DANAHER CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS
(unaudited)

NOTE 1. GENERAL
The consolidated condensed financial statements included herein have been prepared by Danaher Corporation (the “Company”) without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to such rules and regulations; however, the Company believes that the disclosures are adequate to make the information presented not misleading. The condensed financial statements included herein should be read in conjunction with the financial statements as of and for the year ended December 31, 2013 and the Notes thereto included in the Company’s 2013 Annual Report on Form 10-K.
In the opinion of the Company, the accompanying financial statements contain all adjustments (consisting of only normal recurring accruals) necessary to present fairly the financial position of the Company as of March 28, 2014 and December 31, 2013, and its results of operations and cash flows for the three months ended March 28, 2014 and March 29, 2013.
Accumulated Other Comprehensive Income (Loss) - The changes in accumulated other comprehensive income (loss) by component are summarized below ($ in millions). Foreign currency translation adjustments are generally not adjusted for income taxes as they relate to indefinite investments in non-U.S. subsidiaries.

	Foreign Currency Translation Adjustments	Pension and Post-Retirement Plan Benefit Adjustments	Unrealized Gain on Available-For-Sale Securities	Total
For the Three Months Ended March 28, 2014:				
Balance, December 31, 2013	$413.2	$ (366.7)	$ 168.0	$214.5
Other comprehensive income (loss) before reclassifications:				
Increase (decrease)	(7.2)	(5.5)	19.6	6.9
Income tax benefit (expense)	—	1.1	(7.3)	(6.2)
Other comprehensive income (loss) before reclassifications, net of income taxes	(7.2)	(4.4)	12.3	0.7
Amounts reclassified from accumulated other comprehensive income (loss):				
Increase (decrease)	—	5.3 (1)	—	5.3
Income tax expense	—	(1.9)	—	(1.9)
Amounts reclassified from accumulated other comprehensive income (loss), net of income taxes	—	3.4	—	3.4
Net current period other comprehensive income, net of income taxes	(7.2)	(1.0)	12.3	4.1
Balance, March 28, 2014	$406.0	$ (367.7)	$ 180.3	$218.6

(1) This accumulated other comprehensive income (loss) component is included in the computation of net periodic pension cost (refer to Note 7 for additional details).

Table of Contents

	Foreign Currency Translation Adjustments	Pension and Post-Retirement Plan Benefit Adjustments	Unrealized Gain on Available-For-Sale Securities	Total

Balance, March 29, 2013	$218.8	$ (650.2)	$ 163.4	$(268.0)

(1) This accumulated other comprehensive income (loss) component is included in the computation of net periodic pension cost (refer to Note 7 for additional details).

NOTE 2. ACQUISITIONS

For a description of the Company’s acquisition activity for the year ended December 31, 2013, reference is made to the financial statements as of and for the year ended December 31, 2013 and Note 2 thereto included in the Company’s 2013 Annual Report on Form 10-K.

The Company continually evaluates potential acquisitions that either strategically fit with the Company’s existing portfolio or expand the Company’s portfolio into a new and attractive business area. The Company has completed a number of acquisitions that have been accounted for as purchases and have resulted in the recognition of goodwill in the Company’s financial statements. This goodwill arises because the purchase prices for these businesses reflect a number of factors including the future earnings and cash flow potential of these businesses, the multiple to earnings, cash flow and other factors at which similar businesses have been purchased by other acquirers, the competitive nature of the processes by which the Company acquired the businesses and the complementary strategic fit and resulting synergies these businesses bring to existing operations.

The Company makes an initial allocation of the purchase price at the date of acquisition based upon its understanding of the fair value of the acquired assets and assumed liabilities. The Company obtains this information during due diligence and through other sources. In the months after closing, as the Company obtains additional information about these assets and liabilities, including through tangible and intangible asset appraisals, and learns more about the newly acquired business, it is able to refine the estimates of fair value and more accurately allocate the purchase price. Only items identified as of the acquisition date are considered for subsequent adjustment. The Company is continuing to evaluate certain pre-acquisition contingencies associated with certain of its 2014 and 2013 acquisitions and is also in the process of obtaining valuations of acquired intangible assets and certain acquisition related liabilities in connection with these acquisitions. The Company will make appropriate adjustments to the purchase price allocation prior to completion of the measurement period, as required. The Company evaluated whether any adjustments to the prior periods' purchase price allocations were material and concluded no retrospective adjustment to prior period financial statements was required.

During the first three months of 2014, the Company acquired five businesses for total consideration of $163 million in cash, net of cash acquired. The businesses acquired complement existing units of the Environmental and Test & Measurement segments. The aggregate annual sales of these five businesses at the time of their respective acquisitions, in each case based on the company's revenues for its last completed fiscal year prior to the acquisition, were $65 million. The Company preliminarily recorded an aggregate of $97 million of goodwill related to these acquisitions.

Table of Contents

The following summarizes the estimated fair values of the assets acquired and liabilities assumed at the date of acquisition for all acquisitions consummated during the three months ended March 28, 2014 ($ in millions):

Trade accounts receivable	$8.5
Inventories	7.0
Property, plant and equipment	2.7
Goodwill	96.6
Other intangible assets, primarily customer relationships, trade names and technology	61.5
Trade accounts payable	(3.2)
Other assets and liabilities, net	(10.3)
Net cash consideration	$162.8

Pro Forma Financial Information
The unaudited pro forma information for the periods set forth below gives effect to the 2014 and 2013 acquisitions as if they had occurred as of January 1, 2013. The pro forma information is presented for informational purposes only and is not necessarily indicative of the results of operations that actually would have been achieved had the acquisitions been consummated as of that time ($ in millions, except per share amounts):

	Three Months Ended	
	March 28, 2014	March 29, 2013
Sales	$4,668.8	$4,538.2
Net earnings	579.8	695.2
Diluted net earnings per share	0.81	0.98

NOTE 3. SALE OF JOINT VENTURE
On July 4, 2010, the Company entered into a joint venture with Cooper Industries, plc (“Cooper”), combining certain of the Company's hand tool businesses with Cooper's Tools business to form a new entity called Apex Tool Group, LLC (“Apex”). Each of Cooper and the Company owned a 50% interest in Apex and had an equal number of representatives on Apex's Board of Directors and neither joint venture partner controlled the significant operating and financing activities of Apex. The Company accounted for its investment in the joint venture based on the equity method of accounting.
In February 2013, the Company and Cooper sold Apex to an unrelated third party for approximately $1.6 billion. The Company received $797 million from the sale, consisting of cash of $759 million (including $67 million of dividends received prior to closing) and a note receivable of $38 million. The Company recognized an after-tax gain of $144 million or $0.20 per diluted share in its first quarter 2013 results in connection with this transaction. The Company has collected the majority of the note receivable. The Company's share of the 2013 earnings generated by Apex prior to the closing of the sale was insignificant. Subsequent to the sale of its investment in Apex, the Company has no continuing involvement in Apex's operations.

NOTE 4. GOODWILL
The following is a rollforward of the Company’s goodwill ($ in millions):

Balance, December 31, 2013	$16,038.2
Attributable to 2014 acquisitions	96.6
Foreign currency translation & other	13.5
Balance, March 28, 2014	$16,148.3

8

Table of Contents

The carrying value of goodwill by segment is summarized as follows ($ in millions):

	March 28, 2014	December 31, 2013
Test & Measurement	$3,329.5	$3,266.9
Environmental	1,888.9	1,851.4
Life Sciences & Diagnostics	6,317.2	6,304.8
Dental	2,195.4	2,196.6
Industrial Technologies	2,417.3	2,418.5
	$16,148.3	$16,038.2

The Company has not identified any "triggering" events which indicate a potential impairment of goodwill in 2014.

NOTE 5. FAIR VALUE MEASUREMENTS

Accounting standards define fair value based on an exit price model, establish a framework for measuring fair value where the Company’s assets and liabilities are required to be carried at fair value and provide for certain disclosures related to the valuation methods used within a valuation hierarchy as established within the accounting standards. This hierarchy prioritizes the inputs into three broad levels as follows. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets in markets that are not active, or other observable characteristics for the asset or liability, including interest rates, yield curves and credit risks, or inputs that are derived principally from, or corroborated by, observable market data through correlation. Level 3 inputs are unobservable inputs based on the Company’s assumptions. A financial asset or liability’s classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

A summary of financial assets and liabilities that are measured at fair value on a recurring basis were as follows ($ in millions):

	Quoted Prices in Active Market (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
March 28, 2014:				
Assets:				
Available-for-sale securities	$404.8	—	—	$404.8
Liabilities:				
Deferred compensation plans	—	$ 71.8	—	71.8
December 31, 2013:				
Assets:				
Available-for-sale securities	$385.2	—	—	$385.2
Liabilities:				
Deferred compensation plans	—	$ 70.1	—	70.1

Available-for-sale securities are measured at fair value using quoted market prices in an active market and are included in other long-term assets in the accompanying Consolidated Condensed Balance Sheets.

