NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

NOTE 1 BASIS OF PRESENTATION

The interim Condensed Consolidated Financial Statements (“interim statements”) of Newmont Mining Corporation and its subsidiaries (collectively, “Newmont” or the “Company”) are unaudited. In the opinion of management, all adjustments and disclosures necessary for a fair presentation of these interim statements have been included. The results reported in these interim statements are not necessarily indicative of the results that may be reported for the entire year. These interim statements should be read in conjunction with Newmont’s Consolidated Financial Statements for the year ended December 31, 2014 filed on February 20, 2015 on Form 10-K. The year-end balance sheet data was derived from the audited financial statements and, in accordance with the instructions to Form 10-Q, certain information and footnote disclosures required by United States generally accepted accounting principles (“GAAP”) have been condensed or omitted. References to “A\$” refer to Australian currency and “NZ\$” to New Zealand currency.

Certain amounts in prior years have been reclassified to conform to the 2015 presentation. Reclassifications are related to a change to our Indonesia and Australia/New Zealand geographic regions (see Note 3). Other reclassified amounts were not material to the financial statements.

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Risks and Uncertainties

As a global mining company, our revenue, profitability and future rate of growth are substantially dependent on prevailing prices for gold, copper and, to a lesser extent, silver. Historically, the commodity markets have been very volatile, and there can be no assurance that commodity prices will not be subject to wide fluctuations in the future. A substantial or extended decline in commodity prices could have a material adverse effect on our financial position, results of operations, cash flows, access to capital and on the quantities of reserves that we can economically produce. The carrying value of our property, plant and mine development assets, inventories, stockpiles and ore on leach pads, and deferred tax assets are particularly sensitive to the outlook for commodity prices. A decline in our long term price outlook from current levels could result in material impairment charges related to these assets.

In September 2014, PT Newmont Nusa Tenggara (“PTNNT”) and the Government of Indonesia signed a Memorandum of Understanding (“MoU”) that resulted in PTNNT receiving a six-month permit to export copper concentrate that expired in mid-March 2015. On March 30, 2015, the Company received a six-month permit extension to export copper concentrate that expires in late September 2015. Effective with the signing of the MoU, PTNNT agreed to pay certain export duties and royalties. The MoU also outlines terms for the six main elements of the Contract of Work renegotiation, which will be incorporated into an amendment of the Contract of Work. The six areas are: concession area size; royalties, taxes and export duties; domestic processing and refining; ownership divestment; utilization of local manpower, domestic goods and services; and duration of the Contract of Work. Negotiations between PTNNT

and the Government of Indonesia to amend the Contract of Work remain on-going. No assurances can be made at this time with respect to the outcome of such negotiations and expiration of the export permit without its renewal may negatively impact future operations and financial results at Batu Hijau. As a result of the on-going Contract of Work renegotiations at Batu Hijau, we have evaluated, and will continue to evaluate, the need for asset impairments, inventory write-downs, tax valuation allowances and other applicable accounting charges due to the status of the mine. The total assets at Batu Hijau as of March 31, 2015 and December 31, 2014 were \$3,256 and \$3,107, respectively.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Recently Adopted Accounting Pronouncements

Stock-based compensation

In June 2014, the Financial Accounting Services Board (“FASB”) issued Accounting Standards Update (“ASU”) guidance to resolve the diversity of practice relating to the accounting for stock-based performance awards that the performance target could be achieved after the employee completes the required service period. The update is effective prospectively or retrospectively beginning

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

January 1, 2015. Adoption of the new guidance, effective for the fiscal year beginning January 1, 2015, had no impact on the consolidated financial position, results of operations or cash flows.

Recently Issued Accounting Pronouncements

Debt issuance costs

In April 2015, ASU guidance was issued related to debt issuance costs. This update simplifies the presentation of debt issuance costs by requiring debt issuance costs to be presented as a deduction from the corresponding debt liability. The update is effective in fiscal years, including interim periods, beginning after December 15, 2015, and early adoption is permitted. The Company is currently evaluating this guidance and the impact it will have on the consolidated financial position, results of operations or cash flows.

Consolidations

In February 2015, ASU guidance was issued related to consolidations. This update makes some targeted changes to current consolidation guidance and impacts both the voting and the variable interest consolidation models. In particular, the update will change how companies determine whether limited partnerships or similar entities are variable interest entities. The update is effective in fiscal years, including interim periods, beginning after December 15, 2016, and early adoption is permitted. We currently consolidate certain variable interest entities and we do not expect the updated guidance to have an impact on the consolidated financial position, results of operations or cash flows.

Revenue Recognition

In May 2014, ASU guidance was issued related to revenue from contracts with customers. The new standard provides a five-step approach to be applied to all contracts with customers and also requires expanded disclosures about revenue recognition. The ASU is effective for annual reporting periods beginning after December 15, 2016, including interim periods and is to be retrospectively applied. Early adoption is not permitted. The Company is currently evaluating this guidance and the impact it will have on the consolidated financial position, results of operations or cash flows.

NOTE 3 SEGMENT INFORMATION

The Company's reportable segments are based upon the Company's management structure that is focused on the geographic region for the Company's operations. In the first quarter of 2015, the Australia/New Zealand and Indonesia geographic regions were combined into one Asia Pacific geographic region. Geographic regions include North America, South America, Asia Pacific, Africa, and Corporate and Other.

NOTE 4 RECLAMATION AND REMEDIATION

The Company's Reclamation and remediation expense consisted of:

	Three Months Ended March 31, 2015 2014	
Reclamation and remediation	\$ 1	\$ -
Accretion - operating	18	18
Accretion - non-operating	4	2
	\$23	\$ 20

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

The following is a reconciliation of Reclamation and remediation liabilities:

	Three Months Ended March 31,	
	2015	2014
Balance at beginning of period	\$1,689	\$1,611
Additions, changes in estimates and other	(3)	(8)
Liabilities settled	(24)	(8)
Accretion expense	22	20
Balance at end of period	\$1,684	\$1,615

At March 31, 2015 and December 31, 2014, \$1,512 and \$1,497, respectively, were accrued for reclamation obligations relating to operating properties. In addition, the Company is involved in several matters concerning environmental obligations associated with former, primarily historic, mining activities (non-operating). Generally, these matters concern developing and implementing remediation plans at the various sites involved. At March 31, 2015 and December 31, 2014, \$172 and \$192, respectively, were accrued for such obligations. These amounts are also included in Reclamation and remediation liabilities.

The current portion of Reclamation and remediation liabilities of \$67 and \$83 at March 31, 2015 and December 31, 2014, respectively, are included in Other current liabilities.

(dollars in millions, except per share, per ounce and per pound amounts)

NOTE 7 INCOME AND MINING TAXES

The Company's income and mining tax expense differed from the amounts computed by applying the United States statutory corporate income tax rate for the following reasons:

	Three Months Ended March 31,			
	2015		2014	
Income (loss) before income and mining				
tax and other items		\$423		\$143
Tax at statutory rate	35%	\$148	35%	\$50
Reconciling items:				
Percentage depletion	(3)%	(15)	(8)%	(11)
Change in valuation allowance on				
deferred tax assets	10%	44	9%	13
Mining and other taxes	2%	8	6%	8
Disallowed loss on Midas Sale	-	-	9%	13
Effect of foreign earnings, net of credits	1%	3	2%	2
Other	1%	5	2%	3
Income and mining tax expense (benefit)	46%	\$193	55%	\$78

A valuation allowance is provided for those deferred tax assets for which it is more likely than not that the related benefits will not be realized. In determining the amount of the valuation allowance, each quarter, the Company considers future reversals of existing taxable temporary differences, estimated future taxable income, taxable income in prior carryback year(s), as well as feasible tax planning strategies in each jurisdiction to determine if the deferred tax assets are realizable. If it is determined that the Company will not realize all or a portion of its deferred tax assets, it will place or increase a valuation allowance. Conversely, if determined that it will ultimately be able to realize all or a portion of the related benefits for which a valuation allowance has been provided, all or a portion of the related valuation allowance will be reduced. There are a number of risk factors that could impact the Company's ability to realize the deferred tax assets.

The Company operates in numerous countries around the world and accordingly it is subject to, and pays annual income taxes under the various income tax regimes in the countries in which it operates. Some of these tax regimes are defined by contractual agreements with the local government, and others are defined by the general corporate income tax laws of the country. The Company has historically filed, and continues to file, all required income tax

returns and pay the income taxes determined to be due. The tax rules and regulations in many countries are highly complex and subject to interpretation. From time to time the Company is subject to a review of its historic income tax filings and in connection with such reviews, disputes can arise with the taxing authorities over the interpretation or application of certain rules to the Company's business conducted within the country involved.

At March 31, 2015, the Company's total unrecognized tax benefit was \$398 for uncertain income tax positions taken or expected to be taken on income tax returns. Of this, \$80 represents the amount of unrecognized tax benefits that, if recognized, would affect the Company's effective income tax rate.

As a result of the statute of limitations that expire in the next 12 months in various jurisdictions, and possible settlements of audit-related issues with taxing authorities in various jurisdictions, with respect to which none of the issues are individually significant, the Company believes that it is reasonably possible that the total amount of its net unrecognized income tax benefits will decrease by approximately \$50 to \$55 in the next 12 months.

NOTE 8 DISCONTINUED OPERATIONS

Discontinued operations includes a retained royalty obligation ("Holt") from Holloway Mining Company. Holloway Mining Company, which owned the Holt-McDermott property, was sold to St. Andrew Goldfields Ltd. ("St. Andrew") in 2006. The Company records adjustments based on short and long-term gold prices, discount rate assumptions and resource estimates published by St. Andrew.

During the first quarter of 2015, the Company recorded a benefit of \$8, net of tax expense of \$4. During the first quarter of 2014, the Company recorded a charge of \$17, net of tax benefit of \$8.

Newmont has a 51.35% ownership interest in Minera Yanacocha S.R.L. (“Yanacocha”), with the remaining interests held by Compañía de Minas Buenaventura, S.A.A. (43.65%) and the International Finance Corporation (5%). Newmont consolidates Yanacocha due to a majority voting interest.

Newmont has a 48.5% effective economic interest in PT Newmont Nusa Tenggara (“PTNNT”) with remaining interests held by an affiliate of Sumitomo Corporation of Japan and various Indonesian entities. PTNNT operates the Batu Hijau copper and gold mine in Indonesia.

Newmont’s economic ownership interest in TMAC was reduced from 44.69% to 37.79% in January 2015 due to TMAC’s private placement to raise funds. The remaining interests are held by TMAC management and various outside investors.

Newmont consolidates PTNNT and TMAC in its condensed consolidated financial statements as both are primary beneficiaries in variable interest entities (“VIEs”).

The following summarizes the assets and liabilities, inclusive of deferred tax assets and deferred tax liabilities, of our consolidated VIEs (including noncontrolling interests).

	At December 31,
At March 31, 2015	2014

	Total Assets	Total Liabilities	Total Assets	Total Liabilities

(dollars in millions, except per share, per ounce and per pound amounts)

NOTE 10 INCOME (LOSS) PER COMMON SHARE

Basic income per common share is computed by dividing income available to Newmont common stockholders by the weighted average number of common shares outstanding during the period. Diluted income per common share is computed similarly except that weighted average common shares is increased to reflect all dilutive instruments.

