América Móvil's second quarter of 2015 financial and operating report

Mexico City, July 16, 2015 - América Móvil, S.A.B. de C.V. ("América Móvil") [BMV: AMX] [NYSE: AMX] [NASDAQ: AMOV] [LATIBEX: XAMXL], announced today its financial and operating results for the second quarter of 2015.

We ended June with 367.7 million access lines, 1.4% more than a year before. This figure includes 288.8 million wireless subscribers, 34.6 million landlines, 22.8 million broadband accesses and 21.5 million PayTV units.

Our wireless subscriber base was up 0.8% year-on-year, even after net disconnections of 850 thousand wireless subscribers. Our fixed RGUs have increased 3.7% annually, and have been particularly strong in Colombia, Ecuador, Peru and the Central America-Caribbean block.

América Móvil consolidated revenues totaled 220 billion pesos in the second quarter and EBITDA was 68.3 billion pesos. The EBITDA margin declined from 32.6% to 31.1%. At constant exchange rates service revenues were slightly down in the period, -0.5%, while EBITDA came down by 3.1%.

Our operating profits reached 36.3 billion pesos and were up 2.2% from the year-earlier quarter. Depreciation and amortization charges were down 11.9% year-on-year, due to an impairment registered by Telekom Austria last year.

Our comprehensive financing costs, 11.0 billion pesos, were down 23.9% from the year before. Our net profit totaled 14.0 billion pesos. It was equivalent to 21 peso cents per share or 27 dollar cents per ADR.

Net debt increased 6.8 billion pesos from December. This figure reflects the reclassification in May of our investment in KPN from a long-term investment valued at cost to an "available for sale" asset valued also at cost. As such, the shares are now included in the cash and securities item line, which is deducted from gross debt to come up with the net debt figure. The net debt to EBITDA ratio stood at 1.77 times at the end of June.

In the first half of the year capital expenditures reached 70.9 billion pesos and our share buy-backs 23.1 billion.

(2) 20 shares per ADR

(3) All figures in the table reflect retroactively the 2:1 split that became effective on June 29th, 2011

Relevant Events

On May 20th we placed a €3 billion bond exchangeable into ordinary shares of KPN. The bond has a maturity of 5 years and bears no interest. The strike price for the KPN shares is 45% above the reference price of €3.3798 per KPN share. The underlying shares are approximately 612.2 million, roughly 14.3% of the outstanding KPN shares. Upon redemption at maturity or at the time investors exercise their option, AMX may elect to settle in cash, deliver the underlying KPN shares or a combination of both.

On July 15th, we successfully launched our new satellite Star One C4 in the Kourou Space Center in French Guiana. This satellite, our eighth one, has 48 transponders in the Band KU for television and other telecommunication services, and its shadow covers the Americas from the United States to Tierra del Fuego in Argentina.

Access Lines

We ended June with 367.7 million access lines, 1.4% more than a year before. This figure includes 288.8 million wireless subscribers, 34.6 million landlines, 22.8 million broadband accesses and 21.5 million PayTV units.

We continued to adjust the wireless subscriber count across our operations to meet our corporate churn policies. Our subscriber base came down 0.2% as compared to the close of 2014 while our fixed RGUs increased 0.6%, with important increases in Colombia, Ecuador, Peru and in the Central America-Caribbean block.

Brazil is our largest operation in terms of access lines with 107.7 million, 30% of our base, followed by Mexico with just over 94.2 million lines or 26%.

(1) Equity Participation of Telmex Internacional of which América Móvil owns 97.79%.

(2) On December 31, 2014, Embratel and Net merged into Claro of which América Móvil owns 78.23% through Telmex Internacional and 16.70% through Sercotel. As of February 2nd, reflects the acquisition of minority shareholders.

(3) Until April 30th; it is now available for sale.

Wireless Subscribers

Our total subscriber base finished June with 288.8 million clients after net disconnections of 850 thousand subs in the quarter, including 739 thousand subs in Brazil, 582 thousand in Ecuador, 464 thousand in Colombia and 298 thousand in Argentina. On the other hand, Mexico contributed with 559 thousand net gains, the Central America-Caribbean block with 448 new subs and Chile with 151 thousand net additions.

Our wireless postpaid base grew 5.0% in annual terms reaching a total of 60.7 million subscribers. We added 608 thousand contract clients in the quarter of which 293 thousand came from Mexico.

In relative terms, Chile, Brazil and the Central America-Caribbean block exhibited the highest growth rate, 3.9%, 3.5% and 3.3%, respectively.

