FORM 10-K

**ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934**

For the fiscal year ended June 30, 2007

OR

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission file number: 0-23192

CELADON GROUP, INC.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
Incorporation or organization)

13-3361050
(I.R.S. Employer
Identification Number)

9503 East 33rd Street
Indianapolis, IN
(Address of principal executive offices)

46235
(Zip Code)

Registrant's telephone number, including area code: **(317) 972-7000**

Securities registered pursuant to Section 12(b) of the Act: **None**

Securities registered pursuant to Section 12(g) of the Act:

Common Stock (\$0.033 par value)

Series A Junior Participating Preferred Stock Purchase Rights

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Edgar Filing: CELADON GROUP INC - Form 10-K

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

On December 29, 2006, the last business day of the registrant's most recently completed second fiscal quarter, the aggregate market value of the registrant's common stock (\$0.033 par value) held by non-affiliates (21,372,114 shares) was approximately \$358 million, based upon the reported last sale price of the common stock on that date. The exclusion from such amount of the market value of shares of common stock owned by any person shall not be deemed an admission by the registrant that such person is an affiliate of the registrant.

The number of outstanding shares of the registrant's common stock as of the close of business on August 28, 2007 was 23,663,211.

Disclosure Regarding Forward Looking Statements

The Private Securities Litigation Reform Act of 1995 provides a “safe harbor” for forward-looking statements. Certain statements contained in this Form 10-K and those portions of the 2007 Proxy Statement incorporated by reference may be considered forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and, as such, involve known and unknown risks, uncertainties and other factors which may cause the actual results, events, performance, or achievements of the Company to be materially different from any future results, events, performance, or achievements expressed or implied by such forward-looking statements. Words such as “anticipates,” “estimates,” “expects,” “projects,” “intends,” “plans,” “believes,” and words or terms of similar substance connection with any discussion of future operating results, financial performance, or business plans identify forward-looking statements. All forward-looking statements reflect our management’s present expectation of future events and are subject to a number of important factors and uncertainties that could cause actual results to differ materially from those described in the forward-looking statements. While it is impossible to identify all factors that may cause actual results to differ, the risks and uncertainties that may affect the Company’s business, performance, and results of operations include the factors discussed in Item 1A of this report. Subsequent written and oral forward-looking statements attributable to the Company or persons acting on its behalf are expressly qualified in their entirety by the cautionary statements in this paragraph and elsewhere in this Form 10-K.

All such forward-looking statements speak only as of the date of this Form 10-K. The Company expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in the Company’s expectations with regard thereto or any change in events, conditions, or circumstances on which any such statement is based.

For these statements, we claim the protection of the safe harbor for forward-looking statements contained in Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934 (“Exchange Act”), as amended.

References to the “Company”, “Celadon”, “we”, “us”, “our” and words of similar import refer to Celadon Group, Inc. and consolidated subsidiaries.

Item 1. Business

Introduction

We are one of North America’s twenty largest truckload carriers as measured by revenue. We generated \$502.7 million in operating revenue during our fiscal year ended June 30, 2007. We have grown significantly since our incorporation in 1986 through internal growth and a series of acquisitions since 1995. As a dry van truckload carrier, we generally transport full trailer loads of freight from origin to destination without intermediate stops or handling. Our customer base includes Fortune 500 shippers such as Alcoa, Carrier Corporation, International Truck & Engine, John Deere, Kohler Company, Mercedes-Benz, Philip Morris, Phillips Lighting, and Wal-Mart.

In our international operations, we offer time-sensitive transportation in and between the United States and its two largest trading partners, Mexico and Canada. We generated approximately one-half of our revenue in fiscal 2007 from international movements, and we believe our annual border crossings make us the largest provider of international truckload movements in North America. We believe that our strategically located terminals and experience with the language, culture, and border crossing requirements of each North American country provide a competitive advantage in the international trucking marketplace.

We believe our international operations, particularly those involving Mexico, offer an attractive business niche for several reasons. The additional complexity and the need to establish cross-border business partners and to develop a strong organization and an adequate infrastructure in Mexico afford some barriers to competition that are not present in traditional U.S. truckload service. In addition, the expected continued growth of Mexico's economy, particularly exports to the U.S., positions us to capitalize on our cross-border expertise.

3

Table of Contents

Our success is dependent upon the success of our operations in Mexico and Canada, and we are subject to risks of doing business internationally, including fluctuations in foreign currencies, changes in the economic strength of the countries in which we do business, difficulties in enforcing contractual obligations and intellectual property rights, burdens of complying with a wide variety of international and United States export and import laws, and social, political, and economic instability. Additional risks associated with our foreign operations, including restrictive trade policies and imposition of duties, taxes, or government royalties by foreign governments, are present but largely mitigated by the terms of NAFTA. Information regarding our revenue derived from foreign external customers and long-lived assets located in foreign countries is set forth in Note 11 to the consolidated financial statements filed as part of this report.

In addition to our international business, we offer a broad range of truckload transportation services within the United States, including long-haul, regional, dedicated, and logistics. With the acquisitions of certain assets of Highway Express, Inc. (“Highway”) in August 2003, CX Roberson, Inc. (“Roberson”) in January 2005, Erin Truckways Ltd., d/b/a Digby Truck Line, Inc. (“Digby”) in October 2006, Warrior Services Inc. d/b/a Warrior Xpress (“Warrior”) in February 2007, and Air Road Express Inc. (“Air Road”) in June 2007, we expanded our operations and service offerings within the United States and significantly improved our lane density, freight mix, and customer diversity.

We also operate TruckersB2B, Inc., a profitable marketing business that affords volume purchasing power for items such as fuel, tires, and equipment to approximately 21,000 member trucking fleets representing approximately 455,000 tractors. TruckersB2B represents a separate operating segment under generally accepted accounting principles. Information regarding revenue, profits and losses, and total assets of our transportation and e-commerce (TruckersB2B) operating segments is set forth in Note 11 to the consolidated financial statements filed as part of this report.

Operating and Sales Strategy

We approach our trucking operations as an integrated effort of marketing, customer service, and fleet management. As a part of our strategic plan implemented in 2001, we identified as priorities: increasing our freight rates; decreasing our reliance on automotive industry customers; raising our service standards; rebalancing lane flows to enhance asset utilization; and identifying and acquiring suitable acquisition candidates and successfully integrating acquired operations. To accomplish these objectives, we have sought to instill high levels of discipline, cooperation, and trust between our operations and sales departments. As a part of this integrated effort, our operations and sales departments have developed the following strategies, goals, and objectives:

- *Seeking high yielding freight from targeted industries, customers, regions, and lanes that improves our overall network density and diversifies our customer and freight mix.* We believe that by focusing our sales resources on targeted regions and lanes with emphasis on cross-border or international moves and a north - south direction, we can improve our lane density and equipment utilization, increase our average revenue per mile, and lower our average cost per mile. Each piece of business has rate and productivity goals that are designed to improve our yield management. We believe that by increasing the business we do with less cyclical shippers and reducing our dependency on the automotive industry, our ability to improve rate per mile increases.
- *Focusing on asset productivity.* Our primary productivity measure is revenue per tractor per week. Within revenue per tractor we examine rates, non-revenue miles, and loaded miles per tractor. We actively analyze customers and freight movements in an effort to enhance the revenue

production of our tractors. We also attempt to concentrate our equipment in defined operating lanes to create more predictable movements, reduce non-revenue miles, and shorten turn times between loads. As a result of our efforts over the past several years, automotive parts now comprise less of our overall freight mix, having been replaced primarily by consumer non-durables and other retail products.

Table of Contents

- *Operating a modern fleet to reduce maintenance costs and improve safety and driver retention.* We believe that updating our tractor and trailer fleets has produced several benefits, including lower maintenance expenses, and enhanced safety, driver recruitment, and retention. We have taken two important steps towards modernizing our fleet. First, we shortened the replacement cycle for our tractors from four years to three years. Second, we have replaced approximately 64% of all of our trailers during the last 3 years. These changes allowed us to recognize significant benefits over the past few years because maintenance and tire expenses increase significantly for tractors beyond the third year of operation and for trailers beyond the seventh year of operation, as wear and tear increases and some warranties expire.
- *Continuing our emphasis on service, safety, and technology.* We offer just-in-time, time-definite, and other premium transportation services to meet the expectations of our service-oriented customers. We believe that targeting premium service freight permits us to obtain higher rates, build long-term, service-based customer relationships, and avoid competition from railroad, intermodal, and trucking companies that compete primarily on the basis of price. We believe our recent safety record has been among the best in our industry. In March 2006, 2005, and 2003, at the Truckload Carriers Association Annual Conference, we were awarded first place in fleet safety among all truckload fleets that log more than 100 million miles per year. We have made significant investments in technologies that are intended to reduce costs, afford a competitive advantage with service-sensitive customers, and promote economies of scale. Examples of these technologies are Qualcomm satellite-based tracking and communications systems, our proprietary CelaTrac system that enables customers to track shipments and access other information via the Internet, and document imaging.
- *Maintaining our leading position in cross-border truckload shipments while offering diversified, nationwide transportation services in the U.S.* We believe our strategically located terminals and experience with the languages, cultures, and border crossing requirements of all three North American countries provide us with competitive advantages in the international trucking marketplace. As a result of these advantages, we believe we are the industry leader in cross-border movements between North American countries. These cross-border shipments, which comprised over 51% of our revenue in fiscal 2007, are balanced by a strong and growing business with domestic freight from service-sensitive customers.
- *Seeking strategic acquisitions to broaden our existing domestic operations.* We have made eleven trucking company acquisitions since 1995 (including our acquisition of Cheetah Transportation, Inc. which we disposed of in June 2001), and continue to evaluate acquisition candidates. Our current acquisition strategy, as evidenced by our purchases of certain assets of Highway Express in 2003, CX Roberson in 2005, Digby in October 2006, Warrior in February 2007, and Air Road in June 2007, is focused on broadening our domestic operations through the addition of carriers that improve our lane density,

customer diversity, and service offerings.

Other Services

TruckersB2B. Our TruckersB2B subsidiary is a profitable marketing business that affords volume purchasing power for items such as fuel, tires, insurance, and other products and services to small and medium-sized trucking companies through its website, www.truckersb2b.com. TruckersB2B provides small and medium-sized trucking company members with the ability to cut costs and thereby compete more effectively and profitably with the larger fleets. TruckersB2B has approximately 21,000 member trucking fleets representing approximately 455,000 tractors. Over the past six years, TruckersB2B has improved to \$10.0 million in revenue and an operating profit of \$1.6 million in fiscal 2007, from \$6.7 million in revenue and an operating profit of \$0.9 million in fiscal 2002. TruckersB2B continues to introduce complementary products and services to drive its growth and attract new fleets.

Celadon Dedicated Services. Through Celadon Dedicated Services, we provide warehousing and trucking services to three Fortune 500 companies. Our warehouse facilities are located near our customers' manufacturing plants. We also transport the manufacturing component parts to our warehouses and sequence those parts for our customers. We then transport completed units from our customers' plants.

Table of Contents

Industry and Competition

The full truckload market is defined by the quantity of goods, generally over 10,000 pounds, shipped by a single customer point-to-point and is divided into several segments by the type of trailer used to transport the goods. These segments include van, temperature-controlled, flatbed, and tank carriers. We participate in the North American van truckload market. The markets within the United States, Canada, and Mexico are fragmented, with thousands of competitors, none of whom dominate the market. We believe that the current economic pressures will continue to force many smaller and private fleets into acquisitions or to exit the industry.

Transportation of goods by truck between the United States, Canada, and Mexico is subject to the provisions of NAFTA. Transportation of goods between the United States or Canada and Mexico consists of three components: (i) transportation from the point of origin to the Mexican border, (ii) transportation across the border, and (iii) transportation from the border to the final destination. United States and Canadian based carriers may operate within both countries. United States and Canadian carriers are not allowed to operate within Mexico, and Mexican carriers are not allowed to operate within the United States and Canada, in each case except for a 26-kilometer, or approximately 16 miles, band along either side of the Mexican border. Trailers may cross all borders. We are one of a limited number of trucking companies that participates in all three segments of this cross border market, providing or arranging for door-to-door transport service between points in the United States, Canada, and Mexico.

The truckload industry is highly competitive and fragmented. Although both service and price drive competition in the premium long haul, time sensitive portion of the market, we rely primarily on our high level of service to attract customers. This strategy requires us to focus on market segments that employ just-in-time inventory systems and other premium services. Our competitors for freight include other long-haul truckload carriers and, to a lesser extent, medium-haul truckload carriers and railroads. We also compete with other trucking companies for the services of drivers. Some of the truckload carriers with which we compete have greater financial resources, operate more revenue equipment, and carry a larger total volume of freight than we do.

TruckersB2B is a business-to-business savings program, for small and mid-sized fleets. Competitors include other large trucking companies and other business-to-business buying programs.

Customers

We target large service-sensitive customers with time-definite delivery requirements throughout the United States, Canada, and Mexico. Our customers frequently ship in the north-south lanes (i.e., to and from locations in Mexico and locations in the United States and Eastern Canada). The sales personnel in our offices work to source northbound and southbound transport, in addition to other transportation solutions. We currently service approximately 2,300 trucking customers. Our premium service to these customers is enhanced by the ability to provide significant trailer capacity where needed, state-of-the-art technology, well-maintained tractors and trailers, and 24/7 dispatch and reporting services. The principal types of freight transported include tobacco, consumer goods, automotive parts, various home products and fixtures, lawn tractors and assorted equipment, light bulbs, and various parts for engines.

No customer accounted for more than 10% of our total revenue during any of our three most recent fiscal years.

Drivers and Personnel

At June 30, 2007, we employed 3,548 persons, of whom 2,646 were drivers, 185 were truck maintenance personnel, 582 were administrative personnel, and 135 were dedicated services personnel. None of our U.S. or Canadian employees is represented by a union or a collective bargaining unit.

Table of Contents

Driver recruitment, retention, and satisfaction are essential components of our success. Competition to recruit and retain drivers is intense in the trucking industry. There has been and continues to be a shortage of qualified drivers in the industry. Drivers are selected in accordance with specific guidelines, relating primarily to safety records, driving experience, and personal evaluations, including a physical examination and mandatory drug testing. Our drivers attend an orientation program and ongoing driver efficiency and safety programs. An increase in driver turnover can have a negative impact on our results of operations.

Independent contractors are utilized through a contract with us to supply one or more tractors and drivers for our use. Independent contractors must pay their own tractor expenses, fuel, maintenance, and driver costs and must meet our specified guidelines with respect to safety. A lease-purchase program offered through third party financing sources provides independent contractors the opportunity to lease-to-own a tractor. As of June 30, 2007, there were 399 independent contractors providing a combined 13.2% of our tractor capacity.

Revenue Equipment

Our equipment strategy is to utilize late-model tractors and high-capacity trailers, actively manage equipment throughout its life cycle, and employ a comprehensive service and maintenance program.

