## FASTENAL COMPANY AND SUBSIDIARIES

## Notes to Consolidated Financial Statements

(Amounts in thousands except share and per share information and where otherwise noted)

June 30, 2014 and 2013

(Unaudited)

## (1) Basis of Presentation

The accompanying unaudited consolidated financial statements of Fastenal Company and subsidiaries (collectively referred to as the Company, Fastenal, or by terms such as we, our, or us) have been prepared in accordance with United States generally accepted accounting principles for interim financial information. They do not include all information and footnotes required by United States generally accepted accounting principles for complete financial statements. However, except as described herein, there has been no material change in the information disclosed in the notes to consolidated financial statements included in our consolidated financial statements as of and for the year ended December 31, 2013. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included.

## (2) Financial Instruments and Marketable Securities

Due to the varying short-term cash needs of our business, we periodically have marketable securities. We value these assets utilizing a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest priority to measurements involving unobservable inputs (Level 3). The three levels of the fair value hierarchy and how they are determined are defined in our 2013 annual report on Form 10-K in Note 1 of the Notes to Consolidated Financial Statements.

The following table presents the placement in the fair value hierarchy of assets that are measured at fair value on a recurring basis:

June 30, 2014:	Total	Level 1	Level 2	Level 3
Common stock	\$453	453	—	—
Total available-for-sale securities	\$453	453	—	—
December 31, 2013:	Total	Level 1	Level 2	Level 3
Common stock	\$451	451	—	—
Total available-for-sale securities	\$451	451	—	—
June 30, 2013:	Total	Level 1	Level 2	Level 3
Common stock	\$437	437	—	—
Total available-for-sale securities	\$437	437	—	—

There were no transfers between levels during the six and three month periods ended June 30, 2014 and 2013.

As of June 30, 2014, December 31, 2013, and June 30, 2013, our financial assets that are measured at fair value on a recurring basis consisted of common stock.

Table of Contents

## FASTENAL COMPANY AND SUBSIDIARIES

## Notes to Consolidated Financial Statements

(Amounts in thousands except share and per share information and where otherwise noted)

June 30, 2014 and 2013

(Unaudited)

Marketable securities, all treated as available-for-sale securities, consist of the following:

June 30, 2014:	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Common stock	\$ 197	256	—	453
Total available-for-sale securities	\$ 197	256	—	453

December 31, 2013:	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Common stock	\$ 197	254	—	451
Total available-for-sale securities	\$ 197	254	—	451

June 30, 2013:	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Common stock	\$ 197	240	—	437
Total available-for-sale securities	\$ 197	240	—	437

The unrealized gains and losses recorded in accumulated other comprehensive income and the realized gains and losses recorded in earnings were immaterial during the periods reported in these consolidated financial statements. Future maturities of our available-for-sale securities consist of the following:

	Less than 12 Months		Greater than 12 Months	
June 30, 2014:	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Common stock	\$ 197	453	—	—
Total available-for-sale securities	\$ 197	453	—	—

June 30, 2014 and 2013

(Unaudited)

## (3) Stockholders' Equity

Our authorized, issued, and outstanding shares (stated in whole numbers) consist of the following:

	Par Value	June 30, 2014	December 31, 2013	June 30, 2013
Preferred stock	\$ .01 /share			
Shares authorized		5,000,000	5,000,000	5,000,000
Shares issued and outstanding		—	—	—
Common stock	\$ .01 /share			
Shares authorized		400,000,000	400,000,000	400,000,000
Shares issued and outstanding		296,764,444	296,753,544	296,860,119

## Dividends

On July 10, 2014, our board of directors declared a dividend of \$0.25 per share of common stock. This dividend is to be paid in cash on August 22, 2014 to shareholders of record at the close of business on July 25, 2014. Since 2011 we have paid quarterly dividends. Our board of directors expects to continue paying quarterly dividends, provided the future determination as to payment of dividends will depend on the financial needs of the Company and such other factors as deemed relevant by the board of directors.

The following table presents the dividends either paid previously or declared by our board of directors for future payment:

	2014	2013
First quarter	\$0.25	0.10
Second quarter	0.25	0.20
Third quarter	0.25	0.25
Fourth quarter		0.25
Total	\$0.75	0.80

## Stock Options

The following tables summarize the details of grants made under our stock option plan that are still outstanding, and the assumptions used to value these options. All options granted were effective at the close of business on the date of grant.

Date of Grant	Options Granted	Option Exercise (Strike) Price	Closing Stock Price on Date of Grant	June 30, 2014	
				Options Outstanding	Options Exercisable
April 22, 2014	942,500	\$56.00	\$50.53	912,500	—
April 16, 2013	205,000	\$54.00	\$49.25	162,500	—
April 17, 2012	1,235,000	\$54.00	\$49.01	1,105,000	—
April 19, 2011	410,000	\$35.00	\$31.78	330,000	25,000
April 20, 2010	530,000	\$30.00	\$27.13	271,050	136,050
April 21, 2009	790,000	\$27.00	\$17.61	388,700	208,700
April 15, 2008	550,000	\$27.00	\$24.35	185,000	127,500
April 17, 2007	4,380,000	\$22.50	\$20.15	1,629,730	1,314,730
Total	9,042,500			4,984,480	1,811,980

Date of Grant	Risk-free Interest Rate	Expected Life of Option in Years	Expected Dividend Yield	Expected Stock Volatility	Estimated Fair Value of Stock Option
April 22, 2014	1.8	% 5.00	2.0	% 28.55	% \$9.57
April 16, 2013	0.7	% 5.00	1.6	% 37.42	% \$12.66
April 17, 2012	0.9	% 5.00	1.4	% 39.25	% \$13.69
April 19, 2011	2.1	% 5.00	1.6	% 39.33	% \$11.20
April 20, 2010	2.6	% 5.00	1.5	% 39.10	% \$8.14
April 21, 2009	1.9	% 5.00	1.0	% 38.80	% \$3.64
April 15, 2008	2.7	% 5.00	1.0	% 30.93	% \$7.75
April 17, 2007	4.6	% 4.85	1.0	% 31.59	% \$5.63

All of the options in the tables above vest and become exercisable over a period of up to eight years. Each option will terminate in approximately nine years.

The fair value of each share-based option is estimated on the date of grant using a Black-Scholes valuation method that uses the assumptions listed above. The expected life is the average length of time over which we expect the employee groups will exercise their options, which is based on historical experience with similar grants. Expected volatilities are based on the movement of our stock over the most recent historical period equivalent to the expected life of the option. The risk-free interest rate is based on the U.S. Treasury rate over the expected life at the time of grant. The dividend yield is estimated over the expected life based on our current dividend payout, historical dividends paid, and expected future cash dividends.

Compensation expense equal to the grant date fair value is recognized for all of these awards over the vesting period. The stock-based compensation expense for the six month periods ended June 30, 2014 and 2013 was \$3,000 and

\$2,700, respectively. Unrecognized compensation expense related to outstanding unvested stock options as of June 30, 2014 was \$20,024 and is expected to be recognized over a weighted average period of 4.76 years. Any future changes in estimated forfeitures will impact this amount.

June 30, 2014 and 2013

(Unaudited)

## Earnings Per Share

The following tables present a reconciliation of the denominators used in the computation of basic and diluted earnings per share and a summary of the options to purchase shares of common stock which were excluded from the diluted earnings calculation because they were anti-dilutive:

Reconciliation	Six-month Period		Three-month Period	
	2014	2013	2014	2013
Basic weighted average shares outstanding	296,666,992	296,711,326	296,691,232	296,778,588
Weighted shares assumed upon exercise of stock options	867,481	978,224	887,187	943,682
Diluted weighted average shares outstanding	297,534,473	297,689,550	297,578,419	297,722,270

Summary of Anti-dilutive Options Excluded	Six-month Period		Three-month Period	
	2014	2013	2014	2013
Options to purchase shares of common stock	1,646,892	1,238,356	1,997,363	1,307,857
Weighted average exercise prices of options	\$54.44	\$54.00	\$54.72	\$54.00

Any dilutive impact summarized above relates to periods when the average market price of our stock exceeded the exercise price of the potentially dilutive option securities then outstanding.

## (4) Income Taxes

Fastenal, or one of its subsidiaries, files income tax returns in the United States federal jurisdiction, numerous states, and various local and foreign jurisdictions. With limited exceptions, we are no longer subject to income tax examinations by taxing authorities for taxable years before 2011 in the case of United States federal and non-United States examinations and 2010 in the case of state and local examinations.

