- **Total accesses** increased 1.4% over 2Q16, to 74,335 thousand. The postpaid segment continues to be worthy of mention, with y-o-y expansion of 9.7%, totaling 34,683 thousand accesses and accounting for 46.7% of mobile accesses, up by 3.5 p.p. in the annual comparison.
- **Total market share** came to 30.7% in 2Q17 (+1.8 p.p. y-o-y). Telefônica Brasil gained 59.0% of **postpaid** net additions in the second quarter (50.5% in 1H17), with a market share of 42.3% in June. The Company also has a relevant market share in 4G-technology terminals (34.6% in June 2017), reflecting the quality of the customer base and the Company's data focused strategy.
- In the second quarter, **mobile net additions** came to 338 thousand accesses, with postpaid net additions totaling 858 thousand accesses (+131.8% y-o-y) and net prepaid disconnections amounting to 519 thousand accesses, accompanied by a significant migration of prepaid clients to control plans.
- The **prepaid customer base** contracted by 4.9% in June 2017 over June 2016, due to the migration of prepaid clients to control plans and the continuous adoption of a restrictive policy for disconnecting inactive clients within the criteria established by ANATEL, underlying the Company's focus on rationality and profitability.

- The access base continued to expand in the **machine-to-machine (M2M)** market, reaching 5.6 million customers in June 2017, 21.8% up on the previous year, leading the segment with a market share of 40.8% in June 2017.

**Note:** As of 3Q16, for a better understanding of the business and to better reflect the results of our digital initiatives, digital services and VAS revenues were booked under the same line. With this in mind and for comparison purposes, historical figures were reclassified. The complete history of 2015 and 2016 data can

be found on our website ([www.telefonica.com.br/ir](http://www.telefonica.com.br/ir)).

Net mobile revenue climbed 3.8% in 2Q17 over 2Q16, due to higher mobile services revenue, 4.8% up y-o-y. The mobile services revenue growth was fueled by the continuous increase in data and digital services revenue, partially offset by lower voice revenue, by the effect of MTR reductions in February 2017 and by lower revenue from the sale of handsets. Excluding the regulatory effect, second-quarter mobile services revenue increased by 7.0% over 2Q16.

**Outgoing voice** revenue fell 30.4% over 2Q16, mainly reflecting the higher consumption of data services as a substitute for voice services. The prepaid segment was also influenced by the y-o-y reduction in the volume of recharges due to current macroeconomic conditions.

**Interconnection** revenue contracted by 28.8% over 2Q16, mainly due to the MTR tariff reduction in February 2017 (-45.6%). With the normalization of this effect, interconnection revenue increased 11.0% in 2Q17 over 2Q16, thanks to the higher offer of off-net traffic by the industry.

**Data and digital services** revenue rose 32.4% y-o-y and continued to be the main source of the Company's revenue growth, reflecting our strategy focused on data. This performance was influenced by the upselling of data bundles, particularly in postpaid offers, by a higher adoption of family plans and by the higher penetration of smartphones in our customer base. In 2Q17, data and digital services revenue increased to 71.8% of net mobile services revenue, up by 14.9 p.p. y-o-y.

**SMS (P2P Messaging)** revenue fell 3.5% y-o-y in 2Q17, reflecting the lower consumption of this service due to its maturity.

In the second quarter, **mobile internet** revenue moved up by 44.1% over the same quarter last year and by 4.0% over 1Q17, accounting for 78.4% of 2Q17 data revenue. This performance is directly linked to the growth in postpaid data accesses, particularly in 4G plans, the increased sale of stand-alone data packages and the growth of the smartphone customer base. At the close of 2Q17, 80.8% of our customer base already had smartphones or web phones, 4.3 p.p. up on 2Q16.

**Digital services** revenue climbed 6.0% in 2Q17 over 2Q16, mainly due to the inclusion of VAS in control and prepaid plans in the quarter.

**Other services** revenue presented a reduction of R\$ 46 million over 2Q16, due to a policy change related to the credits concession of the Vivo Valoriza program, which created a positive impact in 2Q16.