	Three Months Ended March 31, 2015 2014	
Net income (loss) attributable to Newmont stockholders		
Continuing operations	\$175	\$117
Discontinued operations	8	(17)
	\$183	\$100
Weighted average common shares (millions):		
Basic	499	498
Effect of employee stock-based awards	1	1
Diluted	500	499
Income (loss) per common share		
Basic:		
Continuing operations	\$0.35	\$0.23
Discontinued operations	0.02	(0.03)
	\$0.37	\$0.20
Diluted:		
Continuing operations	\$0.35	\$0.23
Discontinued operations	0.02	(0.03)
	\$0.37	\$0.20

Options to purchase 3 million shares of common stock at average exercise price of \$48 were outstanding at March 31, 2015 and 2014, but were not included in the computation of diluted weighted average common shares because their exercise prices exceeded the average price of the Company's common stock for the respective periods presented.

Newmont is required to settle the principal amount of its 2017 Convertible Senior Note in cash and may elect to settle the remaining conversion premium (average share price in excess of the conversion price), if any, in cash, shares or a combination thereof. The effect of contingently convertible instruments on diluted earnings per share is calculated

under the net share settlement method. The conversion price exceeded the Company's share price for the periods presented, therefore no additional shares were included in the computation of diluted weighted average common shares.

NOTE 13 FAIR VALUE ACCOUNTING

The following table sets forth the Company's assets and liabilities measured at fair value on a recurring basis (at least annually) by level within the fair value hierarchy. As required by accounting guidance, assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

	Fair Value at March 31, 2015			
	Total	Level 1	Level 2	Level 3

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

The fair values of the derivative instruments in the table above are presented on a net basis. The gross amounts related to the fair value of the derivatives instruments above are included in the Derivatives Instruments Note. All other fair value disclosures in the above table are presented on a gross basis.

In addition to the financial instruments listed in the table above, we hold other financial instruments including receivables, accounts payable and debt. The carrying amounts for receivables and accounts payable approximated their fair value. The estimated fair value of our outstanding debt, exclusive of capital leases, was \$6,437 at March 31, 2015 and the outstanding carrying value was \$6,452 at March 31, 2015. The estimated fair values of our outstanding debt were determined based on quoted prices for similar instruments in active markets (Level 2).

The following table sets forth a summary of the quantitative and qualitative information related to the unobservable inputs used in the calculation of the Company's Level 3 financial assets and liabilities at March 31, 2015:

Description	At March 31, 2015	Valuation technique	Unobservable input	Range/Weighted average	
Auction Rate Securities	\$ 7	Discounted cash flow	Weighted average recoverability rate	85	%
Asset Backed Commercial Paper	21	Discounted cash flow	Recoverability rate	90	%
Boddington Contingent Consideration	10	Monte Carlo	Discount rate	4	%
			Long-term gold price	\$ 1,300	
			Long-term copper price	\$ 3.00	
Holt property royalty	164	Monte Carlo	Weighted average discount rate	4	%
			Long-term gold price	\$ 1,300	

The following table sets forth a summary of changes in the fair value of the Company's Level 3 financial assets and liabilities at March 31, 2015:

Auction Rate	Asset Backed	Total Assets	Boddington Contingent	Holt Property	Total Liabilities
--------------	--------------	--------------	-----------------------	---------------	-------------------

	Securities	Commercial	Paper	Royalty	Royalty	
Balance at beginning of period	\$ 6	\$ 24	\$ 30	\$ 10	\$ 179	\$ 189
Settlements	-	-	-	-	(3)	(3)
Revaluation	1	(3)	(2)	-	(12)	(12)
Balance at end of period	\$ 7	\$ 21	\$ 28	\$ 10	\$ 164	\$ 174

At March 31, 2015, assets and liabilities classified within Level 3 of the fair value hierarchy represent 2% and 57%, respectively, of total assets and liabilities measured at fair value.

NOTE 14 DERIVATIVE INSTRUMENTS

The Company's strategy is to provide shareholders with leverage to changes in gold and copper prices by selling its production at spot market prices. Consequently, the Company does not hedge its gold and copper sales. The Company continues to manage certain risks associated with commodity input costs, interest rates and foreign currencies using the derivative market. All of the derivative instruments described below were transacted for risk management purposes and qualify as cash flow hedges.

Cash Flow Hedges

The foreign currency and diesel contracts are designated as cash flow hedges, and as such, the effective portion of unrealized changes in market value have been recorded in Accumulated other comprehensive income (loss) and are reclassified to income during the period in which the hedged transaction affects earnings. Gains and losses from hedge ineffectiveness are recognized in current earnings.

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

The following tables show the location and amount of gains (losses) reported in the Company's Condensed Consolidated Financial Statements related to the Company's cash flow hedges.

	Foreign Currency Exchange Contracts		Diesel Fixed Forward Contracts		Forward Starting Swap Contracts	
For the three months ended March 31,	2015	2014	2015	2014	2015	2014
Cash flow hedging relationships:						
Gain (loss) recognized in other comprehensive income	\$(27)	\$ 34	\$(5)	\$(2)	\$-	\$-
Gain (loss) reclassified from Accumulated other comprehensive income into income (effective portion) ⁽¹⁾	\$(7)	\$ 5	\$(7)	\$-	\$(5)	\$(5)
Gain (loss) reclassified from Accumulated other comprehensive income into income (ineffective portion) ⁽²⁾	\$-	\$-	\$1	\$-	\$-	\$-

⁽¹⁾The gain (loss) recognized for the effective portion of cash flow hedges is included in Cost applicable to sales, Other Expense, net and Interest expense, net.

⁽²⁾The ineffective portion recognized for cash flow hedges is included in Other Income, net.

Based on fair values at March 31, 2015 the amount to be reclassified from Accumulated other comprehensive income (loss), net of tax to income for derivative instruments during the next 12 months is a loss of approximately \$55.

Provisional Gold and Copper Sales

The Company's provisional gold and copper sales contain an embedded derivative that is required to be separated from the host contract for accounting purposes. The host contract is the receivable from the sale of the gold and copper concentrates at the prevailing indices' prices at the time of sale. The embedded derivative, which does not qualify for hedge accounting, is marked to market through earnings each period prior to final settlement.

At March 31, 2015, Newmont had gold and copper sales of 161,000 ounces and 157 million pounds priced at an average of \$1,187 per ounce and \$2.73 per pound, respectively, subject to final pricing over the next several months.

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

In March 2014, the Company sold its investment in Paladin Energy Ltd. for \$25, resulting in a pre-tax gain of \$4 recorded in Other income, net.

During the three months ended March 31, 2015, the Company recognized impairments for other-than-temporary declines in value of \$57 for marketable securities primarily related to its holdings of Regis Resources Ltd. as a result of the continued decline in stock price.

The following tables present the gross unrealized losses and fair value of the Company's investments with unrealized losses that are not deemed to be other-than-temporarily impaired, aggregated by length of time that the individual securities have been in a continuous unrealized loss position:

	Less than 12 Months Unrealized Fair Value		12 Months or Greater Unrealized Fair Value		Total Unrealized Fair Value	
At March 31, 2015	\$	\$	\$	\$	\$	\$
Marketable equity securities	\$25	\$ 20	\$ -	\$ -	\$25	\$ 20
Auction rate securities	-	-	7	1	7	1
	\$25	\$ 20	\$ 7	\$ 1	\$32	\$ 21

	Less than 12 Months Unrealized Fair Value		12 Months or Greater Unrealized Fair Value		Total Unrealized Fair Value	
At December 31, 2014	\$	\$	\$	\$	\$	\$
Marketable equity securities	\$33	\$ 19	\$ -	\$ -	\$33	\$ 19
Auction rate securities	-	-	6	2	6	2
	\$33	\$ 19	\$ 6	\$ 2	\$39	\$ 21

While the fair value of the Company's investments in marketable equity securities and auction rate securities are below their respective cost, the Company views these declines as temporary. The Company has the ability and intends to

hold its auction rate securities until maturity or such time that the market recovers.

NOTE 16 INVENTORIES

Batu Hijau	1,251	1,242
Ahafo	396	376
Akyem	106	100
	\$3,558	\$ 3,486

The Company recorded write-downs classified as components of Costs applicable to sales of \$49 and \$110 for the first quarter of 2015 and 2014 respectively. The Company recorded write-downs classified as components of Depreciation and amortization of \$17 and \$35 for the first quarter of 2015 and 2014 respectively. Write-downs are recorded to reduce the carrying value of stockpiles and ore on leach pads to net realizable value. Adjustments to net realizable value are a result of current and prior stripping costs, lower long-term metal prices and the associated historical and estimated future processing costs in relation to the Company's long-term price assumptions.

Of the write-downs in first quarter 2015, \$34 are related to Carlin, \$3 to Twin Creeks, \$8 to Yanacocha, and \$21 to Boddington.

Of the write-downs in the first quarter 2014, \$24 are related to Carlin, \$2 to Twin Creeks, \$54 to Yanacocha, \$30 to Boddington, and \$35 to Batu Hijau.

NOTE 19 DEBT

Scheduled minimum debt repayments are \$160 for the remainder of 2015, \$222 in 2016, \$770 in 2017, \$nil in 2018, \$1,175 in 2019 and \$4,200 thereafter. Scheduled minimum capital lease repayments are \$1 in 2015, \$2 each year from 2016 to 2019 and \$6 thereafter.

On March 31, 2015, the Company made a payment of \$200 on the Term Loan Facility, leaving the principal balance at \$275 due in 2019.

On March 3, 2015 the Company's \$3,000 Corporate Revolving Credit Facility was amended to extend \$2,725 of the facility to March 3, 2020. The remaining \$275 matures on March 31, 2019. Fees and other debt issuance costs related to the extension of the facility were capitalized and will be amortized over the term of the facility. There are no borrowings outstanding under the facility at March 31, 2015.

NOTE 24 CONDENSED CONSOLIDATING FINANCIAL STATEMENTS

The following Condensed Consolidating Financial Statements are presented to satisfy disclosure requirements of Rule 3-10(e) of Regulation S-X resulting from the inclusion of Newmont USA Limited (“Newmont USA”), a wholly-owned subsidiary of Newmont, as a co-registrant with Newmont on debt securities issued under a shelf registration statement on Form S-3 filed under the Securities Act of 1933 under which securities of Newmont (including debt securities guaranteed by Newmont USA) may be issued (the “Shelf Registration Statement”). In accordance with Rule 3-10(e) of Regulation S-X, Newmont USA, as the subsidiary guarantor, is 100% owned by Newmont, the guarantees are full and unconditional, and no other subsidiary of Newmont guaranteed any security issued under the Shelf Registration Statement. There are no restrictions on the ability of Newmont or Newmont USA to obtain funds from its subsidiaries by dividend or loan.

NOTE 25 COMMITMENTS AND CONTINGENCIES

General

The Company follows ASC guidance in accounting for loss contingencies. Accordingly, estimated losses from contingencies are accrued by a charge to income when information available prior to issuance of the financial statements indicates that it is probable that a liability could be incurred and the amount of the loss can be reasonably estimated. Legal expenses associated with the contingency are expensed as incurred. If a loss contingency is not probable or reasonably estimable, disclosure of the contingency and estimated range of loss, if determinable, is made in the financial statements when it is at least reasonably possible that a material loss could be incurred.