As of June 30, 2014 and 2013, the Company had \$3,916 and \$7,660, respectively, of liabilities recorded related to gross unrecognized tax benefits. Included in this liability for unrecognized tax benefits is an immaterial amount for interest and penalties, both of which we classify as a component of income tax expense. The Company does not anticipate its total unrecognized tax benefits will change significantly during the next 12 months.

## (5) Operating Leases

We lease certain pick-up trucks under operating leases. These leases have a non-cancellable lease term of one year, with renewal options for up to 72 months. The pick-up truck leases include an early buy out clause we generally exercise, thereby giving the leases an effective term of 28-36 months. Certain operating leases for vehicles contain residual value guarantee provisions which would become due at the expiration of the operating lease agreement if the fair value of the leased vehicles is less than the guaranteed residual value. The aggregate residual value guarantee related to these leases is approximately \$56,711. We believe the likelihood of funding the guarantee obligation under any provision of the operating lease agreements is remote, except for a \$19 loss on disposal reserve provided at June 30, 2014. Our fleet also contains vehicles we estimate will settle at a gain. Gains on these vehicles will be recognized when we sell or dispose of the vehicle or at the end of the lease term.

(Amounts in thousands except share and per share information and where otherwise noted)

June 30, 2014 and 2013

(Unaudited)

(6) Commitments and Contingencies

Credit Facilities and Commitments

We have an unsecured revolving credit facility totaling \$170,000 which expires December 13, 2015. The facility includes a \$40,000 letter of credit subfacility. At June 30, 2014 and 2013 there were undrawn letters of credit outstanding under this facility, with a face amount of \$34,411 and \$29,250, respectively, and there were loans outstanding under this facility of \$70,000 and \$0, respectively. We have the right to prepay this debt and intend to repay this amount using cash within the next twelve months; therefore, we have classified the debt as a current liability. Loans under the facility are subject to certain financial covenants, and we are currently in compliance with these covenants.

Loans under the facility, other than swing line loans, bear interest at a rate per annum equal to, at our election, either (i) LIBOR for an interest period of one month, reset daily, plus 0.875%, or (ii) LIBOR for an interest period of one, two, three, six or twelve months as selected by us, reset at the end of the selected interest period, plus 0.875%. The outstanding loan amount at June 30, 2014 bears interest at a rate per annum equal to option (i) noted above. Swing line loans bear interest at a rate per annum equal to LIBOR for an interest period of one month, reset daily, plus 0.875%. We pay a commitment fee for the unused portion of the facility of 0.10% per annum if the average quarterly utilization of the facility is 20% or more, or 0.125% per annum if the average quarterly utilization of the facility is less than 20%. For each letter of credit issued under the facility, we pay a commission fee on the amount available to be drawn under such letter of credit equal to 0.875% per annum and, subject to certain exceptions, an issuance fee equal to 0.075% of the face amount of such letter of credit.

Legal Contingencies

The nature of our potential exposure to legal contingencies is described in our 2013 annual report on Form 10-K in Note 10 of the Notes to Consolidated Financial Statements. As of June 30, 2014 there were no litigation matters that we consider to be probable or reasonably possible to have a material adverse outcome.

(7) Subsequent Events

We evaluated all subsequent event activity and concluded that no subsequent events have occurred that would require recognition in the financial statements or disclosure in the notes to the financial statements, with the exception of the dividend disclosed in Note (3) 'Stockholders' Equity'.

(8) New Accounting Pronouncements

On May 28, 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard is effective for us on January 1, 2017. Early application is not permitted. The standard permits the use of either the retrospective or cumulative effect transition method. We are evaluating the effect that ASU 2014-09 will have on our consolidated financial statements and related disclosures. We have not yet selected a transition method nor have we determined the effect of the standard on our ongoing financial reporting.

Table of Contents

ITEM 2 — MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is management's discussion and analysis of certain significant factors which have affected our financial position and operating results during the periods included in the accompanying consolidated financial statements. (Dollar amounts are stated in thousands except for per share amounts and where otherwise noted.)

**BUSINESS DISCUSSION**

Fastenal is a North American leader in the wholesale distribution of industrial and construction supplies. We distribute these supplies through a network of approximately 2,700 company owned stores. Most of our customers are in the manufacturing and non-residential construction markets. The manufacturing market includes both original equipment manufacturers (OEM) and maintenance and repair operations (MRO). The non-residential construction market includes general, electrical, plumbing, sheet metal, and road contractors. Other users of our product include farmers, ranchers, truckers, railroads, mining companies, federal, state, and local governmental entities, schools, and certain retail trades. Geographically, our stores and customers are primarily located in North America.

Similar to previous quarters, we have included comments regarding several aspects of our business:

1. Monthly sales changes, sequential trends, and end market performance – a recap of our recent sales trends and some insight into the activities with different end markets.
2. Growth drivers of our business – a recap of how we grow our business.
3. Profit drivers of our business – a recap of how we increase our profits.
4. Statement of earnings information – a recap of the components of our income statement.
5. Operational working capital, balance sheet, and cash flow – a recap of the operational working capital utilized in our business, and the related cash flow.

While reading these items, it is helpful to appreciate several aspects of our marketplace: (1) it's big, the North American marketplace for industrial supplies is estimated to be in excess of \$160 billion per year (and we have expanded beyond North America), (2) no company has a significant portion of this market, (3) many of the products we sell are individually inexpensive, (4) when our customer needs something quickly or unexpectedly our local store is a quick source, (5) the cost and time to manage and procure these products is meaningful, (6) the cost to move these products, many of which are bulky, can be significant, (7) many customers would prefer to reduce their number of suppliers to simplify their business, and (8) many customers would prefer to utilize various technologies to improve availability and reduce waste.

Our motto is Growth through Customer Service®. This is important given the points noted above. We believe in efficient markets – to us, this means we can grow our market share if we provide the greatest value to our customers. We believe our ability to grow is amplified if we can service our customers at the closest economic point of contact. For us, this 'closest economic point of contact' is the local store; therefore, our focus centers on understanding our customers' day, their opportunities, and their obstacles.

The concept of growth is simple, find more customers every day and increase your activity with them. However, execution is hard work. First, we recruit service minded individuals to support our customers and their business. Second, we operate in a decentralized fashion to help identify the greatest value for our customers. Third, we build a great machine behind the store to operate efficiently and to help identify new business solutions. Fourth, we do these things every day. Finally, we strive to generate strong profits; these profits produce the cash flow necessary to fund the growth and to support the needs of our customers.

Table of Contents

## SALES GROWTH

Net sales and growth rates in net sales were as follows:

Note – Daily sales are defined as the total net sales for the period divided by the number of business days (in the United States) in the period.

	Six-month period			Three-month period		
	2014	2013		2014	2013	
Net sales	\$ 1,826,439	1,653,922		\$ 949,938	847,596	
Percentage change	10.4	% 5.1	%	12.1	% 5.3	%
	Six-month period			Three-month period		
	2014	2013		2014	2013	
Daily sales growth rate	10.4	% 5.9	%	12.1	% 5.3	%
Impact of currency fluctuations (primarily Canada)	-0.5	% -0.1	%	-0.4	% -0.1	%

The increase in net sales in the periods noted for 2014 and 2013 came primarily from higher unit sales. Our growth in net sales was impacted by slight inflationary price changes in our non-fastener products and some price deflation in our fastener products, but the net impact was a drag on growth. Our growth in net sales was not meaningfully impacted by the introduction of new products or services, with one exception. Over the last several years, our FAST Solutions® (industrial vending) initiative has stimulated faster growth with a subset of our customers (discussed later in this document). The higher unit sales resulted primarily from increases in sales at older store locations (discussed below and again later in this document) and to a lesser degree the opening of new store locations in the last several years. The growth in net sales at the older store locations was due to the growth drivers of our business (discussed later in this document). The impact of change in currencies in foreign countries (primarily Canada) relative to the United States dollar is noted in the table above.

The stores opened greater than two years represent a consistent ‘same store’ view of our business (store sites opened as follows: 2014 group – opened 2012 and earlier, and 2013 group – opened 2011 and earlier). However, the impact of the economy is best reflected in the growth performance of our stores opened greater than five years (store sites opened as follows: 2014 group – opened 2009 and earlier, and 2013 group – opened 2008 and earlier) and opened greater than ten years (store sites opened as follows: 2014 group – opened 2004 and earlier, and 2013 group – opened 2003 and earlier). These two groups of stores are more cyclical due to the increased market share they enjoy in their local markets. The daily sales change for each of these groups was as follows:

	Six-month Period			Three-month Period		
	2014	2013		2014	2013	
Store Age						
Opened greater than 2 years	9.1	% 4.2	%	10.7	% 3.6	%
Opened greater than 5 years	8.3	% 3.1	%	10.0	% 2.7	%
Opened greater than 10 years	7.6	% 1.6	%	9.4	% 1.3	%

Note: The age groups above are measured as of the last day of each respective calendar year.