Half of our subscriber base is split between Mexico and Brazil. Colombia represents 10% of our subs followed by TracFone in the US with 9%. Altogether, our operations in the Argentinean block represent approximately 8%, while those in Europe and the ones in the Central America-Caribbean block each account for 7%.

Fixed Revenue Generating Units

At the end of June we had 78.9 million RGUs, 3.7% more than in the same period of 2014. We added 530 thousand net RGUs in the quarter, including 138 thousand landlines and 435 thousand broadband accesses. The fixed broadband base increased 5.2% over the year and the number of fixed lines rose 2.8%. We disconnected 112 thousand DTH PayTV units in Brazil, yet, our total base increased by 3.6% in annual terms.

Altogether, our operations in South America posted an annual growth of 6.4%, with Colombia growing 10.6% and, although from a small base, Peru and Ecuador rising 12.4% and 10.7% respectively.

Brazil concentrates nearly half of our fixed RGUs, 46%, Mexico accounts for 27%, Colombia 7%, and both Central America and Europe approximately 6%.

América Móvil Consolidated Results

Whereas at the start of the second quarter the U.S. economy seemed to have hit a soft patch, subsequent economic data point to its having been short lived. The Fed continues to affirm that they expect their first interest rate increase in years to take place in 2015, with market expectations centering in a September move. Against this backdrop we are seeing a mixed bag of economic indicators throughout Latin America, with Mexico's economy appearing to be gaining momentum—retail sales have exceeded expectations—, Brazil's continuing to go deeper into negative territory, Colombia assimilating the blow to the economy from the drop in oil prices and the rest of the region experiencing relatively stable, albeit decelerating, economic growth.

América Móvil consolidated revenues totaled 220 billion pesos in the second quarter, bringing to 440 billion pesos the cumulative number through June. EBITDA of 68.3 billion pesos—136.6 billion through June—was down 5.0% year-on-year, as the EBITDA margin declined from 32.6% to 31.1%. At constant exchange rates service revenues were slightly down in the period, -0.5%, while EBITDA came down by 3.1%.

Service revenues continued their trend. In Central America and the Caribbean they maintained a stable growth rate, in the South American block they experienced a solid, though declining, expansion, in Europe they are trending up and in Mexico growth rates kept coming down, but seem to be stabilizing.

Our operating profits reached 36.3 billion pesos and were up 2.2% from the year-earlier quarter. Depreciation and amortization charges were down 11.9% year-on-year, as the prior year Telekom Austria had registered an impairment of its Bulgarian investments. Our comprehensive financing costs, 11.0 billion pesos, were down 23.9% from the year before.

Our net profit totaled 14.0 billion pesos. It was equivalent to 21 peso cents per share or 27 dollar cents per ADR.

* Results include Telekom Austria Pro-forma.

** Includes current portion of Long Term Debt.

Net debt increased 6.8 billion pesos from December. This figure reflects the reclassification in May of our investment in KPN from a long-term investment valued at cost to an “available for sale” asset also valued at cost. As such, the shares are now included in the cash and securities item line at our carrying cost of 39.5 billion pesos, which is deducted from gross debt to come up with the net debt figure. It must be said that the carrying cost is lower than the market value of the shares which was 51.4 billion pesos at the end of June. In the first half of the year capital expenditures reached 70.9 billion pesos and our share buy-backs 23.1 billion.

Mexico

Mexico is undergoing a major change in the telecommunications sector with the entrance of a new and strong competitor in the mobile space and the continued expansion of cable operators offering triple-play packages. Voice revenues have declined significantly on both platforms, in line with the world tendency towards a greater use of data services. Ten years ago, Telmex’ voice revenues totaled the equivalent of 9.2 billion U.S. dollars; this year they will represent approximately one third of that (3.0 billion U.S. dollars), a continuous decline that has lasted several years.

We are now three players in the mobile sector, all of us with spectrum, distribution, technology and capital. The new player has replaced two weak players that had sharply limited themselves. Their lack of investment is evident in the pricing at which those companies were sold to the new entrant. Now the principal objective of the Telecoms Reform has been achieved: to increase the level of effective competition in the telecom sector, which is now made up of strong and experienced global players with both the capacity and willingness—we hope—to invest for the long term; a strong and

preponderant player in content, open broadcast and PayTV capable of offering triple play services through its cable and DTH networks; local operators focused on fixed-broadband services capable of structuring their own triple-play packages; and a good number of new MVNOs (Mobile Virtual Network Operators).

