NOTE 1 - ORGANIZATION AND DESCRIPTION OF BUSINESS

Organization

The Company's business is to acquire patents and patent rights and to monetize the value of those assets to generate revenue and profit for the Company. The Company acquires patents and patent rights from their owners, who range from individual inventors to Fortune 500 companies. Part of the Company's acquisition strategy is to acquire or invest in patents and patent rights that cover a wide-range of subject matter, which allows the Company to achieve the benefits of a growing diversified portfolio of assets. Generally, the patents and patent rights that the Company acquires are characterized by having large identifiable companies who are or have been using technology that infringes on the Company's patents and patent rights. The Company generally monetizes its portfolio of patents and patent rights by entering into license discussions, and if that is unsuccessful, initiates enforcement activities against any infringing parties with the objective of entering into a standard form of comprehensive settlement and license agreement that may include the granting of non-exclusive retroactive and future rights to use the patented technology, a covenant not to sue, a release of the party from certain claims, the dismissal of any pending litigation and other terms that are appropriate in the circumstances. The Company's strategy has been developed with the expectation that it will result in a long-term, diversified revenue stream for the Company.

Marathon Patent Group, Inc. (the "Company") was incorporated under the laws of the State of Nevada on February 23, 2010, initially as Verve Ventures, Inc.

On December 7, 2011, the Company filed a Certificate of Amendment to its Articles of Incorporation with the Secretary of State of the State of Nevada in order to change its name to "American Strategic Minerals Corporation" from "Verve Ventures, Inc.", and increase the Company's authorized capital to 200,000,000 shares of common stock, par value \$0.0001 per share, and 50,000,000 shares of preferred stock, par value \$0.0001 per share. During June 2012, the Company decided to discontinue its exploration and potential development of uranium and vanadium minerals business.

On August 1, 2012, the shareholders holding a majority of the Company's voting capital voted in favor of (i) changing the name of the Company to "Fidelity Property Group, Inc." and (ii) the adoption the 2012 Equity Incentive Plan and reserving 10,000,000 shares of common stock for issuance thereunder (the "2012 Plan"). The board of directors of the Company (the "Board of Directors") approved the name change and the adoption of the 2012 Plan on August 1, 2012. The Company did not file an amendment to its Articles of Incorporation with the Secretary of State of Nevada and subsequently abandoned the decision to adopt the "Fidelity Property Group, Inc." name and discontinue its real estate business.

On October 1, 2012, the shareholders holding a majority of the Company's voting capital had voted and authorized the Company to (i) change the name of the Company to Marathon Patent Group, Inc. (the "Name Change") and (ii) effectuate a reverse stock split of the Company's common stock by a ratio of 3-for-2 (the "Reverse Split") within one year from the date of approval of the stockholders of the Company. The Board of Directors approved the Name Change and the Reverse Split on October 1, 2012. The Board of Directors determined the name "Marathon Patent Group, Inc." better reflects the long-term strategy in exploring other opportunities and the identity of the Company going forward. On February 15, 2013, the Company filed the Certificate of Amendment with the Secretary of State of the State of Nevada in order to effectuate the Name Change. On May 31, 2013, shareholders of record holding a majority of the outstanding voting capital of the Company approved a reverse stock split of the Company's issued and outstanding common stock by a ratio of not less than one-for-five and not more than one-for-fifteen at any time prior to April 30, 2014, with such ratio to be determined by the Company's Board of Directors, in its sole discretion. On June 24, 2013, the reverse stock split ratio of one (1) for thirteen (13) basis was approved by the Board of Directors. On July 18, 2013, the Company filed a certificate of amendment to its Amended and Restated Articles of

Incorporation with the Secretary of State of the State of Nevada in order to effectuate a reverse stock split of the Company's issued and outstanding common stock, par value \$0.0001 per share on a one (1) for thirteen (13) basis. All share and per share values for all periods presented in the accompanying consolidated financial statements are retroactively restated for the effect of the reverse stock split.

Table of Contents

On September 16, 2014, the board of directors of the Company approved and adopted, subject to shareholder approval on or prior to September 16, 2015, the Company's 2014 Equity Incentive Plan.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation and Principles of Consolidation

The unaudited consolidated financial statements are prepared in accordance with generally accepted accounting principles in the United States of America ("US GAAP") and present the consolidated financial statements of the Company and its wholly-owned subsidiaries. In the preparation of consolidated financial statements of the Company, all intercompany transactions and balances were eliminated. All adjustments (consisting of normal recurring items) necessary to present fairly the Company's consolidated financial position as of September 30, 2014, and the results of operations and cash flows for the three and nine months ended September 30, 2014 have been included. The results of operations for the three and nine months ended September 30, 2014 are not necessarily indicative of the results to be expected for the full year. Other than where noted, the accounting policies and procedures employed in the preparation of these consolidated financial statements have been derived from the audited financial statements of the Company for the year ended December 31, 2013, which are contained in Form 10-K as filed with the Securities and Exchange Commission ("SEC") on March 31, 2014. The consolidated balance sheet as of December 31, 2013 was derived from those financial statements.

Cash and Cash Equivalents

The Company considers all highly liquid debt instruments and other short-term investments with maturity of three months or less, when purchased, to be cash equivalents. The Company maintains cash and cash equivalent balances at one financial institution that is insured by the Federal Deposit Insurance Corporation. The Company's accounts at this institution are insured up to \$250,000 by the Federal Deposit Insurance Corporation ("FDIC"). As of September 30, 2014, the Company had bank balances exceeding the FDIC insurance limit. To reduce its risk associated with the failure of such financial institution, the Company evaluates at least annually the rating of the financial institution in which it holds deposits.

Use of Estimates and Assumptions

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates made by management include, but are not limited to, estimating the useful lives of patent assets, the assumptions used to calculate fair value of warrants and options granted, goodwill impairment, realization of long-lived assets, deferred income taxes, unrealized tax positions and business combination accounting.

Accounts Receivable

The Company has a policy of reserving for questionable accounts based on its best estimate of the amount of probable credit losses in its existing accounts receivable. The Company periodically reviews its accounts receivable to determine whether an allowance is necessary based on an analysis of past due accounts and other factors that may indicate that the realization of an account may be in doubt. Account balances deemed to be uncollectible are charged to the bad debt expense after all means of collection have been exhausted and the potential for recovery is considered remote. At September 30, 2014 and December 31, 2013, the allowance for bad debt was \$0 and \$57,050, respectively. Accounts receivable-net at September 30, 2014 and December 31, 2013, amounted to \$10,510,000 and

\$270,000, respectively. All accounts receivable, less taxes and transaction fees, have been received.

Table of Contents

Concentration of Revenue and Geographic Area

Patent license revenue from enforcement activities is considered United States revenue as payments are for licenses for United States operations irrespective of the location of the licensee's or licensee's parent home domicile. As of September 30, 2014, two licenses accounted for 100% of the Company's total accounts receivable. Revenues from five licenses accounted for 100% of the Company's operating revenues for the three months ended September 30, 2014, two of which accounted for 99.6% of the Company's revenues for the three months ended September 30, 2014.

While the Company has a growing portfolio of patents, the Company has historically received a significant portion of its revenue and expects that a significant portion of its future revenues were and will be based on one-time grants of similar non-recurring, non-exclusive, non-assignable licenses to a relatively small number of entities and their affiliates. Further, with the expected small number of firms with which the Company enters into license agreements, and the amount and timing of such license agreements, the Company also expects that its revenues may be highly variable from one period to the next.

