WEATHERFORD INTERNATIONAL PLC AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. General

The accompanying unaudited Condensed Consolidated Financial Statements of Weatherford International plc (the “Company”) are prepared in accordance with generally accepted accounting principles in the United States of America (“U.S. GAAP”) and include all adjustments which, in our opinion, are considered necessary to present fairly our Condensed Consolidated Balance Sheets at September 30, 2017 and December 31, 2016, and Condensed Consolidated Statements of Operations, Condensed Consolidated Statements of Comprehensive Loss for the three and nine months ended September 30, 2017 and 2016 and Condensed Consolidated Statements of Cash Flows for the nine months ended September 30, 2017 and 2016. When referring to “Weatherford” and using phrases such as “we,” “us,” and “our,” the intent is to refer to Weatherford International plc, a public limited company organized under the law of Ireland, and its subsidiaries as a whole or on a regional basis, depending on the context in which the statements are made.

Although we believe the disclosures in these financial statements are adequate, certain information relating to our organization and footnote disclosures normally included in financial statements prepared in accordance with U.S. GAAP have been condensed or omitted in this Form 10-Q pursuant to U.S. Securities and Exchange Commission (“SEC”) rules and regulations. These financial statements should be read in conjunction with the audited Consolidated Financial Statements for the year ended December 31, 2016 included in our Annual Report on Form 10-K. The results of operations for the three and nine months ended September 30, 2017 are not necessarily indicative of the results expected for the year ending December 31, 2017.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, the reported amounts of revenues and expenses during the reporting period, and disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates and assumptions, including those related to uncollectible accounts receivable, lower of cost or net realizable value for inventories, equity investments, derivative financial instruments, intangible assets and goodwill, property, plant and equipment (PP&E), income taxes, percentage-of-completion accounting for long-term contracts, self-insurance, foreign currency exchange rates, pension and post-retirement benefit plans, disputes, litigation, contingencies and share-based compensation. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ from those estimates.

Principles of Consolidation

We consolidate all wholly-owned subsidiaries, controlled joint ventures and variable interest entities where the Company has determined it is the primary beneficiary. Investments in affiliates in which we exercise significant influence over operating and financial policies are accounted for using the equity method. All material intercompany accounts and transactions have been eliminated in consolidation.

Reclassifications

Certain prior year cash flow amounts have been reclassified to conform to the current year presentation related to the adoption of new accounting standards. Net income and shareholders’ equity were not affected by these

reclassifications. See “Note 18 – New Accounting Pronouncements” for additional details.

Table of Contents

Revenue Recognition

In the second quarter of 2017, the Company changed its accounting for revenue with our largest customer in Venezuela to record a discount reflecting the time value of money and accrete the discount as interest income over the expected collection period using the effective interest method. In connection with this development, the Company corrected this immaterial error for the three and six month periods ended June 30, 2017. The impact of the correction decreased revenue and increased interest income by approximately \$31 million and \$4 million, respectively, for the three month period ended June 30, 2017 and reduced accounts receivable by approximately \$27 million as of June 30, 2017. As of September 30, 2017, to reflect the impact of payment delays and expectation that the time to collect may exceed one year, we reclassified \$158 million of accounts receivable related to this customer in Other Non-Current Assets on the accompanying Condensed Consolidated Balance Sheets.

While we are continuing to experience delays with collections on our outstanding receivables with this customer, we believe the amounts are fully collectible based on the financial position and solvency of this customer and the dependence of the Venezuelan economy on oil production from this customer. We also considered our collections history with this customer and lack of historical material allowances or write-offs to our receivables balances. Our assumptions and related judgments are sensitive to the continued significant political and economic turmoil in Venezuela. If conditions continue to deteriorate, we may be required to record allowances or write-offs to our receivables balances that could have a material impact on our financial position and results of operations.

Currency Devaluation Charges

Currency devaluation charges are included in current earnings in “Currency Devaluation Charges” on the accompanying Condensed Consolidated Statements of Operations. In the first nine months of 2016, currency devaluation charges of \$31 million reflected the impact of the devaluation of the Angolan kwanza. In the third quarter and the first nine months of 2017, we had no currency devaluation charges.

2. Business Combinations and Divestitures

Held for Sale

On March 24, 2017, we entered a master formation agreement with affiliates of Schlumberger Limited (“Schlumberger”) to form a joint venture named “OneStim” which will provide completion products and services for the development of unconventional land reservoirs in the United States and Canada. Under the terms of the master formation agreement, both parties will contribute their respective pressure pumping assets, multistage completions, and pump-down perforating businesses on land in the lower contiguous 48 states of the United States and the provinces of British Columbia, Saskatchewan, Manitoba and Alberta in Canada. In addition, we will contribute manufacturing facilities and supply chain resources to OneStim, and Schlumberger will provide the joint venture with access to its surface and downhole technologies and advanced geo-engineered workflows. At closing we will receive a one-time \$535 million cash payment from Schlumberger, subject to agreed purchase price adjustments and will own a 30% equity interest in the OneStim joint venture while Schlumberger will own 70%. The transaction is expected to close in the fourth quarter of 2017 and is subject to regulatory approvals and other customary closing conditions. The carrying amounts of the major classes of assets and liabilities from our North America segment to be contributed to OneStim have been classified as held for sale in the table below.

Table of Contents

	September 30, 2017
(Dollars in millions)	
Assets Held for Sale:	
Inventory, Net	\$ 89
Property, Plant and Equipment, Net	261
Goodwill	559
Total Assets	\$ 909
Liabilities Held for Sale:	
Long-term Debt	\$ 28
Other Liabilities	26
Total Liabilities	\$ 54

As of September 30, 2017, we also had \$26 million of PP&E held for sale unrelated to the OneStim joint venture.

3. Restructuring Charges

Due to the ongoing lower than anticipated levels of exploration and production spending, we continue to reduce our overall cost structure and workforce to better align with current activity levels. The ongoing cost reduction plans, which began in 2016 and is continuing through 2017 (the “2016 Plan”), included a workforce reduction and other cost reduction measures initiated across our geographic regions.

In connection with the 2016 Plan, we recognized restructuring charges of \$34 million and \$140 million in the third quarter and the first nine months of 2017, respectively, which include termination (severance) charges of \$15 million and \$71 million, respectively, and other restructuring charges of \$19 million and \$57 million, respectively. Other restructuring charges include contract termination costs, relocation and other associated costs. The first nine months of 2017 also includes restructuring related asset charges of \$12 million.

Also in connection with the 2016 Plan, we recognized restructuring charges of \$22 million and \$150 million in the third quarter and the first nine months of 2016, respectively, which include termination (severance) charges of \$18 million and \$126 million, respectively, and other restructuring charges of \$4 million and \$24 million, respectively. Other restructuring charges include contract termination costs, relocation and other associated costs.

The following tables present the components of restructuring charges by segment for the third quarter and the first nine months of 2017 and 2016.

Total severance and other restructuring liability	\$ 86	\$128	\$ (129)	\$ (27)	\$ 58

4. Percentage-of-Completion Contracts

We account for our long-term early production facility construction contracts in Iraq under the percentage-of-completion method. In the third quarter and the first nine months of 2017, there was no change to our cumulative estimated loss since December 31, 2016. Our net billings in excess of costs as of September 30, 2017 were \$47 million and are shown in the “Other Current Liabilities” on the accompanying Condensed Consolidated Balance Sheets.

On May 26, 2016, we entered into an agreement with our customer containing the terms and conditions of the settlement on the Zubair contract which included variation order requests, claims for extension of time, payments of remaining contract milestones and new project completion timelines that resulted in relief from the liquidated damages provisions. The settlement paid to us was a gross amount of \$150 million, of which we received \$62 million in the second quarter of 2016, \$72 million in the third quarter of 2016 and \$16 million in the first quarter of 2017.

In the third quarter and the first nine months of 2016, we were break-even for our Zubair contract. As of September 30, 2016, cumulative estimated losses on our Iraq projects were \$532 million, project estimates included

no claims revenue, \$25 million in approved change orders and \$25 million of back charges.

Table of Contents

5. Accounts Receivable Factoring and Other Receivables

From time to time, we participate in factoring arrangements to sell accounts receivable to third-party financial institutions. In the first nine months of 2017, we sold accounts receivable of \$150 million and recognized a loss of approximately \$1 million on these sales. We received cash proceeds totaling \$148 million. In the first nine months of 2016, we sold approximately \$102 million and recognized a loss of \$0.4 million. Our factoring transactions in the first nine months of 2017 and 2016 were recognized as sales, and the proceeds are included as operating cash flows in our Condensed Consolidated Statements of Cash Flows.

In the first quarter of 2017, Weatherford converted trade receivables of \$65 million into a note from the customer with a face value of \$65 million. The note had a three year term at a 4.625% stated interest rate. We reported the note as a trading security within "Other Current Assets" at fair value on the Condensed Consolidated Balance Sheets at its fair value of \$58 million on March 31, 2017. The note fair value was considered a Level 2 valuation and was estimated using secondary market data for similar bonds. During the second quarter of 2017, we sold the note for \$59 million.

6. Inventories, Net

Inventories, net of reserves, by category were as follows:

(Dollars in millions)	September 30, 2017	December 31, 2016
Raw materials, components and supplies	\$ 145	\$ 168
Work in process	70	49
Finished goods	1,537	1,585
	\$ 1,752	\$ 1,802

We recognized inventory charges, including excess and obsolete and non-recurring inventory charges, totaling \$66 million and \$213 million in the first nine months of 2017 and 2016, respectively.

7. Long-Lived Asset Impairments

In the first nine months of 2017, we had no long-lived asset impairment charges. During the third quarter of 2016, we recognized long-lived asset impairment charges of \$436 million, of which \$388 million was related to product line PP&E impairments and \$48 million was related to the impairment of intangible assets. The PP&E impairment charges were related to our MENA/Asia Pacific Pressure Pumping and North America Well Construction, Drilling Services and Secure Drilling Service product lines. These impairment charges were attributed to the following segments: \$235 million in North America, \$109 million in MENA/Asia Pacific, \$12 million in Europe/SSA/Russia, \$16 million in Latin America and \$16 million in Land Drilling Rigs. The intangible asset charge is related to the Well Construction and Completions businesses with \$35 million attributable to the North America segment and \$13 million related the Europe/SSA/Russia segment.