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

Operating Segments

The Company's operating segments are identified in Note 3. Except as noted in this paragraph, all of the Company's commitments and contingencies specifically described herein relate to the Corporate and Other reportable segment. The Yanacocha matters relate to the Yanacocha reportable segment. The PTNNT matters relate to the Batu Hijau reportable segment. The Frontier matters relate to the Other North America reportable segment.

Environmental Matters

The Company's mining and exploration activities are subject to various laws and regulations governing the protection of the environment. These laws and regulations are continually changing and are generally becoming more restrictive. The Company conducts its operations so as to protect the public health and environment and believes its operations are in compliance with applicable laws and regulations in all material respects. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations, but cannot predict the full amount of such future expenditures.

Estimated future reclamation costs are based principally on legal and regulatory requirements. At March 31, 2015 and December 31, 2014, \$1,512 and \$1,497, respectively, were accrued for reclamation costs relating to currently or recently producing mineral properties in accordance with asset retirement obligation guidance. The current portions of \$42 and \$42 at March 31, 2015 and December 31, 2014, respectively, are included in Other current liabilities.

In addition, the Company is involved in several matters concerning environmental obligations associated with former mining activities. Generally, these matters concern developing and implementing remediation plans at the various sites involved. The Company believes that the related environmental obligations associated with these sites are similar in nature with respect to the development of remediation plans, their risk profile and the compliance required to meet general environmental standards. Based upon the Company's best estimate of its liability for these matters, \$172 and \$192 were accrued for such obligations at March 31, 2015 and December 31, 2014, respectively. These amounts are included in Other current liabilities and Reclamation and remediation liabilities. Depending upon the ultimate resolution of these matters, the Company believes that it is reasonably possible that the liability for these matters could be as much as 130% greater or 1% lower than the amount accrued at March 31, 2015. The amounts accrued are reviewed periodically based upon facts and circumstances available at the time. Changes in estimates are recorded in Reclamation and remediation in the period estimates are revised.

Details about certain of the more significant matters involved are discussed below.

Newmont USA Limited - 100% Newmont Owned

Ross-Adams Mine Site. By letter dated June 5, 2007, the U.S. Forest Service notified Newmont that it had expended approximately \$0.3 in response costs to address environmental conditions at the Ross-Adams mine in Prince of Wales, Alaska, and requested Newmont USA Limited pay those costs and perform an Engineering Evaluation/Cost Analysis ("EE/CA") to assess what future response activities might need to be completed at the site. Newmont intends to

vigorously defend any formal claims by the EPA. Newmont has agreed to perform the EE/CA. Newmont cannot reasonably predict the likelihood or outcome of any future action against it arising from this matter.

Other Legal Matters

Minera Yanacocha S.R.L. (“Yanacocha”) - 51.35% Newmont Owned

Choropampa. In June 2000, a transport contractor of Yanacocha spilled approximately 151 kilograms of elemental mercury near the town of Choropampa, Peru, which is located 53 miles (85 kilometers) southwest of the Yanacocha mine. Elemental mercury is not used in Yanacocha’s operations but is a by-product of gold mining and was sold to a Lima firm for use in medical instruments and industrial applications. A comprehensive health and environmental remediation program was undertaken by Yanacocha in response to the incident. In August 2000, Yanacocha paid under protest a fine of 1,740,000 Peruvian soles (approximately \$0.5) to the Peruvian government. Yanacocha has entered into settlement agreements with a number of individuals impacted by the incident. As compensation for the disruption and inconvenience caused by the incident, Yanacocha entered into agreements with and provided a variety of public works in the three communities impacted by this incident. Yanacocha cannot predict the likelihood of additional expenditures related to this matter.

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

Additional lawsuits relating to the Choropampa incident were filed against Yanacocha in the local courts of Cajamarca, Peru, in May 2002 by over 900 Peruvian citizens. A significant number of the plaintiffs in these lawsuits entered into settlement agreements with Yanacocha prior to filing such claims. In April 2008, the Peruvian Supreme Court upheld the validity of these settlement agreements, which the Company expects to result in the dismissal of all claims brought by previously settled plaintiffs. Yanacocha has also entered into settlement agreements with approximately 350 additional plaintiffs. The claims asserted by approximately 200 plaintiffs remain. In 2011, Yanacocha was served with 23 complaints alleging grounds to nullify the settlements entered into between Yanacocha and the plaintiffs. Yanacocha has answered the complaints and the court has dismissed several of the matters and the plaintiffs have filed appeals. All appeals were referred to the Civil Court of Cajamarca, which affirmed the decisions of the lower court judge. The plaintiffs have filed appeals of such orders before the Supreme Court. Some of these appeals were dismissed by the Supreme Court in favor of Yanacocha, and others are pending resolution. Yanacocha will continue to vigorously defend its position. Neither the Company nor Yanacocha can reasonably estimate the ultimate loss relating to such claims.

Administrative Actions. The Peruvian government agency responsible for environmental evaluation and inspection, Organismo Evaluacion y Fiscalizacion Ambiental (“OEFA”), conducts periodic reviews of the Yanacocha site. In 2011, 2012, and 2013, and the first quarter of 2015, OEFA issued notices of alleged violations of OEFA standards to Yanacocha and Conga relating to past inspections. Total fines for all outstanding OEFA alleged violations remain dependent upon the number of units associated with the alleged violations. In the first quarter of 2015, the water authority of Cajamarca issued notices of alleged regulatory violations. The alleged OEFA violations currently range from zero to 100,120 units and the water authority alleged violations range from zero to 20,000 units, with each unit having a potential fine equivalent to approximately \$.00130 (\$0 to \$156). Yanacocha and Conga are responding to all notices of alleged violations, but cannot reasonably predict the outcome of the agency allegations.

During the first quarter, the Peruvian government agency responsible for certain environmental regulations, Ministry of the Environment (“MINAM”), issued proposed in-stream water quality criteria pursuant to which MINAM may require mining companies, including Yanacocha, to comply. These criteria would modify the in-stream water quality criteria, pursuant to which Yanacocha has been designing water treatment processes and infrastructure, with a compliance deadline of December 2015. The proposed criteria may require additional and potentially different water treatment infrastructure from that required under the December 2015 compliance deadline. Yanacocha has appealed for an extension to the December 2015 compliance deadline for these previously announced in-stream water quality criteria, which remains pending. Yanacocha is currently assessing redesign and treatment options in connection with the recently proposed criteria. Those redesign and enhanced treatment options may result in increased costs and require additional time for implementation. If Yanacocha is unsuccessful in appealing or meeting the requirements by the deadlines, it could result in potential fines and penalties relating to intermittent non-compliant exceedances, permitting delays or impacts to operations. See Item 1A, Risk Factors in Newmont’s Annual Report on Form 10-K for the year ended December 31, 2014 filed February 20, 2015 for a description of risks relating to hazards and uncertainties associates with mining and compliance with increasing environmental regulations.

Conga Project Constitutional Claim. On October 18, 2012, Marco Antonio Arana Zegarra filed a constitutional claim against the Ministry of Energy and Mines and Yanacocha requesting the Court to order the suspension of Conga Project as well as to declare not applicable the October 27, 2010, directorial resolution approving the Conga Project Environmental Impact Assessment (“EIA”). On October 23, 2012, a Cajamarca judge dismissed the claims based on formal grounds finding that: 1) plaintiffs had not exhausted previous administrative proceedings; 2) the directorial resolution approving the Conga EIA is valid, and was not challenged when issued in the administrative proceedings; 3) there was inadequate evidence to conclude that the Conga Project is a threat to the constitutional right of living in an adequate environment, and; 4) the directorial resolution approving the Conga Project EIA does not guarantee that the Conga Project will proceed, so there was no imminent threat to be addressed by the Court. The plaintiffs appealed the dismissal of the case. The Civil Court of the Superior Court of Cajamarca confirmed the above mentioned resolution and the plaintiff presented an appeal. On March 13, 2015, the Constitutional Court published its ruling stating that the case should be sent back to the first court with an order to formally admit the case and start the judicial process in order to review the claim and the proofs presented by the plaintiff. Yanacocha will answer the claim. Neither the Company nor Yanacocha can reasonably predict the outcome of this litigation.

(dollars in millions, except per share, per ounce and per pound amounts)

PT Newmont Nusa Tenggara (“PTNNT”) – 31.5% Newmont Owned

Divestiture: Under the Batu Hijau Contract of Work, beginning in 2006 and continuing through 2010, a portion of PTNNT’s shares were required to be offered for sale, first, to the Indonesian government or, second, to Indonesian nationals, equal to the difference between the following percentages and the percentage of shares already owned by the Indonesian government or Indonesian nationals (if such number is positive): 23% by March 31, 2006; 30% by March 31, 2007; 37% by March 31, 2008; 44% by March 31, 2009; and 51% by March 31, 2010. As PT Pukuafu Indah (“PTPI”), an Indonesian national, owned a 20% interest in PTNNT at all relevant times, in 2006, a 3% interest was required to be offered for sale and, in each of 2007 through 2010, an additional 7% interest was required to be offered (for an aggregate 31% interest). The price at which such interests were offered for sale to the Indonesian parties was the fair market value of such interest considering PTNNT as a going concern, as agreed with the Indonesian government. Following certain disputes and an arbitration with the Indonesian government, in November and December 2009, sale agreements were concluded pursuant to which the 2006, 2007 and 2008 shares were sold to PT Multi Daerah Bersaing (“PTMDB”), the nominee of the local governments, and the 2009 shares were sold to PTMDB in February 2010, resulting in PTMDB owning a 24% interest in PTNNT.

On December 17, 2010, the Ministry of Energy & Mineral Resources, acting on behalf of the Indonesian government, accepted the offer to acquire the final 7% interest in PTNNT. Subsequently, the Indonesian government designated Pusat Investasi Pemerintah (“PIP”), an agency of the Ministry of Finance, as the entity that will buy the final stake. On May 6, 2011, PIP and the foreign shareholders entered into a definitive agreement for the sale and purchase of the final 7% divestiture stake, subject to receipt of approvals from certain Indonesian government ministries. Subsequent to signing the agreement, a disagreement arose between the Ministry of Finance and the Indonesian parliament in regard to whether parliamentary approval was needed to allow PIP to make the share purchase. In July 2012, the Constitutional Court ruled that parliament approval is required for PIP to use state funds to purchase the shares, which approval has not yet been obtained. Further disputes may arise in regard to the divestiture of the 2010 shares.

Administrative Claim: On April 8, 2015, PTNNT received a summons for a hearing in Jakarta State Administrative Court in which PTNNT learned that two individual plaintiffs of NTB Province filed a claim with the Jakarta State Administrative Court against the Director General of Mineral and Coal of the Ministry of Energy and Mineral Resources of the Republic of Indonesia (“MEMR”). The claim alleges that the Memorandum of Understanding (“MOU”) between MEMR and PTNNT dated September 3, 2014, and the subsequent granting of an export permit violated Indonesian legal principles of good governance. The administrative claim requests suspension and annulment of the MOU and export permits. PTNNT will request intervention into the case, but cannot reasonably predict the outcome of the litigation.

NWG Investments Inc. v. Fronteer Gold Inc.

In April 2011, Newmont acquired Fronteer Gold Inc. (“Fronteer”).