We have determined that the average annual cost of maintenance and tires for tractors in our fleet rises substantially after the first three years due to a combination of greater wear and tear and the expiration of some warranty coverages. We believe these costs rise late in the trade cycle for our trailers as well. We anticipate that we will achieve ongoing savings in maintenance and tire expense by replacing tractors and trailers more often. In addition, we believe operating newer equipment will enhance our driver recruiting and retention efforts. Accordingly, in fiscal 2005 we shortened our normal tractor replacement cycle to three years of service from four years of service.

The average age of our owned and leased tractors and trailers was approximately 1.6 and 3.8 years, respectively, at June 30, 2007, and approximately 2.0 and 3.5 years, respectively, at June 30, 2006. We utilize a comprehensive maintenance program to minimize downtime and control maintenance costs. Centralized purchasing of spare parts and tires, and centralized control of over-the-road repairs are also used to control costs.

Fuel

We purchase the majority of our fuel through a network of over 500 fuel stops throughout the United States and Canada. We have negotiated discounted pricing based on certain volume commitments with these fuel stops. We maintain bulk-fueling facilities in Indianapolis, Laredo, and Kitchener, Ontario to further reduce fuel costs.

Shortages of fuel, increases in prices, or rationing of petroleum products can have a materially adverse effect on our operations and profitability. Fuel is subject to economic, political, climatic, and market factors that are outside of our control. We have historically been able to recover a portion of high fuel prices from customers in the form of fuel surcharges. However, a portion of the fuel expense increase is not recovered due to several factors, including the base fuel price levels, which determine when surcharges are collected, truck idling, empty miles between freight shipments, and out-of-route miles. We cannot predict whether high fuel price levels will occur in the future or the extent to which fuel surcharges will be collected to offset such increases.

Stock Splits

On January 18, 2006, the Board of Directors approved a three-for-two stock split, effected in the form of a fifty percent (50%) stock dividend. The stock split distribution date was February 15, 2006, to stockholders of record as of the close of business on February 1, 2006.

On May 4, 2006, the Board of Directors approved a second three-for-two stock split, effected in the form of a fifty percent (50%) stock dividend. The second stock split distribution date was June 15, 2006, to stockholders of record as of the close of business of June 1, 2006.

Unless otherwise indicated, all share and per share amounts have been adjusted to give retroactive effect to these stock splits.

7

Table of Contents

Regulation

Our operations are regulated and licensed by various United States federal and state, Canadian provincial, and Mexican federal agencies. Interstate motor carrier operations are subject to safety requirements prescribed by the United States Department of Transportation (“DOT”). Such matters as weight and equipment dimensions are also subject to United States federal and state regulation and Canadian provincial regulations. We operate in the United States throughout the 48 contiguous states pursuant to operating authority granted by the Federal Highway Administration, in various Canadian provinces pursuant to operating authority granted by the Ministries of Transportation and Communications in such provinces, and within Mexico pursuant to operating authority granted by Secretaria de Comunicaciones y Transportes. To the extent that we conduct operations outside the United States, we are subject to the Foreign Corrupt Practices Act, which generally prohibits United States companies and their intermediaries from bribing foreign officials for the purpose of obtaining or retaining favorable treatment.

New rules that limit driver hours-of-service were adopted effective January 4, 2004, and then modified effective October 1, 2005. On July 24, 2007, a federal appeals court vacated portions of the 2005 Rules. Two of the key portions vacated by the court include the expansion of the driving day from 10 hours to 11 hours, and the “34 hour restart” requirement that drivers must have a break of at least 34 consecutive hours during each week. We understand that the Federal Motor Carrier Safety Administration is currently analyzing the court’s decision and has until September 14, 2007 to request a hearing on the matter. Although we are unable to predict whether the order will be appealed or the outcome of any such appeal, we would expect the court’s decision to reduce productivity and cause some loss of efficiency as our drivers are retrained and some shipping lanes may need to be reconfigured.

Our operations are subject to various federal, state, and local environmental laws and regulations, implemented principally by the EPA and similar state regulatory agencies, governing the management of hazardous wastes, other discharge of pollutants into the air and surface and underground waters, and the disposal of certain substances. We do not believe that compliance with these regulations has a material effect on our capital expenditures, earnings, and competitive position.

In addition, the engines used in our newer tractors are subject to emissions control regulations issued by the EPA. The regulations require progressive reductions in exhaust emissions from diesel engines for 2007 through 2010. Compliance with such regulations has increased the cost of our new tractors and could impair equipment productivity, lower fuel mileage, and increase our operating expenses. These adverse effects combined with the uncertainty as to the reliability of the vehicles equipped with the newly designed diesel engines and the residual values realized from the disposition of these vehicles could increase our costs or otherwise adversely affect our business or operations once the regulations become effective. Some manufacturers have significantly increased new equipment prices, in part to meet new engine design requirements.

Cargo Liability, Insurance, and Legal Proceedings

We are a party to routine litigation incidental to our business, primarily involving claims for bodily injury or property damage incurred in the transportation of freight. We are responsible for the safe delivery of cargo. We have increased the self-insured retention portion of our insurance coverage for most claims significantly over the past several years. For fiscal 2006 and fiscal 2007, we renewed our auto liability policy, self-insuring for personal injury and property damage claims for amounts up to \$2.5 million per occurrence. Management believes our uninsured exposure is reasonable for the transportation industry, based on previous history.

We are also responsible for administrative expenses, for each occurrence involving personal injury or property damage. We are also self-insured for the full amount of all our physical damage losses, for workers’ compensation losses up to \$1.5 million per claim, and for cargo claims up to \$100,000 per shipment, except for a few transportation

contracts in which a higher retention may apply. Subject to these self-insured retention amounts, our current workers' compensation policy provides coverage up to a maximum per claim amount of \$10.0 million, and our current cargo loss and damage coverage provides coverage up to \$1.0 million per shipment. We maintain separate insurance in Mexico consisting of bodily injury and property damage coverage with acceptable deductibles. Management believes our uninsured exposure is reasonable for the transportation industry, based on previous history.

8

Table of Contents

There are various claims, lawsuits, and pending actions against us and our subsidiaries that arise in the normal course of business. We believe many of these proceedings are covered in whole or in part by insurance and that none of these matters will have a materially adverse effect on our consolidated financial position or results of operations in any given period.

Seasonality

We have substantial operations in the Midwestern and Eastern U.S. and Canada. In those geographic regions, our tractor productivity may be adversely affected during the winter season because inclement weather may impede our operations. Moreover, some shippers reduce their shipments during holiday periods as a result of curtailed operations or vacation shutdowns. At the same time, operating expenses generally increase, with fuel efficiency declining because of engine idling and harsh weather creating higher accident frequency, increased claims, and more equipment repairs.

Internet Website

We maintain an Internet website where additional information concerning our business can be found. The address of that website is www.celadontrucking.com. All of our reports filed with or furnished to the Securities and Exchange Commission (“SEC”) pursuant to Section 13(a) or 15(d) of the Exchange Act, including our annual report on Form 10-K, quarterly reports on Form 10-Q, or current reports on Form 8-K, and amendments thereto are made available free of charge on or through our Internet website as soon as reasonably practicable after such reports are electronically filed with or furnished to the SEC. Information contained on our website is not incorporated into this Annual Report on Form 10-K, and you should not consider information contained on our website to be part of this report.

Item 1A. Risk Factors

Our future results may be affected by a number of factors over which we have little or no control. The following issues, uncertainties, and risks, among others, should be considered in evaluating our business and growth outlook.

Our business is subject to general economic and business factors that are largely out of our control, any of which could have a materially adverse effect on our operating results.

Our business is dependent on a number of factors that may have a materially adverse effect on our results of operations, many of which are beyond our control. Some of the most significant of these factors include excess tractor and trailer capacity in the trucking industry, declines in the resale value of used equipment, strikes or work stoppages, or work slow downs at our facilities or at customer, port, border crossing, or other shipping related facilities, increases in interest rates, fuel taxes, tolls, and license and registration fees, rising costs of healthcare, and fluctuations in foreign exchange rates.

We are also affected by recessionary economic cycles, changes in customers’ inventory levels, and downturns in customers’ business cycles, particularly in market segments and industries, such as retail and manufacturing, where we have a significant concentration of customers, and regions of the country, such as Texas and the Midwest, where we have a significant amount of business. Economic conditions may adversely affect our customers and their ability to pay for our services. Customers encountering adverse economic conditions represent a greater potential for loss and we may be required to increase our allowance for doubtful accounts. These economic conditions may adversely affect our ability to execute our strategic plan.

In addition, we cannot predict the effects on the economy or consumer confidence of actual or threatened armed conflicts or terrorist attacks, efforts to combat terrorism, military action against a foreign state or group located in a

foreign state, or heightened security requirements. Enhanced security measures could impair our operating efficiency and productivity and result in higher operating costs.

Table of Contents

Ongoing insurance and claims expenses could significantly affect our earnings.

Our future insurance and claims expenses may exceed historical levels, which could reduce our earnings. We self-insure for a significant portion of our claims exposure, which could significantly increase the volatility of, and decrease the amount of, our earnings. Our future insurance and claims expense could reduce our earnings and make our earnings more volatile. We currently self-insure for a portion of our claims exposure and accrue amounts for liabilities based on our assessment of claims that arise and our insurance coverage for the periods in which the claims arise. In general, for casualty claims for fiscal 2007, we were self-insured for the first \$2.5 million of each personal injury and property damage claim and the first \$100,000 of each cargo claim. We are also responsible for a pro rata portion of legal expenses relating to such claims. We maintain a workers' compensation plan and group medical plan for our employees with a deductible amount of \$1.5 million for each workers' compensation claim and stop loss amount of \$175,000 for each group medical plan. Because of our significant self-insured retention amounts, we have significant exposure to fluctuations in the number and severity of claims.

We maintain insurance above the amounts for which we self-insure with licensed insurance carriers. Our insurance and claims expense could increase when our current coverage expires or we could raise our self-insured retention. Although we believe our aggregate insurance limits are sufficient to cover reasonably expected claims, it is possible that one or more claims could exceed those limits. If insurance carriers raise our premiums, our insurance and claims expense could increase, or we could find it necessary to again raise our self-insured retention or decrease our aggregate coverage limits when our policies are renewed or replaced. Our operating results and financial condition could be materially and adversely affected if these expenses increase, if we experience a claim in excess of our coverage limits, or if we experience a claim for which we do not have coverage.

Ongoing insurance requirements could constrain our borrowing capacity. At June 30, 2007, our revolving line of credit had a maximum borrowing limit of \$50.0 million, outstanding borrowings of \$18.0 million, and outstanding letters of credit of \$4.8 million. Our borrowings may increase if we do acquisitions or finance more of our equipment under our revolving line of credit. Outstanding letters of credit with certain financial institutions reduce the available borrowings under our revolving line of credit, which could negatively affect our liquidity should we need to increase our borrowings in the future. In addition, ongoing insurance requirements could constrain our borrowing capacity.

We operate in a highly competitive and fragmented industry and our business may suffer if we are unable to adequately address downward pricing pressures and other results of competition.

Numerous competitive factors could impair our ability to maintain or improve our current profitability. These factors include the following:

- We compete with many other truckload carriers of varying sizes and, to a lesser extent, with less-than-truckload carriers, railroads, and other transportation companies, many of which have more equipment and greater capital resources than we do.
- Many of our competitors periodically reduce their freight rates to gain business, especially during times of reduced growth rates in the economy, which may limit our ability to maintain or increase freight rates or maintain significant growth in our business.
- Many customers reduce the number of carriers they use by selecting so-called "core carriers" as approved service providers, and in some instances we may not be selected.

- Many customers periodically accept bids from multiple carriers for their shipping needs, and this process may depress freight rates or result in the loss of some business to competitors.
- The trend toward consolidation in the trucking industry may create other large carriers with greater financial resources and other competitive advantages relating to their size.
- Advances in technology require increased investments to remain competitive, and our customers may not be willing to accept higher freight rates to cover the cost of these investments.

Table of Contents

- Competition from non-asset-based logistics and freight brokerage companies may adversely affect our customer relationships and freight rates.
- Economies of scale that may be passed on to smaller carriers by procurement aggregation providers may improve their ability to compete with us.

We derive a significant portion of our revenue from our major customers, the loss of one or more of which could have a materially adverse effect on our business.

A significant portion of our revenue is generated from our major customers. For 2007, our top 25 customers, based on revenue, accounted for approximately 41% of our revenue, and our top 10 customers, approximately 24% of our revenue. We do not expect these percentages to change materially for 2008. Generally, we do not have long term contractual relationships with our major customers, and we cannot assure you that our customers will continue to use our services or that they will continue at the same levels. For some of our customers, we have entered into multi-year contracts and we cannot be assured that the rates will remain advantageous. A reduction in or termination of our services by one or more of our major customers could have a materially adverse effect on our business and operating results.

Increases in driver compensation or difficulty in attracting and retaining drivers could affect our profitability and ability to grow.

The trucking industry experiences substantial difficulty in attracting and retaining qualified drivers, including independent contractors. Because of the shortage of qualified drivers, the availability of alternative jobs, and intense competition for drivers from other trucking companies, we expect to continue to face difficulty increasing the number of our drivers, including independent contractor drivers. The compensation we offer our drivers and independent contractors is subject to market conditions, and we may find it necessary to increase driver and independent contractor compensation in future periods. In addition, the Company suffers from a high turnover rate of drivers; although our turnover rate is lower than the industry average. A high turnover rate requires us to continually recruit a substantial number of drivers in order to operate existing revenue equipment. If we are unable to continue to attract and retain a sufficient number of drivers and independent contractors, we could be required to adjust our compensation packages, let trucks sit idle, or operate with fewer trucks and face difficulty meeting shipper demands, all of which would adversely affect our growth and profitability.

Our revenue growth may not continue at historical rates, which could adversely affect our stock price.

We experienced significant growth in revenue between 2002 and 2007. There can be no assurance that our revenue growth rate will continue at historical levels or that we can effectively adapt our management, administrative, and operational systems to respond to any future growth. We can provide no assurance that our operating margins will not be adversely affected by expansion of our business or by changes in economic conditions. Slower or less profitable growth could adversely affect our stock price.

We operate in a highly regulated industry and increased costs of compliance with, or liability for violation of, existing or future regulations could have a materially adverse effect on our business.

Our operations are regulated and licensed by various U.S., Canadian, and Mexican agencies. Our company drivers and independent contractors also must comply with the safety and fitness regulations of the United States DOT, including those relating to drug and alcohol testing and hours-of-service. Such matters as weight and equipment dimensions are also subject to U.S. and Canadian regulations. We also may become subject to new or more restrictive regulations

relating to fuel emissions, drivers' hours-of-service, ergonomics, or other matters affecting safety or operating methods. Other agencies, such as the Environmental Protection Agency, or EPA, and the Department of Homeland Security, or DHS, also regulate our equipment, operations, and drivers. Future laws and regulations may be more stringent and require changes in our operating practices, influence the demand for transportation services, or require us to incur significant additional costs. Higher costs incurred by us or by our suppliers who pass the costs onto us through higher prices could adversely affect our results of operations.

