Sidebar text: "I urge you to consider receiving future Portfolio reports and other information electronically ...see the inside front cover of this report for detailed instructions."

Dear  
Shareholder

Once again, I am pleased to report that during the period covered by this report your Nuveen Select Portfolio continued to meet its objective of providing

attractive tax-free monthly income. Detailed information on your investment's performance can be found in the Portfolio Manager's Comments and on the Performance Overview pages within this report. Please take the time to read them.

In addition to providing regular tax-free income, we believe that a municipal bond investment like your Nuveen Select Portfolio also may offer opportunities to reduce the risk of your overall investment portfolio. This is because the prices of municipal bonds may move differently than the prices of the common stocks, mutual funds or other investments you may own. Since one part of your portfolio may be going up when another is going down, portfolio diversification may reduce your overall risk. Your financial advisor can explain the advantages of portfolio diversification in more detail. I urge you to contact him or her soon for more information on this important investment strategy.

I also urge you to consider receiving future Portfolio reports and other information electronically via the Internet and e-mail rather than in hard copy. Not only will you be able to receive the information faster, but this also may help lower your Portfolio's expenses. Sign up is quick and easy - see the inside front cover of this report for detailed instructions.

For more than 100 years, Nuveen has specialized in offering quality investments such as these Nuveen Select Portfolios to those seeking to accumulate and preserve wealth. Our commitment to careful research, constant surveillance and judicious trading by our seasoned portfolio management team has never been stronger, and our mission continues to be to assist you and your financial advisor by offering the investment services and products that can help you meet your financial objectives. We thank you for continuing to choose us as a partner as you work toward that goal.

Sincerely,

Portfolio Manager's  
Comments

Portfolio manager Tom Spalding discusses economic conditions, key investment strategies, and the recent performance of the Select Portfolios. Tom, who has 26 years of investment management experience with Nuveen, has managed the Portfolios since 1999.

WHAT WERE THE MAJOR FACTORS AFFECTING THE U.S. ECONOMY AND THE MUNICIPAL MARKET DURING THIS REPORTING PERIOD?

In several fundamental respects, not much has changed since our last shareholder report. We believe two of the most influential factors affecting the U.S. economy and the municipal markets during this reporting period continued to be the slow pace of the U.S. economic recovery and the Federal Reserve's

## Edgar Filing: NUVEEN CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-30D

maintenance of short-term interest rates at 40-year lows. As noted in our last report as well, the uncertain geopolitical climate that has followed the tragic events of September 11, 2001, also has impacted the economy and the markets.

In the municipal market, the generally slow economic recovery of the past year combined with the lack of inflationary pressures helped many bonds perform well. Relatively low interest rate levels helped spur new municipal bond issuance during the first nine months of 2002, resulting in an increase of 28% in new municipal issuance at the national level when compared with January-September 2001. On the demand side, municipal bonds continued to be highly sought after by individual investors looking for diversification, tax-free income, and an alternative to a volatile stock market. Institutional investors, especially traditional purchasers such as property/ casualty insurance companies, also have been active buyers in the municipal market.

Over the past year, the economies of both California and New York have suffered a general slowdown, with little job growth. New York has had to contend with a weak securities industry and the direct aftermath of the September 11 attacks, while California's growth remained hampered by an ailing technology sector and the need to bring final resolution to the state's 2001 power problems. As tax revenues have fallen, both California and New York have grappled with major budgetary issues. Both states have approved fiscal year 2003 budgets that were balanced by a combination of expense reductions, program cuts, and fund transfers. Despite these factors, credit ratings for New York general obligation debt remained intact at A2/AA/AA from Moody's, Standard & Poor's and Fitch, respectively, with positive or stable outlooks from all three rating agencies. Following a Moody's downgrade in November 2001, California's ratings have held at A1/A+/AA. However, all three rating agencies maintain a negative outlook for California due to concerns about budget issues and near-term liquidity. During the first nine months of 2002, municipal supply in New York jumped 172% over January-September 2001 levels. During the same period, California issuance rose 21% over 2001 levels.