Greater investment in the sector and more competition will bring about more penetration and new plans for the benefit of Mexican consumers. We will lead the integration of the Mexico and U.S.A. telecoms market, one with 440 million POPs . Our main competitor has the highest share in this market with around 130 million mobile customers and approximately 46.2 million RGUs, excluding their Direct TV clients.

Today we announced our “Sin Fronteras” Plan (“No Borders Plan”). With this plan our postpaid customers will be able to make calls from Mexico to the U.S that will be charged as a local call, with no long distance charges, while in the U.S. our clients will be able to use the minutes, SMS and data under their plans as if they were in Mexico, with no roaming charges. All postpaid subscribers are eligible to get this plan which is priced at 50 pesos (3.17 dollars), including taxes.

In the second quarter we added 559 thousand mobile clients in Mexico of which 293 thousand were postpaid subscribers, to finish June with 72.6 million clients, 1.9% more than a year before. On the fixed-line platform we added 52 thousand RGUs, which took us to 21.6 million RGUs, down from 22.3 million in June 2014.

Our revenues were down 2.4% in the quarter from the year-earlier quarter to 68.1 billion pesos, with service revenues declining 7.5%. Voice revenues plummeted on both platforms: -19.2% on the fixed-line platform; -14.6% on the mobile one. Data revenues expanded 2.9% and 4.4% on the mobile and fixed-line platforms respectively helping partly offset the reduction in voice revenues.

Second quarter EBITDA came in at 28.2 billion pesos, having come down 7.3% from the year-earlier quarter. Through June EBITDA stood at 56.0 billion pesos, for a 7.5% decline vs. the prior year.

Argentina, Paraguay and Uruguay

We ended June with 21.7 million wireless subscribers after net disconnections of 239 thousand clients in the second quarter. On the fixed-line platform we had had 581 thousand fixed RGUs.

Second quarter revenues of 6.7 billion Argentinean pesos were 13.3% greater than in the prior year with wireless service revenues rising 24.0%. Wireless data revenues shot up 32.5% on an annual basis and now represent nearly half of our service revenues, 48.9%. Fixed-line revenues of 426 million Argentinean pesos were up 3.2% year-on-year.

EBITDA of 2.3 billion Argentinean pesos in the quarter was 21.0% greater than in the previous year. The EBITDA margin was equivalent to 34.9% of revenues, 2.3 percentage points higher than in the year-earlier quarter.

On June 24th, we paid the equivalent of 360 million dollars for 30 MHz in the 700 MHz frequency. The new spectrum we have acquired will help us continue with the rollout of our 4GLTE networks in the largest cities of Argentina including Buenos Aires and the greater metropolitan area.

Brazil

We had 71.2 million wireless subscribers at the end of June—3.5% more than a year before—having disconnected 804 thousand prepaid subscribers in the quarter. Our wireless postpaid subscriber base was up 7.7% and it is just shy of 16 million; it represents 26% of the base. On the fixed-line platform we had 36.5 million RGUs, 5.8% more than a year before. We connected 144 thousand new broadband accesses and 138 thousand landlines. On the PayTV segment, we reported net disconnections of 112 thousand ClaroTV satellite units that had past-due balances but on the Net Serviços cable product we continue to register positive numbers.

It is worth mentioning that we are making important efforts to continue to deliver high quality and competitively priced services and to adapt to deteriorating macroeconomic conditions. In the second quarter we generated revenues of 9.1 billion reais, 2.5% above the prior year, with service revenues rising 3.9% and equipment revenues declining 18.5% annually. On the wireless platform, voice revenues came down 18.7% year-on-year as a consequence of the 33% cut in mobile termination rates effective in the first quarter and to a lesser extent to the substitution of voice for value added services and applications which helped data revenues rise 34.4%. On the fixed line platform, broadband revenues were up 10.1% year-on-year and PayTV revenues 8.1%, while voice revenues were down 7.9% as a result of a 16.5% decline in long distance revenues.

Second quarter EBITDA totaled 2.5 billion reais; it was 10.4% higher than in the same quarter of 2014. The EBITDA margin for the period was 27.4%, 1.9 percentage points greater than that of the prior year. For the most part, the improvement in EBITDA is linked to a reduction in the costs of service as our networks have become more efficient in terms of managing data and content, including a substantially reduced demand for other operator's links on account of the substantial investments in infrastructure we made over the last few years.

Chile

We added 151 thousand wireless subscribers in the second quarter and finished June with just over six million wireless clients, 3.9% more than a year before. We also had 1.2 million fixed RGUs.