## SALES BY PRODUCT LINE:

The mix of sales from the original fastener product line and from the other product lines was as follows:

	Six-month Period			Three-month Period		
	2014	2013		2014	2013	
Fastener product line	40.4	% 43.1	%	40.6	% 43.1	%
Other product lines	59.6	% 56.9	%	59.4	% 56.9	%
	100.0	% 100.0	%	100.0	% 100.0	%

Table of Contents**MONTHLY SALES CHANGES, SEQUENTIAL TRENDS, AND END MARKET PERFORMANCE**

This section focuses on three distinct views of our business – monthly sales changes, sequential trends, and end market performance. The first discussion regarding monthly sales changes provides a good mechanical view of our business based on the age of our stores. The second discussion provides a framework for understanding the sequential trends (that is, comparing a month to the immediately preceding month, and also looking at the cumulative change from an earlier benchmark month) in our business. Finally, we believe the third discussion regarding end market performance provides insight into activities with our various types of customers.

**Monthly Sales Changes:**

All company sales – During the months noted below, all of our selling locations, when combined, had daily sales growth rates of (compared to the same month in the preceding year):

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
2014	6.7	% 7.7	% 11.6	% 10.0	% 13.5	% 12.7	%					
2013	6.7	% 8.2	% 5.1	% 4.8	% 5.3	% 6.0	% 2.9	% 7.2	% 5.7	% 7.7	% 8.2	% 6.7
2012	21.3	% 20.0	% 19.3	% 17.3	% 13.1	% 14.0	% 12.1	% 12.0	% 12.9	% 6.8	% 8.2	% 9.7

Stores opened greater than two years – Our stores opened greater than two years (store sites opened as follows: 2014 group – opened 2012 and earlier, 2013 group – opened 2011 and earlier, and 2012 group – opened 2010 and earlier) represent a consistent 'same-store' view of our business. During the months noted below, the stores opened greater than two years had daily sales growth rates of (compared to the same month in the preceding year):

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
2014	5.5	% 6.5	% 10.2	% 8.4	% 12.1	% 11.4	%					
2013	5.0	% 6.5	% 3.4	% 3.1	% 3.5	% 4.3	% 1.4	% 5.5	% 4.2	% 6.1	% 6.2	% 4.9
2012	18.8	% 17.1	% 16.8	% 14.5	% 10.1	% 11.1	% 9.1	% 8.6	% 9.8	% 3.8	% 5.1	% 6.6

Stores opened greater than five years – The impact of the economy, over time, is best reflected in the growth performance of our stores opened greater than five years (store sites opened as follows: 2014 group – opened 2009 and earlier, 2013 group – opened 2008 and earlier, and 2012 group – opened 2007 and earlier). This group, which represented about 90% of our total sales in the first six months of 2014, is more cyclical due to the increased market share they enjoy in their local markets. During the months noted below, the stores opened greater than five years had daily sales growth rates of (compared to the same month in the preceding year):

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
2014	4.6	% 5.4	% 9.5	% 7.7	% 11.5	% 10.8	%					
2013	3.2	% 5.6	% 2.3	% 2.0	% 2.7	% 3.4	% 0.6	% 4.7	% 3.2	% 5.3	% 6.1	% 4.8
2012	17.4	% 15.8	% 15.7	% 13.7	% 9.0	% 10.2	% 8.3	% 7.9	% 8.5	% 2.6	% 4.6	% 5.6

Summarizing comments – There are three distinct influences to our growth: (1) execution, (2) currency fluctuations, and (3) economic fluctuations. This discussion centers on (2) and (3).

The change in currencies in foreign countries (primarily Canada) relative to the United States dollar impacted our growth over the last several years. During the years 2012 and 2013, it lowered our growth by 0.1% and 0.2%, respectively. In the first six months of 2014 it lowered our growth by 0.5%.

During 2012, the growth in the first three and a half months generally continued the relative strength we saw in 2011. Then we began to experience several distinct economic slowdowns. The first occurred in the late April/May time frame, and then moderated until September 2012. The second occurred in the October/November time frame. This was exaggerated by the impact of Hurricane Sandy and an unusual business day comparison in October (23 days in 2012 versus 21 days in 2011 - the maintenance portion of our business is often linked to monthly spend patterns of our customers, which are not as business day dependent, this can dilute the daily growth picture given the change in business day divisor). The third occurred in the spring of 2013. This involved our fastener product line and our construction business (primarily non-residential construction). This third slowdown, similar to the first two listed, mirrored or slightly led some softening in the PMI Index. The PMI Index is a composite index of economic activity in the United States manufacturing sector. It is published by the Institute for Supply Management and is available at <http://www.ism.ws/>. The fastener piece was heavily impacted by our industrial production business. These customers utilize our fasteners in the manufacture/assembly of their finished products. The end markets with the most

pronounced weakening included heavy machinery manufacturers with exposure to: mining, military, agriculture, and construction. The fourth and fifth occurred in July 2013 and December 2013. The daily sales growth in July 2013 and

Table of Contents

December 2013 were negatively impacted by the timing of the July 4th holiday (Thursday in 2013, Wednesday in 2012, Monday in 2011) and the Christmas/New Year holiday (Wednesday in 2013, Tuesday in 2012, and Sunday in 2011). This resulted in a 'lone' business day on Friday, July 5, 2013, in which many of our customers were closed, and three distinct one to two day work periods in the last two weeks of December 2013. The December impact was amplified due to poor weather conditions.

Our daily sales growth trends have improved since September 2013. This was largely related to changing comparisons to 2012 and to the improving sequential patterns noted in the next discussion. Our sales to customers engaged in light and medium duty manufacturing (largely related to consumer products) are improving; this makes sense given the trends in the PMI Index.

In the first quarter of 2014, our sales growth was hampered in January and February due to a weak economy and foreign exchange rate fluctuations (primarily related to the Canadian dollar); however, the biggest impact was a severe winter in North America and its negative impact on our customers and our trucking network. In March 2014, the weak economy and negative foreign exchange rate fluctuations continued; however, the weather normalized and our daily sales growth expanded to 11.6%. This double digit growth in March was helped by the Easter timing (April in 2014), but the real story is good people, good execution, and minimal negative weather impacts. In the second quarter of 2014, the negative impact of the Easter timing was felt, and then a 'less noisy' picture emerged in May and June. One optimistic observation; our sales to customers engaged in heavy machinery manufacturing (primarily serving the mining, military, agricultural, and construction end markets), which represents approximately one fifth of our business, had a very weak 2013, but stabilized late in 2013 and has improved in the first six months of 2014.

Sequential Trends:

We find it helpful to think about the monthly sequential changes in our business using the analogy of climbing a stairway – This stairway has several predictable landings where there is a pause in the sequential gain (i.e. April, July, and October to December), but generally speaking, climbs from January to October. The October landing then establishes the benchmark for the start of the next year.

History has identified these landings in our business cycle. They generally relate to months with impaired business days (certain holidays). The first landing centers on Easter, which alternates between March and April (Easter occurred in April 2014, March 2013, and April 2012), the second landing centers on July 4th, and the third landing centers on the approach of winter with its seasonal impact on primarily our construction business and with the Christmas/New Year holiday. The holidays we noted impact the trends because they either move from month-to-month or because they move around during the week (the July 4th and Christmas/New Year holiday impacts are examples).

The table below shows the pattern to the sequential change in our daily sales. The line labeled 'Benchmark' is an historical average of our sequential daily sales change for the period 1998 to 2013, excluding 2008 and 2009. We believe this time frame will serve to show the historical pattern and could serve as a benchmark for current performance. We excluded the 2008 to 2009 time frame because it contains an extreme economic event and we don't believe it is comparable. The '2014', '2013', and '2012' lines represent our actual sequential daily sales changes. The '14Delta', '13Delta', and '12Delta' lines indicate the difference between the 'Benchmark' and the actual results in the respective year.