Fronteer acquired NewWest Gold Corporation (“NewWest Gold”) in September 2007. At the time of that acquisition, NWG Investments Inc. (“NWG”) owned approximately 86% of NewWest Gold and an individual named Jacob Safra

owned or controlled 100% of NWG. Prior to its acquisition of NewWest Gold, Fronteer entered into a June 2007 lock-up agreement with NWG providing that, among other things, NWG would support Fronteer's acquisition of NewWest Gold. At that time, Fronteer owned approximately 47% of Aurora Energy Resources Inc. ("Aurora"), which, among other things, had a uranium exploration project in Labrador, Canada.

NWG contends that, during the negotiations leading up to the lock-up agreement, Fronteer represented to NWG that Aurora would commence uranium mining in Labrador by 2013, that this was a firm date, that Fronteer was not aware of any obstacle to doing so, that Aurora faced no serious environmental issues in Labrador and that Aurora's competitors faced greater delays in commencing uranium mining. NWG further contends that it entered into the lock-up agreement and agreed to support Fronteer's acquisition of NewWest Gold in reliance upon these purported representations. On October 11, 2007, less than three weeks after the Fronteer-NewWest Gold transaction closed, a member of the Nunatsiavut Assembly introduced a motion calling for the adoption of a moratorium on uranium mining in Labrador. On April 8, 2008, the Nunatsiavut Assembly adopted a three-year moratorium on uranium mining in Labrador. NWG contends that Fronteer was aware during the negotiations of the NWG/Fronteer lock-up agreement that the Nunatsiavut Assembly planned on adopting this moratorium and that its adoption would preclude Aurora from commencing uranium mining by 2013, but Fronteer nonetheless fraudulently induced NWG to enter into the lock-up agreement.

On September 24, 2012, NWG served a summons and complaint on NMC, and then amended the complaint to add Newmont Canada Holdings ULC as a defendant. The complaint also named Fronteer Gold Inc. and Mark O'Dea as defendants. The complaint sought rescission of the merger between Fronteer and NewWest Gold and \$750 in damages. In August 2013 the Supreme Court of

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

New York, New York County issued an order granting the defendants' motion to dismiss on forum non conveniens. Subsequently, NWG filed a notice of appeal of the decision and then a notice of dismissal of the appeal on March 24, 2014.

On February 26, 2014, NWG filed a lawsuit in Ontario Superior Court of Justice against Fronteer Gold Inc., Newmont Mining Corporation, Newmont Canada Holdings ULC, Newmont FH B.V. and Mark O'Dea. The Ontario Complaint is based upon the same allegations contained in the New York lawsuit with claims for fraud and negligent misrepresentation. NWG seeks disgorgement of profits since the close of the NWG deal on September 24, 2007 and punitive damages.

Newmont intends to vigorously defend this matter, but cannot reasonably predict the outcome.

Other Commitments and Contingencies

Tax contingencies are provided for in accordance with ASC income tax guidance.

The Company has minimum royalty obligations on one of its producing mines in Nevada for the life of the mine. Amounts paid as a minimum royalty (where production royalties are less than the minimum obligation) in any year are recoverable in future years when the minimum royalty obligation is exceeded. Although the minimum royalty requirement may not be met in a particular year, the Company expects that over the mine life, gold production will be sufficient to meet the minimum royalty requirements. Minimum royalty payments payable are \$30 in 2015, \$32 in 2016 through 2019 and \$190 thereafter.

As part of its ongoing business and operations, the Company and its affiliates are required to provide surety bonds, bank letters of credit and bank guarantees as financial support for various purposes, including environmental reclamation, exploration permitting, workers compensation programs and other general corporate purposes. At March 31, 2015 and December 31, 2014, there were \$1,879 and \$1,865, respectively, of outstanding letters of credit, surety bonds and bank guarantees. The surety bonds, letters of credit and bank guarantees reflect fair value as a condition of their underlying purpose and are subject to fees competitively determined in the market place. The obligations associated with these instruments are generally related to performance requirements that the Company addresses through its ongoing operations. As the specific requirements are met, the beneficiary of the associated instrument cancels and/or returns the instrument to the issuing entity. Certain of these instruments are associated with operating sites with long-lived assets and will remain outstanding until closure. Generally, bonding requirements associated with environmental regulation are becoming more restrictive. However, the Company believes it is in compliance with all applicable bonding obligations and will be able to satisfy future bonding requirements through existing or alternative means, as they arise.

Newmont is from time to time involved in various legal proceedings related to its business. Except in the above described proceedings, management does not believe that adverse decisions in any pending or threatened proceeding or that amounts that may be required to be paid by reason thereof will have a material adverse effect on the Company's financial condition or results of operations.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION (dollars in millions, except per share, per ounce and per pound amounts)

The following Management's Discussion and Analysis ("MD&A") provides information that management believes is relevant to an assessment and understanding of the consolidated financial condition and results of operations of Newmont Mining Corporation and its subsidiaries (collectively, "Newmont," the "Company," "our" and "we"). We use certain non-GAAP financial measures in our MD&A. For a detailed description of each of the non-GAAP measures used in this MD&A, please see the discussion under "Non-GAAP Financial Measures" beginning on page 46. References to "A\$" refer to Australian currency, "C\$" to Canadian currency and "NZ\$" to New Zealand currency.

This item should be read in conjunction with our interim unaudited Condensed Consolidated Financial Statements and the notes thereto included in this quarterly report. Additionally, the following discussion and analysis should be read in conjunction with Management's Discussion and Analysis of Consolidated Financial Condition and Results of Operations and the consolidated financial statements included in Part II of our Annual Report on Form 10-K for the year ended December 31, 2014 filed February 20, 2015.

Overview

Newmont is one of the world's largest gold producers and is the only gold company included in the S&P 500 Index and Fortune 500. We have been included in the Dow Jones Sustainability Index-World for eight consecutive years and have adopted the World Gold Council's Conflict-Free Gold Policy. We are also engaged in the exploration for and acquisition of gold and copper properties. We have significant operations and/or assets in the United States, Australia, Peru, Indonesia, Ghana and New Zealand.

Our vision is to be recognized and respected for exceptional economic, environmental and social performance.

We continue to position the business to capture benefits of economic recovery and demand growth in the current volatile commodity market environment. Our team has spent considerable time optimizing our project portfolio and we continue to move forward with developing projects that generate value. We are focused on providing sustainable efficiency, productivity and cost improvements over the next three years and expect to deliver significant cost and cash savings improvement initiatives. One of the programs we launched in 2013 and continue to progress in 2015 to achieve these improvements is the Full Potential program ("Full Potential"). Full Potential is designed to leverage our industry experience and discipline to accelerate the delivery of business improvement opportunities across our operations and support areas, resulting in improved levels of operating cash flow.

First quarter 2015 highlights are included below and discussed further in Results of Consolidated Operations.

Operating highlights

Sales of \$1,972 for the first quarter of 2015;

Average realized gold and copper prices of \$1,203 per ounce and \$2.34 per pound, respectively, for the first quarter of 2015;

Consolidated gold production of 1,362,000 ounces (1,213,000 attributable ounces) for the first quarter of 2015, at Costs applicable to sales of \$609 per ounce;

Consolidated copper production of 139 million pounds (83 million attributable pounds) for the first quarter of 2015, at Costs applicable to sales of \$1.33 per pound;

Gold operating margin of \$594 per ounce for the first quarter of 2015. (see "Non-GAAP Financial Measures" on page 46)

Our global project pipeline.

We manage our wider project portfolio to maintain flexibility to address the development risks associated with our projects including permitting, local community and government support, engineering and procurement availability, technical issues, escalating costs and other associated risks that could adversely impact the timing and costs of certain opportunities.

Projects included in our global pipeline comprise an important part of the Company's growth strategy and reflect opportunities throughout the development cycle. The most advanced projects, including early stage development and projects in or near the Execution phase are described below. The exploration, construction and execution of these projects may require significant funding to complete.

Turf Vent Shaft, Nevada. The Turf No. 3 Vent Shaft Project is in the construction phase, is planned to achieve commercial production in late 2015 and is expected to add between 100,000 and 150,000 ounces of production annually to Leeville. Capital costs

Table of Contents

for the project are estimated between \$350 and \$400. As of March 31, 2015, total capital costs were \$269 of which \$19 related to the first quarter. The Turf No. 3 Vent Shaft project provides the ventilation required to increase production, and decrease mine costs over the 11 year mine life at Leeville.

Merian, Suriname. On July 29, 2014 the Board of Directors of Newmont approved full funding for the Merian project in Suriname and construction began in August 2014. Following the project approval by Newmont, the Government of Suriname granted the Right of Exploitation on August 22, 2014. The Government of Suriname opted for a 25% ownership in the Merian Project and made their earn-in payments. The project allows Newmont to pursue a new district with upside potential and the opportunity to grow and extend the operating life of the South American region. Average estimated gold production (on a 100% basis) of 400,000 to 500,000 ounces per year is expected for the first five years, once Merian comes into production in late 2016. Total capital spend on the project is expected to range from \$600 to \$700 on an attributable basis. As of March 31, 2015 total capital costs were \$223, of which \$63 related to the first quarter on an attributable basis. At December 31, 2014, gold reserves at Merian contained 104,700 thousand tons of probable reserves, grading 0.034 ounces per ton for 3.6 million ounces on an attributable basis.

Waihi Correnso, New Zealand. Waihi Correnso is in the construction phase and achieved commercial production in January 2015. Construction activities are expected to be complete in the second quarter of 2015. Total capital costs of the project are estimated at approximately \$30 to \$40. As of March 31, 2015 total capital costs were \$31, of which \$6 related to the first quarter. The project is an extension of the operating Favona, Moonlight and Trio underground mines and will leverage the existing surface and processing infrastructure. The Correnso deposit is a conventional high grade vein, and offers upside resource potential in and around Waihi.

Long Canyon, Nevada. The Board of Directors approved full funding for the first phase of the Long Canyon project in the first quarter of 2015. The Environmental Impact Statement Record of Decision was issued by the Bureau of Land Management on April 7, 2015. The project is now under construction and is expected to achieve commercial production in the first half of 2017. This first phase of development consists of an open pit mine and heap leach operation with production between 100,000 and 150,000 ounces per year over an eight year mine life. Total capital costs of the project are estimated between \$250 and \$300. We are currently assessing mining and processing options; and completing a three-year infill drilling program to inform our approach to Phase 2. At December 31, 2014, we reported 18,400 thousand tons of probable reserves, grading 0.067 ounce per ton for 1.2 million ounces of gold reserves at Long Canyon.

Conga, Peru. Due to local political and community protests, construction and development activities at the Conga project were largely suspended in November 2011. The results of the Environmental Impact Assessment (“EIA”) independent review were announced in April 2012 and confirmed our initial EIA met Peruvian and International standards. The review made recommendations to provide additional water capacity and social funds, which we have largely accepted. Following review of the recommendation, we announced our decision to move the project forward on a “water first” approach. In the first half of 2014, a Conga Restart Study was completed to identify and test alternatives to advancing development of the project. Following this assessment, a new plan was developed to reduce spending to focus on only the most critical work – protecting people and assets, engaging with communities, and maintaining existing project infrastructure – while maintaining optionality. Newmont will not proceed with the full development of Conga without social acceptance, solid project economics and potentially another partner to help defray costs and risk. At December 31, 2014 we reported 303,400 thousand tons of probable reserves, grading 0.021 ounces per ton for 6.5 million attributable ounces of gold reserves and 0.28% copper for 1,690 million attributable pounds of copper reserves at Conga. Construction of Conga and the implementation of the independent EIA review recommendations will continue provided it can be done in a safe manner with risk-adjusted returns that justify future investment. Should we be unable to continue with the current development plan at Conga, we may reprioritize and reallocate capital to other alternatives, which may result in a potential accounting impairment.