Table of Contents

The DOT, through the Federal Motor Carrier Safety Administration, or FMCSA, imposes safety and fitness regulations on us and our drivers. On July 24, 2007, a federal appeals court vacated portions of the existing rules relating to drivers' hours of service. Two of the key portions that were vacated include the expansion of the driving day from 10 hours to 11 hours, and the "34 hour restart" requirement that drivers must have a break of at least 34 consecutive hours during each week. The court's decision does not go into effect until September 14, 2007, unless the court orders otherwise, and the FMCSA has until such date to request a hearing on the matter. We understand that the FMCSA is currently analyzing the court's decision, and we are unable to predict whether the order will be appealed or the outcome of any such appeal.

If the court's decision becomes effective, it may have varying effects, in that reducing driving time to 10 hours daily may reduce productivity in some lanes, while eliminating the 34-hour restart may enhance productivity in certain instances. On the whole, however, we would expect the court's decision to reduce productivity and cause some loss of efficiency as our drivers are retrained and some shipping lanes may need to be reconfigured. Additionally, we are unable to predict the effect of any new rules that might be proposed, but any such proposed rules could increase costs or decrease productivity.

The FMCSA also is studying rules relating to braking distance and on-board data recorders that could result in new rules being proposed. We are unable to predict the effect of any rules that might be proposed, but we expect that any such proposed rules would increase costs in our industry, and the on-board recorders potentially could decrease productivity and the number of people interested in being drivers.

Federal, state, and municipal authorities have implemented and continue to implement various security measures, including checkpoints and travel restrictions on large trucks. These regulations also could complicate the matching of available equipment with hazardous material shipments, thereby increasing our response time on customer orders and our non-revenue miles. As a result, it is possible we may fail to meet the needs of our customers or may incur increased expenses to do so. These security measures could negatively impact our operating results.

Some states and municipalities have begun to restrict the locations and amount of time where diesel-powered tractors, such as ours, may idle, in order to reduce exhaust emissions. These restrictions could force us to alter our drivers' behavior, purchase on-board power units that do not require the engine to idle, or face a decrease in productivity.

We have significant ongoing capital requirements that could affect our profitability if we are unable to generate sufficient cash from operations and obtain financing on favorable terms.

The truckload industry is capital intensive, and our policy of operating newer equipment requires us to expend significant amounts annually. If we elect to expand our fleet in future periods, our capital needs would increase. We expect to pay for projected capital expenditures with operating leases of revenue equipment, cash flows from operations, and borrowings under our line of credit. If we are unable to generate sufficient cash from operations and obtain financing on favorable terms in the future, we may have to limit our growth, enter into less favorable financing arrangements, or operate our revenue equipment for longer periods, any of which could have a materially adverse effect on our profitability.

We currently have lease residual value guarantees of approximately \$62.7 million, substantially all of which are not covered by trade-in or fixed residual agreements with the equipment suppliers. We are exposed to decreases in the resale value of our used equipment and we have increased exposure to issues on the significant percentage of our fleet not covered by manufacturer commitments which could have a materially adverse effect on our results of operations.

Table of Contents

Fluctuations in the price or availability of fuel, as well as hedging activities, surcharge collection, and the volume and terms of diesel fuel purchase commitments may increase our cost of operation, which could materially and adversely affect our profitability.

Fuel is one of our largest operating expenses. Diesel fuel prices fluctuate greatly due to economic, political, climatic, and other factors beyond our control. Fuel is also subject to regional pricing differences and often costs more on the West Coast, where we have significant operations. From time-to-time we have used fuel surcharges, hedging contracts, and volume purchase arrangements to attempt to limit the effect of price fluctuations. Although we seek to recover a portion of the short-term increases in fuel prices from customers through fuel surcharges, these arrangements do not fully offset the increase in the cost of diesel fuel and also may result in us not receiving the full benefit of any fuel price decreases. We currently do not have any fuel hedging contracts in place. If we do hedge, we may be forced to make cash payments under the hedging arrangements. Based on current market conditions we have decided to limit our hedging and purchase commitments, but we continue to evaluate such measures. The absence of meaningful fuel price protection through these measures, fluctuations in fuel prices, or a shortage of diesel fuel, could materially and adversely affect our results of operations.

New regulations governing exhaust emissions could adversely impact our business. New emission standards require reductions in the sulfur content of diesel fuel. Management expects that a 2% power loss caused by ultra-low-sulfur diesel fuel could lead to a loss of 6% mile per gallon fuel economy.

We may not make acquisitions in the future, or if we do, we may not be successful in our acquisition strategy.

We have made eleven acquisitions. Accordingly, acquisitions have provided a substantial portion of our growth. There is no assurance that we will be successful in identifying, negotiating, or consummating any future acquisitions. If we fail to make any future acquisitions, our growth rate could be materially and adversely affected.

Any acquisitions we undertake could involve the dilutive issuance of equity securities and/or incurring indebtedness. In addition, acquisitions involve numerous risks, including difficulties in assimilating the acquired company's operations, the diversion of our management's attention from other business concerns, risks of entering into markets in which we have had no or only limited direct experience, and the potential loss of customers, key employees, and drivers of the acquired company, all of which could have a materially adverse effect on our business and operating results. If we make acquisitions in the future, we cannot assure you that we will be able to successfully integrate the acquired companies or assets into our business.

Increased prices, reduced productivity, and restricted availability of new revenue equipment may adversely affect our earnings and cash flows.

We have experienced higher prices for new tractors over the past few years, partially as a result of government regulations applicable to newly manufactured tractors and diesel engines, in addition to higher commodity prices and better pricing power among equipment manufacturers. More restrictive Environmental Protection Agency, or EPA, emissions standards that went into effect in 2007 and emission standards that will take effect in 2010 are more restrictive than prior standards and will require vendors to introduce new engines. Our business could be harmed if we are unable to continue to obtain an adequate supply of new tractors and trailers for these or other reasons. As a result, we expect to continue to pay increased prices for equipment and incur additional expenses and related financing costs for the foreseeable future. Furthermore, the new engines are expected to reduce equipment efficiency and lower fuel mileage and, therefore, increase our operating expenses.

Our operations are subject to various environmental laws and regulations, the violation of which could result in substantial fines or penalties.

In addition to direct regulation by the DOT and other agencies, we are subject to various environmental laws and regulations dealing with the hauling and handling of hazardous materials, fuel storage tanks, air emissions from our vehicles and facilities, and discharge and retention of storm water. We operate in industrial areas, where truck terminals and other industrial activities are located, and where groundwater or other forms of environmental contamination have occurred. Our operations involve the risks of fuel spillage or seepage, environmental damage, and hazardous waste disposal, among others. We also maintain underground bulk fuel storage tanks and fueling islands at two of our facilities. A small percentage of our freight consists of low-grade hazardous substances, which

Table of Contents

subjects us to a wide array of regulations. If we are involved in a spill or other accident involving hazardous substances, if there are releases of hazardous substances we transport, or if we are found to be in violation of applicable laws or regulations, we could be subject to liabilities that could have a materially adverse effect on our business and operating results. If we should fail to comply with applicable environmental regulations, we could be subject to substantial fines or penalties and to civil and criminal liability.

If we are unable to retain our key employees, our business, financial condition, and results of operations could be adversely affected.

We are highly dependent upon the services of certain key employees, including, but not limited to: Stephen Russell, our Chairman of the Board and Chief Executive Officer; Chris Hines, our President and Chief Operating Officer; and Paul Will, our Vice Chairman of the Board, Executive Vice President, and Chief Financial Officer. Although we have an employment agreement with Mr. Russell and a separation agreement with Mr. Will, the loss of any of their services or the services of Mr. Hines could negatively impact our operations and future profitability.

Seasonality and the impact of weather affect our operations and profitability.

Our tractor productivity decreases during the winter season because inclement weather impedes operations, and some shippers reduce their shipments after the winter holiday season. Revenue can also be affected by bad weather and holidays, since revenue is directly related to available working days of shippers. At the same time, operating expenses increase, with fuel efficiency declining because of engine idling and harsh weather creating higher accident frequency, increased claims, and more equipment repairs. We could also suffer short-term impacts from weather-related events such as hurricanes, blizzards, ice storms, and floods that could harm our results or make our results more volatile. Weather and other seasonal events could adversely affect our operating results.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

We operate a network of 17 terminal locations, including facilities in Laredo and El Paso, Texas, which are the two largest inland freight gateway cities between the U.S. and Mexico. Our operating terminals currently are located in the following cities:

United States	Mexico	Canada
Baltimore, MD (Leased)	Guadalajara (Leased)	Kitchener, ON (Leased)
Dallas, TX (Owned)	Mexico City (Leased)	
El Paso, TX (Owned)	Monterrey (Leased)	
Greensboro, NC (Leased)	Nuevo Laredo (Leased)	
Hampton, VA (Leased)	Puebla (Leased)	
Indianapolis, IN (Leased)	Silao (Leased)	
Laredo, TX (Owned and Leased)		
Louisville, KY (Leased)		
Richmond, VA (Leased)		
Nashville, TN (Leased)		

Our executive and administrative offices occupy four buildings located on 40 acres of property in Indianapolis, Indiana. The Indianapolis, Laredo, and Kitchener terminals include administrative functions, lounge facilities for drivers, parking, fuel, maintenance, and truck washing facilities. A portion of the Indianapolis facility is used for the operations of Truckers B2B. All of our other owned and leased facilities are utilized exclusively by our transportation segment.

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities****Price Range of Common Stock**

Our common stock is listed on the NASDAQ National Market under the symbol "CLDN." The following table sets forth, for the periods indicated, the high and low sales price per share of our common stock as reported by NASDAQ. All prices reflect the Company's February 15, 2006, and June 15, 2006, stock splits.

Fiscal 2006	High	Low
Quarter ended September 30, 2005	\$ 10.00	\$ 7.40
Quarter ended December 31, 2005	\$ 13.29	\$ 9.52
Quarter ended March 31, 2006	\$ 16.63	\$ 11.33
Quarter ended June 30, 2006	\$ 23.29	\$ 14.80

Fiscal 2007		
Quarter ended September 30, 2006	\$ 23.73	\$ 14.66
Quarter ended December 31, 2006	\$ 21.00	\$ 16.08
Quarter ended March 31, 2007	\$ 18.64	\$ 14.92
Quarter ended June 30, 2007	\$ 17.00	\$ 15.38

On August 24, 2007, there were 191 holders of our common stock based upon the number of record holders on that date. However, we estimate our actual number of stockholders is much higher because a substantial number of our shares are held of record by brokers or dealers for their customers in street names.

Dividend Policy

We have never paid a cash dividend on our common stock, and we do not expect to make or declare any cash dividends in the foreseeable future. We currently intend to continue to retain earnings to finance the growth of our business and reduce our indebtedness. Our ability to pay cash dividends is currently prohibited by restrictions contained in our revolving credit facility. Future payments of cash dividends will depend on our financial condition, results of operations, capital commitments, restrictions under our then-existing debt agreements, and other factors our Board of Directors may consider relevant.

We recorded two stock dividends in fiscal 2006, reflected as three-for-two stock splits, each effected in the form of a 50% stock dividend paid on February 15, 2006 and June 15, 2006.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation

Recent Results and Fiscal Year-End Financial Condition

For the fiscal year ended June 30, 2007, total revenue increased 4.7%, to \$502.7 million from \$480.2 million during fiscal 2006. Freight revenue, which excludes revenue from fuel surcharges, increased 4.5%, to \$433.0 million in fiscal 2007 from \$414.5 million in 2006. We generated net income of \$22.3 million, or \$0.94 per diluted share, for fiscal 2007 compared with net income of \$20.5 million, or \$0.88 per diluted share, for 2006.

We believe the improvements in our profitability were attributable primarily to growth from acquisitions, cost controls, excellent safety and claims experience, and the continued execution of our operating strategy, which involves allocating our equipment to customers and freight that provide the most favorable returns. After a strong start in the first quarter, the freight market became increasingly challenging in fiscal 2007. Decreased freight demand due to a slower economy caused a decrease in truck utilization measured by miles per tractor. In addition, shippers used the less robust freight market to resist rate increases and, in some cases, attempted to reduce freight rates. The downward pressure on our rates was somewhat offset by a decrease in average length of haul. As a result, average freight revenue per loaded mile excluding fuel surcharge for 2007 increased \$0.043 per mile to \$1.534, a 2.9% increase compared with \$1.491 for 2006. Average freight revenue per tractor per week, our main measure of asset productivity, decreased by 5.3% to \$2,793 in 2007 compared with \$2,948 for 2006. This decrease was due to lower general freight demand, an increase in fleet size to 3,016 tractors at June 30, 2007 from 2,732 tractors at June 30, 2006, and in increase in non-revenue miles. As the freight market weakened and we ran empty miles to on-board the Warrior drivers and position equipment for sale, our non-revenue miles increased. Our operating ratio, excluding the effect of fuel surcharge, improved to 90.7% for 2007 compared with 91.7% for 2006.

At June 30, 2007, our total balance sheet debt was \$94.6 million and our total stockholders' equity was \$147.3 million, for a total debt to capitalization ratio of 39.1%. At June 30, 2007, we had \$27.2 million of available borrowing capacity under our revolving credit facility and \$1.2 million of cash on hand.

Revenue

We generate substantially all of our revenue by transporting freight for our customers. Generally, we are paid by the mile or by the load for our services. We also derive revenue from fuel surcharges, loading and unloading activities, equipment detention, other trucking related services, and from TruckersB2B. The main factors that affect our revenue are the revenue per mile we receive from our customers, the percentage of miles for which we are compensated, the number of tractors operating, and the number of miles we generate with our equipment. These factors relate to, among other things, the U.S. economy, inventory levels, the level of truck capacity in our markets, specific customer demand, the percentage of team-driven tractors in our fleet, driver availability, and our average length of haul.

We eliminate fuel surcharges from revenue, when calculating operating ratios and some of our operating data. We believe that eliminating the impact of this sometimes volatile source of revenue affords a more consistent basis for comparing our results of operations from period to period.

Expenses and Profitability

The main factors that impact our profitability on the expense side are the variable costs of transporting freight for our customers. These costs include fuel expense, driver-related expenses, such as wages, benefits, training, and recruitment, and independent contractor costs, which we record as purchased transportation. Expenses that have both fixed and variable components include maintenance and tire expense and our total cost of insurance and claims. These expenses generally vary with the miles we travel, but also have a controllable component based on safety, fleet age,

efficiency, and other factors. Our main fixed cost is the acquisition and financing of long-term assets, primarily revenue equipment. We have other mostly fixed costs, such as our non-driver personnel and facilities expenses. In discussing our expenses as a percentage of revenue, we sometimes discuss changes as a percentage of revenue before fuel surcharges, in addition to absolute dollar changes, because we believe the high variable cost nature of our business makes a comparison of changes in expenses as a percentage of revenue more meaningful at times than absolute dollar changes.