Revenue Recognition

The Company recognizes revenue in accordance with ASC Topic 605, "Revenue Recognition". Revenue is recognized when (i) persuasive evidence of an arrangement exists, (ii) all obligations have been substantially performed, (iii) amounts are fixed or determinable and (iv) collectability of amounts is reasonably assured.

The Company considers its licensing and enforcement activities as one unit of accounting under ASC 605-25, "Multiple-Element Arrangements" as the delivered items do not have value to customers on a standalone basis, there are no undelivered elements and there is no general right of return relative to the license. Under ASC 605-25, the appropriate recognition of revenue is determined for the combined deliverables as a single unit of accounting and revenue is recognized upon delivery of the final elements, including the license for past and future use, and the release.

Also, due to the fact that the settlement element and license element for past and future use are the major central business, the Company does not present these two elements as different revenue streams in its statement of operations. The Company does not expect to provide licenses that do not provide some form of settlement or release. The Company derived all of its revenues for the three months ended September 30, 2014 from the one-time issuance of non-recurring, non-exclusive, non-assignable licenses to five different entities and their affiliates for certain of the Company's patents.

The Company's subsidiaries entered into five license agreements during the three months ended September 30, 2014.

On July 21, 2014, Cyberfone Systems, LLC ("Cyberfone"), a wholly owned subsidiary of the Company, entered into a Settlement and License Agreement with a single corporate licensee. On July 28, 2014, Selene Communication Technologies, LLC ("Selene"), a wholly owned subsidiary of the Company, entered into a License Agreement with a single corporate licensee. On July 30, 2014, Cyberfone, entered into a Settlement Agreement with a single corporate licensee. On September 30, 2014, Selene entered into a Patent License and License Option Agreement with RPX Corporation, a Delaware corporation ("RPX"). On September 30, 2014, Clouding Corp., a wholly owned subsidiary of the Company, entered into a Patent License and License Option Agreement with RPX.

Cost of Revenue

Cost of revenue mainly includes expenses incurred in connection with the Company's patent enforcement activities, such as legal fees, consulting costs, patent maintenance, royalty fees for acquired patents and other related

expenses. Cost of revenue does not include patent amortization expenses, which are included as a separate line item in operating expenses and cost of revenue also does not include expenses related to product development, integration or support, as these are included in general and administrative expenses.

Table of Contents

Prepaid Expenses and Other Current Assets

Prepaid expenses and other current assets of \$340,456 and \$752,931 at September 30, 2014 and December 31, 2013, respectively, consist primarily of costs paid for future services, which will occur within a year. Prepaid expenses include prepayments in cash and equity instruments for public relation services, business advisory, consulting, and prepaid insurance, which are being amortized over the terms of their respective agreements. In addition, prepaid expenses and other current assets include outstanding litigation bonds, which are bonds entered into in Germany after the first instance of litigation of some of the Company's patents in German courts.

Fair Value of Financial Instruments

The Company adopted FASB ASC 820, "Fair Value Measurements and Disclosures" ("ASC 820"), for assets and liabilities measured at fair value on a recurring basis. ASC 820 establishes a common definition for fair value to be applied to existing US GAAP that require the use of fair value measurements, establishes a framework for measuring fair value and expands disclosure about such fair value measurements. The adoption of ASC 820 did not have an impact on the Company's financial position or operating results, but did expand certain disclosures. ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Additionally, ASC 820 requires the use of valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. These inputs are prioritized below:

Level 1: Observable inputs such as quoted market prices in active markets for identical assets or liabilities

Level 2: Observable market-based inputs or unobservable inputs that are corroborated by market data

Level 3: Unobservable inputs for which there is little or no market data, which require the use of the reporting entity's own assumptions.

The carrying amounts reported in the consolidated balance sheet for cash, accounts receivable, accounts payable, and accrued expenses, approximate their estimated fair market value based on the short-term maturity of these instruments. The carrying value of notes payable and other long-term liabilities approximates fair value as the related interest rates approximate rates currently available to the Company.

Accounting for Acquisitions

In the normal course of its business, the Company makes acquisitions of patent assets and may also make acquisitions of businesses. With respect to each such transaction, the Company evaluates facts of the transaction and follows the guidelines prescribed in accordance with ASC 805 – Business Combinations to determine the proper accounting treatment for each such transaction and then records the transaction in accordance with the conclusions reached in such analysis. The Company performs such analysis with respect to each material acquisition within the consolidated group of entities.

Income Taxes

The Company accounts for income taxes pursuant to the provision of ASC 740-10, "Accounting for Income Taxes" which requires, among other things, an asset and liability approach to calculating deferred income taxes. The asset and liability approach requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and liabilities. A valuation allowance is provided to offset any net deferred tax assets for which management believes it is more likely

than not that the net deferred asset will not be realized.

The Company follows the provision of the ASC 740-10 related to Accounting for Uncertain Income Tax Position. When tax returns are filed, it is highly certain that some positions taken would be situated upon examination by the taxing authorities, while others are subject to uncertainty about the merits of the position taken or the amount of the position that would be ultimately sustained. In accordance with the guidance of ASC 740-10, the benefit of a tax position is recognized in the financial statements in the period during which, based on all available evidence, management believes it is most likely that not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. Tax positions taken are not offset or aggregated with other positions.

-7-

Table of Contents

Tax positions that meet the more-likely-than-not recognition threshold are measured as the largest amount of tax benefit that is more than 50 percent likely of being realized upon settlement with the applicable taxing authority. The portion of the benefits associated with tax positions taken that exceeds the amount measured as described above should be reflected as a liability for uncertain tax benefits in the accompanying balance sheet along with any associated interest and penalties that would be payable to the taxing authorities upon examination. The Company believes its tax positions are all highly certain of being upheld upon examination. As such, the Company has not recorded a liability for uncertain tax benefits.

The Company has adopted ASC 740-10-25 Definition of Settlement, which provides guidance on how an entity should determine whether a tax position is effectively settled for the purpose of recognizing previously unrecognized tax benefits and provides that a tax position can be effectively settled upon the completion and examination by a taxing authority without being legally extinguished. For tax position considered effectively settled, an entity would recognize the full amount of tax benefit, even if the tax position is not considered more likely than not to be sustained based solely on the basis of its technical merits and the statute of limitations remains open. The federal and state income tax returns of the Company are subject to examination by the Internal Revenue Service and state taxing authorities, generally for three years after they were filed. The Company is in the process of filing the previous year's tax returns. After review of the prior year financial statements and the results of operations through September 30, 2014, the Company has recorded a deferred tax asset in the amount of \$1,949,401, from which the Company expects to realize benefits in the future, and an income tax payable of \$467,997.

Basic and Diluted Net Earnings (Loss) per Share

Net earnings (loss) per common share is calculated in accordance with ASC Topic 260: Earnings Per Share ("ASC 260"). Basic earnings (loss) per share is computed by dividing net earnings (loss) by the weighted average number of shares of common stock outstanding during the period. The computation of diluted net earnings (loss) per share does not include dilutive common stock equivalents in the weighted average shares outstanding, as they would be anti-dilutive. The Company has options to purchase 1,023,846 shares of common stock and warrants to purchase 874,713 shares of common stock (including for those warrants issued in the Private Placement closing on May 1, 2014) outstanding at September 30, 2014, which were excluded from the computation of diluted shares outstanding, as they would have had an anti-dilutive impact on the Company's net loss.