### HOW DID THE NUVEEN SELECT PORTFOLIOS PERFORM OVER THE TWELVE MONTHS ENDED SEPTEMBER 30, 2002?

During the twelve months ended September 30, 2002, the Fed's policy of maintaining short-term interest rates at their lowest levels since the early 1960s, combined with a relatively low rate of inflation, created a positive total return environment for municipal bonds and bond funds. Individual results for the Nuveen Select Portfolios, as well as for relevant indexes, are presented in the accompanying table.

	MARKET YIELD		TOTAL RETURN	LEHMAN	LIPPER
	9/30/02	TAXABLE-EQUIVALENT <sup>3</sup>	ON NAV	TOTAL RETURN <sup>1</sup>	AVERAGE <sup>2</sup>
			1 YEAR ENDED 9/30/02	1 YEAR ENDED 9/30/02	1 YEAR ENDED 9/30/02
NXP	5.65%	8.07%	7.08%	8.93%	6.88%
NXQ	5.47%	7.81%	5.86%	8.93%	6.88%
NXR	5.40%	7.71%	5.38%	8.93%	6.88%
NXC	4.82%	7.59%	6.60%	8.65%	10.38%

NXN	4.94%	7.60%	7.20%	9.10%	11.22%

Past performance is not predictive of future results.

For additional information, see the individual Performance Overview for your Fund in this report.

In a market characterized by rising bond values, funds with longer durations<sup>4</sup> typically would be expected to perform better than funds and indexes with shorter durations. As of September 30, 2002, the durations of the three national Portfolios ranged from 4.50 to 5.41, compared with 7.83 for the Lehman Brothers Municipal Bond Index, while NXC and NXN had durations of 5.64 and 5.39, respectively, compared with 8.21 and 7.54 for the Lehman California and New York Tax-Exempt Bond Indexes.

Much of the Portfolios' underperformance in comparison with these benchmarks can be traced to their relatively short durations in a generally falling interest rate environment. In addition, there were several other factors that had an influence on the Portfolios' total returns over the reporting period, including call exposure, the performance of insured versus uninsured bonds, and the results achieved by individual bond holdings. For example, the national Portfolios all hold airline-backed bonds issued for facilities at Chicago's O'Hare International Airport, which were impacted negatively by the overall decline in air travel over the past year.

HOW DID THE MARKET ENVIRONMENT AFFECT THE PORTFOLIOS' DIVIDENDS AND SHARE PRICES?

Increased bond call exposure over the past several years, and the resulting reinvestment in today's lower interest rate environment, led each Portfolio to reduce its monthly dividend in September 2002. Over the next twelve months, the number of bond calls and the interest rates at which we can reinvest the proceeds of these calls will continue to exert an influence on the dividends of the Nuveen Select Portfolios.

Given the equity market volatility of the past year, we believe that investors have continued to evaluate their asset allocation plans and a number have made a shift toward the balance offered by fixed-income investments. Over the period covered by this report, the share prices of all of the Nuveen Select Portfolios rose, while their NAVs remained relatively stable. As of September 30, 2002, NXC had moved from trading at a discount to its common share net asset value to trading at a premium, while the discounts on the remaining Portfolios, with the exception of NXN, narrowed (see charts on individual Performance Overview pages).

- 1 The total annual returns on common share net asset value for the national Portfolios are compared with the total annual return of the Lehman Brothers Municipal Bond Index, an un-leveraged index comprising a broad range of investment-grade municipal bonds. The annual returns of NXC and NXN are compared with those of the Lehman Tax-Exempt Bond Indexes for California and New York, respectively. These un-leveraged indexes comprise a broad range of municipal bonds within each of those states. Results for the Lehman indexes do not reflect any expenses.
- 2 The total returns of the national Portfolios are compared with the average annualized return of the 12 funds in the Lipper General and Insured Unlever-aged Municipal Debt Funds category. NXC's total return is compared with the average total return of the 22 funds in the Lipper California

## Edgar Filing: NUVEEN CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-30D

Municipal Debt Funds category, while the comparison for NXN is based on the average total return of the 14 funds in the Lipper New York Municipal Debt Funds category. Portfolio and Lipper returns assume reinvestment of dividends.

