Chairman's

LETTER TO SHAREHOLDERS

I am pleased to report that over the six-month period covered by this semiannual report your Fund continued to provide you with monthly tax-free income and an attractive total return. For more details about the management strategy and performance of your Fund, please see the Portfolio Managers' Perspective and Performance Overview sections of this report.

As I noted in my last letter to you, our conversations with financial advisors and investors suggest that many of you may be wondering whether long-term interest rates will soon begin to rise substantially, how high they might go, and whether that makes this a good time to adjust your holdings of fixed-income investments. We can't answer that question for you - no one knows what the future will bring.

What we do know from our experience is that a well-balanced portfolio, structured and carefully monitored with the help of a trusted investment professional, can be an important component in helping you achieve your long-term financial goals. In

"IN FACT, A WELL-DIVERSIFIED PORTFOLIO MAY ACTUALLY HELP TO REDUCE YOUR OVERALL INVESTMENT RISK."

fact, a well-diversified portfolio may actually help to reduce your overall investment risk. That is one reason why we believe that a municipal bond investment like your Nuveen Fund can be an important building block in a comprehensive investment program designed to perform well in a variety of market conditions.

As in past reports, I urge you to consider receiving future Fund reports and other Fund information by e-mail and the Internet . Not only will you be able to receive the information faster, but this also may help lower your Fund's expenses. Sign up is quick and easy - see the inside front cover of this report for instructions.

At Nuveen Investments, our mission continues to be to assist you and your

financial advisor by offering investment services and products that can help you to secure your financial objectives. We are grateful that you have chosen us as a partner as you pursue your financial goals, and we look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

/s/ Timothy R. Schwertfeger

Nuveen Arizona and Texas Municipal Closed-End Exchange-Traded Funds (NAZ, NFZ, NKR, NXE, NTX)

Portfolio Managers'
COMMENTS

Portfolio managers Scott Romans and Cathryn Steeves review key investment strategies and the semiannual performance of these Funds. Scott, who joined Nuveen in 2000, has managed the Arizona Funds (NAZ, NFZ, NKR and NXE) since November 2003. Cathryn, who has been with Nuveen since 1996, assumed portfolio management responsibility for NTX in August 2004.

WHAT KEY STRATEGIES WERE USED TO MANAGE THE ARIZONA AND TEXAS FUNDS DURING THE SIX MONTHS ENDED JANUARY 31, 2005?

Between August 2004 and January 2005, the Federal Reserve introduced four one-quarter-point increases in the fed funds rate, raising this short-term target from 1.25% to 2.25%. (On February 2, 2005, following the end of this reporting period, the Fed announced another 0.25% increase, bringing the fed funds rate to 2.50%.) With the market anticipating increases in interest rates throughout the period, our focus centered on finding bonds that we believed could add immediate value to the Funds' portfolios while also preserving their ability to perform well under a variety of future market scenarios.

During this six-month period, municipal issuance in both Arizona and Texas declined substantially from that of the previous six months. However, Texas typically ranks among the nation's largest municipal issuers, and supply in Arizona for 2004 as a whole exceeded that of the preceding year. As a result, we continued to find attractive opportunities to make trades that we thought would benefit the Funds.

In general, our purchase activities for all these Funds emphasized finding premium bonds (those trading above their par value) with intermediate and long-intermediate maturities - that is, bonds that matured in 20 to 25 years for the Arizona Funds and in 15 to 23 years for NTX. In many cases, bonds in these parts of the yield curve offered yields similar to those of longer-term bonds with less inherent interest rate risk (the risk that the value of a Fund's portfolio will decline if market interest rates rise, since bond prices move in the opposite direction of interest rates).

Some of the additions to our portfolios during this period were financed with the proceeds from sales of lower-rated holdings, as we took advantage of opportunities to selectively trim some of our concentrated BBB and nonrated positions. Because lower-rated bonds generally performed well over the past year, demand for these bonds was strong and we were able to obtain attractive prices for the bonds we sold. This process enabled us to reduce some of our more concentrated credit positions. At the same time, we improved the Funds' diversification by reinvesting the proceeds in other lower-rated and nonrated credits when the market provided suitable opportunities.

