[] Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 2.02 - Results of Operations and Financial Condition.

Included below is a release of financial information mailed to stockholders on March 11, 2009. It reflects the financial condition, in a condensed format, for Kansas City Life Insurance Company as of December 31, 2008, and was previously included in the Company's fourth quarter Form 10-K report filed on February 27, 2009.

Message from the President, CEO and Chairman of the Board

Kansas City Life Insurance Company recorded a net loss of \$17.1 million or \$1.47 per share for the year ended December 31, 2008, compared with net income of \$35.7 million or \$3.01 per share for the prior year. The decline in earnings for the year was largely the result of realized losses on investments. Excluding the impact of realized gains and losses on investments, net earnings after tax were \$16.9 million, compared with \$32.1 million a year ago.

Results in the fourth quarter were consistent with those for the year, as the Company experienced a net loss of \$7.2 million or \$0.62 per share. This compares to net income of \$6.4 million or \$0.54 per share in the fourth quarter of 2007.

The net realized loss for both the year and quarter was the result of the continued deep economic recession. The impact of the recession has been felt across all sectors and has negatively affected values of virtually all financial assets. The Company incurred net realized investment losses after taxes of \$34.0 million for the year, including \$9.5 million in the fourth quarter, primarily due to write-downs of securities determined to be other-than-temporarily impaired. The economic downturn has also affected net investment income through reduced yields and a lower amount of invested assets. As a result, net investment income declined \$13.0 million for the year compared with 2007. In spite of the economic environment, the Company continues to maintain a strong capital position and a well diversified investment portfolio. The Company had 96% of its fixed maturity security holdings in investment grade securities at December 31, 2008, up from 94% at December 31, 2007, and approximately one-third of these investments were in AAA rated investments as of both dates.

Total insurance revenues increased 2% for the year, largely due to a 3% increase in premiums. New premiums increased 20% for the year, led by a 55% increase in the sale of immediate annuities and a 37% increase in group life insurance sales. New individual life premiums increased 5% while group accident and health premiums increased 9%. However, contract charges declined 2%, primarily due to lower balances of certain products. New deposits declined 1% compared with an 8% increase a year earlier. This decline largely occurred in the variable life and annuity products, where consumers were affected by the negative performance in the equity markets during the year. New deposits for variable life products declined 22% and new variable annuity deposits declined 13% versus the prior year. However, deposits related to universal life were flat relative to 2007 and fixed deferred annuities increased 15%. Renewal premiums declined 1% and renewal deposits declined 4% versus the prior year.

Total benefits and expenses increased 4% in 2008 compared with 2007, primarily due to a \$4.4 million increase in death benefits, a \$1.8 million increase in the amortization of deferred acquisition costs and value of business acquired and a \$4.5 million increase in operating expenses. Mortality experience deteriorated during the year but remained within pricing expectations. The amortization of deferred acquisition costs increased, primarily reflecting a reduction of variable account balances due to policyholder withdrawals and a decline in the market value of these account balances. Operating expenses increased in 2008, primarily due to increases in employee medical plan and benefit costs combined with a reduction in employee benefit plan accruals in 2007.

On January 26, 2009, the Kansas City Life Board of Directors declared a quarterly dividend of \$0.27 per share that was paid on February 10, 2009 to stockholders of record as of February 5, 2009.

The steep economic downturn has dramatically changed the landscape for many individuals and families, demonstrating the potential impact of unexpected and unforeseen events. Kansas City Life's mission is to ensure that individuals and families are prepared and protected against many of the unpredictable elements of life. Life insurance and its unique attributes offer immediate peace of mind, and the power of its protection has been proven repeatedly throughout history. In these uncertain economic times, the Company's field force representatives, comprised of general agents and agents, have been challenged to help their clients and prospective clients fully understand just how important Security Assured can be.

Despite the economic situation, Kansas City Life is prepared to provide quality financial products and services to prospective policyholders and to fulfill its commitment to all of those who already have come to entrust the Company to provide for their future needs. The Company has no long-term debt, a strong capital position and a well diversified investment portfolio. Kansas City Life's dependability has been documented and tested throughout the past 113 years, and the Company remains committed to provide Security Assured for future generations.