- 3 The taxable-equivalent yield represents the yield that must be earned on a taxable investment in order to equal the yield of the Nuveen portfolio on an after-tax basis. For the national Portfolios, the taxable-equivalent yield is based on the portfolio's market yield on the indicated date and a federal income tax rate of 30%, while the taxable-equivalent yields for NXC and NXN are based on their market yields on the indicated date and combined federal and state income tax rates of 36.5% and 35%, respectively.
- 4 Duration is a measure of a portfolio's NAV volatility in reaction to interest rate movements.

3

WHAT KEY STRATEGIES WERE USED TO MANAGE THE NUVEEN SELECT PORTFOLIOS DURING THE YEAR ENDED SEPTEMBER 30, 2002?

Over the twelve months ended September 30, 2002, our primary focus remained on supporting the Portfolios' dividend-paying capabilities, managing their call exposures and investing in regions and sectors that we believed represented good values. Since each of the Portfolios has undergone a relatively modest amount of portfolio turnover since its inception in 1992, each has seen its average maturity shorten since its initial public offering. As noted, this has tended to hold down total returns in a generally positive environment for municipal bonds.

With the recent shareholder vote that eliminated their termination dates and allowed greater portfolio management flexibility, we have been looking judiciously for opportunities to invest further out on the yield curve. We believe this will help the Portfolios generate more current income, and also will tend to lengthen their average maturities and durations which may enhance dividend stability. In general, we have looked for bonds that we believed offered strong values in the 20-year maturity range. We think the purchases we've made in the past year, especially in bonds that were trading at par or slight premiums, have already had a positive impact on the Portfolios' returns and dividend-paying capabilities. This fundamental restructuring of each Portfolio will continue as we head into 2003.

As of September 30, 2002, the transportation sector accounted for 15%-19% of the investments in each Portfolio, with the exception of NXN, where education bonds represented the largest investment. Over the past year, the national Portfolios took advantage of opportunities to add to their transportation holdings, including the purchase of insured bonds issued for the Las Vegas monorail project. Our expectations are that the transportation sector will be a strong performer in coming months.

Given the current geopolitical and economic climate, maintaining strong credit quality remains a key goal of the Portfolios. All three of the national Portfolios continued to offer excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 71% to 81% as of September 30, 2002. As part of changes recently approved by shareholders, NXC and NXN have selectively added some uninsured bonds. As of September 30, NXC had 17% of its portfolio invested in AA, A, and BBB bonds, while NXN had allocated 15% to AA bonds. The balance of these state Portfolios' investments are in insured and AAA/U.S. guaranteed securities.

WHAT IS YOUR OUTLOOK FOR THE MUNICIPAL MARKET IN GENERAL AND THE NUVEEN SELECT PORTFOLIOS IN PARTICULAR?

Over the next twelve months, our general outlook for the fixed-income markets remains positive. We believe the U.S. economy is headed for an eventual recovery, but one that may be slow to arrive and offer a slower rate of growth than some are currently predicting. We also expect inflation and interest rates to remain relatively low over the near term, while new municipal volume should continue to be strong. Given California's and New York's continued need to address budgetary imbalances, issuance is expected to remain heavy in both of these states. We also expect demand for tax-exempt municipal bonds to remain solid, as investors look for ways to rebalance their portfolios and reduce risk.

All five of the Nuveen Select Portfolios marked their 10-year anniversaries in 2002. The Portfolios are currently working their way past these milestones, which often mark an increased exposure to bond calls. Potential calls for the remainder of 2002 and 2003 range from 11% of NXN's portfolio to 42% in NXR. The number of actual calls experienced by each Portfolio will depend largely on market interest rates over the next 6 - 12 months. Our general approach has been to hold higher-yielding bonds as long as possible. If the bonds are in fact called, the anticipated increased volume of supply should provide opportunities to reinvest the proceeds in bonds that can extend call protection and duration.