Among the additions to some of the Arizona Funds during this period were nonrated bonds issued by Estrella Mountain Ranch Community Facilities District and securities rated BBB- issued by the Tucson Industrial Development Authority (IDA) for the Agribusiness and Equine Center, a charter school. In NTX, in addition to trimming concentrated credit positions, we also worked to reduce our holdings of pre-refunded bonds, which tended to underperform in the interest rate environment prevalent over the six-month period.

Another strategy designed to help us reduce interest rate risk is to hedge some of our interest rate exposure in the derivatives markets. During this period, we employed this strategy in NFZ, NKR and NXE. Our sole objective was to reduce these Funds' durations (sensitivity to interest rate changes) without having a negative impact on their income streams or common share dividends over the short term. The costs of the hedges are reflected as additions or subtractions to the Funds' net asset values (NAV) as the market values of the hedges fluctuate. The hedges succeeded in reducing the volatility of the Funds' NAVs over the course of this reporting period. At the same time, the hedges had negative market values as of January 31, 2005, because long-term interest rates fell and bond prices rose during most of the time the hedges were in place. Please note that the hedges were put in place because the Funds' portfolio durations (and therefore their interest rate-related price volatility) were greater than the desired levels. This means that, although the hedges lost value because bond prices in fact went up after the hedges were entered, the Funds' longer-than-target portfolio durations resulted in interest rate-driven increases in value that were greater than if the portfolio durations

5

had been at the target levels, and these excess interest rate-driven portfolio returns roughly coincided with and offset the losses on the hedges.

HOW DID THE FUNDS PERFORM?

Individual results for the Arizona and Texas Funds, as well as for comparative indexes, are presented in the accompanying table.

For additional information, see the individual Performance Overview for your Fund in this report.

For the six months ended January 31, 2005, the cumulative return on NAV for each of the Arizona and Texas Funds outperformed the return on the Lehman Brothers Municipal Bond Index. While these Funds underperformed the Lipper Other States category for this period, it is important to note that the Lipper return represents the overall average of returns for funds from 10 different states exhibiting a variety of municipal market conditions. We believe this makes direct comparisons between specific Funds and the Other States category average less meaningful.

The primary factor benefiting the six-month performances of these Funds relative to that of the unleveraged Lehman Brothers index was the Funds' use of financial leverage. While leveraging can add volatility to the Funds' NAVs and share prices, especially during periods when interest rates rise, this strategy also can provide opportunities for

- The Lehman Brothers Municipal Bond Index is an unleveraged, unmanaged national index comprising a broad range of investment-grade municipal bonds. Results for the Lehman indexes do not reflect any expenses.
- The Lipper Other States Municipal Debt Funds category average is calculated using the returns of all closed-end exchange-traded funds in this category for each period as follows: 6 months, 44; 1 year, 44; 5 years, 19; and 10 years, 17. Fund and Lipper returns assume reinvestment of dividends.

6

additional income and total return for common shareholders when short-term interest rates remain relatively low and long-term rates fall or remain fairly constant, as they did during this reporting period.

In general, shorter-term municipal rates tended to rise during this six-month period and longer-term rates tended to fall, causing a flattening of the municipal yield curve. As a result, bonds with longer maturities or greater sensitivity to interest rate movements generally tended to perform better than

bonds with shorter maturities or less interest rate sensitivity. This benefited newer Funds like NKR and NXE, which were introduced in 2002, since they had less exposure to the shorter end of the yield curve than the three older Funds. This accounted for most of the performance differential between these Funds over the six-month reporting period.

All of the Funds benefited from their holdings of lower quality bonds, which generally outperformed other credit quality sectors as the economy improved. For example, the top performing holding in both NAZ and NFZ during this reporting period was a B- rated pollution control revenue bond issued by Coconino County for Nevada Power Company. Bonds backed by the 1998 master tobacco settlement agreement also were among the lower-rated credits that produced strong results during this period as the litigation environment improved. As of January 31, 2005, NAZ, NXE and NTX held positions in tobacco bonds.

Among the sectors making positive contributions to the Funds' cumulative six-month returns was healthcare, especially hospital bonds, which ranked second in terms of performance among the Lehman municipal revenue sectors for the period. The healthcare weighting in each of these Funds increased over this six-month period.

Pre-refunded bonds tended to underperform during this reporting period, due primarily to their shorter effective maturities. Older Funds typically have more advance refunded bonds than the more recently introduced Funds. As of January 31, 2005, the two oldest Funds in this report—NAZ and NTX—had 9% and 7%, respectively, of their portfolios pre-refunded, although NFZ, which was introduced in 2001, held 8% in pre-refunded bonds. These holdings served as a mild constraint on the performances of these Funds during this period. By comparison, NKR held 2% of its portfolio in pre-refunded bonds, while NXE had less than 1% as of the end of the period.