The Company has established nonqualified deferred compensation programs that permit officers, directors and certain management employees to defer a portion of their compensation, on a pre-tax basis, until their termination of employment (or board service, as applicable). All amounts deferred under such plans are unfunded, unsecured obligations of the Company and are presented as a component of the Company’s compensation and benefits accrual

included in other long-term liabilities in the accompanying Consolidated Condensed Balance Sheets. Participants may choose among alternative earning rates for the amounts they defer, which are primarily based on investment options within the Company's 401(k) program (except that the earnings rates for amounts deferred by the Company's directors and amounts contributed unilaterally by the Company are entirely based on changes in the value of the Company's common stock). Changes in the deferred compensation liability under these programs are recognized based on changes in the fair value of the participants' accounts, which are based on the applicable earnings rates.

Table of Contents

On April 2, 2014, the Company terminated the Japanese Yen/U.S. dollar currency swap agreement that had been acquired in connection with a prior acquisition. The fair values of the currency swap as of March 28, 2014 and the termination date were not significant and the fair value had not changed significantly during the first three months of 2014. During the three months ended March 29, 2013, the Company recorded pre-tax income of $8 million related to changes in the fair value of this currency swap. The currency swap did not qualify for hedge accounting, and as a result, changes in the fair value are reflected in selling, general and administrative expenses in the accompanying Consolidated Condensed Statements of Earnings each reporting period.

Fair Value of Financial Instruments

The carrying amounts and fair values of financial instruments were as follows ($ in millions):

	March 28, 2014		December 31, 2013	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Assets:				
Available-for-sale securities	$404.8	$404.8	$385.2	$385.2
Liabilities:				
Short-term borrowings	64.1	64.1	62.3	62.3
Long-term borrowings	3,422.9	3,865.7	3,436.7	3,877.6

As of March 28, 2014 and December 31, 2013, available-for-sale securities and short and long-term borrowings were categorized as level 1, while the currency swap agreement was categorized as level 2.

The fair value of long-term borrowings was based on quoted market prices. The difference between the fair value and the carrying amounts of long-term borrowings (other than the Company’s Liquid Yield Option Notes due 2021 (the “LYONs”)) is attributable to changes in market interest rates and/or the Company’s credit ratings subsequent to the incurrence of the borrowing. In the case of the LYONs, differences in the fair value from the carrying value are attributable to changes in the price of the Company’s common stock due to the LYONs' conversion features. The fair values of short-term borrowings, as well as cash and cash equivalents, trade accounts receivable, net and trade accounts payable approximate their carrying amounts due to the short-term maturities of these instruments.

NOTE 6. FINANCING

As of March 28, 2014, the Company was in compliance with all of its debt covenants. The components of the Company’s debt were as follows ($ in millions):

	March 28, 2014	December 31, 2013
Commercial paper	$450.0	$450.0
1.3% senior notes due 2014	400.0	400.0
2.3% senior notes due 2016	500.0	500.0
5.625% senior notes due 2018	500.0	500.0
5.4% senior notes due 2019	750.0	750.0
3.9% senior notes due 2021	600.0	600.0
Zero-coupon LYONs due 2021	152.4	154.1
Other	134.6	144.9
Subtotal	3,487.0	3,499.0
Less currently payable	64.1	62.3
Long-term debt	$3,422.9	$3,436.7

For a full description of the Company's debt financing, reference is made to Note 10 of the Company's financial statements as of and for the year ended December 31, 2013 included in the Company's 2013 Annual Report on Form 10-K.

Table of Contents

During the three months ended March 28, 2014, holders of certain of the Company's LYONs converted such LYONs into an aggregate of approximately 0.1 million shares of the Company's common stock, par value $0.01 per share. The Company's deferred tax liability associated with the book and tax basis difference in the converted LYONs of approximately $1 million was transferred to additional paid-in capital as a result of the conversions.
The Company satisfies any short-term liquidity needs that are not met through operating cash flow and available cash primarily through issuances of commercial paper under its U.S. and Euro commercial paper programs. As of March 28, 2014, borrowings outstanding under the Company's U.S. commercial paper program had a weighted average annual interest rate of 0.1% and a weighted average remaining maturity of approximately thirteen days. There was no commercial paper outstanding under the Euro commercial paper program as of March 28, 2014. As of March 28, 2014, the Company has classified its borrowings outstanding under the commercial paper program and its $400 million principal amount of 1.3% senior notes due June 23, 2014 as long-term debt in the accompanying Consolidated Condensed Balance Sheet as the Company had the intent and ability, as supported by availability under the Credit Facility referenced below, to refinance these borrowings for at least one year from the balance sheet date. Credit support for the commercial paper program is provided by a $2.5 billion unsecured multi-year revolving credit facility with a syndicate of banks that expires on July 15, 2016 (the "Credit Facility"). The Credit Facility can also be used for working capital and other general corporate purposes. As of March 28, 2014, no borrowings were outstanding under the Credit Facility and the Company was in compliance with all covenants under the facility. In addition to the Credit Facility, the Company has entered into reimbursement agreements with various commercial banks to support the issuance of letters of credit.

NOTE 7. DEFINED BENEFIT PLANS

The following sets forth the components of the Company's net periodic benefit cost of the noncontributory defined benefit pension plans ($ in millions):

	U.S. Three Months Ended		Non-U.S. Three Months Ended	
	March 28, 2014	March 29, 2013	March 28, 2014	March 29, 2013
Service cost	$1.5	$1.4	$8.0	$6.5
Interest cost	26.5	23.7	11.7	10.4
Expected return on plan assets	(32.3)	(31.4)	(10.5)	(8.6)
Amortization of actuarial loss	4.6	7.0	1.7	2.0
Amortization of prior service credit	—	—	—	(0.1)
Settlement losses recognized	—	—	—	0.6
Net periodic pension cost	$0.3	$0.7	$10.9	$10.8

The following sets forth the components of the Company's net periodic benefit cost of the other post-retirement employee benefit plans ($ in millions):

	Three Months Ended	
	March 28, 2014	March 29, 2013
Service cost	$0.3	$0.4
Interest cost	2.1	2.1
Amortization of prior service credit	(1.0)	(1.6)
Amortization of actuarial loss	—	0.4
Net periodic benefit cost	$1.4	$1.3

Net periodic pension and benefit costs are included in cost of sales and selling, general and administrative expenses in the accompanying Consolidated Condensed Statements of Earnings.

11

Table of Contents

Employer Contributions

During 2014, the Company’s cash contribution requirements for its U.S. and non-U.S. defined benefit pension plans are expected to be approximately $50 million and $55 million, respectively. The ultimate amounts to be contributed depend upon, among other things, legal requirements, underlying asset returns, the plan’s funded status, the anticipated tax deductibility of the contribution, local practices, market conditions, interest rates and other factors.

NOTE 8. INCOME TAXES

The Company’s effective tax rate for the three months ended March 28, 2014 and March 29, 2013 was 23.9% and 25.0%, respectively.

The Company's effective tax rate for 2014 and 2013 differs from the U.S. federal statutory rate of 35% due principally to the Company’s earnings outside the United States that are indefinitely reinvested and taxed at rates lower than the U.S. federal statutory rate. The effective tax rate for the three months ended March 28, 2014 includes tax effects of certain discrete items specific to the quarter, none of which are significant individually or in the aggregate. During the three months ended March 29, 2013, the Company's gain on the sale of the Apex joint venture increased the reported tax rate by 3.5%, which was partially offset by the retroactive reinstatement of certain tax benefits and credits from the enactment of the American Tax Relief Act of 2012.

Tax authorities in Denmark and Germany have raised significant issues related to the deductibility and taxability of interest accrued by certain of the Company's subsidiaries. On December 10, 2013, the Company received assessments from the Danish tax authority (“SKAT”) totaling approximately DKK 1.1 billion (approximately $200 million based on exchange rates as of March 28, 2014) imposing withholding tax and interest thereon relating to interest accrued in Denmark on borrowings from certain of the Company's subsidiaries for the years 2004-2009. If the SKAT claims are successful, it is likely that the Company would be assessed additional amounts through March 2014 totaling approximately DKK 800 million (approximately $150 million based on exchange rates as of March 28, 2014) as well as future interest on the disputed withholding tax for subsequent periods prior to such a determination. Discussions with the German tax authorities are ongoing and final assessments have not been issued.

Management believes the positions the Company has taken in both Denmark and Germany are in accordance with the relevant tax laws and intends to vigorously defend its positions, including contesting the SKAT assessment; however, the ultimate resolution of these matters is uncertain, could take many years, and individually or in the aggregate could result in a material adverse impact to the Company's financial statements, including its effective tax rate.

NOTE 9. STOCK TRANSACTIONS AND STOCK-BASED COMPENSATION

Neither the Company nor any “affiliated purchaser” repurchased any shares of Company common stock during the three months ended March 28, 2014. On July 16, 2013, the Company's Board of Directors approved a repurchase program (the “2013 Repurchase Program”) authorizing the repurchase of up to 20 million shares of the Company's common stock from time to time on the open market or in privately negotiated transactions. As of March 28, 2014, 20 million shares remained available for repurchase pursuant to the 2013 Repurchase Program.