Table of Contents

The trucking industry has experienced significant increases in expenses over the past three years, in particular those relating to equipment costs, driver compensation, insurance, and fuel. As the United States economy has expanded, many trucking companies have been able to raise freight rates to cover the increased costs, although downward rate pressure and less freight demand became more prevalent beginning in the fall of 2006. Over the long term, we expect a limited pool of qualified drivers and intense competition to recruit and retain those drivers to constrain overall industry capacity. Assuming normal U.S. economic growth in manufacturing, retail, and other high volume shipping industries, we expect to be able to raise freight rates in line with or faster than costs. Over the near term this may prove challenging in the current freight environment.

Revenue Equipment

We operate 3,016 tractors and 7,843 trailers. Of our tractors at June 30, 2007, 1,184 were owned, 1,433 were acquired under operating leases, and 399 were provided by independent contractors, who own and drive their own tractors. Of our trailers at June 30, 2007, 2,180 were owned and 5,663 were acquired under operating and capital leases.

Prior to fiscal 2006, we had financed most of our new tractors under operating leases. Beginning in fiscal 2006 and continuing through fiscal 2007, we have purchased most of our new tractors with cash or borrowings. We expect to continue to use cash and borrowings on our credit facility for most tractor purchases. Most of our new trailers are acquired with operating leases. These leases generally run for a period of seven years for trailers. When we finance revenue equipment acquisitions with operating leases, rather than borrowings or capital leases, the interest component of our financing activities is recorded as an “above-the-line” operating expense on our statements of operations. Accordingly, the trend toward financing more equipment with cash and borrowings, and less through operating leases, improves our operating ratio.

Independent contractors (owner operators) provide a tractor and a driver and are responsible for all operating expenses in exchange for a fixed payment per mile. We do not have the capital outlay of purchasing the tractors. The payments to independent contractors are recorded in purchased transportation and the payments for equipment under operating leases are recorded in revenue equipment rentals. Expenses associated with owned equipment, such as interest and depreciation, are not incurred, and for independent contractor tractors, driver compensation, fuel, and other expenses are not incurred. Because obtaining equipment from independent contractors and through operating leases effectively shifts these expenses from interest to “above the line” operating expenses, we evaluate our efficiency using our operating ratio as well as income before income taxes.

Outlook

Looking forward, our profitability goal is to achieve an operating ratio of approximately 88%. We expect this to require additional improvements in rate per mile, non-revenue miles percentage, and miles per tractor compared with those key performance indicators for fiscal 2007, to overcome expected additional cost increases. Because a large percentage of our costs are variable, changes in revenue per mile and non-revenue miles percentage affect our profitability to a greater extent than changes in miles per tractor. For fiscal 2008, the key factors that we expect to have the greatest effect on our profitability are our freight revenue per tractor per week, our compensation of drivers, our cost of revenue equipment (particularly in light of the 2007 EPA engine requirements), our fuel costs, and our insurance and claims. To overcome cost increases and improve our margins, we will need to achieve increases in freight revenue per tractor, particularly in revenue per mile, which we intend to achieve by increasing rates and continuing to shift to more profitable freight. Operationally, we will seek improvements in safety and driver recruiting and retention. Our success in these areas primarily will affect revenue, driver-related expenses, and insurance and claims expense. Given the difficult freight market confronting our industry, we believe achieving our profitability goal during fiscal 2008 is unlikely, although we intend to continue to strive toward that goal.

Table of Contents**Results of Operations**

The following tables set forth the percentage relationship of revenue and expense items to operating and freight revenue for the periods indicated.

	Fiscal year ended June 30,		
	2007	2006	2005
Operating revenue	100.0%	100.0%	100.0%
Operating expenses:			
Salaries, wages, and employee benefits	28.8	30.1	30.6
Fuel	23.1	22.8	18.7
Operations and maintenance	6.4	6.1	7.7
Insurance and claims	2.6	2.9	3.3
Depreciation and amortization	4.4	2.6	3.4
Revenue equipment rentals	6.3	8.2	8.2
Purchased transportation	14.7	14.6	16.7
Cost of products and services sold	1.4	1.1	1.1
Professional and consulting fees	0.4	0.6	0.6
Communication and utilities	1.0	0.9	1.0
Operating taxes and licenses	1.7	1.7	1.9
General and other operating	1.2	1.3	1.4
Total operating expenses	92.0	92.9	94.6
Operating income	8.0	7.1	5.4
Other expense:			
Interest expense, net	0.7	0.1	0.3
Income before income taxes	7.3	7.0	5.1
Provision for income taxes	2.9	2.7	2.2
Net income	4.4%	4.3%	2.9%

Freight revenue ⁽¹⁾	100.0%	100.0%	100.0%
Operating expenses:			
Salaries, wages, and employee benefits	33.5	34.9	33.4
Fuel	10.8	10.5	11.1
Operations and maintenance	7.5	7.1	8.4
Insurance and claims	3.0	3.3	3.6

Operating taxes and licenses	2.0	2.0	2.1
General and other operating	1.2	1.3	1.5

Edgar Filing: CELADON GROUP INC - Form 10-K

Total operating expenses	90.7	91.7	94.1
Operating income	9.3	8.3	5.9
Other expense:			
Interest expense, net	0.9	0.2	0.4
Income before income taxes	8.4	8.1	5.5
Provision for income taxes	3.3	3.1	2.4
Net income	5.1%	5.0%	3.1%

(1) Freight revenue is total operating revenue less fuel surcharges. In this table, fuel surcharges are eliminated from revenue and subtracted from fuel expense. The amounts were \$69.7 million, \$65.7 million, and \$37.1 million in 2007, 2006 and 2005, respectively.

Table of Contents

Fiscal year ended June 30, 2007, compared with fiscal year ended June 30, 2006

Total revenue increased by \$22.5 million, or 4.7%, to \$502.7 million for fiscal 2007, from \$480.2 million for fiscal 2006. Freight revenue excludes \$69.7 million and \$65.7 million of fuel surcharge revenue for fiscal 2007 and 2006, respectively.

Freight revenue increased by \$18.5 million, or 4.5%, to \$433.0 million for fiscal 2007, from \$414.5 million for fiscal 2006. This increase was partially attributable to growth of our tractor fleet through the acquisition of Digby in October 2006, Warrior in February 2007, and Air Road in June 2007. The addition of tractors, drivers, and customer relationships from these acquisitions more than offset softer freight demand generally and the continuation of our efforts to eliminate the least favorable freight from our system. The increase was helped by a 1.0% improvement in average freight revenue per total mile, excluding fuel surcharge, to \$1.380 from \$1.367. The improvement in average freight revenue per total mile resulted primarily from a decrease in the percentage of our freight comprised of automotive parts and a corresponding increase in the percentage of our freight comprised of consumer non-durables. Average freight revenue per tractor per week, excluding fuel surcharge, which is our primary measure of asset productivity, decreased 5.3% to \$2,793 in fiscal 2007, from \$2,948 for fiscal 2006, as a result of lower general freight demand, an increase of our tractor fleet to 3,016 at June 30, 2007, from 2,732 at June 30, 2006, and an increase in non-revenue miles. The decrease in miles per tractor and an increase in non-revenue mile percentage were attributable to less freight demand.

Revenue for TruckersB2B was \$10.0 million in fiscal 2007, compared to \$8.3 million in fiscal 2006. The TruckersB2B revenue increase resulted from an increase in member usage of the tire discount programs in addition to an increase in total fleets using the programs.

Salaries, wages, and employee benefits were \$144.8 million, or 33.5% of freight revenue, for fiscal 2007, compared to \$144.6 million, or 34.9% of freight revenue, for fiscal 2006. In fiscal 2006, we experienced an increase in our salaries, wages, and benefits as a percentage of freight revenue due to increased company miles, which increased driver wages, and increased stock-based compensation expense. The decrease in stock-based compensation expense in fiscal 2007, although partially offset by a 2.4% increase in company miles, which in turn increased driver wages, resulted in this category returning to historical levels.

Fuel expenses, net of fuel surcharge revenue of \$69.7 million and \$65.7 million for fiscal 2007 and fiscal 2006, respectively, increased to \$46.6 million, or 10.8% of freight revenue, for fiscal 2007, compared to \$43.5 million, or 10.5% of freight revenue, for fiscal 2006. These increases were due to an increase of 2.4% in company miles and an increase in average fuel prices of approximately \$0.04 per gallon. In addition, we began to experience lower fuel economy and higher costs of fuel from the installation of EPA-mandated new engines and use of ultra-low-sulfur diesel fuel. Higher fuel prices and lower fuel economy will increase our operating expenses to the extent we cannot offset them with surcharges.

Operations and maintenance consist of direct operating expense, maintenance, and tire expense. This category increased to \$32.3 million, or 7.5% of freight revenue, for fiscal 2007, from \$29.4 million, or 7.1% of freight revenue, for fiscal 2006. These increases were due to an increase in the size of our tractor fleet, an increase in costs associated with accident repair and various direct expenses such as toll expense, cargo handling expense, and increased expenses related to harsh weather. These increases were partially offset by the decrease in our maintenance costs attributable to a younger tractor fleet.

Insurance and claims expense was \$13.1 million, or 3.0% of freight revenue, for fiscal 2007, compared to \$13.7 million, or 3.3% of freight revenue, for fiscal 2006. Our insurance expense consists of premiums and deductible amounts for liability, physical damage, and cargo damage insurance. Our insurance program involves self-insurance at

various risk retention levels. Claims in excess of these risk levels are covered by insurance in amounts we consider to be adequate. We accrue for the uninsured portion of claims based on known claims and historical experience. Insurance and claims expense will vary based primarily on the frequency and severity of claims, the level of self-retention, and the premium expense.

Table of Contents

Depreciation and amortization, consisting primarily of depreciation of revenue equipment, increased to \$21.9 million, or 5.1% of freight revenue, in fiscal 2007 from \$12.4 million, or 3.0% of freight revenue, for fiscal 2006. The majority of these increases can be attributed to the addition of tractors purchased with cash and borrowings and the conversion of operating leases to capital leases related to approximately 3,700 trailers. The remaining increase in this expense category was attributable to the acquisition of certain assets of Digby in October 2006, Warrior in February 2007, and Air Road in June 2007. In the third and fourth quarters of fiscal 2007, the Company declared its intent to purchase certain trailers previously financed with operating leases, resulting in a change from operating to capital lease classification. The conversion of the trailer leases resulted in a decrease in our revenue equipment rentals. Revenue equipment held under operating leases is not reflected on our balance sheet and the expenses related to such equipment are reflected on our statements of operations in revenue equipment rentals, rather than in depreciation and amortization and interest expense, as is the case for revenue equipment that is financed with borrowings or capital leases. In the near term we expect to purchase new equipment primarily with cash or finance new trailers with operating leases. Accordingly, going forward we expect depreciation and amortization will increase as a percentage of freight revenue and revenue equipment rentals will decrease as a percentage of freight revenue as depreciation expense associated with tractors and trailers acquired with cash or borrowings will more than offset decreased depreciation resulting from financing new trailer acquisitions with operating leases.

Revenue equipment rentals were \$31.9 million, or 7.4% of freight revenue, in fiscal 2007, compared to \$39.6 million, or 9.6% of freight revenue, for fiscal 2006. These decreases were attributable to a decrease in our tractor and trailer fleet financed under operating leases as discussed under depreciation and amortization. As of June 30, 2007, we had financed 1,433 tractors and 1,916 trailers under operating leases, as compared to 1,440 tractors and 6,453 trailers as of June 2006. Given the level of new tractors expected to be purchased with cash or borrowings and new trailers expected to be financed under operating leases, we expect revenue equipment rentals will continue to decrease going forward.

Purchased transportation increased to \$73.7 million, or 17.0% of freight revenue, for fiscal 2007, from \$70.3 million, or 17.0% of freight revenue, for fiscal 2006. The increase in the overall dollar amount was primarily related to increased independent contractor expense, as the number of independent contractors increased by 13.7% to 399 at June 30, 2007, from 351 at June 30, 2006. This increase was partially due to increased payments to independent contractors resulting from fuel surcharges collected due to rising fuel costs, which are passed through to our independent contractors on a per mile basis. Independent contractors are drivers who cover all their operating expenses (fuel, driver salaries, maintenance, and equipment costs) for a fixed payment per mile. The number of independent contractors has grown over fiscal 2007 as the Company has partnered with several financing companies that are making it easier for drivers to purchase trucks.

All of our other expenses are relatively minor in amount, and there were no significant changes in these expenses.

Our pretax margin, which we believe is a useful measure of our operating performance because it is neutral with regard to the method of revenue equipment financing that a company uses, improved to 8.4% of freight revenue for fiscal 2007 from 8.1% for fiscal 2006.

In addition to other factors described above, Canadian exchange rate fluctuations principally impact salaries, wages, and benefits and purchased transportation and, therefore, impact our pretax margin and results of operations.

Income taxes increased to \$14.2 million for fiscal 2007, from \$12.9 million for fiscal 2006. Due to the non-deductible effects of our driver per diem pay structure, our tax rate will fluctuate from the 35% standard federal rate, in future periods as income fluctuates.

Fiscal year ended June 30, 2006, compared with fiscal year ended June 30, 2005

Total revenue increased by \$43.4 million, or 9.9%, to \$480.2 million for fiscal 2006, from \$436.8 million for fiscal 2005. Freight revenue excludes \$65.7 million and \$37.1 million of fuel surcharge revenue for fiscal 2006 and 2005, respectively.

Table of Contents

Freight revenue increased by \$14.8 million, or 3.7%, to \$414.5 million for fiscal 2006, from \$399.7 million for fiscal 2005. This increase was primarily attributable to a 3.9% improvement in average freight revenue per total mile, excluding fuel surcharge, to \$1.367 from \$1.316. The improvement in average freight revenue per total mile resulted primarily from better overall freight rates in fiscal 2006 driven by a favorable relationship between freight demand and truckload capacity, a decrease in the percentage of our freight comprised of automotive parts and a corresponding increase in the percentage of our freight comprised of consumer non-durables. Average freight revenue per tractor per week, excluding fuel surcharge, which is our primary measure of asset productivity, increased 3.8% to \$2,948 in fiscal 2006, from \$2,841 for fiscal 2005, as a result of an increase in average freight revenue per total mile.

Revenue for TruckersB2B was \$8.3 million in fiscal 2006, compared to \$7.8 million in fiscal 2005. The TruckersB2B revenue increase resulted from an increase in member usage of the tire discount programs in addition to an increase in total fleets using the programs.

Salaries, wages, and employee benefits were \$144.6 million, or 34.9% of freight revenue, for fiscal 2006, compared to \$133.6 million, or 33.4% of freight revenue, for fiscal 2005. The increase in the overall dollar amount primarily was related to a 3.5% increase in company miles, which in turn increased driver wages. The remaining increase in this expense category was due to an increase in the percentage of our fleet comprised of company trucks, and an increase in administrative payroll related expenses which includes stock based compensation expense.

Fuel expenses, net of fuel surcharge revenue of \$65.7 million and \$37.1 million for fiscal 2006 and 2005, respectively, decreased to \$43.5 million, or 10.5% of freight revenue, for fiscal 2006, compared to \$44.4 million, or 11.1% of freight revenue, for the same period in fiscal 2005. Increased collections in fuel surcharges offset a 3.5% increase in company miles and an increase in average fuel prices of approximately \$0.56 per gallon. In fiscal 2007, we expect to begin to experience lower fuel economy and potentially higher costs of fuel from the installation of EPA-mandated new engines and use of ultra-low-sulfur diesel fuel. Higher fuel prices and lower fuel economy will increase our operating expenses to the extent we cannot offset them with surcharges.

