Chairman's
Letter to Shareholders

Dear Shareholders,

Investors have many reasons to remain cautious. The challenges in the Euro area are casting a shadow over global economies and financial markets. The political support for addressing fiscal issues is eroding as the economic and social impacts become more visible. At the same time, member nations appear unwilling to provide adequate financial support or to surrender sufficient sovereignty to strengthen the banks or unify the Euro area financial system. The gains made in reducing deficits, and the hard-won progress on winning popular acceptance of the need for economic austerity, are at risk. To their credit, European political leaders press on to find compromise solutions, but there is increasing concern that time will begin to run out.

In the U.S., strong corporate earnings have enabled the equity markets to withstand much of the downward pressures coming from weakening job creation, slower economic growth and political uncertainty. The Fed remains committed to low interest rates but has refrained from predicting another program of quantitative easing unless economic growth were to weaken significantly or the threat of recession appears on the horizon. Pre-election maneuvering has added to the already highly partisan atmosphere in the Congress. The end of the Bush-era tax cuts and implementation of the spending restrictions of the Budget Control Act of 2011, both scheduled to take place at year-end, loom closer.

During the last year, U.S. based investors have experienced a sharp decline and a strong recovery in the equity markets. The experienced investment teams at Nuveen keep their eye on a longer time horizon and use their practiced investment disciplines to negotiate through market peaks and valleys to achieve long-term goals for investors. Experienced professionals pursue investments that will weather short-term volatility and at the same time, seek opportunities that are created by markets that overreact to negative developments. Monitoring this process is an important consideration for the Fund Board as it oversees your Nuveen funds on your behalf.

As always, I encourage you to contact your financial consultant if you have any questions about your investment in a Nuveen Fund. On behalf of the other members of your Fund Board, we look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

Robert P. Bremner
Chairman of the Board

Portfolio managers Paul Brennan and Douglas White discuss key investment strategies and the six-month performance of these six national Funds. With 21 years of industry experience, including 15 years at Nuveen, Paul has managed NIO, NIF, NVG, and NEA since 2006. Douglas, who has 29 years of financial industry experience, assumed portfolio management responsibility for NQI and NPX in January 2011.

What key strategies were used to manage these Funds during the six-month reporting period ended April 30, 2012?

During this period, municipal bond prices generally rallied, amid strong demand and yield that continued to be historically low. The availability of municipal supply improved in recent months from 2011 levels, although the pattern of new issuance remained light compared with long-term historical trends. Due to their insured mandate and the continued severe decline in insured issuance, finding appropriate insured municipal bonds, especially new insured issues, remained a challenge for these Funds during the first two months of this period. Over the past few years, most municipal bond insurers had their credit ratings downgraded and only one insurer currently insures new municipal bonds. As a result, the supply of insured municipal securities decreased dramatically. During November and December 2011, issuance of new insured paper totaled just over \$3 billion, accounting for approximately 4.5% of total municipal issuance during that time, compared with historical levels approaching 50%. The combination of comparatively light municipal supply, little insured issuance and relatively lower yields meant few attractive opportunities for these Funds during November and December 2011.

In view of this situation, in October 2011, the Funds' Board of Directors/Trustees approved changes to the Funds' investment policy regarding insured municipal securities. Effective January 2, 2012, the Funds eliminated the policy requiring them to invest at least 80% of their managed assets in municipal securities covered by insurance. This change was designed to provide more flexibility regarding the types of securities available for investment. This does not represent a change in investment objectives; each

Ratings shown are the highest rating given by one of the following national rating agencies: Standard & Poor's Group, Moody's Investors Service, Inc., or Fitch, Inc. Credit ratings are subject to change. AAA, AA, A, and BBB are investment grade ratings; BB, B, CCC, CC, C, and D are below investment grade ratings. Certain bonds backed by U.S. government or agency securities are regarded as having an implied rating equal to the rating of such securities. Holdings designated N/R are not rated by a national rating agency.

Fund will continue to invest substantially all of its assets in a portfolio of investment-grade quality municipal securities.