For a full description of the Company’s stock-based compensation programs, reference is made to Note 18 of the Company’s financial statements as of and for the year ended December 31, 2013 included in the Company’s 2013 Annual Report on Form 10-K. As of March 28, 2014, approximately 28 million shares of the Company’s common stock were reserved for issuance under the 2007 Stock Incentive Plan.

The following summarizes the assumptions used in the Black-Scholes Merton option pricing model ("Black-Scholes") to value options granted during the three months ended March 28, 2014:

Risk-free interest rate	1.73 - 2.38%	
Weighted average volatility	22.7	%
Dividend yield	0.5	%
Expected years until exercise	5.5 - 8.0	

12

Table of Contents

The following summarizes the components of the Company's stock-based compensation expense ($ in millions):

	Three Months Ended	
	March 28, 2014	March 29, 2013
RSUs:		
Pre-tax compensation expense	$17.9	$15.5
Income tax benefit	(5.2)	(4.6)
RSU expense, net of income taxes	$12.7	$10.9
Stock options:		
Pre-tax compensation expense	$11.1	$12.3
Income tax benefit	(3.4)	(3.8)
Stock option expense, net of income taxes	$7.7	$8.5
Total stock-based compensation:		
Pre-tax compensation expense	$29.0	$27.8
Income tax benefit	(8.6)	(8.4)
Total stock-based compensation expense, net of income taxes	$20.4	$19.4

Stock-based compensation has been recognized as a component of selling, general and administrative expenses in the accompanying Consolidated Condensed Statements of Earnings. As of March 28, 2014, $161 million of total unrecognized compensation cost related to RSUs is expected to be recognized over a weighted average period of approximately three years. As of March 28, 2014, $143 million of total unrecognized compensation cost related to stock options is expected to be recognized over a weighted average period of approximately three years. Both amounts will be adjusted for any future changes in estimated forfeitures.

The following summarizes option activity under the Company's stock plans (in millions, except exercise price and number of years):

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (in Years)	Aggregate Intrinsic Value
Outstanding as of December 31, 2013	25.0	$42.93		
Granted	1.3	76.56		
Exercised	(0.8)	33.69		
Cancelled/forfeited	(0.1)	52.28		
Outstanding as of March 28, 2014	25.4	$44.87	6	$737.9
Vested and Expected to Vest as of March 28, 2014 [1]	24.3	$43.97	6	$728.3
Vested as of March 28, 2014	14.1	$35.49	4	$542.6

(1) The "Expected to Vest" options are the net unvested options that remain after applying the forfeiture rate assumption to total unvested options.

The aggregate intrinsic value in the table above represents the total pre-tax intrinsic value (the difference between the Company's closing stock price on the last trading day of the first quarter of 2014 and the exercise price, multiplied by the number of in-the-money options) that would have been received by the option holders had all option holders exercised their options on March 28, 2014. The amount of aggregate intrinsic value will change based on the price of the Company's common stock.

The aggregate intrinsic value of options exercised during the three months ended March 28, 2014 and March 29, 2013 was $33 million and $47 million, respectively. Exercise of options during the first three months of 2014 and 2013 resulted in cash receipts of $26 million and $49 million, respectively. The Company realized a tax benefit of $10

million in the three months ended March 28, 2014 related to the exercise of employee stock options. The net income tax benefit in excess of the expense recorded for financial reporting purposes (the “excess tax benefit”) has been recorded as an increase to additional paid-in capital and is reflected as a financing cash inflow in the accompanying Consolidated Condensed Statements of Cash Flows.

Table of Contents

The following summarizes information on unvested RSUs activity (in millions, except grant-date fair value):

	Number of RSUs	Weighted Average Grant-Date Fair Value
Unvested as of December 31, 2013	5.2	$51.04
Granted	0.5	76.56
Vested	(0.8)	36.86
Forfeited	(0.1)	51.33
Unvested as of March 28, 2014	4.8	$56.08

The Company realized a tax benefit of $20 million in the three months ended March 28, 2014 related to the vesting of RSUs. The excess tax benefit attributable to RSUs have been recorded as an increase to additional paid-in capital and is reflected as a financing cash inflow in the accompanying Consolidated Condensed Statements of Cash Flows.

In connection with the exercise of certain stock options and the vesting of RSUs previously issued by the Company, a number of shares sufficient to fund statutory minimum tax withholding requirements has been withheld from the total shares issued or released to the award holder (though under the terms of the applicable plan, the shares are considered to have been issued and are not added back to the pool of shares available for grant). During the first three months of 2014, 301 thousand shares with an aggregate value of $23 million were withheld to satisfy the requirement. The withholding is treated as a reduction in additional paid-in capital in the accompanying Consolidated Condensed Statement of Stockholders' Equity.

NOTE 10. RESTRUCTURING AND OTHER RELATED CHARGES

During 2013, the Company recorded pre-tax restructuring and other related charges totaling $107 million. These costs were incurred to position the Company to provide superior products and services to its customers in a cost efficient manner and taking into consideration broad economic uncertainties.

For a full description of the Company's restructuring activities, reference is made to Note 15 of the Company's financial statements as of and for the year ended December 31, 2013 included in the Company's 2013 Annual Report on Form 10-K.

Substantially all restructuring activities initiated in 2013 were completed by December 31, 2013 and the Company expects substantially all cash payments associated with remaining termination benefits to be paid during 2014. As of March 28, 2014, included in accrued expenses and other liabilities in the accompanying Consolidated Condensed Balance Sheet was accrued restructuring charges of $52 million related to restructuring activities initiated in 2013.

NOTE 11. CONTINGENCIES

For a description of the Company's litigation and contingencies, reference is made to Note 17 of the Company's financial statements as of and for the year ended December 31, 2013 included in the Company's 2013 Annual Report on Form 10-K.

The Company generally accrues estimated warranty costs at the time of sale. In general, manufactured products are warranted against defects in material and workmanship when properly used for their intended purpose, installed correctly and appropriately maintained. Warranty period terms depend on the nature of the product and range from ninety days up to the life of the product. The amount of the accrued warranty liability is determined based on historical information such as past experience, product failure rates or number of units repaired, estimated cost of material and labor, and in certain instances estimated property damage. The accrued warranty liability is reviewed on a quarterly basis and may be adjusted as additional information regarding expected warranty costs becomes known.

The following is a rollforward of the Company's accrued warranty liability ($ in millions):

Balance, December 31, 2013	$141.2
Accruals for warranties issued during the period	32.5

Settlements made	(32.2)
Effect of foreign currency translation	(0.2)
Balance, March 28, 2014	$141.3

Table of Contents

NOTE 12. NET EARNINGS PER SHARE

Basic net earnings per share ("EPS") is calculated by dividing net earnings by the weighted average number of common shares outstanding for the applicable period. Diluted net EPS is computed based on the weighted average number of common shares outstanding increased by the number of additional shares that would have been outstanding had the potentially dilutive common shares been issued and reduced by the number of shares the Company could have repurchased with the proceeds from the issuance of the potentially dilutive shares. For both the three months ended March 28, 2014 and March 29, 2013, approximately 1 million options to purchase shares were not included in the diluted earnings per share calculation as the impact of their inclusion would have been anti-dilutive.

Information related to the calculation of net earnings per share of common stock is summarized as follows ($ and shares in millions, except per share amounts):

	Net Earnings (Numerator)	Shares (Denominator)	Per Share Amount
For the Three Months Ended March 28, 2014:			
Basic EPS	$579.7	700.1	$0.83
Adjustment for interest on convertible debentures	0.7	—	
Incremental shares from assumed exercise of dilutive options and vesting of dilutive RSUs	—	9.4	
Incremental shares from assumed conversion of the convertible debentures	—	5.3	
Diluted EPS	$580.4	714.8	$0.81
For the Three Months Ended March 29, 2013:			
Basic EPS	$691.9	692.0	$1.00
Adjustment for interest on convertible debentures	1.1	—	
Incremental shares from assumed exercise of dilutive options and vesting of dilutive RSUs	—	8.6	
Incremental shares from assumed conversion of the convertible debentures	—	7.8	
Diluted EPS	$693.0	708.4	$0.98

NOTE 13. SEGMENT INFORMATION

The Company operates and reports its results in five separate business segments consisting of the Test & Measurement, Environmental, Life Sciences & Diagnostics, Dental and Industrial Technologies segments. There has been no material change in total assets or liabilities by segment since December 31, 2013. Segment results are shown below ($ in millions):

	Sales		Operating Profit	
	Three Months Ended		Three Months Ended	
	March 28, 2014	March 29, 2013	March 28, 2014	March 29, 2013
Test & Measurement	$871.0	$855.4	$192.7	$187.3
Environmental	768.7	725.3	145.6	135.1
Life Sciences & Diagnostics	1,659.6	1,567.4	219.7	199.3
Dental	509.7	479.8	75.5	62.9
Industrial Technologies	853.7	816.8	191.7	170.9
Other	—	—	(36.3)	(24.6)
Total	$4,662.7	$4,444.7	$788.9	$730.9

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is designed to provide a reader of Danaher Corporation's ("Danaher," the "Company," "we," "us" or "our") financial statements with a narrat from the perspective of Company management. The Company's MD&A is divided into four main sections:

- Information Relating to Forward-Looking Statements
- Overview
- Results of Operations
- Liquidity and Capital Resources

You should read this discussion along with the Company's MD&A and audited financial statements as of and for the year ended December 31, 2013 and Notes thereto, included in the Company's 2013 Annual Report on Form 10-K, and the Company's Consolidated Condensed Financial Statements and related Notes as of and for the three months ended March 28, 2014.