The following table sets forth the computation of basic and diluted loss per share:

	For the Three Months ended September 30, 2014	For the Three Months ended September 30, 2013	For the Nine Months ended September 30, 2014	For the Nine Months ended September 30, 2013

Intangible Assets

Intangible assets include the development of the Company's website and patents purchased and recorded based on the cost to acquire them. These assets are amortized over their remaining estimated useful lives. Useful lives of intangible assets are periodically evaluated for reasonableness and the assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may no longer be recoverable.

Table of Contents

Goodwill

Goodwill is tested for impairment at the reporting unit level at least annually, and between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. When conducting its annual goodwill impairment assessment, the Company initially performs a qualitative evaluation of whether it is more likely than not that goodwill is impaired. If it is determined by a qualitative evaluation that it is more likely than not that goodwill is impaired, the Company then applies a two-step impairment test. The two-step impairment test first compares the fair value of the Company's reporting unit to its carrying or book value. If the fair value of the reporting unit exceeds its carrying value, goodwill is not impaired and the Company is not required to perform further testing. If the carrying value of the reporting unit exceeds its fair value, the Company determines the implied fair value of the reporting unit's goodwill and if the carrying value of the reporting unit's goodwill exceeds its implied fair value, then an impairment loss equal to the difference is recorded in the consolidated statement of operations. As at September 30, 2014, a qualitative evaluation of the goodwill in accordance with ASC 350 indicated that the fair value of CyberFone was less than its carrying amount, including goodwill. That conclusion was based in the large number of defendants that have already been released from the case and various financial metrics. The Company then conducted an analysis of the revenue forecast of the remaining defendants and discounted for time and risk. This quantitative test indicated that the fair value of CyberFone was less than its carrying value and that there was an implied fair value for goodwill of zero. Consequently the second step of the impairment resulted in the determination of an impairment loss in the amount of \$2,144,488, which was charged to the consolidated statements of operations for the three and nine months ended September 30, 2014.

Other Intangible Assets

In accordance with ASC 350-30-65, "Intangibles - Goodwill and Others", the Company assesses the impairment of identifiable intangibles whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Factors the Company considers to be important which could trigger an impairment review include the following:

1. Significant underperformance relative to expected historical or projected future operating results;
2. Significant changes in the manner of use of the acquired assets or the strategy for the overall business;
3. Significant negative industry or economic trends; and
4. Significant reduction or exhaustion of the potential licenses of the patents which gave rise to the goodwill.

When the Company determines that the carrying value of intangibles may not be recoverable based upon the existence of one or more of the above indicators of impairment and the carrying value of the asset cannot be recovered from projected undiscounted cash flows, the Company records an impairment charge. The Company measures any impairment based on a projected discounted cash flow method using a discount rate determined by management to be commensurate with the risk inherent in the current business model.

Impairment of Long-lived Assets

The Company accounts for the impairment or disposal of long-lived assets according to the ASC 360 "Property, Plant and Equipment". The Company continually monitors events and changes in circumstances that could indicate that the carrying amounts of long-lived assets may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the estimated future net undiscounted cash flows expected to be generated by the asset. When necessary, impaired assets are written down to estimated fair value based

on the best information available. Estimated fair value is generally based on either appraised value or measured by discounting estimated future cash flows. Considerable management judgment is necessary to estimate discounted future cash flows. Accordingly, actual results could vary significantly from such estimates. The Company recognizes an impairment loss when the sum of expected undiscounted future cash flows is less than the carrying amount of the asset. The Company did not record any impairment charges on its long-lived assets during the three months ended September 30, 2014 and 2013.

Stock-based Compensation

Stock-based compensation is accounted for based on the requirements of the Share-Based Payment Topic of ASC 718 which requires recognition in the consolidated financial statements of the cost of employee and director services received in exchange for an award of equity instruments over the period the employee or director is required to perform the services in exchange for the award (presumptively, the vesting period). The ASC also requires measurement of the cost of employee and director services received in exchange for an award based on the grant-date fair value of the award.

Pursuant to ASC Topic 505-50, for share-based payments to consultants and other third-parties, compensation expense is determined at the “measurement date.” The expense is recognized over the vesting period of the award. Until the measurement date is reached, the total amount of compensation expense remains uncertain. The Company initially records compensation expense based on the fair value of the award at the reporting date. As stock-based compensation expense is recognized based on awards expected to vest, forfeitures are also estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. For the three months ended September 30, 2014, expected forfeitures are immaterial. The Company will re-assess the impact of forfeitures if actual forfeitures increase in future quarters.

Reclassification

The accompanying consolidated balance sheet at September 30, 2014 reflects a reclassification of \$1,271,492 to additional paid-in capital and accumulated deficits. The reclassification had no impact on previously issued net income (loss) or Total Shareholders Equity.

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers, or ASU 2014-09, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The standard will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective and shall take effective on January 1, 2017. The standard permits the use of either the retrospective or cumulative effect transition method and the early application of the standard is not permitted. The Company is presently evaluating the effect that ASU 2014-09 will have on its consolidated financial statements and related disclosures and has not yet selected a transition method.

In August 2014, the FASB issued Accounting Standards Update No. 2014-15, Disclosure of Uncertainties About an Entity's Ability to Continue as a Going Concern. This standard update provides guidance around management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. The new guidance is effective for all annual and interim periods ending after December 15, 2016. The new guidance will not have an impact on the Company's consolidated financial statements.

NOTE 3 – ACQUISITIONS

CyberFone

On April 22, 2013, CyberFone Acquisition Corp., a Texas corporation and newly formed wholly owned subsidiary of the Company (“Acquisition Corp”) entered into a merger agreement (“CyberFone Merger Agreement”) with CyberFone Systems, LLC (“CyberFone”), TechDev Holdings, LLC (“TechDev”) and The Spangenberg Family Foundation for the Benefit of Children’s Healthcare and Education (“SFF” and together with TechDev, “CyberFone Sellers”). TechDev and

SFF owned 100% of the membership interests of CyberFone Systems.

CyberFone owns a foundational patent portfolio that includes claims that provide specific transactional data processing, telecommunications, network and database inventions, including financial transactions. The portfolio, which has a large and established licensing base, consists of ten United States patents and 27 foreign patents and one patent pending. The patent rights that cover digital communications and data transaction processing are foundational to certain applications in the wireless, telecommunications, financial and other industries. IP Navigation Group LLC (“IP Nav”), a Company founded by Erich Spangenberg and associated with the CyberFone Sellers will continue to support and manage the portfolio of patents and retain a contingent participation interest in all recoveries. IP Nav provides patent monetization and support services under an existing agreement with CyberFone.