Tanami Expansion, Australia. The goal of the Tanami Expansion project is to increase production and lower all-in sustaining costs per ounce of the mine. Incremental improvements are driven by bringing ounces forward, mining additional ounces at depth and leveraging the fixed costs of the mine and processing facilities. The scope for this project includes a ventilation upgrade, additional mining equipment, additional mine access (Dual Access) and increasing process plant capacity and recovery. For a capital cost of between \$100 and \$120, the project would add incremental gold production of 100,000 to 125,000 ounces (first five year average) at lower costs and increase mine life by three years. If approved later this year, additional production would come on line in 2017.

Ahafo Mill Expansion, Ghana. We continue to evaluate development alternatives for this project. Current engineering efforts are focused on reducing the scale of the project. The project would increase profitable production by 100,000 to 125,000 ounces (first five year average) while lowering costs and off-setting the impacts of lower grades and harder ore. Capital costs are expected to be between \$140 and \$160. If approved in the second half of 2015, the additional production would be expected in 2017.

Subika Underground, Ghana. Subika Underground is in the confirmation stage of development as work continues to optimize the mine plan and reduce costs. The project is expected to produce approximately 200,000 ounces of gold per year and an investment decision is expected in late 2015 or 2016.

Consolidated Financial Results

Net income (loss) attributable to Newmont stockholders for the first quarter of 2015 was \$183 (\$0.37 per share) compared to income of \$100 (\$0.20 per share) for the first quarter of 2014. Results for the first quarter of 2015 compared to the first quarter of 2014 were impacted by higher gold and copper sales volumes, lower gold and copper unit costs and lower project spending, partially offset by lower realized gold and copper prices.

Gold Sales were marginally lower in the first quarter of 2015 compared to the first quarter of 2014 due to lower realized prices and ounces related to Midas, Jundee and La Herradura which were sold in 2014, mostly offset by higher sales volumes in existing operations. The following analysis summarizes consolidated gold sales:

	Three Months Ended March 31,	
	2015	2014
Consolidated gold sales:		
Gross before provisional pricing	\$1,664	\$1,651
Provisional pricing mark-to-market	(1)	4
Gross after provisional pricing	1,663	1,655
Treatment and refining charges	(18)	(4)
Net	\$1,645	\$1,651
Consolidated gold ounces sold (thousands):	1,367	1,278
Average realized gold price (per ounce):		
Gross before provisional pricing	\$1,217	\$1,292
Provisional pricing mark-to-market	(1)	4
Gross after provisional pricing	1,216	1,296
Treatment and refining charges	(13)	(3)
Net	\$1,203	\$1,293

	\$1,019	\$1,083	\$289	\$298

⁽¹⁾On October 6, 2014, the Company sold its 44% interest in La Herradura.

⁽²⁾The Jundee mine was sold July 1, 2014.

Costs applicable to sales includes a 18% reduction in direct operating costs in the first quarter of 2015 compared to the first quarter of 2014 due primarily to Full Potential Projects, lower fuel prices and a favorable Australian dollar/U.S. dollar exchange rate the sale of Midas, Jundee and La Herradura in 2014. Costs applicable to sales for gold decreased in the first quarter of 2015 compared to the first quarter of 2014 due to the direct operating cost reductions mentioned above and lower stockpile and leach pad inventory adjustments. Costs applicable to sales for copper increased in the first quarter of 2015 compared to the first quarter of 2014 due to higher production as a result of accessing phase 6 ore at Batu Hijau, the MoU with the Government of Indonesia and the resulting permits issued allowing PTNNT to export and sell copper concentrates partially offset by the aforementioned reduction in direct operating costs and lower stockpile and leach pad inventory adjustments. For a complete discussion regarding variations in operations, see Results of Consolidated Operations below.

Depreciation and amortization for gold in the first quarter of 2015 decreased compared to the first quarter of 2014 due to lower stockpile inventory adjustments and from the sale of Midas, Jundee and La Herradura. Depreciation and amortization for copper in the first quarter of 2015 increased compared to the first quarter of 2014 due to higher production and the PTNNT permit issue mentioned above partially offset by lower stockpile inventory adjustments.

Table of Contents

Exploration expense decreased \$1 in the first quarter of 2015 compared to the first quarter of 2014 due to timing of both brownfields and greenfields expenditures in all our regions.

Advanced projects, research and development expense decreased \$14 in the first quarter of 2015 compared to the first quarter of 2014 due to deferment of various studies, reductions in project and technical services costs and our decision to move Merian from advanced projects to execution.

General and administrative expense decreased by \$1 for the first quarter of 2015 compared to the first quarter of 2014 due primarily to lower labor costs.

Other expense, net decreased by \$13 in the first quarter of 2015 compared to the first quarter of 2014 primarily due to lower community development and power plant expenses.

Other income, net decreased by \$35 in the first quarter of 2015 compared to the first quarter of 2014 due to higher impairment charges on marketable securities in the first quarter of 2015, partially offset by higher foreign currency exchange gains during the same period.

Interest expense, net decreased by \$8 for the first quarter of 2015 compared to the first quarter of 2014 due to increased capitalized interest and decreased discount amortization expense as a result of the payoff of the 2014 senior convertible note in July 2014. Capitalized interest increased by \$3 in the first quarter of 2015 compared to the first quarter of 2014 due to the Merian Project.

Income and mining tax expenses during the first quarter of 2015 resulted in an estimated expense of \$193, for an effective tax rate of 46%. Estimated income and mining tax expense during the first quarter of 2014 was \$78 for an effective tax rate of 55%. The Company's effective tax rate is driven by a number of factors as illustrated in the table below. The effective tax rate for the first quarter of 2015 differs from the effective tax rate for the first quarter of 2014 primarily due to a decrease in the benefit for percentage depletion resulting from the jurisdictional mix of income and increases in valuation allowance related to higher foreign taxes, which is partially offset by the beneficial effect of related foreign earnings, and the impairment of marketable securities. In addition, the effective tax rate for the first quarter of 2014 was negatively impacted by the non-cash expense related to the sale of the Midas mine.

	Three Months Ended				Variance

Effect of foreign earnings, net of credits	1%	3	2%	2	(1)%
Other	1%	5	2%	3	(1)%
Income and mining tax expense (benefit)	46%	\$193	55%	\$78	(9)%

A valuation allowance is provided for those deferred tax assets for which it is more likely than not that the related benefits will not be realized. In determining the amount of the valuation allowance, each quarter the Company considers future reversals of existing taxable temporary differences, estimated future taxable income, taxable income in prior carryback year(s), as well as feasible tax planning strategies in each jurisdiction to determine if the deferred tax assets are realizable. If it is determined we will not realize all or a portion of its deferred tax assets, we will place or increase a valuation allowance. Conversely, if we determine that we will ultimately be able to realize all or a portion of the related benefits for which a valuation allowance has been provided, all or a portion of the related valuation allowance will be reduced. There are a number of risk factors that could impact the Company's ability to realize the deferred tax assets. See Note 2, Summary of Significant Accounting Policies, Risks and Uncertainties.

There are a number of factors that can potentially impact the Company's effective tax, including the geographic distribution of income, the non-recognition of tax assets, percentage depletion, changes in tax laws, and the impact of specific transactions and assessments. For a complete discussion of the factors that influence our effective tax rate, see Management's Discussion and Analysis of Consolidated Financial Condition and Results of Operations for the year ended December 31, 2014 filed February 20, 2015 on Form 10-K.

Due to the factors discussed above and the sensitivity of the Company's income tax expense and effective tax rate to these factors, it is expected that the effective tax rate will fluctuate, sometimes significantly, in future periods.

Table of Contents

Net loss (income) attributable to noncontrolling interests in the first quarter of 2015 was a gain of \$46 compared to a loss of \$52 in the first quarter of 2014. The gain is a result of increased earnings at Batu Hijau and Minera Yanacocha.

Income (loss) from discontinued operations includes a decrease in the Holt property royalty liability as of March 31, 2015. During the first quarter of 2015, the Company recorded a benefit of \$8, net of tax expense of \$4. During the first quarter of 2014, the Company recorded a charge of \$17, net of tax benefit of \$8. Due to the nature of the sliding scale royalty calculation, changes in expected production, discount rates and gold price have a significant impact on the fair value of the liability.

⁽¹⁾Excludes Depreciation and amortization and Reclamation and remediation.

⁽²⁾All-In Sustaining Costs is a non-GAAP financial measure. See page 46 for a reconciliation.

⁽³⁾Includes 14 and 15 attributable ounces in 2015 and 2014, respectively, from our interest in La Zanja and 13 and 12 attributable ounces in 2015 and 2014, respectively, from our interest in Duketon.

First quarter 2015 compared to 2014

Consolidated gold production increased 5% due to higher production at our South America and Asia Pacific operations, partially offset by slightly lower production from Africa and the sale of Midas, Jundee and La Herradura. Consolidated copper production increased 81% due to higher production from Indonesia as a result of accessing phase 6 ore at Batu Hijau.

Costs applicable to sales per consolidated gold ounce and copper pound sold decreased 19% and 51%, respectively, due to lower direct operating costs as a result of Full Potential projects, lower fuel prices, a favorable Australian dollar/U.S. dollar exchange rate, and higher copper production, in addition to lower stockpile and inventory leach pad adjustments from higher ore grade mined.

Depreciation and amortization decreased 14% and 48% per gold ounce and copper pound sold, respectively, due to higher copper production, lower stockpile and leach pad inventory adjustments from higher ore grade processed, and the sale of Midas, Jundee and La Herradura, partially offset by higher amortization rates at our North American operations.

First quarter 2015 compared to 2014

Carlin, USA. Gold ounces produced were essentially unchanged from the prior year. Costs applicable to sales per ounce decreased 7% due primarily to lower direct operating costs associated with Full Potential projects. Depreciation and amortization per ounce increased 30% due to lower grades mined and higher amortization rates as a result of capital additions in the prior year.

Phoenix, USA. Gold ounces produced increased 4% due to higher grade and recoveries. Copper pounds produced were essentially unchanged from the prior year. Costs applicable to sales per ounce increased 23% due to lower by-product credits. Costs applicable to sales per pound decreased 19% due to higher pounds sold and a higher percentage of copper produced from the copper leach facility which has lower direct operating costs. Depreciation and amortization increased 105% per ounce and 61% per pound due to higher amortization rates as a result of capital additions in the prior year including the copper leach facility in the fourth quarter of 2013, higher allocation to gold and lower mining rates.

Twin Creeks, USA. Gold ounces produced increased 26% due to higher mill feed and ore grade to the Juniper mill, partially offset by the sale of Midas in 2014. Costs applicable to sales per ounce decreased 10% due to higher production and lower operating costs associated with Full Potential projects. Depreciation and amortization per ounce increased 3%.

La Herradura, Mexico. We completed the sale of our 44% interest in La Herradura on October 6, 2014.

⁽³⁾The Jundee mine was sold July 1, 2014.

