Citizens Communications Reports 2005 Third-Quarter Results; Declares Quarterly Dividend

Stamford, Conn., November 2, 2005 -- Citizens Communications (NYSE:CZN) today reported third quarter 2005 revenues of \$537.3 million; operating income of \$141.6 million; and net income of \$38.4 million.

Third quarter 2005 revenue from the company's ILEC operations was \$497.6 million, as compared to \$500.0 million in the third quarter of 2004. The decrease is due primarily to fewer access lines, lower access service revenues (which includes subsidy payments we receive from federal and state agencies) and reduced long distance revenue. Subsidy revenue declined primarily due to a missed filing deadline with the Universal Service Fund (USF). We have received a Waiver from the FCC for the late filing and expect to recognize approximately \$10 million of additional USF subsidy revenue in the fourth quarter. Growth in data and enhanced service revenues partially offset the decreases. Data service revenues increased 28 percent compared to the third quarter of 2004.

The company added 23,000 high-speed internet customers during the quarter and had 290,200 high-speed data subscribers at September 30, 2005. The number of the company's high-speed internet subscribers has increased by more than 102,000 or 55 percent from a year ago.

ILEC operating income for the third quarter of 2005 was \$137.0 million and operating income margin was 27.5 percent, compared to \$69.3 million and 13.9 percent in the third quarter of 2004. This increase is principally due to the management succession and strategic alternative charges in 2004. Capital expenditures for the ILEC were \$57.9 million for the third quarter of 2005.

Free cash flow was \$130.2 million during the third quarter and has increased 13.0 percent from \$371.6 million to \$421.3 million during the first nine months of 2005. The company's dividend represents a payout of 60.6 percent of free cash flow for the first nine months of 2005.

During the third quarter, the company repurchased \$153.4 million, or 11,256,500 shares of stock. The company has now repurchased a total of \$172.0 million, or 12,656,500 shares of stock under its \$250.0 million authorized share repurchase program.

The company's next regular quarterly cash dividend of \$0.25 per share will be paid on December 30, 2005 to shareholders of record on December 9, 2005.

--MORE --

The company uses certain non-GAAP financial measures in evaluating its performance. These include free cash flow. A reconciliation of the differences between free cash flow and the most comparable financial measure calculated and presented in accordance with GAAP is included in the tables that follow. The non-GAAP financial measures are by definition not measures of financial performance under generally accepted accounting principles and are not alternatives to operating income or net income reflected in the statement of operations or to cash flow as reflected in the statement of cash flows and are not necessarily indicative of cash available to fund all cash flow needs. The non-GAAP financial measures used by the company may not be comparable to similarly titled measures of other companies.

The company believes that presentation of non-GAAP financial measures provides useful information to investors regarding the company's financial condition and results of operations because these measures, when used in conjunction with related GAAP financial measures, (i) together provide a more comprehensive view

of the company's core operations and ability to generate cash flow, (ii) provide investors with the financial analytical framework upon which management bases financial, operational, compensation and planning decisions and (iii) presents measurements that investors and rating agencies have indicated to management are useful to them in assessing the company and its results of operations. Management uses these non-GAAP financial measures to plan and measure the performance of its core operations and its divisions measure performance and report to management based upon these measures. In addition, the company believes that free cash flow, as the company defines it, can assist in comparing performance from period to period, without taking into account factors affecting cash flow reflected in the statement of cash flows, including changes in working capital and the timing of purchases and payments.

Management uses these non-GAAP financial measures to (i) assist in analyzing the company's underlying financial performance from period to period, (ii) evaluate the financial performance of its business units, (iii) analyze and evaluate strategic and operational decisions, (iv) establish criteria for compensation decisions; and (v) assist management in understanding the company's ability to generate cash flow and, as a result, to plan for future capital and operational decisions. Management uses these non-GAAP financial measures in conjunction with related GAAP financial measures. The company believes that the non-GAAP financial measures are meaningful and useful for the reasons outlined above.

While the company utilizes these non-GAAP financial measures in managing and analyzing its business and financial condition and believes they are useful to management and to investors for the reasons described above, these non-GAAP financial measures have certain shortcomings. In particular, free cash flow does not represent the residual cash flow available for discretionary expenditures, since items such as debt repayments and dividends are not deducted from such measure. Management compensates for the shortcomings of these measures by utilizing them in conjunction with their comparable GAAP financial measures. The information in this press release should be read in conjunction with the financial statements and footnotes contained in our documents to be filed with the U.S. Securities and Exchange Commission.