	Jan. <sup>1</sup>	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Cumulative Change from Jan. to	
											June	Oct.
Benchmark	0.8	% 2.2	% 3.8	% 0.4	% 3.1	% 2.7	% -2.1	% 2.5	% 3.7	% -1.2	% 12.6	% 15.9
2014	-1.4	% 3.0	% 7.1	% -2.6	% 4.2	% 2.5	%				14.8	%
14Delta	-2.2	% 0.8	% 3.3	% -3.0	% 1.1	% -0.2	%				2.2	%
2013	-0.4	% 2.0	% 3.4	% -1.1	% 1.0	% 3.2	% -5.5	% 5.5	% 2.9	% -2.9	% 8.7	% 8.2
13Delta	-1.2	% -0.2	% -0.4	% -1.5	% -2.1	% 0.5	% -3.4	% 3.0	% -0.8	% -1.7	% -3.9	% -7.7
2012	-0.3	% 0.5	% 6.4	% -0.8	% 0.5	% 2.5	% -2.7	% 1.3	% 4.3	% -4.8	% 9.3	% 7.1
12Delta	-1.1	% -1.7	% 2.6	% -1.2	% -2.6	% -0.2	% -0.6	% -1.2	% 0.6	% -3.6	% -3.3	% -8.8

- (1) The January figures represent the percentage change from the previous October, whereas the remaining figures represent the percentage change from the previous month.

Table of Contents

A graph of the sequential daily sales change pattern discussed above, starting with a base of '100' in the previous October and ending with the next October, would be as follows:

## End Market Performance:

The momentum has been building in our business during 2014. To highlight this strength, we included the June 2014 daily sales growth rate in the tables below.

Fluctuations in end market business – The sequential trends noted above were directly linked to fluctuations in our end markets. To place this in perspective – approximately 50% of our business has historically been with customers engaged in some type of manufacturing. The daily sales to these customers grew, when compared to the same period in the prior year, as follows:

		Q1		Q2		Q3		Q4		Annual
2014	(June = 12.0%)	9.0	%	11.2	%					
2013		7.0	%	5.9	%	4.7	%	7.2	%	6.3
2012		20.3	%	15.8	%	14.0	%	9.7	%	14.9

Our manufacturing business consists of two subsets: the industrial production business (this is business where we supply products that become part of the finished goods produced by our customers and is sometimes referred to as OEM - original equipment manufacturing) and the maintenance portion (this is business where we supply products that maintain the facility or the equipment of our customers engaged in manufacturing). The industrial business is more fastener centered, while the maintenance portion is represented by all product categories.

The best way to understand the change in our industrial production business is to examine the results in our fastener product line (just over 40% of our business) and to factor in the changes in our business with heavy equipment manufacturers (discussed earlier in this document). From a company perspective, sales of fasteners grew, when compared to the same period in the prior year, as follows (note: this information includes all end markets):

		Q1		Q2		Q3		Q4		Annual
2014	(June = 6.6%)	1.6	%	5.5	%					
2013		1.7	%	1.9	%	1.0	%	1.9	%	1.6
2012		15.4	%	8.0	%	6.0	%	2.6	%	7.8

By contrast, the best way to understand the change in the maintenance portion of the manufacturing business is to examine the results in our non-fastener product lines. From a company perspective, sales of non-fasteners grew, when compared to the same period in the prior year, as follows (note: this information includes all end markets):

Table of Contents

		Q1	Q2	Q3	Q4	Annual
2014	(June = 17.5%)	14.2	% 17.1	%		
2013		10.8	% 8.5	% 8.9	% 12.0	% 10.1 %
2012		25.1	% 21.1	% 18.0	% 13.6	% 19.2 %

The non-fastener business demonstrated greater relative resilience over the last several years, when compared to our fastener business and to the distribution industry in general, due to our strong FAST Solutions® (industrial vending) program; this is discussed in greater detail later in this document. However, this business was not immune to the impact of a weak industrial environment.

Our non-residential construction customers have historically represented 20% to 25% of our business. The daily sales to these customers grew when compared to the same period in the prior year, as follows:

		Q1	Q2	Q3	Q4	Annual
2014	(June = 8.8%)	2.9	% 7.5	%		
2013		2.9	% 0.7	% 3.9	% 2.8	% 2.5 %
2012		17.1	% 12.7	% 8.2	% 4.2	% 10.3 %

We believe the weakness in the economy in the fourth quarter of 2012, throughout 2013, and during early 2014, particularly in the non-residential construction market, was amplified by the global economic uncertainty combined with the economic policy uncertainty in the United States. This weakness was amplified by severe winter weather conditions in January and February 2014.

A graph of the sequential daily sales trends to these two end markets in 2014, 2013, and 2012, starting with a base of '100' in the previous October and ending with the next October, would be as follows:

Manufacturing

Table of Contents

Non-Residential Construction

**GROWTH DRIVERS OF OUR BUSINESS**

We grow by continuously adding customers and by increasing the activity with each customer. We believe this growth is enhanced by our close proximity to our customers, which allows us to provide a range of services and product availability that our competitors can't easily match. Historically, we expanded our reach by opening stores at a very fast pace. These openings were initially in the United States, but expanded beyond the United States beginning in the mid 1990's.

For a little perspective, we began our business in 1967 with an idea to sell nuts and bolts (fasteners) through vending machines. We soon learned the technology of the 1960's wasn't ready, and also learned a lot of products didn't fit, so we went to 'Plan B'; sell to business users with a direct sales force. It took us a number of years to 'work out the bugs', but ten years later we began to pick up the pace of store openings. After another ten years of expansion we had approximately 50 stores and sales of about \$20 million. Our need for cash was growing, as was our desire to allow employee ownership. This led us to a public offering in 1987.

In our first ten years of being public (1987 to 1997), we opened stores at an annual rate approaching 30%. In the next ten years (1997 to 2007), we opened stores at an annual rate of approximately 10% to 15% and, since 2007, at an annual rate of approximately 2% to 8%. We opened 17 stores in the first six months of 2014 and currently expect to open approximately 35 to 40 stores in total for 2014, or an annual rate of approximately 1% to 2%.

During our almost 50 years of business existence, we have constantly evolved to better serve the market (as is described in the paragraphs below) and have always been willing to challenge our approach. In our first 20 to 25 years we closed several store locations because we felt the market was insufficient to operate a profitable business. Every one of those locations was subsequently 'reopened' when our business model evolved to serve these markets profitably. During the last 20 to 25 years, we have enjoyed continued success with our store-based model, and we continue to challenge our approach. Based on this approach, we have closed approximately 85 stores in the last ten years - not because they weren't successful, but rather because we felt we had a better approach to growth. In the first six months of 2014, we have continued to challenge our approach and closed 20 stores (all but four of these locations were in close proximity to another Fastenal store). In the second quarter of 2014 we took a hard look at our business and identified another 45 stores we intend to close in the second half of 2014 (all but eight of these locations are in close proximity to another Fastenal store). Several items we think are noteworthy: the group of stores we identified for closure in the second half of 2014 was profitable in the first quarter of 2014 (our analysis measurement period); they operated with average sales of about \$36 thousand per month. We chose to close this group because we felt this was simply a better approach to growing our business profitably.

There is a short-term price for closing these stores; and, since we believe we will maintain the vast majority of the sales associated with these locations and since most of the impacted employees have a nearby store from which to operate, the price primarily relates to the future commitments related to the leased locations. During the second quarter of 2014, we recorded the impaired future costs related to these commitments. The expense was not material as these locations have relatively short lease commitments and minimal leasehold improvements.

Table of Contents

During the years, our expanding footprint has provided us with greater access to more customers, and we have continued to diversify our growth drivers. This was done to provide existing store personnel with more tools to grow their business organically, and the results of this are reflected in our earlier discussion on sales growth at stores opened greater than five years. In the early 1990's, we began to expand our product lines, and we added new product knowledge to our bench (the non-fastener products now represent over 50% of our sales). This was our first big effort to diversify our growth drivers. The next step began in the mid to late 1990's when we began to add sales personnel with certain specialties or focus. This began with our National Accounts group in 1995, and, over time, has expanded to include individuals dedicated to: (1) sales related to our internal manufacturing division, (2) government sales, (3) internet sales, (4) specific products (most recently metalworking), and (5) FAST Solutions® (industrial vending). Another step occurred at our sales locations (this includes Fastenal stores as well as strategic account stores and in-plant locations) and at our distribution centers, and began with a targeted merchandising and inventory placement strategy that included our 'Customer Service Project' approximately twelve years ago and our 'Master Stocking Hub' initiative approximately seven years ago. These strategies allowed us to better target where to stock certain products (local store, regional distribution center, master stocking hub, or supplier) and allowed us to improve our fulfillment, lower our freight costs, and improve our ability to serve a broader range of customers. During 2013 and 2014, we expanded our store based inventory offering around select industries (with an emphasis on fasteners, construction products, and safety products) and beginning in the latter half of 2013 we expanded two key employee groups: (1) the number of employees working in our stores and (2) the number of district and regional leaders supporting our stores. The theme that shines through in all these changes, particularly the last several, is a simple one – invest into and support our sales machine – the local store.