First quarter 2015 compared to 2014

Boddington, Australia. Gold production increased 6% due to higher ore grade milled and a reduction of gold in-circuit inventory, partially offset by lower recovery and lower throughput as the result of a decrease in mill utilization due to power losses and unplanned downtime. Copper production was essentially unchanged from the prior year. Costs applicable to sales decreased 9% per ounce due to higher production, lower stockpile inventory adjustments, a

favorable foreign currency exchange rate and lower oil prices, partially offset by higher costs allocated to gold. Costs applicable to sales decreased 27% per pound due to higher production, lower stockpile inventory adjustments, lower selling costs per pound, lower costs allocated to copper and a favorable foreign currency exchange rate. Depreciation and amortization per ounce was essentially unchanged from the prior year. Depreciation and amortization decreased 17% per pound due primarily to lower stockpile inventory adjustments.

Tanami, Australia. Gold ounces produced increased 18% due to higher throughput as a result of higher ore tons mined. Costs applicable to sales decreased 14% per ounce mainly due to higher production, a favorable foreign currency exchange rate and lower oil prices. Depreciation and amortization decreased 9% per ounce due to higher production and lower amortization rates from an increase in reserves at year-end 2014.

Jundee, Australia. The Jundee mine was sold on July 1, 2014.

Waihi, New Zealand. Gold ounces produced increased 52% primarily due to higher throughput as a result of higher ore tons mined, higher ore grade milled due to higher underground ore grade mined and a build of gold in-circuit inventory in the prior year

Table of Contents

period. Costs applicable to sales decreased 39% per ounce due to higher production and a favorable foreign currency exchange rate. Depreciation and amortization decreased 43% per ounce primarily due to higher production.

In April 2015, the Waihi Martha open pit experienced two slips on the north wall and as a result all pit activities have been temporarily suspended to protect our people and assets. The Company is evaluating remediation options and potential impacts to 2015 production. The underground, processing and other operations have continued to operate without disruption. See Item 1A, Risk Factors in Newmont's Annual Report on Form 10-K for the year ended December 31, 2014 filed February 20, 2015 for a description of geotechnical challenges, which could impact our production and profitability.

Kalgoorlie, Australia. Gold ounces produced decreased 31% due to lower throughput as a result of lower mill utilization and a lower draw-down of in-circuit inventory as compared to the prior year period. Costs applicable to sales increased 16% per ounce primarily due to lower production, partially offset by a favorable foreign currency exchange rate and lower oil prices. Depreciation and amortization increased 25% per ounce primarily due to lower production.

Batu Hijau, Indonesia. Gold ounces and copper pounds produced increased 569% and 127%, respectively, primarily due to higher ore grade milled as a result of higher ore grade mined from accessing phase 6 ore and higher metal recovery and throughput. Costs applicable to sales decreased 62% per ounce and per pound due to higher production, lower direct mining costs and higher ore grade mined. Depreciation and amortization decreased 71% per ounce and 70% per pound primarily due to higher production and higher ore grade mined.

⁽¹⁾Excludes Depreciation and amortization and Reclamation and remediation.

⁽²⁾All-In Sustaining Costs is a non-GAAP financial measure. See page 46 for a reconciliation.

First quarter 2015 compared to 2014

Ahafo, Ghana. Gold production decreased 4% due primarily to lower mill throughput as a result of load shedding requirements related to the current power shortage in Ghana. Costs applicable to sales per ounce decreased 1% due to lower direct operating costs reflecting lower mill consumable costs which resulted from the reduced throughput. In addition, lower diesel and labor costs and operating efficiencies from the Full Potential project, including improved tire life, further contributed to the reduction. Depreciation and amortization per ounce increased 2% due to lower

production.

Akyem, Ghana. Gold production decreased 4% mainly as a result of lower mill throughput resulting from the load shedding requirements related to power. The impact of this lower throughput was offset in part by the processing of higher grade ore from stockpile to compensate for reduced tonnages. Costs applicable to sales per ounce increased 24% due to the impact of lower production and a lower gold stockpile inventory build in 2015 compared to the same period in 2014 when high grade ore was being mined during the early stages of the mine start-up. These increases were offset partially by the impact of the load shedding which reduced mill consumables and the benefit of process improvements resulting from the Full Potential project. Depreciation and amortization per ounce increased 7% due to lower production.

Foreign Currency Exchange Rates

Our foreign operations sell their gold and copper production based on U.S. dollar metal prices. Approximately 37% and 39% of Costs applicable to sales for our foreign operations were paid in currencies other than the U.S. dollar during the first quarter of 2015 and 2014, respectively. Variations in the local currency exchange rates in relation to the U.S. dollar at our foreign mining operations decreased Costs applicable to sales by \$23 per ounce, net of hedging losses, during the first quarter of 2015 compared to the first quarter of 2014.

43

Table of Contents

Liquidity and Capital Resources

Cash Provided from Operating Activities

Net cash provided from continuing operations was \$628 in the first quarter of 2015, an increase of \$445 from the first quarter of 2014, primarily due to an increase in consolidated gold and copper ounces sold, a decrease in direct operating costs and an improvement in working capital, partially offset by a decrease in average realized gold and copper prices.

Investing Activities

Net cash used in investing activities increased to \$214 during first quarter of 2015 compared to \$178 during the same period of 2014, respectively. Additions to property, plant and mine development were as follows:

	Three Months Ended March 31,	
	2015	2014

Cash basis	\$284	\$235

Capital expenditures in North America during the first quarter of 2015 primarily related to the development of the Turf Vent Shaft project, surface and underground mine development, tailings facility construction and capitalized component purchases. Capital expenditures in South America were primarily related to capitalized component purchases, surface mine development and infrastructure improvements. The majority of capital expenditures in Asia Pacific were for underground mine development, tailings and support facility construction and mining equipment purchases in Australia and New Zealand and equipment and capitalized component purchases in Batu Hijau. Capital expenditures in Africa were related to tailings facility expansion, capitalized component purchases, Subika Underground and Ahafo mill expansion. Capital expenditures in Corporate were primarily related to the Merian project.

Capital expenditures in North America during the first quarter of 2014 primarily related to the development of the Turf Vent Shaft project, surface and underground mine development, infrastructure improvements and capitalized component purchases in Nevada, as well as mill construction capital in Mexico. Capital expenditures in South America were primarily related to the Conga project, surface mine development, infrastructure improvements and equipment component purchases. The majority of capital expenditures in Asia Pacific were for underground mine development, tailings and support facility construction and mining equipment purchases in Australia and New Zealand and equipment and equipment component purchases in Batu Hijau. Capital expenditures in Africa were related to tailings facility construction, capitalized component purchases for large equipment and mining and support equipment purchases.

Table of Contents

Acquisitions, net. During the first quarter of 2014 we purchased the remaining 20% noncontrolling interest in the Merian project.

Purchases and sales of investments. During the first quarter of 2015 we received \$29 primarily from the maturity of a Certificate of Deposit for \$25. During the first quarter of 2014 we received \$25 primarily from the sale of Paladin Energy Ltd. securities.

Proceeds from sale of other assets. During the first quarter of 2015 we received \$44, of which, \$38 was from the sale of Hemlo mineral rights in Ontario, Canada and \$6 was from the sale of Relief Canyon in Nevada. During the first quarter of 2014 we received \$70, of which, \$57 was from the Midas sale and \$13 primarily from the sale of equipment at Conga.

Financing Activities

Net cash used in financing activities was \$196 and \$80 during the first quarter of 2015 and 2014, respectively.

Proceeds from and repayment of debt. During the first quarter of 2015, we paid \$205 in debt, of which \$200 was for the 2019 term loan facility and \$5 was for the PTNNT revolving credit facility. During the first quarter of 2014, we received net proceeds from debt of \$3 from our other short-term debt.

Scheduled minimum debt repayments are \$160 for the remainder of 2015, \$222 in 2016, \$770 in 2017, nil in 2018, \$1,175 in 2019 and \$4,200 thereafter. We expect to be able to fund maturities of debt from Net cash provided by operating activities, short-term investments, existing cash balances and available credit facilities.

At March 31, 2015 and 2014, we were in compliance with all debt covenants and provisions related to potential defaults.

Sale of noncontrolling interests. We received \$37 in proceeds during the first quarter of 2015, of which \$34 related to TMAC's private placements to raise funds and \$3 was for the remaining payment from the government of Suriname for the 25% ownership in the Merian project.

Funding from noncontrolling interests. We received \$47 in funding during the first quarter of 2015 for the Merian project.

Acquisition of noncontrolling interests. In the first quarter of 2015 and 2014, we advanced certain funds to PTPI, an unrelated noncontrolling shareholder of PTNNT, in accordance with a loan agreement. Our economic interest in PTNNT did not change as a result of these transactions.

Dividends paid to common stockholders. We declared regular quarterly dividends totaling \$0.025 and \$0.150 per common share for the three months ended March 31, 2015 and 2014, respectively. We paid dividends of \$12 and \$77 to common stockholders in the first quarter of 2015 and 2014, respectively.

Restricted cash and other. In the first quarter of 2015, we classified \$55 as restricted cash at PTNNT, of which \$45 was for a revolving credit facility payment that will be paid during the second quarter of 2015 and \$10 was for a reclamation bond. In the first quarter of 2014 we classified \$4 as restricted cash, primarily at Ghana.

Discontinued Operations

Net operating cash used in discontinued operations was \$3 in the first quarters of 2015 and 2014 and related to payments on the Holt property royalty.

Off-Balance Sheet Arrangements

We have the following off-balance sheet arrangements: operating leases (as discussed in Note 27 to the Consolidated Financial Statements for the year ended December 31, 2014, filed on February 20, 2015 on Form 10-K) and \$1,879 of outstanding letters of credit, surety bonds and bank guarantees (see Note 25 to the Condensed Consolidated Financial Statements). At March 31, 2015, \$75 of the \$3,000 corporate revolving credit facility was used to secure the issuance of letters of credit, primarily supporting reclamation obligations.

Table of Contents

We also have sales agreements or commitments to sell copper and gold concentrates at market prices as follows (in thousands of tons):

	2015	2016	2017	2018	2019	Thereafter
Batu Hijau	604	-	—	—	—	—
Boddington	165	215	209	165	66	66
Phoenix	41	71	-	—	—	—
	810	286	209	165	66	66

Other Liquidity Matters

At March 31, 2015, the Company had \$2,598 in cash and cash equivalents, of which \$1,522 was held in foreign subsidiaries and is primarily held in U.S. dollar denominated accounts with the remainder in foreign currencies readily convertible to U.S. dollars. At March 31, 2015, \$574 of the consolidated cash and cash equivalents was attributable to noncontrolling interests primarily related to our Indonesian and Peruvian operations which is being held to fund those operations and development projects. At March 31, 2015, \$1,402 in consolidated cash and cash equivalents (\$858 attributable to Newmont) was held at certain foreign subsidiaries that, if repatriated, may be subject to withholding taxes. The repatriation of this cash and the applicable withholding taxes would generate foreign tax credits in the U.S. As a result, we expect that there would be no additional tax burden upon repatriation after considering the cash cost associated with the withholding taxes.

We believe that our liquidity and capital resources from U.S. operations and flow-through foreign subsidiaries are adequate to fund our U.S. operations and corporate activities.