7

HOW WERE THE FUNDS POSITIONED IN TERMS OF CREDIT QUALITY AND BOND CALLS AS OF JANUARY 31, 2005?

We continued to believe that, given the current geopolitical and economic climate, maintaining strong credit quality was an important requirement. As of January 31, 2005, all five of these Funds continued to offer excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA among the Arizona Funds ranging from 73% in NFZ to 78% in NKR and NXE to 82% in NAZ, while NTX had 78% of its portfolio allocated to bonds rated AAA/U.S. guaranteed and AA.

On January 31, 2005, potential call exposure for the period 2005 through 2007 ranged from zero in NXE and 1% in NKR to 7% in NAZ, 9% in NTX and 10% in NFZ. The number of actual bond calls in all of these Funds depends largely on future market interest rates.

8

Dividend and Share Price INFORMATION

As short-term interest rates remained relatively low throughout this reporting period, the leveraged structures of these five Funds continued to support their dividend-paying capabilities. The extent of this benefit is tied in part to the short-term rates these Funds pay their MuniPreferred(R) shareholders. During periods of low short-term rates, leveraged Funds generally pay lower dividends to their MuniPreferred shareholders, which can leave more earnings to support common share dividends. This strategy helped to maintain the dividends of NFZ, NKR, NXE and NTX throughout the reporting period. NAZ, which was introduced in 1992, saw some of its older, higher-yielding holdings retired or called, and the resulting reduction in income caused by reinvesting the assets at today's lower rates led to two dividend cuts in that Fund during the course of this reporting period.

In addition, due to capital gains generated by normal portfolio activity, common shareholders of NFZ and NKR received capital gains distributions of \$0.0436 and \$0.1191 per share, respectively, at the end of December 2004.

All of these Funds seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of January 31, 2005, all of the Funds in this report had positive UNII balances for both financial statement and tax purposes.

9

At the end of the reporting period, the Funds' share prices were trading at premiums and discounts to their NAVs as shown in the accompanying chart:

FUND	1/31 PREM/DISC	PERIOD AVG. PREM/DISC
NAZ	7.62%	10.22%

#### 1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The state funds (the "Funds") covered in this report and their corresponding common share stock exchange symbols are Nuveen Arizona Premium Income Municipal Fund, Inc. (NAZ), Nuveen Arizona Dividend Advantage Municipal Fund (NFZ), Nuveen Arizona Dividend Advantage Municipal Fund 2 (NKR), Nuveen Arizona Dividend Advantage Municipal Fund 3 (NXE) and Nuveen Texas Quality Income Municipal Fund (NTX). Common shares of Arizona Premium Income (NAZ) and Texas Quality Income (NTX) are traded on the New York Stock Exchange while Common shares of Arizona Dividend Advantage (NFZ), Arizona Dividend Advantage 2 (NKR) and Arizona Dividend Advantage 3 (NXE) are traded on the American Stock Exchange. The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end management investment companies.

Each Fund seeks to provide current income exempt from both regular federal and designated state income taxes, where applicable, by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within a single state.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles.

Investment Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Directors/Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers, evaluations of anticipated cash flows or collateral and general market conditions. Prices of derivative investments are also provided by an independent pricing service approved by each Fund's Board of Directors/Trustees. If the pricing service is unable to supply a price for a derivative investment each Fund may use a market quote provided by a major broker/dealer in such investments. If it is determined that market prices for an investment are unavailable or inappropriate, the Board of Directors/Trustees of the Funds, or its designee, may establish a fair value for the investment. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

#### Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from transactions are determined on the specific identification method. Securities purchased on a when-issued or delayed delivery basis may have extended settlement periods. Any securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At January 31, 2005, there were no such outstanding purchase commitments in any of the Funds.

#### Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Investment income also includes paydown gains and losses, if any.

#### Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to distribute substantially all net investment income and net capital gains to shareholders and to otherwise comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and state income taxes, where applicable, to retain such tax-exempt status when distributed to shareholders of the Funds. Net realized capital gains and ordinary income distributions paid by the Funds are subject to federal taxation.

#### Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles.