Operations and maintenance consist of direct operating expense, maintenance, and tire expense. This category decreased to \$29.4 million, or 7.1% of freight revenue, for fiscal 2006, from \$33.7 million, or 8.4% of freight revenue, for fiscal 2005. The decreases were primarily the result of our fleet upgrade initiative, implementing a tractor trade cycle change from 4 years to 3 years in fiscal 2005, and management changes in our maintenance area. We believe there is an opportunity for maintenances expenses to continue to decrease as a percentage of freight revenue due to these initiatives.

Insurance and claims expense was \$13.7 million, or 3.3% of freight revenue, for fiscal 2006, compared to \$14.4 million, or 3.6% of freight revenue, for fiscal 2005. Our insurance expense consists of premiums and deductible amounts for liability, physical damage, and cargo damage insurance. Our insurance program involves self-insurance at various risk retention levels. Claims in excess of these risk levels are covered by insurance in amounts we consider to be adequate. We accrue for the uninsured portion of claims based on known claims and historical experience. Insurance and claims expense will vary based primarily on the frequency and severity of claims, the level of self-retention, and the premium expense.

Depreciation and amortization, consisting primarily of depreciation of revenue equipment, decreased to \$12.4 million, or 3.0% of freight revenue, in fiscal 2006 from \$14.9 million, or 3.7% of freight revenue, for fiscal 2005. During fiscal 2006, a greater percentage of our trailers were held under operating leases, rather than owned, compared with fiscal 2005, which reduced depreciation. During the last three quarters of fiscal 2006, our use of cash and borrowings to acquire tractors began to increase depreciation. In fiscal 2007 we expect depreciation to increase and revenue equipment rentals to decrease as a percentage of revenue. Because of higher equipment prices and higher interest rates (which affect lease payments) we expect our total costs of depreciation and amortization to increase in fiscal 2007.

Revenue equipment held under operating leases is not reflected on our balance sheet and the expenses related to such equipment are reflected on our statements of operations in revenue equipment rentals, rather than in depreciation and amortization and interest expense, as is the case for revenue equipment that is financed with borrowings or capital leases.

Table of Contents

Revenue equipment rentals were \$39.6 million, or 9.6% of freight revenue, in fiscal 2006, compared to \$35.8 million, or 9.0% of freight revenue, for fiscal 2005. These increases were attributable to a higher proportion of our trailer fleet held under operating leases during the 2006 period, partially offset by the decreased use of operating leases to finance tractors. As of June 30, 2006, we had financed 1,440 tractors and 6,453 trailers under operating leases, as compared to 1,836 tractors and 5,583 trailers as of June 2005. Given the level of new tractors purchased with cash or borrowings under our credit facility and new trailers financed under operating leases, we expect revenue equipment rentals will decrease going forward.

Purchased transportation decreased to \$70.3 million, or 17.0% of freight revenue, for fiscal 2006, from \$73.0 million, or 18.3% of freight revenue, for fiscal 2005. These decreases were primarily related to reduced independent contractor expense, as the number of independent contractors decreased to 351 at June 30, 2006, from 378 at June 30, 2005. This decrease was partially offset due to increased payments to independent contractors resulting from fuel surcharges collected due to rising fuel costs, which are passed through to our independent contractors on a per mile basis. Independent contractors are drivers who cover all their operating expenses (fuel, driver salaries, maintenance, and equipment costs) for a fixed payment per mile. We expect the majority of our equipment additions to come in our company-operated fleet. As a result, the percentage of our fleet comprised of independent contractors may continue to decline, with a corresponding decrease in this expense category. It has become difficult to recruit and retain independent contractors.

All of our other expenses are relatively minor in amount, and there were no significant changes in these expenses.

Our pretax margin, which we believe is a useful measure of our operating performance because it is neutral with regard to the method of revenue equipment financing that a company uses, improved to 8.1% of freight revenue for fiscal 2006 from 5.5% for fiscal 2005.

In addition to other factors described above, Canadian exchange rate fluctuations principally impact salaries, wages, and benefits and purchased transportation and, therefore, impact our pretax margin and results of operations.

Income taxes increased to \$12.9 million for fiscal 2006, from \$9.4 million for fiscal 2005. Due to the non-deductible effects of our driver per diem pay structure, our tax rate will fluctuate from the 35% standard federal rate, in future periods as income fluctuates.

Liquidity and Capital Resources

Trucking is a capital-intensive business. We require cash to fund our operating expenses (other than depreciation and amortization), to make capital expenditures and acquisitions, and to repay debt, including principal and interest payments. Other than ordinary operating expenses, we anticipate that capital expenditures for the acquisition of revenue equipment will constitute our primary cash requirement over the next twelve months. We frequently consider potential acquisitions, and if we were to consummate an acquisition, our cash requirements would increase and we may have to modify our expected financing sources for the purchase of tractors. Subject to any required lender approval, we may make acquisitions, although we do not have any specific acquisition plans at this time. Our principal sources of liquidity are cash generated from operations, bank borrowings, capital and operating lease financing of revenue equipment, and proceeds from the sale of used revenue equipment.

As of June 30, 2007, we had on order 125 tractors and 1,500 trailers for delivery through fiscal 2008. These revenue equipment orders represent a capital commitment of approximately \$45.2 million, before considering the proceeds of equipment dispositions. In fiscal 2007, we purchased most of our new tractors, and we acquired most of the new trailers under off-balance sheet operating leases. In the third and fourth quarters of fiscal 2007, we also declared our intent to purchase approximately 3,700 trailers at the end of the respective lease term, resulting in a change from

operating lease to capital lease classification. At June 30, 2007, our total balance sheet debt, including capital lease obligations and current maturities, was \$94.6 million, compared to \$12.0 million at June 30, 2006, and \$7.3 million at June 30, 2005. Our debt-to-capitalization ratio (total balance sheet debt as a percentage of total balance sheet debt plus total stockholders' equity) was 39.1% at June 30, 2007, 9.0% at June 30, 2006, and 6.9% at June 30, 2005.

Table of Contents

We believe we will be able to fund our operating expenses, as well as our current commitments for the acquisition of revenue equipment, over the next twelve months with a combination of cash generated from operations, borrowings available under secured equipment financing or our primary credit facility, equipment sales, and lease financing arrangements. We will continue to have significant capital requirements over the long term, and the availability of the needed capital will depend upon our financial condition and operating results and numerous other factors over which we have limited or no control, including prevailing market conditions and the market price of our common stock. However, based on our operating results, anticipated future cash flows, current availability under our credit facility, and sources of equipment lease financing that we expect will be available to us, we do not expect to experience significant liquidity constraints in the foreseeable future.

Cash Flows

We generated net cash from operating activities of \$53.6 million in fiscal 2007, \$30.7 million in fiscal 2006, and \$28.4 million in fiscal 2005. The increase in net cash provided by operations in fiscal 2007 from fiscal 2006 is due primarily to the increase of depreciation and amortization and an increase in deferred taxes due to accelerated depreciation from purchasing tractors.

Net cash used in investing activities was \$61.2 million for fiscal 2007, compared to \$44.3 million for fiscal 2006, and \$9.6 million for fiscal 2005. Approximately \$32.4 million of the cash used in investing activities for fiscal 2007 was related to our purchases of Digby in October 2006, Warrior in February 2007, and Air Road in June 2007. Approximately \$22.7 million of the cash used in investing activities for fiscal 2005 was related to our purchase of certain assets of CX Roberson in January of 2005. Cash used in (provided by) investing activities includes the net cash effect of acquisitions and dispositions of revenue equipment during each year. Capital expenditures primarily for tractors and trailers (including lease buyouts and new equipment purchases) totaled \$66.8 million in fiscal 2007, excluding the assets purchased from Digby, Warrior, and Air Road, \$95.8 million in fiscal 2006, and \$25.2 million in fiscal 2005, including the value of equipment purchased under capital leases and excluding the assets purchased from CX Roberson. We generated proceeds from the sale of property and equipment of \$37.9 million in fiscal 2007, \$51.4 million in fiscal 2006, and \$39.8 million in fiscal 2005 (including \$7.6 million from the CX Roberson acquisition).

Net cash provided by financing activities was \$7.2 million in fiscal 2007, compared to \$4.2 million in fiscal 2006, and net cash used of \$8.0 million in fiscal 2005. Financing activity represents bank borrowings (new borrowings, net of repayments) and payment of the principal component of capital lease obligations.

Off-Balance Sheet Arrangements

Operating leases have been an important source of financing for our revenue equipment. Our operating leases include some under which we do not guarantee the value of the asset at the end of the lease term (“walk-away leases”) and some under which we do guarantee the value of the asset at the end of the lease term (“residual value”). Therefore, we are subject to the risk that equipment value may decline in which case we would suffer a loss upon disposition and be required to make cash payments because of the residual value guarantees. We were obligated for residual value guarantees related to operating leases of \$62.7 million at June 30, 2007 compared to \$78.7 million at June 30, 2006. A small portion of these amounts is covered by repurchase and/or trade agreements we have with the equipment manufacturer. We believe that any residual payment obligations that are not covered by the manufacturer will be satisfied, in the aggregate, by the value of the related equipment at the end of the lease. To the extent the expected value at the lease termination date is lower than the residual value guarantee, we would accrue for the difference over the remaining lease term. We anticipate that going forward we will use cash generated from operations to finance tractor purchases and operating leases to finance trailer purchases.

Prior to fiscal 2006, we financed most of our new tractors and trailers under operating leases, which are not reflected on our balance sheet. In fiscal 2006, we began purchasing most of our new tractors using cash and borrowings under our credit facility, while still financing our new trailers with operating leases. The use of operating leases also affects our statement of cash flows. For assets subject to these operating leases, we do not record depreciation as an increase to net cash provided by operations, nor do we record any entry with respect to investing activities or financing activities.

Table of Contents

Primary Credit Agreement

On September 26, 2005, the Company, Celadon Trucking Services, Inc. (“CTSI”), Celadon Logistics Services, Inc. (“CLSI”), and TruckersB2B entered into an unsecured Credit Agreement with LaSalle Bank National Association, as administrative agent, and LaSalle Bank National Association, Fifth Third Bank (Central Indiana), and JPMorgan Chase Bank, N.A., as lenders, which matures on September 24, 2010 (the “Credit Agreement”). The Credit Agreement was used to refinance the Company’s then-existing credit facility and was intended to provide for ongoing working capital needs and general corporate purposes. Borrowings under the Credit Agreement are based, at the option of the Company, on a base rate equal to the greater of the federal funds rate plus 0.5% and the administrative agent’s prime rate or LIBOR plus an applicable margin between 0.75% and 1.125% that is adjusted quarterly based on cash flow coverage. The Credit Agreement is guaranteed by Celadon E-Commerce, Inc., Celadon Canada, Inc. (“CelCan”), and Servicios de Transportation Jaguar, S.A. de C.V., (“Jaguar”), each of which is a subsidiary of the Company.

The Credit Agreement has a maximum revolving borrowing limit of \$50.0 million, and the Company may increase the revolving borrowing limit by an additional \$20.0 million, to a total of \$70.0 million. Letters of credit are limited to an aggregate commitment of \$15.0 million and a swing line facility has a limit of \$5.0 million. A commitment fee that is adjusted quarterly between 0.15% and 0.225% per annum based on cash flow coverage is due on the daily unused portion of the Credit Agreement. The Credit Agreement contains certain restrictions and covenants relating to, among other things, dividends, tangible net worth, cash flow, mergers, consolidations, acquisitions and dispositions, and total indebtedness. We were in compliance with these covenants at June 30, 2007, and expect to remain in compliance for the foreseeable future. At June 30, 2007, \$18.0 million of our credit facility was utilized as outstanding borrowings and \$4.8 million was utilized for standby letters of credit.

We believe we will be able to fund our operating expenses, as well as our current commitments for the acquisition of revenue equipment in connection with our fleet upgrade over the next twelve months with a combination of cash generated from operations, borrowings available under our primary credit facility, and lease financing arrangements. We will continue to have significant capital requirements over the long term, and the availability of the needed capital will depend upon our financial condition and operating results and numerous other factors over which we have limited or no control, including prevailing market conditions and the market price of our common stock. However, based on our improving operating results, anticipated future cash flows, current availability under our credit facility, and sources of equipment lease financing that we expect will be available to us, we do not expect to experience significant liquidity constraints in the foreseeable future.

Table of Contents**Contractual Obligations and Commitments**

As of June 30, 2007, our bank loans, capitalized leases, operating leases, other debts, and future commitments have stated maturities or minimum annual payments as follows:

	Cash Requirements as of June 30, 2007 (in thousands)				
	Payments Due by Period				
	Total	Less than One Year	One to Three Years	Three to Five Years	More Than Five Years
Operating leases	\$ 72,406	\$ 24,056	\$ 21,491	\$ 11,647	\$ 15,212
Lease residual value guarantees	62,736	15,092	30,592	---	17,052
Capital lease obligations ⁽¹⁾	63,363	8,630	17,134	35,767	1,832
Long-term debt ⁽¹⁾	42,036	12,597	11,040	18,399	---
Sub-total	240,541	60,375	80,257	65,813	34,096
Future purchase of revenue equipment	45,150	12,703	5,812	5,811	20,824
Employment and consulting agreements ⁽²⁾	793	717	76	---	---
Standby letters of credit	4,825	4,825	---	---	---
Total contractual and cash obligations	\$ 291,309	\$ 78,620	\$ 86,145	\$ 71,624	\$ 54,920

⁽¹⁾ Includes interest.

⁽²⁾ The amounts reflected in the table do not include amounts that could become payable to our Chief Executive Officer and Chief Financial Officer, under certain circumstances if their employment by the Company is terminated.

Inflation

Many of our operating expenses, including fuel costs and revenue equipment, are sensitive to the effects of inflation, which result in higher operating costs and reduced operating income. The effects of inflation on our business during the past three years were most significant in fuel. We have limited the effects of inflation through increases in freight rates and fuel surcharges.

Critical Accounting Policies

The preparation of our financial statements in conformity with U.S. generally accepted accounting principles requires us to make estimates and assumptions that impact the amounts reported in our consolidated financial statements and accompanying notes. Therefore, the reported amounts of assets, liabilities, revenues, expenses, and associated

disclosures of contingent assets and liabilities are affected by these estimates and assumptions. We evaluate these estimates and assumptions on an ongoing basis, utilizing historical experience, consultation with experts, and other methods considered reasonable in the particular circumstances. Nevertheless, actual results may differ significantly from our estimates and assumptions, and it is possible that materially different amounts would be reported using differing estimates or assumptions. We consider our critical accounting policies to be those that require us to make more significant judgments and estimates when we prepare our financial statements. Our critical accounting policies include the following:

Depreciation of Property and Equipment. We depreciate our property and equipment using the straight-line method over the estimated useful life of the asset. We generally use estimated useful lives of 2 to 7 years for new tractors and trailers, and estimated salvage values for new tractors and trailers generally range from 35% to 50% of the capitalized cost. Useful lives and salvage values for equipment obtained through acquisitions are considered separately on a case-by-case basis. Gains and losses on the disposal of revenue equipment are included in depreciation expense in our statements of operations.