Over the last several years our FAST Solutions® (industrial vending) operation has been an expanding component of our business. We believe industrial vending will be an important chapter in the Fastenal story; we also believe it has the potential to be transformative to industrial distribution, and that we have a 'first mover' advantage. Given this, we have been investing aggressively to maximize the advantage.

Our expanded industrial vending fleet consists of thirteen different vending devices. We have learned much about these devices over the last several years and currently have target monthly revenue ranging from under \$1,000 to in excess of \$3,000 per device. The following two tables provide two views of our data: (1) actual device count regardless of the type of machine and (2) 'machine equivalent' count based on the weighted target monthly revenue of each device (compared to the FAST 5000 device, which has a \$2,000 monthly revenue target). For example, the 12-door locker, with target monthly revenue of \$750, would be counted as '0.375 machine equivalent' ( $0.375 = \$750/\$2,000$ ).

The industrial vending information related to contracts signed during each period was as follows:

		Q1	Q2	Q3	Q4	Annual
Device count signed during the period	2014	4,025	4,137			
	2013	6,568	6,084	4,836	4,226	21,714
	2012	6,646	6,818	7,871	6,715	28,050
	2011	1,812	2,710	2,930	2,753	10,205

	2011	50.6	%	43.9	%	42.5	%	40.7

<sup>1</sup> The percentage of total sales (vended and traditional) to customers currently using a vending solution.

<sup>2</sup> The growth in total sales (vended and traditional) to customers currently using a vending solution compared to the same period in the preceding year.

In addition to the industrial vending operation noted above, which primarily relates to our non-fastener business, we also provide bin stock programs (also known as 'keep fill' programs in the industry) to numerous customers. This business, which relates to both our maintenance customers (MRO fasteners and non-fasteners) and original equipment manufacturers (OEM fasteners), has many similar attributes to our industrial vending relationships. These attributes include a strong relationship with these customers, where we are often their preferred supplier, and also includes a frequent level of business transactions. This business is performed without the aid of a vending machine, but does make use of the latest scanning technologies, scales systems, and our fully integrated distribution network to manage the supply chain for all sizes of customers. In recent years, we have begun to refer to this business as FMI (Fastenal Managed Inventory).

Table of Contents**PROFIT DRIVERS OF OUR BUSINESS**

As we state several times in this document, profit is important to us. For a distribution business profit and cash flow go hand in hand, and this cash flow funds our growth and creates value for our customers, our employees, our suppliers, and our shareholders. We grow our profits by continuously working to grow sales and to improve our relative profitability. We also grow our profits by allowing our inherent profitability to shine through – we refer to this as the 'pathway to profit'. The distinction is important.

We achieve improvements in our relative profitability by increasing our gross profit, by structurally lowering our operating expenses, or both. We advance on the 'pathway to profit' by increasing the average store size (measured in terms of monthly sales), and by allowing the changing store mix to improve our profits. This is best explained by comparing the varying profitability of our 'traditional' stores in the table below. The average store size for the group, and the average age, number of stores, and pre-tax earnings data by store size for the second quarter of the last three years were as follows:

Sales per Month	Average Age (Years)	Number of Stores	Percentage of Stores	Pre-Tax Earnings Percentage	
Three months ended June 30, 2014		Average store sales = \$102,357			
\$0 to \$30,000	5.9	147	5.5	% -12.7	%
\$30,001 to \$60,000	8.5	622	23.2	% 11.8	%
\$60,001 to \$100,000	10.8	816	30.4	% 20.1	%
\$100,001 to \$150,000	13.3	528	19.7	% 24.7	%
Over \$150,000	16.0	430	16.0	% 27.4	%
Strategic Account/Overseas Store		141	5.2	%	
Company Total		2,684	100.0	% 21.8	%
Three months ended June 30, 2013		Average store sales = \$91,947			
\$0 to \$30,000	4.8	220	8.2	% -10.3	%
\$30,001 to \$60,000	7.9	731	27.3	% 14.5	%
\$60,001 to \$100,000	10.7	804	30.0	% 23.2	%
\$100,001 to \$150,000	12.6	451	16.9	% 26.5	%
Over \$150,000	15.6	344	12.9	% 29.2	%
Strategic Account/Overseas Store		127	4.7	%	
Company Total		2,677	100.0	% 22.7	%
Three months ended June 30, 2012		Average store sales = \$89,169			
\$0 to \$30,000	4.2	266	10.1	% -11.8	%
\$30,001 to \$60,000	7.3	769	29.2	% 12.6	%
\$60,001 to \$100,000	10.0	757	28.7	% 22.3	%
\$100,001 to \$150,000	12.1	419	15.9	% 26.1	%
Over \$150,000	15.2	316	12.0	% 29.3	%
Strategic Account/Overseas Store		108	4.1	%	
Company Total		2,635	100.0	% 22.2	%

Note – Amounts may not foot due to rounding difference.

When we originally announced the 'pathway to profit' strategy in 2007, our goal was to increase our pre-tax earnings, as a percentage of sales, from 18% to 23%. This goal was to be accomplished by slowly moving the mix from the first three categories (\$0 to \$30,000, \$30,001 to \$60,000, and \$60,001 to \$100,000, these groups represented 76.5% of our store base in the first three months of 2007, the last quarter before we announced the 'pathway to profit') to the last three categories (\$60,001 to \$100,000, \$100,001 to \$150,000, and over \$150,000, these groups represented 66.1% of our store base in the second quarter of 2014) and by increasing the average store sales from \$71,600 (in the first three months of 2007) to approximately \$125,000 per month. The weak economic environment in 2009 caused our average

store size to decrease, and consequently lowered our level of profitability; however, we never lost sight of the simple 'economic math' of our business, and our ability to grow the level of profitability long-term. In the aftermath of 2009, we grew the average store size, we improved our gross profit, and we structurally lowered our operating expenses. The improvement in the latter two allowed us to amplify the 'pathway to profit' and effectively lowered the average store size required to hit our 23% goal. Today we believe we can accomplish our 'pathway to profit' goal with average store sales of approximately \$110,000 per month.

Note – Dollar amounts in this section are presented in whole dollars, not thousands.

Table of Contents

Store Count and Full-Time Equivalent (FTE) Headcount – The table below highlights certain impacts on our business of the 'pathway to profit' since its introduction in 2007. Under the 'pathway to profit' we increased both our store count and our store FTE headcount during 2007 and 2008. However, the rate of increase in store locations slowed and our FTE headcount for all types of personnel was reduced when the economy weakened late in 2008. In the table that follows, we refer to our 'store' net sales, locations, and personnel. When we discuss 'store' net sales, locations, and personnel, we are referring to (1) 'Fastenal' stores and (2) strategic account stores. 'Fastenal' stores are either a 'traditional' store, the typical format in the United States or Canada, or an 'overseas' store, which is the typical format outside the United States and Canada. This is discussed in greater detail in our 2013 annual report on Form 10-K. Strategic account stores are stores that are focused on selling to a group of large customers in a limited geographic market. The sales outside of our 'store' group, relate to either (1) our in-plant locations, (2) the portion of our internally manufactured product that is sold directly to a customer and not through a store (including our Holo-Krome® business acquired in December 2009), or (3) our direct import business.

The breakdown of our net sales, the average monthly sales per store, the number of stores at quarter end, the absolute headcount at our stores during a quarter, the average FTE headcount during a quarter, and the percentage change for each were as follows for the first quarter of 2007 (the last completed quarter before we began the 'pathway to profit') and for each of the last five quarters:

	Q1 2007	Q2 2013	Q3 2013	Q4 2013	Q1 2014	Q2 2014	
Total net sales reported	\$489,157	\$847,596	\$858,424	\$813,760	\$876,501	\$949,938	
Less: Non-store sales (approximate)	40,891	109,300	108,427	105,499	113,945	125,509	
Store net sales (approximate)	\$448,266	\$738,296	\$749,997	\$708,261	\$762,556	\$824,429

<sup>1</sup> The manufacturing headcount was impacted by the addition of 92 employees with the acquisition of Holo-Krome® in December 2009.

