Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

YRC Worldwide Inc. and Subsidiaries
(Unaudited)

1. Description of Business

YRC Worldwide Inc. (also referred to as “YRC Worldwide”, “the Company”, “we”, “us” or “our”), one of the largest transportation service providers in the world, is a holding company that through wholly owned operating subsidiaries and its interests in certain joint ventures offers its customers a wide range of transportation services. YRC Worldwide has one of the largest, most comprehensive less-than-truckload (“LTL”) networks in North America with local, regional, national and international capabilities. Through its team of experienced service professionals, YRC Worldwide offers industry-leading expertise in heavyweight shipments and flexible supply chain solutions, ensuring customers can ship industrial, commercial and retail goods with confidence. Our reporting segments include the following:

YRC Freight is the reporting segment for our transportation service providers focused on business opportunities in national, regional and international services. YRC Freight provides for the movement of industrial, commercial and retail goods, primarily through centralized management and customer facing organizations. This unit includes our LTL subsidiary YRC Inc. (“YRC Freight”) and Reimer Express (“YRC Reimer”), a subsidiary located in Canada that specializes in shipments into, across and out of Canada. In addition to the United States (“U.S.”) and Canada, YRC Freight also serves parts of Mexico, Puerto Rico and Guam.

Regional Transportation is the reporting segment for our transportation service providers focused on business opportunities in the regional and next-day delivery markets. Regional Transportation is comprised of USF Holland Inc. (“Holland”), New Penn Motor Express (“New Penn”) and USF Reddaway Inc. (“Reddaway”). These companies each provide regional, next-day ground services in their respective regions through a network of facilities located across the United States, Canada, Mexico and Puerto Rico.

At June 30, 2012, approximately 81% of our labor force is subject to collective bargaining agreements, which predominantly expire in March 2015.

2. Principles of Consolidation

The accompanying consolidated financial statements include the accounts of YRC Worldwide and its wholly owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation.

Investments in non-majority owned affiliates or those in which we do not have control where the entity is either not a variable interest entity or YRC Worldwide is not the primary beneficiary, are accounted for on the equity method.

Management makes estimates and assumptions that affect the amounts reported in the consolidated financial statements and notes. Actual results could differ from those estimates. We have prepared the consolidated financial statements, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”). In management’s opinion, all normal recurring adjustments necessary for a fair statement of the financial position, results of operations and cash flows for the interim periods included in these financial statements herein have been made. Certain information and note disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles (“GAAP”) have been condensed or omitted from these statements pursuant to SEC rules and regulations. Accordingly, the accompanying consolidated financial statements should be read in conjunction with the consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2011.

Our board of directors approved a reverse stock split effective December 1, 2011 at a ratio of 1:300. The reverse stock split was effective on NASDAQ on December 2, 2011. All share numbers and per share amounts in the Consolidated Financial Statements and Notes to the Consolidated Financial Statements have been retroactively adjusted to give effect to the reverse stock split.

Assets Held for Sale

When we plan to dispose of property or equipment by sale, the asset is carried in the financial statements at the lower of the carrying amount or estimated fair value, less cost to sell, and is reclassified to assets held for sale. Additionally,

after such reclassification, there is no further depreciation taken on the asset. For an asset to be classified as held for sale, management must approve and commit to a formal plan, the sale should be anticipated during the ensuing year and the asset must be actively marketed, be available for immediate sale, and meet certain other specified criteria. We use level 2 and level 3 inputs to determine the fair value of each property that is considered as held for sale.

Table of Contents

At June 30, 2012 and December 31, 2011, the net book value of assets held for sale was approximately \$24.9 million and \$39.1 million, respectively. This amount is included in “Property and Equipment” in the accompanying consolidated balance sheets. We recorded charges of \$1.0 million and \$11.5 million for the three and six months ended June 30, 2012 and \$5.2 million and \$7.1 million for the three and six months ended June 30, 2011, respectively, to reduce properties held for sale to estimated fair value, less cost to sell. These charges are included in “(Gains) losses on property disposals, net” in the accompanying statements of consolidated operations. Of the charges recorded in the three and six months ended June 30, 2012, \$0.6 million and \$5.1 million, respectively relates to certain held for sale surplus properties that we placed into a real estate auction.

Property and Equipment

During the fourth quarter of 2011, we changed our accounting for tires in our YRC Freight segment. Prior to the change, the cost of original and replacement tires mounted on new and existing equipment was capitalized as a revenue equipment asset and amortized to operating expense based on estimated mileage-based usage. Under the new policy, the cost of replacement tires are expensed at the time those tires are placed into service, as is the case with other repairs and maintenance costs. The cost of tires on newly acquired revenue equipment is capitalized and depreciated over the estimated useful life of the related equipment. We believe that this new policy is preferable under the circumstances because it provides a more precise and less subjective method for recognizing expense related to tires that is consistent with industry practice.

Under ASC Topic 250, “Accounting Changes and Error Corrections,” we are required to report a change in accounting policy by retrospectively applying the new policy to all prior periods presented. Accordingly, we have adjusted our previously reported financial information for all periods presented. The effect of this accounting policy change increased net loss by \$0.4 million and \$0.8 million for the three and six months ended June 30, 2011, respectively.

Fair Value of Financial Instruments

The following table summarizes the fair value hierarchy of the Company’s financial assets and liabilities carried at fair value on a recurring basis as of June 30, 2012:

	Total Carrying Value at June 30, 2012	Fair Value Measurements at June 30, 2012		
		Quoted prices in active market (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Restricted amounts held in escrow-current	\$42.7	\$42.7	\$—	\$—
Restricted amounts held in escrow-long term	99.9	99.9	—	—
Total assets at fair value	\$142.6	\$142.6	\$—	\$—

Restricted amounts held in escrow are invested in money market accounts and are recorded at fair value on quoted market prices. The carrying value of cash and cash equivalents, accounts receivable and accounts payable approximates their fair value due to the short-term nature of these instruments.

3. Investment**Shanghai Jiayu Logistics Co., Ltd.**

On August 19, 2008, we completed the purchase of a 65% equity interest in Shanghai Jiayu Logistics Co., Ltd. (“Jiayu”), a Shanghai, China ground transportation company with a purchase price of \$59.4 million. Through March 31, 2010, we accounted for our 65% ownership interest in Jiayu as an equity method investment as the rights of the minority shareholder were considered extensive and allowed for his ability to veto many business decisions. These rights were primarily provided as a part of the General Manager role held by the minority shareholder. Effective April 1, 2010, the minority shareholder no longer had a role in managing the operations of the business which changed the conclusions from an accounting perspective regarding the relationship of this joint venture and required that we consolidate Jiayu in our financial statements effective April 1, 2010. The results of operations for Jiayu were included in our ‘Corporate and other’ reporting segment from April 1, 2010 to February 29, 2012. In an effort to focus on our core operations, we entered into an agreement in March 2012 to sell our 65% equity interest in Jiayu to the minority

shareholder. The completion of the transaction is subject to Chinese regulatory approval and expected to close in the third quarter of 2012. At the time the agreement was entered into, management control was passed to the minority shareholder and, as a result, we deconsolidated our interest in Jiayu during March 2012 and returned to accounting for our ownership interest as an equity method investment. Based on the March 2012 agreement, we recorded our equity method investment at its estimated fair value of \$0 and wrote off a \$12.0 million note receivable from Jiayu. After consideration of the non-controlling interest and other factors, we recognized a loss of \$4.2 million upon the deconsolidation of

Table of Contents

our investment during the six months ended June 30, 2012. Additionally, the noncontrolling interest was allocated a \$4.2 million gain on this transaction.

4. Liquidity

Credit Facility Amendments

On April 27, 2012, YRC Worldwide entered into an amendment to its amended and restated credit agreement, which reset the covenants regarding minimum Consolidated EBITDA, maximum Total Leverage Ratio and minimum Interest Coverage Ratio (as such terms are defined in the amended and restated credit agreement). Among other things, the amendment also (i) permits the sale of certain specified parcels of real estate without counting such asset sales against the annual \$25.0 million limit on asset sales and permits the Company to retain the net cash proceeds from such asset sales for the payment or settlement of workers' compensation and bodily injury and property damage claims and (ii) allows the Company to addback to Consolidated EBITDA for purposes of the applicable financial covenants the fees, costs and expenses incurred in connection with the amendment, the ABL facility amendment and the Company's contribution deferral agreement.