Pursuant to the terms of the CyberFone Merger Agreement, CyberFone merged with and into Acquisition Corp. with CyberFone surviving the merger as the wholly owned subsidiary of the Company. The Company (i) issued 461,538 post-split (6,000,000 pre-split) shares of common stock to the CyberFone Sellers, (ii) paid the CyberFone Sellers \$500,000 cash and (iii) issued a \$500,000 promissory note to TechDev. The Company valued these common shares at the fair market value on the date of grant at \$4.94 post-split (\$0.38 pre-split) per share or \$2,280,000. The note was non-interest bearing and was due on June 22, 2013, subject to acceleration in the event of default. The Company may prepay the note at any time without premium or penalty. On June 21, 2013, the Company paid \$500,000 to TechDev in satisfaction of the note. The transaction resulted in a business combination and caused CyberFone to become a wholly-owned subsidiary of the Company.

In addition to the payments described above, within 30 days following the end of each calendar quarter (commencing with the first full calendar quarter following the calendar quarter in which CyberFone recovers \$4 million from licensing or enforcement activities related to the patents), CyberFone will be required to pay out a certain percentage of such recoveries.

The Company accounted for the acquisition utilizing the purchase method of accounting in accordance with ASC 805 “Business Combinations”. The Company is the acquirer for accounting purposes and CyberFone is the acquired company. Accordingly, the Company applied push-down accounting and adjusted to fair value all of the assets and liabilities directly on the financial statements of the Company subsidiary. The net purchase price paid by the Company was allocated to assets acquired and liabilities assumed on the records of the Company as follows:

Intangible assets	\$ 1,135,512
Goodwill	2,144,488
Net purchase price	\$ 3,280,000

Per the disclosure set forth above, the Company determined at September 30, 2014 that the goodwill was impaired and an impairment loss in the amount of \$2,144,488 was charged to the consolidated statements of operations.

Dynamic Advances, IP Liquidity and Sarif Biomedical

Dynamic Advances

Pursuant to the DA Agreement, the Company acquired 100% of the limited liability company membership interests of Dynamic Advances, LLC, a Texas limited liability company, in consideration for: (i) two cash payments of \$2,375,000, one payment due at closing and the other payment due on or before September 30, 2014, with such second payment being subject to increase to \$2,850,000 if not made on or before June 30, 2014; and (ii) 195,500 shares of the Company's Series B Convertible Preferred Stock. Under the terms of the DA Agreement, TechDev and SFF are entitled to possible future payments for a maximum consideration of \$250,000,000 pursuant to the Pay Proceeds Agreement described below. Dynamic Advances, LLC holds exclusive license to monetize certain patents owned by a third party.

On May 2, 2014, the Company issued TechDev and SFF a promissory note in order to evidence the second cash payment due under the terms of the DA Agreement in the amount of \$2,375,000 due on or before September 30, 2014, with such amount due under the terms of the promissory note being subject to increase to \$2,850,000 if the Company's payment pursuant to the terms of the DA Agreement are not made on or before June 30, 2014. The total amount of consideration paid by the Company for Dynamic Advances, including capitalized costs associated with the purchase, was \$6,653,078.

After evaluating the facts and circumstances of the purchase, the Company determined that this was an asset purchase. In coming to its conclusion, the Company reviewed the status of the assets, the historical activity and the absence of any employees, licenses, revenues, and any other assets other than the IP Assets. Further, as there are no assumed licensees or historical revenues, the Company is not certain that it will be able to obtain access to customers pursuant to AC 805-10-55-7.

The promissory note matured on September 30, 2014; effective September 30, 2014, Granicus and SFF extended the maturity to March 31, 2015 in return for a payment of \$249,375, payable within thirty days. The payment for this extension of the maturity date was made on October 10, 2014. The promissory note does not otherwise include any

Sarif Biomedical

Pursuant to the Sarif Agreement, the Company acquired 100% of the limited liability company membership interests of Sarif Biomedical, LLC, a Delaware limited liability company, in consideration for two cash payments of \$250,000, one payment due at closing and the other payment due on or before September 30, 2014, with such second payment being subject to increase to \$300,000 if not made on or before June 30, 2014. Since the Company did not make the payment on the promissory note prior to June 30, 2014, the Company included in the consideration paid for Dynamic Advances the higher principal amount of the promissory note. The total amount of consideration paid by the Company for Sarif Biomedical, including capitalized costs associated with the purchase, was \$552,024.

After evaluating the facts and circumstances of the purchase, the Company determined that this was an asset purchase. In coming to its conclusion, the Company reviewed the status of the assets, the historical activity and the absence of any employees, licenses, revenues, and any other assets other than the IP Assets. Further, as there are no assumed licensees or historical revenues, the Company is not certain that it will be able to obtain access to customers pursuant to AC 805-10-55-7.

Dynamic Advances, IP Liquidity and Sarif Biomedical

Pursuant to the Pay Proceeds Agreement, the Company may pay the sellers a percentage of the net recoveries (gross revenues minus certain defined expenses) that the Company makes with respect to the assets held by the entities that the Company acquired pursuant to the DA Agreement, the IP Liquidity Agreement and the Sarif Agreement (the "IP Assets"). Under the terms of the Pay Proceeds Agreement, if the Company recovers \$10,000,000 or less with regard to the IP Assets, then nothing is due to the sellers; if the Company recovers between \$10,000,000 and \$40,000,000 with regard to the IP Assets, then the Company shall pay 40% of the net proceeds of such recoveries to the sellers; and if the Company recovers over \$40,000,000 with regard to the IP Assets, the Company shall pay 50% of the net proceeds of such recoveries to the sellers. In no event will the total payments made by the Company under the Pay Proceeds Agreement exceed \$250,000,000.

Pursuant to a Registration Rights Agreement with the sellers (the "Acquisition Registration Rights Agreement"), the Company agreed to file a "resale" registration statement with the SEC covering at least 10% of the registrable shares of the Company's Series B Convertible Preferred Stock issued to the sellers under the terms of the DA Agreement and the IP Liquidity Agreement, at any time on or after November 2, 2014 upon receipt of a written demand from the sellers

which describes the amount and type of securities to be included in the registration and the intended method of distribution thereof. The Company shall not be required to file more than three such registration statements not more than 60 days after the receipt of each such written demand from the sellers.

TechDev and Mr. Erich Spangenberg (the founder of IP Nav) and his spouse Audrey Spangenberg have jointly filed a Schedule 13G and are deemed to be affiliates of the Company.

The Company booked a payable to the sellers pursuant to the earn out liability in the amount of \$2,148,000 at September 30, 2014, based on license agreements entered into during the quarter. No further amount is owed until the Company generates additional revenue, if any, from the Clouding patents.

Pursuant to the terms of the TLIC Interests Sale Agreement, TLIC merged with and into TLIA with TLIC surviving the merger as the wholly owned subsidiary of the Company. The Company (i) agreed to issue 60,000 shares of Common Stock to the sellers of TLIC (“TLIC Sellers”), (ii) paid the TLIC Sellers \$350,000 cash and (iii) agreed to pay the TLIC Sellers a fifty percent (50%) of the net recoveries (gross revenues minus certain defined expenses and the cash portion of the acquisition consideration) that the Company makes with respect to the patent purchased pursuant to the acquisition of TLIC. The Company valued the Common Stock at the fair market value on the date of the Interests Sale Agreement at \$13.63 per share or \$818,000. The cash portion of the consideration was outstanding at September 30, 2014 and was subsequently paid in October. Overview

We were incorporated in the State of Nevada on February 23, 2010 under the name "Verve Ventures, Inc." On December 7, 2011, we changed our name to "American Strategic Minerals Corporation" and were engaged in exploration and potential development of uranium and vanadium minerals business. During June 2012, we decided to discontinue our uranium and vanadium minerals business and engaged in the business of acquiring, renovating, and selling real estate properties located within the areas of Southern California. On November 14, 2012, we decided to discontinue our real estate business.