Revenues were up 9.5% relative to the 2014 period with service revenues rising 1.7% year-on-year and equipment revenues jumping 77.9%. On the wireless platform, data revenues expanded 20.4% while wireless voice revenues dropped 13.7%. The annual comparison of both service lines is affected by regulatory changes implemented in the last quarter of 2014 related to the way we account for voice and data revenues from postpaid contracts. On the fixed platform, data revenues increased 22.5% over the year while voice revenues were down 7.5%.

EBITDA declined 25.1% in the quarter to 10.2 billion Chilean pesos; it was equivalent to 5.3% of revenues.

Colombia

Our wireless subscriber base finished June with 29.4 million clients after net disconnections of 464 thousand clients in the second quarter. On the fixed-line platform we had 5.6 million clients—10.6% more than a year before—including 1.9 million broadband accesses, up 17.4%, and 1.5 million landlines, 15.3% more than a year before.

Our second quarter revenues were slightly lower than last year's at 2.8 trillion Colombian pesos, but service revenues declined 5.7% from the year-earlier quarter reflecting negative trends in the wireless segment, which has become more competitive. The decline in service revenues was brought about by a 22.5% fall in wireless voice revenues—with prices falling 22.8%—that more than offset solid revenue growth in all other business lines: 18.5% in mobile data; 17.0% in PayTV and 10.0% in fixed-data. Our clients are migrating to more competitive plans as a result of regulatory changes related to the elimination of mandatory contract duration terms and also as a result of weaker economic conditions in the country.

EBITDA came down 6.2% to 1.1 trillion Colombian pesos and was equivalent to 38.6% of revenues.

Ecuador

Our wireless subscriber base finished June with 9.9 million clients—18.8% below last year—after net disconnections of 582 thousand subscribers that were not generating traffic. Our postpaid subscriber base was up 1.2% over the year and reached 2.4 million. Our fixed RGUs were 10.7% above the prior year at 368 thousand.

We generated revenues of 406 million dollars in the second quarter, 6.5% below the precedent year. Wireless voice revenues dropped 11.9% as a result of aggressive airtime promotions implemented in the quarter that brought the average revenue per minute of voice down 12.6% in an annual basis. Data revenues declined 3.0% year-on-year. Fixed line revenues increased 2.6% annually.

Second quarter EBITDA of 173 million dollars came down 10.1% relative to last year's period on account of the decline in wireless revenues and an increase in subscriber acquisition and retention costs. The EBITDA margin for the period stood at 42.6%.

We are in the process of testing our 4GLTE networks to be launched in the main cities in Ecuador. Our new platform will enable us to be more competitive in certain segments of the market offering higher data speeds and new value added services.

Peru

Our wireless subscriber base finished June with 12.4 million wireless subscribers, 2.4% more than in the same period of the prior year, while our postpaid base grew 7.3%. On the fixed platform, we had 1.3 million RGUs, 12.4% more than a year before, with the fixed broadband division rising 26.8%.

We obtained revenues of 1.3 billion soles, 0.4% more than a year before with service revenues rising 1.0%. The average price per minute of voice dropped 11.2% year on year—as a result of aggressive promotions in the wireless market along with a 63% cut in termination rates effective April 1st—bringing voice revenues down 10%. Wireless data revenues, on the other hand, posted an annual growth of 14.7%. On the fixed platform, data revenues jumped 20.3% over the prior year, PayTV revenues were up 9.6% and voice revenues remained flat.

EBITDA dropped 33.1% relative to last year's to 329 million soles. The EBITDA margin for the period declined sharply and stood at 25.4% of revenues. The deterioration of the quarter's EBITDA is linked to an important increase in subscriber acquisition and retention costs—partly linked to the depreciation of the Peruvian sol—and to the negative impact of the termination rate cut.

Central America and the Caribbean

Altogether, our operations in the Central America-Caribbean block finished June with 27.1 million access lines including 19.9 million wireless subscribers and 7.2 million fixed RGUs. We added 448 thousand wireless subscribers—a fourth of which were postpaid—bringing our sub base up 4.5% over the end of 2014. On the fixed platform, we gained 104 thousand new RGUs for an annual increase of 6.5%.

Revenues topped one billion dollars, exceeding by 2.0% those of the year-earlier quarter. At constant exchange rates, service revenues were up 2.9% on the back of data revenue growth which was up 15.1% on the wireless platform and 5.8% on the fixed, and PayTV revenues that expanded 11.7%. Wireless voice revenues declined 2.8% relative to last year's dragged by a sharp decline in Puerto Rico, whereas wireline voice revenues dropped 5.2% as we continue to experience a deceleration of both local and long distance traffic in the region overall.