The covenants for each of the remaining test periods are as follows:

Four Consecutive Fiscal Quarters Ending	Minimum Consolidated EBITDA	Maximum Total Leverage Ratio	Minimum Interest Coverage Ratio
June 30, 2012	\$145,000,000	10.0 to 1.00	1.00 to 1.00
September 30, 2012	\$155,000,000	9.6 to 1.00	0.95 to 1.00
December 31, 2012	\$170,000,000	8.6 to 1.00	1.05 to 1.00
March 31, 2013	\$200,000,000	7.4 to 1.00	1.20 to 1.00
June 30, 2013	\$235,000,000	6.5 to 1.00	1.45 to 1.00
September 30, 2013	\$260,000,000	6.0 to 1.00	1.60 to 1.00
December 31, 2013	\$275,000,000	5.7 to 1.00	1.65 to 1.00
March 31, 2014	\$300,000,000	5.1 to 1.00	1.80 to 1.00
June 30, 2014	\$325,000,000	4.8 to 1.00	1.90 to 1.00
September 30, 2014	\$355,000,000	4.6 to 1.00	2.10 to 1.00
December 31, 2014	\$365,000,000	4.4 to 1.00	2.15 to 1.00

Minimum Consolidated EBITDA, as defined in our credit facilities, is a measure that reflects the Company's earnings before interest, taxes, depreciation, and amortization expense, and further adjusted for letter of credit fees, equity-based compensation expense, net gains or losses on property disposals and certain other items, including restructuring professional fees and results of permitted dispositions and discontinued operations. We were in compliance with each of these covenants as of June 30, 2012.

Risk and Uncertainties Regarding Future Liquidity

Our principal sources of liquidity are cash and cash equivalents and available borrowings under our \$400 million ABL facility as well as any prospective net operating cash flows resulting from improvements in operations. In addition, we have generated liquidity through the sale and leaseback of assets and the disposal of property, assets and lines of business. As of June 30, 2012, we had cash and cash equivalents and availability under the ABL facility of \$248.7 million and the borrowing base under our ABL facility was \$360.2 million.

Our principal uses of cash are to fund our operations, including making contributions to our single-employer pension plans and the multi-employer pension funds, and to meet our other cash obligations, including paying cash interest and principal on our funded debt, letter of credit fees under our credit facilities and funding capital expenditures. For the six months ending June 30, 2012, our cash flow from operating activities used net cash of \$16.6 million, and we reported a net loss of \$104.2 million. In the six months ending June 30, 2012, our operating revenues increased by \$65.0 million as compared to the same period in 2011 and our operating loss decreased by \$40.7 million in the six months ending June 30, 2012 compared the same period in 2011.

We continue to have a considerable amount of indebtedness, a substantial portion of which will mature in late 2014 or early 2015, and considerable future funding obligations for our single-employer pension plans and the multi-employer pension funds. As of June 30, 2012, we had \$1,382.9 million in aggregate principal amount of outstanding indebtedness, which amount will increase over time as we continue to accrue paid-in-kind interest on a portion of such indebtedness. Our level of indebtedness increases the risk that we may be unable to generate cash sufficient to service such indebtedness or pay principal when due in

Table of Contents

respect of such indebtedness. We expect our funding obligations for the period July 2012 to December 2012 for our single-employer pension plans and multi-employer pension funds will be \$55.8 million and \$42.5 million, respectively. In addition, we also have, and will continue to have, substantial operating lease obligations. As of June 30, 2012, our minimum rental expense under operating leases for the remainder of 2012 is \$24.6 million. As of June 30, 2012, our operating lease obligations through 2025 totaled \$151.7 million.

Our capital expenditures for the six months ended June 30, 2012 and 2011 were \$30.7 million and \$22.7 million, respectively. These amounts were principally used to fund replacement engines and trailer refurbishments for our revenue fleet, capitalized costs for our network facilities and technology infrastructure. Additionally, for the six months ending June 30, 2012, we entered into new operating lease commitments for \$55.1 million, with such payment to be made over the average lease term of 3 years. In light of our recent operating results and liquidity needs, we have deferred the majority of capital expenditures and expect to continue to do so for the foreseeable future, including the remainder of 2012. As a result, the average age of our fleet has increased and we will need to update our fleet periodically.

We expect that our cash and cash equivalents, improvements in operating results, retention of cash proceeds from asset sales and availability under our credit facilities will be sufficient to allow us to comply with the financial covenants in our credit facilities, fund our operations, increase working capital as necessary to support our planned revenue growth and fund planned capital expenditures for the foreseeable future, including the next twelve months. Our ability to satisfy our liquidity needs over the next twelve months is dependent on a number of factors, many of which are outside of our control. These factors include:

- our operating results, pricing and shipping volumes must continue to improve at a rate significantly better than what we have achieved in our recent financial results;

- we must continue to comply with covenants and other terms of our credit facilities so as to have access to the borrowings available to us under such credit facilities;

- our anticipated cost savings under our labor agreements, including wage reductions and savings due to work rule changes, must be achieved;

- we must complete real estate sale transactions as anticipated;

- we must continue to defer purchases of replacement revenue equipment or secure suitable operating leases for such replacement revenue equipment;

- we must continue to implement and realize substantial cost savings measures to match our costs with business levels and to continue to become more efficient;

- we must continue to carefully manage receipts and disbursements, including amounts and timing, focusing on reducing days sales outstanding for trade receivables and managing days outstanding for trade payables; and we must be able to generate operating cash flows that are sufficient to meet our cash requirements for pension contributions to single-employer pension plans and multi-employer pension funds, cash interest and principal payments on debt and for capital expenditures or additional lease payments for new revenue equipment.

There can be no assurance that management will be successful or that such plans will be achieved. We expect to continue to monitor our liquidity, work to alleviate these uncertainties and address our cash needs through a combination of one or more of the following actions:

- we will continue to aggressively seek additional and return business from customers;

- we will continue to attempt to reduce our escrow deposits and letter of credit collateral requirements related to our self-insurance programs;

- if appropriate, we may sell additional equity or pursue other capital market transactions; and

- we may consider selling additional assets or business lines, which would require lenders' consent in most cases.

The Company has experienced recurring net losses and operating cash flow deficits. Our ability to continue as a going concern is dependent on many factors, including among others, improvements in our operating results necessary to comply with the financial covenants in our credit facilities. These conditions raise significant uncertainty about our ability to continue as a going concern. The accompanying consolidated financial statements do not include any adjustments that might result from the outcome of the foregoing uncertainties.

Table of Contents

As of June 30, 2012 and July 31, 2012, there was \$153.6 million and \$154.8 million in aggregate principal amount of Series A Notes outstanding that are convertible into approximately 5.9 million shares of our common stock at the maturity date.

10% Series B Convertible Senior Secured Notes

The 10% Series B Convertible Senior Secured Notes due 2015 ("Series B Notes") are convertible into our common stock, at any time, at the conversion price per share of \$18.5334 and a conversion rate of 53.9567 common shares per \$1,000 of Series B Notes (such conversion price and conversion rate applying also to Series B Notes make whole premium). Upon conversion, holders of Series B Notes will not receive any cash payments representing accrued and unpaid interest; however, such holders will receive a make whole premium, equal to the total amount of interest received if the notes were held to their maturity, paid in shares of our common stock for the Series B Notes that are converted.

As of June 30, 2012, the effective conversion price and conversion rate for Series B Notes (after taking into account the make whole premium) was \$13.8016 and 72.4553 common shares per \$1,000 of Series B Notes, respectively.

During the six months ended June 30, 2012, \$8.4 million of aggregate principal amount of Series B Notes converted into 451,000 shares of our common stock. Upon conversion, during the six months ended June 30, 2012 we recorded \$6.0 million of additional interest expense representing the \$2.8 million make whole premium and \$3.2 million of accelerated amortization of the discount on Series B Notes converted.

As of June 30, 2012, there was \$94.3 million in aggregate principal amount of Series B Notes outstanding that are convertible into approximately 6.7 million shares of our common stock (after taking into account the make whole premium). There were no Series B Note conversions from July 1, 2012 through July 31, 2012.

6% Convertible Senior Notes

The 6% Convertible Senior Notes due 2014 ("6% Notes") are convertible into our common stock, at any time, at the conversion price per share of \$3,225 and a conversion rate of 0.3101 common shares per \$1,000 of 6% Notes. However, the 6% Notes indenture limits the maximum number of shares of our common stock that can be issued in respect of 6% Notes upon conversion or with respect to the payment of interest or in connection with the make whole premium or otherwise, subject to certain adjustments. If the limit is reached, no holder is entitled to any other consideration on account of shares not issued.