Table of Contents

## STATEMENT OF EARNINGS INFORMATION (percentage of net sales) for the periods ended June 30:

	Six-month period				Three-month period			
	2014		2013		2014		2013	
Net sales	100.0	%	100.0	%	100.0	%	100.0	%
Gross profit	51.0	%	52.3	%	50.8	%	52.2	%
Operating and administrative expenses	29.9	%	30.1	%	29.1	%	29.6	%
Gain on sale of property and equipment	0.0	%	0.0	%	0.0	%	0.0	%
Operating income	21.1	%	22.2	%	21.8	%	22.7	%
Net interest income (expense)	0.0	%	0.0	%	0.0	%	0.0	%
Earnings before income taxes	21.1	%	22.2	%	21.8	%	22.7	%

Note – Amounts may not foot due to rounding difference.

Gross profit – The gross profit percentage in the first, second, third, and fourth quarters was as follows:

	Q1		Q2		Q3		Q4	
2014	51.2	%	50.8	%				
2013	52.3	%	52.2	%	51.7	%	50.6	%
2012	51.3	%	51.6	%	51.6	%	51.6	%

The fluctuations in our gross profit percentages are typically driven by changes in: (1) transactional gross profit, (2) organizational gross profit, and (3) supplier incentive gross profit. The transactional gross profit represents the gross profit realized from the day-to-day fluctuations in customer pricing relative to product and freight costs. The organizational gross profit represents the component of gross profit we attribute to buying scale and efficiency gains. The third component relates to supplier volume allowances. In the short-term, periods of inflation or deflation can influence the first two categories, while sudden changes in business volume can influence the third.

We believe a normal gross profit percentage range for our business is 51% to 53% (see also the discussion under the caption 'BUSINESS UPDATE' earlier in this document). This is based on our current mix of products, geographies, end markets, and end market uses (such as industrial production business versus maintenance business). We have been focused on top line growth improvement and have been willing to operate in the lower half of, and sometimes just below, the normal range. The following narrative may be more detail than you want; however, we believe it is an important recap to understanding the dynamics surrounding our gross profit patterns. Our business operated below our expected gross profit range at the end of 2009, and expanded into the low end of this range during 2010. In the second quarter of 2010, we moved into the middle of the range as the three components of gross profit improved, the contribution being split fairly evenly between the three components. We remained in the middle of the range until the fourth quarter of 2011. In the fourth quarter of 2011, our gross profit felt pressure and dropped to the lower end of the range. This drop was primarily due to changes in our transactional profit (primarily due to changes in product and customer mix), lower supplier incentive gross profit, and lower freight utilization. The latter two items created half of the gross profit drop and are more of a seasonal issue. In the first quarter of 2012, our gross profit improved nominally over the previous quarter. This was primarily caused by the seasonal improvement of supplier volume allowances as rising fuel prices offset our improvements in freight utilization. In the second, third, and fourth quarters of 2012, our gross profit improved when compared to the first quarter. Most of this improvement related to improvements in our transactional gross profit. The improvement was partially offset by the weakening of our selling prices in certain foreign markets due to changes in the exchange rate. One item of note, in the fourth quarter of 2012 we experienced a drop off in the freight component of our gross profit due to lower freight utilization, a typical pattern due to the seasonal drop off in business; this gross profit decline was offset by an improvement in the remaining portion of our transactional gross profit that centers on product transactional cost and customer pricing.

The first two quarters of 2013 experienced a strong improvement in gross profit. A piece of this related to the seasonal impact of improving freight utilization, but this improvement was constrained due to the weak sales growth. The real driver of improvement related to our store personnel, armed with our newly implemented price guidance system, exercising great judgment about pricing their product. During the third quarter of 2013, we experienced a sequential

(second to third quarter) decline in our gross profit. Most of this decline was in the transactional profit (about 85% of the change); with the balance in the supplier incentive gross profit. The decline in our supplier incentive gross profit was due to our continued pattern of weak sales growth. Within the transactional component, product mix stood out as the most identifiable portion (this was about 40% of the total drop, and reflects the continued weakness in our fastener growth and the strength in the growth in safety products - fasteners carry a higher gross profit, safety products don't). The remaining portion of the transactional decline was split across a

Table of Contents

number of causes, the result of a very competitive landscape and our competitive nature. Beginning in the third quarter, we had placed a greater emphasis on expanding the headcount at our store locations, putting more emphasis on shorter cycle sales efforts, and moving the needle on top line growth. This has impacted our gross profit in the short term; however, we think this approach is the correct long-term move as it reinforces our trust in our store personnel and our desire to grow our business long-term, but it does make for a bumpier ride. In the fourth quarter of 2013, we experienced another sequential (third to fourth quarter) decline in gross profit. Similar to prior years, we lost some gross profit due to a seasonal drop in freight utilization and in supplier incentive gross profit. This represented about 30% of the drop and was expected to recover in the new year as volume increases (seasonality) and supplier incentive programs reset (typically calendar based). The remaining drop relates to factors noted in the third quarter. In the first quarter of 2014 we moved back into our expected range. This improvement was evenly split between an improvement in freight utilization and in supplier incentive gross profit. In the second quarter of 2014 we dropped below the range. The drop was primarily related to transactional gross profit driven by changes in product mix, end market mix, and a strong sales growth emphasis.

Operating and administrative expenses - decreased as a percentage of sales in the second quarter of 2014 versus the second quarter of 2013.

Historically, our two largest components of operating and administrative expenses have consisted of employee related expenses (approximately 65% to 70%) and occupancy related expenses (approximately 15% to 20%). The remaining expenses cover a variety of items with selling transportation typically being the largest.

The three largest components of operating and administrative expenses grew as follows for the periods ended June 30 (compared to the same period in the preceding year):

	Six-month period		Three-month period	
	2014	2013	2014	2013
Employee related expenses	9.3	% 4.1	% 12.2	% 2.7
Occupancy related expenses	8.9	% 12.1	% 9.2	% 10.6
Selling transportation costs	16.7	% -0.8	% 15.9	% -2.6

Employee related expenses include: (1) payroll (which includes cash compensation, stock option expense, and profit sharing), (2) health care, (3) personnel development, and (4) social taxes. For the first six months of 2014, when compared to 2013, (1) our performance bonuses and commissions grew due to our expanding sales growth from the past year, (2) our profit sharing contribution contracted due to lower relative profitability, and (3) our health care costs grew. These factors, combined with a 14.4% increase in full-time equivalent headcount, caused employee related costs to grow. Employee related expenses in the second quarter of 2014, when compared to 2013, grew for similar reasons; the noteworthy differences being a greater growth in bonuses and commissions as well as a 15.0% increase in full-time equivalent headcount. For the first six months of 2013, when compared to 2012, performance bonuses were down; however, this decrease was offset by increases related to the following factors: (1) average employee headcount, measured on a full-time equivalent basis, grew 1.4% and 0.1% in the first and second quarters, respectively, (2) sales commissions grew due to the gross profit improvement, (3) bonus amounts related to our growth drivers grew (this relates to our industrial vending bonuses which grew in the six month period), (4) our profit sharing contribution grew, and (5) our health care costs grew. The increase in employee related expenses in the second quarter of 2013, when compared to 2012, grew for similar reasons, except for the industrial vending bonuses, which declined.

Occupancy related expenses include: (1) building rent and depreciation, (2) building utility costs, (3) equipment related to our stores and distribution locations, and (4) FAST Solutions® (industrial vending) equipment (we consider the vending equipment to be a logical extension of our store operation and classify the expense as occupancy). The increase in the first six months of 2014, when compared to 2013, was driven by (1) an increase in the amount of FAST Solutions® (industrial vending) equipment as discussed earlier in this document, (2) an increase in building utility cost due to a severe winter in January and February 2014, (3) a nominal increase in the number of store locations, (4) an increased investment in our distribution infrastructure over the last several years, primarily related to automation, and (5) an accrual related to closed and closing store locations. The increase in the second quarter of 2014, when compared to 2013, was driven by the same factors as the six month period except for the winter component. The

increase in the first six months of 2013, when compared to 2012, was driven by (1) a dramatic increase in the amount of FAST Solutions<sup>SM</sup> (industrial vending) equipment as discussed earlier in this document, (2) a nominal increase in the number of store locations, and (3) an increased investment in our distribution infrastructure over the last several years. In the first half of 2013, the industrial vending component represented 62% of the increase and utilities represented 17% of the increase. The increase in occupancy related expenses in the second quarter of 2013, when compared to 2012, grew for similar reasons, except for the utilities component.

