for refinancing our convertible bonds.

In addition, to address our anticipated working capital requirements over the next 12 months, we remain in ongoing negotiations with financial institutions for the refinancing of one or more of our newbuildings. However, given the challenging market conditions, albeit signs of an anticipated recovery have been observed, timing remains uncertain. While we believe we will be able to obtain the necessary funds from these refinancings, we cannot be certain that the proposed new credit facilities will be executed in time or at all. In addition to these vessel refinancings, if market and economic conditions are favorable, we may also consider issuance of corporate debt or equity to increase liquidity. Furthermore, in June 2016, we entered into a joint venture agreement with Stonepeak, with respect to the funding of a

new entity, Golar Power, under which Stonepeak has provided an initial investment commitment of \$291 million to develop Golar Power. Refer to note 18 for additional detail. The transaction closed on July 6, 2016.

Upon closing of the transaction in July 2016, after settlement of related transaction fees and our working capital contribution to Golar Power, we received net proceeds of \$103 million. This excludes the cash that will remain within Golar Power. Accordingly, this transaction has significantly improved our liquidity position and materially reduced our funding requirements, including our capital commitments relating to our remaining FSRU newbuilding and those of the Sergipe power project in Brazil. In addition, we and Stonepeak will be committed to provide additional aggregate funding of \$150 million, on a pro rata basis, in the period through to the second half of 2018 as well as additional amounts as may be required by Golar Power, subject to the approval of its board of directors.

Restatement of comparative period for the six months ended June 30, 2015

As further described in note 35 to the consolidated financial statements in our recently filed annual report on form 20-F/A for the year ended December 31, 2015, as filed on November 10, 2016, we restated our consolidated financial statements to account for the various investments in Golar Partners since the deconsolidation date of December 13, 2012, as equity accounted for investments. The change in accounting for our investment in Golar Partners does not affect the market value of our investment, our cash flows, our covenant compliance or our liquidity. Accordingly, the comparative for the six month period ended June 30, 2015, has also been restated within these interim financial statements.

These interim financial statements should be read in conjunction with the company's restated audited financial statements for the year ended December 31, 2015 included in the Form 20-F/A.

2. ACCOUNTING POLICIES

Basis of accounting

The condensed consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States. The condensed consolidated financial statements do not include all of the disclosures required in the annual consolidated financial statements, and should be read in conjunction with our annual financial statements for the year ended December 31, 2015.

The six months ended June 30, 2016 includes out of period corrections of (i) \$13.2 million for capitalized borrowing costs resulting in a reduction to "Interest expense" (vessel operations segment) in the consolidated statements of income and an increase to "Asset under development" (FLNG segment) of \$13.2 million in the consolidated balance sheet (ii) \$5.8 million pertaining to the amortization of deferred financing costs, resulting in an increase to "Other financial items, net" in the consolidated statements of income and an increase in "Long-term debt" in the consolidated balance sheet. Management believes these out of period corrections are not material to the current period condensed consolidated financial statements or any previously issued financial statements and are not expected to be material to the annual consolidated financial statements for the year ending December 31, 2016.

Significant accounting policies

The accounting policies adopted in the preparation of the condensed consolidated financial statements for the six months ended June 30, 2016 are consistent with those followed in the preparation of our audited consolidated financial statements for the year ended December 31, 2015.

Use of estimates

The preparation of financial statements in accordance with the United States Generally Accepted Accounting Principles ("US GAAP") requires that management make estimates and assumptions affecting the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Receivables, including loans and accounts receivables, are recorded in the balance sheet at their nominal amount less an allowance for doubtful accounts. We establish reserves for doubtful accounts on a case-by-case basis when it is unlikely that required payments of specific amounts will occur. In establishing these reserves, we consider the financial condition of the customer/borrower as well as specific circumstances related to the receivable such as customer disputes. Receivable amounts determined as being irrecoverable are written off.

