UNAUDITED PRO FORMA CONSOLIDATED CONDENSED FINANCIAL INFORMATION

The following unaudited pro forma consolidated condensed financial information of Esterline has been derived by the application of pro forma adjustments to our historical consolidated financial statements as of and for the twelve-month period ended January 31, 2003. The pro forma consolidated condensed statement of operations for the twelve-month period ended January 31, 2003 gives effect to our acquisitions of Burke Industries Engineered Polymers Group and the Electronic Warfare Passive Expendables Division of BAE Systems North America and this offering of the Notes and the expected use of proceeds from the offering of Notes, as well as the acquisition of the Weston Group, as if such transactions had been consummated on January 26, 2002. The unaudited consolidated condensed statement of operations of Esterline has been derived from Esterline's unaudited consolidated statements of operations for the three-month period ended January 31, 2003 and the audited consolidated statement of operations for the fiscal year ended October 25, 2002, excluding the information derived from Esterline's unaudited consolidated statement of operations for the three-month period ended January 25, 2002. The unaudited condensed statements of operations for Burke Industries Engineered Polymers Group and the Electronic Warfare Passive Expendables Division of BAE Systems North America for the periods prior to their acquisition were derived from the unaudited statements of operations of these businesses from February 1, 2002 through April 28, 2002 and February 1, 2002 through August 28, 2002, respectively. The unaudited condensed statement of operations for the Weston Group was derived from the audited individual statement of operations of each of Weston Aerospace, Norwich Aero Products, Inc. and Pressure Systems International Limited and the unaudited statement of operations of PSI, Inc., for the year ended December 31, 2002. The pro forma consolidated condensed balance sheet as of January 31, 2003 includes the balance sheet of the Weston Group as of December 31, 2002 and gives effect to this offering of the notes and the expected use of proceeds from this offering as if such transactions had occurred as of January 31, 2003. The adjustments necessary to fairly present this pro forma consolidated condensed financial information have been made based on available information, and in the opinion of management, are reasonable and are described in the accompanying notes.

The pro forma consolidated condensed financial information should not be considered indicative of actual results that would have been achieved had the acquisitions of Burke Industries Engineered Polymers Group, the Electronic Warfare Passive Expendables Division of BAE Systems North America and the Weston Group, and this offering been consummated on January 26, 2002, and do not purport to indicate balance sheet or other data or results of operations as of any future date or any future period. We cannot assure you that the assumptions used in preparation of the pro forma consolidated condensed financial information will prove to be correct. You should read the pro forma consolidated condensed financial statements together with the consolidated financial statements, the related notes, and other financial information, included in our most recent annual, quarterly and current reports filed with the SEC.

The purchase price of the Weston Group is approximately \$88.0 million in cash and there will be approximately \$3.8 million of costs associated with the acquisition. In addition, we will pay \$425,000 for a bridge commitment fee, which will be recorded in the third quarter of fiscal 2003. The expense was not reflected in the pro forma financial information because the expense is nonrecurring. The Western Group acquisition will be funded with a portion of the proceeds raised from the offering of the notes. The purchase price has been allocated to the assets acquired and liabilities assumed of the Weston Group based on a preliminary analysis of their fair values.

operations or any other items calculated in accordance with GAAP, or as an indicator of Esterline's operating performance. Our definition of EBITDA from continuing operations may not be comparable with EBITDA from continuing operations as defined by other companies. We believe EBITDA is commonly used by financial analysts and others in the aerospace and defense industries and thus provides useful information to investors. Our management uses EBITDA as one measure of our leverage capacity and debt servicing ability, and is shown here with respect to Esterline for comparative purposes. EBITDA is not necessarily indicative of the amounts that may be available for discretionary use by us. Following is a reconciliation of operating earnings from continuing operations to EBITDA from continuing operations.