**Mobile handset revenue** contracted by 15.2% in 2Q17 over 2Q16, mainly due to the Company's higher selectiveness in the sale of terminals focused on higher-value customers.

- The **fixed base** totaled 23,250 thousand **accesses** in 2Q17, 2.1% down on 2Q16, mainly influenced by the performance of voice accesses.
- **Fixed voice accesses** totaled 14,168 thousand in 2Q17, 3.9% down on 2Q16, mainly reflecting the fixed-to-mobile convergence and the voice-to-data substitution. Voice ARPU decreased by 3.4% y-o-y, fueled by the negative impact caused by the reduction of interconnection rates.
- **Fixed broadband accesses** registered 7.4 million customers in 2Q17, 2.6% more than in 2Q16. 2) Non-voice revenue includes revenues for Broadband, Corporate Data and IT, Pay TV and Other Services.

Net revenue from the fixed business fell 1.3% in 2Q17 over 2Q16, impacted by the fixed-to-mobile tariff (VC) and fixed interconnection tariff (TU-RL and TU-RIU) reductions in February 2017, partially offset by the positive evolution in broadband, corporate data and IT revenues. Excluding the negative effect from tariff reductions, net fixed services revenue rose 0.2%.

**Voice** revenue fell 7.6% in 2Q17 over 2Q16, mainly due to the maturity of the service and the fixed-to-mobile substitution. Excluding VC reductions (-17.7%), voice revenue fell 4.9% y-o-y.

**Interconnection** revenue decreased by 21.6% over 2Q16, due to the reduction in TU-RL (-35.3%) and TU-RIU (-50.9%) in February 2017. Excluding this effect, interconnection revenue contracted by 4.0%, due to lower incoming traffic.

**Pay TV** revenue contracted 1.9% in 2Q17 over 2Q16. ## Additional Notes

On July 3, 2017, the Company announced that on that date its wholly-owned subsidiary Telefônica Data S.A. (“TData”) acquired all the shares issued by Terra Networks Brasil S.A. (“Terra Networks”), held by SP Telecomunicações Participações S.A. (“SPTE”), the Company’s controlling shareholder (“Transaction”).

Terra Networks renders digital (own and third-party value-added services (“VAS”) and carrier billing, as well as mobile channels for sales and relationship) and advertising services.

TData is a company dedicated to the exploration of VAS, as well as integrated business solutions in telecommunications, technical assistance of telecommunications equipment and network maintenance of equipment and networks and development of projects.

The purpose of the Transaction is to expand and integrate the commercial offer of digital services that can add immediate value to TData's and the Company's customer base, as well as generate TData's service offers to Terra Networks' customer base and service subscribers and, thanks to Terra Networks' national coverage and expertise, generate leverage for TData's advertising business. In addition, since the Company has the skills to create new digital media products for mobile and advertising and Terra Networks has know-how in customer services, selling and operating digital services for specific customers, the acquisition by TData will also facilitate the exchange of know-how between the companies involved and maximize the unification of the commercial conditions agreed with TData's and Terra Networks' suppliers, as well as with regular suppliers.

The total price paid by TData as consideration for the acquisition of the shares issued by Terra Networks was R\$ 250 million, in a single installment, with no need for any financing, using only cash available from TData. Such value was calculated based on the economic value of the company, using the discounted cash flow criteria, and supported by an appraisal report contracted by TData's Management.

The Transaction is subject to the conditions usually applicable to this type of deal and was preceded by a legal and financial audit of Terra Networks and valuation by an independent company. In addition, the respective sale and purchase agreement contains terms and provisions common to this type of transaction.

The Transaction is not subject to the obtainment of any regulatory authorizations or approvals by the Company's bodies. The Transaction, as designed, does not change the Company's shareholding structure nor causes any dilution to its shareholders, generating value to them through accelerated growth of digital

services and increased operational efficiency. In addition, there are no relevant costs related to the Transaction.
