Form 10-Q
April 23, 2014

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q
(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2014

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the transition period from _____ to _____
Commission file number 1-442

THE BOEING COMPANY

(Exact name of registrant as specified in its charter)

Delaware

91-0425694

(State or other jurisdiction of
incorporation or organization)

(I.R.S. Employer Identification No.)

100 N. Riverside Plaza, Chicago, IL
(Address of principal executive offices)

60606-1596
(Zip Code)

(312) 544-2000

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of April 16, 2014, there were 729,224,508 shares of common stock, \$5.00 par value, issued and outstanding.

The Boeing Company and Subsidiaries

Notes to the Condensed Consolidated Financial Statements

(Dollars in millions, except per share data)

(Unaudited)

Note 1 – Basis of Presentation

The condensed consolidated interim financial statements included in this report have been prepared by management of The Boeing Company (herein referred to as “Boeing”, the “Company”, “we”, “us”, or “our”). In the opinion of management, all adjustments (consisting of normal recurring accruals) necessary for a fair presentation are reflected in the interim financial statements. The results of operations for the period ended March 31, 2014 are not necessarily indicative of the operating results for the full year. The interim financial statements should be read in conjunction with the audited Consolidated Financial Statements, including the notes thereto, included in our 2013 Annual Report on Form 10-K. Effective during the first quarter of 2014, certain programs previously reported in the Boeing Military Aircraft (BMA) segment were realigned to the Global Services & Support (GS&S) segment. See Note 17. Business segment data for 2013 have been adjusted to reflect the realignment.

Use of Estimates

Management makes assumptions and estimates to prepare financial statements in conformity with accounting principles generally accepted in the United States of America. Those assumptions and estimates directly affect the amounts reported in the Condensed Consolidated Financial Statements. Significant estimates for which changes in the near term are considered reasonably possible and that may have a material impact on the financial statements are disclosed in these Notes to the Condensed Consolidated Financial Statements.

Contract accounting is used for development and production activities predominantly by Defense, Space & Security (BDS). Contract accounting involves a judgmental process of estimating total sales and costs for each contract resulting in the development of estimated cost of sales percentages. Changes in estimated revenues, cost of sales and the related effect on operating income are recognized using a cumulative catch-up adjustment which recognizes in the current period the cumulative effect of the changes on current and prior periods based on a contract’s percent complete. For the three months ended March 31, 2014 and 2013, net favorable cumulative catch-up adjustments, including reach-forward losses, across all BDS contracts increased Earnings from operations by \$167 and \$105 and diluted earnings per share by \$0.15 and \$0.11.

Note 2 – Earnings Per Share

Basic and diluted earnings per share are computed using the two-class method, which is an earnings allocation method that determines earnings per share for common shares and participating securities. The undistributed earnings are allocated between common shares and participating securities as if all earnings had been distributed during the period. Participating securities and common shares have equal rights to undistributed earnings.

Basic earnings per share is calculated by taking net earnings, less earnings available to participating securities, divided by the basic weighted average common shares outstanding.

Diluted earnings per share is calculated by taking net earnings, less earnings available to participating securities, divided by the diluted weighted average common shares outstanding.

Table of Contents

The elements used in the computation of basic and diluted earnings per share were as follows:

(In millions - except per share amounts)	Three months ended March 31	
	2014	2013
Net earnings	\$965	\$1,106
Less: earnings available to participating securities	2	3
Net earnings available to common shareholders	\$963	\$1,103
Basic		
Basic weighted average shares outstanding	745.0	763.3
Less: participating securities	1.6	2.1
Basic weighted average common shares outstanding	743.4	761.2
Diluted		
Basic weighted average shares outstanding	745.0	763.3
Dilutive potential common shares ⁽¹⁾	9.1	5.4
Diluted weighted average shares outstanding	754.1	768.7
Less: participating securities	1.6	2.1
Diluted weighted average common shares outstanding	752.5	766.6
Net earnings per share:		
Basic	\$1.30	\$1.45
Diluted	1.28	1.44

(1) Diluted EPS includes any dilutive impact of stock options, restricted stock units, performance-based restricted stock units and performance awards.

The following table includes the number of shares that may be dilutive potential common shares in the future. These shares were not included in the computation of diluted earnings per share because the effect was either antidilutive or the performance condition was not met.

(Shares in millions)	Three months ended March 31	
	2014	2013
Stock options		19.1
Performance awards	6.1	5.8
Performance-based restricted stock units	1.3	

Note 3 – Income Taxes

Our effective income tax rates were 33.9% and 23.1% for the three months ended March 31, 2014 and 2013. The effective tax rate for the first quarter of 2014 is higher than the comparable prior year period primarily due to the U.S. research and development tax credit (research tax credit). The research tax credit was effective for 2013, but due to the expiration at the end of 2013, no tax benefit is recorded in 2014. Furthermore, in the first quarter of 2013, Congress retroactively reinstated the research tax credit for 2012, which reduced income tax expense by \$145. If Congress extends the research tax credit there will be a favorable impact on our 2014 effective income tax rate.

Table of Contents

Federal income tax audits have been settled for all years prior to 2007, as of March 31, 2014. On April 8, 2014, the Joint Committee on Taxation completed its review of the 2007-2008 tax years and as a result, a tax benefit of approximately \$115 will be recorded in the second quarter of 2014. The years 2009-2010 are currently being examined by the Internal Revenue Service (IRS). We are also subject to examination in major state and international jurisdictions for the 2001-2013 tax years. We believe appropriate provisions for all outstanding tax issues have been made for all jurisdictions and all open years.

Audit outcomes and the timing of audit settlements are subject to significant uncertainty. It is reasonably possible that within the next 12 months we will resolve the matters presently under consideration for the 2009-2010 tax years with the IRS. Depending on the timing and outcome of the audit settlement, unrecognized tax benefits that affect the effective tax rate could increase earnings by up to \$130 based on current estimates.

Note 4 – Accounts Receivable

Accounts receivable as of March 31, 2014, includes \$112 of unbillable receivables on a long-term contract with LightSquared, LLC (LightSquared) related to the construction of two commercial satellites. One of the satellites has been delivered, and the other is substantially complete but remains in Boeing's possession. On May 14, 2012, LightSquared filed for Chapter 11 bankruptcy protection. We believe that our rights in the second satellite and related ground-segment assets are sufficient to protect the value of our receivables in the event LightSquared fails to make payments as contractually required or rejects its contract with us. Given the uncertainties inherent in bankruptcy proceedings, it is reasonably possible that we could incur losses related to these receivables in connection with the LightSquared bankruptcy.

Note 5 – Inventories

Inventories consisted of the following:

	March 31 2014	December 31 2013
Long-term contracts in progress	\$13,257	\$12,608
Commercial aircraft programs	51,789	48,065
Commercial spare parts, used aircraft, general stock materials and other	7,641	7,793
Inventory before advances and progress billings	72,687	68,466
Less advances and progress billings	(27,746) (25,554
Total	\$44,941	\$42,912

Long-Term Contracts in Progress

Long-term contracts in progress includes Delta launch program inventory that is being sold at cost to United Launch Alliance (ULA) under an inventory supply agreement that terminates on March 31, 2021. At March 31, 2014 and December 31, 2013, the inventory balance, net of advances, was \$350 and \$425. At March 31, 2014, \$333 of this inventory related to unsold launches. See Note 10.

Capitalized precontract costs of \$826 and \$520 at March 31, 2014 and December 31, 2013, are included in inventories.

Table of Contents

Commercial Aircraft Programs

At March 31, 2014 and December 31, 2013, commercial aircraft programs inventory included the following amounts related to the 787 program: \$30,246 and \$27,576 of work in process (including deferred production costs of \$23,123 and \$21,620), \$2,303 and \$2,189 of supplier advances, and \$3,453 and \$3,377 of unamortized tooling and other non-recurring costs. At March 31, 2014, \$17,838 of 787 deferred production costs, unamortized tooling and other non-recurring costs are expected to be recovered from units included in the program accounting quantity that have firm orders and \$8,737 is expected to be recovered from units included in the program accounting quantity that represent expected future orders.

At March 31, 2014 and December 31, 2013, commercial aircraft programs inventory included the following amounts related to the 747 program: \$1,649 and \$1,554 of deferred production costs, net of previously recorded reach-forward losses, and \$552 and \$563 of unamortized tooling costs. At March 31, 2014, \$1,189 of 747 deferred production costs and unamortized tooling are expected to be recovered from units included in the program accounting quantity that have firm orders and \$1,012 is expected to be recovered from units included in the program accounting quantity that represent expected future orders.

Commercial aircraft programs inventory included amounts credited in cash or other consideration (early issue sales consideration) to airline customers totaling \$3,433 and \$3,465 at March 31, 2014 and December 31, 2013.

Note 6 – Customer Financing

Customer financing primarily relates to the Boeing Capital (BCC) segment and consisted of the following:

	March 31 2014	December 31 2013
Financing receivables:		
Investment in sales-type/finance leases	\$1,655	\$1,699
Notes	482	587
Operating lease equipment, at cost, less accumulated depreciation of \$559 and \$564	1,425	1,734
Gross customer financing	3,562	4,020
Less allowance for losses on receivables	(26) (49
Total	\$3,536	\$3,971

We determine a receivable is impaired when, based on current information and events, it is probable that we will be unable to collect amounts due according to the original contractual terms. At March 31, 2014 and December 31, 2013, we individually evaluated for impairment customer financing receivables of \$97 and \$95 and determined that none of these were impaired. We recorded no allowance for losses on these receivables as the collateral values exceed the carrying values of the receivables.

The adequacy of the allowance for losses is assessed quarterly. Three primary factors influencing the level of our allowance for losses on customer financing receivables are customer credit ratings, default rates and collateral values. We assign internal credit ratings for all customers and determine the creditworthiness of each customer based upon publicly available information and information obtained directly from our customers. Our rating categories are comparable to those used by the major credit rating agencies.

Table of Contents

Our financing receivable balances by internal credit rating category are shown below.

Rating categories	March 31 2014	December 31 2013
BBB	\$1,065	\$1,091
BB	50	58
B	727	585
CCC	198	457
Other	97	95
Total carrying value of financing receivables	\$2,137	\$2,286

At March 31, 2014, our allowance related to receivables with ratings of B and BBB to which we applied default rates that averaged 18% and 2% to the exposure associated with those receivables.

Customer Financing Exposure

Customer financing is collateralized by security in the related asset. The value of the collateral is closely tied to commercial airline performance and overall market conditions and may be subject to reduced valuation with market decline. Declines in collateral values are also a significant driver of our allowance for losses. Generally, out-of-production aircraft have experienced greater collateral value declines than in-production aircraft. Our customer financing portfolio is primarily collateralized by out-of-production aircraft. The majority of customer financing carrying values are concentrated in the following aircraft models:

	March 31 2014	December 31 2013
717 Aircraft (\$438 and \$444 accounted for as operating leases) ⁽¹⁾	\$1,647	\$1,674
757 Aircraft (\$396 and \$402 accounted for as operating leases) ⁽¹⁾	436	453
MD-80 Aircraft (Accounted for as sales-type finance leases) ⁽¹⁾	403	411
MD-11 Aircraft (Accounted for as operating leases) ⁽¹⁾	212	220
767 Aircraft (\$54 and \$60 accounted for as operating leases)	206	207
737 Aircraft (\$133 and \$138 accounted for as operating leases)	202	210
747 Aircraft (\$177 and \$183 accounted for as operating leases)	177	286
787 Aircraft (Accounted for as operating leases)		273

⁽¹⁾ Out-of-production aircraft.