INFORMATION RELATING TO FORWARD-LOOKING STATEMENTS

Certain statements included or incorporated by reference in this quarterly report, in other documents we file with or furnish to the Securities and Exchange Commission ("SEC"), in our press releases, webcasts, conference calls, materials delivered to shareholders and other communications, are "forward-looking statements" within the meaning of the United States federal securities laws. All statements other than historical factual information are forward-looking statements, including without limitation statements regarding: projections of revenue, expenses, profit, profit margins, tax rates, tax provisions, cash flows, pension and benefit obligations and funding requirements, our liquidity position or other projected financial measures; management's plans and strategies for future operations, including statements relating to anticipated operating performance, cost reductions, restructuring activities, new product and service developments, competitive strengths or market position, acquisitions, divestitures, strategic opportunities, securities offerings, stock repurchases, dividends and executive compensation; growth, declines and other trends in markets we sell into; new or modified laws, regulations and accounting pronouncements; outstanding claims, legal proceedings, tax audits and assessments and other contingent liabilities; foreign currency exchange rates and fluctuations in those rates; general economic and capital markets conditions; the timing of any of the foregoing; assumptions underlying any of the foregoing; and any other statements that address events or developments that Danaher intends or believes will or may occur in the future. Terminology such as "believe," "anticipate," "should," "could," "intend," "plan," "expect," "es "project," "target," "may," "possible," "potential," "forecast" and "positioned" and similar references to future periods are inte identify forward-looking statements, although not all forward-looking statements are accompanied by such words. Forward-looking statements are based on assumptions and assessments made by our management in light of their experience and perceptions of historical trends, current conditions, expected future developments and other factors they believe to be appropriate. Forward-looking statements are not guarantees of future performance and actual results may differ materially from the results, developments and business decisions contemplated by our forward-looking statements. Accordingly, you should not place undue reliance on any such forward-looking statements. Important factors that could cause actual results to differ materially from those envisaged in the forward-looking statements include the following:

- Conditions in the global economy, the markets we serve and the financial markets may adversely affect our business and financial statements.

- Our restructuring actions could have long-term adverse effects on our business.

- Our growth could suffer if the markets into which we sell our products (including software) and services decline, do not grow as anticipated or experience cyclicality.

- We face intense competition and if we are unable to compete effectively, we may experience decreased demand and decreased market share. Even if we compete effectively, we may be required to reduce prices for our products and services.

- Our growth depends in part on the timely development and commercialization, and customer acceptance, of new and enhanced products and services based on technological innovation.

- Our reputation, ability to do business and financial statements may be impaired by improper conduct by any of our employees, agents or business partners.

16

Table of Contents

- Any inability to consummate acquisitions at our historical rate and at appropriate prices could negatively impact our growth rate and stock price.

- Our acquisition of businesses, joint ventures and strategic relationships could negatively impact our financial statements.

- The indemnification provisions of acquisition agreements by which we have acquired companies may not fully protect us and as a result we may face unexpected liabilities.

- Divestitures could negatively impact our business, and contingent liabilities from businesses that we have sold could adversely affect our financial statements.

- Certain of our businesses are subject to extensive regulation by the U.S. Food and Drug Administration ("FDA") and by comparable agencies of other countries, as well as laws regulating fraud and abuse in the healthcare industry and the privacy and security of health information. Failure to comply with those regulations could adversely affect our reputation and financial statements.

- The healthcare industry and related industries that we serve have undergone, and are in the process of undergoing, significant changes in an effort to reduce costs, which could adversely affect our financial statements.

- Our operations, products and services expose us to the risk of environmental, health and safety liabilities, costs and violations that could adversely affect our reputation and financial statements.

- Our businesses are subject to extensive regulation; failure to comply with those regulations could adversely affect our financial statements and reputation.

- We may be required to recognize impairment charges for our goodwill and other intangible assets.

- Foreign currency exchange rates may adversely affect our financial statements.

- Changes in our tax rates or exposure to additional tax liabilities or assessments could affect our profitability. In addition, audits by tax authorities could result in additional tax payments for prior periods.

- We are subject to a variety of litigation and other legal and regulatory proceedings in the course of our business that could adversely affect our financial statements.

- If we do not or cannot adequately protect our intellectual property, or if third parties infringe our intellectual property rights, we may suffer competitive injury or expend significant resources enforcing our rights.

- Third parties may claim that we are infringing or misappropriating their intellectual property rights and we could suffer significant litigation expenses, losses or licensing expenses or be prevented from selling products or services.

- Defects and unanticipated use or inadequate disclosure with respect to our products (including software) or services could adversely affect our business, reputation and financial statements.

- The manufacture of many of our products is a highly exacting and complex process, and if we directly or indirectly encounter problems manufacturing products, our reputation, business and financial statements could suffer.

- Our indebtedness may limit our operations and our use of our cash flow, and any failure to comply with the covenants that apply to our indebtedness could adversely affect our liquidity and financial statements.

- Adverse changes in our relationships with, or the financial condition, performance, purchasing patterns or inventory levels of, key distributors and other channel partners could adversely affect our financial statements.

- Our financial results are subject to fluctuations in the cost and availability of commodities that we use in our operations.

Table of Contents

- If we cannot adjust our manufacturing capacity or the purchases required for our manufacturing activities to reflect changes in market conditions and customer demand, our profitability may suffer. In addition, our reliance upon sole or limited sources of supply for certain materials, components and services could cause production interruptions, delays and inefficiencies.

- Changes in governmental regulations may reduce demand for our products or services or increase our expenses.

- Work stoppages, union and works council campaigns and other labor disputes could adversely impact our productivity and results of operations.

- International economic, political, legal, compliance and business factors could negatively affect our financial statements and in particular geopolitical uncertainties relating to Russia could impact the Company's growth in Russia.

- If we suffer loss to our facilities, supply chains, distribution systems or information technology systems due to catastrophe or other events, our operations could be seriously harmed.

- A significant disruption in, or breach in security of, our information technology systems could adversely affect our business.

- Our defined benefit pension plans are subject to financial market risks that could adversely affect our financial statements.

See Part I – Item 1A of the Company's 2013 Annual Report on Form 10-K for a further discussion regarding reasons that actual results may differ materially from the results, developments and business decisions contemplated by our forward-looking statements. Forward-looking statements speak only as of the date of the report, document, press release, webcast, call, materials or other communication in which they are made. We do not assume any obligation to update or revise any forward-looking statement, whether as a result of new information, future events and developments or otherwise.

OVERVIEW

General

As a result of the Company's geographic and industry diversity, the Company faces a variety of opportunities and challenges, including rapid technological development (particularly with respect to computing, mobile connectivity, communications and digitization) in most of the Company's served markets, the expansion and evolution of opportunities in high-growth markets, trends and costs associated with a global labor force, consolidation of the Company's competitors and increasing regulation. The Company defines high-growth markets as developing markets of the world experiencing rapid growth in gross domestic product and infrastructure which includes Eastern Europe, the Middle East, Africa, Latin America and Asia with the exception of Japan and Australia. The Company operates in a highly competitive business environment in most markets, and the Company's long-term growth and profitability will depend in particular on its ability to expand its business in high-growth geographies and high-growth market segments, identify, consummate and integrate appropriate acquisitions, develop innovative and differentiated new products, services and software with higher gross profit margins, expand and improve the effectiveness of the Company's sales force, continue to reduce costs and improve operating efficiency and quality, and effectively address the demands of an increasingly regulated environment. The Company is making significant investments, organically and through acquisitions, to address the rapid pace of technological change in its served markets and to globalize its manufacturing, research and development and customer-facing resources (particularly in high-growth markets) in order to be responsive to the Company's customers throughout the world and improve the efficiency of the Company's operations.

Business Performance and Outlook

While differences exist among the Company’s businesses, on an overall basis, demand for the Company’s products and services increased during the first quarter of 2014 as compared to the comparable period of 2013 resulting in aggregate year-over-year sales growth from existing businesses of 3.5%. In addition, the Company's continued investments in sales growth initiatives and other business-specific factors discussed below contributed to year-over-year sales growth. Geographically, year-over-year sales growth rates from existing businesses during the first quarter of 2014 were led primarily by the high-growth markets. Sales from existing businesses in high-growth markets grew at a high-single digit rate in the first quarter of 2014 as compared to the comparable period of 2013 and represented approximately 25% of the Company's total sales in the first quarter of 2014. Sales from existing businesses in developed markets grew at a low-single digit rate in the first quarter of 2014 as compared to the comparable period of 2013 due primarily to growth in North America, Japan and Europe, representing the third consecutive

Table of Contents

quarter of growth in Europe. The Company expects overall market conditions to continue to improve, but remains cautious about challenges due to macro-economic and geopolitical uncertainties and monetary and fiscal policies of countries where we do business. While individual businesses will vary, the Company expects sales from existing businesses to continue to grow on a year-over-year basis during the remainder of 2014 at a level in line with that experienced in the first quarter of 2014.