In the months ahead, we plan to fully utilize Nuveen's experience and research expertise to focus on strategies that can add value for our shareholders. As noted, we believe bonds in the 20-year range of the yield curve currently offer excellent opportunities for price appreciation and provide yields that are close to those of longer bonds, with greater liquidity. The heavy issuance anticipated nationwide as well as in the California and New York markets should enhance our ability to find attractive opportunities to implement these strategies and keep the Portfolios fully invested. Overall, we believe the Nuveen Select Portfolios continue to represent an important element of investors' long-range financial programs, providing dependable tax-free income, diversification, and balance in uncertain times.

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

## Edgar Filing: NUVEEN CALIFORNIA SELECT TAX FREE INCOME PORTFOLIO - Form N-30D

The Trusts covered in this report and their corresponding Common share New York Stock Exchange symbols are Nuveen Select Tax-Free Income Portfolio (NXP), Nuveen Select Tax-Free Income Portfolio 2 (NXQ), Nuveen Select Tax-Free Income Portfolio 3 (NXR), Nuveen California Select Tax-Free Income Portfolio (NXC) and Nuveen New York Select Tax-Free Income Portfolio (NXN).

Each Trust seeks to provide stable dividends consistent with the preservation of capital, exempt from regular federal and designated state income taxes, where applicable, by investing primarily in a diversified portfolio of municipal obligations. The Trusts are registered under the Investment Company Act of 1940 as closed-end, diversified management investment companies.

The Trusts' investment adviser, Nuveen Institutional Advisory Corp. (the "Adviser"), a wholly owned subsidiary of The John Nuveen Company, administers the investments and maintains ongoing surveillance of such investments to ensure that they continue to meet the Trusts' investment objectives and credit quality standards. The Adviser does not intend to adjust the portfolios except 1) to invest interest payments on municipal obligations that are not currently needed to pay dividends or expenses; 2) to reinvest principal payments on municipal obligations resulting from their maturity or early redemption; 3) to sell municipal obligations when the Adviser believes that continuing to hold them would be inconsistent with maintaining the Trusts' high credit quality, and to reinvest the proceeds of such sales; and 4) for certain other purposes.

The following is a summary of significant accounting policies followed by the Trusts in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

### Securities Valuation

The prices of municipal bonds in each Trusts' investment portfolio are provided by a pricing service approved by the Trust's Board of Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Trustees of the Trusts may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

### Securities Transactions

Securities transactions are recorded on a trade-date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. Any securities so purchased are subject to market fluctuation during this period. The Trusts have instructed the custodian to segregate assets in a separate account with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At September 30, 2002, California Select Tax-Free (NXC) and New York Select Tax-Free (NXN) had outstanding when-issued purchase commitments of \$2,583,800 and \$999,305, respectively. There were no such outstanding purchase commitments in any of the other Trusts.

### Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

#### Income Taxes

Each Trust is a separate taxpayer for federal income tax purposes. Each Trust intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Trust intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, where applicable, to retain such tax-exempt status when distributed to shareholders of the Trusts.

33

#### Notes to Financial Statements (Unaudited) (continued)

##### Dividends and Distributions to Shareholders

Tax-exempt net investment income is declared monthly as a dividend. Generally, payment is made or reinvestment is credited to shareholder accounts on the first business day after month-end. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States. Accordingly, temporary over-distributions as a result of these differences may occur and will be classified as either distributions in excess of net investment income, distributions in excess of net realized gains and/or distributions in excess of net ordinary taxable income from investment transactions, where applicable.

##### Derivative Financial Instruments

The Trusts are not authorized to invest in derivative financial instruments.

##### Custodian Fee Credit

Each Trust has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Trust's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

##### Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results may differ from those estimates.

## 2. TRUST SHARES

There were no share transactions during the six months ended September 30, 2002, nor during the fiscal year ended March 31, 2002, in any of the Trusts.

4. INCOME TAX INFORMATION

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to timing differences in recognizing income on taxable market discount securities and timing differences in recognizing certain gains and losses on security transactions.