8. Goodwill

The changes in the carrying amount of goodwill by reportable segment for the nine months ended September 30, 2017, were as follows:

(Dollars in millions)	North America	MENA/ Asia Pacific	Europe/ SSA/ Russia	Latin America	Total
Balance at December 31, 2016	\$ 1,777	\$ 189	\$ 543	\$ 288	\$ 2,797

Edgar Filing: Weatherford International plc - Form 10-Q

Reclassification to assets held for sale	(559)	—	—	—	(559)
Foreign currency translation adjustments	66	5	37	—	108
Balance at September 30, 2017	\$ 1,284	\$ 194	\$ 580	\$ 288	\$2,346

Table of Contents

9. Short-Term Borrowings and Other Debt Obligations

(Dollars in millions)	September 30, 2017	December 31, 2016
Revolving Credit Agreement	\$ 225	\$ —
Other short-term loans	28	2
Total short-term borrowings	253	2
Current portion of long-term debt and term loan agreement	138	177
Short-term borrowings and current portion of long-term debt	\$ 391	\$ 179

Revolving Credit Agreement and Secured Term Loan Agreement

At September 30, 2017, we had total commitments under our revolving credit facility (the “Revolving Credit Agreement”) maturing in July of 2019 of \$1.0 billion and borrowings of \$388 million under our secured term loan agreement (“the Term Loan Agreement and collectively with the Revolving Credit Agreement, the “Credit Agreements”) maturing in July of 2020. At September 30, 2017, we had \$691 million available under the Credit Agreements and the following table summarizes our borrowing availability under these agreements:

(Dollars in millions)	September 30, 2017
Facilities	\$ 1,388
Less uses of facilities:	
Revolving credit agreement	225
Letters of credit	84
Secured term loan before debt issuance cost	388
Borrowing Availability	\$ 691

Loans under the Credit Agreements are subject to varying interest rates based on whether the loan is Eurodollar loan or an alternate base rate loan. We also incur a quarterly facility fee on the amount of the Revolving Credit Agreement. For the three months ended September 30, 2017, the interest rate for the Revolving Credit Agreement was LIBOR plus a margin rate of 2.80%. For the three months ended September 30, 2017, the interest rate for the Term Loan Agreement was LIBOR plus a margin rate of 2.30%.

Our Credit Agreements contain customary events of default, including our failure to comply with our financial covenants. We must maintain a leverage ratio of no greater than 2.5 to 1, a leverage and letters of credit ratio of no greater than 3.5 to 1 and an asset coverage ratio of at least 4.0 to 1. At September 30, 2017, we were in compliance with these financial covenants.

Other Borrowings and Debt Activity

On June 26, 2017, we issued an additional \$250 million aggregate principal amount of our 9.875% senior notes due 2024 (“Notes”). These Notes were issued as additional securities under an indenture pursuant to which we previously issued \$540 million aggregate principal amount of our 9.875% senior notes due 2024.

We have short-term borrowings with various domestic and international institutions pursuant to uncommitted credit facilities. At September 30, 2017, we had \$28 million in short-term borrowings under these arrangements. In addition, we had \$387 million of letters of credit under various uncommitted facilities, of which \$72 million has been cash collateralized (included in “Cash and Cash Equivalents” in the accompanying Condensed Consolidated Balance Sheets), and \$59 million of surety bonds, primarily performance bonds, issued by financial sureties against an indemnification from us at September 30, 2017.

In June 2017, we repaid \$88 million of our 6.35% Senior Notes on the maturity date. At September 30, 2017, the current portion of long-term debt was primarily related to \$66 million of our 6.00% Senior Notes due March 2018, the \$50 million current portion of our Term Loan Agreement and \$22 million of current portion of capital leases and other debt.

Table of Contents

10. Fair Value of Financial Instruments

Financial Instruments Measured and Recognized at Fair Value

We estimate fair value at a price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the principal market for the asset or liability. Our valuation techniques require inputs that we categorize using a three level hierarchy, from highest to lowest level of observable inputs. Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities. Level 2 inputs are quoted prices or other market data for similar assets and liabilities in active markets, or inputs that are observable for the asset or liability, either directly or indirectly through market corroboration, for substantially the full term of the financial instrument. Level 3 inputs are unobservable inputs based upon our own judgment and assumptions used to measure assets and liabilities at fair value. Classification of a financial asset or liability within the hierarchy is determined based on the lowest level of input that is significant to the fair value measurement. Other than the derivative instruments discussed in “Note 11 – Derivative Instruments”, we had no other material assets or liabilities measured and recognized at fair value on a recurring basis at September 30, 2017 and December 31, 2016.

Fair Value of Other Financial Instruments

Our other financial instruments include cash and cash equivalents, accounts receivable, accounts payable, short-term borrowings and long-term debt. The carrying value of our cash and cash equivalents, accounts receivable, accounts payable, short-term borrowings approximates their fair value due to their short maturities. These short-term borrowings are classified as Level 2 in the fair value hierarchy.

The fair value of our long-term debt fluctuates with changes in applicable interest rates among other factors. Fair value will generally exceed carrying value when the current market interest rate is lower than the interest rate at which the debt was originally issued and will generally be less than the carrying value when the market rate is greater than the interest rate at which the debt was originally issued. The fair value of our long-term debt is classified as Level 2 in the fair value hierarchy and is established based on observable inputs in less active markets.

The fair value and carrying value of our senior notes were as follows:

(Dollars in millions)	September 30, 2017	December 31, 2016
Fair value	\$ 7,231	\$ 6,739
Carrying value	7,210	7,028

11. Derivative Instruments

From time to time, we may enter into derivative financial instrument transactions to manage or reduce our market risk. We manage our debt portfolio to achieve an overall desired position of fixed and floating rates, and we may employ interest rate swaps as a tool to achieve that goal. We enter into foreign currency forward contracts and cross-currency swap contracts to economically hedge our exposure to fluctuations in various foreign currencies. The major risks from interest rate derivatives include changes in the interest rates affecting the fair value of such instruments, potential increases in interest expense due to market increases in floating interest rates, changes in foreign exchange rates and the creditworthiness of the counterparties in such transactions.

We monitor the creditworthiness of our counterparties, which are multinational commercial banks. The fair values of all our outstanding derivative instruments are determined using a model with Level 2 inputs including quoted market prices for contracts with similar terms and maturity dates.

Warrant

During the fourth quarter of 2016, in conjunction with the issuance of 84.5 million ordinary shares, we issued a warrant that gives the holder the option to acquire an additional 84.5 million ordinary shares. The exercise price on the warrant is \$6.43 per share and is exercisable any time prior to May 21, 2019. The warrant is classified as a liability and carried at fair value with changes in its fair value reported through earnings. The warrant participates in dividends and other distributions as if the shares subject to the warrants were outstanding. In addition, the warrant permits early redemption due to a change in control.

Table of Contents

The warrant fair value is considered a Level 3 valuation and is estimated using a combination of the Black Scholes option valuation model and Monte-Carlo simulation. Inputs to these models include Weatherford's share price and volatility and the risk free interest rate. The valuation also considers the probabilities of future share issuances and anticipated issuance discounts, which are considered Level 3 inputs. The fair value of the warrant was \$156 million on December 31, 2016 and \$98 million on September 30, 2017, generating an unrealized loss of \$7 million for the third quarter of 2017 and an unrealized gain of \$58 million for the first nine months of 2017. The change in fair value of the warrant during the first nine months of 2017 was principally due to a decrease in Weatherford's stock price. The warrant valuation would be negatively affected due to an increase in the likelihood of a future share issuance.

Fair Value Hedges

We may use interest rate swaps to help mitigate exposures related to changes in the fair values of fixed-rate debt. The interest rate swap would be recorded at fair value with changes in fair value recorded in earnings. The carrying value of fixed-rate debt would be adjusted for changes in interest rates, with the changes in value recorded in earnings. After termination of the hedge, any discount or premium on the fixed-rate debt is amortized to interest expense over the remaining term of the debt. As of September 30, 2017, we did not have any fair value hedges designated.

As of September 30, 2017, we had net unamortized premiums on fixed-rate debt of \$4 million associated with fair value hedge terminations. These premiums are being amortized over the remaining term of the originally hedged debt as a reduction in interest expense included in "Interest Expense, Net" on the accompanying Condensed Consolidated Statements of Operations.

Cash Flow Hedges

In 2008, we entered into interest rate derivative instruments to hedge projected exposures to interest rates in anticipation of a debt offering. These hedges were terminated at the time of the issuance of the debt, and the associated loss is being amortized from "Accumulated Other Comprehensive Income (Loss)" to interest expense over the remaining term of the debt. As of September 30, 2017, we had net unamortized losses of \$9 million associated with our cash flow hedge terminations. As of September 30, 2017, we did not have any cash flow hedges designated.

Foreign Currency and Warrant Derivative Instruments

At September 30, 2017 and December 31, 2016, we had outstanding foreign currency forward contracts with notional amounts aggregating to \$1.2 billion and \$1.6 billion, respectively. The notional amounts of our foreign currency forward contracts do not generally represent amounts exchanged by the parties and thus are not a measure of the cash requirements related to these contracts or of any possible loss exposure. The amounts actually exchanged at maturity are calculated by reference to the notional amounts and by other terms of the derivative contracts, such as exchange rates.

Our foreign currency derivatives are not designated as hedges under ASC 815, and the changes in fair value of the contracts are recorded each period in "Other Expense, Net" on the accompanying Condensed Consolidated Statements of Operations. The total estimated fair values of our foreign currency forward contracts and warrant derivative were as follows:

(Dollars in millions)	September 30, 2017	December 31, 2016	Classification
Derivative assets not designated as hedges:			
Foreign currency forward contracts	\$ 10	\$ 7	Other Current Assets

Edgar Filing: Weatherford International plc - Form 10-Q

Derivative liabilities not designated as hedges:

Foreign currency forward contracts	(5)	(14)	Other Current Liabilities
Warrant on Weatherford Shares	(98)	(156)	Other Non-current Liabilities

Table of Contents

The amount of derivative instruments' gain or (loss) on the Condensed Consolidated Statements of Operations is in the table below.

	Three Months Ended September 30, 2017		Nine Months Ended September 30, 2016		Classification
(Dollars in millions)	\$2	\$(22)	\$(20)	\$(12)	Other Expense, Net
Foreign currency forward contracts	\$2	\$(22)	\$(20)	\$(12)	Other Expense, Net
Warrant on Weatherford Shares	(7)	—	58	—	Warrant Fair Value Adjustment

12. Income Taxes

We have historically calculated the provision for income taxes during interim reporting periods by applying an estimate of the annual effective tax rate for the full fiscal year to ordinary income or loss (pre-tax income or loss excluding unusual or infrequently occurring discrete items and pre-tax losses for which no benefit has been recognized) for the reporting period. For the three month and nine months periods ended September 30, 2017, we determined that since small changes in estimated ordinary annual income would result in significant changes in the estimated annual effective tax rate, the use of a discrete effective tax rate is appropriate for the current quarter. The discrete method treats the year-to-date period as if it was the annual period and determines the income tax expense or benefit on that basis. We will use this method each quarter until the annual effective tax rate method is deemed appropriate. For the third quarter and the first nine months of 2017, we had a tax expense of \$25 million and \$75 million, respectively, on a loss before income taxes of \$226 million and \$784 million, respectively. Results for the third quarter and the first nine months of 2017 include losses with no significant tax benefit. The tax expense for the third quarter and the first nine months of 2017 also includes withholding taxes, minimum taxes and deemed profit taxes that do not directly correlate to ordinary income or loss.

We are continuously under tax examination in various jurisdictions. We cannot predict the timing or outcome regarding resolution of these tax examinations or if they will have a material impact on our financial statements. We continue to anticipate a possible reduction in the balance of uncertain tax positions of approximately \$10 million in the next twelve months due to expiration of statutes of limitations, settlements and/or conclusions of tax examinations.

For both the third quarter and the first nine months of 2016, we had a tax expense of \$692 million and \$489 million, respectively, on a loss before income taxes of \$1.1 billion and \$2.3 billion, respectively. The primary component of the tax expense for the third quarter and first nine months of 2016 relates to the Company's conclusion that certain deferred tax assets that had previously been benefited are not more likely than not to be realized. As a result, additional valuation allowances have been established for the United States and other jurisdictions.