Acquisitions

During the first three months of 2014, the Company acquired five businesses for total consideration of $163 million in cash, net of cash acquired. The businesses acquired complement existing units of the Environmental and Test & Measurement segments. The aggregate annual sales of these five businesses at the time of their respective acquisitions, in each case based on the company's revenues for its last completed fiscal year prior to the acquisition, were approximately $65 million.

Currency Exchange Rates

Currency exchange rates negatively impacted reported sales for the three month period by approximately 0.5% on a year-over-year basis as the U.S. dollar was, on average, stronger against other major currencies during the first three months of 2014 as compared to exchange rate levels during the first three months of 2013, with the exception of the Euro and the Chinese Yuan. If the currency exchange rates in effect as of March 28, 2014 were to prevail throughout the remainder of 2014, currency exchange rates would have a negligible impact on the Company's estimated 2014 sales. Any strengthening of the U.S. dollar against other major currencies would adversely impact the Company's sales and results of operations for the remainder of the year. Any weakening of the U.S. dollar against other major currencies would positively impact the Company's sales and results of operations on an overall basis.

RESULTS OF OPERATIONS

Consolidated sales for the three months ended March 28, 2014 increased 5.0% compared to the three months ended March 29, 2013. Sales from existing businesses accelerated during the quarter contributing 3.5% growth, and sales from acquired businesses contributed 2.0% growth on a year-over-year basis. Currency translation reduced reported sales by 0.5% on a year-over-year basis.

In this report, references to sales from existing businesses refers to sales calculated according to generally accepted accounting principles in the United States ("GAAP") but excluding (1) sales from acquired businesses and (2) the impact of currency translation. References to sales or operating profit attributable to acquisitions or acquired businesses refer to GAAP sales or operating profit, as applicable, from acquired businesses recorded prior to the first anniversary of the acquisition less the impact from the divestiture of a product line, the sales from which (prior to the divestiture) were included in sales from acquired businesses. The portion of revenue attributable to currency translation is calculated as the difference between (a) the period-to-period change in revenue (excluding sales from acquired businesses) and (b) the period-to-period change in revenue (excluding sales from acquired businesses) after applying current period foreign exchange rates to the prior year period. Sales from existing businesses should be considered in addition to, and not as a replacement for or superior to, sales, and may not be comparable to similarly titled measures reported by other companies. Management believes that reporting the non-GAAP financial measure of sales from existing businesses provides useful information to investors by helping identify underlying growth trends in our business and facilitating easier comparisons of our revenue performance with our performance in prior and future periods and to our peers. The Company excludes the effect of currency translation from sales from existing businesses because currency translation is not under management's control, is subject to volatility and can obscure underlying business trends, and excludes the effect of acquisitions and related items because the nature, size and number of acquisitions can vary dramatically from period to period and between the Company and its peers and can also obscure underlying business trends and make comparisons of long-term performance difficult. References to sales volume refer to the impact of both price and unit sales.

Operating profit margins were 16.9% for the three months ended March 28, 2014 as compared to 16.4% in the comparable period of 2013. The following factors impacted year-over-year operating profit margin comparisons.

2014 vs. 2013 operating profit margin comparisons were favorably impacted by:

•

Higher 2014 sales volumes and incremental year-over-year cost savings associated with the restructuring actions and continuing productivity improvement initiatives taken in 2013, net of incremental year-over-year costs associated with various new product development, sales and marketing growth investments - 100 basis points

2014 vs. 2013 operating profit margin comparisons were unfavorably impacted by:

- The incremental net dilutive effect of acquired businesses in 2014 - 50 basis points

19

Table of Contents

Business Segments

The following table summarizes sales by business segment for each of the periods indicated ($ in millions):

	Three Months Ended	
	March 28, 2014	March 29, 2013
Test & Measurement	$871.0	$855.4
Environmental	768.7	725.3
Life Sciences & Diagnostics	1,659.6	1,567.4
Dental	509.7	479.8
Industrial Technologies	853.7	816.8
Total	$4,662.7	$4,444.7

TEST & MEASUREMENT

The Company's Test & Measurement segment is a leading global provider of electronic measurement instruments, professional test tools, thermal imaging and calibration equipment used in electrical, industrial, electronic and calibration applications. Danaher offers test, measurement and monitoring products that are used in electronic design, manufacturing and advanced technology development; network monitoring, management and optimization tools; and security solutions for communications and enterprise networks. Customers for these products and services include manufacturers of electronic instruments; service, installation and maintenance professionals; manufacturers who design, develop, manufacture and deploy network equipment; and service providers who implement, maintain and manage communications networks and services. Also included in the Test & Measurement segment are the Company's mobile tool and wheel service businesses.

Test & Measurement Selected Financial Data ($ in millions):

	March 28, 2014		March 29, 2013	
Sales	$871.0		$855.4	
Operating profit	192.7		187.3	
Depreciation and amortization	33.2		33.8	
Operating profit as a % of sales	22.1	%	21.9	%
Depreciation and amortization as a % of sales	3.8	%	4.0	%

Components of Sales Growth	% Change Three Months Ended March 28, 2014 vs. Comparable 2013 Period	
Existing businesses	1.0	%
Acquisitions	1.0	%
Currency exchange rates	—	%
Total	2.0	%

Year-over-year price increases in the segment had a negligible impact on sales during the three months ended March 28, 2014.

Sales from existing businesses in the segment's instruments businesses grew at a low-single digit rate during the three months ended March 28, 2014 as compared to the comparable period of 2013, with increased year-over-year demand for industrial and calibration products. Demand in the high-growth markets led the increased year-over-year sales, while demand continued to stabilize in Europe and declined in North America, due primarily to weakness in the U.S. government and military end markets.

Table of Contents

Sales from existing businesses in the segment's communications businesses grew at a low-single digit rate during the three months ended March 28, 2014 as compared to the comparable period of 2013 driven by solid growth in network enterprise and network management solutions, partially offset by declines in network security and analysis solutions. The first quarter 2014 growth rate reflects a deceleration compared to 2013. The Company expects this trend to continue in the near term primarily due to the timing of network management projects as compared to the prior year. Geographically, year-over-year sales growth was strong in North America and Asia, somewhat offset by declines in Western Europe.

Operating profit margins increased 20 basis points during the three months ended March 28, 2014 as compared to the comparable period of 2013. The following factors impacted year-over-year operating profit margin comparisons.

2014 vs. 2013 operating profit margin comparisons were favorably impacted by:

- Higher 2014 sales volumes and incremental year-over-year cost savings associated with the restructuring actions and continuing productivity improvement initiatives taken in 2013, net of incremental year-over-year costs associated with various new product development, sales and marketing growth investments - 125 basis points

2014 vs. 2013 operating profit margin comparisons were unfavorably impacted by:

- The incremental net dilutive effect of acquired businesses in 2014 - 105 basis points

ENVIRONMENTAL

The Company’s Environmental segment provides products that help protect the water supply and air quality by serving two primary markets: water quality and retail/commercial petroleum. Danaher’s water quality business is a global leader in water quality analysis and treatment, providing instrumentation and disinfection systems to help analyze and manage the quality of ultra pure water, potable water, wastewater, groundwater and ocean water in residential, commercial, industrial and natural resource applications. Danaher’s retail/commercial petroleum business is a leading worldwide provider of solutions and services focused on fuel dispensing, remote fuel management, point-of-sale systems, payment systems, environmental compliance, vehicle tracking and fleet management.

Environmental Selected Financial Data ($ in millions):

	Three Months Ended	
	March 28, 2014	March 29, 2013
Sales	$768.7	$725.3
Operating profit	145.6	135.1
Depreciation and amortization	18.0	13.2
Operating profit as a % of sales	18.9 %	18.6 %
Depreciation and amortization as a % of sales	2.3 %	1.8 %

Components of Sales Growth	% Change Three Months Ended March 28, 2014 vs. Comparable 2013 Period
Existing businesses	4.0 %
Acquisitions	2.5 %
Currency exchange rates	(0.5)%
Total	6.0 %

Year-over-year price increases in the segment contributed 1.0% to sales growth during the three months ended March 28, 2014 and are reflected as a component of the change in sales from existing businesses.

Sales from existing businesses in the segment's water quality businesses grew at a low-single digit rate during the three months ended March 28, 2014 as compared to the comparable period of 2013. Sales growth in the analytical instrumentation business was led primarily by strong sales of consumables and related service in North America, Western Europe and China. Sales in the business' chemical treatment solutions product line also grew on a year-over-year basis during the three months due primarily to continued sales force investments in the U.S. market, and to a lesser extent, continued international expansion.