Our current business is to acquire patents and patent rights and to monetize the value of those assets to generate revenue and profit for the Company. We acquire patents and patent rights from their owners, who range from individual inventors to Fortune 500 companies. Part of our acquisition strategy is to acquire or invest in patents and patent rights that cover a wide-range of subject matter, which allows us to achieve the benefits of a growing diversified portfolio of assets. Generally, the patents and patent rights that we acquire are characterized by having large identifiable companies who are or have been using technology that infringes our patents and patent rights. We generally monetize our portfolio of patents and patent rights by entering into license discussions, and if that is unsuccessful, initiating enforcement activities against any infringing parties with the objective of entering into a standard form of comprehensive settlement and license agreement that may include the granting of non-exclusive retroactive and future rights to use the patented technology, a covenant not to sue, a release of the party from certain claims, the dismissal of any pending litigation and other terms that are appropriate in the circumstances. Our strategy has been developed with the expectation that it will result in a long-term, diversified revenue stream for the Company.

Our principal office is located at 11100 Santa Monica Blvd., Suite 380, Los Angeles, CA 90225. Our telephone number is (703) 232-1701.

Table of Contents

The Reverse Split became effective with the FINRA at the open of business on July 22, 2013. As a result of the Reverse Stock Split, every thirteen shares of our pre-reverse split common stock will be combined and reclassified into one share of our common stock. No fractional shares of common stock will be issued as a result of the Reverse Split. Stockholders who otherwise would be entitled to a fractional share shall receive the next highest number of whole shares.

Throughout this Report, each instance in which we refer to a number of shares of our Common Stock, refers to the number of shares of Common Stock after giving effect to the Reverse Split, unless otherwise indicated.

No further amount is owed until the Company generates additional revenue, if any, from the Clouding patents.

TLI Communications LLC

On September 19, 2014, TLI Acquisition Corp (“TLIA”), a Virginia corporation and newly formed wholly owned subsidiary of the Company, entered into an interest sale agreement to purchase 100% of the membership interests of TLI Communications LLC (“TLIC”), a Delaware limited liability company. TLIC owns a patent in the telecommunications field.

Pursuant to the terms of the TLIC Interests Sale Agreement, TLIC merged with and into TLIA with TLIC surviving the merger as the wholly owned subsidiary of the Company (the “Merger”). The Company (i) agreed to issue 60,000 shares of Common Stock to the sellers of TLIC (the “TLIC Sellers”), (ii) paid the TLIC Sellers \$350,000 cash and (iii) pay the TLIC Sellers a fifty percent (50%) of the net recoveries (gross revenues minus certain defined expenses and the cash portion of the acquisition consideration) that the Company makes with respect to the patent purchased

pursuant to the acquisition of TLIC. The Company valued these common shares at the fair market value on the date of the Interests Sale Agreement at \$13.63 per share or \$818,000. The cash portion of the consideration was outstanding at September 30, 2014 and was subsequently paid in October. The transaction resulted in a business combination and caused TIC to become a wholly-owned subsidiary of the Company.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations are based upon our financial statements, which have been prepared in accordance with US GAAP. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates based on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Management believes the following critical accounting policies affect the significant judgments and estimates used in the preparation of the financial statements.

Principles of Consolidation

The consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles and present the financial statements of the Company and our wholly-owned and majority owned subsidiaries. In the preparation of our consolidated financial statements, intercompany transactions and balances are eliminated.

Use of Estimates and Assumptions

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates made by management include, but are not

limited to, estimating the useful lives of patent assets, the assumptions used to calculate fair value of warrants and options granted, goodwill impairment, realization of long-lived assets, deferred income taxes, unrealized tax positions and business combination accounting.

Revenue Recognition

The Company recognizes revenue in accordance with ASC Topic 605, “Revenue Recognition.” Revenue is recognized when (i) persuasive evidence of an arrangement exists, (ii) all obligations have been substantially performed, (iii) amounts are fixed or determinable and (iv) collectability of amounts is reasonably assured.

The Company considers the revenue generated from a settlement and licensing agreement as one unit of accounting under ASC 605-25, “Multiple-Element Arrangements” as the delivered items do not have value to customers on a standalone basis, there are no undelivered elements and there is no general right of return relative to the license. Under ASC 605-25, the appropriate recognition of revenue is determined for the combined deliverables as a single unit of accounting and revenue is recognized upon delivery of the final elements, including the license for past and future use and the release.

Also, due to the fact that the settlement element and license element for past and future use are the Company’s major central business, the Company presents these two elements as one revenue category in its statement of operations. The Company does not expect to provide licenses that do not provide some form of settlement or release.

Accounting for Acquisitions

In the normal course of its business, the Company makes acquisitions of patent assets and may also make acquisitions of businesses. With respect to each such transaction, the Company evaluates facts of the transaction and follows the guidelines prescribed in accordance with ASC 805 – Business Combinations to determine the proper accounting treatment for each such transaction and then records the transaction in accordance with the conclusions reached in such analysis. The Company performs such analysis with respect to each material acquisition within the consolidated group of entities.

Intangible Assets - Patents

Intangible assets include patents purchased and patents acquired in lieu of cash in licensing transactions. The patents purchased are recorded based on the cost to acquire them and patents acquired in lieu of cash are recorded at their fair market value. The costs of these assets are amortized over their remaining useful lives. Useful lives of intangible assets are periodically evaluated for reasonableness and the assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may no longer be recoverable.

Goodwill

Goodwill is tested for impairment at the reporting unit level at least annually, and between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. When conducting its annual goodwill impairment assessment, the Company initially performs a qualitative evaluation of whether it is more likely than not that goodwill is impaired. If it is determined by a qualitative evaluation that it is more likely than not that goodwill is impaired, the Company then applies a two-step impairment test. The two-step impairment test first compares the fair value of the Company’s reporting unit to its carrying or book value. If the fair value of the reporting unit exceeds its carrying value, goodwill is not impaired and the Company is not required to perform further testing. If the carrying value of the reporting unit exceeds its fair value, the Company determines the implied fair value of the reporting unit’s goodwill and if the carrying value of the reporting unit’s goodwill exceeds its implied fair value, then an impairment loss equal to the difference is recorded in the consolidated statement of operations. As at September 30, 2014, a qualitative evaluation of the goodwill in accordance with ASC 350 indicated that the fair value of CyberFone was less than its carrying amount, including goodwill. That conclusion was based in the large number of defendants that have already been released from the case

and various financial metrics. The Company then conducted an analysis of the revenue forecast of the remaining defendants and discounted for time and risk. This quantitative test indicated that the fair value of CyberFone was less than its carrying value and that there was an implied fair value for goodwill of zero. Consequently the second step of the impairment resulted in the determination of an impairment loss in the amount of \$2,144,488, which was charged to the consolidated statements of operations for the three and nine months ended September 30, 2014.