Table of Contents

Note 7 – Investments

Our investments, which are recorded in Short-term and other investments or Investments, consisted of the following:

	March 31 2014	December 31 2013
Time deposits	5,205	\$6,090
Pledged money market funds ⁽¹⁾	46	46
Available-for-sale investments	11	8
Equity method investments ⁽²⁾	1,165	1,164
Restricted cash ⁽³⁾	30	33
Other investments	33	33
Total	\$6,490	\$7,374

⁽¹⁾ Reflects amounts pledged in lieu of letters of credit as collateral in support of our workers' compensation programs. These funds can become available within 30 days notice upon issuance of letters of credit.

⁽²⁾ Dividends received were \$59 and \$50 during the three months ended March 31, 2014 and 2013.

⁽³⁾ Restricted to pay certain claims related to workers' compensation and life insurance premiums for certain employees.

Note 8 – Other Assets

Sea Launch

At March 31, 2014 and December 31, 2013, Other assets included \$356 of receivables related to our former investment in the Sea Launch venture which became payable by certain Sea Launch partners following Sea Launch's bankruptcy filing in June 2009. The \$356 includes \$147 related to a payment made by us under a bank guarantee on behalf of Sea Launch and \$209 related to loans (partner loans) we made to Sea Launch. The net amounts owed to Boeing by each of the partners are as follows: S.P. Koroley Rocket and Space Corporation Energia of Russia – \$223, PO Yuzhnoye Mashinostroitelny Zavod of Ukraine – \$89 and KB Yuzhnoye of Ukraine – \$44.

Although each partner is contractually obligated to reimburse us for its share of the bank guarantee, the Russian and Ukrainian partners have raised defenses to enforcement and contested our claims. On October 19, 2009, we filed a Notice of Arbitration with the Stockholm Chamber of Commerce seeking reimbursement from the other Sea Launch partners of the \$147 bank guarantee payment. On October 7, 2010, the arbitrator ruled that the Stockholm Chamber of Commerce lacked jurisdiction to hear the matter but did not resolve the merits of our claim. We filed a notice appealing the arbitrator's ruling on January 11, 2011. On April 11, 2014, the appellate court entered a ruling that the decision of the arbitrator is not appealable. We intend to appeal the appellate court's ruling with the Supreme Court of Sweden. On February 1, 2013, we filed an action in the United States District Court for the Central District of California seeking reimbursement from the other Sea Launch partners of the \$147 bank guarantee payment and the \$209 partner loan obligations. A trial in the United States District Court for the Central District of California is scheduled to commence January 26, 2015. We believe the partners have the financial wherewithal to pay and intend to pursue vigorously all of our rights and remedies. In the event we are unable to secure reimbursement of \$147 related to our payment under the bank guarantee and \$209 related to partner loans made to Sea Launch, we could incur additional pre-tax charges of up to \$356. Our current assessment as to the collectability of these receivables takes into account the recent political unrest involving Russia and Ukraine, although we will continue to monitor the situation.

Table of Contents

Note 9 – Commitments and Contingencies

Environmental

The following table summarizes environmental remediation activity during the three months ended March 31, 2014 and 2013.

	2014	2013
Beginning balance – January 1	\$649	\$710
Reductions for payments made	(19) (8
Changes in estimates	16	5
Ending balance – March 31	\$646	\$707

The liabilities recorded represent our best estimate or the low end of a range of reasonably possible costs expected to be incurred to remediate sites, including operation and maintenance over periods of up to 30 years. It is reasonably possible that we may incur charges that exceed these recorded amounts because of regulatory agency orders and directives, changes in laws and/or regulations, higher than expected costs and/or the discovery of new or additional contamination. As part of our estimating process, we develop a range of reasonably possible alternate scenarios which include the high end of a range of reasonably possible cost estimates for all remediation sites for which we have sufficient information based on our experience and existing laws and regulations. There are some potential remediation obligations where the costs of remediation cannot be reasonably estimated. At March 31, 2014 and December 31, 2013, the high end of the estimated range of reasonably possible remediation costs exceeded our recorded liabilities by \$923 and \$928.

Product Warranties

The following table summarizes product warranty activity recorded during the three months ended March 31, 2014 and 2013.

	2014	2013
Beginning balance – January 1	\$1,570	\$1,572
Additions for current year deliveries	138	63
Reductions for payments made	(106) (129
Changes in estimates	47	1
Ending balance - March 31	\$1,649	\$1,507

Commercial Aircraft Commitments

In conjunction with signing definitive agreements for the sale of new aircraft (Sale Aircraft), we have entered into trade-in commitments with certain customers that give them the right to trade in used aircraft at a specified price upon the purchase of Sale Aircraft. The probability that trade-in commitments will be exercised is determined by using both quantitative information from valuation sources and qualitative information from other sources. The probability of exercise is assessed quarterly, or as events trigger a change, and takes into consideration the current economic and airline industry environments. Trade-in commitments, which can be terminated by mutual consent with the customer, may be exercised only during the period specified in the agreement, and require advance notice by the customer. Trade-in commitment agreements at March 31, 2014 have expiration dates from 2014 through 2023. At March 31, 2014, and December 31, 2013 total contractual trade-in commitments were \$1,862 and \$1,605. As of March 31, 2014 and December 31, 2013, we estimated that it was probable we would be obligated to perform on certain of these commitments with net amounts payable to customers totaling \$477 and \$325 and the fair value of the related trade-in aircraft was \$477 and \$325.

Table of Contents

Financing Commitments

Financing commitments related to aircraft on order, including options and those proposed in sales campaigns, totaled \$17,599 and \$17,987 as of March 31, 2014 and December 31, 2013. The estimated earliest potential funding dates for these commitments as of March 31, 2014 are as follows:

	Total
April through December 2014	\$1,655
2015	3,314
2016	3,526
2017	3,235
2018	1,643
Thereafter	4,226
	\$17,599

As of March 31, 2014, all of these financing commitments related to customers we believe have less than investment-grade credit. We have concluded that no reserve for future potential losses is required for these financing commitments based upon the terms, such as collateralization and interest rates, under which funding would be provided.

Standby Letters of Credit and Surety Bonds

We have entered into standby letters of credit and surety bonds with financial institutions primarily relating to the guarantee of our future performance on certain contracts. Contingent liabilities on outstanding letters of credit agreements and surety bonds aggregated approximately \$4,310 and \$4,376 as of March 31, 2014 and December 31, 2013.

Commitments to ULA

We and Lockheed Martin Corporation have each committed to provide ULA with up to \$527 of additional capital contributions in the event ULA does not have sufficient funds to make a required payment to us under an inventory supply agreement. See Note 5.

C-17

In September 2013, we decided to end production of C-17 aircraft in 2015. In April 2014, we announced that we anticipate ending production approximately three months earlier based on our decision to produce three fewer aircraft in 2015 than previously planned. As a result, during the three months ended March 31, 2014, BDS recorded \$48 to write off inventory and accrue termination liabilities to suppliers. At March 31, 2014, our backlog included 3 international orders for C-17 aircraft that are scheduled for delivery through mid-2014 and we have active sales campaigns for the remaining 11 unsold aircraft that we plan to produce. We are currently incurring costs and have made commitments to suppliers related to the unsold aircraft. We believe it is probable that we will recover costs related to the unsold aircraft from international customer orders. Should orders for the 11 unsold aircraft not materialize or should we decide to discontinue production of unsold aircraft, we could incur further charges to write-down inventory and/or record termination liabilities. At March 31, 2014, we had approximately \$705 of capitalized precontract costs and \$725 of potential termination liabilities to suppliers associated with the unsold aircraft.

Table of Contents

F/A-18

At March 31, 2014, our backlog included 57 F/A-18 aircraft currently under contract with the U.S. Navy. In addition, the Fiscal Year 2013 and 2014 budgets include funding for an additional 44 aircraft. The President's Fiscal Year 2015 budget request submitted in March 2014 did not include funding for additional F/A-18 aircraft. We are continuing to work with our U.S. customer as well as international customers to secure additional orders. The orders in backlog, combined with anticipated orders for the 44 aircraft currently funded, would complete production in 2016. Should additional orders not materialize, it is reasonably possible that we will decide in the next twelve months to end production of the F/A-18 at a future date. We are still evaluating the full financial impact of a potential production shutdown, including any recovery that may be available from the U.S. government.

United States Government Defense Environment Overview

U.S. government appropriation levels remain subject to significant uncertainty. In August 2011, the Budget Control Act (The Act) established limits on U.S. government discretionary spending, including a reduction of defense spending by approximately \$490 billion between the 2012 and 2021 U.S. government fiscal years. The Act also provided that the defense budget would face "sequestration" cuts of up to an additional \$500 billion during that same period to the extent that discretionary spending limits are exceeded. The impact of sequestration cuts was reduced with respect to FY2014 and FY2015 following the enactment of The Bipartisan Budget Act in December 2013. However, significant uncertainty remains with respect to overall levels of defense spending and it is likely that U.S. government discretionary spending levels will continue to be subject to significant pressure, including risk of future sequestration cuts.

Significant uncertainty also continues with respect to program-level appropriations for the U.S. Department of Defense (U.S. DoD) and other government agencies, including the National Aeronautics and Space Administration, within the overall budgetary framework described above. Future budget cuts, including cuts mandated by sequestration, or future procurement decisions associated with the appropriations process could result in reductions, cancellations and/or delays of existing contracts or programs. Any of these impacts could have a material effect on the results of the Company's operations, financial position and/or cash flows.

In addition to the risks described above, if Congress is unable to pass appropriations bills in a timely manner, a government shutdown could result which could have impacts above and beyond those resulting from budget cuts or sequestration impacts. For example, requirements to furlough employees in the U.S. DoD or other government agencies could result in payment delays, impair our ability to perform work on existing contracts, and/or negatively impact future orders.

BDS Fixed-Price Development Contracts

Fixed-price development work is inherently uncertain and subject to significant variability in estimates of the cost and time required to complete the work. BDS fixed-price contracts with significant development work include Airborne Early Warning and Control, India P-8I, Saudi Arabia F-15, USAF KC-46A Tanker and commercial and military satellites. The operational and technical complexities of these contracts create financial risk, which could trigger termination provisions, order cancellations or other financially significant exposure. Changes to cost and revenue estimates could also result in lower margins or a material charge for reach-forward losses in 2014.

Recoverable Costs on Government Contracts

Our final incurred costs for each year are subject to audit and review for allowability by the U.S. government, which can result in payment demands related to costs they believe should be disallowed. We work with the U.S. government to assess the merits of claims and where appropriate reserve for amounts disputed. If we are unable to satisfactorily resolve disputed costs, we could be required to record an earnings charge and/or provide refunds to the U.S. government.

Table of Contents

Russia/Ukraine

We are monitoring recent political unrest involving Russia and Ukraine, where we and some of our suppliers source titanium products and/or have operations. A number of our commercial customers also have operations in Russia and Ukraine. To date, we have not experienced any disruptions to production or deliveries. Should suppliers or customers experience disruption, our production and/or deliveries could be materially impacted.

747 and 787 Commercial Airplane Programs

The development and initial production of new commercial airplanes and new commercial airplane derivatives, which include the 747 and 787, entail significant commitments to customers and suppliers as well as substantial investments in working capital, infrastructure and research and development. The 747 and 787 programs had gross margins that were breakeven or near breakeven during the three months ended March 31, 2014.

Continued weakness in the air cargo market and lower-than-expected demand for large commercial passenger aircraft have resulted in pricing pressures and fewer 747 orders than anticipated. We continue to have a number of unsold 747 production positions. If market and production risks cannot be mitigated, the program could face a reach-forward loss that may be material.

