Section 1 – Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

Roper Technologies, Inc. (“Roper”, the “Company”, “we”, “our” or “us”) is subject to the requirements of Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act based on the fact that the minerals defined therein as “conflict minerals” are necessary to the functionality or production of products we manufacture or contract to be manufactured. The Securities and Exchange Commission defines conflict mineral as “columbite-tantalite (coltan), cassiterite, gold, wolframite, or their derivatives, which are limited to tantalum, tin, and tungsten unless the Secretary of State determines that additional derivatives are financing conflict in the Democratic Republic of the Congo or an adjoining country”. These conflict minerals may be referred to as 3TG in order to not confuse it with the actual findings.

Company level surveys were initiated with affected direct suppliers providing parts and materials for products we manufactured or contracted to manufacture during the 2017 reporting period to begin the reasonable country of origin inquiry (“RCOI”). The Responsible Minerals Initiative’s (“RMI”) Conflict Minerals Reporting Template was utilized as the basis for the RCOI.

Based on the RCOI, we determined that a portion of the 3TG reported by our affected direct suppliers originated, or may have originated, from the Democratic Republic of the Congo or an adjoining country, may not be from recycled or scrap sources, and that a portion of them have unknown origins. Therefore, we were required to exercise due diligence on the 3TG source and chain of custody following a nationally or internationally recognized due diligence framework. These details are provided in our Conflict Minerals Report, a copy of which is filed as Exhibit 1.01 hereto and incorporated herein by reference.

Item 1.02 Exhibit