Table of Contents

Other Intangible Assets

In accordance with ASC 350-30-65, “Intangibles - Goodwill and Others”, the Company assesses the impairment of identifiable intangibles whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Factors the Company considers to be important which could trigger an impairment review include the following: (1) significant underperformance relative to expected historical or projected future operating results; (2) significant changes in the manner of use of the acquired assets or the strategy for the overall business; and (3) significant negative industry or economic trends.

When the Company determines that the carrying value of intangibles may not be recoverable based upon the existence of one or more of the above indicators of impairment and the carrying value of the asset cannot be recovered from projected undiscounted cash flows, the Company records an impairment charge. The Company measures any impairment based on a projected discounted cash flow method using a discount rate determined by management to be commensurate with the risk inherent in the current business model.

Impairment of Long-lived Assets

The Company accounts for the impairment or disposal of long-lived assets according to the ASC 360 “Property, Plant and Equipment”. The Company continually monitors events and changes in circumstances that could indicate that the carrying amounts of long-lived assets, including mineral rights, may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the estimated future net undiscounted cash flows expected to be generated by the asset. When necessary, impaired assets are written down to their estimated fair value based on the best information available. Estimated fair value is generally based on either appraised value or measured by discounting estimated future cash flows. Considerable management judgment is necessary to estimate discounted future cash flows. Accordingly, actual results could vary significantly from such estimates. The Company recognizes an impairment loss when the sum of expected undiscounted future cash flows is less than the carrying amount of the asset.

Stock-based Compensation

Stock-based compensation is accounted for based on the requirements of the Share-Based Payment Topic of ASC 718 which requires recognition in the consolidated financial statements of the cost of employee and director services received in exchange for an award of equity instruments over the period the employee or director is required to perform the services in exchange for the award (presumptively, the vesting period). The ASC also requires measurement of the cost of employee and director services received in exchange for an award based on the grant-date fair value of the award.

Pursuant to ASC Topic 505-50, for share-based payments to consultants and other third parties, compensation expense is determined at the “measurement date.” The expense is recognized over the vesting period of the award. Until the measurement date is reached, the total amount of compensation expense remains uncertain. The Company initially records compensation expense based on the fair value of the award at the reporting date. As stock-based compensation expense is recognized based on awards expected to vest, forfeitures are also estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. For the three months ended September 30, 2014, expected forfeitures are immaterial. The Company will re-assess the impact of forfeitures if actual forfeitures increase in future quarters.

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers, or ASU 2014-09, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The standard will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective and shall take effective on January 1, 2017. The standard permits the use of either the retrospective or cumulative effect transition method and the early application of the standard is not permitted. The Company is presently evaluating the effect that ASU 2014-09 will have on its consolidated financial statements and related disclosures and has not yet selected a transition method.

In August 2014, the FASB issued Accounting Standards Update No. 2014-15, Disclosure of Uncertainties About an Entity's Ability to Continue as a Going Concern. This standard update provides guidance around management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. The new guidance is effective for all annual and interim periods ending after December 15, 2016. The new guidance will not have an impact on the Company's consolidated financial statements.

Other accounting standards that have been issued or proposed by the FASB that do not require adoption until a future date are not expected to have a material impact on the financial statements upon adoption.

Results of Operations

For the Three Months and Nine Ended September 30, 2014 and 2013

We generated revenues of \$13,455,472 and \$20,059,972 during the three months and nine ended September 30, 2014, respectively as compared to \$710,500 and \$2,235,479 during the three and nine months ended September 30, 2013, respectively. For the three and nine months ended September 30, 2014, this represented an increase of \$12,744,972 or 1,794% and \$17,824,493 or 797%, respectively. Revenue for both the three and nine months ended September 30 for both 2013 and 2014 was derived from the patent monetization business and the increase in revenue from 2013 to 2014 resulted from growth in the patent monetization business.

Revenues from the issuance of licenses to certain of the Company's patent portfolios accounted for 100% of our revenues for the three and nine months ended September 30, 2014 and September 30, 2013, respectively. For the three months ended September 30, 2014, revenues from five settlement and license agreement accounted for 100% of the Company's revenues. The Company derived \$13.46 million in revenues from the one-time issuance of non-recurring, non-exclusive, non-assignable licenses to five different entities and their affiliates for certain of the Company's patents. Licenses to two of those entities accounted for 99.6% of the Company's revenues for the three months ended September 30, 2014

While the Company has a growing portfolio of patents, at this time, the Company expects that a significant portion of its future revenues will be based on one-time grants of similar non-recurring, non-exclusive, non-assignable licenses to a relatively small number of entities and their affiliates. Further, with the expected small number of firms with which the Company enters into license agreements, and the amount and timing of such license agreements, the Company also expects that its revenues may be highly variable from one period to the next.

Direct cost of revenues during the three and nine months ended September 30, 2014 amounted to \$5,584,542 and \$8,448,954, respectively and for the three and nine months ended September 30, 2013, the direct cost of revenues amounted to \$403,013 and \$687,638, respectively. For the three and nine months ended September 30, 2014, this represented an increase of \$5,181,529 or 1,286% and \$7,761,316 or 1,129%, respectively. Direct costs of revenue include contingent payments to patent enforcement legal costs, patent enforcement advisors and inventors. Direct costs of revenue also includes various non-contingent costs associated with enforcing the Company's patent rights and otherwise in developing and entering into settlement and licensing agreements that generate the Company's revenue. Such costs include other legal fees and expenses, consulting fees, data management costs and other costs. Our gross profit margin during the three and nine months ended September 30, 2014 was approximately 58% and 58%, respectively and 43% and 69%, respectively, for the three and nine months ended September 30, 2013.

We incurred operating expenses of \$3,664,573 and \$8,003,228 for the three months and nine months ended September 30, 2014 and \$1,349,426 and \$4,124,249 for the three and nine months ended September 30, 2013. For the three and nine months ended September 30, 2014, this represented an increase of \$2,315,147 or 172% and \$3,878,979 or 94%, respectively. These expenses primarily consisted of amortization of patents, general expenses, compensation to our officers, directors and employees, professional fees and consulting incurred in connection with the day-to-day operation of our business. The operating expenses for the nine months ended September 30, 2014 and September 2013, respectively, include non-cash expenses totaling \$5,328,949 and \$2,305,305, respectively. These non-cash operating expenses are discussed below and set forth in detail at the end of this section.

Table of Contents

The operating expenses consisted of the following:

	For the Three Months ended September 30, 2014	For the Three Months ended September 30, 2013	For the Nine Months ended September 30, 2014	For the Nine Months ended September 30, 2013