At September 30, 2002, the cost of investments were as follows:

	SELECT TAX-FREE (NXP)	SELECT TAX-FREE 2 (NXQ)	SELECT TAX-FREE 3 (NXR)	CALIFORNIA SELECT TAX-FREE (NXC)

\* Ordinary income consists of taxable market discount income and net short-term capital gains, if any.

California Select Tax-Free (NXC) has elected to defer net realized losses from investments incurred from November 1, 2001 through March 31, 2002 ("post-October losses") in accordance with Federal income tax regulations. The Fund has \$294 of post-October losses that are treated as having arisen in the following fiscal year.

At March 31, 2002, the Trusts' last fiscal year end, the following Trusts had unused capital loss carryforwards available to be applied against future capital gains, if any. If not applied, the carryforwards will expire as follows:

5. SURVEILLANCE AND ADMINISTRATION FEES AND OTHER TRANSACTIONS WITH AFFILIATES

Under the Trusts' investment management agreements with the Adviser, each Trust pays an annual surveillance and administration fee, payable monthly, at the rates set forth below, which are based upon the average daily net assets of each Trust as follows:

AVERAGE DAILY NET ASSETS	SELECT TAX-FREE (NXP)	SELECT TAX-FREE 2 (NXQ)	SELECT TAX-FREE 3 (NXR)
		CALIFORNIA SELECT TAX-FREE (NXC)	NEW YORK SELECT TAX-FREE (NXN)
For the first \$125 million	.2500%		.3000%
For the next \$125 million	.2375		.2875
For the next \$250 million	.2250		.2750
For the next \$500 million	.2125		.2625
For the next \$1 billion	.2000		.2500
For net assets over \$2 billion	.1875		.2375

The fee compensates the Adviser for performing ongoing administration, surveillance and portfolio adjustment services. The Trusts pay no compensation directly to those of its Trustees who are affiliated with the Adviser or to their officers, all of whom receive remuneration for their services to the Trusts from the Adviser or its affiliates.

6. INVESTMENT COMPOSITION

At September 30, 2002, the revenue sources by municipal purpose, expressed as a percent of investments, were as follows:

Certain long-term investments owned by the Trusts are covered by insurance issued by several private insurers or are backed by an escrow or trust containing U.S. Government or U.S. Government agency securities, both of which ensure the timely payment of principal and interest in the event of default (54% for Select Tax-Free (NXP), 63% for Select Tax-Free 2 (NXQ), 50% for Select Tax-Free 3 (NXR), 78% for California Select Tax-Free (NXC), and 64% for New York Select Tax-Free (NXN)). Such insurance or escrow, however, does not guarantee the market value of the municipal securities or the value of any of the Trusts' shares.

For additional information regarding each investment security, refer to the Portfolio of Investments of each Trust.

7. SUBSEQUENT EVENT - DISTRIBUTIONS TO SHAREHOLDERS

The Trusts declared dividend distributions from their tax-exempt net investment income which were paid November 1, 2002, to shareholders of record on October 15, 2002, as follows:

(a) For the six months ended September 30, 2002.

(b) As required, effective April 1, 2001, the Trusts adopted the provisions of the new AICPA Audit and Accounting Guide for Investment Companies and began accreting taxable market discount on debt securities. The effect of this change for the fiscal year ended March 31, 2002, was to increase net investment income per share with a corresponding decrease in net realized/unrealized investment gain (loss) per share and increase the ratio of net investment income to average net assets as follows:

	SELECT TAX-FREE (NXP)	SELECT TAX-FREE 2 (NXQ)	SELECT TAX-FREE 3 (NXR)	CALIFORNIA TAX-FREE
2002 per share impact (\$)	.01	--	--	--
2002 income ratio impact (%)	.05	.01	.01	.01

The Financial Highlights for the prior periods have not been restated to reflect this change in presentation.

Nuveen makes reinvesting easy. A phone call is all it takes to set up your reinvestment account.

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a

profit, nor does it protect you against loss in a declining market.

#### EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

#### HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

#### FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.