Following the change to these Funds' investment policy, our purchase activity increased, as we worked to enhance the Funds' credit and sector diversification. One of the areas where we were more active was the health care sector, which had been underutilized in these Funds under the insured mandate and which we believed offered good opportunities. We also found value in water and sewer, transportation (particularly airports and toll roads), tobacco and higher education credits and in tax-supported bonds. Although the pattern of issuance tended to be shorter on the yield curve during this period due to an increase in refunding activity, our focus generally remained on longer maturities in order to take advantage of attractive yields at the longer end of the municipal yield curve. The purchase of longer bonds also provided some protection for the Funds' duration and yield curve positioning. We also added slightly more yield to the Funds, buying bonds rated A and BBB. Overall, we continued to take a bottom-up approach to discovering sectors that appeared undervalued as well as individual credits that had the potential to perform well over the long term.

Cash for new purchases during this period was generated primarily by the proceeds from called and maturing bonds, which we worked to redeploy to keep the Funds fully invested. Approximately half of the new municipal bonds issued during this period came from borrowers that were calling existing debt and refinancing at lower rates. This refunding activity provided a meaningful source of liquidity, which was beneficial as we began to transition the Funds from insured to non-insured. In addition, NIF and NPX, which are now structured as Funds that do not hold any bonds subject to the alternative minimum tax (AMT), sold all of their AMT holdings by March 31, 2012, and reinvested the proceeds into bonds offering federal tax-exempt income. This provided additional opportunities to restructure these two Funds.

As of April 30, 2012, all six of these Funds continued to use inverse floating rate securities. We employ inverse floaters for a variety of reasons, including duration management, income enhancement and total return enhancement.

How did the Funds perform during the six-month period ended April 30, 2012?

Individual results for these Funds, as well as relevant index and peer group information, are presented in the accompanying table.

Lipper General & Insured Leveraged Municipal Debt Funds Classification Average**	10.74%	23.04%	6.00%	6.68%

For the six months ended April 30, 2012, the cumulative returns on common share net asset value (NAV) for these six Funds exceeded the returns for the Standard & Poor's (S&P) Municipal Bond Index and the S&P Municipal Bond Insured Index. For the same period, the Funds underperformed the average return for the Lipper General & Insured Leveraged Municipal Debt Funds Classification Average.

Key management factors that influenced the Funds' returns during this period included duration and yield curve positioning, credit exposure and sector allocation. The use of regulatory leverage also was an important positive factor affecting the Funds' performance. Leverage is discussed in more detail later in this report.

During this period, municipal bonds with longer maturities generally outperformed those with shorter maturities. Overall, credits at the longest end of the municipal yield curve posted the strongest returns, while bonds at the shortest end produced the weakest results. Among these Funds, NQI, NIF and NPX were the most advantageously positioned in terms of duration and yield curve exposure, with greater exposure to the longer parts of the yield curve that performed well. Holdings of non-callable zero coupon bonds, which outperformed during this period due to their long durations, also boosted the performance of NQI and NPX. In contrast, both NVG and NEA, which were introduced in March and November 2002, respectively, have reached the ten-year point

of the bond market cycle where holdings of bonds with short call dates typically increases. This hampered their performance during this period. NEA, which had the shortest duration among the six Funds, was the most negatively impacted by its positioning. In general, variations in duration and yield curve positioning among the Funds accounted for the majority of the differences in performance.

Credit exposure was also an important factor in performance during these six months, as lower quality bonds generally outperformed higher quality bonds. This outperformance was due in part to the greater demand for lower rated bonds as investors looked for investment vehicles offering higher yields. As investors became more comfortable taking on additional investment risk, credit spreads, or the difference in yield spreads between U.S. Treasury securities and comparable investments such as municipal bonds, narrowed through a variety of rating categories. Over the past few years, bonds that matured or were called from these Funds' portfolios and not replaced due to the insured mandate caused their credit weightings to shift toward the upper end of the quality spectrum. While we added to the Funds' lower rated holdings following the change in investment policy, these Funds generally continued to be significantly overweight in bonds rated AA, which detracted from their performance during this period. NEA's performance also was hampered by the largest exposure to AAA rated bonds among these six Funds. These allocations were offset to a certain extent by the positive influence of the Funds' exposures to the lower rated credit spectrum.