The combination of production challenges, change incorporation, schedule delays and customer and supplier impacts has created significant pressure on 787 program profitability. If risks related to this program, including risks associated with planned production rate increases, or introducing the 787-9 and 787-10 derivatives as scheduled cannot be mitigated, the program could face additional customer claims and/or supplier assertions, as well as a reach-forward loss that may be material.

Note 10 – Arrangements with Off-Balance Sheet Risk

We enter into arrangements with off-balance sheet risk in the normal course of business, primarily in the form of guarantees.

The following table provides quantitative data regarding our third party guarantees. The maximum potential payments represent a “worst-case scenario,” and do not necessarily reflect amounts that we expect to pay. Estimated proceeds from collateral and recourse represent the anticipated values of assets we could liquidate or receive from other parties to offset our payments under guarantees. The carrying amount of liabilities represents the amount included in Accrued liabilities.

	Maximum Potential Payments		Estimated Proceeds from Collateral/Recourse		Carrying Amount of Liabilities	
	March 31 2014	December 31 2013	March 31 2014	December 31 2013	March 31 2014	December 31 2013
Contingent repurchase commitments	\$1,830	\$1,872	\$1,813	\$1,871	\$5	\$5
Indemnifications to ULA:						
Contributed Delta program launch inventory	125	127				
Contract pricing	261	261			7	7
Other Delta contracts	226	227			8	8
Other indemnifications	96	106			27	28
Credit guarantees	30	35	27	27	2	2

Contingent Repurchase Commitments The repurchase price specified in contingent repurchase commitments is generally lower than the expected fair value at the specified repurchase date. Estimated proceeds from collateral/recourse in the table above represent the lower of the contracted repurchase price or the expected fair value of each aircraft at the specified repurchase date.

Table of Contents

Indemnifications to ULA In 2006, we agreed to indemnify ULA through December 31, 2020 against potential non-recoverability and non-allowability of \$1,360 of Boeing Delta launch program inventory included in contributed assets plus \$1,860 of inventory subject to an inventory supply agreement which ends on March 31, 2021. Since inception, ULA has consumed \$1,235 of the \$1,360 of inventory that was contributed by us and has yet to consume \$125. ULA has made advance payments of \$1,440 to us and we have recorded revenues and cost of sales of \$1,104 under the inventory supply agreement through March 31, 2014.

We agreed to indemnify ULA against potential losses that ULA may incur in the event ULA is unable to obtain certain additional contract pricing from the U.S. Air Force (USAF) for four satellite missions. We believe ULA is entitled to additional contract pricing. In December 2008, ULA submitted a claim to the USAF to re-price the contract value for two satellite missions. In March 2009, the USAF issued a denial of that claim. In June 2009, ULA filed a notice of appeal, and in October 2009, ULA filed a complaint before the Armed Services Board of Contract Appeals (ASBCA) for a contract adjustment for the price of the two satellite missions. In September 2009, the USAF exercised its option for a third satellite mission. During the third quarter of 2010, ULA submitted a claim to the USAF to re-price the contract value of the third mission. The USAF did not exercise an option for a fourth mission prior to the expiration of the contract. In March 2011, ULA filed a notice of appeal before the ASBCA, seeking to re-price the third mission. On November 20, 2013, the ASBCA denied the USAF motions in large part, leaving three of four ULA counts, and its overall claims, substantially intact. The trial before the ASBCA concluded on December 20, 2013. The parties will complete post-trial briefing by May 2014. The Board will likely issue a ruling thereafter, but there is no scheduled date or official deadline for its decision. If ULA is ultimately unsuccessful in obtaining additional pricing, we may be responsible for a portion of the shortfall and may record up to \$278 in pre-tax losses associated with the three missions, representing up to \$261 for the indemnification payment and up to \$17 for our portion of additional contract losses incurred by ULA.

Potential payments for Other Delta contracts include \$85 related to deferred support costs. In June 2011, the Defense Contract Management Agency (DCMA) notified ULA that it had determined that \$271 of deferred support costs are not recoverable under government contracts. In December 2011, the DCMA notified ULA of the potential non-recoverability of an additional \$114 of deferred production costs. The DCMA has not yet issued a final decision related to the recoverability of the \$114. ULA and Boeing believe that all costs are recoverable and in November 2011, ULA filed a certified claim with the USAF for collection of deferred support and production costs. The USAF issued a final decision denying ULA's certified claim in May 2012. On June 14, 2012, Boeing and ULA filed a suit in the Court of Federal Claims seeking recovery of the deferred support and production costs from the U.S. government. On November 9, 2012, the U.S. government filed an answer to our claim and asserted a counterclaim for credits that it alleges were offset by deferred support cost invoices. We believe that the U.S. government's counterclaim is without merit, and have filed an answer challenging it on multiple grounds. The litigation is in the discovery phase, and the Court has not yet set a trial date. If, contrary to our belief, it is determined that some or all of the deferred support or production costs are not recoverable, we could be required to record pre-tax losses and make indemnification payments to ULA for up to \$317 of the costs questioned by the DCMA.

Table of Contents

Other Indemnifications As part of the 2004 sale agreement with General Electric Capital Corporation related to the sale of BCC's Commercial Financial Services business, BCC is involved in a loss sharing arrangement for losses on transferred portfolio assets, such as asset sales, provisions for loss or asset impairment charges offset by gains from asset sales. At March 31, 2014 and December 31, 2013, our maximum future cash exposure to losses associated with the loss sharing arrangement was \$96 and \$106 and our accrued liability under the loss sharing arrangement was \$27 and \$28.

In conjunction with our sales of Electron Dynamic Devices, Inc. and Rocketdyne Propulsion and Power businesses and our Commercial Airplanes facilities in Wichita, Kansas and Tulsa and McAlester, Oklahoma, we agreed to indemnify, for an indefinite period, the buyers for costs relating to pre-closing environmental conditions and certain other items. It is impossible to assess the potential number of future claims that may be asserted under these indemnifications, nor the amounts thereof (if any). As a result, we cannot estimate the maximum potential amount of future payments under these indemnities and therefore, no liability has been recorded. To the extent that claims have been made under these indemnities and/or are probable and reasonably estimable, liabilities associated with these indemnities are included in the environmental liability disclosure in Note 9.

Credit Guarantees We have issued credit guarantees, principally to facilitate the sale and/or financing of commercial aircraft. Under these arrangements, we are obligated to make payments to a guaranteed party in the event that lease or loan payments are not made by the original lessee or debtor or certain specified services are not performed. A substantial portion of these guarantees has been extended on behalf of original lessees or debtors with less than investment-grade credit. Our commercial aircraft credit guarantees are collateralized by the underlying commercial aircraft and certain other assets. Current outstanding credit guarantees expire within the next seven years.

Note 11 – Postretirement Plans

The components of net periodic benefit cost were as follows:

	Pension		Other Postretirement Benefits	
	2014	2013	2014	2013
Three months ended March 31,				
Service cost	\$414	\$473	\$32	\$37
Interest cost	784	731	72	67
Expected return on plan assets	(1,041)	(969)	(2)	(2)
Amortization of prior service costs	45	49	(36)	(45)
Recognized net actuarial loss	261	569	2	24
Settlement/curtailment/other losses	338	20		
Net periodic benefit cost	\$801	\$873	\$68	\$81
Net periodic benefit cost included in Earnings from operations	\$1,035	\$791	\$71	\$91

In the first quarter of 2014, we announced changes to our nonunion and certain union retirement plans whereby approximately 100,000 employees will transition in 2016 to a company-funded defined contribution retirement savings plan in lieu of participation in defined benefit pension plans. The defined benefit pension plan changes resulted in charges of \$334 in the first quarter of 2014, primarily for pension curtailment costs. In addition, we remeasured pension assets and benefit obligations for the affected pension plans. These remeasurements resulted in a net actuarial gain of \$966 which is included in Other Comprehensive Income. The \$966 reflects a gain of \$1,988 resulting from benefit plan changes that was partially offset by net actuarial losses of \$1,022 primarily driven by a reduction in the discount rate from approximately 4.8% at December 31, 2013 to approximately 4.5% as of the remeasurement dates.

Table of Contents

Note 12 – Share-Based Compensation and Other Compensation Arrangements

Restricted Stock Units

On February 24, 2014, we granted to our executives 695,651 restricted stock units (RSUs) as part of our long-term incentive program with a grant date fair value of \$129.58 per share. The RSUs granted under this program will vest and settle in common stock (on a one-for-one basis) on the third anniversary of the grant date.

Performance-Based Restricted Stock Units

On February 24, 2014, we granted to our executives 662,215 performance-based restricted stock units (PBRsUs) as part of our long-term incentive program with a grant date fair value of \$136.12 per share. The PBRsUs granted under this program will vest and settle in common stock (on a one-for-one basis) on the third anniversary of the grant date based on the Company's total shareholder return as compared to a group of peer companies. The award payout can range from 0% to 200% of the original PBRsU award amount. Compensation expense for the award is recognized over the three-year performance period based upon the fair value determined at grant date using a Monte-Carlo simulation model.

Performance Awards

On February 24, 2014, we granted performance awards to our executives with the payout based on the achievement of financial goals for the three-year period ending December 31, 2016. At March 31, 2014, the minimum payout amount is \$0 and the maximum amount we could be required to pay out is \$359.

Note 13 – Shareholders' Equity

Accumulated Other Comprehensive Loss

Changes in Accumulated other comprehensive income/(loss) (AOCI) by component for the three months ended March 31, 2014 and 2013 were as follows:

	Currency Translation Adjustments	Unrealized Gains and Losses on Certain Investments	Unrealized Gains and Losses on Derivative Instruments	Defined Benefit Pension Plans & Other Postretirement Benefits	Total ⁽¹⁾
Balance at January 1, 2013	\$214	(\$8)	\$86	(\$17,708)	(\$17,416)
Other comprehensive income/(loss) before reclassifications	(23)		(26)	32	(17)
Amounts reclassified from AOCI			2	390	⁽²⁾ 392
Net current period Other comprehensive income/(loss)	(23)		(24)	422	375
Balance at March 31, 2013	\$191	(\$8)	\$62	(\$17,286)	(\$17,041)
Balance at January 1, 2014	\$150	(\$8)	(\$6)	(\$10,030)	(\$9,894)
Other comprehensive income/(loss) before reclassifications	17	2	(11)	620	628
Amounts reclassified from AOCI			5	378	⁽²⁾ 383
Net current period Other comprehensive income/(loss)	17	2	(6)	998	1,011
Balance at March 31, 2014	\$167	(\$6)	(\$12)	(\$9,032)	(\$8,883)

⁽¹⁾ Net of tax.

Primarily relates to settlements, curtailments and amortization of actuarial gains/losses for the three months ended

⁽²⁾ March 31, 2014 and 2013 totaling \$372 and \$387 (net of tax of (\$207) and (\$220)) which is included in the net periodic pension cost of which a portion is allocated to production as inventoried costs.

Table of Contents

Note 14 – Derivative Financial Instruments

Cash Flow Hedges

Our cash flow hedges include foreign currency forward contracts, foreign currency option contracts, commodity swaps, and commodity purchase contracts. We use foreign currency forward and option contracts to manage currency risk associated with certain transactions, specifically forecasted sales and purchases made in foreign currencies. Our foreign currency contracts hedge forecasted transactions principally occurring within five years in the future, with certain contracts hedging transactions through 2023. We use commodity derivatives, such as swaps and fixed-price purchase commitments to hedge against potentially unfavorable price changes for items used in production. Our commodity contracts hedge forecasted transactions through 2017.

