UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K
Annual Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the Fiscal Year Ended February 3, 2018

OR
Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the transition period from _____ to _____
Commission File Number 1-11893

GUESS?, INC.
(Exact name of registrant as specified in its charter)
Delaware 95-3679695
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification Number)
1444 South Alameda Street
Los Angeles, California 90021
(213) 765-3100
(Address, including zip code, and telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:
Title of Each Class Name of Each Exchange on Which Registered
common stock, par value \$0.01 per share New York Stock Exchange
Securities registered pursuant to Section 12(g) of the Act: None
Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No
Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No
Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No
Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No
Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant’s knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.
Indicate by check mark whether registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.
Large accelerated filer Accelerated filer

Edgar Filing: GUESS INC - Form 10-K

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of the close of business on July 29, 2017, the last business day of the registrant's most recently completed second fiscal quarter, the aggregate market value of the voting and non-voting common equity stock held by non-affiliates of the registrant was \$775,194,793 based upon the closing price of \$13.12 on the New York Stock Exchange composite tape on such date. For this computation, the registrant has excluded the market value of all shares of its common stock reported as beneficially owned by executive officers and directors of the registrant. Such exclusion shall not be deemed to constitute an admission that any such person is an "affiliate" of the registrant.

As of the close of business on March 26, 2018, the registrant had 80,374,301 shares of common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the proxy statement for the registrant's 2018 Annual Meeting of Stockholders are incorporated by reference into Part III herein.

IMPORTANT FACTORS REGARDING FORWARD-LOOKING STATEMENTS

Throughout this Annual Report on Form 10-K, including documents incorporated by reference herein, we make “forward-looking” statements, which are not historical facts, but are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements may also be in our other reports filed under the Securities Exchange Act of 1934, as amended, in our press releases and in other documents. In addition, from time-to-time, we, through our management, may make oral forward-looking statements. These statements relate to expectations, analyses and other information based on current plans, forecasts of future results and estimates of amounts not yet determinable. These statements also relate to our goals, future prospects, global cost reduction and profitability efforts, capital allocation plans, cash needs and current business strategies and strategic initiatives. These forward-looking statements are identified by their use of terms and phrases such as “anticipate,” “believe,” “continue,” “could,” “estimate,” “expect,” “goal,” “intend,” “may,” “outlook,” “pending,” “plan,” “predict,” “project,” “will,” “would,” and other similar terms and phrases, including references to assumptions.

Although we believe that the expectations reflected in any of our forward-looking statements are reasonable, actual results could differ materially from those projected or assumed. These forward-looking statements may include, among other things, statements or assumptions relating to: our expected results of operations; the accuracy of data relating to, and anticipated levels of, future inventory and gross margins; anticipated cash requirements and sources; cost containment efforts; estimated charges; plans regarding store openings, closings, remodels and lease negotiations; plans regarding the relocation of the Company’s European distribution center to a new facility in the Netherlands; plans regarding business growth, international expansion and capital allocation; plans regarding supply chain efficiencies and global planning and allocation; e-commerce, digital and omni-channel initiatives; business seasonality; results and risks of current and future legal proceedings, including the investigation by the European Commission regarding the potential breach of certain European Union competition rules by the Company; industry trends; consumer demands and preferences; competition; currency fluctuations and related impacts; estimated tax rates, including the impact of the Tax Cuts and Jobs Act of 2017 and changes to provisional estimates; results of tax audits and other regulatory proceedings; the impact of recent accounting pronouncements; raw material and other inflationary cost pressures; consumer confidence; and general economic conditions. We do not intend, and undertake no obligation, to update our forward-looking statements to reflect future events or circumstances. Such statements involve risks and uncertainties, which may cause actual results to differ materially from those set forth in these statements. Important factors that could cause or contribute to such differences include those discussed under “Part I, Item 1A. Risk Factors” contained herein.

Table of Contents

PART I

ITEM 1. Business.

General

Unless the context indicates otherwise, the terms “we,” “us,” “our” or the “Company” in this Form 10-K refer to Guess?, Inc. (“GUESS?”) and its subsidiaries on a consolidated basis.