#### Preferred Shares

The Funds have issued and outstanding Preferred shares, \$25,000 stated value per share, as a means of effecting financial leverage. Each Fund's Preferred shares are issued in one or more Series. The dividend rate on each Series is determined every seven days, pursuant to a dutch auction process overseen by the auction agent, and is payable weekly at the end of each rate period. The number of Preferred shares outstanding, by Series and in total, for each Fund is as follows:

	ARIZONA PREMIUM INCOME (NAZ)	ARIZONA DIVIDEND ADVANTAGE (NFZ)	ARIZONA DIVIDEND ADVANTAGE 2 (NKR)	ARIZONA DIVIDEND ADVANTAGE 3 (NXE)
Number of shares:				
				0.00
Series M				880
Series T		480		
Series W			740	
Series TH	1,200			
Total	1,200	480	740	880

#### Forward Swap Transactions

The Funds may invest in certain derivative financial instruments. The Funds' use of forward interest rate swap transactions is intended to mitigate the negative impact that an increase in long-term interest rates could have on Common share net asset value. Forward interest rate swap transactions involve each Fund's agreement with the counterparty to pay, in the future, a fixed rate payment in exchange for the counterparty paying the Fund a variable rate payment. The amount of the payment obligation is based on the notional amount of the forward swap contract. The Funds may close out a contract prior to the effective date at which point a realized gain or loss would be recognized. When a forward swap is terminated, it does not involve the delivery of securities or other underlying assets or principal, but rather is settled in cash. Each Fund intends, but is not obligated to, terminate its forward swaps before the effective date. Accordingly, the risk of loss with respect to the swap counterparty on such transactions is limited to the credit risk associated with a counterparty failing to honor its commitment to pay any realized gain to the Fund upon termination. To minimize such credit risk, all counterparties are required to pledge collateral daily (based on the daily valuation of each swap) on behalf of each Fund with a value approximately equal to the amount of any unrealized gain above a pre-determined threshold. Reciprocally, when any of the Funds have an unrealized loss on a swap contract, the Funds have instructed the custodian to pledge assets of the Funds as collateral with a value approximately equal to the amount of the unrealized loss above a pre-determined threshold. Collateral pledges are monitored and subsequently adjusted if and when the swap valuations fluctuate, either up or down, by at least the pre-determined threshold amount.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

#### Indemnifications

Under the Funds' organizational documents, its Officers and Directors/Trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

#### Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

#### 4. INCOME TAX INFORMATION

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to the treatment of paydown gains and losses on investments, timing differences in recognizing income on taxable market discount securities and timing differences in recognizing certain gains and losses on security transactions.

At January 31, 2005, the cost of investments was as follows:

FINANCIAL STATEMENTS (Unaudited) (continued)

#### 5. MANAGEMENT FEE AND OTHER TRANSACTIONS WITH AFFILIATES

Effective January 1, 2005, Nuveen Advisory Corp. ("NAC"), the Funds' previous Adviser, and its affiliate, Nuveen Institutional Advisory Corp. ("NIAC"), were merged into Nuveen Asset Management ("NAM"), each wholly owned subsidiaries of Nuveen Investments, Inc. ("Nuveen"). As a result of the merger, NAM is now the Adviser to all funds previously advised by either NAC or NIAC.

As approved by the Board of Trustees, effective August 1, 2004, a complex-wide management fee structure was adopted for all funds sponsored by the Adviser, or its predecessor, and its affiliates. This fee structure separates each fund's management fee into two components - a complex-level component, based on the aggregate amount of all fund assets managed by the Adviser and its affiliates, and a specific fund-level component, based only on the amount of assets within each individual fund. This pricing structure enables Nuveen fund shareholders to benefit from growth in the assets within each individual fund as well as from growth in the amount of complex-wide assets managed by the Adviser and its affiliates. Under no circumstances will this pricing structure result in a fund paying management fees at a rate higher than would otherwise have been applicable had the complex-wide management fee structure not been implemented. As a consequence of this new management fee structure, the funds' effective management fees were reduced by approximately .009% as of February 28, 2005.