Our results for the third quarter of 2016 include charges with no significant tax benefit principally related to \$436 million of long-lived asset impairment, \$198 million of excess and obsolete inventory charges, \$62 million in accounts receivable reserves and write-offs, and \$44 million of other asset write-offs and charges. In addition, we recorded a tax charge of \$137 million for a non-cash tax expense related to an internal restructuring of subsidiaries.

Our results for the first nine months of 2016 also include charges with no significant tax benefit principally related to \$436 million of long-lived asset impairment, \$213 million of excess and obsolete inventory charges, \$140 million of settlement charges, \$84 million related to a note adjustment for our largest customer in Venezuela, \$78 million of bond tender premium, \$62 million in accounts receivable reserves and write-offs, \$31 million of currency devaluation related to the Angolan kwanza, \$20 million in pressure pumping business related charges, and \$15 million in supply

agreement charges related to a non-core business divestitures. In addition, we recorded a tax charge of \$526 million for the establishment of a valuation allowance, and \$137 million for a non-cash tax expense related to an internal restructuring of subsidiaries.

Table of Contents

13. Shareholders' Equity

The following summarizes our shareholders' equity activity for the first nine months of 2017 and 2016:

(Dollars in millions)	Par Value of Issued Shares	Capital in Excess of Par Value	Retained Earnings (Deficit)	Accumulated Other Comprehensive Income (Loss)	Non-controlling Interests	Total Shareholders' Equity
Balance at December 31, 2015	\$ 1	\$ 5,502	\$ 442	\$ (1,641)	\$ 61	\$ 4,365
Net Income (Loss)	—	—	(2,843)	—	14	(2,829)
Other Comprehensive Income	—	—	—	92	—	92
Dividends Paid to Noncontrolling Interests	—	—	—	—	(15)	(15)
Issuance of Common Shares	—	623	—	—	—	623
Issuance of Exchangeable Notes	—	97	—	—	—	97
Equity Awards Granted, Vested and Exercised	—	51	—	—	—	51
Other	—	—	—	—	(1)	(1)
Balance at September 30, 2016	\$ 1	\$ 6,273	\$ (2,401)	\$ (1,549)	\$ 59	\$ 2,383
Balance at December 31, 2016	\$ 1	\$ 6,571	\$ (2,950)	\$ (1,610)	\$ 56	\$ 2,068
Net Income (Loss)	—	—	(875)	—	16	(859)
Other Comprehensive Income	—	—	—	121	—	121
Dividends Paid to Noncontrolling Interests	—	—	—	—	(16)	(16)
Equity Awards Granted, Vested and Exercised	—	70	—	—	—	70
Balance at September 30, 2017	\$ 1	\$ 6,641	\$ (3,825)	\$ (1,489)	\$ 56	\$ 1,384

In March 2016, we issued 115 million ordinary shares, and the amount in excess of par value of \$623 million is reported in "Capital in Excess of Par Value" on the accompanying Condensed Consolidated Balance Sheets.

On June 7, 2016, we issued exchangeable notes with a par value of \$1.265 billion. The exchange feature carrying value of \$97 million is included in the line captioned "Capital in Excess of Par Value" on the accompanying Condensed Consolidated Balance Sheets.

Table of Contents

The following table presents the changes in our accumulated other comprehensive loss by component for the first nine months of 2017 and 2016:

(Dollars in millions)	Currency Translation Adjustment	Defined Benefit Pension	Deferred Loss on Derivatives	Total
Balance at December 31, 2015	\$ (1,602)	\$ (29)	\$ (10)	\$ (1,641)
Other Comprehensive Income before Reclassifications	90	1	—	91
Reclassifications	—	—	1	1
Net activity	90	1	1	92
Balance at September 30, 2016	\$ (1,512)	\$ (28)	\$ (9)	\$ (1,549)
Balance at December 31, 2016	\$ (1,614)	\$ 13	\$ (9)	\$ (1,610)
Other Comprehensive Income before Reclassifications	165	—	—	165
Reclassifications	—	(44)	—	(44)
Net activity	165	(44)	—	121
Balance at September 30, 2017	\$ (1,449)	\$ (31)	\$ (9)	\$ (1,489)

Defined benefit pension reclassifications relate to amortization of unrecognized net gains associated primarily with our supplemental executive retirement plan.

14. Earnings per Share

Basic earnings per share for all periods presented equals net income (loss) divided by the weighted average number of our shares outstanding during the period including participating securities. Diluted earnings (loss) per share is computed by dividing net income (loss) by the weighted average number of our shares outstanding during the period including participating securities, adjusted for the dilutive effect of our stock options, restricted shares and performance share units. The following table presents our basic and diluted weighted average shares outstanding for the third quarter and the first nine months of 2017 and 2016:

	Three Months Ended September 30, 2017		Nine Months Ended September 30, 2016	
(Shares in millions)	2017	2016	2017	2016
Basic and Diluted weighted average shares outstanding	990	899	989	871

Our basic and diluted weighted average shares outstanding for the periods presented are equivalent due to the net loss attributable to shareholders. Diluted weighted average shares outstanding for the third quarter and the first nine months of 2017 and 2016 exclude potential shares for stock options, restricted shares, performance share units, exchangeable notes, warrant outstanding and the Employee Stock Purchase Plan as we have net losses for those periods, and their inclusion would be anti-dilutive. The following table presents the number of anti-dilutive shares excluded for the third quarter and the first nine months of 2017 and 2016:

Three Months	Nine Months
-----------------	----------------

Edgar Filing: Weatherford International plc - Form 10-Q

	Ended September 30,		Ended September 30,	
(Shares in millions)	2017	2016	2017	2016
Anti-dilutive potential shares due to net loss	250	166	250	71

17

Table of Contents

15. Share-Based Compensation

We recognized the following employee share-based compensation expense during the third quarter and the first nine months of 2017 and 2016:

	Three Months Ended September 30, 2017		Nine Months Ended September 30, 2016	
(Dollars in millions)	2017	2016	2017	2016
Share-based compensation	\$ 14	\$ 19	\$ 55	\$ 57
Related tax benefit	—	(8)	—	—

During the first nine months of 2017, we granted to certain employees approximately 3.1 million performance share units that will vest with continued employment if the Company meets certain market-based performance goals. The performance share units have a weighted average grant date fair value of \$6.06 per share based on the Monte Carlo simulation method. The assumptions used in the Monte Carlo simulation included a weighted average risk-free rate of 1.17%, volatility of 67% and a zero dividend yield. As of September 30, 2017, there was \$12 million of unrecognized compensation expense related to our performance share units. This cost is expected to be recognized over a weighted average period of less than 2 years.

During the first nine months of 2017, we also granted 5 million restricted share units at a weighted average grant date fair value of \$5.11 per share. As of September 30, 2017, there was \$55 million of unrecognized compensation expense related to our unvested restricted share grants. This cost is expected to be recognized over a weighted average period of less than 2 years.

16. Segment Information

Financial information by segment is summarized below. Revenues are attributable to countries based on the ultimate destination of the sale of products or performance of services. The accounting policies of the segments are the same as those described in the summary of significant accounting policies as presented in our Form 10-K. In the beginning of the fourth quarter of 2017, management commenced with the implementation of internal changes to the Company's organization structure and as a result we are in the process of reassessing our reportable segments. See "Note 20 – Subsequent Event" for additional information.

Total	\$4,209	\$ (387)	\$ 611

In the second quarter of 2017, the Company changed its accounting for revenue with our largest customer in Venezuela. The total impact of this change for the first six months of 2017 related to prior periods is a reduction in revenues and income from operations of approximately \$23 million for the second half of 2016. See “Note 1 – General” for additional details.

Includes restructuring charges of \$140 million: \$31 million in Europe/SSA/Russia, \$29 million in MENA/Asia Pacific, \$29 million in Corporate and Research and Development, \$25 million in Latin America, \$24 million in North America, and \$2 million in Land Drilling Rigs.

Includes \$436 million in long-lived asset impairments, \$213 million in inventory write-downs, \$121 million in other asset write-offs and charges, \$84 million to adjust a note from our largest customer in Venezuela to fair value, \$62 million in accounts receivable reserves and write-offs, \$20 million in pressure pumping related charges, and \$15 million in supply agreement charges related to a non-core business divestiture.

Includes restructuring charges of \$150 million: \$44 million in North America, \$37 million in Latin America, \$25 million in Europe/SSA/Russia, \$25 million in MENA/Asia Pacific, \$14 million in Corporate and Research and Development and \$5 million in Land Drilling Rigs.

17. Disputes, Litigation and Contingencies

Shareholder Litigation

In 2010, three shareholder derivative actions were filed, purportedly on behalf of the Company, asserting breach of duty and other claims against certain current and former officers and directors of the Company related to the United Nations oil-for-food program governing sales of goods into Iraq, the Foreign Corrupt Practices Act of 1977 and trade sanctions related to the U.S. government investigations disclosed in our SEC filings since 2007. Those shareholder derivative cases were filed in Harris County, Texas state court and consolidated under the caption *Neff v. Brady, et al.*, No. 2010040764 (collectively referred to as the “Neff Case”). Other shareholder demand letters covering the same subject matter were received by the Company in early 2014, and a fourth shareholder derivative action was filed, purportedly on behalf of the Company, also asserting breach of duty and other claims against certain current and former officers and directors of the Company related to the same subject matter as the Neff Case. That case, captioned *Erste-Sparinvest KAG v. Duroc-Danner, et al.*, No. 201420933 (Harris County, Texas) was consolidated into the Neff Case in September 2014. A motion to dismiss was granted May 15, 2015, and an appeal was filed on June 15, 2015. Following briefing and oral argument, on June 29, 2017, the Texas Court of Appeals denied in part and granted in part the shareholders’ appeal. The Court ruled that the shareholders lacked standing to bring claims that arose prior to the Company’s redomestication to Switzerland in 2009, and upheld the dismissal of those claims. The Court reversed as premature the trial court’s dismissal of claims arising after the redomestication and remanded to the trial court for further proceedings. We cannot reliably predict the outcome of the remaining claims, including the amount of any possible loss.

Securities Class Action Settlement

On June 30, 2015, we signed a stipulation to settle a shareholder securities class action captioned Freedman v. Weatherford International Ltd., et al., No. 1:12-cv-02121-LAK (S.D.N.Y.) for \$120 million subject to notice to the class and court approval. The Freedman lawsuit had been filed in the U.S. District Court for the Southern District of New York in March 2012, and alleged that we and certain current and former officers of Weatherford violated the federal securities laws in connection with the restatements of the Company's historical financial statements announced on February 21, 2012 and July 24, 2012. On November 4, 2015, the U.S. District Court for the Southern District of New York entered a final judgment and an order approving the settlement. Pursuant to the settlement, we were required to pay \$120 million, which was partially funded by insurance proceeds. There was no admission of liability or fault by a party in connection with the settlement. We are pursuing reimbursement from our insurance carriers and recovered \$23 million of the settlement amount to date, of which \$4 million was recovered in the second quarter of 2017.