Table of Contents

Year-over-year sales from existing businesses in the business' ultraviolet water disinfection product line declined during the first three months of 2014 due to continued weak demand in municipal end markets, primarily in North America and Western Europe.
Sales from existing businesses in the segment's retail petroleum equipment businesses grew at a mid-single digit rate during the three months ended March 28, 2014 as compared to the comparable period of 2013. On a year-over-year basis, the business experienced strong increase in global demand for its point-of-sale solutions, payment systems, and services, as well as dispenser sales in Western Europe and China. This growth was partially offset by a decline in demand for dispensers in North America.
Operating profit margins increased 30 basis points during the three months ended March 28, 2014 as compared to the comparable period of 2013. The following factors impacted year-over-year operating profit margin comparisons.

2014 vs. 2013 operating profit margin comparisons were favorably impacted by:

- Higher 2014 sales volumes and incremental year-over-year cost savings associated with the restructuring actions and continuing productivity improvement initiatives taken in 2013, net of incremental year-over-year costs associated with various new product development, sales and marketing growth investments and increased depreciation and amortization from prior year acquisitions - 145 basis points

2014 vs. 2013 operating profit margin comparisons were unfavorably impacted by:

- The incremental net dilutive effect of acquired businesses in 2014 - 115 basis points

LIFE SCIENCES & DIAGNOSTICS

The Company’s diagnostics businesses offer a broad range of analytical instruments, reagents, consumables, software and services that hospitals, physician’s offices, reference laboratories and other critical care settings use to diagnose disease and make treatment decisions. The Company’s life sciences businesses offer a broad range of research and clinical tools that scientists use to study cells and cell components to understand the causes of disease, identify new therapies and test new drugs and vaccines.
Life Sciences & Diagnostics Selected Financial Data ($ in millions):

	Three Months Ended			
	March 28, 2014		March 29, 2013	
Sales	$1,659.6		$1,567.4	
Operating profit	219.7		199.3	
Depreciation and amortization	128.8		125.2	
Operating profit as a % of sales	13.2	%	12.7	%
Depreciation and amortization as a % of sales	7.8	%	8.0	%

Components of Sales Growth	% Change Three Months Ended March 28, 2014 vs. Comparable 2013 Period	
Existing businesses	4.0	%
Acquisitions	2.5	%
Currency exchange rates	(0.5	)%
Total	6.0	%

Year-over-year price increases in the segment had a negligible impact on sales during the three months ended March 28, 2014.

Sales from existing businesses in the segment's diagnostics business grew at a low-single digit rate during the three months ended March 28, 2014 as compared to the comparable period of 2013, primarily due to strong demand in the acute care and pathology diagnostic businesses and, to a lesser extent, the clinical business. Demand in the clinical business increased on a year over-year-basis led by strong demand in the high-growth markets, largely offset by year-over-year declines in demand in North America and Europe, driven by decreased utilization in these regions and one less selling day in the quarter as compared

Table of Contents

to the comparable period of 2013. Year-over-year sales growth in the acute care diagnostic business was driven primarily by continued strong global consumable sales related to the installed base of acute care instruments. Geographically, this business' year-over-year sales growth was led by China, the Middle East and Japan which was somewhat offset by year-over-year declines in North America and Western Europe. The majority of the year-over-year sales growth in the pathology diagnostics business was driven by increased demand for advanced staining systems and consumables in Western Europe and China.

Sales from existing businesses in the segment's life sciences businesses grew at a mid-single digit rate during the three months ended March 28, 2014 as compared to the comparable period of 2013, due primarily to continued strong demand for the business' recently introduced products. Sales of the business' broad range of mass spectrometers continued to grow on a year-over-year basis led by North America and Europe. Sales of surgical and stereo microscopy products increased on a year-over-year basis due primarily to strong demand in high-growth markets and Japan. The business' flow cytometry and sample preparation product lines also contributed to the year-over-year growth, with growth in all major geographies.

Operating profit margins increased 50 basis points during the three months ended March 28, 2014 as compared to the comparable period of 2013. The following factors impacted year-over-year operating profit margin comparisons.

2014 vs. 2013 operating profit margin comparisons were favorably impacted by:

- Higher 2014 sales volumes and incremental year-over-year cost savings associated with the restructuring actions and continuing productivity improvement initiatives taken in 2013, net of incremental year-over-year costs associated with various new product development, sales and marketing growth investments - 75 basis points

2014 vs. 2013 operating profit margin comparisons were unfavorably impacted by:

- The incremental net dilutive effect of acquired businesses in 2014 - 25 basis points

DENTAL

The Company’s Dental segment is a leading worldwide provider of a broad range of dental consumables, equipment and services that are used to diagnose, treat and prevent disease and ailments of the teeth, gums and supporting bone, and to improve the aesthetics of the human smile. The Company is dedicated to driving technological innovations that help dental professionals improve clinical outcomes and enhance productivity.

Dental Selected Financial Data ($ in millions):

Existing businesses	6.0	%
Acquisitions	—	%
Currency exchange rates	—	%
Total	6.0	%

Year-over-year price increases in the segment had a negligible impact on sales during the three months ended March 28, 2014.

Table of Contents

Sales from existing businesses in the dental segment grew at a mid-single digit rate during the three months ended March 28, 2014 as compared to the comparable period of 2013 primarily as a result of increased sales of professional dental consumables, implant and orthodontic products in all major geographies and continued increased demand for imaging products and treatment units in North America, high-growth markets and Japan, ahead of its April 1, 2014 value added tax rate increase.

Operating profit margins increased 170 basis points during the three months ended March 28, 2014 as compared to the comparable period of 2013. Higher 2014 sales volumes and incremental year-over-year cost savings associated with the restructuring actions and continuing productivity improvement initiatives taken in 2013, net of incremental year-over-year costs associated with various new product development, sales and marketing growth investments, favorably impacted operating profit margin comparisons.

INDUSTRIAL TECHNOLOGIES

The Company’s Industrial Technologies segment is a leading global provider of equipment, consumables and software for various printing, marking, coding, design and color management applications on consumer and industrial products. The segment is also a leading global provider of electromechanical motion control solutions for the industrial automation and packaging markets. In addition to the product identification and motion strategic lines of business, the segment also includes Danaher's sensors and controls, energetic materials and engine retarder businesses.

Industrial Technologies Selected Financial Data ($ in millions):

	Three Months Ended			
	March 28, 2014		March 29, 2013	
Sales	$853.7		$816.8	
Operating profit	191.7		170.9	
Depreciation and amortization	22.4		21.8	
Operating profit as a % of sales	22.5	%	20.9	%
Depreciation and amortization as a % of sales	2.6	%	2.7	%

Components of Sales Growth	% Change Three Months Ended March 28, 2014 vs. Comparable 2013 Period	
Existing businesses	3.0	%
Acquisitions	1.0	%
Currency exchange rates	0.5	%
Total	4.5	%

Price increases in the segment contributed 1.0% to sales growth on a year-over-year basis during the three months ended March 28, 2014 and are reflected as a component of the change in sales from existing businesses.

Sales from existing businesses in the segment’s motion businesses declined at a low-single digit rate during the three months ended March 28, 2014 as compared to the comparable period of 2013. Improving year-over-year demand in the distribution market, primarily in North America, was more than offset by soft demand in technology, defense and industrial automation related end-markets, and the impact of exiting certain low-margin original equipment manufacturers product lines. Year-over-year growth rates for the motion businesses are expected to continue to improve during 2014.

Sales from existing businesses in the segment’s product identification businesses grew at a mid-single digit rate during the three months ended March 28, 2014 as compared to the comparable period of 2013. Continued increased demand for marking and coding equipment and related consumables as well as packaging and color solutions in most major

end-markets was partially offset by lower year-over-year demand in consumer electronics related equipment. Geographically, year-over-year sales growth was strong in North America, Europe and Latin America.

Table of Contents

Sales from existing businesses in the segment's other businesses collectively grew at a mid-single digit rate during the three months ended March 28, 2014 as compared to the comparable period of 2013, primarily due to strong demand in the segment's engine retarder business. Sales from existing businesses in the segment's sensors and controls businesses were essentially flat on a year-over-year basis.
Operating profit margins increased 160 basis points during the three months ended March 28, 2014 as compared to the comparable period of 2013. The following factors impacted year-over-year operating profit margin comparisons.

2014 vs. 2013 operating profit margin comparisons were favorably impacted by:

- Higher 2014 sales volumes and incremental year-over-year cost savings associated with the restructuring actions and continuing productivity improvement initiatives taken in 2013, net of incremental year-over-year costs associated with various new product development, sales and marketing growth investments - 185 basis points

2014 vs. 2013 operating profit margin comparisons were unfavorably impacted by:

- The incremental net dilutive effect of acquired businesses in 2014 - 25 basis points

COST OF SALES AND GROSS PROFIT

($ in millions)	Three Months Ended	
	March 28, 2014	March 29, 2013
Sales	$4,662.7	$4,444.7
Cost of sales	(2,209.8)	(2,119.0)
Gross profit	2,452.9	2,325.7
Gross profit margin	52.6 %	52.3 %

The year-over-year increase in gross profit margins during the three month period ended March 28, 2014 as compared to the comparable period in 2013, is due primarily to the favorable impact of higher year-over-year sales volumes, incremental year-over-year cost savings associated with 2013 restructuring activities and continued productivity improvements.