As of June 30, 2012 and July 31, 2012, a maximum of 17,616 shares of our common stock is available for future issuances in respect of 6% Notes. Such limitation on the number of shares of common stock issuable in respect of 6% Notes applies on a pro rata basis to the \$69.4 million in aggregate principal amount of outstanding 6% Notes.

Fair Value Measurement

The carrying amounts and estimated fair values of our long-term debt, including current maturities and other financial instruments, are summarized as follows:

(in millions)	June 30, 2012		December 31, 2011	
	Carrying amount	Fair Value	Carrying amount	Fair Value
Restructured term loan	\$383.6	\$201.6	\$402.0	\$216.5
ABL facility	311.6	318.1	264.4	268.8
Series A Notes and Series B Notes	185.0	115.1	172.2	168.7
Lease financing obligations	308.7	308.7	315.2	315.2
Other	194.0	113.4	200.9	139.9
Total debt	\$1,382.9	\$1,056.9	\$1,354.7	\$1,109.1

The fair values of the restructured term loan, ABL facility, Series A and Series B Notes, 6% convertible senior notes (included in "Other" above) and pension contribution deferral obligations (included in "Other" above) were estimated based on observable prices (level two inputs for fair value measurements). The carrying amount of the lease financing obligations approximates fair value.

Table of Contents

6. Employee Benefits

Components of Net Periodic Pension Costs

The following table sets forth the components of our company-sponsored pension costs for the three and six months ended June 30:

(in millions)	Three months		Six Months	
	2012	2011	2012	2011
Service cost	\$1.0	\$0.9	\$1.9	\$1.8
Interest cost	14.8	15.3	29.7	30.6
Expected return on plan assets	(11.6)	(10.7)	(23.2)	(21.5)
Amortization of net loss	2.9	2.4	5.8	4.8
Total periodic pension cost	\$7.1	\$7.9	\$14.2	\$15.7

We expect to contribute \$76.6 million to our company-sponsored pension plans in 2012 of which we have contributed \$20.8 million through June 30, 2012.

7. Income Taxes

Effective Tax Rate

Our effective tax rate for the three and six months ended June 30, 2012 was 3.4% and 3.6%, respectively, compared to 5.7% and 4.7%, respectively, for the three and six months ended June 30, 2011. Significant items impacting the 2012 rate include a net state tax provision, certain permanent items and an increase in the valuation allowance established for the net deferred tax asset balance projected for December 31, 2012. We recognize valuation allowances on deferred tax assets if, based on the weight of the evidence, we determine it is more likely than not that such assets will not be realized. Changes in valuation allowances are included in our tax provision in the period of change. In determining whether a valuation allowance is warranted, we evaluate factors such as prior years' earnings history, expected future earnings, loss carry-back and carry-forward periods, reversals of existing deferred tax liabilities and tax planning strategies that potentially enhance the likelihood of the realization of a deferred tax asset. At June 30, 2012 and December 31, 2011, substantially all of our net deferred tax assets were subject to a valuation allowance.

8. Shareholders' Deficit

The following reflects the activity in the shares of our common stock for the six months ended June 30:

(in thousands)	2012
Beginning balance	6,847
Issuance of equity awards, net	5
Issuance of equity upon conversion of Series B Notes	608
Ending balance	7,460

9. Loss Per Share

Given our net loss position for the three and six months ended June 30, 2012 and 2011, there are no dilutive securities for these periods.

Antidilutive options and share units were 753,300 and 37,300 at June 30, 2012 and 2011, respectively. Antidilutive 6% convertible senior note conversion shares, including the make whole premium, were convertible into 17,600 common shares at June 30, 2012 and 2011. Antidilutive Series A convertible note conversion shares were 4,516,000 at June 30, 2012, with no corresponding amount at June 30, 2011. Antidilutive Series B convertible note conversion shares, including the make whole premiums, were 6,653,000 at June 30, 2012, with no corresponding amount at June 30, 2011.

10. Business Segments

We report financial and descriptive information about our reportable operating segments on a basis consistent with that used internally for evaluating segment performance and allocating resources to segments. We evaluate segment performance

13

Table of Contents

primarily on operating income and return on committed capital.

We have the following reportable segments, which are strategic business units that offer complementary transportation services to their customers:

• YRC Freight includes carriers that provide comprehensive national, regional and international services.

• Regional Transportation is comprised of carriers that focus primarily on business opportunities in the next-day and regional delivery markets.

Additionally, during 2011, we reported Truckload as a separate segment, which consisted entirely of Glen Moore, a former domestic truckload carrier. On December 15, 2011, we sold a majority of the assets of Glen Moore to a third party for \$18.5 million and ceased the operations.

The accounting policies of the segments are the same as those described in the Summary of Accounting Policies note in our Annual Report on Form 10-K for the year ended December 31, 2011. We charge management fees and other corporate services to our segments based on the direct benefits received or as a percentage of revenue. Corporate and other operating losses represent residual operating expenses of the holding company, including compensation and benefits and professional services for all periods presented. Corporate identifiable assets primarily refer to cash, cash equivalents, investments in equity method affiliates and deferred debt issuance costs. Intersegment revenue primarily relates to transportation services between our segments.

Table of Contents

11. Commitments, Contingencies, and Uncertainties

ABF Lawsuit

On November 1, 2010, ABF Freight System, Inc. (“ABF”) filed a complaint in the U.S. District Court for the Western District of Arkansas against several parties, including YRC Inc., New Penn Motor Express, Inc. and USF Holland Inc. (each a subsidiary of the Company) and the International Brotherhood of Teamsters and the local Teamster unions party to the National Master Freight Agreement (“NMFA”) alleging violation of the NMFA due to modifications to the NMFA that have provided relief to the Company’s subsidiaries that are party to the NMFA without providing the same relief to ABF. The complaint seeks to have the modifications to the NMFA declared null and void and seeks damages of \$750 million from the named defendants. The Company believes the allegations are without merit.

On December 17, 2010, the District Court dismissed the complaint. ABF appealed the dismissal on January 18, 2011 to the U.S. Court of Appeals for the 8th Circuit. On July 6, 2011, the Court of Appeals vacated the District Court’s dismissal of the litigation on jurisdictional grounds and remanded the case back to the District Court for further proceedings. ABF filed an amended complaint on October 12, 2011, which contains allegations consistent with the original complaint. The Company’s subsidiaries filed a motion to dismiss the amended complaint. On August 1, 2012, the District Court dismissed ABF’s amended complaint without prejudice. The ultimate outcome of this matter was not determinable; therefore, we had not recorded any liability. ABF may seek to pursue the related grievance it submitted on November 1, 2010 pursuant to the NMFA grievance procedures.

Securities Class Action Suit

On February 7, 2011, a putative class action was filed by Bryant Holdings LLC in the U. S. District Court for the District of Kansas on behalf of purchasers of the Company’s securities between April 24, 2008 and November 2, 2009, inclusive (the “Class Period”), seeking to pursue remedies under the Securities Exchange Act of 1934, as amended. The complaint alleges that, throughout the Class Period, the Company and certain of its current and former officers failed to disclose material adverse facts about the Company’s true financial condition, business and prospects. Specifically, the complaint alleges that defendants’ statements were materially false and misleading because they misrepresented

and overstated the financial condition of the Company and caused shares of the Company's common stock to trade at artificially inflated levels throughout the Class

15

Table of Contents

Period. Bryant Holdings LLC seeks to recover damages on behalf of all purchasers of the Company's securities during the Class Period. The Company believes the allegations are without merit and intends to vigorously defend the claims. On April 8, 2011, an individual (Stan Better) and a group of investors (including Bryant Holdings LLC) filed competing motions seeking to be named the lead plaintiff in the lawsuit. The Court appointed them as co-lead plaintiffs in the lawsuit on August 22, 2011. Plaintiffs filed an amended complaint on October 21, 2011, which contains allegations consistent with the original complaint. The Company has filed a motion to dismiss the amended complaint, which is pending before the Court. The ultimate outcome of this case is not determinable. Therefore, we have not recorded any liability for this matter.