Table of Contents

U.S. Government and Other Investigations

The SEC and the U.S. Department of Justice (“DOJ”) investigated certain accounting issues associated with the material weakness in our internal control over financial reporting for income taxes that was disclosed in a notification of late filing on Form 12b-25 filed on March 1, 2011 and in current reports on Form 8-K filed on February 21, 2012 and on July 24, 2012 and the subsequent restatements of our historical financial statements. During the first quarter 2016, we recorded a loss contingency in the amount of \$65 million and increased it to \$140 million in the second quarter to reflect our best estimate of the potential settlement. As disclosed in the Form 8-K filed on September 27, 2016, the Company settled with the SEC without admitting or denying the findings of the SEC, by consenting to the entry of an administrative order that requires the Company to cease and desist from committing or causing any violations and any future violations of the anti-fraud provisions of the Securities Act of 1933 (as amended, the “Securities Act”), and the anti-fraud, reporting, books and records, and internal controls provisions of the Securities Exchange Act of 1934 (as amended, the “Exchange Act”), and the rules promulgated thereunder. As part of the terms of the SEC settlement, the Company agreed to pay a total civil monetary penalty of \$140 million. In addition, certain reports and certifications regarding our tax internal controls must be delivered to the SEC during the two years following the settlement. We have completed two of three such reports and expect the final report to be delivered when due in March of 2018. A payment of \$50 million was made during the fourth quarter of 2016, and a payment of \$30 million was made in each of January and May 2017. A final payment of \$30 million was made in September 2017.

Spitzer Industries Litigation

In August 2016, after a bench trial in Harris County, Texas, the court entered a judgment of \$36 million against the Company in the case of Spitzer Industries, Inc. (“Spitzer”) vs. Weatherford U.S., L.P. in connection with Spitzer’s fabrication work on two mobile capture vessels used in the cleanup of marine oil spills. We continue to maintain a reserve in the amount of the judgment, and an appellate brief was filed on June 16, 2017 to the First Court of Appeals in Houston, Texas.

Rapid Completions and Packers Plus Litigation

Several subsidiaries of the Company are defendants in a patent infringement lawsuit filed by Rapid Completions LLC (“RC”) in U.S. District Court for the Eastern District of Texas on July 31, 2015. RC claims that we and other defendants are liable for infringement of seven U.S. patents related to specific downhole completion equipment and the methods of using such equipment. These patents have been assigned to Packers Plus Energy Services, Inc., a Canadian corporation (“Packers Plus”), and purportedly exclusively licensed to RC. The litigation is currently stayed pending resolution of inter partes reviews of each of the patents-in-suit, which are pending before the Patent Trial and Appeal Board of the U.S. Patent and Trademark Office (“USPTO”). RC is seeking a permanent injunction against further alleged infringement, unspecified damages for infringement, supplemental and enhanced damages, and additional relief such as attorneys’ fees. The Company has filed a counterclaim against Packers Plus, seeking declarations of non-infringement, invalidity, and unenforceability of the patents-in-suit on the grounds of inequitable conduct before the USPTO. The Company is seeking attorneys’ fees and costs incurred in the lawsuit.

On October 14, 2015, Packers Plus and RC filed suit in Federal Court in Toronto, Canada against the Company and certain subsidiaries alleging infringement of a related Canadian patent and seeking unspecified damages and an accounting of the Company’s profits. Trial on the validity of the Canadian patent was completed in March 2017. The parties are still awaiting a decision from the Court. If the Federal Court upholds the validity of the patent, a trial on infringement will be held in September 2018. The parties mediated both the U.S. and Canadian cases on July 5, 2017, but were unable to reach a settlement.

During the second quarter of 2017, the negotiations related to this matter progressed to a point where we recognized a liability for a loss contingency that we believe to be probable and for which a reasonable estimate could be made. The estimate remains unchanged as of September 30, 2017. In both cases, we will continue to defend ourselves vigorously. If one or more negative outcomes were to occur in either case, the impact to our financial position, results of operations, or cash flows could be material.

Other Disputes and Litigation

Additionally, we are aware of various disputes and potential claims and are a party in various litigation involving claims against us, including as a defendant in various employment claims alleging our failure to pay certain classes of workers overtime in compliance with the Fair Labor Standards Act for which an agreement was reached and settled during 2016. Some of these disputes and claims are covered by insurance. For claims, disputes and pending litigation in which we believe a negative outcome is probable and a loss can be reasonably estimated, we have recorded a liability for the expected loss. These liabilities are immaterial to our financial condition and results of operations.

Table of Contents

In addition we have certain claims, disputes and pending litigation for which we do not believe a negative outcome is probable or for which we can only estimate a range of liability. It is possible, however, that an unexpected judgment could be rendered against us, or we could decide to resolve a case or cases, that would result in liability that could be uninsured and beyond the amounts we currently have reserved and in some cases those losses could be material. If one or more negative outcomes were to occur relative to these matters, the aggregate impact to our financial condition could be material.

Accrued litigation and settlements recorded in “Other Current Liabilities” on the accompanying Condensed Consolidated Balance Sheets as of September 30, 2017 and December 31, 2016 were \$91 million and \$181 million, respectively.

Other Contingencies

The contractual residual value guarantee balance of \$28 million in “Other Non-Current Liabilities” on the accompanying Condensed Consolidated Balance Sheets at December 31, 2016 was extinguished after the underlying leased equipment in our North America pressure pumping operations was purchased during the first quarter of 2017.

We have minimum purchase commitments related to supply contracts and maintain a liability at September 30, 2017 of \$122 million for losses incurred on the contracts, of which \$52 million is recorded in “Other Current Liabilities,” \$47 million is recorded in “Other Non-Current Liabilities” and \$23 million to be contributed to the OneStim joint venture is recorded in “Liabilities Held for Sale” on our Condensed Consolidated Balance Sheets.

18. New Accounting Pronouncements

Accounting Changes

In May 2017, the Financial Accounting Standards Board (“FASB”) issued ASU 2017-09, Compensation - Stock Compensation (Topic 718): Scope of Modification Accounting, which clarifies that modification accounting is required only if the fair value, the vesting conditions, or the classification of a share-based payment award changes as a result of changes in terms or conditions of the award. We have elected to early adopt ASU 2017-09 in the second quarter of 2017 and the adoption of this ASU had no impact on our Consolidated Financial Statements.

In March 2016, the FASB issued ASU 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting. ASU 2016-09 requires all income tax effects related to share-based payments at settlement (or expiration) be recorded through the income statement, including unrealized excess tax benefits. ASU 2016-09 also requires that all tax related cash flows resulting from share-based payments be presented as operating activities in the statement of cash flows. In addition, the guidance allows entities to increase the net-share settlement of an employee’s shares for tax withholding purposes without triggering liability accounting and to make a policy election to estimate forfeitures or recognize them as they occur. Finally, the new guidance requires all cash payments made to a taxing authority on an employee’s behalf for shares withheld be presented as financing activities in the statement of cash flows.

We adopted ASU 2016-09 in the first quarter of 2017. We prospectively adopted the changes requiring all tax effects related to share-based payments to be recorded through the income statement and all tax related cash flows from share based payments to be presented as operating activities in the statement of cash flows. There is no cumulative effect as there is no impact from unrecognized excess tax benefits or minimum withholding requirements and prior periods have not been adjusted. We have also made an entity-wide accounting policy election to continue to estimate forfeitures and adjust the estimate when it is likely to change. We have retrospectively adopted the guidance to

classify as a financing activity on the statement of cash flows all cash payments made to a taxing authority on an employee's behalf for shares withheld for tax-withholding purposes. We have reclassified \$5 million from other operating activities to other financing activities in the Statements of Cash Flows for the nine months ended September 30, 2016.

Accounting Standards Issued Not Yet Adopted

In July 2017, the FASB issued ASU 2017-11, which amends the accounting for certain equity-linked financial instruments and states a down round feature no longer precludes equity classification when assessing whether the instrument is indexed to an entity's own stock. For an equity-linked financial instrument no longer accounted for as a liability at fair value, the amendments require a down round to be treated as a dividend and as a reduction of income available to common shareholders in basic earnings per share. The ASU is effective beginning with the first quarter of 2019, and early adoption is permitted. The ASU is required to be applied retrospectively to outstanding instruments. Weatherford is evaluating the impact that the ASU will have on our Consolidated Financial Statements and whether we will early adopt the ASU.

Table of Contents

In March 2017, the FASB issued ASU 2017-07, Compensation - Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost, which amends the presentation of net periodic pension and postretirement benefit cost ("net benefit cost"). The service cost component of net benefit cost will be bifurcated and presented with other employee compensation costs, while other components of net benefit costs will be presented separately. The standard is required to be applied on a retrospective basis and will be effective beginning with the first quarter of 2018, although early adoption is permitted. We are evaluating the impact that this new standard will have on our Consolidated Financial Statements.

In October 2016, the FASB issued ASU 2016-16, Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory, which eliminates a current exception in U.S. GAAP to the recognition of the income tax effects of temporary differences that result from intra-entity transfers of non-inventory assets. The intra-entity exception is being eliminated under the ASU. The standard is required to be applied on a modified retrospective basis and will be effective beginning with the first quarter of 2018. Early adoption is permitted. We estimate that the impact that this new standard will have on our Consolidated Financial Statements will be a reversal of \$110 million of prepaid taxes through retained earnings.

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842), which requires a lessee to recognize a lease asset and lease liability for most leases, including those classified as operating leases under existing U.S. GAAP. The ASU also changes the definition of a lease and requires expanded quantitative and qualitative disclosures for both lessees and lessors.

Under ASU 2016-02, we will revise our leasing policies to require most of the leases, where we are the lessee, to be recognized on the balance sheet as a lease asset and lease liability whereas currently we do not recognize operating leases on our balance sheet. Further, we will separate leases from other contracts where we are either the lessor or lessee when the rights conveyed under the contract indicate there is a lease, where we may not be required to do so under existing policies. While we cannot calculate the impact ASU 2016-02 will have on Weatherford's financial statements, we anticipate that Weatherford's assets and liabilities will increase by a significant amount.

This standard will be effective for us beginning with the first quarter of 2019. We do not anticipate adopting ASU 2016-02 early, which is permitted under the standard. ASU 2016-02 requires lessees and lessors to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective transition method but permits certain practical expedients to be applied, which may exclude certain leases that commenced before the effective date.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606), which will replace most existing revenue recognition guidance in U.S. GAAP. ASU 2014-09 will require an entity to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU 2014-09 requires a five-step approach to recognizing revenue: 1) identify the contract, 2) identify performance obligations, 3) determine the transaction price, 4) allocate the transaction price, and 5) recognize revenue. Subsequent to ASU 2014-09's issuance, Topic 606 has been affected by other FASB updates that address certain aspects of Topic 606 or revised the effective date of the accounting changes.

Under ASU 2014-09, we will revise our revenue recognition policy to require revenue recognition when control passes. This is a change from current policies, which generally require revenue recognition when delivery has occurred and risk and rewards of ownership have passed.

We intend to adopt ASU 2014-09 as of its effective date in the first quarter of 2018. ASU 2014-09 permits two transition methods: the retrospective method or the modified retrospective method. Weatherford will be applying modified retrospective method which requires the recognition of a cumulative effect as an adjustment to opening retained earnings on the initial date of adoption.