Environmental

Our mining and exploration activities are subject to various federal and state laws and regulations governing the protection of the environment. We have made, and expect to make in the future, expenditures to comply with such laws and regulations, but cannot predict the full amount of such future expenditures. At March 31, 2015 and December 31, 2014, \$1,512 and \$1,497, respectively, were accrued for reclamation costs relating to currently or recently producing mineral properties.

In addition, we are involved in several matters concerning environmental obligations associated with former mining activities. Based upon our best estimate of our liability for these matters, \$172 and \$192 were accrued for such obligations at March 31, 2015 and December 31, 2014, respectively. We spent \$21 and \$5 during the first quarter of 2015 and 2014, respectively, for environmental obligations related to the former, primarily historic, mining activities and have classified \$25 as a current liability at March 31, 2015.

During the first quarter of 2015 and 2014, capital expenditures were approximately \$37 and \$15, respectively, to comply with environmental regulations. Ongoing costs to comply with environmental regulations have not been a significant component of operating costs.

For more information on the Company's reclamation and remediation liabilities, see Notes 4 and 25 to the Condensed Consolidated Financial Statements.

Accounting Developments

For a discussion of Recently Adopted and Recently Issued Accounting Pronouncements, see Note 2 to the Condensed Consolidated Financial Statements.

Non-GAAP Financial Measures

Non-GAAP financial measures are intended to provide additional information only and do not have any standard meaning prescribed by generally accepted accounting principles (“GAAP”). These measures should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP.

Earnings before interest, taxes and depreciation and amortization and Adjusted earnings before interest, taxes and depreciation and amortization

Management of the Company uses Earnings before interest, taxes and depreciation and amortization (“EBITDA”) and EBITDA adjusted for non-core or unusual items (“Adjusted EBITDA”) as non-GAAP measures to evaluate the Company’s operating performance. EBITDA and Adjusted EBITDA are non-U.S. GAAP measures. EBITDA and Adjusted EBITDA do not represent, and

Table of Contents

should not be considered an alternative to, net earnings (loss), operating earnings (loss), or cash flow from operations as those terms are defined by GAAP, and does not necessarily indicate whether cash flows will be sufficient to fund cash needs. Although Adjusted EBITDA and similar measures are frequently used as measures of operations and the ability to meet debt service requirements by other companies, our calculation of Adjusted EBITDA is not necessarily comparable to such other similarly titled captions of other companies. The Company believes that Adjusted EBITDA provides useful information to investors and others in understanding and evaluating our operating results in the same manner as our management and board of directors. Management's determination of the components of Adjusted EBITDA are evaluated periodically and based, in part, on a review of non-GAAP financial measures used by mining industry analysts. Net income (loss) attributable to Newmont stockholders is reconciled to Earnings before interest, taxes and depreciation and amortization and Adjusted earnings before interest, taxes and depreciation and amortization as follows:

	Three Months Ended March 31,	
	2015	2014
Net income (loss) attributable to Newmont stockholders	\$183	\$100
Net loss (income) attributable to noncontrolling interests	46	(52)
Income (loss) from discontinued operations	(8)	17
Equity income (loss) of affiliates	9	-

Table of Contents

Adjusted net income (loss)

Management of the Company uses Adjusted net income (loss) to evaluate the Company's operating performance, and for planning and forecasting future business operations. The Company believes the use of Adjusted net income (loss) allows investors and analysts to compare results of the continuing operations of the Company and its direct and indirect subsidiaries relating to the production and sale of minerals to similar operating results of other mining companies, by excluding exceptional or unusual items. The net income (loss) adjustments are presented net of tax generally at Company's statutory effective tax rate of 35% and net of our partners' noncontrolling interests when applicable. The corollary impact of the adjustments through the Company's Valuation allowance is shown separately. Management's determination of the components of Adjusted net income (loss) are evaluated periodically and based, in part, on a review of non-GAAP financial measures used by mining industry analysts. Net income (loss) attributable to Newmont stockholders is reconciled to Adjusted net income (loss) as follows:

	Three Months Ended March 31,	
	2015	2014
Net income (loss) attributable to Newmont stockholders	\$183	\$100
Loss (income) from discontinued operations ⁽¹⁾	(8)	17
Impairments and loss provisions ⁽²⁾	37	1
Tax valuation allowance	44	13
Restructuring and other ⁽³⁾	2	3
Asset sales ⁽⁴⁾	(29)	(13)
Adjusted net income (loss)	\$229	\$121
Net income (loss) per share, basic	\$0.37	\$0.20
Loss (income) from discontinued operations, net of taxes	(0.01)	0.03
Impairments and loss provisions, net of taxes	0.07	-
Tax valuation allowance	0.09	0.03
Restructuring and other, net of taxes	-	0.01
Asset sales, net of taxes	(0.06)	(0.03)
Adjusted net income (loss) per share, basic	\$0.46	\$0.24
Net income (loss) per share, diluted	\$0.37	\$0.20
Loss (income) from discontinued operations, net of taxes	(0.01)	0.03
Impairments and loss provisions, net of taxes	0.07	-
Tax valuation allowance	0.09	0.03
Restructuring and other, net of taxes	-	0.01
Asset sales, net of taxes	(0.06)	(0.03)
Adjusted net income (loss) per share, diluted	\$0.46	\$0.24
Weighted average common shares (millions):		
Basic	499	498
Diluted	500	499

⁽¹⁾Loss (income) from discontinued operations is presented net of tax \$4 and (\$8) expense (benefit), respectively.

⁽²⁾Impairments and loss provisions is presented net of tax (\$20) and nil expense (benefit), respectively.

⁽³⁾Restructuring and other is present net of tax (\$2) and (\$2) expense (benefit), respectively and amounts attributed to noncontrolling interest income (expense) of (\$1) and (\$2), respectively.

⁽⁴⁾Asset sales are presented net of tax \$15 and \$36 expense (benefit), respectively.

Costs applicable to sales per ounce/pound

Costs applicable to sales per ounce/pound are non-GAAP financial measures. These measures are calculated by dividing the costs applicable to sales of gold and copper by gold ounces or copper pounds sold, respectively. These measures are calculated on a consistent basis for the periods presented on a consolidated basis. Costs applicable to sales per ounce/pound statistics are intended to provide additional information only and do not have any standardized meaning prescribed by GAAP and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. The measures are not necessarily indicative of operating profit or cash flow from operations as determined under GAAP. Other companies may calculate these measures differently.

Table of Contents

The following tables reconcile these non-GAAP measures to the most directly comparable GAAP measures.

Costs applicable to sales per ounce

	Three Months Ended March 31,	
	2015	2014
Costs applicable to sales ⁽¹⁾	\$834	\$960
Gold sold (thousand ounces):	1,367	1,278
Costs applicable to sales per ounce	\$609	\$751

⁽¹⁾Includes by-product credits of \$14 and \$19 in the first quarter of 2015 and 2014, respectively.

Costs applicable to sales per pound

	Three Months Ended March 31,	
	2015	2014
Costs applicable to sales ⁽¹⁾	\$185	\$123
Copper sold (million pounds):	139	45
Costs applicable to sales per pound:	\$1.33	\$2.71

⁽¹⁾Includes by-product credits of \$6 and \$4 in the first quarter of 2015 and 2014, respectively.

All-In Sustaining Costs

Newmont has worked to develop a metric that expands on GAAP measures such as cost of goods sold and non-GAAP measures to provide visibility into the economics of our mining operations related to expenditures, operating performance and the ability to generate cash flow from operations.

Current GAAP-measures used in the mining industry, such as cost of goods sold, do not capture all of the expenditures incurred to discover, develop, and sustain gold production. Therefore, we believe that all-in sustaining costs is a non-GAAP measure that provides additional information to management, investors, and analysts that aid in the understanding of the economics of our operations and performance compared to other producers and in the investor's visibility by better defining the total costs associated with production.

All-in sustaining cost ("AISC") amounts are intended to provide additional information only and do not have any standardized meaning prescribed by GAAP and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. The measures are not necessarily indicative of operating profit or cash flow from operations as determined under GAAP. Other companies may calculate these measures differently as a result of differences in the underlying accounting principles, policies applied and in accounting frameworks such as in International Financial Reporting Standards ("IFRS"), or by reflecting the benefit from selling non-gold metals as a reduction to AISC. Differences may also arise related to definitional differences of sustaining versus development capital activities based upon each company's internal policies.

The following disclosure provides information regarding the adjustments made in determining the all-in sustaining costs measure:

Cost Applicable to Sales - Includes all direct and indirect costs related to current gold production incurred to execute the current mine plan. Costs Applicable to Sales (“CAS”) includes by-product credits from certain metals obtained during the process of extracting and processing the primary ore-body. CAS is accounted for on an accrual basis and excludes Amortization and Reclamation and remediation, which is consistent with our presentation of CAS on the Statement of Consolidated Income. In determining AISC, only the CAS associated with producing and selling an ounce of gold is included in the measure. Therefore, the amount of gold CAS included in AISC is derived from the CAS presented in the Company’s Statement of Consolidated Income less the amount of CAS attributable to the production of copper at our Phoenix, Boddington and Batu Hijau mines. The copper CAS at those mine sites is disclosed in Note 3 – Segments that accompanies the Consolidated Financial Statements. The allocation of CAS between gold and copper at the Phoenix, Boddington and Batu Hijau mines is based upon the relative sales percentage of copper and gold sold during the period.

Remediation Costs - Includes accretion expense related to asset retirement obligations (“ARO”) and the amortization of the related Asset Retirement Cost (“ARC”) for the Company’s operating properties recorded as an ARC asset. Accretion related to ARO and the amortization of the ARC assets for reclamation and remediation do not reflect annual cash outflows but are calculated in

Table of Contents

accordance with GAAP. The accretion and amortization reflect the periodic costs of reclamation and remediation associated with current gold production and are therefore included in the measure. The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Phoenix, Boddington and Batu Hijau mines.

Advanced Projects and Exploration - Includes incurred expenses related to projects that are designed to increase or enhance current gold production and gold exploration. We note that as current resources are depleted, exploration and advance projects are necessary for us to replace the depleting reserves or enhance the recovery and processing of the current reserves. As this relates to sustaining our gold production, and is considered a continuing cost of a mining company, these costs are included in the AISC measure. These costs are derived from the Advanced projects, research and development and Exploration amounts presented in the Company's Statement of Consolidated Income less the amount attributable to the production of copper at our Phoenix, Boddington and Batu Hijau mines. The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Batu Hijau, Boddington and Phoenix mines.

General and Administrative - Includes cost related to administrative tasks not directly related to current gold production, but rather related to support our corporate structure and fulfilling our obligations to operate as a public company. Including these expenses in the AISC metric provides visibility of the impact that general and administrative activities have on current operations and profitability on a per ounce basis.

Other Expense, net - Includes costs related to regional administration and community development to support current gold production. We exclude certain exceptional or unusual expenses from Other expense, net, such as restructuring, as these are not indicative to sustaining our current gold operations. Furthermore, this adjustment to Other expense, net is also consistent with the nature of the adjustments made to Net income (loss) as disclosed in the Company's non-GAAP financial measure Adjusted net income (loss). The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Phoenix, Boddington and Batu Hijau mines.

Treatment and Refining Costs - Includes costs paid to smelters for treatment and refining of our concentrates to produce the salable precious metal. These costs are presented net as a reduction of Sales.