Other Legal Matters

We are involved in other litigation or proceedings that arise in ordinary business activities. We insure against these risks to the extent deemed prudent by our management, but no assurance can be given that the nature and amount of such insurance will be sufficient to fully indemnify us against liabilities arising out of pending and future legal proceedings. Many of these insurance policies contain self-insured retentions in amounts we deem prudent. Based on our current assessment of information available as of the date of these financial statements, we believe that our financial statements include adequate provisions for estimated costs and losses that may be incurred with regard to the litigation and proceedings to which we are a party.

Table of Contents

12. Condensed Consolidating Financial Statements

Guarantees of the 6% Convertible Senior Notes Due 2014

On February 23, 2010, and August 3, 2010, we issued \$70 million in aggregate principal amount of our 6% convertible senior notes due 2014 (the "6% Notes"). In connection with the 6% Notes, the following 100% owned subsidiaries of YRC Worldwide have issued guarantees in favor of the holders of the notes: YRC Inc., YRC Enterprise Services, Inc., Roadway LLC, Roadway Next Day Corporation, YRC Regional Transportation, Inc., USF Holland Inc., USF Reddaway Inc., USF Glen Moore Inc. and YRC Logistics Services, Inc. Each of the guarantees is full and unconditional and joint and several, subject to customary release provisions. Effective December 31, 2011, USF Sales Corporation and IMUA Handling Corporation were released as guarantors in connection with their merger with and into YRC Regional Transportation, Inc.

The condensed consolidating financial statements are presented in lieu of separate financial statements and other related disclosures of the subsidiary guarantors and issuer because management does not believe that such separate financial statements and related disclosures would be material to investors. There are currently no significant restrictions on the ability of YRC Worldwide or any guarantor to obtain funds from its subsidiaries by dividend or loan.

The following represents condensed consolidating financial information as of June 30, 2012 and December 31, 2011, with respect to the financial position and for the three and six months ended June 30, 2012 and 2011, for results of operations and cash flows of YRC Worldwide and its subsidiaries. The Parent column presents the financial information of YRC Worldwide, the primary obligor of the convertible senior notes. The Guarantor Subsidiaries column presents the financial information of all guarantor subsidiaries of the convertible senior notes. The Non-Guarantor Subsidiaries column presents the financial information of all non-guarantor subsidiaries, including those subsidiaries that are governed by foreign laws and YRCW Receivables LLC, the special-purpose entity that is associated with our ABL facility.

Guarantees of the 10% Series A Convertible Senior Secured Notes and the 10% Series B Convertible Senior Secured Notes

On July 22, 2011, we issued \$140 million in aggregate principal amount of new 10% series A convertible senior secured notes and \$100 million in aggregate principal amount of new 10% series B convertible senior secured notes both due 2015 (collectively, the “New Convertible Secured Notes”). In connection with the New Convertible Secured Notes, the following 100% owned subsidiaries of YRC Worldwide issued guarantees in favor of the holders of the New Convertible Secured Notes: YRC Inc., YRC Enterprise Services, Inc., Roadway LLC, Roadway Reverse Logistics, Inc., Roadway Express International, Inc., Roadway Next Day Corporation, New Penn Motor Express Inc., YRC Regional Transportation, Inc., USF Holland Inc., USF Reddaway Inc., USF Glen Moore Inc., YRC Logistics Services, Inc., USF Bestway Inc., USF Dugan Inc., USF RedStar LLC, YRC Mortgages, LLC, YRC Association Solutions Inc., YRC International Investments Inc., and Express Lane Services Inc. Each of the guarantees is full and unconditional and joint and several, subject to customary release provisions. Effective December 31, 2011, USF Technology Services Inc. was released as a guarantor in connection with its merger with and into USF Canada, Inc. Effective December 31, 2011, USF Sales Corporation, USF Canada Inc., USF Mexico Inc., USFreightways and IMUA Handling Corporation were released as guarantors in connection with their merger with and into YRC Regional Transportation, Inc.

The condensed consolidating financial statements are presented in lieu of separate financial statements and other related disclosures of the subsidiary guarantors and issuer because management does not believe that such separate financial statements and related disclosures would be material to investors. There are currently no significant restrictions on the ability of YRC Worldwide or any guarantor to obtain funds from its subsidiaries by dividend or loan.

The following represents condensed consolidating financial information as of June 30, 2012 and December 31, 2011, with respect to the financial position and for the three and six months ended June 30, 2012 and 2011, for results of operations and the statement of cash flows of YRC Worldwide and its subsidiaries. The Parent column presents the financial information of YRC Worldwide, the primary obligor of the New Convertible Secured Notes. The Guarantor Subsidiaries column presents the financial information of all guarantor subsidiaries of the New Convertible Secured Notes. The Non-Guarantor Subsidiaries column presents the financial information of all non-guarantor subsidiaries, including those subsidiaries that are governed by foreign laws and YRCW Receivables LLC, the special-purpose entity that is associated with our ABL facility.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cautionary Note Regarding Forward Looking Statements

Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") should be read in conjunction with the Consolidated Financial Statements and the Notes to Consolidated Financial Statements of YRC Worldwide Inc. (also referred to as "YRC Worldwide", the "Company", "we" or "our"). MD&A includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended ("Exchange Act"). Forward-looking statements include those preceded by, followed by or include the words "will," "expect," "intend," "anticipate," "believe," "project," "forecast," "propose," "plan," "designed," "estimate," "enable" and similar expressions. Forward-looking statements are inherently uncertain and are subject to significant business, economic, competitive, regulatory and other risks, uncertainties and contingencies, known and unknown, many of which are beyond our control. Our future financial condition and results could differ materially from those predicted in such forward-looking statements because of a number of factors, including (without limitation):

our ability to generate sufficient cash flows and liquidity to fund operations and satisfy our cash needs and future cash commitments, including (without limitation) our obligations related to our substantial indebtedness and lease and pension funding requirements;

the pace of recovery in the overall economy, including (without limitation) customer demand in the retail and manufacturing sectors;

the success of our management team in implementing its strategic plan and operational and productivity improvements, including (without limitation) our continued ability to meet high on-time and quality delivery performance standards, and the impact of those improvements to meet our future liquidity and profitability;

our ability to finance the maintenance, acquisition and replacement of revenue equipment and other necessary capital expenditures;

potential increase in our operating lease obligations resulting from our decision to defer the purchase of new revenue equipment;

changes in equity and debt markets;

inclement weather;

price and availability of fuel;

sudden changes in the cost of fuel or the index upon which we base our fuel surcharge and the effectiveness of our fuel surcharge program in protecting us against fuel price volatility;

competition and competitive pressure on service and pricing;

expense volatility, including (without limitation) volatility due to changes in rail service or pricing for rail service;

our ability to comply and the cost of compliance with federal, state, local and foreign laws and regulations, including (without limitation) laws and regulations for the protection of employee safety and health and the environment;

terrorist attack;

labor relations, including (without limitation) the continued support of our union employees with respect to our

strategic plan, the impact of work rules, work stoppages, strikes or other disruptions, our obligations to multi-employer health, welfare and pension plans, wage requirements and employee satisfaction;

the impact of claims and litigation to which we are or may become exposed, and;

other risks and contingencies, including (without limitation) the risk factors that are included in our reports filed with the SEC, including those described under "Risk Factors" in our annual report on Form 10-K and quarterly reports on Form 10-Q.

Overview

MD&A includes the following sections:

Consolidated Results of Operations -- an analysis of our consolidated results of operations for the three and six months ended June 30, 2012 and 2011

Reporting Segment Results of Operations -- an analysis of our results of operations for the three and six months ended June 30, 2012 and 2011 for our two reporting segments: YRC Freight and Regional Transportation

33

Table of Contents

- Certain Non-GAAP Financial Measures -- an analysis of selected Non-GAAP financial measures for the three and six months ended June 30, 2012 and 2011
- Financial Condition/Liquidity and Capital Resources -- a discussion of our major sources and uses of cash as well as an analysis of our cash flows and aggregate contractual obligations and commercial commitments.

The "second quarter" and "first half" of the years discussed below refer to the three and six months ended June 30, respectively.

Consolidated Results of Operations

Our consolidated results for the second quarter and first half of 2012 and 2011 include the consolidated results of our reporting segments and our corporate charges. A more detailed discussion of the operating results of our segments is presented in the "Reporting Segment Results of Operations" section below.