Fair Value Hedges

Interest rate swaps under which we agree to pay variable rates of interest are designated as fair value hedges of fixed-rate debt. The net change in fair value of the derivatives and the hedged items is reported in Boeing Capital interest expense.

Derivative Instruments Not Receiving Hedge Accounting Treatment

We also hold certain derivative instruments, primarily foreign currency forward contracts, for risk management purposes that are not receiving hedge accounting treatment.

Notional Amounts and Fair Values

The notional amounts and fair values of derivative instruments in the Condensed Consolidated Statements of Financial Position were as follows:

	Notional amounts ⁽¹⁾		Other assets		Accrued liabilities	
	March 31 2014	December 31 2013	March 31 2014	December 31 2013	March 31 2014	December 31 2013
Derivatives designated as hedging instruments:						
Foreign exchange contracts	\$2,326	\$2,524	\$114	\$122	(\$77) (\$64
Interest rate contracts	313	313	13	13)
Commodity contracts	50	72	3	2	(33)(39
Derivatives not receiving hedge accounting treatment:						
Foreign exchange contracts	284	259	14	12	(30)(35
Commodity contracts	7	9			(3)(4
Total derivatives	\$2,980	\$3,177	144	149	(143)(142
Netting arrangements			(56)(63)56	63
Net recorded balance			\$88	\$86	(\$87)(\$79

⁽¹⁾ Notional amounts represent the gross contract/notional amount of the derivatives outstanding.

Table of Contents

Gains/(losses) associated with our cash flow and undesignated hedging transactions and their effect on Other comprehensive income/(loss) and Net earnings were as follows:

	Three months ended	
	March 31 2014	2013
Effective portion recognized in Other comprehensive income/(loss), net of taxes:		
Foreign exchange contracts	(\$12)	(\$26)
Commodity contracts	1	
Effective portion reclassified out of Accumulated other comprehensive loss into earnings, net of taxes:		
Foreign exchange contracts	(2)	3
Commodity contracts	(3)	(5)
Forward points recognized in Other income, net:		
Foreign exchange contracts	7	8
Undesignated derivatives recognized in Other income, net:		
Foreign exchange contracts	(4)	(2)

Based on our portfolio of cash flow hedges, we expect to reclassify losses of \$11 (pre-tax) out of Accumulated other comprehensive loss into earnings during the next 12 months. Ineffectiveness related to our hedges recognized in Other income was insignificant for the three months ended March 31, 2014 and 2013.

We have derivative instruments with credit-risk-related contingent features. For foreign exchange contracts with original maturities of at least five years, our derivative counterparties could require settlement if we default on our five-year credit facility. For commodity contracts, our counterparties could require collateral posted in an amount determined by our credit ratings. The fair value of foreign exchange and commodity contracts that have credit-risk-related contingent features that are in a net liability position at March 31, 2014 was \$10. At March 31, 2014, there was no collateral posted related to our derivatives.

Note 15 – Fair Value Measurements

The following table presents our assets and liabilities that are measured at fair value on a recurring basis and are categorized using the fair value hierarchy. The fair value hierarchy has three levels based on the reliability of the inputs used to determine fair value. Level 1 refers to fair values determined based on quoted prices in active markets for identical assets. Level 2 refers to fair values estimated using significant other observable inputs and Level 3 includes fair values estimated using significant unobservable inputs.

	March 31, 2014				December 31, 2013			
	Total	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3
Assets								
Money market funds	\$2,101	\$2,101			\$3,783	\$3,783		
Available-for-sale investments	11	9		\$2	8	6		\$2
Derivatives	88		\$88		86		\$86	
Total assets	\$2,200	\$2,110	\$88	\$2	\$3,877	\$3,789	\$86	\$2
Liabilities								
Derivatives	(\$87)		(\$87)		(\$79)		(\$79)	
Total liabilities	(\$87)		(\$87)		(\$79)		(\$79)	

Table of Contents

Money market funds and available-for-sale equity securities are valued using a market approach based on the quoted market prices of identical instruments. Available-for-sale debt investments are primarily valued using an income approach based on benchmark yields, reported trades and broker/dealer quotes.

Derivatives include foreign currency, commodity and interest rate contracts. Our foreign currency forward contracts are valued using an income approach based on the present value of the forward rate less the contract rate multiplied by the notional amount. Commodity derivatives are valued using an income approach based on the present value of the commodity index prices less the contract rate multiplied by the notional amount. The fair value of our interest rate swaps is derived from a discounted cash flow analysis based on the terms of the contract and the interest rate curve. Certain assets have been measured at fair value on a nonrecurring basis using significant unobservable inputs (Level 3). The following table presents the nonrecurring losses recognized for the three months ended March 31 and the fair value and asset classification of the related assets as of the impairment date:

	2014		2013	
	Fair Value	Total Losses	Fair Value	Total Losses
Operating lease equipment	\$27	(\$6)	\$28	(\$21)
Property, plant and equipment	2	(10)	6	(5)
Total	\$29	(\$16)	\$34	(\$26)

The fair value of the impaired operating lease equipment is derived by calculating a median collateral value from a consistent group of third party aircraft value publications. The values provided by the third party aircraft publications are derived from their knowledge of market trades and other market factors. Management reviews the publications quarterly to assess the continued appropriateness and consistency with market trends. Under certain circumstances, we adjust values based on the attributes and condition of the specific aircraft or equipment, usually when the features or use of the aircraft vary significantly from the more generic aircraft attributes covered by third party publications, or on the expected net sales price for the aircraft. Property, plant and equipment was primarily valued using an income approach based on the discounted cash flows associated with the underlying assets.

For Level 3 assets that were measured at fair value on a nonrecurring basis during the three months ended March 31, 2014, the following table presents the fair value of those assets as of the measurement date, valuation techniques and related unobservable inputs of those assets.

	Fair Value	Valuation Technique(s)	Unobservable Input	Range Median or Average
Operating lease equipment	\$27	Market approach	Aircraft value publications Aircraft condition adjustments	\$17 - \$42 ⁽¹⁾ Median \$32 (\$5) - \$0 ⁽²⁾ Net (\$5)

(1) The range represents the sum of the highest and lowest values for all aircraft subject to fair value measurement, according to the third party aircraft valuation publications that we use in our valuation process.

The negative amount represents the sum for all aircraft subject to fair value measurement, of all downward

(2) adjustments based on consideration of individual aircraft attributes and condition. The positive amount represents the sum of all such upward adjustments.

Table of Contents

Fair Value Disclosures

The fair values and related carrying values of financial instruments that are not required to be remeasured at fair value on the Condensed Consolidated Statements of Financial Position were as follows:

	March 31, 2014				
	Carrying Amount	Total Fair Value	Level 1	Level 2	Level 3
Assets					
Accounts receivable, net	\$7,341	\$7,418		\$7,418	
Notes receivable, net	478	517		517	
Liabilities					
Debt, excluding capital lease obligations	(8,796)	(10,402)		(10,402)	
	December 31, 2013				
	Carrying Amount	Total Fair Value	Level 1	Level 2	Level 3
Assets					
Accounts receivable, net	\$6,546	\$6,525		\$6,525	
Notes receivable, net	572	622		622	
Liabilities					
Debt, excluding capital lease obligations	(9,483)	(10,897)		(10,897)	

The fair value of Accounts receivable is based on current market rates for loans of the same risk and maturities. The fair values of our variable rate notes receivable that reprice frequently approximate their carrying amounts. The fair values of fixed rate notes receivable are estimated with discounted cash flow analysis using interest rates currently offered on loans with similar terms to borrowers of similar credit quality. The fair value of our debt that is traded in the secondary market is classified as Level 2 and is based on current market yields. For our debt that is not traded in the secondary market, the fair value is classified as Level 2 and is based on our indicative borrowing cost derived from dealer quotes or discounted cash flows. The fair value of our debt classified as Level 3 is based on the median of the underlying collateral value as described above. With regard to other financial instruments with off-balance sheet risk, it is not practicable to estimate the fair value of our indemnifications and financing commitments because the amount and timing of those arrangements are uncertain. Items not included in the above disclosures include cash, restricted cash, time deposits and other deposits, commercial paper, money market funds, Accounts payable and long-term payables. The carrying values of those items, as reflected in the Condensed Consolidated Statements of Financial Position, approximate their fair value at March 31, 2014 and December 31, 2013. The fair value of assets and liabilities whose carrying value approximates fair value is determined using Level 2 inputs, with the exception of cash (Level 1).

Note 16 – Legal Proceedings

Various legal proceedings, claims and investigations related to products, contracts, employment and other matters are pending against us. Potentially material contingencies are discussed below.

We are subject to various U.S. government investigations, from which civil, criminal or administrative proceedings could result or have resulted in the past. Such proceedings involve or could involve claims by the government for fines, penalties, compensatory and treble damages, restitution and/or forfeitures. Under government regulations, a company, or one or more of its operating divisions or subdivisions, can also be suspended or debarred from government contracts, or lose its export privileges, based on the results of investigations. We believe, based upon current information, that the outcome of any such government disputes and investigations will not have a material effect on our financial position, results of operations, or cash flows, except as set forth below. Where it is reasonably possible that we will incur losses in excess of

Table of Contents

recorded amounts in connection with any of the matters set forth below, we will disclose either the amount or range of reasonably possible losses in excess of such amounts or, where no such amount or range can be reasonably estimated, the reasons why no such estimate can be made.

Employment, Labor and Benefits Litigation

In connection with the 2005 sale of our former Wichita facility to Spirit AeroSystems, Inc. (Spirit), certain individuals not hired by Spirit alleged that Spirit's hiring decisions following the sale were tainted by age discrimination, violated the Employee Retirement Income Security Act (ERISA), violated our collective bargaining agreements, and constituted retaliation. The case was brought in 2006 as a class action on behalf of individuals not hired by Spirit. In 2012, the Tenth Circuit Court of Appeals affirmed the district court's 2010 summary judgment in favor of Boeing and Spirit on all class action claims, but the parties were not precluded from making claims on an individual basis. Claims with respect to twenty-six additional individuals were dismissed during the first quarter of 2014. As of March 31, 2014, sixty-two individual claims related to this matter were pending. Spirit has agreed to indemnify Boeing for any and all losses. We do not expect to incur any losses given the current status of this matter.

Also related to the 2005 sale of the former Wichita facility, on February 16, 2007, an action entitled Harkness et al. v. The Boeing Company et al. was filed in the U.S. District Court for the District of Kansas, alleging collective bargaining agreement breaches and ERISA violations in connection with alleged failures to provide benefits to certain former employees of the Wichita facility. On December 11, 2012 the court denied plaintiffs' motion for summary judgment and granted Boeing's motion for summary judgment on plaintiffs' claim that amendment of The Boeing Company Employee Retirement Plan violated the IAM collective bargaining agreement, as well as individual ERISA §510 claims for interference with benefits. The court denied Boeing's motion for all other claims. The parties are conducting additional discovery in anticipation of further court proceedings, which have not yet been scheduled. We believe that Spirit is obligated to indemnify Boeing for any and all losses in this matter, although to date Spirit has acknowledged a limited indemnification obligation. We currently estimate that the putative class includes up to approximately 2,000 former Wichita employees. We cannot reasonably estimate the range of loss, if any, that may result from this matter given the current procedural status of the litigation.