We design, market, distribute and license one of the world’s leading lifestyle collections of contemporary apparel and accessories for men, women and children that reflect the American lifestyle and European fashion sensibilities. Our apparel is marketed under numerous trademarks including GUESS, GUESS?, GUESS U.S.A., GUESS Jeans, GUESS? and Triangle Design, MARCIANO, Question Mark and Triangle Design, a stylized G and a stylized M, GUESS Kids, Baby GUESS, YES, G by GUESS, GUESS by MARCIANO and Gc. The lines include full collections of clothing, including jeans, pants, skirts, dresses, shorts, blouses, shirts, jackets, knitwear and intimate apparel. In addition, we selectively grant licenses to design, manufacture and distribute a broad range of products that complement our apparel lines, including eyewear, watches, handbags, footwear, kids’ and infants’ apparel, outerwear, fragrance, jewelry and other fashion accessories. We also grant licenses to certain wholesale partners to operate and sell our products through licensed retail stores.

Our products are sold through direct-to-consumer, wholesale and licensing distribution channels. Our core customer is a style-conscious consumer primarily between the ages of 20 and 35. These consumers are part of a highly desirable demographic group that we believe, historically, has had significant disposable income. We also appeal to customers outside this group through specialty product lines that include MARCIANO, a more sophisticated fashion line targeted to women and men, and GUESS Kids, targeted to boys and girls ages 6 to 12.

We were founded in 1981 and currently operate as a Delaware corporation.

The Company operates on a 52/53-week fiscal year calendar, which ends on the Saturday nearest to January 31 of each year. All references herein to “fiscal 2018,” “fiscal 2017” and “fiscal 2016” represent the results of the 53-week fiscal year ended February 3, 2018 and the 52-week fiscal years ended January 28, 2017 and January 30, 2016. The additional week in fiscal 2018 occurred during the fourth quarter ended February 3, 2018. References to “fiscal 2019” represent the 52-week fiscal year ending February 2, 2019.

Business Strengths

We believe we have several business strengths that set us apart from our competition, including:

Brand Equity. The GUESS? brand is an integral part of our business, a significant strategic asset and a primary source of sustainable competitive advantage. The GUESS? brand communicates a distinctive image that is fun, fashionable and sexy. We have developed and maintained this image worldwide through our consistent emphasis on innovative and distinctive product designs and through our award-winning advertising, under the creative leadership and vision of Paul Marciano, our Executive Chairman of the Board and Chief Creative Officer. Brand loyalty, name awareness, perceived quality, strong brand images, public relations, publicity, promotional events and trademarks all contribute to the reputation and integrity of the GUESS? brand.

Global Diversification. The global success of the GUESS? brand has reduced our reliance on any particular geographic region. This geographic diversification provides broad opportunities for growth, even during regional economic slowdowns. The percentage of our revenue generated from outside of the U.S. has grown from approximately 32% of our total revenues for the year ended December 31, 2005 to approximately 69% of our total revenues for the year ended February 3, 2018. As of February 3, 2018, the Company directly operated 1,011 retail stores in the Americas, Europe and Asia. The Company’s partners operated 652 additional retail stores worldwide. As of February 3, 2018, the Company and its partners operated in approximately 100 countries worldwide. We continue to evaluate the different businesses in our global portfolio, directing capital investments to those with more profit potential. For instance, we plan to allocate sufficient resources to fuel future growth in Asia, particularly in mainland China, where we see significant opportunities. In addition, we plan to target overall growth in other markets such as Russia, Turkey and Northern Europe where we believe the GUESS? brand is underpenetrated.

Table of Contents

Multiple Distribution Channels. We use direct-to-consumer, wholesale and licensing distribution channels to sell our products globally. This allows us to maintain a critical balance as our operating results do not depend solely on the performance of any single channel. The use of multiple channels also allows us to adapt quickly to changes in the distribution environment in any particular region.

Direct-to-Consumer. Our direct-to-consumer network is omni-channel, made up of both directly operated brick-and-mortar retail stores and concessions as well as integrated e-commerce sites that create a seamless shopping experience for our customers.

Directly operated retail stores and concessions. Distribution through our directly operated retail stores and concessions allows us to influence the merchandising and presentation of our products, enhance our brand image, build brand equity and test new product design concepts. Our store locations vary country by country depending on the type of locations available. In general, our stores average approximately 5,000 square feet in the Americas, approximately 3,000 square feet in Europe and the Middle East and approximately 2,000 square feet in Asia and the Pacific. Concessions generally average 1,000 square feet and are located primarily in South Korea and Greater China. As part of our omni-channel initiative, retail store sales in certain regions may be fulfilled from one of our numerous retail store locations or from our distribution centers.