Table of Contents

We review the reasonableness of our estimates regarding useful lives and salvage values of our revenue equipment and other long-lived assets based upon, among other things, our experience with similar assets, conditions in the used equipment market, and prevailing industry practice. Changes in our useful life or salvage value estimates or fluctuations in market values that are not reflected in our estimates, could have a material effect on our results of operations.

Revenue equipment and other long-lived assets are tested for impairment whenever an event occurs that indicates an impairment may exist. Expected future cash flows are used to analyze whether an impairment has occurred. If the sum of expected undiscounted cash flows is less than the carrying value of the long-lived asset, then an impairment loss is recognized. We measure the impairment loss by comparing the fair value of the asset to its carrying value. Fair value is determined based on a discounted cash flow analysis or the appraised or estimated market value of the asset, as appropriate.

Operating leases. We have financed a substantial percentage of our tractors and trailers with operating leases. These leases generally contain residual value guarantees, which provide that the value of equipment returned to the lessor at the end of the lease term will be no lower than a negotiated amount. To the extent that the value of the equipment is below the negotiated amount, we are liable to the lessor for the shortage at the expiration of the lease. For approximately 9% of our tractors under operating lease, we have residual value guarantees from the manufacturer at amounts equal to our residual obligation to the lessors. For all other equipment (or to the extent we believe any manufacturer will refuse or be unable to meet its obligation), we are required to recognize additional rental expense to the extent we believe the fair market value at the lease termination will be less than our obligation to the lessor.

In accordance with Statement of Financial Accounting Standards (“SFAS”) 13, “*Accounting for Leases*,” property and equipment held under operating leases, and liabilities related thereto, are not reflected on our balance sheet. All expenses related to revenue equipment operating leases are reflected on our statements of operations in the line item entitled “Revenue equipment rentals.” As such, financing revenue equipment with operating leases instead of bank borrowings or capital leases effectively moves the interest component of the financing arrangement into operating expenses on our statements of operations.

Claims Reserves and Estimates. The primary claims arising for us consist of cargo liability, personal injury, property damage, collision and comprehensive, workers’ compensation, and employee medical expenses. We maintain self-insurance levels for these various areas of risk and have established reserves to cover these self-insured liabilities. We also maintain insurance to cover liabilities in excess of these self-insurance amounts. Claims reserves represent accruals for the estimated uninsured portion of reported claims, including adverse development of reported claims, as well as estimates of incurred but not reported claims. Reported claims and related loss reserves are estimated by third party administrators, and we refer to these estimates in establishing our reserves. Claims incurred but not reported are estimated based on our historical experience and industry trends, which are continually monitored, and accruals are adjusted when warranted by changes in facts and circumstances. In establishing our reserves we must take into account and estimate various factors, including, but not limited to, assumptions concerning the nature and severity of the claim, the effect of the jurisdiction on any award or settlement, the length of time until ultimate resolution, inflation rates in health care, and in general interest rates, legal expenses, and other factors. Our actual experience may be different than our estimates, sometimes significantly. Changes in assumptions as well as changes in actual experience could cause these estimates to change in the near term. Insurance and claims expense will vary from period to period based on the severity and frequency of claims incurred in a given period.

Accounting for Income Taxes. Deferred income taxes represent a substantial liability on our consolidated balance sheet. Deferred income taxes are determined in accordance with SFAS No. 109, “*Accounting for Income Taxes*.” Deferred tax assets and liabilities are recognized for the expected future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, and

operating loss and tax credit carry-forwards. We evaluate our tax assets and liabilities on a periodic basis and adjust these balances as appropriate. We believe that we have adequately provided for our future tax consequences based upon current facts and circumstances and current tax law. However, should our tax positions be challenged and not prevail, different outcomes could result and have a significant impact on the amounts reported in our consolidated financial statements.

Table of Contents

The carrying value of our deferred tax assets (tax benefits expected to be realized in the future) assumes that we will be able to generate, based on certain estimates and assumptions, sufficient future taxable income in certain tax jurisdictions to utilize these deferred tax benefits. If these estimates and related assumptions change in the future, we may be required to reduce the value of the deferred tax assets resulting in additional income tax expense. We believe that it is more likely than not that the deferred tax assets, net of valuation allowance, will be realized, based on forecasted income. However, there can be no assurance that we will meet our forecasts of future income. We evaluate the deferred tax assets on a periodic basis and assess the need for additional valuation allowances.

Federal income taxes are provided on that portion of the income of foreign subsidiaries that is expected to be remitted to the United States.

Recent Accounting Pronouncements

In February 2007, the Financial Accounting Standards Board (“FASB”) issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (“SFAS 159”). SFAS 159 permits entities to choose to measure certain financial assets and liabilities at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. SFAS 159 is effective for fiscal years beginning after November 15, 2007. The Company is currently assessing the expected impact of adopting SFAS 159 on our consolidated financial position and results of operations when it becomes effective.

In September 2006, FASB issued SFAS (“SFAS”) No. 157, *Fair Value Measurements* (“SFAS 157”). SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles (“GAAP”) and expands disclosures about fair value measurements. This statement was published due to the different definitions of fair value and the limited guidance for applying those definitions in GAAP that are among the many accounting pronouncements that require fair value measurements. SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This statement is effective for financial statements issued for fiscal years beginning after November 15, 2007. Additionally, prospective application of this statement is required as of the beginning of the fiscal year in which it is initially applied. SFAS 157 is not expected to have a material impact upon our financial position, results of operations and cash flows.

In September 2006, FASB issued SFAS No. 158, *Employers’ Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)*. This statement requires an employer to recognize the overfunded or underfunded status of a defined benefit postretirement plan (other than a multiemployer plan) as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income of a business entity. This statement also requires an employer to measure the funded status of a plan as of the date of its year-end statement of financial position, with limited exceptions. The provisions of SFAS No. 158 are effective as of the end of the fiscal year ending after December 15, 2006. As of June 30, 2007, management believes that SFAS No. 158 will have no effect on the financial position, results of operations, and cash flows of the Company.

In June 2006, the FASB issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109* (“FIN 48”). FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. Our effective date of this interpretation is July 1, 2007, the first fiscal year beginning after December 15, 2006. We are continuing to evaluate the impact of the adoption of FIN 48 on our consolidated financial statements. Based on our current evaluation we do not expect a material impact on our financials.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

We experience various market risks, including changes in interest rates, foreign currency exchange rates, and fuel prices. We do not enter into derivatives or other financial instruments for trading or speculative purposes, nor when there are no underlying related exposures.

30

Table of Contents

Interest Rate Risk. We are exposed to interest rate risk principally from our primary credit facility. The credit facility carries a maximum variable interest rate of either the bank's base rate or LIBOR plus 1.125%. At June 30, 2007, the interest rate for revolving borrowings under our credit facility was LIBOR plus 0.875%. At June 30, 2007, we had \$18.0 million variable rate term loan borrowings outstanding under the credit facility. A hypothetical 10% increase in the bank's base rate and LIBOR would be immaterial to our net income.

Foreign Currency Exchange Rate Risk. We are subject to foreign currency exchange rate risk, specifically in connection with our Canadian operations. While virtually all of the expenses associated with our Canadian operations, such as independent contractor costs, company driver compensation, and administrative costs, are paid in Canadian dollars, a significant portion of our revenue generated from those operations is billed in U.S. dollars because many of our customers are U.S. shippers transporting goods to or from Canada. As a result, increases in the Canadian dollar exchange rate adversely affect the profitability of our Canadian operations. Assuming revenue and expenses for our Canadian operations identical to the year ended June 30, 2007 (both in terms of amount and currency mix), we estimate that a \$0.01 increase in the Canadian dollar exchange rate would reduce our annual net income by approximately \$156,000. As of June 30, 2007, we had none of our currency exposure hedged.

We generally do not face the same magnitude of foreign currency exchange rate risk in connection with our intra-Mexico operations conducted through our Mexican subsidiary, Jaguar, because our foreign currency revenues are generally proportionate to our foreign currency expenses for those operations. For purposes of consolidation, however, the operating results earned by our subsidiaries, including Jaguar, in foreign currencies are converted into United States dollars. As a result, a decrease in the value of the Mexican peso could adversely affect our consolidated results of operations. Assuming revenue and expenses for our Mexican operations identical to the year ended June 30, 2007 (both in terms of amount and currency mix), we estimate that a \$0.01 decrease in the Mexican peso exchange rate would reduce our annual net income by approximately \$66,000.

Commodity Price Risk. Shortages of fuel, increases in prices, or rationing of petroleum products can have a materially adverse effect on our operations and profitability. Fuel is subject to economic, political, and market factors that are outside of our control. Historically, we have sought to recover a portion of short-term increases in fuel prices from customers through the collection of fuel surcharges. However, fuel surcharges do not always fully offset increases in fuel prices. In addition, from time-to-time we may enter into derivative financial instruments to reduce our exposure to fuel price fluctuations. As of June 30, 2007, we had none of our estimated fuel purchases hedged.

Item 8. Financial Statements and Supplementary Data

The following statements are filed with this report:

Reports of Independent Registered Public Accounting Firm - KPMG LLP;
Consolidated Balance Sheets;
Consolidated Statements of Operations;
Consolidated Statements of Cash Flows;
Consolidated Statements of Stockholders' Equity; and
Notes to Consolidated Financial Statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders of Celadon Group, Inc.

We have audited the accompanying Consolidated Balance Sheets of Celadon Group, Inc. and subsidiaries as of June 30, 2007 and 2006, and the related Consolidated Statements of Operations, Stockholders' Equity, and Cash Flows for each of the years in the three-year period ended June 30, 2007. In connection with our audits of the Consolidated Financial Statements, we also have audited the Consolidated Financial Statement schedule listed in the Index at Item 15. These Consolidated Financial Statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these Consolidated Financial Statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the Consolidated Financial Statements referred to above present fairly, in all material respects, the financial position of Celadon Group, Inc. and subsidiaries as of June 30, 2007 and 2006, and the results of their operations and their cash flows for each of the years in the three-year period ended June 30, 2007, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related consolidated financial statement schedule, when considered in relation to the basic Consolidated Financial Statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

As discussed in Note 7 to the consolidated financial statements, the Company adopted Statement of Financial Accounting Standards No. 123 (revised 2004), Share-Based Payment, effective July 1, 2005 for accounting for share-based payments.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Celadon Group, Inc. and subsidiaries' internal control over financial reporting as of June 30, 2007, based on criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated August 29, 2007, expressed an unqualified opinion on management's assessment of, and the effective operation of, internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders of Celadon Group, Inc.

We have audited management's assessment, included in the accompanying Management's Report on Internal Control Over Financial Reporting set forth in Item 9A of Celadon Group, Inc.'s Annual Report on Form 10-K for the year ended June 30, 2007, that Celadon Group, Inc. and subsidiaries maintained effective internal control over financial reporting as of June 30, 2007, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that Celadon Group, Inc. and subsidiaries maintained effective internal control over financial reporting as of June 30, 2007, is fairly stated, in all material respects, based on criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Also, in our opinion, Celadon Group, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of June 30, 2007, based on criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Consolidated Balance Sheets of Celadon Group, Inc. and subsidiaries as of June 30, 2007 and 2006, and the related Consolidated Statements of Operations, Stockholders' Equity, and Cash Flows for each of the years in the

three-year period ended June 30, 2007, and our report dated August 29, 2007, expressed an unqualified opinion on those consolidated financial statements.

CELADON GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
June 30, 2007

(1) ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization

Celadon Group, Inc. (the “Company”), through its subsidiaries, provides long haul, full truckload services between the United States, Canada, and Mexico. The Company’s primary trucking subsidiaries are: Celadon Trucking Services, Inc. (“CTSI”), a U.S. based company; Celadon Logistics Services, Inc. (“CLSI”), a U.S. based company; Servicio de Transportation Jaguar, S.A. de C.V. (“Jaguar”), a Mexican based company; and Celadon Canada, Inc. (“CelCan”), a Canadian based company.

TruckersB2B, Inc. (“TruckersB2B”) is an Internet based “business-to-business” membership program, owned by Celadon E-Commerce, Inc., a wholly owned subsidiary of Celadon Group, Inc.

Summary of Significant Accounting Policies

Principles of Consolidation and Presentation

The consolidated financial statements include the accounts of Celadon Group, Inc. and its wholly and majority owned subsidiaries, all of which are wholly owned except for Jaguar in which the Company has a 75% interest. All significant intercompany accounts and transactions have been eliminated in consolidation. Unless otherwise noted, all references to annual periods refer to the respective fiscal years ended June 30.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses, and related disclosures at the date of the financial statements and during the reporting period. Such estimates include provisions for liability claims and uncollectible accounts receivable. Actual results could differ from those estimates.

Cash and Cash Equivalents

The Company considers all highly liquid instruments with maturity of three months or less when purchased to be cash equivalents.

Concentration of Credit Risk

Financial instruments, which potentially subject the Company to concentrations of credit risk, consist primarily of trade receivables. The Company performs ongoing credit evaluations of its customers and does not require collateral for its accounts receivable. The Company maintains reserves which management believes are adequate to provide for potential credit losses. Uncollectible accounts receivable are written off against the reserves. Concentrations of credit risk with respect to trade receivables are generally limited due to the Company’s large number of customers and the diverse range of industries, which they represent. Accounts receivable balances due from any single customer did not total more than 10% of the Company’s gross trade receivables at June 30, 2007.

Table of Contents

CELADON GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
June 30, 2007

Property and Equipment

Property and equipment are stated at cost. Property and equipment under capital leases are stated at fair value at the inception of the lease.

Depreciation of property and equipment and amortization of assets under capital leases is generally computed using the straight-line method and is based on the estimated useful lives of the related assets (net of salvage value) as follows:

Revenue and service equipment	2-7 years
Furniture and office equipment	4-5 years
Buildings	20 years
Leasehold improvements	Lesser of life of lease or useful life of improvement

Initial delivery costs relating to placing tractors in service are expensed as incurred. The cost of maintenance and repairs is charged to expense as incurred.

Long-lived assets are depreciated over estimated useful lives based on historical experience and prevailing industry practice. Estimated useful lives are periodically reviewed to ensure they remain appropriate. Long-lived assets are tested for impairment whenever an event occurs that indicates an impairment may exist. Future cash flows and operating performance are used for analyzing impairment losses. If the sum of expected undiscounted cash flows is less than the carrying value an impairment loss is recognized. The Company measures the impairment loss by comparing the fair value of the asset to its carrying value. Fair value is determined based on a discounted cash flow analysis or appraised or estimated market values as appropriate. Long-lived assets that are held for sale are recorded at the lower of carrying value or the fair value less costs to sell.

Tires in Service

Original and replacement tires on tractors and trailers are included in tires in service and are amortized over 18 to 36 months.