On October 13, 2006, we were named as a defendant in a lawsuit filed in the U.S. District Court for the Southern District of Illinois. Plaintiffs, seeking to represent a class of similarly situated participants and beneficiaries in The Boeing Company Voluntary Investment Plan (the VIP), alleged that fees and expenses incurred by the VIP were and are unreasonable and excessive, not incurred solely for the benefit of the VIP and its participants, and were undisclosed to participants. The plaintiffs further alleged that defendants breached their fiduciary duties in violation of §502(a)(2) of ERISA, and sought injunctive and equitable relief pursuant to §502(a)(3) of ERISA. During the first quarter of 2010, the Seventh Circuit Court of Appeals granted a stay of trial proceedings in the district court pending resolution of an appeal made by Boeing in 2008 to the case's class certification order. On January 21, 2011, the Seventh Circuit reversed the district court's class certification order and decertified the class. The Seventh Circuit remanded the case to the district court for further proceedings. On September 19, 2013, the district court granted plaintiffs' motion for class certification. On October 3, 2013, Boeing filed a petition for review of the class certification order with the Seventh Circuit Court of Appeals, which was denied by the Seventh Circuit on November 26, 2013. Summary judgment briefs were filed in the district court on January 6, 2014, and plaintiffs' opposition briefs were filed on February 10, 2014. We cannot reasonably estimate the range of loss, if any, that may result from this matter given the current procedural status of the litigation.

Table of Contents

Note 17 – Segment Information

Effective during the first quarter of 2014, certain programs were realigned among BDS segments. The BMA aircraft programs Airborne Warning and Control Systems and Airborne Early Warning and Control and the F-22 Modernization program were realigned from BMA to GS&S. Business segment data for 2013 have been adjusted to reflect the realignment.

Our primary profitability measurements to review a segment's operating results are Earnings from operations and operating margins. See page 6 for a Summary of Business Segment Data, which is an integral part of this note.

Intersegment revenues, eliminated in Unallocated items and eliminations, are shown in the following table.

	Three months ended March 31	
	2014	2013
Commercial Airplanes	\$274	\$195
Boeing Capital	7	9
Total	\$281	\$204

Unallocated Items and Eliminations

Unallocated items and eliminations includes costs not attributable to business segments as well as intercompany profit eliminations. We generally allocate costs to business segments based on the U.S. federal cost accounting standards.

Components of Unallocated items and eliminations are shown in the following table.

	Three months ended March 31	
	2014	2013
Share-based plans	(\$24)	(\$31)
Deferred compensation	7	(56)
Capitalized interest	(18)	(17)
Eliminations and other	(132)	(66)
Sub-total	(167)	(170)
Pension	(576)	(358)
Postretirement	23	19
Pension and Postretirement	(553)	(339)
Total	(\$720)	(\$509)

Unallocated Pension and Other Postretirement Benefit Expense

Unallocated pension and other postretirement benefit expense represent the portion of pension and other postretirement benefit costs that are not recognized by business segments for segment reporting purposes. Pension costs, comprising GAAP service and prior service costs, are allocated to Commercial Airplanes. Pension costs are allocated to BDS using U.S. Government Cost Accounting Standards (CAS), which employ different actuarial assumptions and accounting conventions than Generally Accepted Accounting Principles in the United States of America (GAAP). These costs are allocable to government contracts. Other postretirement benefit costs are allocated to business segments based on CAS, which is generally based on benefits paid.

Table of Contents

Assets

Segment assets are summarized in the table below:

	March 31 2014	December 31 2013
Commercial Airplanes	\$52,077	\$49,520
Defense, Space & Security:		
Boeing Military Aircraft	6,429	5,872
Network & Space Systems	6,382	6,450
Global Services & Support	4,924	5,040
Total Defense, Space & Security	17,735	17,362
Boeing Capital	3,502	3,914
Other segment	1,234	1,208
Unallocated items and eliminations	17,027	20,659
Total	\$91,575	\$92,663

Assets included in Unallocated items and eliminations primarily consist of Cash and cash equivalents, Short-term and other investments, Deferred tax assets, capitalized interest and assets held by SSG as well as intercompany eliminations.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
The Boeing Company
Chicago, Illinois

We have reviewed the accompanying condensed consolidated statement of financial position of The Boeing Company and subsidiaries (the "Company") as of March 31, 2014, and the related condensed consolidated statements of operations, comprehensive income, cash flows and equity for the three-month periods ended March 31, 2014 and 2013. These interim financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole.

Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to such condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statement of financial position of the Company as of December 31, 2013, and the related consolidated statements of operations, comprehensive income, equity, and cash flows for the year then ended (not presented herein); and in our report dated February 14, 2014, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated statement of financial position as of December 31, 2013 is fairly stated, in all material respects, in relation to the consolidated statement of financial position from which it has been derived.

/s/ Deloitte & Touche LLP

FORWARD-LOOKING STATEMENTS

This report contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as “may,” “should,” “expects,” “intends,” “projects,” “plans,” “believes,” “estimates,” “targets,” “anticipates” expressions are used to identify these forward-looking statements. Examples of forward-looking statements include statements relating to our future financial condition and operating results, as well as any other statement that does not directly relate to any historical or current fact.

Forward-looking statements are based on our current expectations and assumptions, which may not prove to be accurate. These statements are not guarantees and are subject to risks, uncertainties and changes in circumstances that are difficult to predict. Many factors could cause actual results to differ materially and adversely from these forward-looking statements. Among these factors are risks related to:

- (1) general conditions in the economy and our industry, including those due to regulatory changes;
- (2) our reliance on our commercial airline customers;
- (3) the overall health of our aircraft production system, planned production rate increases across multiple commercial airline programs, our commercial development and derivative aircraft programs, and our aircraft being subject to stringent performance and reliability standards;
- (4) changing budget and appropriation levels and acquisition priorities of the U.S. government;
- (5) our dependence on U.S. government contracts;
- (6) our reliance on fixed-price contracts;
- (7) our reliance on cost-type contracts;
- (8) uncertainties concerning contracts that include in-orbit incentive payments;
- (9) our dependence on our subcontractors and suppliers as well as the availability of raw materials;
- (10) changes in accounting estimates;
- (11) changes in the competitive landscape in our markets;
- (12) our non-U.S. operations, including sales to non-U.S. customers;
- (13) potential adverse developments in new or pending litigation and/or government investigations;
- (14) customer and aircraft concentration in Boeing Capital’s customer financing portfolio;
- (15) changes in our ability to obtain debt on commercially reasonable terms and at competitive rates in order to fund our operations and contractual commitments;
- (16) realizing the anticipated benefits of mergers, acquisitions, joint ventures, strategic alliances or divestitures;
- (17) the adequacy of our insurance coverage to cover significant risk exposures;

Table of Contents

- (18) potential business disruptions, including those related to physical security threats, information technology or cyber attacks or natural disasters;
- (19) work stoppages or other labor disruptions;
- (20) significant changes in discount rates and actual investment return on pension assets;
- (21) potential environmental liabilities; and
- (22) threats to the security of our or our customers' information.

Additional information concerning these and other factors can be found in our filings with the Securities and Exchange Commission, including the "Risk Factors" on pages 6 through 15 of our most recent Annual Report on Form 10-K, "Management's Discussion and Analysis of Financial Condition and Results of Operations" and Notes 9, 10, and 16 to our Condensed Consolidated Financial Statements included in this Quarterly Report on Form 10-Q and Current Reports on Form 8-K. Any forward-looking information speaks only as of the date on which it is made, and we assume no obligation to update or revise any forward-looking statement whether as a result of new information, future events or otherwise, except as required by law.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Consolidated Results of Operations and Financial Condition

Earnings From Operations and Core Operating Earnings (Non-GAAP) The following table summarizes key indicators of consolidated results of operations:

	Three months ended March 31			
	2014	2013		
Revenues	\$20,465	\$18,893		
GAAP				
Earnings from operations	\$1,542	\$1,528		
Operating margins	7.5	%	8.1	%
Effective income tax rate	33.9	%	23.1	%
Net earnings	\$965	\$1,106		
Diluted earnings per share	\$1.28	\$1.44		
Non-GAAP ⁽¹⁾				
Core operating earnings	\$2,095	\$1,867		
Core operating margin	10.2	%	9.9	%
Core earnings per share	\$1.76	\$1.73		

These measures exclude certain components of pension and other postretirement benefit expense. See page 46 for

⁽¹⁾ important information about these non-GAAP measures and reconciliations to the most comparable GAAP measures.

Revenues

The following table summarizes Revenues:

	Three months ended March 31			
	2014	2013		
Commercial Airplanes	\$12,737	\$10,690		
Defense, Space & Security	7,633	8,110		
Boeing Capital	82	105		
Other segment	20	27		
Unallocated items and eliminations	(7)	(39)
Total	\$20,465	\$18,893		

Revenues for the three months ended March 31, 2014 increased by \$1,572 million or 8%, compared with the same period in 2013. Commercial Airplanes revenues increased by \$2,047 million or 19% due to higher airplane deliveries. Defense, Space & Security (BDS) revenues decreased by \$477 million due to lower revenues in the Boeing Military Aircraft (BMA) and Network & Space Systems (N&SS) segments, partially offset by higher revenues in the Global Services & Support (GS&S) segment.

Table of Contents

Earnings From Operations

The following table summarizes Earnings from operations:

(Dollars in millions)	Three months ended March		
	2014	2013	
Commercial Airplanes	\$1,502	\$1,219	
Defense, Space & Security	778	832	
Boeing Capital	44	44	
Other segment	(62) (58)
Unallocated pension and other postretirement benefit expense	(553) (339)
Other unallocated items and eliminations	(167) (170)
Earnings from operations (GAAP)	\$1,542	\$1,528	
Unallocated pension and other postretirement benefit expense	553	339	
Core operating earnings (Non-GAAP)	\$2,095	\$1,867	

Earnings from operations for the three months ended March 31, 2014 increased by \$14 million compared with the same period in 2013. Commercial Airplanes earnings increased by \$283 million reflecting higher 737 airplane deliveries and lower period costs partially offset by higher research and development expense. BDS earnings decreased by \$54 million due to lower earnings in the BMA segment, partially offset by higher earnings in the GS&S and N&SS segments. Unallocated pension and other postretirement benefit expense reduced earnings in 2014 by \$214 million more than 2013 due to higher curtailment charges.

Core operating earnings for the three months ended March 31, 2014 increased by \$228 million compared with the same period in 2013 primarily reflecting higher earnings at Commercial Airplanes offset by lower earnings at BDS. Unallocated Items and Eliminations The most significant items included in Unallocated items and eliminations are shown in the following table:

(Dollars in millions)	Three months ended March		
	2014	2013	
Share-based plans	(\$24) (\$31)
Deferred compensation	7	(56)
Eliminations and other	(150) (83)
Sub-total (included in core operating earnings*)	(167) (170)
Pension	(576) (358)
Postretirement	23	19	
Pension and other postretirement benefit expense (excluded from core operating earnings*)	(553) (339)
Total	(\$720) (\$509)

* Core operating earnings is a Non-GAAP measure that excludes certain components of pension and postretirement benefit expense. See page 46.

Deferred compensation expense for the three months ended March 31, 2014 decreased by \$63 million compared with the same period in 2013 primarily driven by changes in our stock price.

Eliminations and other unallocated expense for the three months ended March 31, 2014 increased by \$67 million compared with the same period in 2013 primarily due to the timing of elimination of profit on intercompany aircraft deliveries.

Table of Contents

We recorded net periodic benefit cost related to pension and other postretirement benefits of \$869 million and \$954 million for the three months ended March 31, 2014 and 2013. The decrease in net periodic benefit cost related to pension is primarily due to lower amortization of actuarial losses reflecting discount rates, and higher expected return on plan assets. This decrease is partially offset by higher curtailment charges. A portion of net periodic benefit cost is recognized as product costs in Earnings from operations in the period incurred and the remainder is included in inventory at the end of the reporting period and recorded in Earnings from operations in subsequent periods.