Holdings that generally made positive contributions to the Funds' returns during this period included health care (including hospitals), transportation and education credits. All of these Funds, particularly NQI, NPX and NVG, benefited from their weightings in the health care sector. In addition, the returns of NQI and NPX were boosted by their holdings of toll road bonds. Tobacco bonds backed by the 1998 master settlement agreement also were one of the top performing market segments, as these bonds benefited from several market developments, including increased demand for higher-yielding investments by investors who became less risk averse. In addition, based on recent data showing that cigarette sales had fallen less steeply than anticipated, the 46 states participating in the agreement stand to receive increased payments from the tobacco companies. Benefiting from the recent change in investment policy, NIO, NIF, NVG and NEA now have allocations in lower rated tobacco bonds as of April 30, 2012. NQI and NPX do not hold any lower rated tobacco bonds.

In contrast, pre-refunded bonds, which are often backed by U.S. Treasury securities, were the poorest performing market segment during this period. The underperformance of these bonds can be attributed primarily to their shorter effective maturities and higher credit quality. As of April 30, 2012, NEA had the largest exposure to pre-refunded bonds, while NQI had the smallest allocation. General obligation and other tax-supported bonds as well as utilities and housing credits also lagged the performance of the general municipal market for this period. These Funds generally had relatively light exposures to housing, which limited the impact of the performance of this sector.

FUND POLICY CHANGES

On October 28, 2011, the Funds' Board of Directors/Trustees approved changes to each Fund's investment policy regarding its investment in insured municipal securities. These changes were designed to provide the Adviser with more flexibility regarding the types of securities available for investment by each Fund.

Effective January 2, 2012, each Fund eliminated the investment policy requiring it, under normal circumstances, to invest at least 80% of its managed assets in municipal securities that are covered by insurance guaranteeing the timely payment of principal and interest. Over the past few years, most municipal bond insurers have had their credit ratings downgraded and only one insurer is currently insuring new municipal bonds. As a result, the supply of insured municipal securities has decreased dramatically and the long-term viability of the municipal bond insurance market is uncertain. The Funds have not changed their investment objective and will continue to invest substantially all of their assets in a portfolio of investment grade quality municipal securities.

Concurrent with the investment policy changes, the Funds have changed their names as follows:

Nuveen Insured Quality Municipal Fund, Inc. (NQI) changed to Nuveen Quality Municipal Fund, Inc. (NQI)

Nuveen Insured Municipal Opportunity Fund, Inc. (NIO) changed to Nuveen Municipal Opportunity Fund, Inc. (NIO)

Nuveen Premier Insured Municipal Income Fund, Inc. (NIF) changed to Nuveen Premier Municipal Opportunity Fund, Inc. (NIF)

Nuveen Insured Premium Income Municipal Fund 2 (NPX) changed to Nuveen Premium Income Municipal Opportunity Fund (NPX)

Nuveen Insured Dividend Advantage Municipal Fund (NVG) changed to Nuveen Dividend Advantage Municipal Income Fund (NVG); and

Nuveen Insured Tax-Free Advantage Municipal Fund (NEA) changed to Nuveen AMT-Free Municipal Income Fund (NEA)

In addition, each Fund changed its non-fundamental investment policy requiring each Fund to invest in municipal securities rated at least investment grade at the time of investment. Each Fund adopted a new policy to, under normal circumstances, invest at least 80% of its managed assets in investment grade securities that, at the time of investment, are rated within the four highest grades (Baa or BBB or better) by at least one nationally recognized statistical ratings organization (“NRSRO”) or are unrated but judged to be of comparable quality by the Fund’s investment adviser. Under the new policy, each Fund may invest up to 20% of its managed assets in municipal securities that at the time of investment are rated below investment grade or are unrated but judged to be of comparable quality by the Fund’s investment adviser. No more than 10% of each Fund’s managed assets may be invested in municipal securities rated below B3/B- or that are unrated but judged to be of comparable quality by the Fund’s investment adviser.

APPROVED FUND REORGANIZATIONS

On June 22, 2012, the Funds’ Board of Directors/Trustees approved a series of reorganizations for certain Funds included in this report. The reorganizations are intended to create a single larger Fund, which would potentially offer shareholders the following benefits:

Lower Fund expense ratios (excluding the effects of leverage), as fixed costs are spread over a larger asset base;

Enhanced secondary market trading, as larger Funds potentially make it easier for investors to buy and sell Fund shares;

Lower per share trading costs through reduced bid/ask spreads due to a larger common share float; and

Increased Fund flexibility in managing the structure and cost of leverage over time.