The table below provides summary consolidated financial information for the second quarter and first half of 2012 and 2011:

(in millions)	Second Quarter			First Half		
	2012	2011	Percent Change	2012	2011	Percent Change
Operating revenue	\$1,250.8	\$1,257.2	(0.5)%	\$2,445.1	\$2,380.1	2.7%
Operating income (loss)	\$15.5	\$(5.6)	376.8%	\$(33.2)	\$(73.9)	55.1%
Nonoperating expenses, net	\$38.9	\$40.0	(2.8)%	\$74.9	\$78.8	(4.9)%
Net loss	\$(22.6)	\$(43.0)	47.4%	\$(104.2)	\$(145.6)	28.4%

The two primary components of our operating revenue are volume, comprised of the number of shipments and weight per shipment, and price or yield, usually evaluated on a per hundredweight basis. The price or yield includes fuel surcharge revenue. Fuel surcharges are common throughout our industry and represent an amount that we charge to customers that adjusts with changing fuel prices. We base our fuel surcharges on a published national index and adjust them weekly. Rapid material changes in the index or our cost of fuel can positively or negatively impact our revenue and operating income versus prior periods as there is a lag in our adjustment of base rates in response to changes in fuel surcharge. We believe that fuel surcharge is an accepted and important component of the overall pricing of our services to our customers. Without an industry accepted fuel surcharge program, our base pricing for our transportation services would require changes. We believe the distinction between base rates and fuel surcharge has blurred over time, and it is impractical to clearly separate all the different factors that influence the price that our customers are willing to pay. In general, under our present fuel surcharge program, we believe rising fuel costs are beneficial to us and falling fuel costs are detrimental to us in the short term.

Second quarter of 2012 compared to the second quarter of 2011

Our consolidated operating revenue decreased 0.5% during the second quarter of 2012 compared to the same period in 2011. The decrease in revenue is largely attributable to lower volumes driven by customer mix management, partially offset by increases in yield over the comparable prior year period. The improvement in yield is due to a more disciplined industry pricing market.

Operating expenses for the second quarter of 2012 decreased \$27.5 million or 2.2% compared to the same period in 2011 primarily related to a \$21.4 million decrease in operating expenses and supplies and a \$14.5 million decrease in purchased transportation. These decreases were partially offset by an \$18.3 million increase in salaries, wages and benefits.

The decrease in operating expenses and supplies was driven by lower fuel expenses of \$13.7 million or 8.8% and lower professional service fees of \$16.4 million or 42.5%, offset by higher vehicle maintenance of \$6.4 million or 14.8%. The decrease in purchased transportation during the second quarter of 2012 versus the comparable prior year period was primarily a result of lower volumes moved through purchased transportation lines.

The increase in salaries, wages and benefits in the second quarter of 2012 as compared to the same period in 2011 is largely due to an increase in benefits compared to the prior year resulting from the resumption of multi-employer

pension contribution expense in June 2011 as well as higher shipment related wages in the current year. Nonoperating expenses decreased \$1.1 million in the second quarter of 2012 compared to the same period in 2011. The reduction consisted primarily of a \$2.7 million decrease in other expenses, partially offset by an increase in interest expense of \$1.6 million as a result of various changes to our capital structure as a result of our July 22, 2011 restructuring.

Table of Contents

Our effective tax rate for the second quarter of 2012 and 2011 was 3.4% and 5.7%, respectively. Significant items impacting the second quarter of 2012 rate include a net state tax provision, certain permanent items and an increase in the valuation allowance established for the net deferred tax asset balance projected for December 31, 2012. We recognize valuation allowances on deferred tax assets if, based on the weight of the evidence, we determine it is more likely than not that such assets will not be realized. Changes in valuation allowances are included in our tax provision in the period of change. In determining whether a valuation allowance is warranted, we evaluate factors such as prior years' earnings history, expected future earnings, loss carry-back and carry-forward periods, reversals of existing deferred tax liabilities and tax planning strategies that potentially enhance the likelihood of the realization of a deferred tax asset. At June 30, 2012 and December 31, 2011, substantially all of our net deferred tax assets are subject to a valuation allowance.

First half of 2012 compared to the first half of 2011

Our consolidated operating revenue increased 2.7% during the first half of 2012 compared to the same period in 2011 due to both increases in volume over the comparable prior year period and increases in yield. Our volume increases are primarily attributed to increased market share for our Regional Transportation segment and a moderately improving economic environment in early 2012. The improvement in yield is due to increased fuel surcharge revenue resulting from higher diesel fuel costs as well as a more disciplined industry pricing market and customer mix management.

Operating expenses for the first half of 2012 increased \$24.3 million or 1.0% compared to the same period in 2011 primarily related to a \$41.3 million increase in salaries, wages and benefits, partially offset by a \$14.5 million decrease in purchased transportation.

The increase in salaries, wages and benefits in the first half of 2012 as compared to the same period in 2011 is largely due to an increase in benefits compared to the prior year resulting from the resumption of multi-employer pension contribution expense in June 2011 as well as higher shipment related wages in the current year.

Nonoperating expenses decreased \$3.9 million in the first half of 2012 compared to the same period in 2011. The reduction consisted primarily of a \$3.0 million decrease in other expenses and a \$0.8 million gain recognized on the deconsolidation of the Jiayu investment.

Our effective tax rate for the first half of 2012 and 2011 was 3.6% and 4.7%, respectively. Significant items impacting the first half of 2012 rate include a net state tax provision, certain permanent items and an increase in the valuation allowance established for the net deferred tax asset balance projected for December 31, 2012. We recognize valuation allowances on deferred tax assets if, based on the weight of the evidence, we determine it is more likely than not that such assets will not be realized. Changes in valuation allowances are included in our tax provision in the period of change. In determining whether a valuation allowance is warranted, we evaluate factors such as prior years' earnings history, expected future earnings, loss carry-back and carry-forward periods, reversals of existing deferred tax liabilities and tax planning strategies that potentially enhance the likelihood of the realization of a deferred tax asset. At June 30, 2012 and December 31, 2011, substantially all of our net deferred tax assets are subject to a valuation allowance.

Reporting Segment Results of Operations

We evaluate our business using our two reporting segments:

YRC Freight is the reporting segment for our transportation service providers focused on business opportunities in national, regional and international services. YRC Freight provides for the movement of industrial, commercial and retail goods, primarily through centralized management and customer facing organizations. This unit includes our LTL subsidiary YRC Inc. and Reimer Express, a subsidiary located in Canada that specializes in shipments into, across and out of Canada. In addition to the United States and Canada, YRC Freight also serves parts of Mexico, Puerto Rico and Guam.

Regional Transportation is the reporting segment for our transportation service providers focused on business opportunities in the regional and next-day delivery markets. The Regional Transportation companies each provide regional, next-day ground services in their respective regions through a network of facilities located across the United States, Canada, Mexico and Puerto Rico.

In 2011, we reported Truckload as a separate segment, which consisted of Glen Moore, a former domestic truckload carrier and represented 2% of our consolidated revenue for the second quarter of 2011. On December 15, 2011, we sold the majority of Glen Moore's assets to a third party and concluded operations.

Table of Contents

YRC Freight Results

YRC Freight represented 66% of our consolidated revenue in both the second quarter of 2012 and 2011 and 66% and 65% of our consolidated revenue in the first half of 2012 and 2011, respectively. The table below provides summary financial information for YRC Freight for the second quarter and first half of 2012 and 2011:

(in millions)	Second Quarter			First Half			
	2012	2011	Percent Change	2012	2011	Percent Change	
Operating revenue	\$821.1	\$826.9	(0.7)%	\$1,610.2	\$1,557.0	3.4%	
Operating income (loss)	\$(5.1)	\$6.6	(177.3)%	\$(61.2)	\$(45.1)	(35.7)%	
Operating ratio ^{(a)(b)}	100.6	% 99.2	% 1.4	pp 103.8	% 102.9	% 0.9	pp

(a) Operating ratio is calculated as (i) 100 percent (ii) minus the result of dividing operating income by operating revenue or (iii) plus the result of dividing operating loss by operating revenue, and expressed as a percentage.

(b) pp represents the change in percentage points

Second quarter of 2012 compared to the second quarter of 2011

YRC Freight reported operating revenue of \$821.1 million in the second quarter of 2012, a decrease of \$5.8 million or 0.7% compared to the same period in 2011. The decrease in operating revenue was largely driven by a 3.3% decrease in total picked-up tonnage per day offset by a 2.9% increase in revenue per hundredweight resulting mostly from a more disciplined industry pricing market compared to the comparable prior period. The decrease in picked-up tonnage per day was primarily due to a 2.1% decrease in total shipments per day which is largely attributable to customer mix management and a 1.2% decrease in weight per shipment.