Goodwill

The consolidated balance sheets at June 30, 2007 and 2006, included goodwill of acquired businesses of approximately \$19.1 million for both years. These amounts have been recorded as a result of business acquisitions accounted for under the purchase method of accounting. Prior to July 1, 2001, goodwill from each acquisition was generally amortized on a straight-line basis. Under Statement of Financial Accounting Standards ("SFAS") No. 142, *Goodwill and Other Intangible Assets*, which we adopted as of July 1, 2001, goodwill is tested for impairment annually (or more often, if an event or circumstance indicates that an impairment loss has been incurred) in lieu of amortization. During the fourth quarter of fiscal 2007, we completed our most recent annual impairment test for that fiscal year and concluded that there was no indication of impairment.

Tests for impairment include estimating the fair value of our reporting units. As required by SFAS No. 142, we compare the estimated fair value of our reporting units with their respective carrying amounts including goodwill. We define a reporting unit as an operating segment. Under SFAS No. 142, fair value refers to the amount for which the entire reporting unit could be bought or sold. Our methods for estimating reporting unit values include market quotations, asset and liability fair values, and other valuation techniques, such as discounted cash flows and multiples of earnings, revenue, or other financial measures. With the exception of market quotations, all of these methods involve significant estimates and assumptions, including estimates of future financial performance and the selection of appropriate discount rates and valuation multiples.

Table of Contents

CELADON GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
June 30, 2007

TruckersB2B, Inc. purchased 2,128,345 shares of its Common Stock into treasury for \$2,435,175, which was accounted for using the purchase method in accordance with SFAS 141 "Business Combinations", during fiscal 2005. See Note 3 to the Consolidated Financial Statements for further disclosure.

Insurance Reserves

The Company's insurance program for liability, property damage, and cargo loss and damage, involves self-insurance with high retention levels. Under the casualty program, the Company is self-insured for personal injury and property damage claims for varying amounts depending on the date the claim was incurred. The Company accrues the estimated cost of the retained portion of incurred claims. These accruals are based on an evaluation of the nature and severity of the claim and estimates of future claims development based on historical trends. Insurance and claims expense will vary based on the frequency and severity of claims, the premium expense and self-insured retention levels.

Revenue Recognition

Trucking revenue and related direct cost are recognized on the date freight is delivered by the Company to the customer and collectibility is reasonably assured. Prior to commencement of shipment, the Company will negotiate an agreed upon price for services to be rendered.

TruckersB2B revenue is recognized at different times depending on the product or service purchased by the TruckersB2B member ("member"). Revenue for fuel rebates is recognized in the month the fuel was purchased by a member. The tire rebate revenue is recognized when proof-of-purchase documents are received from members. In most other programs, TruckersB2B receives commissions, royalties, or transaction fees based upon percentages of member purchases. TruckersB2B records revenue under these programs when earned and it receives the necessary information to calculate the revenue.

Costs of Products and Services

Cost of products and services represents the cost of the product or service purchased or used by the TruckersB2B member. Cost of products and services is recognized in the period that TruckersB2B recognizes revenue for the respective product or service.

Advertising

Advertising costs are expensed as incurred by the Company. Advertising expenses for fiscal 2007, 2006, and 2005 were \$1.4 million, \$1.1 million, and \$1.3 million, respectively, and are included in salaries, wages, and employee benefits and other operating expenses in the Consolidated Statements of Operations.

Income Taxes

Deferred taxes are recognized for the future tax effects of temporary differences between the carrying amounts of assets and liabilities for financial and income tax reporting, based on enacted tax laws and rates. Federal income taxes are provided on the portion of the income of foreign subsidiaries that is expected to be remitted to the United States.

Accounting for Derivatives

The Company had no derivative financial instruments in place in fiscal 2007, 2006, or 2005 to reduce exposure to fuel and currency price fluctuations. SFAS 133, *Accounting for Certain Derivatives and Hedging Activities*, requires that all derivative instruments be recorded on the balance sheet at their respective fair values.

40

Table of Contents

CELADON GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
June 30, 2007

Earnings per Share (“EPS”)

The Company applies the provisions of SFAS No. 128, “*Earnings per Share*”, which requires companies to present basic EPS and diluted EPS. Basic EPS excludes dilution and is computed by dividing income available to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted EPS reflects the dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the Company. Dilutive common stock options are included in the diluted EPS calculation using the treasury stock method.

Stock-based Employee Compensation Plans

In December 2004, the Financial Accounting Standards Board (“FASB”) issued SFAS No. 123(R), *Share-Based Payments* (“SFAS No. 123(R)”), revising SFAS No. 123, *Accounting for Stock Based Compensation*; superseding Accounting Principles Board (“APB”) Opinion No. 25, *Accounting for Stock Issued to Employees* and its related implementation guidance; and amending SFAS No. 95, *Statement of Cash Flows*. SFAS No. 123(R) requires companies to recognize the grant date fair value of stock options and other equity-based compensation issued to employees in its income statement. We adopted this statement effective July 1, 2005. Our adoption of SFAS No. 123(R) impacted our results of operations by increasing salaries, wages, and related expenses, increasing additional paid-in capital, and increasing deferred income taxes. See Footnote 7 for the impact to the Company.

Foreign Currency Translation

Foreign financial statements are translated into U.S. dollars in accordance with SFAS 52, *Foreign Currency Translation*. Assets and liabilities of the Company’s foreign operations are translated into U.S. dollars at year-end exchange rates. Income statement accounts are translated at the average exchange rate prevailing during the year. Resulting translation adjustments are included in other comprehensive income.

Recent Accounting Pronouncements

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (“SFAS 159”). SFAS 159 permits entities to choose to measure certain financial assets and liabilities at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. SFAS 159 is effective for fiscal years beginning after November 15, 2007. The Company is currently assessing the expected impact of adopting SFAS 159 on our consolidated financial position and results of operations when it becomes effective.

In September 2006, FASB issued SFAS No. 157, *Fair Value Measurements* (“SFAS 157”). SFAS 157 defines fair value, establishes a framework for measuring fair value in GAAP and expands disclosures about fair value measurements. This statement was published due to the different definitions of fair value and the limited guidance for applying those definitions in GAAP that are among the many accounting pronouncements that require fair value measurements. SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This statement is effective for financial statements issued for fiscal years beginning after November 15, 2007. Additionally, prospective application of this statement is required as of the beginning of the fiscal year in which it is initially applied. SFAS 157 is not

expected to have a material impact upon our financial position, results of operations and cash flows.

Table of Contents

CELADON GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
June 30, 2007

In September 2006, FASB issued SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans-an amendment of FASB Statements No. 87, 88, 106, and 132(R)*. This statement requires an employer to recognize the overfunded or underfunded status of a defined benefit postretirement plan (other than a multiemployer plan) as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income of a business entity. This statement also requires an employer to measure the funded status of a plan as of the date of its year-end statement of financial position, with limited exceptions. The provisions of SFAS No. 158 are effective as of the end of the fiscal year ending after December 15, 2006. As of June 30, 2007, management believes that SFAS No. 158 will have no effect on the financial position, results of operations, and cash flows of the Company.

In June 2006, the FASB issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109* ("FIN 48"). FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. Our effective date of this interpretation is July 1, 2007, the first fiscal year beginning after December 15, 2006. We are continuing to evaluate the impact of the adoption of FIN 48 on our consolidated financial statements. Based on our current evaluation we do not expect a material impact on our financials.

(2) STOCK SPLITS

On January 18, 2006, the Board of Directors approved a three-for-two stock split, effected in the form of a fifty percent (50%) stock dividend. The stock split distribution date was February 15, 2006, to stockholders of record as of the close of business on February 1, 2006.

On May 4, 2006, the Board of Directors approved a second three-for-two stock split, effected in the form of a fifty percent (50%) stock dividend. The second stock split distribution date was June 15, 2006, to stockholders of record as of the close of business on June 1, 2006.

Unless otherwise indicated, all share and per share amounts have been adjusted to give retroactive effect to this stock-split.

(3) ACQUISITIONS

On June 5, 2007, the Company acquired certain assets of Air Road Express Inc. ("Air Road"). Pursuant to the asset purchase agreement, our wholly-owned subsidiary, CTSI, acquired Air Road's truckload business, including 53 tractors and 102 trailers for approximately \$2.9 million, of which \$1.3 million was allocated to equipment held for resale and \$1.6 million was allocated to property, plant, and equipment. In connection with the acquisition, we offered employment to approximately 80 qualified, former Air Road drivers.

On February 28, 2007, the Company acquired certain assets of Warrior Services Inc. d/b/a Warrior Xpress ("Warrior"). Pursuant to the asset purchase agreement, our wholly-owned subsidiary, CTSI, acquired Warrior's truckload business, including 82 tractors and 287 trailers for approximately \$8.3 million, the entire amount of which was allocated to equipment held for resale, of which \$4.0 million is remaining. In connection with the acquisition, we offered employment to approximately 110 qualified, former Warrior drivers.

On October 6, 2006, the Company acquired certain assets of Erin Truckways Ltd., d/b/a Digby Truck Line, Inc. (“Digby”). Pursuant to the asset purchase agreement, our wholly-owned subsidiary, CTSI, acquired Digby’s truckload business, including approximately 270 tractors and 590 trailers for approximately \$21.2 million, which was allocated \$13.0 million to equipment held for resale, of which we have sold \$8.8 million, and the remaining \$8.2 million to tractors and trailers. In connection with the acquisition, we offered employment to approximately 150 qualified, former Digby drivers.

Table of Contents

CELADON GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
June 30, 2007

On January 14, 2005, the Company purchased certain assets consisting of approximately 370 tractors and 670 van trailers of CX Roberson, Inc. (“Roberson”) for approximately \$22.7 million. The Company used borrowings under its existing credit facility to fund the transaction. The transaction did not include Roberson’s flatbed business and related assets. The purchase price was allocated to the revenue equipment based on an independent appraisal of the equipment.

The Company retained approximately 200 of the newest acquired tractors and 200 of the newest acquired trailers, and disposed of the balance of the acquired revenue equipment. Net of proceeds of dispositions, the Company’s investment in the former Roberson equipment was approximately \$12.5 million. Following the acquisition, employment was offered to approximately 320 of Roberson’s drivers, and over 220 of those drivers accepted employment.

In fiscal 2005, TruckersB2B, Inc. purchased 2,013,276 shares of its Common Stock into treasury for \$2,435,000. An 18-month note payable for \$910,000 was issued with the difference settled in cash. Celadon Group, Inc. and subsidiaries own 100% of the outstanding shares of TruckersB2B, Inc. The \$2,435,000 of TruckersB2B treasury stock was accounted for using the purchase method in accordance with SFAS 141 “*Business Combinations*”.

(4) PROPERTY, EQUIPMENT, AND LEASES

Property and equipment consists of the following (in thousands):

	2007	2006
Revenue equipment owned	\$ 158,924	\$ 97,721
Revenue equipment under capital leases	57,510	2,009
Furniture and office equipment	4,850	4,528
Land and buildings	15,942	14,269
Service equipment	1,123	1,080
Leasehold improvements	2,550	2,126
	\$ 240,898	\$ 121,733

Included in accumulated depreciation was \$2.0 million and \$0.6 million in 2007 and 2006, respectively, related to revenue equipment under capital leases. Depreciation and amortization expense relating to property and equipment owned and revenue equipment under capital leases, including gains (losses) on disposition of equipment and impairment of trailers, was \$21.9 million in 2007, \$12.4 million in 2006, and \$14.9 million in 2005.

(5) LEASE OBLIGATIONS AND LONG-TERM DEBT

Lease Obligations

The Company leases certain revenue and service equipment under long-term lease agreements, payable in monthly installments.

Equipment obtained under capital leases is reflected on the Company’s balance sheet as owned and the related leases bear interest at rates ranging from 3.7% to 5.9% per annum, maturing at various dates through 2013.

Assets held under operating leases are not recorded on the Company's balance sheet. The Company leases revenue and service equipment under noncancellable operating leases expiring at various dates through June 2013.

The Company leases warehouse and office space under noncancellable operating leases expiring at various dates through September 2021. Certain real estate leases contain renewal options.

Table of Contents

CELADON GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
June 30, 2007

Total rental expense under operating leases was as follows for 2007, 2006, and 2005 (in thousands):

	2007	2006	2005
Revenue and service equipment	\$ 31,900	\$ 39,601	\$ 35,848
Office facilities and terminals	3,094	2,423	2,298
	\$ 34,994	\$ 42,024	\$ 38,146

Future minimum lease payments relating to capital leases and to operating leases with initial or remaining terms in excess of one year are as follows (in thousands):

Year ended June 30	Capital Leases	Operating Leases
2008	\$ 8,629	\$ 39,148
2009	8,593	29,977
2010	8,542	22,106
2011	16,896	5,823
2012	18,871	5,823
Thereafter	1,832	32,265
Total minimum lease payments	\$ 63,363	\$ 135,142
Less amounts representing interest	8,343	
Present value of net minimum lease payments	\$ 55,020	
Less current maturities	6,228	
Non-current portion	\$ 48,792	

The Company is obligated for lease residual value guarantees of \$62.7 million, with \$15.1 million due in the first year. The guarantees are included in the future minimum lease payments above. To the extent the expected value at lease termination date is lower than the residual value guarantee, we would accrue for the difference over the remaining lease term.

Long-Term Debt

The Company's outstanding borrowings excluding capital leases set forth above consist of the following at June 30 (in thousands):

	2007	2006
Outstanding amounts under Credit Agreement	\$ 18,000	\$ 4,750
Other borrowings	21,622	5,833
	39,622	10,583
Less current maturities	10,736	975
Non-current portion	\$ 28,886	\$ 9,608

Lines of Credit

On September 26, 2005, the Company, CTSI, CLSI, and TruckersB2B entered into an unsecured Credit Agreement with LaSalle Bank National Association, as administrative agent, and LaSalle Bank National Association, Fifth Third Bank (Central Indiana), and JPMorgan Chase Bank, N.A., as lenders, which matures on September 24, 2010 (the "Credit Agreement"). The Credit Agreement was used to refinance the Company's then-existing credit facility and is intended to provide for ongoing working capital needs and general corporate purposes. Borrowings under the Credit Agreement are based, at the option of the Company, on a base rate equal to the greater of the federal funds rate plus 0.5% and the administrative agent's prime rate or LIBOR plus an applicable margin between 0.75% and 1.125% that is adjusted quarterly based on cash flow coverage. The effective rate for the month of June 2007 was 7.18%. The Credit Agreement is guaranteed by Celadon E-Commerce, Inc., CelCan, and Jaguar, each of which is a subsidiary of the Company.

Table of Contents

CELADON GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
June 30, 2007

The Credit Agreement has a maximum revolving borrowing limit of \$50.0 million, and the Company may increase the revolving borrowing limit by an additional \$20.0 million, to a total of \$70.0 million. Letters of credit are limited to an aggregate commitment of \$15.0 million and a swing line facility has a limit of \$5.0 million. A commitment fee that is adjusted quarterly between 0.15% and 0.225% per annum based on cash flow coverage is due on the daily unused portion of the Credit Agreement. The Credit Agreement contains certain restrictions and covenants relating to, among other things, dividends, tangible net worth, cash flow, mergers, consolidations, acquisitions and dispositions, and total indebtedness. We were in compliance with these covenants at June 30, 2007. At June 30, 2007, \$18.0 million of our credit facility was utilized as outstanding borrowings and \$4.8 million was utilized for standby letters of credit.