Our selling transportation costs consist primarily of our store fleet as most of the distribution fleet costs are included in the cost of sales. Selling transportation costs included in operating and administrative expenses grew in the first six months of 2014,

Table of Contents

when compared to 2013. This was driven by the increase in store headcount and the reduction in mileage per gallon associated with severe winter driving conditions. The increase in the second quarter of 2014, when compared to 2013, was driven by the same factors as the six-month period except for the winter component. Selling transportation costs included in operating and administrative expenses were essentially flat in the first half of 2013, when compared to 2012. This was helped by stronger conservation factors and a lower price per gallon for fuel. This fact pattern was also true for the second quarter of 2013, when compared to 2012.

The last several years have seen some variation in the cost of diesel fuel and gasoline – During the first and second quarters of 2014, our total vehicle fuel costs were approximately \$11.9 and \$12.5 million, respectively. During the first, second, third, and fourth quarters of 2013, our total vehicle fuel costs were approximately \$10.6, \$10.6, \$11.2, and \$9.6 million, respectively. The changes resulted from variations in fuel costs, variations in the service levels provided to our stores from our distribution centers, changes in the number of vehicles at our store locations, changes in the number of other sales centered vehicles as a result of store openings and the expansion of our non-store sales force, and changes in driving conditions. These fuel costs include the fuel utilized in our distribution vehicles (semi-tractors, straight trucks, and sprinter trucks) which is recorded in cost of sales and the fuel utilized in our store delivery and other sales centered vehicles which is included in operating and administrative expenses (the split in the last several years has been approximately 50:50 between distribution and store and other sales centered use).

The average per gallon fuel costs (in actual dollars) and the percentage change (on a year-over-year basis) for the last three years was as follows:

Per gallon average price	Q1	Q2	Q3	Q4	Annual Average <sup>1</sup>
2014 price					
Diesel fuel	\$3.98	3.95			
Gasoline	\$3.33	3.62			
2013 price					
Diesel fuel	\$4.02	3.90	3.90	3.88	3.93
Gasoline	\$3.51	3.60	3.56	3.30	3.49
2012 price					
Diesel fuel	\$3.92	3.98	3.88	4.05	3.96
Gasoline	\$3.53	3.73	3.61	3.53	3.60
Per gallon price change	Q1	Q2	Q3	Q4	Annual <sup>1</sup>
2014 change					
Diesel fuel	-1.0	% 1.3	%		
Gasoline	-5.1	% 0.6	%		
2013 change					
Diesel fuel	2.6	% -2.0	% 0.5	% -4.2	% -0.8
Gasoline	-0.6	% -3.5	% -1.4	% -6.5	% -3.1

<sup>1</sup> Average of the four quarterly figures contained in the table.

Income taxes – Income taxes, as a percentage of earnings before income taxes, were approximately 37.1% and 37.4% for the first half of 2014 and 2013, respectively. As our international business and profits grow over time, the lower income tax rates in those jurisdictions, relative to the United States, have begun to lower our effective tax rate.

Table of Contents**OPERATIONAL WORKING CAPITAL**

The year-over-year comparison and the related dollar and percentage changes related to accounts receivable and inventories were as follows:

	Balance at June 30:			Twelve Month Dollar Change		Twelve Month Percentage Change			
	2014	2013	2012	2014	2013	2014	2013		
Accounts receivable, net	\$502,330	436,452	399,993	65,878	36,459	15.1	% 9.1	%	
Inventories	818,771	725,107	662,689	93,664	62,418	12.9	% 9.4	%	
Operational working capital <sup>1</sup>	\$1,321,101	1,161,559	1,062,682	159,542	98,877	13.7	% 9.3	%	
Sales in last two months	\$634,790	560,974	543,797	73,816	17,177	13.2	% 3.2	%	

<sup>1</sup> For purposes of this discussion, we are defining operational working capital as accounts receivable, net and inventories.

The growth in accounts receivable noted above was driven by our sales growth in the final two months of the period. The strong growth in recent years of our international business and of our large customer accounts has created meaningful difficulty with managing the growth of accounts receivable relative to the growth in sales. The growth of the June 2014 balance was amplified due to an additional day in June 2014 which caused total sales growth in June to be 18.3%.

Our growth in inventory balances over time does not have as direct a relationship to our monthly sales patterns as does our growth in accounts receivable. This is impacted by other aspects of our business. For example, the dramatic economic slowdown in late 2008 and early 2009 caused our inventory to spike. This occurred because the lead time for inventory procurement is typically longer than the visibility we have into future monthly sales patterns. Over the last decade, we increased our relative inventory levels due to the following: (1) new store openings, (2) expanded stocking breadth at distribution centers (for example, our master stocking hub in Indianapolis expanded its product breadth over six fold from 2005 to 2011), (3) expanded direct sourcing, (4) expanded exclusive brands (private label), (5) expanded industrial vending solutions, (6) national accounts growth, (7) international growth, and (8) expanded stocking breadth at individual stores. While all of these items impacted both 2014 and 2013, items (3) through (8) had the greatest impact.

**BALANCE SHEET AND CASH FLOW**

Our balance sheet continues to be very strong and our operations have good cash generating characteristics. During the second quarter of 2014, we generated \$79,631 (or 61.0% of net earnings) of operating cash flow; year-to-date, we generated \$222,929 (or 92.0% of net earnings) of operating cash flow. Our first quarter typically has stronger cash flow characteristics due to the timing of tax payments; this benefit reverses itself in the second, third, and fourth quarters as income tax payments go out in April, June, September, and December. The remaining amounts of cash flow from operating activities are largely linked to the pure dynamics of a distribution business and its strong correlation to working capital as discussed above. During 2013, and the first half of 2014, we incurred some short-term debt to fund capital expenditures and dividends. This was expected and is expected to continue throughout the remainder of 2014 and possibly 2015.

Our dividends (per share basis) were as follows in 2014 and 2013:

	2014	2013
First quarter	\$0.25	\$0.10
Second quarter	0.25	0.20
Third quarter*	0.25	0.25
Fourth quarter		0.25
Total	\$0.75	\$0.80

\*The third quarter dividend was declared on July 10, 2014, and is payable on August 22, 2014 to shareholders of record at the close of business on July 25, 2014.

Table of Contents**STOCK PURCHASES**

During the first quarter of 2014, we purchased 200,000 shares of our common stock at an average price of approximately \$44.24 per share. We did not purchase any stock in the second quarter of 2014. We currently have authority to purchase up to an additional 1,400,000 shares of our common stock.

**CRITICAL ACCOUNTING POLICIES:**

A discussion of the critical accounting policies related to accounting estimates is contained in our 2013 annual report on Form 10-K.

**LIQUIDITY AND CAPITAL RESOURCES:**

Cash flow activity in dollars and as a percentage of net earnings was as follows:

	Six-month Period			
	2014		2013	
Net cash provided by operating activities	\$222,929		213,865	
Net cash used in investing activities	\$94,911		89,703	
Net cash used in financing activities	\$80,569		79,789	
Net cash provided by operating activities	92.0	%	93.0	%
Net cash used in investing activities	39.1	%	39.0	%
Net cash used in financing activities	33.2	%	34.7	%

Net cash provided by operating activities increased from the prior year. The increase was driven by growth in net earnings, the depreciation added back, and timing of income tax payments. This was partially offset by the cash required to fund our working capital growth. The working capital components include: trade accounts receivable changes, inventory changes, and related accounts payable changes.

Net cash used in investing activities changed primarily due to changes in capital expenditures. Property and equipment expenditures in the first six months of 2014 and 2013 consisted of: (1) the purchase of software and hardware for Fastenal's information processing systems, (2) the addition of certain pickup trucks, (3) the purchase of signage, shelving, and other fixed assets related to store openings, (4) the addition of manufacturing and warehouse equipment, (5) the expansion or improvement of certain owned or leased store properties, (6) the expansion of Fastenal's distribution/trucking fleet, (7) purchases related to FAST Solutions® (industrial vending), and (8) the expansion of distribution capabilities related to automation (including with respect to vending). Of these factors, the items related to industrial vending and distribution automation created the greatest impact to our capital expenditures in 2014 and 2013. Disposals of property and equipment in both periods consisted of the planned disposition of certain pickup trucks, semi-tractors, and trailers in the normal course of business and the disposition of real estate relating to several store locations (primarily a 2013 item).