Operating loss for YRC Freight was \$5.1 million in the second quarter of 2012 compared to operating income of \$6.6 million in the same period in 2011. Revenue in the second quarter of 2012 was lower by \$5.8 million while total costs increased by \$5.9 million. The cost increases consisted primarily of higher salaries, wages and employees' benefits of \$9.9 million or 2.2% and higher operating expenses and supplies of \$11.2 million or 6.3% partially offset by lower purchased transportation costs of \$12.7 million or 10.6% and lower other operating expenses of \$2.9 million or 4.0%. The increase in salaries, wages and employees' benefits (including workers' compensation expense) of \$9.9 million during the second quarter of 2012 is primarily the result of an increase in benefits of \$12.8 million compared to the prior year as a result of the resumption of multi-employer pension contribution expense in June 2011 and higher costs associated with the contractual health and welfare benefit increase effective August 2011, partially offset by lower workers' compensation expense.

The decrease in purchased transportation during the second quarter of 2012 versus the comparable prior year period was primarily a result of lower volumes moved through purchased transportation lines. Rail costs decreased 7.2% while other purchased transportation costs decreased 14.6%.

Operating expenses and supplies were higher due mostly to increases in equipment maintenance costs, partially offset by decreases to legal reserves related to a reduction of estimated losses for prior years' legal claims.

Other operating expenses were lower mostly due to a general liability claims expense decrease of \$0.9 million or 12.3% related to a continued decrease in claims in 2012 compared to the second quarter of 2011 and lower cargo claims expense of \$0.4 million due to lower volume.

Gains (losses) on disposals and impairments of property were \$6.3 million in the second quarter of 2012 compared to \$6.6 million in the second quarter of 2011.

First half of 2012 compared to the first half of 2011

YRC Freight reported operating revenue of \$1,610.2 million in the first half of 2012, an increase of \$53.2 million or 3.4% compared to the same period in 2011. The increase in operating revenue was largely driven by a 3.1% increase in revenue per hundredweight partially resulting from a more disciplined industry pricing market and higher volumes in the first half of 2012 compared to the same period in 2011.

Edgar Filing: YRC Worldwide Inc. - Form 10-Q

Operating loss for YRC Freight was \$61.2 million in the first half of 2012 compared to \$45.1 million in the same period in 2011. Revenue in the first half of 2012 was higher by \$53.2 million while total costs increased by \$69.3 million. The cost

36

Table of Contents

increases consisted primarily of higher salaries, wages and employees' benefits of \$32.2 million or 3.6%, higher operating expenses and supplies of \$42.5 million or 12.4%, and higher other operating expenses of \$1.5 million or 1.0% offset by lower purchased transportation costs of \$14.7 million or 6.7%.

The increase in salaries, wages and employees' benefits (including workers' compensation expense) of \$32.2 million during the first half of 2012 is primarily the result of an increase in benefits of \$34.3 million compared to the prior year resulting from the resumption of multi-employer pension contribution expense in June 2011 and higher costs associated with the contractual health and welfare benefit increase effective August 2011. In addition, the increase is due to higher shipment related wages due to increased business volumes and contractual wage increases, partially offset by lower workers' compensation expense.

Operating expenses and supplies were higher due to increases in fuel costs, equipment maintenance, travel and driver expenses associated with greater volumes in the first half of 2012 compared to the same period in 2011. Operating expenses and supplies were also impacted by increases to legal reserves related to estimated losses for prior years' legal claims offset by a decrease in bad debt expense in the first half of 2012 compared to the comparable prior year period reflective of improvements in our revenue management processes and fewer bankruptcies in our customer base. The decrease in purchased transportation during the first half of 2012 versus the comparable prior year period resulted primarily from lower volumes moved through purchased transportation lines. Rail costs decreased 3.9% while other purchased transportation costs decreased 10.0%.

Other operating expenses were higher mostly due to a higher cargo claims expense of \$2.3 million or 12.2% due to unfavorable development of claims, partially offset by \$2.5 reduction in property taxes.

Net losses on property disposals and impairments were \$1.7 million in the first half of 2012 compared to a gain of \$6.1 million in the first half of 2011.

Regional Transportation Results

Regional Transportation represented 34% and 32% of consolidated revenue in both the second quarter and first half of 2012 and 2011, respectively. The table below provides summary financial information for Regional Transportation for the second quarter and first half of 2012 and 2011:

(in millions)	Second Quarter			First Half			Percent Change	Percent Change
	2012	2011	Percent Change	2012	2011	Percent Change		
Operating revenue	\$429.8	\$401.7	7.0	% \$831.8	\$767.8	8.3	%	
Operating income	\$22.9	\$14.7	55.8	% \$34.4	\$13.6	152.9	%	
Operating ratio ^{(a)(b)}	94.7	% 96.3	% (1.6) pp	95.9	% 98.2	% (2.3) pp

(a) Operating ratio is calculated as (i) 100 percent (ii) minus the result of dividing operating income by operating revenue.

(b) pp represents the change in percentage points

Second quarter of 2012 compared to the second quarter of 2011

Regional Transportation reported operating revenue of \$429.8 million for the second quarter of 2012, representing an increase of \$28.1 million, or 7.0% from the same period in 2011. Total weight per day was up 4.4%, representing a 2.5% increase in total shipments per day and a 1.9% higher total weight per shipment compared to 2011. Total revenue per hundredweight increased 2.4% in the second quarter of 2012 as compared to the second quarter of 2011, due to a more disciplined industry pricing market.

Operating income for Regional Transportation was \$22.9 million for the second quarter of 2012, an increase of \$8.2 million from the same period in 2011, consisting of a \$28.1 million increase in revenue partially offset by increases in salaries, wages and employees' benefits of \$16.6 million or 7.3%, operating expenses and supplies of \$2.4 million or 2.4%, and purchased transportation of \$0.3 million or 1.5%.

Salaries, wages and employees' benefits expense (including workers' compensation expense) increased \$16.6 million or 7.3% primarily the result of an increase in benefits compared to the prior year resulting from the resumption of

multi-employer pension contribution expense in June 2011 and higher costs associated with the contractual health and welfare benefit increase effective August 2011. In addition, the increase is due to higher shipment related wages due to increased business volumes and contractual wage increases, partially offset by workers' compensation expense.

37

Table of Contents

Operating expenses and supplies increased 2.4% with higher costs in the areas of equipment maintenance, travel and driver expenses as a result of higher business volumes. Offsetting the increases was a 3.5% decrease in fuel costs (due to lower fuel prices offset by higher volumes). Purchased transportation was 1.5% higher due mostly to greater business volumes.

Net losses on property disposals and impairments were flat in the second quarter of 2012 compared to the second quarter of 2011.

First half of 2012 compared to the first half of 2011

Regional Transportation reported operating revenue of \$831.8 million for the first half of 2012, representing an increase of \$64.0 million, or 8.3% from the same period in 2011. Total weight per day was up 5.2%, representing a 3.4% increase in total shipments per day and a 1.8% higher total weight per shipment compared to 2011. Our volume increases are primarily attributed to increased market share and a moderately improving economic environment in early 2012. Total revenue per hundredweight increased 3.4% in the first half of 2012 as compared to the first half of 2011, primarily due to a more disciplined industry pricing market.

Operating income for Regional Transportation was \$34.4 million for the first half of 2012, an increase of \$20.8 million from the same period in 2011, consisting of a \$64.0 million increase in revenue partially offset by increases in salaries, wages and employees' benefits of \$24.4 million or 5.4%, operating expenses and supplies of \$12.1 million or 6.2%, and purchased transportation of \$1.5 million or 4.0%.

Salaries, wages and employees' benefits expense (including workers' compensation expense) increased \$24.4 million or 5.4% primarily the result of an increase in benefits compared to the prior year resulting from the resumption of multi-employer pension contribution expense in June 2011 and higher costs associated with the contractual health and welfare benefit increase effective August 2011. In addition, the increase is due to higher shipment related wages due to increased business volumes and contractual wage increases, partially offset by lower workers' compensation expense.

Operating expenses and supplies increased 6.2% reflecting a 4.2% increase in fuel costs (due to higher volumes) and an 8.8% increase in costs other than fuel. Costs were higher in the areas of equipment maintenance, travel, driver expenses and tolls as a result of increased business volumes. Purchased transportation was 4.0% higher due mostly to greater business volumes.