We have planned and commenced our implementation of ASU 2014-09. We have substantially completed an assessment of the differences between ASU 2014-09 and current accounting practices (gap analysis). Our approach involved comparing existing accounting requirements to the requirements under Topic 606 for each of our product lines and reviewing a sample of contracts within each product line and region. We are currently in the process of establishing new policies, procedures, and controls, establishing appropriate presentation and disclosure changes and quantifying any adoption date adjustments. Although not finalized, based on the implementation efforts performed, management's assessment is that ASU 2014-09 is not expected to materially affect us. Any changes are not expected to have any direct impact to our cash flows.

Table of Contents

19. Condensed Consolidating Financial Statements

Weatherford International plc (“Weatherford Ireland”), a public limited company organized under the laws of Ireland, a Swiss tax resident, and the ultimate parent of the Weatherford group, guarantees the obligations of its subsidiaries – Weatherford International Ltd., a Bermuda exempted company (“Weatherford Bermuda”), and Weatherford International, LLC, a Delaware limited liability company (“Weatherford Delaware”), including the notes and credit facilities listed below.

The 6.80% senior notes of Weatherford Delaware were guaranteed by Weatherford Bermuda at September 30, 2017 and December 31, 2016. At December 31, 2016, Weatherford Bermuda also guaranteed the 6.35% senior notes of Weatherford Delaware.

The following obligations of Weatherford Bermuda were guaranteed by Weatherford Delaware at September 30, 2017 and December 31, 2016: (1) Revolving Credit Agreement, (2) Term Loan Agreement, (3) 6.50% senior notes, (4) 6.00% senior notes, (5) 7.00% senior notes, (6) 9.625% senior notes, (7) 9.875% senior notes due 2039, (8) 5.125% senior notes, (9) 6.75% senior notes, (10) 4.50% senior notes, (11) 5.95% senior notes, (12) 5.875% exchangeable senior notes, (13) 7.75% senior notes, (14) 8.25% senior notes and (15) 9.875% senior notes due 2024.

As a result of certain of these guarantee arrangements, we are required to present the following condensed consolidating financial information. The accompanying guarantor financial information is presented on the equity method of accounting for all periods presented. Under this method, investments in subsidiaries are recorded at cost and adjusted for our share in the subsidiaries’ cumulative results of operations, capital contributions and distributions and other changes in equity. Elimination entries relate primarily to the elimination of investments in subsidiaries and associated intercompany balances and transactions.

20. Subsequent Events

At the end of the third quarter of 2017, changes to the Company's organization structure were internally announced by the Company's management. Implementation of these changes commenced in the beginning of the fourth quarter of 2017, and, as a result, we are in the process of reassessing our reportable segments. The reportable segment changes will be based on management's organization and view of Weatherford's business when making operating decisions and assessing performance. The purpose of the internal changes is to flatten the organization structure, reduce our costs and accelerate decision-making processes. These internal reporting changes, including changes to our reportable segments, will occur during the rest of the fourth quarter of 2017. The Company will begin reporting new reportable segments in the fourth quarter earnings release and the 2017 annual financial statements on Form 10-K and all prior periods reported will reflect the reportable segment changes.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

As used herein, the "Company," "we," "us" and "our" refer to Weatherford International plc ("Weatherford Ireland"), a public limited company organized under the laws of Ireland, and its subsidiaries on a consolidated basis. The following discussion should be read in conjunction with the Condensed Consolidated Financial Statements and Notes thereto included in "Item 1. Financial Statements." Our discussion includes various forward-looking statements about our markets, the demand for our products and services and our future results. These statements are based on certain assumptions we consider reasonable. For information about these assumptions, please review the section entitled "Forward-Looking Statements" and the section entitled "Part II – Other Information – Item 1A. – Risk Factors."

Overview

General

We conduct operations in approximately 90 countries and have service and sales locations in nearly all of the oil and natural gas producing regions in the world. Our operational performance is reviewed on a geographic basis, and we report the following regions as separate, distinct reporting segments: North America, MENA/Asia Pacific, Europe/SSA/Russia, Latin America and Land Drilling Rigs.

We principally provide products, equipment and services to the oil and natural gas exploration and production industry, both on land and offshore, through our three business groups: (1) Formation Evaluation and Well Construction and (2) Completion and Production, and (3) Land Drilling Rigs, which together include the company's product lines.

Formation Evaluation and Well Construction includes Managed-Pressure Drilling, Drilling Services, Tubular Running Services, Drilling Tools and Rental Equipment, Wireline Services, Testing and Production Services, Re-entry and Fishing, Cementing Products, Liner Systems, Reservoir Solutions and Surface Logging Systems.

Completion and Production includes Artificial Lift Systems, Stimulation and Completion Systems.

Land Drilling Rigs encompasses our land drilling rigs business, including the products and services ancillary thereto.

Table of Contents

Industry Trends

The level of spending in the energy industry is heavily influenced by current and expected future prices of oil and natural gas. Changes in expenditures result in an increased or decreased demand for our products and services. Rig count is an indicator of the level of spending for exploration and production of oil and natural gas reserves. The following chart sets forth certain statistics that reflect current and historical market conditions:

	WTI Oil (a)	Henry Hub Gas (b)	North American Rig Count (c)	International Rig Count (c)
September 30, 2017	\$51.67	\$3.01	1,154	947
December 31, 2016	53.72	3.68	770	925
September 30, 2016	48.24	2.91	600	936

(a) Price per barrel of West Texas Intermediate (“WTI”) crude oil as of the date indicated at Cushing, Oklahoma – Source: Thomson Reuters

(b) Price per MM/BTU as of the date indicated at Henry Hub Louisiana – Source: Thomson Reuters

(c) Quarterly average rig count – Source: Baker Hughes Rig Count

During the first nine months of 2017 oil prices ranged from a high of \$54.45 per barrel in mid-February to a low of \$42.53 per barrel in mid-June on the New York Mercantile Exchange. Natural gas ranged from a high of \$3.42 MM/BTU in mid-January to a low of \$2.56 MM/BTU in mid-February. Factors influencing oil and natural gas prices during the period include hydrocarbon inventory levels, realized and expected global economic growth, realized and expected levels of hydrocarbon demand, level of production capacity and weather and geopolitical uncertainty.

Outlook

Our results for the nine months of 2017 continued to be challenged by the continued volatility in oil prices and severe market contraction for our products and services. Market weakness and contraction has materially reduced capital spending by our customers, which has reduced our revenue, both through lower activity levels and pricing. We believe our industry will remain range bound within this ‘medium-for-longer’ price level for some time, until production growth is moderated. In the interim, we expect continuous short-term cyclical fluctuations. Adapting to this likely new paradigm, our industry must transform itself. We will continue to push innovation, both from a technical and a business model perspective, and we will deliver operational excellence to bring the cost of production down to a point at which market participants can make a decent return. This includes commencing in the fourth quarter a transformation program to generate cost savings through flattening our structure, driving process changes, improving the efficiency of our supply chain and sales organizations and continuing to rationalize our manufacturing footprint.

For the remainder of 2017, we expect growth in North America to be driven by completion systems, artificial lift, and drilling services as rig count increases, pricing power improves and supplies tighten. Internationally, we continue to anticipate growth in the Middle East and North Africa region as a result of recent market share gains that began in the second half 2016 which will be increasing to their full scope of work for the remainder of 2017, while activity in Russia will increase and Europe is expected to remain stable. We believe Latin America will remain relatively subdued for the remainder of 2017 while the deepwater markets in both Sub-Sahara Africa and Asia Pacific have likely reached their bottom with no expected improvements in the near term.

With current industry conditions, steadier oil prices and an increase in spending and activity, we continue to believe that over the longer term the outlook for our businesses is favorable. As decline rates accelerate and reservoir productivity complexities increase, our clients will continue to face challenges associated with decreasing the cost of

extraction activities and securing desired rates of production. These challenges increase our customers' requirements for technologies that improve productivity and efficiency and therefore increase demand for our products and services. These factors provide us with a positive outlook for our businesses over the longer term. However, the level of improvement in our businesses in the future will depend heavily on pricing, volume of work and our ability to offer solutions to more efficiently extract hydrocarbons, control costs and penetrate new and existing markets with our newly developed technologies.

We continually seek opportunities to maximize efficiency and value through various transactions, including purchases or dispositions of assets, businesses, investments or joint ventures. We evaluate our disposition candidates based on the strategic fit within our business and/or objectives. We announced in March of 2017 that we will be contributing our North America land pressure pumping assets, multistage completions, and pump-down perforating businesses into a joint venture with Schlumberger named OneStimSM. It is also our intention to divest our remaining land drilling rigs when market conditions improve. Upon completion,

the cash proceeds from any divestitures are expected to be used for working capital or to repay or repurchase debt. Any such debt reduction may include the repurchase of our outstanding senior notes prior to their maturity in the open market or through a privately negotiated transaction or otherwise.

The oilfield services industry growth is highly dependent on many external factors, such as our customers' capital expenditures, world economic and political conditions, the price of oil and natural gas, member-country quota compliance within OPEC and weather conditions and other factors, including those described in the section entitled "Forward-Looking Statements."

Opportunities and Challenges

Our industry offers many opportunities and challenges. The cyclical nature of the energy industry impacts the demand for our products and services. Certain of our products and services, such as our drilling and evaluation services, well installation services and well completion services, depend on the level of exploration and development activity and the completion phase of the well life cycle. Other products and services, such as our production optimization and artificial lift systems, are dependent on production activity. We have created a long-term strategy aimed at growing our businesses, servicing our customers, and most importantly, creating value for our shareholders. The success of our long-term strategy will be determined by our ability to manage effectively any industry cyclical nature, including the ongoing and prolonged industry downturn and our ability to respond to industry demands and periods of over-supply or low oil prices, successfully maximize the benefits from our acquisitions and complete the disposition of our land drilling rigs business.

Table of Contents

Revenue Percentage by Business Group

The following chart contains the percentage distribution of our consolidated revenues by our business groups for the third quarter and the first nine months of 2017 and 2016:

	Three Months Ended September 30, 2017		2016		Nine Months Ended September 30, 2017		2016	
Formation Evaluation and Well Construction	59 %	57 %	59 %	56 %	59 %	56 %	59 %	56 %
Completion and Production	34	36	34	36	34	36	34	36
Land Drilling Rigs	7	7	7	8	7	8	7	8
Total	100 %	100 %	100 %	100 %	100 %	100 %	100 %	100 %

Consolidated Revenues

Consolidated revenues increased \$104 million, or 8%, in the third quarter and decreased \$134 million, or 3%, during the first nine months of 2017 compared to the third quarter and the first nine months of 2016, respectively. Revenues increased across the regions, except Latin America, in the third quarter of 2017 compared to the same period of the prior year. Revenue decreases in Latin America, MENA/Asia Pacific and Land Drilling Rigs during the first nine months of 2017 compared to the same period in the prior year were due to lower activity, whereas revenues in North America and Europe/SSA/Russia increased.

Factors impacting revenues in the third quarter of 2017 compared to the same period of the prior year were as follows:

North America revenues increased \$89 million, or 20%, due to higher activity and sales related to the 92% increase in North American rig count since the third quarter of 2016, partially offset by the shutdown of our U.S. pressure pumping operations in the fourth quarter of 2016.

Revenues in our International segments increased \$7 million, or 1%, primarily in Europe/SSA/Russia due to higher customer activity in Russia and a strong product line mix in the North Sea and a marginal improvement in MENA/Asia Pacific, partially offset by a decrease in Latin America. The decrease in Latin America is primarily concentrated in Venezuela, Brazil and Bolivia due to lower activity in the well integrity and completion product lines, partially offset by improvements among nearly all our product lines in Colombia from an increase in the number of operating rigs.