Other Borrowings

Other borrowings consist primarily of mortgage debt financing and notes payable for equipment purchase, which are collateralized by the equipment. At June 30, 2007, the interest rate charged on outstanding borrowings ranged from 5.8% to 7.5%.

Maturities of long-term debt for the years ending June 30 are as follows (in thousands):

2007	\$ 10,736
2008	8,344
2009	2,159
2010	18,339
2011	44
	\$ 39,622

(6)**EMPLOYEE BENEFIT PLANS***401(k) Profit Sharing Plan*

The Company has a 401(k) profit sharing plan, which permits U.S. employees of the Company to contribute up to 50% of their annual compensation, up to certain Internal Revenue Service limits, on a pretax basis. The contributions made by each employee are fully vested immediately and are not subject to forfeiture. The Company makes a discretionary matching contribution of up to 50% of the employee's contribution up to 5% of their annual compensation. The aggregate Company contribution may not exceed 5% of the employee's compensation. Employees vest in the Company's contribution to the plan at the rate of 20% per year from the date of employee anniversary. Contributions made by the Company during 2007, 2006, and 2005 amounted to \$331,000, \$396,000, and \$403,000, respectively.

(7)**STOCK PLANS**

On July 1, 2005, the Company adopted SFAS 123(R) using the modified prospective method. This Statement requires all share-based payments to employees, including grants of employee stock options, be recognized in the financial statements based upon a grant-date fair value of an award as opposed to the intrinsic value method of accounting for stock-based employee compensation under APB No. 25, which the Company used for the preceding years.

In January 2006, shareholders approved the 2006 Omnibus Plan (“2006 Plan”) that provides various vehicles to compensate the Company’s key employees. The 2006 Plan utilizes such vehicles as stock options, restricted stock grants, and stock appreciation rights (“SARs”). The 2006 Plan authorized the Company to grant 1,687,500 shares. In fiscal 2007 the Company granted 20,000 stock options and 68,160 restricted stock grants. In fiscal 2006 the Company granted 689,445 stock options and 121,680 restricted stock grants. The Company is authorized to grant an additional 800,871 shares.

Table of Contents

CELADON GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
June 30, 2007

The total compensation cost that has been recorded for such stock-based awards was an expense of \$1.8 million in fiscal 2007, and \$5.1 million in fiscal 2006, and \$0.6 million in fiscal 2005. The total income tax benefit recognized in the income statement for share-based compensation arrangements was \$0.8 million in fiscal 2007.

The Company has granted a number of stock options under various plans. Options granted to employees have been granted with an exercise price equal to the market price on the grant date and expire on the tenth anniversary of the grant date. The majority of options granted to employees vest 25 percent per year, commencing with the first anniversary of the grant date. Options granted to non-employee directors have been granted with an exercise price equal to the market price on the grant date, vest over three years with regard to the 2006 Plan grants and four years with respect to all other grants, commencing with the first anniversary of the grant date, and expire on the tenth anniversary of the grant date.

A summary of the activity of the Company's stock option plans as of June 30, 2007 and changes during the period then ended is presented below:

Options	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at July 1, 2005	1,175,519	\$ 2.88	---	---
Granted	689,445	\$ 12.81	---	---
Exercised	(376,349)	\$ 2.81	---	---
Forfeited or expired	(41,905)	\$ 9.43	---	---
Outstanding at June 30, 2006	1,446,710	\$ 7.44	5.80	\$ 21,118,912
Granted	20,000	\$ 18.84	---	---
Exercised	(401,718)	\$ 2.45	---	---
Outstanding at June 30, 2007	1,064,992	\$ 9.54	7.06	\$ 6,879,503
Exercisable at June 30, 2007	549,001	\$ 6.24	5.65	\$ 5,346,342

The total intrinsic value of options exercised during fiscal 2007, 2006, and 2005 was \$5.3 million, \$4.1 million, and \$4.2 million, respectively.

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions used for grants:

	2007	2006	2005
Weighted average grant date fair value	\$ 9.97	\$ 5.59	\$ 1.67
Dividend yield	0	0	0
Expected volatility	64.2%	50.1%	37.4%
Risk-free interest rate	4.92%	4.35%	3.77%
Expected lives	4 years	4 years	7 years

Expected volatility is based upon the historical volatility of the Company's stock. The risk-free rate is based upon the U.S. Treasury yield curve in effect at the time of grant. Expected lives are based upon the historical experience of the Company.

CELADON GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
June 30, 2007

Restricted Shares

	Number of Shares	Weighted Average Grant Date Fair Value
Unvested at July 1, 2005	120,037	\$ 6.02
Granted	121,680	\$ 12.81
Vested	(38,137)	\$ 5.89
Unvested at June 30, 2006	203,580	\$ 10.10
Granted	68,160	\$ 16.79
Vested	(68,558)	\$ 8.96
Unvested at June 30, 2007	203,182	\$ 12.73

Restricted shares granted to employees have been granted subject to achievement of certain performance targets and vest 25% each year, commencing with the first anniversary of the grant date. The weighted average grant date share prices were \$16.79, \$12.81, and \$8.64 in fiscal 2007, 2006, and 2005, respectively.

As of June 30, 2007, we had \$2.3 million and \$2.2 million of total unrecognized compensation expense related to stock options and restricted stock, respectively, that is expected to be recognized over the remaining weighted average period of approximately 2.5 years for stock options and 1.8 years for restricted stock.

Stock Appreciation Rights

	Number of Shares	Weighted Average Grant Date Fair Value
Unvested at July 1, 2005	790,312	\$ 7.15
Paid	(194,069)	\$ 5.97
Forfeited	(24,806)	\$ 7.41
Unvested at June 30, 2006	571,437	\$ 7.73
Paid	(7,871)	\$ 4.48
Forfeited	(309,176)	\$ 7.10
Unvested at June 30, 2007	254,390	\$ 8.59

Stock appreciation rights were granted to employees vesting on a 3 or 4 year vesting schedule; in addition, certain financial targets must be met for these shares to vest. The weighted average grant date share price was \$7.73 and \$8.61 for fiscal 2006 and 2005, respectively. The Company recognized a \$1.9 million benefit and an expense of \$4.1 million in fiscal 2007 and 2006, respectively, for vested stock appreciation rights.

During the first quarter of fiscal 2007, the Company gave SARs grantees the opportunity to enter into an alternative fixed compensation arrangement whereby the grantee would forfeit all rights to SARs compensation in exchange for a guaranteed quarterly payment for the remainder of the underlying SARs term. This alternative arrangement is subject to continued service to the Company or one of its subsidiaries. The number of forfeited SARs reported above reflects entry into this alternative arrangement. These fixed payments will be accrued quarterly from July 1, 2006 to March 31, 2009. The Company offered this alternative arrangement to mitigate the volatility to earnings from stock price

variance on the SARs.

CELADON GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
June 30, 2007

Stockholder Rights Plan

On June 28, 2000, the Company's Board of Directors approved a Stockholder Rights Plan whereby, on July 31, 2000, common stock purchase rights ("Rights") were distributed as a dividend at the rate of one Right for each share of the Company's common stock held as of the close of business on July 20, 2000. The Rights will expire on July 18, 2010. Under the plan, the Rights will be exercisable only if triggered by a person or group's acquisition of 15% or more of the Company's common stock. Each right, other than Rights held by the acquiring person or group, would entitle its holder to purchase a specified number of the Company's common shares for 50% of their market value at that time.

Following the acquisition of 15% or more of the Company's common stock by a person or group, the Board of Directors may authorize the exchange of the Rights, in whole or in part, for shares of the Company's common stock at an exchange ratio of one share for each Right, provided that at the time of such proposed exchange no person or group is then the beneficial owner of 50% or more of the Company's common stock.

Unless a 15% acquisition has occurred, the Rights may be redeemed by the Company at any time prior to the termination date of the plan.

(8) EARNINGS PER SHARE

The following is a reconciliation of the numerators and denominators used in computing earnings per share (in thousands):

	2007	2006	2005
Net income	\$ 22,252	\$ 20,548	\$ 12,580
Basic earnings per share:			
Weighted - average number of common shares outstanding	23,252	22,828	22,286
Basic earnings per share	\$ 0.96	\$ 0.90	\$ 0.56
Diluted earnings per share:			
Weighted - average number of common shares outstanding	23,252	22,828	22,286
Effect of stock options and other incremental shares	446	558	727
Weighted-average number of common shares outstanding - diluted	23,698	23,386	23,013
Diluted earnings per share	\$ 0.94	\$ 0.88	\$ 0.55

(9) COMMITMENTS AND CONTINGENCIES

The Company has outstanding commitments to purchase approximately \$45.2 million of revenue equipment at June 30, 2007.

Standby letters of credit, not reflected in the accompanying consolidated financial statements, aggregated approximately \$4.8 million at June 30, 2007.

The Company has employment and consulting agreements with various key employees providing for minimum combined annual compensation over the next two fiscal years of \$717,000 in fiscal 2008, and \$76,000 in fiscal 2009.

Table of Contents

CELADON GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
June 30, 2007

There are various claims, lawsuits, and pending actions against the Company and its subsidiaries in the normal course of the operation of their businesses with respect to cargo, auto liability, or income taxes.

On August 8, 2007, the 384th District Court of the State of Texas situated in El Paso, Texas, rendered a judgment against CTSI, for approximately \$3.4 million in the case of *Martinez v. Celadon Trucking Services, Inc.*, which was originally filed on September 4, 2002. The case involves a workers' compensation claim of a former employee of CTSI who suffered a back injury as a result of a traffic accident. CTSI and the Company believe all actions taken were proper and legal and contend that the proper and exclusive place for resolution of this dispute was before the Indiana Workers Compensation Board. While there can be no certainty as to the outcome, the Company believes that the ultimate resolution of this dispute will not have a materially adverse effect on its consolidated financial position or results of operations. CTSI intends to vigorously appeal the decision.

(10) INCOME TAXES

The income tax provision for operations in 2007, 2006, and 2005 consisted of the following (in thousands):

	2007	2006	2005
Current:			
Federal	\$ 3,509	\$ 9,812	\$ 8,324
State and local	1,181	1,262	1,364
Foreign	(773)	(225)	589
Total Current	3,917	10,849	10,277
Deferred:			
Federal	9,593	1,869	(561)
State and local	524	210	(197)
Foreign	194	(62)	(122)
Total Deferred	10,311	2,017	(880)
Total	\$ 14,228	\$ 12,866	\$ 9,397

No benefit has been recognized for U.S. federal income taxes on undistributed losses of foreign subsidiaries of approximately \$650,000 at June 30, 2007. Included in the consolidated income before income taxes is a loss of approximately \$1.2 million from foreign operations in fiscal 2007.

The Company's income tax expense varies from the statutory federal tax rate of 35% applied to income before income taxes as follows (in thousands):

	2007	2006	2005
Computed "expected" income tax expense	\$ 12,768	\$ 11,695	\$ 7,693
State taxes, net of federal benefit	1,108	957	759
Non-deductible expenses	1,368	922	1,057
Other, net	(1,016)	(708)	(112)
Actual income tax expense	\$ 14,228	\$ 12,866	\$ 9,397

(11) SEGMENT INFORMATION AND SIGNIFICANT CUSTOMERS

The Company operates in two segments, transportation and e-commerce. The Company generates revenue in the transportation segment primarily by providing truckload hauling services through its subsidiaries, CTSI, CLSI, Jaguar, and CelCan. The Company provides certain services over the Internet through its e-commerce subsidiary, TruckersB2B. The e-commerce segment generates revenue by providing discounted fuel, tires, and other products and services to small and medium-sized trucking companies. The Company evaluates the performance of its operating segments based on operating income.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

There were no changes in or disagreements with accountants on accounting or financial disclosure within the last two fiscal years.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We have established disclosure controls and procedures to ensure that material information relating to us and our consolidated subsidiaries is made known to the officers who certify our financial reports and to other members of senior management and the Board of Directors.

Based on their evaluation as of June 30, 2007, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) are effective to ensure that the information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms.

Management's Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Rule 13a-15(f) or 15d-15(f) promulgated under the Exchange Act as a process designed by, or under the supervision of, the principal executive and principal financial officers, and effected by the board of directors, management, and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles and includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail, accurately, and fairly reflect the transactions and dispositions of our assets;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of our assets that could have a material effect on our financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of our internal control over financial reporting as of June 30, 2007. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control - Integrated Framework*.

Based on its assessment, management believes that, as of June 30, 2007, our internal control over financial reporting is effective based on those criteria.

Management's assessment of the effectiveness of internal control over financial reporting as of June 30, 2007, has been audited by KPMG LLP, the independent registered public accounting firm who also audited our consolidated financial statements. KPMG LLP's attestation report on management's assessment of the Company's internal control over financial reporting appears on page 30 herein.

Table of Contents

Design and Changes in Internal Control over Financial Reporting

The design, monitoring, and revision of the system of internal accounting controls involves, among other things, management's judgments with respect to the relative cost and expected benefits of specific control measures.

There were no changes in our internal control over financial reporting that occurred during the quarter ended June 30, 2007, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART III**

Certain information required to be set forth in Part III of this report is incorporated by reference to our definitive Proxy Statement which will be filed with the SEC not later than 120 days after the end of the fiscal year covered by this Annual Report on Form 10-K. Only those sections of the definitive Proxy Statement which specifically address the items set forth herein are incorporated by reference. Such incorporation does not include the Compensation Committee Report included in the definitive Proxy Statement.

Item 10. Directors and Executive Officers of the Registrant

The information required by this Item, with the exception of the Code of Ethics disclosure below, is incorporated herein by reference to our definitive Proxy Statement to be filed in connection with the 2007 Annual Meeting of Stockholders.

Code of Ethics

We have adopted a Code of Ethics that applies to our principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions. A copy of the Code of Ethics was filed as Exhibit 14 to our Annual Report on Form 10-K for the year ended June 30, 2003, filed with the SEC on September 19, 2003.

Item 11. Executive Compensation

The information required by this Item is incorporated herein by reference to our definitive Proxy Statement to be filed in connection with the 2007 Annual Meeting of Stockholders.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this Item, is incorporated herein by reference to our definitive Proxy Statement to be filed in connection with the 2007 Annual Meeting of Stockholders. The following table provides certain information as of June 30, 2007, with respect to our compensation plans and other arrangements under which shares of our common stock are authorized for issuance.

Equity Compensation Plan Information

The following table summarizes our equity compensation plans as of June 30, 2007:

Plan Category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted-average price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance
Equity compensation plans approved by security holders	882,410	\$9.54	800,871

Equity compensation plans not approved by security holders	Not applicable	Not applicable	Not applicable
--	----------------	----------------	----------------