Net losses on property disposals and impairments were \$0.6 million in the first half of 2012 compared to a net gain of \$3.4 million in the first half of 2011.

Reddaway's contract with approximately 400 of its IBT represented employees expired on May 31, 2012. Those employees continue to work under the terms of the expired contract while Reddaway and the IBT negotiate to extend the term of the contract.

Certain Non-GAAP Financial Measures

Our adjusted EBITDA improved to \$70.1 million and \$85.4 million for the second quarter and first half of 2012, respectively from \$64.5 million and \$63.2 million for the same periods in 2011. We have included the reconciliation of consolidated operating loss to consolidated adjusted EBITDA below and provided the adjusted EBITDA amounts by segment.

Adjusted operating income (loss) is a non-GAAP measure that reflects the Company's operating income (loss) before letter of credit fees, equity-based compensation expense, net gains or losses on property disposals, and certain other items including restructuring professional fees and results of permitted dispositions. Adjusted EBITDA is a non-GAAP measure that reflects the Company's earnings before interest, taxes, depreciation, and amortization expense, and further adjusted for letter of credit fees, equity-based compensation expense, net gains or losses on property disposals and certain other items, including restructuring professional fees and results of permitted dispositions and discontinued operations as defined in the Company's credit facilities. Adjusted EBITDA and adjusted operating income (loss) are used for internal management purposes as a financial measure that reflects the Company's core operating performance. In addition, management uses adjusted EBITDA to measure compliance with financial covenants in the Company's credit facilities. Free cash flow (deficit) and adjusted free cash flow (deficit) are non-GAAP measures that reflect the Company's operating cash flow minus gross capital expenditures and operating

cash flow minus gross capital expenditures, excluding the restructuring costs included in operating cash flow, respectively. However, these financial measures should not be construed as a better measurement than operating income, operating cash flow or earnings (loss) per share, as defined by generally accepted accounting principles. Adjusted operating income (loss), adjusted EBITDA, free cash flow (deficit) and adjusted free cash flow (deficit) have the following limitations:

Adjusted operating income (loss) and adjusted EBITDA do not reflect the interest expense or the cash requirements

Table of Contents

necessary to fund restructuring professional fees, letter of credit fees, service interest or principal payments on our outstanding debt;

Although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future, and adjusted EBITDA does not reflect any cash requirements for such replacements; Equity based compensation is an element of our long-term incentive compensation package, although adjusted operating income (loss) and adjusted EBITDA exclude either certain union employee equity-based compensation expense or all of it as an expense, respectively, when presenting our ongoing operating performance for a particular period;

Adjusted free cash flow (deficit) excludes the cash usage by the Company's restructuring activities, debt issuance costs, equity issuance costs and principal payments on our outstanding debt and the resulting reduction in the Company's liquidity position from those cash outflows; and

Other companies in our industry may calculate adjusted operating income (loss), adjusted EBITDA and adjusted free cash flow differently than we do, limiting its usefulness as a comparative measure.

Because of these limitations, adjusted operating income (loss), adjusted EBITDA, free cash flow (deficit) and adjusted free cash flow (deficit) should not be considered a substitute for performance measures calculated in accordance with GAAP. We compensate for these limitations by relying primarily on our GAAP results and using adjusted operating income (loss), adjusted EBITDA, free cash flow (deficit) and adjusted free cash flow (deficit) as a secondary measure. Our consolidated adjusted operating ratio was 98.3% and 100.5% for the second quarter and first half of 2012, respectively, which improved 0.7 and 1.2 percentage points compared to the second quarter and first half of 2011, respectively.

Adjusted operating ratio is calculated as (i) 100 percent (ii) minus the result of dividing adjusted operating income by operating revenue or (iii) plus the result of dividing adjusted operating loss by operating revenue, and expressed as a percentage.

Consolidated Adjusted EBITDA

The reconciliation of operating income (loss) to adjusted operating income (loss) and adjusted EBITDA, including adjusted operating ratio, for the second quarter and first half of 2012 and 2011 is as follows:

(in millions)	Second Quarter		First Half	
	2012	2011	2012	2011
Operating revenue	\$1,250.8	\$1,257.2	\$2,445.1	\$2,380.1
Adjusted operating ratio ^(a)	98.3	% 99.0	% 100.5	% 101.7
Reconciliation of operating income (loss) to adjusted EBITDA:				
Operating income (loss)	\$15.5	\$(5.6)	\$(33.2)	\$(73.9)
(Gains) losses on property disposals, net	(6.5)	(7.3)	1.8	(10.4)
Letter of credit expense	9.6	8.2	17.5	16.3
Restructuring professional fees	2.5	16.9	3.0	25.4
Gain (loss) on permitted dispositions and other	(0.2)	1.0	(2.1)	3.2

Financial Condition/Liquidity and Capital Resources

Our principal sources of liquidity are cash and cash equivalents and available borrowings under our \$400.0 million ABL facility as well as any prospective net operating cash flows resulting from improvements in operations. In addition, we have generated liquidity through the sale and leaseback of assets and the disposal of property, assets and lines of business. Pursuant to Amendment No. 2 to our amended and restated credit agreement, we can retain 100% of the proceeds from the sale of certain real estate for the payment or settlement of workers' compensation and bodily injury and property damage claims. The sale of these properties is expected to generate cash proceeds of approximately \$25 million during 2012 of which approximately \$3 million has been realized through the first half of 2012. As of June 30, 2012, we had cash and cash equivalents and availability under the ABL facility of \$248.7 million and the borrowing base under our ABL facility was \$360.2 million.

Our principal uses of cash are to fund our operations, including making contributions to our single-employer pension plans and the multi-employer pension funds, and to meet our other cash obligations, including paying cash interest and principal for our funded debt, letter of credit fees under our credit facilities and funding capital expenditures. For the first half of 2012, our cash flow from operating activities used net cash of \$16.6 million, and we reported a net loss of

\$104.2 million. In the first half of 2012, our operating revenues increased by \$65.0 million compared to the same period in 2011 and our operating loss decreased by \$40.7 million in the first half of 2012 compared to the same period in 2011.

Table of Contents

We have a considerable amount of indebtedness, a substantial portion of which will mature in late 2014 or early 2015, and considerable future funding obligations for our single-employer pension plans and the multi-employer pension funds. As of June 30, 2012, we had \$1,382.9 million in aggregate principal amount of outstanding indebtedness, which amount will increase over time as we continue to accrue paid-in-kind interest on a portion of such indebtedness. We expect that our cash interest on our debt (including pension deferral and lease financing obligations) and cash principal payments for the remainder of 2012 will be \$61.8 million. We expect our letter of credit fees for the remainder of 2012 will be \$19.0 million. Our level of indebtedness increases the risk that we may be unable to generate cash sufficient to service such indebtedness or pay principal when due in respect of such indebtedness. We expect our funding obligations for the period July 2012 to December 2012 for our single-employer pension plans and multi-employer pension funds will be \$55.8 million and \$42.5 million, respectively. In addition, we also have, and will continue to have, substantial operating lease obligations. As of June 30, 2012, our minimum rental expense under operating leases for the remainder of 2012 is \$24.6 million. As of June 30, 2012, our operating lease obligations through 2025 totaled approximately \$151.7 million.

Our capital expenditures for the first half of 2012 and 2011 were \$30.7 million and \$22.7 million, respectively. These amounts were principally used to fund replacement engines and trailer refurbishments for our revenue fleet, capitalized costs for our network facilities and technology infrastructure. Additionally, during the first half of 2012, we entered into new operating lease commitments for revenue equipment of \$55.1 million, with such payment to be made over the average lease term of 3 years. In light of our recent operating results and liquidity needs, we have deferred capital expenditures and expect to continue to do so for the foreseeable future, including the remainder of 2012. As a result, the average age of our fleet has increased and we will need to update our fleet periodically. The credit facilities require us to comply with certain financial covenants, including maintenance of a maximum total leverage ratio, minimum interest coverage ratio, minimum adjusted EBITDA and maximum capital expenditures. Adjusted EBITDA, as defined by our credit facilities, is a measure that reflects the Company's earnings before interest, taxes, depreciation, and amortization expense, and further adjusted for letter of credit fees, equity-based compensation expense, net gains or losses on property disposals and certain other items, including restructuring professional fees and results of permitted dispositions and discontinued operations. We were in compliance with each of these covenants as of June 30, 2012.