Our directly operated retail stores and concessions as of February 3, 2018, January 28, 2017 and January 30, 2016 were comprised as follows:

Region	Year Ended Feb 3, 2018		Year Ended Jan 28, 2017		Year Ended Jan 30, 2016	
	Stores	Concessions	Stores	Concessions	Stores	Concessions
United States	306	—	339	—	342	—
Canada	89	—	111	—	113	—
Central and South America	59	27	51	30	46	—
Total Americas	454	27	501	30	501	—
Europe and the Middle East	400	33	336	31	280	26
Asia and the Pacific	157	177	108	193	54	169
Total	1,011	237	945	254	835	195

e-Commerce. As of February 3, 2018, we operated retail websites in the Americas, Europe and Asia. We have e-commerce available to 55 countries and in ten languages around the world. Our websites act as virtual storefronts that both sell our products and promote our brands. Designed as customer shopping centers, these sites showcase our products in an easy-to-navigate format, allowing customers to see and purchase our collections of apparel and accessories. These virtual stores have not only expanded our direct-to-consumer distribution channel, but they have also improved customer relations and are fun and entertaining alternative-shopping environments. As part of our omni-channel initiative, e-commerce orders in certain regions may be fulfilled from our distribution centers, or from our retail stores, or both.

Wholesale Distribution. We sell through both domestic and international wholesale distribution channels as well as retail stores and concessions operated by certain wholesale partners.

Wholesale. In Europe, our products are sold in stores ranging from large, well-known department stores like El Corte Inglés, Galeries Lafayette and Printemps to small upscale multi-brand boutiques. Because our European wholesale business is more fragmented, we generally rely on a large number of smaller regional distributors and agents to distribute our products. In the Americas, our wholesale customers consist primarily of better department stores, including Macy's, Liverpool and The Bay, and select specialty retailers and upscale boutiques, which have the image and merchandising expertise that we require for the effective presentation of our products. Through our foreign subsidiaries and our network of international distributors, our products are also available in major cities throughout Africa, Asia, Australia and the Middle East.

Licensed stores and concessions. We also sell product to certain wholesale customers who operate licensed retail stores and concessions which allows us to expand our international operations with a lower level of capital investment while still closely monitoring store designs and merchandise programs in order to protect the integrity of the GUESS?

brand.

2

Table of Contents

Licensed retail stores and concessions operated by our wholesale partners as of February 3, 2018, January 28, 2017 and January 30, 2016 were comprised as follows:

Region	Year Ended Feb 3, 2018		Year Ended Jan 28, 2017		Year Ended Jan 30, 2016	
	Stores	Concessions	Stores	Concessions	Stores	Concessions
United States	2	1	2	1	1	—
Central and South America	44	—	44	—	53	—
Total Americas	46	1	46	1	54	—
Europe and the Middle East	269	—	293	—	314	—
Asia and the Pacific	337	191	396	191	436	247
Total	652	192	735	192	804	247

Licensing Operations. The desirability of the GUESS? brand name among consumers has allowed us to selectively expand our product offerings and global markets through trademark licensing arrangements, with minimal capital investment or on-going operating expenses. We currently have various domestic and international licenses that include eyewear, watches, handbags, footwear, kids' and infants' apparel, outerwear, fragrance, jewelry and other fashion accessories; and include licenses for the design, manufacture and distribution of GUESS? branded products in markets which include Africa, Asia, Australia, Europe, the Middle East, Central America, North America and South America.

Multiple Store Concepts. Our products are sold around the world primarily through six different store concepts, namely our GUESS? full-price retail stores, our GUESS? factory outlet stores, our GUESS? Accessories stores, our G by GUESS stores, our MARCIANO stores and our GUESS? Kids stores. We also have a small number of underwear, Gc watch and footwear concept stores. This allows us to target the various demographics in each region through dedicated store concepts that market each brand or concept specifically to the desired customer population. Having multiple store concepts also allows us to target our newer brands and concepts in different markets than our flagship GUESS? store concept. For instance, we have mall locations for G by GUESS stores where we would not ordinarily operate any of our full-price GUESS? stores.