Total	3,664,573	1,349,426	8,003,227	4,124,249

- (1) Amortization of patents: Amortization expenses were \$2,872,638 and \$860,657 during the nine months ended September 30, 2014 and 2013, respectively, an increase of \$2,011,981 or 234%. The increase results from the significant number of patents and patent portfolios we have added during the first nine months of 2014. The Company has acquired ownership of or contractual rights to seven patent portfolios during the first nine months of 2014. When the Company acquires patents and patent rights, the Company capitalizes those assets and amortizes the costs over the remaining useful lives of the assets. All patent amortization expenses are non-cash expenses.
- (2) Compensation expense and related taxes: Compensation expense includes cash compensation and related payroll taxes and benefits, and also non-cash compensation. For the nine months ended September 30, 2014 and 2013, compensation expense and related payroll taxes were \$2,266,283 and \$1,938,814, respectively, an increase of \$327,469 or 17%. The increase in compensation primarily reflects an increase in cash compensation, payroll taxes and benefits to our employees, offset slightly by reduced non-cash compensation expenses. During the nine months ended September 30, 2014 and 2013, we recognized non-cash employee and board equity based compensation of \$1,163,462 and \$1,203,678, respectively.
- (3) Consulting fees: For the nine months ended September 30, 2014 and 2013, we incurred consulting fees of \$1,550,155 and \$444,921, respectively, an increase of \$1,105,234 or 248%. Consulting fees include both cash and non-cash related consulting fees primarily for investor relations and public relations services as well as other consulting services. During the nine months ended September 30, 2014 and 2013, we recognized non-cash equity based consulting of \$1,288,492 and \$294,262, respectively.
- (4) Professional fees: For the nine months ended September 30, 2014 and 2013, professional fees were \$933,751 and \$564,597, respectively, an increase of \$369,154 or 65%. Professional fees primarily reflect the costs of professional outside accounting fees, legal fees and audit fees. The increase in professional fees for the nine months ended September 30, 2014 over that of the prior period are predominately related to professional outside legal, accounting and audit fees resulting from a substantially higher level of activity in the Company's continuing patent acquisition and monetization operations and also a higher level of activity as a public company.

- (5) Other general and administrative expenses: For the nine months ended September 30, 2014 and 2013, other general and administrative expenses were \$380,401 and \$315,260, respectively, an increase of \$65,141 or 21%. General and administrative expenses reflect the other non-categorized operating costs of the Company and include expenses related to being a public company, rent, insurance, technology and other expenses incurred to support the operations of the Company. The increase in general and administrative costs in the nine months ended September 30, 2014 over the nine months ended September 30, 2013 resulted from an increase in these expenses in support of the continued development of our operations of the Company.

Operating Income from Continuing Operations

We reported operating income (loss) from continuing operations of \$4,206,357 and \$3,607,791 for the three and nine months ended September 30, 2014 and operating (losses) of \$(1,041,939) and \$(2,576,408), respectively, for the three and nine months ended September 30, 2013. For the three and nine months ended September 30, 2014, this represented an improvement of \$5,248,296 and \$6,184,199, respectively. The transition from operating losses in 2013 to operating income in 2014 was primarily attributable due to the increase in gross profit as a result of increased revenues during the three and nine months ended September 30, 2014.

Table of Contents

Other Income

Total other income (expenses) was \$(2,165,157) and \$(2,165,453) for the three months and nine months ended September 30, 2014 and \$(38,588) and \$(38,407), respectively, for the three and nine months ended September 30, 2013. For the three and nine months ended September 30, 2014, this represented a decrease of \$2,216,569 and \$2,127,046, respectively. The principal component of the increase in the loss for the three and nine months ended September 30, 2014 was the impairment of goodwill associated with the CyberFone portfolio in the amount of \$2,144,488.

Income Tax Benefit

We recognized an income tax benefit in the amount of \$1,481,404 for the three and nine months ended September 30, 2014. There were no income tax benefits for the three and nine months ended September 30, 2013.

Discontinued Operations

During June 2012, we decided to discontinue our exploration and potential development of uranium and vanadium minerals business and prior periods have been retroactively restated in our consolidated financial statements and related footnotes to conform to this presentation. Subsequently, in November 2012, we decided to discontinue our real estate business and we intend to sell and dispose our remaining real estate holdings during fiscal 2013. We are now engaged in the acquisition, development and monetization of intellectual property through both the prosecution and licensing of our own patent portfolio, the acquisition of additional intellectual property or partnering with others to defend and enforce their patent rights.

The following table indicates selected financial data of our discontinued operations of our uranium and vanadium minerals business and real estate business.

Net Income and Net Income Available to Common Shareholders

We reported net income (loss) of \$3,522,604 and \$2,923,742 for the three and nine months ended September 30, 2014 and net loss of \$(935,320) and \$(2,351,355), respectively, for the three and nine months ended September 30, 2013. For the three and nine months ended September 30, 2014, this represented an improvement of \$4,457,924 and \$5,275,097 respectively. The transition to net income was primarily attributable due to the increase in gross profit as a result of increased revenues during the three and nine months ended September 30, 2014.

Additionally, for the three and nine months ended September 30, 2014, we recorded an expense of \$0 and \$1,271,492 respectively, for a deemed dividend related to the beneficial conversion feature of the Series A Convertible Preferred Stock issued on May 1, 2014. Net income available to common stockholders for the three and nine months ended September 30, 2014 was \$3,522,604 and \$1,652,250, respectively. Net loss attributable to the common stockholders for the three and nine months ended September 30, 2013 was unaffected.

The Company incurred net non-cash expenses in the amount of \$7,263,525 and \$2,305,305 for the nine months ended September 30, 2014 and September 30, 2013, respectively. The details of those expenses are set forth below:

Liquidity and Capital Resources

Liquidity is the ability of a company to generate funds to support its current and future operations, satisfy its obligations, and otherwise operate on an ongoing basis. At September 30, 2014, the Company's cash and cash equivalents balances totaled \$5,556,584 compared to \$3,610,262 at December 31, 2013. The increase in the cash balances of \$1,946,322 resulted primarily from cash received during the nine month period from revenues generated from patent enforcement activities and from the private placement closed on May 1, 2014, the proceeds of which exceeded the initial payment for the entities acquired on May 2, 2014. We collected revenues of \$2,945,472 during the three months ended September 30, 2014 and recorded accounts receivable from two licensees in the amount of \$10,510,000 at September 30, 2014.

Net working capital declined by \$1,821,662 to \$2,062,836 at September 30, 2014 from \$3,884,498 at December 31, 2013. The decrease in net working capital resulted primarily from the addition of notes payable related to the acquisition of entities closed on May 2, 2014, fees payable related to the revenue generated in the three months ended September 30, 2014 and the current portion of an earn out related to the purchase of the patents from Clouding IP, LLC in the amount of \$2,148,000, offset by an increase in cash and receivables of \$12,186,322.

Cash provided by operating activities was \$3,233,037 during the nine months ended September 30, 2014 versus cash used in operating activities of \$947,344 during the nine months ended September 30, 2013.

Cash used in investing activities was \$6,875,703 for the nine months ended September 30, 2014 versus cash used in the amount of \$795,033 in the nine months ended September 30, 2013. The higher level of cash used during the nine months ended September 30, 2014 was primarily the purchases of patents and patents rights in transactions entered into on May 2, 2014, June 17, 2014, August 29, 2014 and September 19, 2014.

Cash provided by financing activities was \$5,588,988 during the nine months ended September 30, 2014 versus \$5,252,596 during the nine months ended September 30, 2013. Cash provided by financing activities for the nine months ended September 30, 2014 resulted from the private placement of securities issued on May 1, 2014.

Management believes that the balance of cash and cash equivalents of \$5,556,584 at September 30, 2014 is sufficient to continue to fund the Company's current operations at least through October 2015. However, the Company's

operations are subject to various risks and there is no assurance that changes in the operations of the Company will not require the Company to raise additional cash sooner than planned in order to continue uninterrupted operations. In that event, the Company would seek to raise additional capital from the sale of the Company's securities, from borrowing or from other sources. Should the Company seek to raise capital from the issuances of its securities, such transactions would be subject to the risks of the market for the Company's securities at the time.