Unallocated pension expense includes charges of \$334 million, primarily for curtailment costs, for defined benefit pension plan changes during three months ended March 31, 2014. See Note 11.

Costs are allocated to the business segments as described in Note 17.

Net periodic benefit costs included in Earnings from operations were as follows:

(Dollars in millions)	Pension		Other Postretirement Benefits	
	2014	2013	2014	2013
Three months ended March 31,				
Allocated to business segments	(\$459)	(\$433)	(\$94)	(\$110)
Other unallocated items and eliminations	(576)	(358)	23	19
Total	(\$1,035)	(\$791)	(\$71)	(\$91)

Other Earnings Items

(Dollars in millions)	Three months ended March 31	
	2014	2013
Earnings from operations	\$1,542	\$1,528
Other income, net	9	9
Interest and debt expense	(92)	(99)
Earnings before income taxes	1,459	1,438
Income tax expense	(494)	(332)
Net earnings from continuing operations	\$965	\$1,106

Our effective income tax rates were 33.9% and 23.1% for the three months ended March 31, 2014 and 2013. The effective tax rate for the three months ended March 31, 2014 is higher than the comparable prior year period primarily due to the retroactive reinstatement of the 2012 U.S. research and development tax credit (research tax credit) in the first quarter of 2013 which reduced income tax expense by \$145 million. The research tax credit was effective for 2013, but due to the expiration at the end of 2013 no tax benefit was recorded in 2014.

For additional discussion related to Income Taxes, see Note 3 to our Condensed Consolidated Financial Statements.

Table of Contents

Total Costs and Expenses (“Cost of Sales”)

Cost of sales, for both products and services, consists primarily of raw materials, parts, sub-assemblies, labor, overhead and subcontracting costs. Our Commercial Airplanes segment predominantly uses program accounting to account for cost of sales and BDS predominantly uses contract accounting. Under program accounting, cost of sales for each commercial airplane program equals the product of (i) revenue recognized in connection with customer deliveries and (ii) the estimated cost of sales percentage applicable to the total remaining program. Under contract accounting, the amount reported as cost of sales is determined by applying the estimated cost of sales percentage to the amount of revenue recognized. The following table summarizes cost of sales:

(Dollars in millions)

Three months ended March 31	2014	2013	Change	
Cost of sales	\$17,296	\$15,756	\$1,540	
Cost of sales as a % of Revenues	84.5	% 83.4	% 1.1	%

Cost of sales for the three months ended March 31, 2014 increased by \$1,540 million, or 10% compared with the same period in 2013. This increase was primarily driven by the \$1,572 million or 8% increase in revenues. Cost of sales at Commercial Airplanes increased by \$1,635 million while cost of sales at BDS decreased by \$412 million. Cost of sales as a percentage of revenue was approximately 84.5% in the three months ended March 31, 2014 compared with 83.4% the same period in 2013 primarily driven by higher unallocated pension expense due to pension curtailment charges in the current period.

Research and Development The following table summarizes our Research and development expense:

(Dollars in millions)	Three months ended March 31	
	2014	2013
Commercial Airplanes	\$529	\$419
Defense, Space & Security	280	272
Other		14
Total	\$809	\$705

Research and development expense for the three months ended March 31, 2014 increased by \$104 million compared with the same period in 2013 primarily due to higher spending at Commercial Airplanes on the 737 MAX and 777X.

Table of Contents

Backlog

(Dollars in millions)	March 31 2014	December 31 2013
Total contractual backlog	\$422,690	\$422,661
Unobligated backlog	17,110	18,267

Contractual backlog of unfilled orders excludes purchase options, announced orders for which definitive contracts have not been executed, and unobligated U.S. and non-U.S. government contract funding. The increase in contractual backlog during the three months ended March 31, 2014 compared with December 31, 2013 was primarily due to commercial airplane orders and reclassifications from unobligated backlog related to incremental funding. The increase was partially offset by commercial airplane deliveries, cancellation of orders and revenues recognized on awarded contracts.

Unobligated backlog includes U.S. and non-U.S. government definitive contracts for which funding has not been authorized. The unobligated backlog of \$17,110 million at March 31, 2014 decreased from December 31, 2013 primarily due to reclassifications to contractual backlog related to incremental funding for BDS contracts, partially offset by contract awards.

Additional Considerations

KC-46A Tanker In 2011, we were awarded a contract from the U.S. Air Force (USAF) to design, develop, manufacture and deliver 4 next generation aerial refueling tankers. The KC-46A Tanker is a derivative of our 767 commercial aircraft. This contract is a fixed-price incentive firm contract valued at \$4.9 billion and involves highly complex designs and systems integration. The gross margin on the contract remains breakeven and changes to our estimated cost to perform the work could result in a material charge. This contract contains production options. If all options under the contract are exercised, we expect to deliver 179 aircraft for a total expected contract value of approximately \$30 billion. For segment reporting purposes, backlog, revenues and costs are recorded in the Commercial Airplanes and BMA segments.

Russia/Ukraine We are monitoring recent political unrest involving Russia and Ukraine, where we and some of our suppliers source titanium products and/or have operations. A number of our commercial customers also have operations in Russia and Ukraine. To date, we have not experienced any disruptions to production or deliveries. Should suppliers or customers experience disruption, our production and/or deliveries could be materially impacted.

Table of Contents

Segment Results of Operations and Financial Condition

Commercial Airplanes

Results of Operations

(Dollars in millions)

	Three months ended March 31	
	2014	2013
Revenues	\$12,737	\$10,690
Earnings from operations	\$1,502	\$1,219
Operating margins	11.8	% 11.4
		%
	March 31	December 31
(Dollars in millions)	2014	2013
Contractual backlog	\$373,950	\$372,980
Unobligated backlog	450	660

Revenues

Revenues for the three months ended March 31, 2014 increased by \$2,047 million or 19% compared with the same period in 2013 due to higher airplane deliveries. Revenues in the first quarter of 2013 reflect the temporary suspension of 787 deliveries.

Commercial airplane deliveries were as follows:

	737	747	767	777	787	Total
Deliveries during the first three months of 2014	115	(1) 4		24	18	161
Deliveries during the first three months of 2013	102	(1) 6	4	24	1	137
Cumulative deliveries as of 3/31/2014	4,848	1,486	1,061	1,188	132	
Cumulative deliveries as of 12/31/2013	4,733	1,482	1,061	1,164	114	

(1) Includes intercompany deliveries of three aircraft in 2014 and two in 2013.

Earnings From Operations

Earnings from operations for the three months ended March 31, 2014 increased by \$283 million compared with the same period in 2013. Increased earnings of \$340 million were primarily driven by higher 737 airplane deliveries and lower period costs of \$53 million. Period costs in 2013 included 787 engineering support costs related to the battery system. Higher research and development expense of \$110 million in 2014 was due to increased spending on the 737 MAX and 777X.

Backlog

The increase in contractual backlog during the three months ended March 31, 2014 was due to orders in excess of deliveries partially reduced by cancellation of orders.

Table of Contents

Accounting Quantity

The following table provides details of the accounting quantities and firm orders by program. Cumulative firm orders represent the cumulative number of commercial jet aircraft deliveries plus undelivered firm orders.

	Program				
	737	747	767	777	787
As of 3/31/2014	737	747	767	777	787
Program accounting quantities	7,200	1,574	1,113	1,550	1,300
Undelivered units under firm orders	3,794	52	49	360	899
Cumulative firm orders	8,642	1,538	1,110	1,548	1,031
	Program				
	737	747	767	777	787
As of 12/31/2013	737	747	767	777	787
Program accounting quantities	7,000	1,574	1,113	1,550	1,300
Undelivered units under firm orders	3,680	55	49	380	916
Cumulative firm orders	8,413	1,537	1,110	1,544	1,030

Program Highlights

737 Program The accounting quantity for the 737 program increased by 200 units during the three months ended March 31, 2014 due to the program's normal progress of obtaining additional orders and delivering airplanes. The accounting quantity includes NG and MAX units. As previously announced, we plan to increase our production rate from 38 to 42 per month in the second quarter of 2014 and to 47 per month in 2017. First delivery of the 737 MAX is expected in 2017.

747 Program Continued weakness in the air cargo market and lower-than-expected demand for large commercial passenger aircraft have resulted in pricing pressures and fewer orders than anticipated. We decreased our production rate from 2 to 1.5 per month starting February 2014 through the end of 2015. We continue to have a number of unsold 747 production positions and remain focused on obtaining additional orders, reducing out-of-sequence work, improving supply chain efficiency and implementing cost-reduction efforts. If market and production risks cannot be mitigated, the program could face a reach-forward loss that may be material.

767 Program As previously announced, we reconfigured the 767 assembly line to include a 767 derivative to support the Tanker program and decreased our production rate from 2 to 1 per month. We plan to increase the production rate from 1 to 1.5 per month in 2014 and back to 2 per month in 2016.

777 Program We are currently producing at 8.3 per month. In the fourth quarter of 2013 we launched the 777X and first delivery is expected in 2020.

787 Program We began the production rate increase from 7 to 10 per month in final assembly in November 2013 and the first delivery at that production rate occurred in March 2014. Production and flight testing of the 787-9 continues to be on schedule and we expect the first customer delivery to occur in mid-2014. First delivery of the 787-10 derivative aircraft is targeted for 2018.

We continue to incorporate engineering and other design changes identified during 787-8 flight testing into already completed aircraft at our Everett modification center. We also remain focused on stabilizing 787 production rates at 10 per month while continuing to improve aircraft reliability and satisfy customer mission and performance requirements. We continue to monitor and address challenges associated with aircraft production and assembly, including management of our manufacturing operations and extended global supply chain, completion and integration of traveled work, as well as the incorporation of the 787-9 derivative into the manufacturing process. In addition, we continue to work with our customers and suppliers to assess

Table of Contents

the specific impacts of schedule changes, including requests for contractual relief related to delivery delays and supplier assertions.

During 2009, we concluded that the first three flight-test 787 aircraft could not be sold as previously anticipated due to the inordinate amount of rework and unique and extensive modifications made to those aircraft. As a result, costs associated with these airplanes were included in research and development expense. Based on sales activity and market interest we continue to believe that the remaining 787 flight-test aircraft are commercially saleable and we continue to include costs related to these aircraft in program inventory. If we determine that the remaining flight test aircraft cannot be sold, we may incur additional charges related to the reclassification of costs associated with those aircraft to research and development expense.

The accounting quantity of 1,300 units remains unchanged and reflects the incorporation of revenue and cost estimates associated with the 787-10 and planned production rate increases to 12 and 14 airplanes per month in future years.

The accounting quantity of 1,300 units continues to represent approximately 10 years of production at planned production rates. The combination of production challenges, change incorporation, schedule delays and customer and supplier impacts has created significant pressure on program profitability. If risks related to this program, including risks associated with planned production rate increases, or introducing the 787-9 and 787-10 derivatives as scheduled cannot be mitigated, the program could face additional customer claims and/or supplier assertions, as well as further pressures on program profitability and/or a reach-forward loss. We continue to implement mitigation plans and cost-reduction efforts to improve program profitability and address program risks.