Land Drilling Rigs revenues increased \$8 million primarily in Algeria and Kuwait due to fully operational contracts, partially offset by a decrease in activity in Oman.

Factors impacting revenues in the first nine months of 2017 compared to the same period of the prior year were as follows:

North America revenues increased \$110 million, or 8%, due to higher activity and sales related to the 92% increase in North American rig count since the third quarter of 2016, partially offset by the shutdown of our U.S. pressure pumping operations in the fourth quarter of 2016.

•

Revenues in our International segments declined \$214 million, or 8%, primarily in Latin America and concentrated in Argentina, Venezuela and Brazil in the well integrity and completion product lines, as well as the negative impact the change in accounting for revenue with our largest customer in Venezuela of approximately \$51 million. This decline was partially offset by improvements among nearly all our product lines in Colombia from an increase in the number of operating rigs. In MENA/Asia Pacific, the revenues decline was primarily due to lower activity on the Zubair project, a non-renewal of a contract in the United Arab Emirates and overall lower demand for services and continued pricing pressures, causing a broad decline in the Asia Pacific countries and in a concentration of countries in the Middle East, partially offset by improvement in Kuwait. The overall International decline was offset by an improvement in Europe/SSA/Russia due to higher customer activity in Russia and a strong product line mix in the North Sea.

Land Drilling Rigs revenues declined \$30 million primarily in Oman, Iraq and Saudi Arabia partially offset by an improved operational efficiency and fully operational contracts in Algeria and Kuwait.

Table of Contents

Operating Loss

Consolidated operating results improved \$881 million, or 93%, in the third quarter of 2017 and \$1.5 billion, or 79%, during the first nine months of 2017 compared to the third quarter and the first nine months of 2016, respectively. Segment operating income improved \$145 million, or 131%, in the third quarter of 2017 and \$277 million, or 83%, during the first nine months of 2017 compared to the third quarter and the first nine months of 2016, respectively.

The segment operating income improvement was primarily due to reduced expenses from the shutdown of our pressure pumping operations in North America, higher activity and productivity related to the increase in North American rig count, higher utilization in our product lines, improved sales mix and the continued realization of savings from cost reduction measures related to headcount reductions and facility closures, and lower depreciation and amortization due to decreased capital spending.

Consolidated operating loss for the third quarter of 2017 and 2016 also included net charges of \$28 million and \$771 million, respectively, and are as follows:

\$34 million in 2017 compared to \$22 million in 2016 of severance and other restructuring charges;
\$4 million in net credits in 2017 and \$9 million in 2016 of net charges primarily related to litigation reserves;
\$2 million in net credits in 2017 primarily related to the revaluation of the liability at settlement resulting in net gains associated with our supplemental executive retirement plan net of asset write-downs and other charges; and
In 2016, we had \$740 million of charges comprised of long-lived asset impairments of \$436 million, inventory charges of \$198 million, account receivables reserves and write-offs of \$62 million and \$44 million of other asset write-offs and charges.

Consolidated operating loss for the first nine months of 2017 and 2016 also included net charges of \$119 million and \$1.29 billion, respectively, and are as follows:

\$140 million in 2017 compared to \$150 million in 2016 of severance and other restructuring charges;
\$17 million in net credits in 2017 primarily related to gains related to the amortization and revaluation of the liability at settlement associated with our supplemental executive retirement plan;
\$4 million in net credits in 2017 and \$190 million in 2016 of net charges primarily related to litigation reserves; and
In 2016, we had \$951 million of charges primarily comprised of long-lived asset impairments of \$436 million, inventory charges of \$213 million, a fair value adjustment to a note from our largest customer in Venezuela of \$84 million, account receivables reserves and write-offs of \$62 million and other asset write-offs and pressure pumping business related charges of \$156 million.

For additional information regarding charges by segment, see the subsection entitled “Segment Results” below and “Note 3 – Restructuring Charges.”

Table of Contents

Segment Results

North America

Revenues in our North America segment increased \$89 million, or 20%, in the third quarter of 2017 and \$110 million, or 8%, during the first nine months of 2017 compared to the third quarter and the first nine months of 2016, respectively, in most product lines due to higher drilling and completion activities. This increase in activity is related to the 92% increase in North American rig count since the third quarter of 2016, which was partially offset by the shutdown of our U.S. pressure pumping operations in the fourth quarter of 2016.

Revenues, excluding pressure pumping operations, improved \$144 million, or 37%, in the third quarter of 2017 and improved \$302 million, or 26%, during the first nine months of 2017 compared to the third quarter and the first nine months of 2016, respectively.

Operating income in our North America segment improved \$128 million, or 135%, in the third quarter of 2017 and \$341 million, or 105%, during the first nine months of 2017 compared to the third quarter and the first nine months of 2016, respectively. This improvement in operating income is due to shutdown of our U.S. pressure pumping operations, cost savings from facility closures, headcount reductions, and lower depreciation and amortization due to decreased capital spending. In addition, increased activity and utilization in our artificial lift, well construction, completion and drilling services product lines have contributed positively to improve operating income in the third quarter and the first nine months of 2017.

MENA/Asia Pacific

Revenues in our MENA/Asia Pacific segment increased \$6 million, or 2%, in the third quarter of 2017 and decreased \$94 million, or 9%, during the first nine months of 2017 compared to the third quarter and the first nine months of 2016, respectively. MENA/Asia Pacific revenues improved marginally in the third quarter of 2017 compared to the same period of the prior year primarily in the artificial lift and drilling services product lines in Kuwait and Algeria, partially offset by a decline in the well integrity product line and the Zubair project. The revenue decline in the first nine months of 2017 compared to the same period last year was primarily due to lower activity on the completed Zubair project, a non-renewal of a contract in the United Arab Emirates and overall lower demand for services and continued pricing pressures, causing a broad decline in the Asia Pacific countries and in a concentration of countries in the Middle East, partially offset by improvement in Kuwait.

Operating income in the third quarter of 2017 improved \$16 million, or 200%, in the third quarter of 2017 and \$18 million, or 450%, during the first nine months of 2017 compared to the third quarter and the first nine months of 2016, respectively. The improvements in the third quarter and the first nine months of 2017 compared to the same periods of the prior year were primarily due to lower costs in Kuwait and on the Zubair project in Iraq.

Europe/SSA/Russia

Revenues in our Europe/SSA/Russia segment increased \$27 million, or 12%, in the third quarter of 2017 and \$15 million, or 2%, during the first nine months of 2017 compared to the third quarter and the first nine months of 2016, respectively. The increase compared to the same periods of the prior year was primarily due to higher customer activity in Russia and a strong product line mix in the North Sea. Product line contributions in the third quarter and the nine months were primarily from our pressure pumping, well construction, drilling services and completion product lines, partially offset by lower activity in the well integrity product line.

Operating income increased \$17 million, or 567%, in the third quarter of 2017 and \$12 million, or 400%, during the first nine months of 2017 compared to the third quarter and the first nine months of 2016, respectively. The increases were driven by the increases in activity and higher utilization rates.

Table of Contents

Latin America

Revenues in our Latin America segment decreased \$26 million, or 10%, in the third quarter of 2017 and \$135 million, or 17%, during the first nine months of 2017 compared to the third quarter and the first nine months of 2016, respectively. The decline in revenues was primarily concentrated in Venezuela, Brazil and Bolivia in the third quarter of 2017 and Argentina, Venezuela and Brazil during the first nine months of 2017 due to lower activity in the well integrity and completion product lines for both the third quarter and the first nine months of 2017. The decline was partially offset by improvements across all our product lines in Colombia benefiting from an increase in the number of operating rigs in the third quarter and the first nine months of 2017. In addition, the revenue decrease for the nine months of 2017 was negatively impacted by the change in accounting for revenue with our largest customer in Venezuela of approximately \$51 million.

Operating loss deteriorated \$19 million, or 136%, in the third quarter of 2017 and by \$90 million, or 153%, during the first nine months of 2017 compared to the third quarter and the first nine months of 2016, respectively. The decrease in the third quarter and the first nine months of 2017 was primarily impacted by a decline across most product lines with a concentration in wireline, well construction, completions and pressure pumping as customer pricing pressures and reduced demand continue.

Land Drilling Rigs

Revenues in our Land Drilling Rigs segment increased \$8 million, or 8%, in the third quarter of 2017 and decreased \$30 million, or 9% during the first nine months of 2017 compared to the third quarter and the first nine months of 2016, respectively. Operating loss improved \$3 million, or 16%, in the third quarter of 2017 and deteriorated \$4 million, or 6%, during the first nine months of 2017 compared to the third quarter and the first nine months of 2016, respectively.

The increase in revenues and operating results in the third quarter of 2017 compared to the same period of the prior year was due to fully operational contracts in Algeria and Kuwait, partially offset by a decrease in activity in Oman. The decrease in revenues and operating results during the first nine months of 2017 compared to the same period of the prior year was primarily in Oman, Iraq and Saudi Arabia, partially offset by an improved operational efficiency and fully operational contracts in Algeria and Kuwait.

Currency Devaluation Charges

Currency devaluation charges are included in current earnings in "Currency Devaluation Charges" on the accompanying Condensed Consolidated Statements of Operations. In the first nine months of 2016, currency devaluation charges of \$31 million reflected the impact of the devaluation of the Angolan kwanza. In the third quarter and first nine months of 2017, we had no currency devaluation charges.

Included in "Other Expense, Net" on the accompanying Condensed Consolidated Statements of Operations are other net foreign currency losses of \$2 million and \$15 million in the third quarter and the first nine months of 2017, respectively, compared to losses of \$6 million and \$4 million in the third quarter and the first nine months of 2016, respectively. Net foreign currency gains and losses are primarily due to either the strengthening or weakening U.S. dollar compared to our foreign denominated operations and the changes in fair value of our foreign currency forward contracts and cross-currency swap contracts.

Interest Expense, Net

Net interest expense was \$148 million and \$427 million for the third quarter and the first nine months of 2017, respectively, compared to \$129 million and \$363 million for the third quarter and the first nine months of 2016, respectively. The increase in interest expense for the third quarter and the first nine months of 2017 is primarily from higher average borrowings and interest rates in 2017 compared to 2016.

Included in net interest expense in the first nine months of 2017 is interest income of \$15 million primarily related to interest income recognized from the change in accounting for revenue and receivables with our largest customer in Venezuela.

Income Taxes

We have historically calculated the provision for income taxes during interim reporting periods by applying an estimate of the annual effective tax rate for the full fiscal year to ordinary income or loss (pre-tax income or loss excluding unusual or infrequently occurring discrete items and pre-tax losses for which no benefit has been recognized) for the reporting period. For the three month and nine months periods ended September 30, 2017, we determined that since small changes in estimated ordinary

Table of Contents

annual income would result in significant changes in the estimated annual effective tax rate, the use of a discrete effective tax rate is appropriate for the current quarter. The discrete method treats the year-to-date period as if it was the annual period and determines the income tax expense or benefit on that basis. We will use this method each quarter until the annual effective tax rate method is deemed appropriate. For the third quarter and the first nine months of 2017, we had a tax expense of \$25 million and \$75 million, respectively, on a loss before income taxes of \$226 million and \$784 million, respectively. Results for the third quarter and the first nine months of 2017 include losses with no significant tax benefit. The tax expense for the third quarter and the first nine months of 2017 also includes withholding taxes, minimum taxes and deemed profit taxes that do not directly correlate to ordinary income or loss.