Sustaining Capital - We determined sustaining capital as those capital expenditures that are necessary to maintain current gold production and execute the current mine plan. Capital expenditures to develop new operations, or related to projects at existing operations where these projects will enhance gold production or reserves, are considered development. We determined the breakout of sustaining and development capital costs based on a systematic review of our project portfolio in light of the nature of each project. Sustaining capital costs are relevant to the AISC metric as these are needed to maintain the Company's current gold operations and provide improved transparency related to our ability to finance these expenditures from current operations. The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Batu Hijau, Boddington and Phoenix mines.

- (7) On October 6, 2014, the Company sold its 44% interest in La Herradura.
- (8) The Jundee mine was sold July 1, 2014.

Table of Contents

Operating margin per ounce/pound

Operating margin per ounce/pound are non-GAAP financial measures. These measures are calculated by subtracting the costs applicable to sales per ounce of gold and per pound of copper from the average realized gold price per ounce and copper price per pound, respectively. These measures are calculated on a consistent basis for the periods presented on a consolidated basis. Operating margin per ounce/pound statistics are intended to provide additional information only and do not have any standardized meaning prescribed by GAAP and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. The measures are not necessarily indicative of operating profit or cash flow from operations as determined under GAAP. Other companies may calculate these measures differently. Operating margin per ounce/pound is calculated as follows:

	Gold Three Months Ended March 31, 2015 2014	
Average realized price per ounce	\$1,203	\$1,293
Costs applicable to sales per ounce	(609)	(751)
	\$594	\$542

	Copper Three Months Ended March 31, 2015 2014	
Average realized price per pound	\$2.34	\$2.50
Costs applicable to sales per pound	(1.33)	(2.71)
	\$1.01	\$(0.21)

Safe Harbor Statement

Certain statements contained in this report (including information incorporated by reference) are “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and are intended to be covered by the safe harbor provided for under these sections. Our forward-looking statements may include, without limitation: (a) statements regarding future earnings, and the sensitivity of earnings to gold and other metal prices; (b) estimates of future mineral production and sales for specific operations and on a consolidated basis; (c) estimates of future production costs and other expenses, for specific operations and on a consolidated basis; (d) estimates of future cash flows and the sensitivity of cash flows to gold and other metal prices; (e) estimates of future capital expenditures and other cash needs for specific operations and on a consolidated basis and expectations as to the funding thereof; (f) statements as to the projected development of certain ore deposits, including estimates of development and other capital costs, financing plans for these deposits, and expected production commencement dates; (g) estimates of future costs and other liabilities for certain environmental matters; (h) estimates of reserves, and statements regarding future exploration results and reserve

replacement; (i) statements regarding modifications to Newmont's hedge positions; (j) statements regarding future transactions relating to portfolio management or rationalization efforts; and (k) projected synergies and costs associated with acquisitions and related matters.

Where we express an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, our forward-looking statements are subject to risks, uncertainties, and other factors, which could cause actual results to differ materially from future results expressed, projected, or implied by those forward-looking statements. Important factors that could cause actual results to differ materially from such forward-looking statements ("cautionary statements") are disclosed under "Risk Factors" in the Newmont Annual Report on Form 10-K for the year ended December 31, 2013, as well as in other filings with the Securities and Exchange Commission. Many of these factors are beyond Newmont's ability to control or predict. Given these uncertainties, readers are cautioned not to place undue reliance on our forward-looking statements.

All subsequent written and oral forward-looking statements attributable to Newmont or to persons acting on its behalf are expressly qualified in their entirety by the cautionary statements. Newmont disclaims any intention or obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable securities laws.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

(dollars in millions, except per ounce and per pound amounts).

Metal Prices

Changes in the market price of gold significantly affect our profitability and cash flow. Gold prices can fluctuate widely due to numerous factors, such as demand; forward selling by producers; central bank sales, purchases and lending; investor sentiment; the strength of the U.S. dollar; inflation, deflation, or other general price instability; and global mine production levels. Changes in the market price of copper also affect our profitability and cash flow. Copper is traded on established international exchanges and copper prices generally reflect market supply and demand, but can also be influenced by speculative trading in the commodity or by currency exchange rates.

Decreases in the market price of gold and copper can also significantly affect the value of our product inventory and stockpiles and it may be necessary to record a write-down to the net realizable value (“NRV”). NRV represents the estimated future sales price based on short-term and long-term metals prices, less estimated costs to complete production and bring the product to sale. The primary factors that influence the need to record write-downs of stockpiles and product inventory include short-term and long-term metals prices and costs for production inputs such as labor, fuel and energy, materials and supplies, as well as realized ore grades and recovery rates. The significant assumptions in determining the stockpile NRV for each mine site reporting unit at March 31, 2015 included production cost and capitalized expenditure assumptions unique to each operation, a long-term gold price of \$1,300 per ounce, a long-term copper price of \$3.00 per pound and an Australian to U.S. dollar exchange rate of \$0.87.

The NRV measurement involves the use of estimates and assumptions unique to each mining operation regarding current and future operating and capital costs, metal recoveries, production levels, commodity prices, proven and probable reserve quantities, engineering data and other factors. A high degree of judgment is involved in determining such assumptions and estimates and no assurance can be given that actual results will not differ significantly from those estimates and assumptions.

Hedging

Our strategy is to provide shareholders with leverage to changes in gold and copper prices by selling our production at spot market prices. Consequently, we do not hedge our gold and copper sales. We have and will continue to manage certain risks associated with commodity input costs, interest rates and foreign currencies using the derivative market.

By using derivatives, we are affected by credit risk, market risk and market liquidity risk. Credit risk is the risk that a third party might fail to fulfill its performance obligations under the terms of a financial instrument. We mitigate credit risk by entering into derivatives with high credit quality counterparties, limiting the amount of exposure to each counterparty, and monitoring the financial condition of the counterparties. Market risk is the risk that the fair value of a derivative might be adversely affected by a change in underlying commodity prices, interest rates, or currency exchange rates, and that this in turn affects our financial condition. We manage market risk by establishing and monitoring parameters that limit the types and degree of market risk that may be undertaken. We mitigate this potential risk to our financial condition by establishing trading agreements with counterparties under which we are not required to post any collateral or make any margin calls on our derivatives. Our counterparties cannot require settlement solely because of an adverse change in the fair value of a derivative. Market liquidity risk is the risk that a derivative cannot be eliminated quickly, by either liquidating it or by establishing an offsetting position. Under the terms of our trading agreements, counterparties cannot require us to immediately settle outstanding derivatives, except upon the occurrence of customary events of default such as covenant breaches, including financial covenants, insolvency or bankruptcy. We further mitigate market liquidity risk by spreading out the maturity of our derivatives over time.

Table of Contents

Cash Flow Hedges

Foreign Currency Exchange Risk

We had the following foreign currency derivative contracts outstanding at March 31, 2015:

	Expected Maturity Date				Total/Average
	2015	2016	2017	2018	
A\$ Operating Fixed Forward Contracts:					
A\$ notional (millions)	197	158	105	6	466
Average rate (\$/A\$)	0.97	0.95	0.93	0.92	0.96
Expected hedge ratio	21 %	12 %	8 %	4 %	
NZ\$ Operating Fixed Forward Contracts:					
NZ\$ notional (millions)	38	12	-	-	50
Average rate (\$/NZ\$)	0.80	0.80	-	-	0.80
Expected hedge ratio	41 %	15 %	-	-	

The fair value of the A\$ foreign currency operating derivative contracts was a net liability position of \$96 at March 31, 2015 and \$85 at December 31, 2014. The fair value of the NZ\$ foreign currency derivative contracts was a net liability position of \$3 at March 31, 2015 and \$3 at December 31, 2014.

Diesel Price Risk

We had the following diesel derivative contracts outstanding at March 31, 2015:

	Expected Maturity Date				Total/Average
	2015	2016	2017		
Diesel Fixed Forward Contracts:					
Diesel gallons (millions)	17	15	4		36
Average rate (\$/gallon)	2.71	2.62	2.69		2.67
Expected Nevada hedge ratio	58 %	36 %	12 %		

The fair value of the Diesel derivative contracts was a net liability position of \$33 at March 31, 2015 and \$36 at December 31, 2014.

Commodity Price Risk

Our provisional gold and copper sales contain an embedded derivative that is required to be separated from the host contract for accounting purposes. The host contract is the receivable from the sale of the gold and copper concentrates at the prevailing indices' prices at the time of sale. The embedded derivative, which does not qualify for hedge accounting, is marked to market through earnings each period prior to final settlement.

At March 31, 2015, Newmont had gold sales of 161,000 ounces priced at an average of \$1,187 per ounce, subject to final pricing over the next several months. Each \$25 change in the price for provisionally priced gold sales would have an approximate \$2 effect on our net income (loss) attributable to Newmont stockholders. The London P.M. closing settlement price at March 31, 2015 for gold was \$1,187 per ounce.

At March 31, 2015, Newmont had copper sales of 157 million pounds priced at an average of \$2.73 per pound, subject to final pricing over the next several months. Each \$0.10 change in the price for provisionally priced copper sales would have an approximate \$6 effect on our net income (loss) attributable to Newmont stockholders. The LME closing settlement price at March 31, 2015 for copper was \$2.74 per pound.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES.

During the fiscal period covered by this report, the Company's management, with the participation of the Chief Executive Officer and Chief Financial Officer of the Company, carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act")). Based on such evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the required time periods and are designed to ensure that information required to be disclosed in its reports is accumulated and communicated to the Company's management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

There has been no change in the Company's internal control over financial reporting that occurred during the quarter ended March 31, 2015, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

March 1, 2015 through March 31, 2015	8,041	(1) 26.06	-	N/A

(1) Represents shares delivered to the Company from restricted stock units held by a Company employee upon vesting for the purpose of covering the recipient's tax withholding obligations.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

None.

ITEM 4. MINE SAFETY DISCLOSURES.

At Newmont, safety is a core value and we strive for superior performance. Our health and safety management system, which includes detailed standards and procedures for safe production, addresses topics such as employee training, risk management, workplace inspection, emergency response, accident investigation and program auditing. In addition to strong leadership and involvement from all levels of the organization, these programs and procedures form the cornerstone of safety at Newmont, ensuring that employees are provided a safe and healthy environment and are intended to reduce workplace accidents, incidents and losses, comply with all mining-related regulations and provide support for both regulators and the industry to improve mine safety.

In addition, we have established our “Rapid Response” process to mitigate and prevent the escalation of adverse consequences if existing risk management controls fail, particularly if an incident may have the potential to seriously impact the safety of employees, the community or the environment. This process provides appropriate support to an affected site to complement their technical response to an incident, so as to reduce the impact by considering the environmental, strategic, legal, financial and public image aspects of the incident, to ensure communications are being carried out in accordance with legal and ethical requirements and to identify actions in addition to those addressing the immediate hazards.

The operation of our U.S. based mines is subject to regulation by the Federal Mine Safety and Health Administration (“MSHA”) under the Federal Mine Safety and Health Act of 1977 (the “Mine Act”). MSHA inspects our mines on a regular basis and issues various citations and orders when it believes a violation has occurred under the Mine Act. Following passage of The Mine Improvement and New Emergency Response Act of 2006, MSHA significantly increased the numbers of citations and orders charged against mining operations. The dollar penalties assessed for citations issued has also increased in recent years.

Newmont is required to report certain mine safety violations or other regulatory matters required by Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K, and that required information is included in Exhibit 95 and is incorporated by reference into this Quarterly Report.