Additional Considerations

The development and ongoing production of commercial aircraft is extremely complex, involving extensive coordination and integration with suppliers and highly-skilled labor from thousands of employees and other partners. Meeting or exceeding our performance and reliability standards, as well as those of customers and regulators, can be costly and technologically challenging. In addition, the introduction of new aircraft and derivatives, such as the 787-9, 787-10, 737 MAX and 777X, involves increased risks associated with meeting development, production and certification schedules. As a result, our ability to deliver aircraft on time, satisfy performance and reliability standards and achieve or maintain, as applicable, program profitability is subject to significant risks. Factors that could result in lower margins (or a material charge if an airplane program has or is determined to have reach-forward losses) include the following: changes to the program accounting quantity, customer and model mix, production costs and rates, changes to price escalation factors in aircraft purchase contracts, performance or reliability issues involving completed aircraft, capital expenditures and other costs associated with increasing or adding new production capacity, learning curve, additional change incorporation, anticipated cost reductions, flight test and certification schedules, costs, schedule and demand for new airplanes and derivatives and status of customer claims, supplier assertions and other contractual negotiations. While we believe the cost and revenue estimates incorporated in the Condensed Consolidated Financial Statements are appropriate, the technical complexity of our airplane programs creates financial risk as additional completion costs may become necessary or scheduled delivery dates could be extended, which could trigger termination provisions, order cancellations or other financially significant exposure.

Table of Contents

Defense, Space & Security

Business Environment and Trends

United States Government Defense Environment Overview U.S. government appropriation levels remain subject to significant uncertainty. In August 2011, the Budget Control Act (The Act) established limits on U.S. government discretionary spending, including a reduction of defense spending by approximately \$490 billion between the 2012 and 2021 U.S. government fiscal years. The Act also provided that the defense budget would face “sequestration” cuts of up to an additional \$500 billion during that same period to the extent that discretionary spending limits are exceeded. The impact of sequestration cuts was reduced with respect to FY2014 and FY2015 following the enactment of The Bipartisan Budget Act in December 2013. However, significant uncertainty remains with respect to overall levels of defense spending and it is likely that U.S. government discretionary spending levels will continue to be subject to significant pressure, including risk of future sequestration cuts.

Significant uncertainty also continues with respect to program-level appropriations for the U.S. Department of Defense (U.S. DoD) and other government agencies, including the National Aeronautics and Space Administration, within the overall budgetary framework described above. Future budget cuts, including cuts mandated by sequestration, or future procurement decisions associated with the appropriations process could result in reductions, cancellations and/or delays of existing contracts or programs. Any of these impacts could have a material effect on the results of the Company's operations, financial position and/or cash flows.

In addition to the risks described above, if Congress is unable to pass appropriations bills in a timely manner, a government shutdown could result which could have impacts above and beyond those resulting from budget cuts or sequestration impacts. For example, requirements to furlough employees in the U.S. DoD or other government agencies could result in payment delays, impair our ability to perform work on existing contracts, and/or negatively impact future orders.

BDS Realignment

Effective during the first quarter of 2014, certain programs were realigned between BDS segments. The realignments include certain BMA aircraft and modernization programs which were moved to GS&S. Business segment data for 2013 have been adjusted to reflect the realignment. See Note 17.

Results of Operations

(Dollars in millions)

	Three months ended March 31	
	2014	2013
Revenues	\$7,633	\$8,110
Earnings from operations	\$778	\$832
Operating margins	10.2	% 10.3
		%
(Dollars in millions)	March 31	December 31
	2014	2013
Contractual backlog	\$48,740	\$49,681
Unobligated backlog	16,660	17,607

Since our operating cycle is long-term and involves many different types of development and production contracts with varying delivery and milestone schedules, the operating results of a particular year, or year-to-year comparisons of revenues, earnings and backlog may not be indicative of future operating results. In addition, depending on the customer and their funding sources, our orders might be structured as annual follow-on contracts, or as one large multi-year order or long-term award. As a result, period-to-period comparisons of backlog are not necessarily indicative of future workloads. The following discussions of comparative results among periods should be viewed in this context.

Table of Contents

Revenues

BDS revenues for the three months ended March 31, 2014 decreased by \$477 million compared with the same period in 2013 due to lower revenues of \$522 million and \$84 million in the BMA and N&SS segments, partially offset by higher revenues of \$129 million in the GS&S segment.

Deliveries of units for new-build production aircraft, excluding remanufactures and modifications, were as follows:

	Three months ended March	
	2014	2013
F/A-18 Models	11	12
F-15E Eagle	4	3
C-17 Globemaster III	3	3
CH-47 Chinook	17	9
AH-64 Apache	10	15
P-8 Models		2
AEW&C	1	
Total new-build production aircraft	46	44

Earnings From Operations

BDS earnings from operations for the three months ended March 31, 2014 decreased by \$54 million compared to the same period in 2013 due to lower earnings of \$95 million in the BMA segment, partially offset by higher earnings of \$29 million and \$12 million in the GS&S and N&SS segments.

Backlog

BDS total backlog was \$65,400 million at March 31, 2014, reflecting a decrease of 3% from December 31, 2013. For further details on the changes between periods, refer to the discussions of the individual segments below.

Additional Considerations

Our BDS business includes a variety of development programs which have complex design and technical challenges. Many of these programs have cost-type contracting arrangements. In these cases, the associated financial risks are primarily in reduced fees, lower profit rates or program cancellation if cost, schedule or technical performance issues arise. Examples of these programs include Ground-based Midcourse Defense (GMD), Proprietary and Space Launch Systems programs. Some of our development programs are contracted on a fixed-price basis. Many of these programs have highly complex designs. As technical or quality issues arise during development, we may experience schedule delays and cost impacts, which could increase our estimated cost to perform the work or reduce our estimated price, either of which could result in a material charge or otherwise adversely affect our financial condition. These programs are ongoing, and while we believe the cost and fee estimates incorporated in the financial statements are appropriate, the technical complexity of these programs creates financial risk as additional completion costs may become necessary or scheduled delivery dates could be extended, which could trigger termination provisions, the loss of satellite in-orbit incentive payments, or other financially significant exposure. These programs have risk for reach-forward losses if our estimated costs exceed our estimated contract revenues. Examples of significant fixed-price development programs include Airborne Early Warning and Control (AEW&C), India P-8I, Saudi Arabia F-15, USAF KC-46A Tanker, and commercial and military satellites.

Table of Contents

Revenue and cost estimates for all significant contracts are reviewed and reassessed quarterly. Changes in these estimates could result in recognition of cumulative catch-up adjustments to the contract's inception to date revenues, cost of sales and profit, in the period in which such changes are made. Changes in revenue and cost estimates could also result in a reach-forward loss or an adjustment to a reach-forward loss, which would be recorded immediately in earnings. For the three months ended March 31, 2014 and 2013, net favorable cumulative catch-up adjustments, including reach-forward losses, across all BDS contracts increased Earnings from operations by \$167 million and \$105 million.

Boeing Military Aircraft

Results of Operations

(Dollars in millions)

	Three months ended March 31	
	2014	2013
Revenues	\$3,458	\$3,980
Earnings from operations	\$332	\$427
Operating margins	9.6	% 10.7
		%
(Dollars in millions)	March 31	December 31
	2014	2013
Contractual backlog	\$23,232	\$23,561
Unobligated backlog	9,964	10,063

Revenues

BMA revenues for the three months ended March 31, 2014 decreased by \$522 million or 13% when compared with the same period in 2013 primarily due to lower revenues on the F-15 program. Revenue reductions of \$842 million reflect first quarter 2013 F-15 development milestones and lower P-8 aircraft deliveries in 2014. These reductions were partially offset by an increase of \$258 million related to higher deliveries of CH-47 Chinook and higher revenues on the V-22 Osprey program.

Earnings From Operations

BMA earnings from operations for the three months ended March 31, 2014 decreased by \$95 million, a decrease of 22% compared to the same period in 2013, primarily due to a reduction of \$89 million reflecting lower F-15 and P-8 revenues. In addition, in March 2014, we recorded a charge of \$48 million to write-off inventory and accrue termination liabilities as a result of our decision to produce three fewer C-17 aircraft in 2015 than previously planned. See Note 9. These decreases were partially offset by increased CH-47 Chinook earnings. Net favorable cumulative contract catch-up adjustments were \$39 million higher in the three months ended March 31, 2014 than in the same period in 2013 primarily driven by more favorable adjustments on the F-15 program.

Backlog

BMA total backlog of \$33,196 million at March 31, 2014 was largely unchanged from December 31, 2013, reflecting revenue recognized on contracts awarded in prior years offset by contract awards for the P-8 and Apache programs.

Additional Considerations

C-17 and F/A-18 See the discussions of the C-17 and F/A-18 programs in Note 9 to our Condensed Consolidated Financial Statements.

KC-46A Tanker See the discussion of the KC-46A Tanker program on page 34.

Table of Contents

Network & Space Systems

Results of Operations

(Dollars in millions)

	Three months ended March 31	
	2014	2013
Revenues	\$1,876	\$1,960
Earnings from operations	\$168	\$156
Operating margins	9.0	% 8.0
		%
	March 31	December 31
(Dollars in millions)	2014	2013
Contractual backlog	\$9,380	\$9,832
Unobligated backlog	5,598	6,076

Revenues

N&SS revenues for the three months ended March 31, 2014 decreased by \$84 million compared with the same period in 2013, primarily due to a reduction of \$184 million related to lower volume in several Electronic and Information Solutions programs along with lower civil satellite program milestones, partially offset by an increase of \$107 million related to higher volume in the GMD and Exploration Launch Systems programs.

Earnings From Operations

N&SS earnings from operations for the three months ended March 31, 2014 increased by \$12 million compared with the same period in 2013 as a result of improved performance on certain fixed price contracts. Net favorable cumulative contract catch-up adjustments were \$23 million higher in the three months ended March 31, 2014 than in the same period in 2013.

N&SS earnings from operations include equity earnings of \$46 million and \$40 million primarily from the United Launch Alliance (ULA) joint venture for the three months ended March 31, 2014 and 2013.

Backlog

N&SS total backlog was \$14,978 million at March 31, 2014, reflecting a decrease of 6% from December 31, 2013 primarily due to revenues recognized on contracts awarded in prior years, partially offset by current year contract awards for government satellite and missile defense system programs.

Additional Considerations

United Launch Alliance See the discussion of Indemnifications to ULA and Financing Commitments in Notes 5, 9 and 10 of our Condensed Consolidated Financial Statements.

Sea Launch See the discussion of the Sea Launch receivables in Note 8 to our Condensed Consolidated Financial Statements.

LightSquared See the discussion of the LightSquared, LLC receivables in Note 4 to our Condensed Consolidated Financial Statements.

Table of Contents

Global Services & Support

Results of Operations

		%
	March 31	December 31
(Dollars in millions)	2014	2013
Contractual backlog	\$16,128	\$16,288
Unobligated backlog	1,098	1,468

Revenues

GS&S revenues for the three months ended March 31, 2014 increased by \$129 million compared with the same period in 2013 primarily due to an increase of \$177 million related to higher volume in Maintenance, Modification and Upgrades, driven by higher AEW&C deliveries, and Integrated Logistics (IL) programs. This increase was partially offset by a reduction of \$61 million due to lower volume in several Training Systems & Government Services (TSGS) programs.

Earnings From Operations

GS&S earnings from operations for the three months ended March 31, 2014 increased by \$29 million or 12% compared with the same period in 2013 primarily due to an increase of \$39 million related to improved performance in several IL programs, partially offset by a reduction of \$10 million due to lower volume in several TSGS programs. Net favorable cumulative contract catch-up adjustments for the three months ended March 31, 2014 were consistent with the same period in 2013.

Backlog

GS&S total backlog was \$17,226 million at March 31, 2014, reflecting a decrease of 3% from December 31, 2013 primarily due to revenues recognized on contracts awarded in prior years, partially offset by current year contract awards for support on the C-17 program.