We expect that our cash and cash equivalents, improvements in operating results, retention of cash proceeds from asset sales and availability under our credit facilities will be sufficient to allow us to comply with the financial covenants in our credit facilities, fund our operations, increase working capital as necessary to support our planned revenue growth and fund planned capital expenditures for the foreseeable future, including the next twelve months. Our ability to satisfy our liquidity needs over the next twelve months is dependent on a number of factors, many of which are outside of our control. These factors include:

- our operating results, pricing and shipping volumes must continue to improve at a rate significantly better than what we have achieved in our recent financial results;
- we must continue to comply with covenants and other terms of our credit facilities so as to have access to the borrowings available to us under such credit facilities;
- our anticipated cost savings under our labor agreements, including wage reductions and savings due to work rule changes, must be achieved;
- we must complete real estate sale transactions as anticipated;
- we must continue to defer purchases of replacement revenue equipment or secure suitable operating leases for such replacement revenue equipment;
- we must continue to implement and realize substantial cost savings measures to match our costs with business levels and to continue to become more efficient;
- we must continue to carefully manage receipts and disbursements, including amounts and timing, focusing on reducing days sales outstanding for trade receivables and managing days outstanding for trade payables; and
- we must be able to generate operating cash flows that are sufficient to meet our cash requirements for pension contributions to single-employer pension plans and multi-employer pension funds, cash interest and principal payments on debt and for capital expenditures or additional lease payments for new revenue equipment.

There can be no assurance that management will be successful or that such plans will be achieved. We expect to continue to monitor our liquidity, work to alleviate these uncertainties and address our cash needs through a combination of one or more of the following actions:

- we will continue to aggressively seek additional and return business from customers;
- we will continue to attempt to reduce our escrow deposits and letter of credit collateral requirements related to our

Table of Contents

self-insurance programs;

• if appropriate, we may sell additional equity or pursue other capital market transactions; and

• we may consider selling additional assets or business lines, which would require lenders' consent in most cases.

The Company has experienced recurring net losses from continuing operations and operating cash flow deficits. Our ability to continue as a going concern is dependent on many factors, including among others, improvements in our operating results necessary to comply with the financial covenants in our credit facilities. These conditions raise significant uncertainty about our ability to continue as a going concern. The accompanying consolidated financial statements do not include any adjustments that might result from the outcome of the foregoing uncertainties.

The company's expectations regarding proceeds from future real estate sales are only its expectations regarding these matters. Actual proceeds will be determined by company's ability to sell the properties for expected sales prices, which is dependent on the availability of capital and willing buyers and counterparties in the market and the outcome of discussions to enter into and close any such transactions on negotiated terms and conditions, including (without limitation) usual and ordinary closing conditions such as favorable title reports or opinions and favorable environmental assessments of specific properties.

Cash Flow

Operating Cash Flow

Net cash used in operating activities declined by \$44.7 million during the first half of 2012 compared to the same period in 2011. This reduction of cash utilization is primarily attributable to a \$41.4 million year-over-year reduction in net losses.

Investing Cash Flow

Investing cash flows were substantially flat during the first half of 2012 compared to the same period in 2011. The \$8.0 million increase in property and equipment related to the additions of replacement engines and trailer refurbishments as well as capitalized costs for our network facilities and technology infrastructure. The decrease in proceeds from the disposal of property and equipment was offset by receipts from restricted escrow.

Financing Cash Flow

Net cash provided by financing activities for the first half of 2012 was \$26.8 million compared to \$67.8 million for the same period in 2011. During the first half of 2012, we increased our net borrowings under our ABL facility by \$45.0 million, offset by the \$13.1 million repayment of other long-term debt from asset sale proceeds and \$5.1 million in debt issuance costs. This compares to the first half of 2011 when we had proceeds of \$60.7 million from the issuance of long term debt and the \$41.4 million of asset backed securitization borrowings, offset by the \$29.1 million repayment of long-term debt and \$5.2 million of debt issuance costs.

Contractual Obligations and Other Commercial Commitments

The following sections provide aggregated information regarding our contractual obligations and commercial commitments as of June 30, 2012.

Non-union Pension Obligations

On June 29, 2012, Congress passed the "Moving Ahead for Progress in the 21st Century Act" that, among other things, changed the way future minimum required contributions are calculated for certain pension plans. As a result, our expected cash contributions for our non-union sponsored pension plans as of June 30, 2012 are now as follows:

(in millions)	Expected Cash Contributions
Remainder of 2012	\$55.8
2013	69.5
2014	82.5
2015	95.0
2016	89.3

Contractual Cash Obligations

Table of Contents

(in millions)	Payments Due by Period				Total	
	Less than 1 year	1-3 years	3-5 years	After 5 years		
Balance sheet obligations: ^(a)						
ABL borrowings, including interest	\$41.6	\$384.5	\$—	\$—	\$426.1	
Long-term debt including interest ^(b)	36.0	749.7	—	—	785.7	
Lease financing obligations	40.6	83.8	87.0	115.4	326.8	(c)
Pension deferral obligations including interest	9.2	147.0	—	—	156.2	
Workers' compensation, property damage and liability claims obligations	122.8	147.4	76.0	144.5	490.7	
Off balance sheet obligations:						
Operating leases	48.8	66.0	17.6	19.3	151.7	
Letter of credit fees	38.0	64.9	—	—	102.9	(d)
Capital expenditures	7.4	—	—	—	7.4	
Total contractual obligations	\$344.4	\$1,643.3	\$180.6	\$279.2	\$2,447.5	

(a) Total liabilities for unrecognized tax benefits as of June 30, 2012, were \$29.8 million and are classified on the Company's consolidated balance sheet within "Other Current and Accrued Liabilities".

Long-term debt maturities are reflected by contractual maturity for all obligations other than the contingent convertible senior notes which have a par value of \$1.9 million. These notes are instead presented based on the earliest possible redemption date defined as the first date on which the note holders have the option to require us to purchase their notes at par. At June 30, 2012, these notes are convertible for cash payment of a nominal amount based on an assumed market price of \$6.50 per share for our common stock. Should the note holders elect to exercise the conversion options, cash payments would be less than those presented in the table above.

(b) The \$326.8 million of lease financing obligation payments represent interest payments of \$246.5 million and (c) principal payments of \$80.3 million. The remaining principle obligation is offset by the estimated book value of leased property at the expiration date of each lease agreement.

(d) The \$102.9 million of letter of credit fees are related to the cash collateral for our outstanding letters of credit on our previous ABS facility, as well as the amended and restated credit agreement outstanding letters of credit. During the first half of 2012, we entered into new operating lease commitments for revenue equipment of \$55.1 million, with such lease payments to be made over the average lease term of 3 years.

Other Commercial Commitments

The following table reflects other commercial commitments or potential cash outflows that may result from a contingent event, such as a need to borrow short-term funds due to insufficient free cash flow.

(in millions)	Amount of Commitment Expiration Per Period				Total
	Less than 1 year	1-3 years	3-5 years	After 5 years	
Unused line of credit					
ABL Facility	\$—	\$31.9	\$—	\$—	\$31.9
Letters of credit ^(a)	—	436.7	(b) —	—	436.7
Surety bonds	78.4	—	—	—	78.4
Total commercial commitments	\$78.4	\$468.6	\$—	\$—	—\$547.0

(a) We hold in restricted escrow \$42.7 million, which represents cash collateral for our outstanding letters of credit on our previous ABS facility.

(b) Under our credit facilities, we hold in restricted escrow \$9.9 million of cash related to the net cash proceeds from certain asset sales. This restricted escrow provides additional cash collateral for our outstanding letters of credit.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are primarily exposed to the market risk associated with unfavorable movements in interest rates, foreign currencies, and fuel price volatility. The risk inherent in our market risk sensitive instruments and positions is the potential loss or increased expense arising from adverse changes in those factors. There have been no material changes to our market risk policies or our market risk sensitive instruments and positions as described in our annual report on Form 10-K for the year ended December 31, 2011.

Item 4. Controls and Procedures

As required by Exchange Act, we maintain disclosure controls and procedures designed to ensure that information we are required to disclose in reports that we file or submit under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Our disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information we are required to disclose in reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Our management, with the participation of our principal executive and financial officers, has evaluated our disclosure controls and procedures as of June 30, 2012 and has concluded that our disclosure controls and procedures were effective as of June 30, 2012.

There were no changes in our internal control over financial reporting that occurred during the fiscal quarter ended June 30, 2012 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