OPERATING EXPENSES

($ in millions)	Three Months Ended	
	March 28, 2014	March 29, 2013
Sales	$4,662.7	$4,444.7
Selling, general and administrative ("SG&A") expenses	1,350.6	1,298.4
Research and development ("R&D") expenses	313.4	296.4
SG&A as a % of sales	29.0 %	29.2 %
R&D as a % of sales	6.7 %	6.7 %

Selling, general and administrative expenses as a percentage of sales declined 20 basis points on a year-over-year basis during the three month period ended March 28, 2014. Incremental year-over-year increases in investments in sales and marketing growth initiatives were offset by increased leverage of the Company's general and administrative cost base resulting from higher first quarter 2014 sales and incremental year-over-year cost savings associated with 2013 restructuring activities.

Research and development expenses (consisting principally of internal and contract engineering personnel costs) as a percentage of sales were consistent on a year-over-year basis during the first three months of 2014 as compared to 2013.

INTEREST COSTS AND FINANCING

For a discussion of the Company's outstanding indebtedness, refer to Note 6 of the Consolidated Condensed Financial Statements.

Table of Contents

Interest expense of $33 million for the three months ended March 28, 2014 was $6 million lower than the comparable period of 2013. The decrease in interest expense results primarily from the repayment of the €500 million principal amount of Eurobond notes due 2013 and the $300 million principal amount of floating rate senior notes due 2013 upon maturity in July and June 2013, respectively.

INCOME TAXES

The Company’s effective tax rate for the three months ended March 28, 2014 and March 29, 2013 was 23.9% and 25.0%, respectively.

The Company's effective tax rate for 2014 and 2013 differs from the U.S. federal statutory rate of 35% due principally to the Company’s earnings outside the United States that are indefinitely reinvested and taxed at rates lower than the U.S. federal statutory rate. The effective tax rate for the three months ended March 28, 2014 includes tax effects of certain discrete items specific to the quarter, none of which are significant individually or in the aggregate. During the three months ended March 29, 2013, the Company's gain on the sale of the Apex joint venture increased the reported tax rate by 3.5%, which was partially offset by the retroactive reinstatement of certain tax benefits and credits from the enactment of the American Tax Relief Act of 2012.

The Company conducts business globally and files numerous consolidated and separate income tax returns in the United States federal, state and foreign jurisdictions. The countries in which the Company has a material presence that have significantly lower statutory tax rates than the United States include China, Denmark, Germany and the United Kingdom. The Company's ability to obtain a tax benefit from lower statutory tax rates outside of the United States is dependent on its levels of taxable income in these foreign countries. The Company believes that a change in the statutory tax rate of any individual foreign country would not have a material effect on the Company's financial statements given the dispersion of the Company's foreign income tax provision.

The Company and its subsidiaries are routinely examined by various domestic and international taxing authorities. The Internal Revenue Service (“IRS”) has completed examinations of certain of the Company's federal income tax returns through 2009 and is currently examining the federal income tax returns for 2010 and 2011. In addition, the Company has subsidiaries in Belgium, Brazil, Canada, Denmark, France, Finland, Germany, India, Italy, Japan, Norway, Singapore, Sweden, the United Kingdom and various other countries, states and provinces that are currently under audit for years ranging from 2004 through 2012.

Tax authorities in Denmark and Germany have raised significant issues related to the deductibility and taxability of interest accrued by certain of the Company's subsidiaries. On December 10, 2013, the Company received assessments from the Danish tax authority (“SKAT”) totaling approximately DKK 1.1 billion (approximately $200 million based on exchange rates as of March 28, 2014) imposing withholding tax and interest thereon relating to interest accrued in Denmark on borrowings from certain of the Company's subsidiaries for the years 2004-2009. If the SKAT claims are successful, it is likely that the Company would be assessed additional amounts through March 2014 totaling approximately DKK 800 million (approximately $150 million based on exchange rates as of March 28, 2014) as well as future interest on the disputed withholding tax for subsequent periods prior to such a determination. Discussions with the German tax authorities are ongoing and final assessments have not been issued.

Management believes the positions the Company has taken in both Denmark and Germany are in accordance with the relevant tax laws and intends to vigorously defend its positions, including contesting the SKAT assessment; however, the ultimate resolution of these matters is uncertain, could take many years, and individually or in the aggregate could result in a material adverse impact to the Company's financial statements, including its effective tax rate.

The effective tax rate for the balance of 2014 is forecasted to be approximately 24.0% based on the projected mix of earnings before tax by jurisdiction, excluding the impact of any matters that would be treated as “discrete.” The actual mix of earnings by jurisdiction could fluctuate from the Company's projection which would impact the Company's effective tax rate for the period. In addition, the tax effects of discrete items, including accruals related to tax contingencies, the resolution of worldwide tax matters, tax audit settlements, statute of limitations expirations and changes in tax regulations, are reflected in the period in which they occur. As a result, it is reasonably possible that the actual effective tax rate used for financial reporting purposes will change in future periods.

INFLATION

The effect of inflation on the Company's revenues and net earnings was not significant in the three months ended March 28, 2014.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

Management assesses the Company’s liquidity in terms of its ability to generate cash to fund its operating, investing and financing activities. The Company continues to generate substantial cash from operating activities and believes that its operating cash flow and other sources of liquidity will be sufficient to allow it to continue investing in existing businesses, consummating strategic acquisitions, paying interest and servicing debt and managing its capital structure on a short and long-term basis.

Following is an overview of the Company’s cash flows and liquidity for the three months ended March 28, 2014:

Overview of Cash Flows and Liquidity

($ in millions)	Three Months Ended March 28, 2014	March 29, 2013
Total operating cash flows	$511.2	$636.5
Cash paid for acquisitions	$(162.8)	$(12.1)
Payments for additions to property, plant and equipment	(130.9)	(116.3)
Proceeds from sale of unconsolidated joint venture	—	692.0
All other investing activities	9.0	(8.9)
Net cash (used in) provided by investing activities	$(284.7)	$554.7
Proceeds from the issuance of common stock	$30.0	$54.3
Payment of dividends	(17.4)	—
Net proceeds from (repayments of) borrowings (maturities of 90 days or less)	3.1	(764.3)
Repayments of borrowings (maturities longer than 90 days)	(1.0)	(0.5)
Net cash provided by (used in) financing activities	$14.7	$(710.5)

- Operating cash flows decreased $125 million, or 20%, during the first quarter of 2014 as compared to the first quarter of 2013, due primarily to year-over-year changes in the amount and timing of collection of trade accounts receivable and payments of trade accounts payables. In addition, operating cash flows for the first quarter of 2013 benefited from $67 million of dividends received related to earnings of the Apex joint venture.

- Cash paid for acquisitions constituted the most significant use of cash during the first three months of 2014. The Company acquired five businesses during the first three months of 2014 for total consideration (net of cash acquired) of $163 million.

- As of March 28, 2014, the Company held $3.3 billion of cash and cash equivalents.

Operating Activities

Cash flows from operating activities can fluctuate significantly from period to period as working capital needs and the timing of payments for items such as income taxes, restructuring activities, pension funding and other items impact reported cash flows.

Operating cash flows from continuing operations were $511 million for the first three months of 2014, a decrease of $125 million, or 20%, as compared to the comparable period of 2013. The year-over-year change in operating cash flows from 2013 to 2014 was primarily attributable to the following factors:

- The aggregate of trade accounts receivable, inventories and trade accounts payable used $170 million in operating cash flows during the first three months of 2014, compared to providing $27 million in the comparable period of 2013. The amount of cash flow generated from or used by the aggregate of trade accounts receivable, inventories and trade accounts payable depends upon how effectively the Company manages the cash conversion cycle, which effectively represents the number of days that elapse from the day it pays for the purchase of raw materials and

components to the collection of cash from its customers and can be significantly impacted by the timing of collections and payments in a period. The Company expects the impact of these operating factors to normalize in the balance of 2014.

Table of Contents

- First quarter 2013 operating cash flows included $67 million of dividends received related to earnings of the Apex joint venture, which was sold in 2013. These dividends increased first quarter 2013 operating cash flows but did not repeat in 2014 due to the sale.

- 2014 operating cash flows benefited from higher net earnings, excluding the impact of the gain on the sale of the Apex joint venture, as compared to the comparable 2013 period. While the gain on the sale of Apex was included in 2013 earnings from continuing operations, the proceeds from this sale are shown in the investing activities section of the Statement of Cash Flows and therefore do not contribute to operating cash flows.

- Net earnings for the first three months of 2014 reflected an increase of $8 million of depreciation and amortization expense as compared to the comparable period of 2013. Amortization expense primarily relates to the amortization of intangible assets acquired in connection with acquisitions. Depreciation expense relates to both the Company's manufacturing and operating facilities as well as instrumentation leased to customers under operating-type lease arrangements. Depreciation and amortization are non-cash expenses that decrease earnings without a corresponding impact to operating cash flows.

Investing Activities

Cash flows relating to investing activities consist primarily of cash used for acquisitions and capital expenditures, including instruments leased to customers, and cash proceeds from divestitures of businesses or assets.

Net cash used in investing activities was $285 million during the first three months of 2014 compared to $555 million of cash provided in the first three months of 2013. For a discussion of the Company's acquisitions during the first three months of 2014 refer to "—Overview." In the first three months of 2013, the Company generated $692 million of cash from the sale of the Apex joint venture.