Table of Contents

Boeing Capital

Operating Results

(Dollars in millions)

	Three months ended March 31		
	2014	2013	
Revenues	\$82	\$105	
Earnings from operations	\$44	\$44	
Operating margins	54	% 42	%

Revenues

Boeing Capital (BCC) segment revenues consist principally of lease income from equipment under operating lease, interest income from financing receivables and notes, and other income. BCC's revenues for the three months ended March 31, 2014 decreased by \$23 million compared with the same period in 2013 primarily due to reductions in finance lease income resulting from non-recurring adjustments to estimated residual values.

Earnings From Operations

BCC's earnings from operations are presented net of interest expense, recovery of losses, asset impairment expense, depreciation on leased equipment and other operating expenses. Earnings from operations for the three months ended March 31, 2014 were consistent with the same period in 2013. In the current period, earnings were impacted by lower revenues offset by a reduction in the allowance for losses on receivables driven by a change to a customer credit rating.

Financial Position

The following table presents selected financial data for BCC:

(Dollars in millions)	March 31	December 31
	2014	2013
Customer financing and investment portfolio, net	\$3,470	\$3,883
Other assets, primarily cash and short-term investments	929	505
Total assets	\$4,399	\$4,388
Other liabilities, primarily deferred income taxes	\$1,311	\$1,296
Debt, including intercompany loans	2,574	2,577
Equity	514	515
Total liabilities and equity	\$4,399	\$4,388

Debt-to-equity ratio

5.0-to-1

5.0-to-1

BCC's customer financing and investment portfolio at March 31, 2014 decreased from December 31, 2013 primarily due to portfolio run-off partially offset by the reduction in the allowance for losses on receivables. At March 31, 2014 and December 31, 2013, BCC had \$75 million and \$83 million of assets that were held for sale or re-lease, of which \$40 million and \$57 million had either executed term sheets with deposits or firm contracts to be sold or placed on lease. Additionally, aircraft subject to leases with a carrying value of approximately \$8 million are scheduled to be returned off lease in the next 12 months. We are seeking to remarket these aircraft or have the leases extended.

BCC enters into certain transactions with Boeing, reflected in the Other segment, in the form of intercompany guarantees and other subsidies that mitigate the effects of certain credit quality or asset impairment issues on the BCC segment.

Table of Contents

Restructurings and Restructuring Requests

From time to time, certain customers have requested a restructuring of their transactions with BCC. Since December 31, 2013, BCC has not reached agreement on any restructuring requests that would have a material effect on our earnings, cash flows and/or financial position.

Other Segment

(Dollars in millions)	Three months ended March 31	
	2014	2013
Revenues	\$20	\$27
Loss from operations	(62) (58

Other segment losses for the three months ended March 31, 2014 remained largely consistent with the prior year.

Liquidity and Capital Resources

Cash Flow Summary

(Dollars in millions)	Three months ended March 31	
	2014	2013
Net earnings	\$965	\$1,106
Non-cash items	484	518
Changes in working capital	(337) (1,100
Net cash provided by operating activities	1,112	524
Net cash provided/(used) by investing activities	406	(814
Net cash used by financing activities	(3,668) (1,705
Effect of exchange rate changes on cash and cash equivalents	4	(11
Net decrease in cash and cash equivalents	(2,146) (2,006
Cash and cash equivalents at beginning of year	9,088	10,341
Cash and cash equivalents at end of period	\$6,942	\$8,335

Operating Activities Net cash provided by operating activities was \$1.1 billion during the three months ended March 31, 2014, an increase of \$0.6 billion compared with the same period in 2013 primarily due to increases in accounts payable and customer payments offset partially by higher inventory growth. Our investment in gross inventories increased by \$4.2 billion and \$3.9 billion during the three months ended March 31, 2014 and 2013 reflecting continued investment in commercial airplane program inventory, primarily 787 inventory. Advances and progress billings increased by \$3.3 billion compared with an increase of \$2.7 billion for the same period in 2013, primarily due to payments from commercial airplane customers.

Investing Activities Cash provided by investing activities totaled \$0.4 billion during the three months ended March 31, 2014 compared with \$0.8 billion used during the same period in 2013, largely due to higher net proceeds from investments in time deposits. Net proceeds from investments were \$0.9 billion in 2014 compared with net contributions to investments of \$0.3 billion for the same period in 2013. In 2014, capital expenditures totaled \$0.5 billion consistent with the same period in 2013. We expect capital expenditures to be higher in 2014 than 2013 due to continued investment to support growth.

Table of Contents

Financing Activities Cash used by financing activities was \$3.7 billion during the three months ended March 31, 2014 compared with \$1.7 billion in the same period in 2013, an increase primarily due to share repurchases of \$2.5 billion in 2014 partially offset by lower debt repayments of \$0.5 billion in the current year.

During the three months ended March 31, 2014, we repaid \$0.8 billion of debt. At March 31, 2014, the recorded balance of debt was \$8.9 billion of which \$1.7 billion was classified as short-term. This includes \$2.6 billion of debt attributable to BCC, of which \$0.7 billion was classified as short-term.

During the three months ended March 31, 2014, we repurchased 19.4 million shares totaling \$2.5 billion through our open market share repurchase program. In 2014 and 2013, there were 0.6 million and 0.7 million shares transferred to us from employees for tax withholdings.

Capital Resources We have substantial borrowing capacity. Any future borrowings may affect our credit ratings and are subject to various debt covenants as described below. We have a commercial paper program that continues to serve as a significant potential source of short-term liquidity. Throughout the three months ended March 31, 2014, we had no commercial paper borrowings outstanding. Currently, we have \$4.8 billion of unused borrowing capacity on revolving credit line agreements. We anticipate that these credit lines will primarily serve as backup liquidity to support our general corporate borrowing needs.

Financing commitments totaled \$17.6 billion and \$18 billion at March 31, 2014 and December 31, 2013. We anticipate that we will not be required to fund a significant portion of our financing commitments as we continue to work with third party financiers to provide alternative financing to customers. Historically, we have not been required to fund significant amounts of outstanding commitments. However, there can be no assurances that we will not be required to fund greater amounts than historically required.

In the event we require additional funding to support strategic business opportunities, our commercial aircraft financing commitments, unfavorable resolution of litigation or other loss contingencies, or other business requirements, we expect to meet increased funding requirements by issuing commercial paper or term debt. We believe our ability to access external capital resources should be sufficient to satisfy existing short-term and long-term commitments and plans, and also to provide adequate financial flexibility to take advantage of potential strategic business opportunities should they arise within the next year. However, there can be no assurance of the cost or availability of future borrowings, if any, under our commercial paper program, in the debt markets or our credit facilities.

At March 31, 2014, we were in compliance with the covenants for our debt and credit facilities. The most restrictive covenants include a limitation on mortgage debt and sale and leaseback transactions as a percentage of consolidated net tangible assets (as defined in the credit agreements), and a limitation on consolidated debt as a percentage of total capital (as defined). When considering debt covenants, we continue to have substantial borrowing capacity.

Off-Balance Sheet Arrangements

We are a party to certain off-balance sheet arrangements including certain guarantees. For discussion of these arrangements, see Note 10 to our Condensed Consolidated Financial Statements.

Contingent Obligations

We have significant contingent obligations that arise in the ordinary course of business, which include the following: **Legal** Various legal proceedings, claims and investigations are pending against us. Legal contingencies are discussed in Note 16 to our Condensed Consolidated Financial Statements, including certain employment, labor and benefits litigation.

Environmental Remediation We are involved with various environmental remediation activities and have recorded a liability of \$646 million at March 31, 2014. For additional information, see Note 9 to our Condensed Consolidated Financial Statements.

Table of Contents

Income Taxes We have recorded a liability of \$1,114 million at March 31, 2014 for uncertain tax positions. For further discussion of income taxes, see Note 3 to our Condensed Consolidated Financial Statements.

Non-GAAP Measures**Core Operating Earnings, Core Operating Margin and Core Earnings Per Share**

Our unaudited condensed consolidated interim financial statements are prepared in accordance with accounting principles generally accepted in the United States (GAAP) which we supplement with certain non-GAAP financial information. These non-GAAP measures should not be considered in isolation or as a substitute for the related GAAP measures, and other companies may define such measures differently. We encourage investors to review our financial statements and publicly-filed reports in their entirety and not to rely on any single financial measure. Core operating earnings, core operating margin and core earnings per share exclude the impact of unallocated pension and other postretirement benefit expenses which represent costs not attributable to business segments - see Note 17 to our Condensed Consolidated Financial Statements. Management uses core operating earnings, core operating margin and core earnings per share for purposes of evaluating and forecasting underlying business performance. Management believes these core earnings measures provide investors additional insights into operational performance as unallocated pension and other postretirement benefit cost, primarily represent costs driven by market factors and costs not allocable to U.S. government contracts.

Reconciliation of GAAP Measures to Non-GAAP Measures

The table below reconciles the non-GAAP financial measures of core operating earnings, core operating margin and core earnings per share with the most directly comparable GAAP financial measures of earnings from operations, operating margins and diluted earnings per share.

(Dollars in millions, except per share data)

	Three months ended March 31			
	2014		2013	
Revenues	\$20,465		\$18,893	
Earnings from operations, as reported	\$1,542		\$1,528	
Operating margins	7.5	%	8.1	%
Unallocated pension and other postretirement benefit expense	\$553		\$339	
Core operating earnings (non-GAAP)	\$2,095		\$1,867	
Core operating margins (non-GAAP)	10.2	%	9.9	%
Diluted earnings per share, as reported	\$1.28		\$1.44	
Unallocated pension and other postretirement benefit expense ⁽¹⁾	\$0.48		\$0.29	
Core earnings per share (non-GAAP)	\$1.76		\$1.73	
Weighted average diluted shares (in millions)	754.1		768.7	

⁽¹⁾ Earnings per share impact is presented net of the federal statutory rate of 35.0%.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no significant changes to our market risk since December 31, 2013.

Table of Contents

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures.

Our Chief Executive Officer and Chief Financial Officer have evaluated our disclosure controls and procedures as of March 31, 2014 and have concluded that these disclosure controls and procedures are effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and is accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

(b) Changes in Internal Control Over Financial Reporting.

There were no changes that occurred during the first quarter of 2014 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

Table of Contents

Part II. Other Information

Item 1. Legal Proceedings

Currently, we are involved in a number of legal proceedings. For a discussion of contingencies related to legal proceedings, see Note 16 to our Condensed Consolidated Financial Statements, which is hereby incorporated by reference.

Item 1A. Risk Factors

There have been no material changes in our risk factors from those disclosed in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2013.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

The following table provides information about purchases we made during the quarter ended March 31, 2014 of equity securities that are registered by us pursuant to Section 12 of the Exchange Act:

(Dollars in millions, except per share data)

	(a)	(b)	(c)	(d)
	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares That May Yet be Purchased Under the Plans or Programs ⁽²⁾
1/1/2014 thru 1/31/2014	3,798,813	\$138.30	3,613,468	\$10,310
2/1/2014 thru 2/28/2014	12,024,644	127.19	11,573,458	8,839
3/1/2014 thru 3/31/2014	4,169,781	127.10	4,163,910	8,310
Total	19,993,238	\$129.28	19,350,836	

We purchased an aggregate of 19,350,836 shares of our common stock in the open market pursuant to our repurchase program and 642,402 shares transferred to us from employees in satisfaction of minimum tax withholding obligations associated with the vesting of restricted stock units during the period. We did not purchase shares in swap transactions.

(1)

On December 16, 2013, the Board approved a new repurchase plan (the Program) for up to \$10 billion of common stock. Unless terminated earlier by a Board resolution, the Program will expire when we have used all authorized funds for repurchase.