We are continuously under tax examination in various jurisdictions. We cannot predict the timing or outcome regarding resolution of these tax examinations or if they will have a material impact on our financial statements. We continue to anticipate a possible reduction in the balance of uncertain tax positions of approximately \$10 million in the next twelve months due to expiration of statutes of limitations, settlements and/or conclusions of tax examinations.

For both the third quarter and the first nine months of 2016, we had a tax expense of \$692 million and \$489 million, respectively, on a loss before income taxes of \$1.1 billion and \$2.3 billion, respectively. The primary component of the tax expense for the third quarter and first nine months of 2016 relates to the Company's conclusion that certain deferred tax assets that had previously been benefited are not more likely than not to be realized. As a result, additional valuation allowances have been established for the United States and other jurisdictions.

Our results for the third quarter of 2016 include charges with no significant tax benefit principally related to \$436 million of long-lived asset impairment, \$198 million of excess and obsolete inventory charges, \$62 million in accounts receivable reserves and write-offs, and \$44 million of other asset write-offs and charges. In addition, we recorded a tax charge of \$137 million for a non-cash tax expense related to an internal restructuring of subsidiaries.

Our results for the first nine months of 2016 also include charges with no significant tax benefit principally related to \$436 million of long-lived asset impairment, \$213 million of excess and obsolete inventory charges, \$140 million of settlement charges, \$84 million related to a note adjustment for our largest customer in Venezuela, \$78 million of bond tender premium, \$62 million in accounts receivable reserves and write-offs, \$31 million of currency devaluation related to the Angolan kwanza, \$20 million in pressure pumping business related charges, and \$15 million in supply agreement charges related to a non-core business divestitures. In addition, we recorded a tax charge of \$526 million for the establishment of a valuation allowance, and \$137 million for a non-cash tax expense related to an internal restructuring of subsidiaries.

Restructuring Charges

Due to the ongoing lower than anticipated levels of exploration and production spending, we continue to reduce our overall cost structure and workforce to better align with current activity levels. The ongoing cost reduction plans, which began in 2016 and is continuing through 2017 (the "2016 Plan"), included a workforce reduction and other cost reduction measures initiated across our geographic regions.

In connection with the 2016 Plan, we recognized restructuring charges of \$34 million and \$140 million in the third quarter and the first nine months of 2017, respectively, which include termination (severance) charges of \$15 million and \$71 million, respectively, and other restructuring charges of \$19 million and \$57 million, respectively. Other restructuring charges include contract termination costs, relocation and other associated costs. The first nine months of 2017 also includes restructuring related asset charges of \$12 million.

Also in connection with the 2016 Plan, we recognized restructuring charges of \$22 million and \$150 million in the third quarter and the first nine months of 2016, respectively, which include termination (severance) charges of \$18 million and \$126 million, respectively, and other restructuring charges of \$4 million and \$24 million, respectively. Other restructuring charges include contract termination costs, relocation and other associated costs. Please see “Note 3 – Restructuring Charges” to our Condensed Consolidated Financial Statements for additional details of our charges by segment.

Table of Contents

Liquidity and Capital Resources

At September 30, 2017, we had cash and cash equivalents of \$445 million compared to \$1 billion at December 31, 2016. The following table summarizes cash flows provided by (used in) each type of activity for the nine months of 2017 and 2016:

	Nine Months Ended September 30,	
(Dollars in millions)	2017	2016
Net Cash Used in Operating Activities	\$(484)	\$(444)
Net Cash Used in Investing Activities	(401)	(104)
Net Cash Provided by Financing Activities	287	557

Operating Activities

For the nine months of 2017, cash used in operating activities was \$484 million compared to cash used in operating activities of \$444 million in the nine months of 2016.

Investing Activities

In the first nine months of 2017, the primary drivers of our investing cash flow activities are capital expenditures for property, plant and equipment and the purchase of assets held for sale. Capital expenditures were \$147 million and \$136 million for the nine months of 2017 and 2016, respectively. The amount we spend for capital expenditures varies each year and is based on the types of contracts we enter into, our asset availability and our expectations with respect to industry activity levels in the following year. In addition, in 2017 we purchased assets held for sale of \$244 million related to previously leased pressure pumping equipment.

Investing activities in 2017 also included cash paid of \$13 million to acquire intellectual property and other intangibles, \$25 million related to the purchase of held to maturity bonds, and \$7 million related to business acquisitions, partially offset by cash proceeds of \$36 million from the disposition of assets.

Investing activities in 2016 included cash received of \$39 million for insurance proceeds from the casualty loss of a rig in Kuwait and \$28 million from the disposition of assets. In 2016, we paid a \$20 million working capital adjustment related to the previously sold engineered chemistry and Integrity drilling fluids businesses and purchased \$10 million of intellectual property and other intangibles and \$5 million related to business acquisitions.

Financing Activities

In the first nine months of 2017, we received net proceeds of approximately \$250 million from the June 2017 issuance of our 9.875% senior notes due in 2024 compared to net proceeds of \$3.2 billion received in the first nine months of 2016 from the issuance of a series of offerings of senior notes senior notes and a \$500 million secured term loan.

Long-term debt repayments in the first nine months of 2017 were \$53 million compared to approximately \$1.9 billion in the first nine months of 2016. The long-term debt repayments in 2016 were paid with the majority of the proceeds from the issuance of \$3.2 billion in debt, mentioned previously, to fund a tender offer to buy back our senior notes with a principal balance of approximately \$1.9 billion. We recognized a cash loss of \$78 million on the tender offer buyback transaction.

Net short-term debt borrowings were \$118 million in the first nine months of 2017 compared to repayments of \$1.1 billion in the first nine months of 2016. The short-term debt borrowings in the first nine months of 2017 were primarily for working capital, partially offset by the repayment of our 6.35% senior notes with a principal balance of \$88 million. The short-term debt repayments in the first nine months of 2016 were primarily for the repayment of borrowings under our credit facility and repayment of our 5.50% senior notes with a principal balance of \$350 million.

In the first nine months of 2016, we received net proceeds of \$623 million from the issuance of 115 million ordinary shares of the Company.

Sources of Liquidity

Our sources of available liquidity include cash and cash equivalent balances, cash generated by our operations, accounts

Table of Contents

receivable factoring, dispositions, and availability under committed lines of credit. We also historically have accessed banks for short-term loans from uncommitted borrowing arrangements and have accessed the capital markets with debt and equity offerings. From time to time we may and have entered into transactions to dispose of businesses or capital assets that no longer fit our long-term strategy.

Revolving Credit Facility and Secured Term Loan Agreement

We have a revolving credit facility (the “Revolving Credit Agreement”) maturing in July of 2019 and a secured term loan agreement (the “Term Loan Agreement” and collectively with the Revolving Credit Agreement, the “Credit Agreements”) maturing in July of 2020. Our Credit Agreements contain customary events of default, including our failure to comply with the financial covenants. As of September 30, 2017, we were in compliance with our financial covenants as defined in the Credit Agreements as well as under our indentures. Based on our current financial projections, we believe we will continue to remain in compliance with our covenants.

At September 30, 2017, we had total commitments under the Revolving Credit Agreement of \$1.0 billion and borrowings of \$388 million under the Term Loan Agreement. At September 30, 2017, we had \$691 million available under the Credit Agreements and the following table summarizes our borrowing availability under these agreements:

(Dollars in millions)	September 30, 2017
Facilities	\$ 1,388
Less uses of facilities:	
Revolving credit agreement	225
Letters of credit	84
Secured term loan before debt issuance cost	388
Borrowing Availability	\$ 691

Other Short-Term Borrowings and Other Debt Activity

We have short-term borrowings with various domestic and international institutions pursuant to uncommitted credit facilities. At September 30, 2017, we had \$28 million in short-term borrowings under these arrangements.

Accounts Receivable Factoring and Other Receivables

From time to time, we participate in factoring arrangements to sell accounts receivable to third-party financial institutions. In the first nine months of 2017, we sold accounts receivable of \$150 million and recognized a loss of approximately \$1 million on these sales. We received cash proceeds totaling \$148 million. In the first nine months of 2016, we sold approximately \$102 million and recognized a loss of \$0.4 million. Our factoring transactions in the first nine months of 2017 and 2016 were recognized as sales, and the proceeds are included as operating cash flows in our Condensed Consolidated Statements of Cash Flows.

In the first quarter of 2017, Weatherford converted trade receivables of \$65 million into a note from the customer with a face value of \$65 million. The note had a three year term at a 4.625% stated interest rate. We reported the note as a trading security within “Other Current Assets” at fair value on the Condensed Consolidated Balance Sheets at its fair value of \$58 million on March 31, 2017. The note fair value was considered a Level 2 valuation and was estimated using secondary market data for similar bonds. During the second quarter of 2017, we sold the note for \$59 million.

Ratings Services’ Credit Rating

On October 24, 2017, Standard & Poor's Global Ratings downgraded our senior unsecured notes to B- from B, with a negative outlook. Our Moody's Investors Services credit rating on our senior unsecured notes is currently Caa1 and our short-term rating is SGL-3, both with a negative outlook. We continue to have access and expect we will continue to have access to most credit markets.

Table of Contents

Cash Requirements

We anticipate our remaining 2017 cash requirements will include payments for capital expenditures, repayment of debt, interest payments on our outstanding debt, settlement payments, severance payments and payments for short-term working capital needs. Our cash requirements may also include opportunistic debt repurchases, business acquisitions and other amounts to settle litigation related matters. We anticipate funding these requirements from cash and cash equivalent balances, cash generated by our operations, availability under our credit facilities, accounts receivable factoring, and if completed, proceeds from disposals of businesses or capital assets, including the OneStimSM joint venture proceeds of \$535 million, subject to agreed purchase price adjustments, that will be received upon closing of the joint venture formation. We anticipate that cash generated from operations will be augmented by working capital improvements, increased activity and improved margins. We also historically have accessed banks for short-term loans from uncommitted borrowing arrangements and have accessed the capital markets with debt and equity offerings. From time to time we may and have entered into transactions to dispose of businesses or capital assets that no longer fit our long-term strategy.

Capital expenditures for 2017 are projected to be approximately \$225 million (excluding the purchase of certain leased equipment utilized in our North America pressure pumping operations for a total amount of \$244 million) compared to capital expenditures of \$204 million in 2016. The anticipated increase is due to higher anticipated activity in the oil and gas industry related to greater volumes of work and increased rig count. The amounts we ultimately spend will depend on a number of factors including the type of contracts we enter into, asset availability and our expectations with respect to industry activity levels through the remainder of 2017. Expenditures are expected to be used primarily to support ongoing activities of our businesses and our sources of liquidity are anticipated to be sufficient to meet our needs.

Cash and cash equivalents of \$445 million at September 30, 2017 are held by subsidiaries outside of Ireland. Based on the nature of our structure, we are generally able to redeploy cash with no incremental tax. As of September 30, 2017, \$118 million of our cash and cash equivalents balance was denominated in Angolan kwanza. The National Bank of Angola supervises all kwanza exchange operations and has limited U.S. Dollar conversions. Prolonged Angolan exchange limitations may and has limited our ability to repatriate earnings and exposes us to additional exchange rate risk.