Capital expenditures are made primarily for increasing capacity, replacing equipment, supporting new product development, improving information technology systems and the manufacture of instruments that are used in operating-type lease arrangements that certain of the Company's businesses enter into with customers. Capital expenditures increased $15 million or 13% on a year-over-year basis for the first three months of 2014 compared to 2013 reflecting continued investments in equipment leased to customers and other operating assets. For full year 2014, the Company expects capital spending to approximate $650 million, though actual expenditures will ultimately depend on business conditions.

Financing Activities and Indebtedness

Cash flows from financing activities consist primarily of proceeds from the issuance of commercial paper, common stock and debt, excess tax benefits from stock-based compensation, payments of principal on indebtedness, payments for repurchases of common stock and payments of dividends to shareholders. Financing activities provided cash of $15 million during the first three months of 2014 compared to a use of $711 million during the first three months of 2013, due primarily to the incrementally lower year-over-year net repayments of commercial paper borrowings.

For a description of the Company's outstanding debt as of March 28, 2014, refer to Note 6 of the Consolidated Condensed Financial Statements. As of March 28, 2014, the Company was in compliance with all of its debt covenants.

The Company satisfies any short-term liquidity needs that are not met through operating cash flow and available cash primarily through issuances of commercial paper under its U.S. and Euro commercial paper programs. As of March 28, 2014, borrowings outstanding under the Company's U.S. commercial paper program had a weighted average annual interest rate of 0.1% and a weighted average remaining maturity of approximately thirteen days. There was no commercial paper outstanding under the Euro commercial paper program as of March 28, 2014. As commercial paper obligations mature, the Company anticipates issuing additional short-term commercial paper obligations to refinance all or part of these borrowings. As of March 28, 2014, the Company has classified its borrowings outstanding under the commercial paper program and its $400 million principal amount of 1.3% senior notes due June 23, 2014 as long-term debt in the accompanying Consolidated Condensed Balance Sheet as the

Company had the intent and ability, as supported by availability under the Credit Facility referenced below, to refinance these borrowings for at least one year from the balance sheet date.

28

Table of Contents

Credit support for the commercial paper program is provided by a $2.5 billion unsecured multi-currency revolving credit facility with a syndicate of banks that expires on July 15, 2016 (the “Credit Facility”). The Credit Facility can also be used for working capital and other general corporate purposes. As of March 28, 2014, no borrowings were outstanding under the Credit Facility and the Company was in compliance with all covenants under the facility. In addition to the Credit Facility, the Company has entered into reimbursement agreements with various commercial banks to support the issuance of letters of credit.

The Company has filed a “well-known seasoned issuer” shelf registration statement on Form S-3 with the SEC that registers an indeterminate amount of debt securities, common stock, preferred stock, warrants, depositary shares, purchase contracts and units for future issuance. The Company expects to use net proceeds realized by the Company from future securities sales off this shelf for general corporate purposes, including without limitation repayment or refinancing of debt or other corporate obligations, acquisitions, capital expenditures, share repurchases and dividends, and working capital.

Neither the Company nor any “affiliated purchaser” repurchased any shares of Company common stock during the three months ended March 28, 2014. On July 16, 2013, the Company's Board of Directors approved a new repurchase program (the “2013 Repurchase Program”) authorizing the repurchase of up to 20 million shares of the Company's common stock from time to time on the open market or in privately negotiated transactions. As of March 28, 2014, 20 million shares remained available for repurchase pursuant to the 2013 Repurchase Program.

Aggregate cash payments for dividends during the first three months of 2014 were $17 million. The Company declared a regular quarterly dividend of $0.10 per share payable on April 25, 2014 to holders of record on March 28, 2014, reflecting a 300% increase in the per share amount of the Company's quarterly dividend. The Company made no cash payments for dividends during the first quarter of 2013 because the Company's Board had determined to accelerate the quarterly dividend payment that normally would have been paid in January 2013 and paid it in December 2012.

Cash and Cash Requirements

As of March 28, 2014, the Company held $3.3 billion of cash and cash equivalents that were invested in highly liquid investment grade debt instruments with a maturity of 90 days or less with an approximate weighted average annual interest rate of 0.4%. Of this amount, $1.3 billion was held within the United States and $2.0 billion was held outside of the United States. The Company will continue to have cash requirements to support working capital needs, capital expenditures and acquisitions, to pay interest and service debt, pay taxes and any related interest or penalties, fund its restructuring activities and pension plans as required, repurchase shares of the Company’s common stock, pay dividends to shareholders and support other business needs. The Company generally intends to use available cash and internally generated funds to meet these cash requirements, but in the event that additional liquidity is required, particularly in connection with acquisitions, the Company may also borrow under its commercial paper program or the Credit Facility, enter into new credit facilities and either borrow directly thereunder or use such credit facilities to backstop additional borrowing capacity under its commercial paper program and/or access the capital markets. The Company also may from time to time access the capital markets to take advantage of favorable interest rate environments or other market conditions. With respect to the $400 million principal amount of 1.3% senior notes which mature on June 23, 2014, the Company expects to repay the principal amounts when due under these notes using available cash, proceeds from the issuance of commercial paper and/or proceeds from other debt issuances.

While repatriation of some cash held outside the United States may be restricted by local laws, most of the Company's foreign cash balances could be repatriated to the United States but, under current law, could be subject to U.S federal income taxes, less applicable foreign tax credits. For most of its foreign subsidiaries, the Company makes an election regarding the amount of earnings intended for indefinite reinvestment, with the balance available to be repatriated to the United States. A deferred tax liability has been accrued for the funds that are available to be repatriated to the United States. No provisions for U.S. income taxes have been made with respect to earnings that are planned to be reinvested indefinitely outside the United States, and the amount of U.S. income taxes that may be applicable to such earnings is not readily determinable given the various tax planning alternatives the Company could employ if it repatriated these earnings. The cash that the Company's foreign subsidiaries hold for indefinite reinvestment is generally used to finance foreign operations and investments, including acquisitions. As of March 28, 2014,

management believes that it has sufficient liquidity to satisfy its cash needs, including its cash needs in the United States.

During 2014, the Company’s cash contribution requirements for its U.S. and its non-U.S. defined benefit pension plans are expected to be approximately $50 million and $55 million, respectively. The ultimate amounts to be contributed depend upon, among other things, legal requirements, underlying asset returns, the plan’s funded status, the anticipated tax deductibility of the contribution, local practices, market conditions, interest rates and other factors.

Table of Contents

CRITICAL ACCOUNTING POLICIES

There were no material changes during the three months ended March 28, 2014 to the items that the Company disclosed as its critical accounting policies and estimates in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in the Company’s 2013 Annual Report on Form 10-K.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Quantitative and qualitative disclosures about market risk appear in “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Financial Instruments and Risk Management,” in the Company’s 2013 Annual Report on Form 10-K. There were no material changes during the three months ended March 28, 2014 to this information reported in the Company’s 2013 Annual Report on Form 10-K.

ITEM 4. CONTROLS AND PROCEDURES

The Company’s management, with the participation of the Company’s President and Chief Executive Officer, and Executive Vice President and Chief Financial Officer, has evaluated the effectiveness of the Company’s disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) as of the end of the period covered by this report. Based on such evaluation, the Company’s President and Chief Executive Officer, and Executive Vice President and Chief Financial Officer, have concluded that, as of the end of such period, the Company’s disclosure controls and procedures were effective.

There have been no changes in the Company’s internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the Company’s most recent completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1A. RISK FACTORS

Information regarding risk factors appears in “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Information Relating to Forward-Looking Statements,” in Part I — Item 2 of this Form 10-Q and in Part I — Item 1A of Danaher’s 2013 Annual Report on Form 10-K.

There were no material changes during the three months ended March 28, 2014 to the risk factors described in Danaher's 2013 Annual Report on Form 10-K.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Neither the Company nor any “affiliated purchaser” repurchased any shares of Company common stock during the three months ended March 28, 2014. On July 16, 2013, the Company's Board of Directors approved a new repurchase program (the “2013 Repurchase Program”) authorizing the repurchase of up to 20 million shares of the Company's common stock from time to time on the open market or in privately negotiated transactions. There is no expiration date for the 2013 Repurchase Program, and the timing and amount of any shares repurchased under the program will be determined by the Company's management based on its evaluation of market conditions and other factors. The 2013 Repurchase Program may be suspended or discontinued at any time. Any repurchased shares will be available for use in connection with the Company's equity compensation plans (or any successor plan) and for other corporate purposes. As of March 28, 2014, 20 million shares remained available for repurchase pursuant to the 2013 Repurchase Program.

During the first quarter of 2014, holders of certain of the Company’s Liquid Yield Option Notes due 2021 (“LYONs”) converted such LYONs into an aggregate of 88,458 shares of Danaher common stock, par value $0.01 per share. In each case, the shares of common stock were issued solely to existing security holders upon conversion of the LYONs pursuant to the exemption from registration provided under Section 3(a)(9) of the Securities Act of 1933, as amended.