Cash requirements for property and equipment expenditures were satisfied from net earnings, cash on hand, short-term borrowings, and the proceeds of disposals. We anticipate funding our current expansion plans with cash generated from operations, from available cash and cash equivalents, and from our borrowing capacity.

Net cash used in financing activities consisted of the payment of dividends and, in the case of 2014, the purchases of common stock, with offset related to the proceeds from the exercise of stock options and advances under our line of credit which remained outstanding in June 2014. During the first six months of 2014 and 2013 we utilized some short-term borrowings.

A discussion of the nature and amount of future cash commitments is contained in our 2013 annual report on Form 10-K.

**Certain Risks and Uncertainties** – Certain statements contained in this document do not relate strictly to historical or current facts. As such, they are considered 'forward-looking statements' that provide current expectations or forecasts of future events. These forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Such statements can be identified by the use of terminology such as anticipate, believe, should, estimate, expect, intend, may, plan, goal, project, will, potential, momentum, target, and similar words or expressions. Any statement that is not a historical fact, including estimates, projections, future trends,

and the outcome of events that have not yet occurred, is a forward-looking statement. Our forward-looking statements generally relate to our expectations regarding the business environment in which we operate, our projections of future performance, our perceived marketplace opportunities, and our strategies, goals, mission, and vision. You should understand that forward-looking statements involve a variety of risks and uncertainties, known and unknown, and may be affected by inaccurate assumptions. Consequently, no forward-looking statement can be guaranteed and actual results may vary materially. Factors that could cause our actual results to differ from

those discussed in the forward-looking statements include, but are not limited to, economic downturns, weakness in the manufacturing or commercial construction industries, competitive pressure on selling prices, changes in our current mix of products, customers or geographic locations, changes in our purchasing patterns, changes in customer needs, changes in fuel or commodity prices, inclement weather, changes in foreign currency exchange rates, difficulty in adapting our business model to different foreign business environments, weak acceptance or adoption of vending technology or increased competition in industrial vending, difficulty in maintaining installation quality as our industrial vending business expands, difficulty in hiring, relocating, training or retaining qualified personnel, failure to accurately predict the number of North American markets able to support stores or to meet store opening goals, difficulty in controlling operating expenses, difficulty in collecting receivables or accurately predicting future inventory needs, dramatic changes in sales trends, changes in supplier production lead times, changes in our cash position, changes in tax law, changes in the availability or price of commercial real estate, changes in the nature or price of distribution and other technology, cyber-security incidents, potential liability and reputational damage that can arise if our products are defective, and other risks and uncertainties detailed in our filings with the Securities and Exchange Commission, including our most recent annual and quarterly reports. Each forward-looking statement speaks only as of the date on which such statement is made, and we undertake no obligation to update any such statement to reflect events or circumstances arising after such date.

Table of Contents

**ITEM 3 — QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

We are exposed to certain market risks from changes in interest rates, foreign currency exchange rates, commodity steel pricing, and commodity fuel prices. Changes in these factors cause fluctuations in our earnings and cash flows.

We evaluate and manage exposure to these market risks as follows:

**Interest Rates** – A description of our exposure to certain market risks from changes in interest rates is contained in Note 6 of the 'Notes to Consolidated Financial Statements'. The description of our exposure to certain market risks from changes in interest rates contained in Note 6 is incorporated herein by reference. We do not believe our operations are currently subject to significant market risk for interest rate exposure.

**Foreign Currency Exchange Rates** – Foreign currency fluctuations can affect our net investments and earnings denominated in foreign currencies. Our primary exchange rate exposure is with the Canadian dollar against the United States dollar. Our estimated net earnings exposure for foreign currency exchange rates was not material at June 30, 2014.

**Commodity Steel Pricing** – We buy and sell various types of steel products; these products consist primarily of different types of threaded fasteners. During the last decades, there has been nominal movement in overall steel pricing, with some deflation occurring in the wake of the economic crisis of the Far East markets that occurred in the late 1990's. This trend reversed to inflation in the period from late 2003 to the early part of 2005 and again from mid 2007 to the fall of 2008. In the first half of 2009, we noted meaningful deflation. In 2010, we noted minimal price changes except for stainless steel which did inflate. Stainless steel products represent approximately 5% of our business. In 2011 and 2012 we noted nominal price increases while pricing was flat to nominally down in 2013. In 2013 and 2014, we noted some deflation in overall steel pricing. We are exposed to the impacts of commodity steel pricing and our related ability to pass through the impacts to our end customers.

**Commodity Energy Prices** – We have market risk for changes in gasoline, diesel fuel, natural gas, and electricity; however, this risk is mitigated in part by our ability to pass freight costs to our customers, the efficiency of our trucking distribution network, and the ability, over time, to manage our occupancy costs related to the heating and cooling of our facilities through better efficiency.

**ITEM 4 — CONTROLS AND PROCEDURES**

**Evaluation of Disclosure Controls and Procedures** – As of the end of the period covered by this report, we conducted an evaluation, under the supervision and with the participation of the principal executive officer and principal financial officer, of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the 'Securities Exchange Act')). Based on this evaluation, the principal executive officer and principal financial officer concluded that our disclosure controls and procedures are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms, and is accumulated and communicated to our management, including the principal executive officer and principal financial officer, to allow for timely decisions regarding disclosure. There was no change in our internal control over financial reporting during our most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

## PART II — OTHER INFORMATION

## ITEM 1 — LEGAL PROCEEDINGS

A description of our legal proceedings, if any, is contained in Note 6 to the 'Notes to Consolidated Financial Statements'. The description of legal proceedings, if any, in Note 6 is incorporated herein by reference.

## ITEM 1A — RISK FACTORS

We are affected by risks specific to us as well as factors that affect all businesses operating in a global market. The significant factors known to us that could materially adversely affect our business, financial condition, or operating results are described in Item 2 of Part I above and in our most recently filed annual report on Form 10-K under Forward-Looking Statements and Item 1A – Risk Factors. There has been no material change in those risk factors.

## ITEM 2 — UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

## Issuer Purchases of Equity Securities

The table below sets forth information regarding purchases of our common stock during the second quarter of 2014:

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs <sup>1</sup>
April 1-30, 2014	0	\$0.00	0	1,400,000
May 1-31, 2014	0	\$0.00	0	1,400,000
June 1-30, 2014	0	\$0.00	0	1,400,000
Total	0	\$0.00	0	1,400,000

On July 10, 2009 we announced that our board of directors had authorized purchases by us of up to 4,000,000 shares of our common stock. This authorization replaced any unused authorization previously granted by our board of directors. All of the purchases described in the table (if any) and in this footnote were made pursuant to this authorization. During 2009, we purchased 2,200,000 shares of our common stock at an average price of \$18.69 per share, during 2013, we purchased 200,000 shares of our common stock at an average price of \$45.40 per share, and during the first quarter of 2014, we purchased 200,000 shares of our common stock at an average price of \$44.24 per share. We may continue to make purchases under this authorization. This authorization does not have an expiration date.

## ITEM 6 — EXHIBITS

- 3.1 Restated Articles of Incorporation of Fastenal Company, as amended (incorporated by reference to Exhibit 3.1 to Fastenal Company's Form 10-Q for the quarter ended March 31, 2012)
- 3.2 Restated By-Laws of Fastenal Company (incorporated by reference to Exhibit 3.2 to Fastenal Company's Form 8-K dated as of October 15, 2010)
- 10.1 First Amendment to Credit Agreement dated as of April 15, 2014 among Fastenal Company, the Lenders party thereto, and Wells Fargo Bank, National Association, as Administrative Agent (incorporated by reference to Exhibit 10.1 to Fastenal Company's Form 10-Q for the quarter ended March 31, 2014)
- 31 Certifications under Section 302 of the Sarbanes-Oxley Act of 2002
- 32 Certification under Section 906 of the Sarbanes-Oxley Act of 2002

The following financial statements from Fastenal Company's Quarterly Report on Form 10-Q for the quarter ended June 30, 2014, filed on July 16, 2014, formatted in Extensible Business Reporting Language (XBRL):

101 (i) Consolidated Statements of Earnings, (ii) Consolidated Statements of Comprehensive Income, (iii) Consolidated Balance Sheets, (iv) Consolidated Statements of Cash Flows, and (v) the Notes to Consolidated Financial Statements.