As of June 30, 2016, we leased six vessels under finance leases from wholly owned special purpose vehicles (“lessor SPVs”) of financial institutions in connection with our sale and leaseback transactions. While we do not hold any equity investments in these lessor SPVs, we have determined that we are the primary beneficiary of these entities and accordingly, we are required to consolidate these VIEs into our financial results. The key line items impacted by our consolidation of these VIEs are short-term and long-term debt, restricted cash, short-term receivable, interest expense and assets (liabilities) held-for-sale. In consolidating these lessor VIEs, on a quarterly basis, we must make assumptions regarding (i) the debt amortization profile; (ii) the interest rate to be applied against the VIEs’ debt principal; and (iii) the VIE’s application of cash receipts. Our estimates are therefore dependent upon the timeliness of receipt and accuracy of financial information provided by these lessor VIE entities. Upon receipt of the audited annual financial statements of the lessor VIEs, we will make a true-up adjustment for any material differences.

3. RECENTLY ISSUED ACCOUNTING STANDARDS

Adoption of new accounting standards

We historically presented deferred debt issuance costs, or fees related to directly issuing debt, as long-term assets on the consolidated balance sheets. During the first quarter of 2016, we adopted guidance codified in ASU 2015-03 “Interest — Imputation of Interest (Subtopic 835-30), Simplifying the Presentation of Debt Issuance Costs”. The guidance simplifies the presentation of debt issuance costs by requiring debt issuance costs to be presented as a deduction from the corresponding liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs is not affected. We adopted the requirements of ASU 2015-03 effective beginning the first quarter ended March 31, 2016 and applied this guidance retrospectively to all prior periods presented in the Company’s financial statements.

The reclassification does not impact net income as previously reported or any prior amounts reported on the Statements of Operations or the Consolidated Statements of Cash Flows.

Accounting pronouncements to be adopted

In March 2016, the FASB issued amendments to ASC 718 changing how entities account for certain aspects of share-based payments to employees. This is effective for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2016. Specifically, the amendments:

- require entities to recognize the income tax effects of awards in the income statement when the awards vest or are settled ;
- Excess tax benefits should be classified along with other income tax cash flows as an operating activity; and
- An entity can make an entity-wide accounting policy election to either estimate the number of awards that are expected to vest (as per current GAAP) or account for forfeitures when they occur.

We are assessing what impact, if any, the adoption of this guidance will have on our consolidated financial position, results of operations and cash flows.

In January 2016, the FASB issued amendments to ASC 825, addressing certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. This is effective for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2017. Specifically, the amendments:

- Require equity investments (except those accounted for under the equity method of accounting or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income. However, an entity may choose to measure equity investments that do not have readily determinable fair values at cost minus impairment, if any, plus or minus changes resulting from observable price changes in orderly transactions for the identical or a similar investment of the same issuer.
- Simplify the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment. When a qualitative assessment indicates that impairment exists, an entity is required to measure the investment at fair value.
- Eliminate the requirement to disclose the fair value of financial instruments measured at amortized cost for entities that are not public business entities.
- Eliminate the requirement for public business entities to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet.
-

Require public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes.

Require an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments.

Require separate presentation of financial assets and financial liabilities by measurement category and form of financial asset (that is, securities or loans and receivables) on the balance sheet or the accompanying notes to the financial statements.

Clarify that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale securities in combination with the entity's other deferred tax assets.

We are assessing what impact, if any, the adoption of this guidance will have on our consolidated financial position, results of operations and cash flows.

Any other accounting pronouncements yet to be adopted by us are consistent with those disclosed in our audited consolidated financial statements for the year ended December 31, 2015.

4. ASSETS AND LIABILITIES HELD-FOR-SALE

In February 2016, we entered into an agreement to sell our interests in the companies that own and lease the FSRU the Golar Tundra to Golar Partners. The assets and liabilities held within our consolidated balance sheet that are related to this disposal group have been reclassified as held-for-sale and depreciation has ceased for this vessel. The sale of the Golar Tundra was completed in May 2016. Until the Golar Tundra commences operations and the arrangements between Golar Partners expires (including Golar Partners' right to require that the Company repurchase the shares of Tundra Corp, the disponent owner and operator of the Golar Tundra), the Company will continue to consolidate Tundra Corp. Accordingly, during this time, the earnings and net assets of Tundra Corp will c
