Brian D. Walters
Vice President and General Counsel
Matthews International Corporation
412-442-8217
(Name and telephone number, including area code, of person to contact in connection with this report)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and to provide the period to which the information in this form applies:

X Rule 13p-1 under the Securities Exchange Act (17 CFR 230.13p-1) for the reporting period from January 1 to December 31, 2015.

Section 1 – Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

Matthews International Corporation ("Matthews" or the "Company") is a global provider of brand solutions, memorialization products and industrial automation solutions. Brand solutions include brand development, deployment and delivery (consisting of brand management, printing plates and cylinders, pre-media services and imaging services for consumer packaged goods and retail customers, merchandising display systems, and marketing and design services). Memorialization products consist primarily of bronze and granite memorials and other memorialization products, caskets and cremation equipment primarily for the cemetery and funeral home industries. Industrial automation solutions include marking and coding equipment and consumables, industrial automation products and order fulfillment systems for identifying, tracking, picking and conveying consumer and industrial products.

Conflict Minerals Disclosure

This Form SD is filed pursuant to Rule 13p-1 promulgated under the Securities Exchange Act of 1934, as amended (the "Rule"), for the reporting period January 1, 2015 to December 31, 2015 (the "reporting period"). A copy of the Company's Conflict Minerals Report is provided as Exhibit 1.02 to this Form SD, and is publicly available at <http://matw.com/corporate/corporate-governance>.

The Rule requires disclosure of certain information when a company manufactures or contracts to manufacture products for which the minerals specified in the Rule are necessary to the functionality or production of those products. The specified minerals are gold, columbite-tantalite (coltan), cassiterite and wolframite, including their derivatives, which are limited to tantalum, tin and tungsten (collectively, the "conflict minerals"). The "Covered Countries" for purposes of the Rule are the Democratic Republic of Congo, the Republic of the Congo, the Central African Republic, South Sudan, Uganda, Rwanda, Burundi, Tanzania, Zambia and Angola.

Our policy, which is that we are committed to working with our suppliers to comply with the requirements of the Rule, is distributed to all of our applicable direct suppliers and is made publicly available at <http://matw.com/corporate/corporate-governance>.

Internal Product Review

The Company reviewed the finished goods that it manufactures either internally or pursuant to arrangements with third-party manufacturers during the reporting period (the "product review"). The objective of the product review was to identify finished goods that the Company manufactures or contracts to manufacture that may contain one or more Conflict Minerals.

The product review was overseen by the Company's legal department, with the involvement of the head of global procurement, and consisted of information solicited from and provided by representatives from divisions across the Company, including internationally.

Based on the product review, we determined that the Company manufactures, or contracts to manufacture, certain products containing Conflict Minerals that are necessary to the functionality or production of such products. These products are in the following product categories:

- Bronze memorials and architectural products;

- Marking and coding products and automation and fulfillment solutions, which are used for identifying, tracking, picking and conveying consumer and industrial products;
- Cremation equipment;
- Certain brand solutions, which include printing plates and gravure cylinders; and
- Casket products.

Reasonable Country of Origin Inquiry

Based on the product review, the Company identified approximately 400 vendors that were likely to supply the Company with applicable products in 2015 that were at risk of containing Conflict Minerals. The Company determined that these vendors should be included within the scope of the Company's reasonable country of origin inquiry ("RCOI").

The Company developed and sent surveys to these vendors. The objective of the Company's survey was to confirm whether Conflict Minerals were contained in the applicable products and, if so, (i) originated in the Covered Countries or (ii) were from scrap or recycled sources.

The survey used by the Company asked for a certified response from vendors as to whether the products supplied to the Company contained Conflict Minerals, and, if so, whether those products originated in the Covered Countries or otherwise were from scrap or recycled sources. The survey also referred vendors to the conflict minerals reporting template developed by the Electronic Industry Citizenship Coalition/Global e-Sustainability Initiative Extractives Working Group (the "EICC/GeSI Reporting Template") and asked vendors to complete the template and furnish it along with the vendor's response to the survey.

Results of Reasonable Country of Origin Inquiry

Pursuant to the Rule, if following a good-faith RCOI, a company knows, or has reason to believe, that any of the necessary Conflict Minerals in its supply chain have originated from the Covered Countries and may not be from recycled or scrap sources, then that company must execute due diligence on the source and chain of custody of such Conflict Minerals and file a report describing its due diligence measures.

The Company has determined that the responses obtained in the RCOI were insufficient to form the basis for a reasonable determination as to the specific origin of the Conflict Minerals necessary to the functionality or production of the finished goods in those product categories set forth above. The Company has therefore exercised due diligence on the source and chain of custody of these Conflict Minerals as described in Exhibit 1.02 (the "Conflict Minerals Report").

Item 1.02 Exhibit

A copy of the Company's Conflict Minerals Report is provided as Exhibit 1.01 to this Form SD. A copy of the Company's Conflict Minerals Report is publicly available at <http://matw.com/corporate/corporate-governance>.

Section 2 – Exhibits

Item 2.01 Exhibits

The following exhibit is filed as part of this report.