The approved reorganizations are as follows:

Acquired Funds	Symbol	Acquiring Fund	Symbol
Nuveen Premier Municipal Opportunity Fund, Inc.	NIF	Nuveen AMT-Free Municipal Income Fund	NEA
Nuveen Premier Income Municipal Opportunity Fund	NPX		

If shareholders approve the reorganizations, and upon the closing of the reorganizations, the Acquired Funds will transfer substantially all of their assets to the Acquiring Fund in exchange for common and preferred shares of the Acquiring Fund, and the assumption by the Acquiring Fund of the liabilities of the Acquired Funds. The Acquired Funds will then be liquidated, dissolved and terminated in accordance with their Declaration of Trust.

Fund Leverage and Other Information

IMPACT OF THE FUNDS' LEVERAGE STRATEGIES ON PERFORMANCE

One important factor impacting the returns of all these Funds relative to the comparative indexes was the Funds' use of leverage. The Funds use leverage because their managers believe that, over time, leveraging provides opportunities for additional income and total return for common shareholders. However, use of leverage also can expose common shareholders to additional volatility. For example, as the prices of securities held by a Fund decline, the negative impact of these valuation changes on common share net asset value and common shareholder total return is magnified by the use of leverage. Conversely, leverage may enhance common share returns during periods when the prices of securities held by a Fund generally are rising. Leverage made a positive contribution to the performance of these Funds over this reporting period.

THE FUNDS' REGULATORY LEVERAGE

As of April 30, 2012, the Funds have issued and outstanding MuniFund Term Preferred (MTP) Shares, Variable Rate MuniFund Term Preferred (VMTP) Shares and/or Variable Rate Demand Preferred (VRDP) Shares as shown in the accompanying tables.

RISK CONSIDERATIONS

Fund shares are not guaranteed or endorsed by any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation. Past performance is no guarantee of future results. Fund common shares are subject to a variety of risks, including:

Investment and Market Risk. An investment in common shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in common shares represents an indirect investment in the municipal securities owned by the Fund, which generally trade in the over-the-counter markets. Your common shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

Price Risk. Shares of closed-end investment companies like these Funds frequently trade at a discount to their NAV. Your common shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

Leverage Risk. Each Fund's use of leverage creates the possibility of higher volatility for the Fund's per share NAV, market price, distributions and returns. There is no assurance that a Fund's leveraging strategy will be successful.

Tax Risk. The tax treatment of Fund distributions may be affected by new IRS interpretations of the Internal Revenue Code and future changes in tax laws and regulations.

Issuer Credit Risk. This is the risk that a security in a Fund's portfolio will fail to make dividend or interest payments when due.

Interest Rate Risk. Fixed-income securities such as bonds, preferred, convertible and other debt securities will decline in value if market interest rates rise.

Reinvestment Risk. If market interest rates decline, income earned from a Fund's portfolio may be reinvested at rates below that of the original bond that generated the income.

Call Risk or Prepayment Risk. Issuers may exercise their option to prepay principal earlier than scheduled, forcing a Fund to reinvest in lower-yielding securities.

Inverse Floater Risk. The Funds may invest in inverse floaters. Due to their leveraged nature, these investments can greatly increase a Fund's exposure to interest rate risk and credit risk. In addition, investments in inverse floaters involve the risk that the Fund could lose more than its original principal investment.

Common Share Dividend and
Price Information

DIVIDEND INFORMATION

The monthly dividends of all six Funds in this report remained stable throughout the six-month reporting period ended April 30, 2012.

Due to normal portfolio activity, common shareholders of the following Funds received capital gains and/or net ordinary income distributions in December 2011 as follows:

	Long-Term Capital Gains (per share)	Short-Term Capital Gains and/or Ordinary Income (per share)
NQI	—	\$ 0.0026
NIO	\$ 0.0026	—
NVG	\$ 0.0413	—

All of the Funds in this report seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of April 30, 2012, all six of the Funds in this report had positive UNII balances, based upon our best estimate, for tax purposes and positive UNII balances for financial reporting purposes.

COMMON SHARE REPURCHASES AND PRICE INFORMATION

As of April 30, 2012, and since the inception of the Funds' repurchase programs, the Funds have cumulatively repurchased and retired their common shares as shown in the accompanying table. Since the inception of the Funds' repurchase programs, NQI, NIF, and NPX have not repurchased any of their outstanding common shares.