Off Balance Sheet Arrangements

Guarantees

Weatherford Ireland guarantees the obligations of our subsidiaries Weatherford Bermuda and Weatherford Delaware, including the notes and credit facilities listed below.

The 6.80% senior notes of Weatherford Delaware were guaranteed by Weatherford Bermuda at September 30, 2017 and December 31, 2016. At December 31, 2016, Weatherford Bermuda also guaranteed the 6.35% senior notes of Weatherford Delaware.

The following obligations of Weatherford Bermuda were guaranteed by Weatherford Delaware at September 30, 2017 and December 31, 2016: (1) Revolving Credit Agreement, (2) Term Loan Agreement, (3) 6.50% senior notes, (4) 6.00% senior notes, (5) 7.00% senior notes, (6) 9.625% senior notes, (7) 9.875% senior notes due 2039, (8) 5.125% senior notes, (9) 6.75% senior notes, (10) 4.50% senior notes, (11) 5.95% senior notes, (12) 5.875% exchangeable senior notes, (13) 7.75% senior notes, (14) 8.25% senior notes and (15) 9.875% senior notes due 2024.

As a result of certain of these guarantee arrangements, we are required to present condensed consolidating financial information. See “Note 19 – Condensed Consolidating Financial Statements” to our Condensed Consolidated Financial Statements for our guarantor financial information.

Table of Contents

Letters of Credit and Performance and Bid Bonds

We use letters of credit and performance and bid bonds in the normal course of our business. As of September 30, 2017, we had \$471 million of letters of credit and performance and bid bonds outstanding, consisting of \$387 million outstanding under various uncommitted credit facilities, of which \$72 million has been cash collateralized (included in “Cash and Cash Equivalents” in the accompanying Condensed Consolidated Balance Sheets), and \$84 million of letters of credit outstanding under our Revolving Credit Agreement. We also have \$59 million of surety bonds, primarily performance bonds, issued by financial sureties against an indemnification from us. These obligations could be called by the beneficiaries should we breach certain contractual or performance obligations. If the beneficiaries were to call the letters of credit under our committed facilities, our available liquidity would be reduced by the amount called.

Derivative Instruments

See “Note 11 – Derivative Instruments” to our Condensed Consolidated Financial Statements for details regarding our use of interest rate swaps and derivative contracts we enter to hedge our exposure to currency fluctuations in various foreign currencies and other derivative activities.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operation is based upon our Condensed Consolidated Financial Statements. We prepare these financial statements in conformity with U.S. generally accepted accounting principles. As such, we are required to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the periods presented. We base our estimates on historical experience, available information and various other assumptions we believe to be reasonable under the circumstances. On an on-going basis, we evaluate our estimates; however, actual results may differ from these estimates under different assumptions or conditions. There have been no material changes or developments in our evaluation of the accounting estimates and the underlying assumptions or methodologies that we believe to be critical accounting policies and estimates as disclosed in our Form 10-K for the year ended December 31, 2016.

New Accounting Pronouncements

See “Note 18 – New Accounting Pronouncements” to our Condensed Consolidated Financial Statements.

Table of Contents

Forward-Looking Statements

This report contains various statements relating to future financial performance and results, including certain projections, business trends and other statements that are not historical facts. These statements constitute forward-looking statements. These forward-looking statements generally are identified by the words “believe,” “project,” “expect,” “anticipate,” “estimate,” “intend,” “budget,” “strategy,” “plan,” “guidance,” “outlook,” “may,” “should,” “could,” “will continue,” “will likely result,” and similar expressions, although not all forward-looking statements contain these identifying words.

Forward-looking statements reflect our beliefs and expectations based on current estimates and projections. While we believe these expectations, and the estimates and projections on which they are based, are reasonable and were made in good faith, these statements are subject to numerous risks and uncertainties. Accordingly, our actual outcomes and results may differ materially from what we have expressed or forecasted in the forward-looking statements. Furthermore, from time to time, we update the various factors we consider in making our forward-looking statements and the assumptions we use in those statements. However, we undertake no obligation to correct, update or revise any forward-looking statement, whether as a result of new information, future events, or otherwise, except to the extent required under federal securities laws. The following sets forth various assumptions we use in our forward-looking statements, as well as risks and uncertainties relating to those statements. Certain of these risks and uncertainties may cause actual results to be materially different from projected results contained in forward-looking statements in this report and in our other disclosures. These risks and uncertainties include, but are not limited to, those described below under “Part II – Other Information – Item 1A. – Risk Factors” and the following:

- the price and price volatility of oil, natural gas and natural gas liquids;
- global political, economic and market conditions, political disturbances, war, terrorist attacks, changes in global trade policies, weak local economic conditions and international currency fluctuations;
- nonrealization of expected benefits from our acquisitions or business dispositions and our ability to execute or close such acquisitions and dispositions;
- our ability to realize expected revenues and profitability levels from current and future contracts;
- our ability to manage our workforce, supply chain and business processes, information technology systems and technological innovation and commercialization, including the impact of our organization restructure and the cost and support reduction plans;
- our high level of indebtedness;
- increases in the prices and availability of our raw materials;
- potential non-cash asset impairment charges for long-lived assets, goodwill, intangible assets or other assets;
- changes to our effective tax rate;
- nonrealization of potential earnouts associated with business dispositions;
- downturns in our industry which could affect the carrying value of our goodwill;
- member-country quota compliance within the Organization of Petroleum Exporting Countries;
- adverse weather conditions in certain regions of our operations;
- our ability to realize the expected benefits from our redomestication from Switzerland to Ireland and to maintain our Swiss tax residency;
- failure to ensure on-going compliance with current and future laws and government regulations, including but not limited to environmental and tax and accounting laws, rules and regulations; and
- limited access to capital, significantly higher cost of capital, or difficulty raising additional funds in the equity or debt capital markets.

Finally, our future results will depend upon various other risks and uncertainties, including, but not limited to, those detailed in our other filings with the SEC under the Exchange Act and the Securities Act. For additional information

regarding risks and uncertainties, see our other filings with the SEC. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act are made available free of charge on our web site www.weatherford.com under “Investor Relations” as soon as reasonably practicable after we have electronically filed the material with, or furnished it to, the SEC.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

For quantitative and qualitative disclosures about market risk, see “Part II – Other Information – Item 7A.– Quantitative and Qualitative Disclosures about Market Risk,” in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016. Our exposure to market risk has not changed materially since December 31, 2016.

Item 4. Controls and Procedures.

Disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) are designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms. This information is collected and communicated to management, including our Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”), as appropriate, to allow timely decisions regarding required disclosures. Our management, under the supervision and with the participation of our CEO and CFO, evaluated the effectiveness of the design and operation of our disclosure controls and procedures at September 30, 2017. Based on that evaluation, our CEO and CFO concluded that our disclosure controls and procedures were effective as of September 30, 2017.

Our management identified no change in our internal control over financial reporting that occurred during the three months ended September 30, 2017 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II – Other Information

Item 1. Legal Proceedings.

Disputes and Litigation

See “Note 17 – Disputes, Litigation and Contingencies” to our Condensed Consolidated Financial Statements for details regarding our ongoing disputes and litigation.

Item 1A. Risk Factors.

An investment in our securities involves various risks. You should consider carefully all of the risk factors described in our most recent Annual Report on Form 10-K, Part I, under the heading “Item 1A. – Risk Factors” and other information included and incorporated by reference in this report. The risk factor below updates our risk factors in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016. As of September 30, 2017, there have been no other material changes in our assessment of our risk factors from those set forth in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016.

Our business in Venezuela subjects us to actions by the Venezuelan government, actions by the U.S. and foreign governments, actions, including delayed payment, by our primary customer, and currency risk, each of which could have a material adverse effect on our liquidity, results of operations and financial condition.

The future financial results of our Venezuelan operations may be adversely affected by many factors, including our ability to take action to mitigate the effect of exchange controls, actions of the Venezuelan government, continued inflation, actions and sanctions by the U.S. and foreign governments, and customer payments and spending. In August 2017, economic sanctions around certain financing transactions in Venezuela were imposed by the U.S. government. These sanctions could affect our ability to collect payment on our receivables. Additionally, we are experiencing, and

may continue to experience, a delay in payment on our receivables from our primary customer in Venezuela. If this customer further delays paying or fails to pay a significant amount of our outstanding receivables, or if there is a major action by the Venezuelan government, it could have a material adverse effect on our liquidity, consolidated results of operations and consolidated financial condition. For further information, see Note 1 – General to our Condensed Consolidated Financial Statements and Item 7. – Management’s Discussion and Analysis of Financial Condition and Results of Operations.

We also believe there are risks associated with our operations in Venezuela, which continues to experience significant political and economic turmoil. The political and economic conditions have worsened further in 2017, leading to uncertainty in the future business climate, the state of security, and governance of the country. This environment increases the risk of civil unrest, armed

Table of Contents

conflicts, adverse actions by the government of Venezuela, or imposition of further sanctions or other actions by the U.S. and foreign governments that may restrict our ability to continue operations or realize the value of our assets. This development could delay or prevent our ability to generate additional revenue, collect our receivables or continue our operations in Venezuela.

We may not be able to complete our contemplated divestitures and we may not achieve the intended benefits of any acquisition, divestiture or joint venture.

From time to time, we pursue strategic divestitures, acquisitions, investments and joint ventures (“transactions”). For example, in 2014, we divested certain of our non-core businesses. However, due to sustained unfavorable market conditions, we have not yet completed the divestiture of the remaining portion of our land drilling rigs. Any such divestiture, accomplished through an initial public offering, a spin-off, an asset sale, or some combination of the foregoing, will be complex in nature and may be affected by unanticipated developments, such as the continued significant and sustained decrease in the price of crude oil, delays in obtaining regulatory or governmental approvals and challenges in establishing processes and infrastructure for both the underlying business and for potential investors or buyers of the business, which may result in such divestiture being delayed, or not being completed at all.

In addition, in November 2016, we shut down our U.S. pressure pumping operations and idled the related assets, with the intent to dispose of these assets. In March of 2017, we agreed to contribute these assets to the OneStim joint venture with affiliates of Schlumberger Ltd. which we expect to close in the fourth quarter of 2017. However, the closing is subject to regulatory approvals and other customary closing conditions, and the purchase price is contractually subject to adjustment, which depending on the relative size of fleets out of service might be substantial.

Even if successful, any of these contemplated or other future transactions may reduce our earnings for a number of reasons, and pose many other risks that could adversely affect our operations or financial results, including:

- acquired entities or joint ventures may not operate profitably, which could adversely affect our operating income or operating margins, and we may be unable to recover our investments;

- we may not be able to effectively influence the operations of our joint ventures, or we may be exposed to certain liabilities if our joint venture partners do not fulfill their obligations;

- these transactions require significant investment of time and resources, may disrupt our business, distract management from other responsibilities and may result in losses on disposal or continued financial involvement in any divested business, including through indemnification, guarantee or other financial arrangements, for a period of time following the transaction, which may adversely affect our financial results; and

- we may not be able to fully realize the intended or expected benefits of consummating such transactions.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

None.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Mine Safety Disclosures.

Not applicable.

Item 5. Other Information.

None.