We maintain "disclosure controls and procedures," as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act"), that are designed to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, to allow timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, management recognized that disclosure controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the disclosure controls and procedures are met. Additionally, in designing disclosure controls and procedures, our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. The design of any disclosure controls and procedures also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

With respect to the quarterly period ended September 30, 2014, under the supervision and with the participation of our management, we conducted an evaluation of the effectiveness of the design and operations of our disclosure controls and procedures. Based upon this evaluation, the Company's management has concluded that certain disclosure controls and procedures were not effective as of September 30, 2014 due to the Company's limited internal resources and lack of ability to have multiple levels of transaction review. However, to the extent possible, we will implement procedures to assure that the initiation of transactions, the custody of assets and the recording of transactions will be performed by separate individuals. We believe that the foregoing steps will remediate the significant deficiency identified above, and we will continue to monitor the effectiveness of these steps and make any changes that our management deems appropriate.

Management is in the process of determining how best to change our current system and implement a more effective system to insure that information required to be disclosed in this quarterly report on Form 10-Q has been recorded, processed, summarized and reported accurately. Our management acknowledges the existence of this problem, and intends to develop procedures to address them to the extent possible given limitations in financial and manpower resources. While management is working on a plan, no assurance can be made at this point that the implementation of such controls and procedures will be completed in a timely manner or that they will be adequate once implemented.

Changes in Internal Controls.

There have been no changes in our internal control over financial reporting during the quarter ended September 30, 2014 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

In the ordinary course of business, we actively pursue legal remedies to enforce our intellectual property rights and to stop unauthorized use of our technology. There are no proceedings in which any of our directors, officers or affiliates, or any registered beneficial shareholder are an adverse party or has a material interest adverse to us.

On August 14, 2014, Dominion Harbor Group, LLC, a former vendor to the Company, filed a complaint against the Company in the Northern District of Texas for breach of contract, unjust enrichment and fraudulent inducement. The Company denies these allegations and believes that this claim is entirely without merit and intends to vigorously defend itself in this action. Other than as disclosed herein, we know of no other material, active or pending legal proceedings against us, nor are we involved as a plaintiff in any material proceedings or pending litigation other than in the normal course of business.

Item 1A. Risk Factors.

We have recently consummated the acquisition of certain assets, and in connection therewith, we issued three promissory notes and filed two certificates of designation with the Secretary of State of Nevada.

In connection with the issuance of the Series A Convertible Preferred Stock, the Series B Convertible Preferred Stock and the PIPE Warrants, holders of the Company's Common Stock will experience immediate and substantial dilution upon the conversion of such preferred stock and the exercise of such warrants.

In connection with the transaction contemplated in this Current Report on Form 8-K, the Company issued 1,023,579 shares of Series A Convertible Preferred Stock, 391,000 shares of Series B Convertible Preferred Stock and PIPE Warrants to purchase an aggregate of 255,895 shares of Common Stock. Upon conversion of the preferred stock and the warrants, the Company's Common Stock holders will experience dilution. We currently have 5,613,902 shares of Common Stock outstanding. Assuming full conversion of the preferred stock and the exercise of the PIPE Warrants, the number of shares of our Common Stock outstanding will increase 1,641,628 shares from 5,613,902 shares of Common Stock outstanding to 7,284,376 shares of Common Stock outstanding.

The rights of the holders of the Company's Common Stock will be subordinate to our creditors and to the holders of our preferred stock in a liquidation and the Series A Certificate of Designation contains certain covenants against the incurrence of indebtedness which could affect our business.

In connection with the transaction contemplated in this Current Report on Form 8-K, the Company issued three promissory notes in the aggregate principal amount of \$5,000,000 (which increased to \$6,000,000 as such promissory notes were not paid in full on or prior to September 30, 2014) and preferred stock and warrants. The promissory notes were scheduled to mature on September 30, 2014, but the holder of the notes agreed to extend the maturity date to March 31, 2015 in exchange for a fee of \$525,000.

Accordingly, the holders of Common Stock will rank junior to such indebtedness and to the liquidation rights of the holders of our Series A Convertible Preferred Stockholders as well as to other non-equity claims on us and our assets, including claims in our liquidation.

Additionally, the Series A Convertible Preferred Stock places restrictions on our ability to incur indebtedness or engage in any transactions, subject to the voting right referred to above in the description of the Series A Certificate of Designations for the Series A Convertible Preferred Stock.

Table of Contents

The Company is required to pay dividends on its Series A Convertible Preferred Stock; if we fail to pay such dividends in cash and pay such dividends in shares of our Common Stock then the holders of our Common Stock will be further diluted.

The holders of Series A Convertible Preferred Stock are entitled to annual dividends at a rate of 8% based on a value of \$6.50 per share, payable quarterly commencing on January 31, 2015. If the Company fails to pay such dividends in cash and pays the holders of Series A Convertible Preferred Stock their annual dividends in stock, you will experience further dilution.

In July 2014, share of our common stock have been approved for uplisting to The NASDAQ Stock Market LLC.

Our common stock may be delisted from The NASDAQ Stock Market LLC if we fail to comply with continued listing standards.

Our common stock is currently traded on The NASDAQ Stock Market LLC under the symbol “MARA.” If we fail to meet any of the continued listing standards of The NASDAQ Stock Market LLC, our common stock could be delisted from The NASDAQ Stock Market LLC. These continued listing standards include specifically enumerated criteria, such as:

- a \$1.00 minimum closing bid price;
- stockholders’ equity of \$2.5 million;
- 500,000 shares of publicly-held common stock with a market value of at least \$1 million;
- 300 round-lot stockholders; and
- compliance with NASDAQ’s corporate governance requirements, as well as additional or more stringent criteria that may be applied in the exercise of NASDAQ’s discretionary authority.

We could fail in future financing efforts or be delisted from NASDAQ if we fail to receive stockholder approval when needed.

We are required under the NASDAQ rules to obtain stockholder approval for any issuance of additional equity securities that would comprise more than 20% of the total shares of our common stock outstanding before the issuance of such securities sold at a discount to the greater of book or market value in an offering that is not deemed to be a “public offering” by NASDAQ. Funding of our operations and acquisitions of assets may require issuance of additional equity securities that would comprise more than 20% of the total shares of our common stock outstanding, but we might not be successful in obtaining the required stockholder approval for such an issuance. If we are unable to obtain financing due to stockholder approval difficulties, such failure may have a material adverse effect on our ability to continue operations.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Item 3. Defaults Upon Senior Securities.

The 2014 Plan authorizes the issuance of up to an aggregate maximum of 1,500,000 shares of the Company’s common stock, subject to adjustment as described in the 2014 Plan. The 2014 Plan shall be administered by a committee appointed by the Board (the “Committee”), which shall consist of two or more directors who qualify as (i) “Independent Directors” (as such term is defined under the rules of The NASDAQ Stock Market LLC), (ii) “Non-Employee Directors” (as such term is defined in Rule 16b-3 of the Securities Exchange Act of 1934, as amended) and (iii) “Outside Directors” (as such term is defined in Section 162(m) of the United States Internal Revenue Code of 1986, as amended). Awards may be granted to the Company’s directors, officers, consultants, advisors and employees. Unless earlier terminated by the Board, the 2014 Plan will terminate, and no further awards may be granted, after September 16, 2024.