Effective August 1, 2004, the annual fund-level fee, payable monthly, for each of the Funds is based upon the average daily net assets (including net assets attributable to Preferred shares) of each Fund as follows:

AVERAGE DAILY NET ASSETS	ARIZONA PREMIUM INCOME (NAZ)

For net assets over \$2 billion	.3750

44

Effective August 1, 2004, the annual complex-level fee, payable monthly, which is additive to the fund-level fee, for all Nuveen sponsored funds in the U.S., is based on the aggregate amount of total fund assets managed as follows:

COMPLEX-LEVEL ASSETS(1) COMPLEX-LEVEL FEE					
For the first \$55 billion  For the next \$1 billion  For the next \$3 billion  For the next \$5 billion  For the next \$5 billion  For the next \$5 billion  For the next \$15 billion  For Managed Assets over \$91 billion (2)	.2000% .1800 .1600 .1425 .1325 .1250 .1200 .1175 .1150				
Tot hanagea hosees over \$51 billion (2)	• 1 100				

- (1) The complex-level fee component of the management fee for the funds is calculated based upon the aggregate Managed Assets ("Managed Assets" means the average daily net assets of each fund including assets attributable to all types of leverage used by the Nuveen funds) of Nuveen-sponsored funds in the U.S.
- (2) With respect to the complex-wide Managed Assets over \$91 billion, the fee rate or rates that will apply to such assets will be determined at a later date. In the unlikely event that complex-wide Managed Assets reach \$91 billion prior to a determination of the complex-level fee rate or rates to be applied to Managed Assets in excess of \$91 billion, the complex-level fee rate for such complex-wide Managed Assets shall be .1400% until such time as a different rate or rates is determined.

Each Fund paid through July 31, 2004, an annual management fee, payable monthly, at the rates set forth below, which were based upon the average daily net assets (including net assets attributable to Preferred shares) of each Fund as follows:

ATTRIBUTABLE TOPREFERRED S	SHARES)		MANAGEM	IENT	FEE	RATE

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Funds pay no compensation directly to those of its Directors/Trustees who are affiliated with the Adviser or to their officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates. The Board of

\_\_\_\_\_\_

Directors/Trustees has adopted a deferred compensation plan for independent Directors/Trustees that enables Directors/Trustees to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from certain Nuveen advised Funds. Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen advised

Funds.

Announcement Regarding Parent Company of Adviser

Recently, The St. Paul Travelers Companies, Inc. announced that it intended to explore strategic alternatives to divest its equity stake in Nuveen. This divestiture could take the form of a sale by The St. Paul Travelers Companies, Inc. of its interest in Nuveen to another party or the form of the sale of its interest to the public in a registered, broadly disseminated offering. Any resulting divestiture could be deemed to be an "assignment" (as defined in the 1940 Act) of the investment management agreement between the Fund and NAM and the investment sub-advisory agreement between NAM and Gateway, which would result in the automatic termination of each agreement. The Board of Directors/Trustees thereupon may consider both an interim investment management agreement and interim investment sub-advisory agreement (as permitted under the 1940 Act) and new ongoing investment management and investment sub-advisory agreements. If approved by the Board, the new ongoing agreements would be presented to the Funds' shareholders for approval, and would take effect upon such approval. There can be no assurance that these approvals will be obtained.

Reinvest Automatically
EASILY AND CONVENIENTLY

Sidebar text: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

#### EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

#### HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of the shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

#### FLEXIBLE

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants

in the Plan at this time.

You may also request Fund information by sending an e-mail request to publicinfo@sec.gov or by writing to the SEC's Public Reference Section at 450 Fifth Street NW, Washington, D.C. 20549.

GLOSSARY OF TERMS USED IN THIS REPORT

AVERAGE ANNUAL TOTAL RETURN: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return that would have been necessary each year to equal the investment's actual cumulative performance (including change in NAV or market price and reinvested dividends and capital gains distributions, if any) over the time period being considered.

AVERAGE EFFECTIVE MATURITY: The average of all the maturities of the bonds in a Fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

LEVERAGE-ADJUSTED DURATION: Duration is a measure of the sensitivity of a bond or bond Fund's value to changes when interest rates change. Generally, the longer a bond or Fund's duration, the more the price of the bond or Fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is longer than the duration of the Fund's portfolio of bonds.

MARKET YIELD (ALSO KNOWN AS DIVIDEND YIELD OR CURRENT YIELD): An investment's current annualized dividend divided by its current market price.

NET ASSET VALUE (NAV): A Fund's common share NAV per share is calculated by subtracting the liabilities of the Fund (including any MuniPreferred shares issued in order to leverage the Fund) from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

TAXABLE-EQUIVALENT YIELD: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.