EBITDA of 344 million dollars came in 3.0% above last year's and was equivalent to 34.3% of revenues, climbing 0.3 percentage points in the last twelve months. Our operations in Central America have become more efficient in terms of cost controls allowing for an 18.1% increase in EBITDA.

United States

We ended June with 25.7 million clients, 0.8% more than a year before. Our Lifeline product, SafeLink showed solid growth in the quarter and our new brand Total Wireless appears to be gaining more traction.

Second quarter revenues of 1.7 billion dollars were down 1.2% as a result of a decline in equipment revenues of 19.8%. Service revenues were almost flat, at 0.4% year-on-year.

Our EBITDA for the quarter totaled 197 million dollars; down 5.2% from the year before as a result of higher subscriber acquisition costs.

Telekom Austria Group

We finished June with 24.5 million access lines, 1.7% more than a year before. Our wireless subscriber base topped 20 million clients, up 0.6% year-on-year, driven by the growth of Bulgaria and Serbia with our postpaid base increasing 2.2%. On the fixed segment, RGUs were up 7.0% to 4.5 million reflecting the acquisition of Blizoo Macedonia and solid growth in Bulgaria and Croatia.

Our second quarter revenues increased 1.8% from a year before and were just above one billion euros. In Austria, revenues grew 6.0% annually, in spite of a negative extraordinary effect of 28.2 million euros in the quarter. On the other hand, the revenues of our operations in Eastern Europe declined on the back of strong competition in Bulgaria, MTR cuts in Croatia and the depreciation of Belarusian ruble vs the euro.

At 322 million euros, the period's EBITDA was 7.0% higher than that of a year before on the back of strict cost controls and overall improvements in Austria. The EBITDA margin stood at 32.0% in the quarter, 1.5 percentage points above last year's.

Glossary of Terms

ARPU	Average Revenue per User. The ratio of service revenues in a given period to the average number of wireless subscribers in the same period. It is presented on a monthly basis.
ARPM	Average Revenue per Minute. The ratio of service revenues to airtime traffic.
Capex	Capital Expenditure. Accrued capital expenditures related to the expansion of the telecommunications infrastructure.
Churn	Disconnection Rate. The ratio of wireless subscribers disconnected during a given period to the number of wireless subscribers at the beginning of that period.
EBIT	Earnings Before Interest and Taxes, also known as Operating Profit.
EBIT margin	The ratio of EBIT to total operating revenue.
EBITDA	Earnings Before Interest, Taxes, Depreciation, and Amortization.
EBITDA margin	The ratio of EBITDA to total operating revenue.
EDGE	Enhanced Data rates for GSM Evolution. A technology that gives GSM the capacity to handle data services for the third generation mobile telephony.
EPS (Mexican pesos)	Earnings per share. Total earnings in Mexican pesos divided by total shares.
Earnings per ADR (US\$)	Total earnings in U. S. dollars divided by total ADRs equivalent.
Equity subscribers	Subscribers weighted by the economic interest held in each company.
GSM	Global System for Mobile communications. It is the world's leading and fastest growing mobile standard.
GPRS	General Packet Radio Service. Enables GSM networks to offer higher capacity, Internet-based-content and packet-based data services. It is a second generation technology.
Gross additions	Total number of subscribers acquired during the period.
Licensed pops	Licensed population. Population covered by the licenses that each of the companies manage.
Market share	A company's subscriber base divided by the total number of subscribers in that country.
MOU	Minutes of Use per subscriber. The ratio of wireless traffic in a given period to the average number of wireless subscribers in that same period. It is presented on a monthly basis.

Net subscriber additions	The difference in the subscriber base from one period to another. It is the different between gross additions and disconnections.
Net debt	Total short and long term debt minus cash and marketable securities.
Net debt / EBITDA	The ratio of total short and long term debt minus cash and securities to trailing 12-month income before interest, taxes, depreciation and amortization.
Prepaid	Subscriber that may purchase airtime to recharge a cellular phone. The client does not hold a contract with the company for voice and data services.
Postpaid	Subscriber that has a contract for the use of airtime. The client has no need of activating airtime, it is done so immediately.
Push-to-talk	Enables compatible mobile phones to function like two-way radios.
SMS	Short Message Service.
SAC	Subscriber Acquisition Cost. The sum of handset subsidies, marketing expenses and commissions to distributors for handset activation. Handset subsidy is calculated as the difference between equipment cost and equipment revenues.
Wireless penetration	The ratio of total wireless subscribers in any given country divided by the total population in that country.