Business Segments

The Company's businesses are grouped into five reportable segments for management and internal financial reporting purposes: Americas Retail, Americas Wholesale, Europe, Asia and Licensing. Management evaluates segment performance based primarily on revenues and earnings (loss) from operations before corporate performance-based compensation costs, net gains (losses) from lease terminations, asset impairment charges and restructuring charges, if any. The Americas Retail segment includes the Company's retail and e-commerce operations in North and Central America and its retail operations in South America. The Americas Wholesale segment includes the Company's wholesale operations in the Americas. The Europe segment includes the Company's retail, e-commerce and wholesale operations in Europe and the Middle East. The Asia segment includes the Company's retail, e-commerce and wholesale operations in Asia and the Pacific. The Licensing segment includes the worldwide licensing operations of the Company. The business segment operating results exclude corporate overhead costs, which consist of shared costs of the organization, net gains (losses) on lease terminations, asset impairment charges and restructuring charges. Corporate overhead costs are presented separately and generally include, among other things, the following unallocated corporate costs: accounting and finance, executive compensation, corporate performance-based compensation, facilities, global advertising and marketing, human resources, information technology and legal.

Table of Contents

The following table presents our net revenue and earnings (loss) from operations by segment for the last three fiscal years (dollars in thousands):

	Year Ended Feb 3, 2018		Year Ended Jan 28, 2017		Year Ended Jan 30, 2016	
	\$	%	\$	% (1)	\$	% (1)
Net revenue:

Total earnings from operations	\$65,173	100.0 %	\$22,708	100.0 %	\$121,350	100.0 %

During the fourth quarter of fiscal 2018, the Company reclassified net royalties received on the Company's inventory purchases of licensed product from net revenue to cost of product sales. Accordingly, net revenue has (1) been adjusted for fiscal 2017 and fiscal 2016 to conform to the current period presentation. This reclassification had no impact on previously reported earnings from operations. Refer to Note 1 to the Consolidated Financial Statements for further information.

(2) Segment results have been adjusted for fiscal 2017 and fiscal 2016 to conform to the current year presentation. Refer to Note 1 to the Consolidated Financial Statements for further information on these reclassifications.

Additional segment information, together with certain geographical information, is included in Note 17 to the Consolidated Financial Statements contained herein.

Americas Retail Segment

In our Americas Retail segment, we sell our products direct-to-consumer through a network of directly operated retail and factory outlet stores and e-commerce sites in the Americas.

Retail stores and concessions. Our Americas Retail stores and concessions are comprised of a mix of GUESS? factory outlet stores, full-priced GUESS? retail stores, G by GUESS stores, GUESS? Accessories stores and MARCIANO stores. For the year ended February 3, 2018, we opened 15 new stores and closed 62 stores in the Americas, ending the year with 454 stores. This store count does not include 27 concessions in Mexico. We directly operated our retail stores and concessions in Mexico and Brazil through our majority-owned joint ventures.

e-Commerce. Our Americas Retail segment also includes our directly operated retail and other marketplace websites in the U.S., Canada and Mexico. These websites operate as virtual storefronts that, combined with our retail stores, provide a seamless shopping experience to the consumer to sell our products and promote our brands. They also provide fashion information and a mechanism for customer feedback while promoting customer loyalty and enhancing our brand identity through interactive content online and through

Table of Contents

smartphone applications. Our U.S. and Canadian online sites are fully integrated with our customer relationship management (“CRM”) system and loyalty programs. Omni-channel initiatives that we have already deployed in the U.S. and Canada include “reserve online, pick-up in stores” and “order from store” as well as mobile optimized commerce sites and smartphone applications. In the U.S. and Canada, e-commerce orders may be fulfilled from our distribution centers, or from our retail stores, or both.

Americas Wholesale Segment

In our Americas Wholesale segment, we sell our products through wholesale channels throughout the Americas and to third party distributors based in Central and South America as well as licensed retail locations operated by our wholesale partners. Our Americas Wholesale business generally experiences stronger performance from July through November. Our Americas Wholesale customers consist primarily of better department stores, select specialty retailers, upscale boutiques as well as select off-price retailers. As of February 3, 2018, our products were sold to consumers through 1,501 major doors in the Americas as well as through our customers’ e-commerce sites. This compares to 1,790 major doors at January 28, 2017. As of February 3, 2018, these locations included 874 shop-in-shops, a designated selling area within a department store that offers a wide array of our products and incorporates GUESS? signage and fixture designs. These shop-in-shops, managed by the department stores, allow us to reinforce the GUESS? brand image with our customers. Many department stores have more than one shop-in-shop, with each one featuring women’s, men’s or kids’ apparel. We also sell product to licensed retail stores and concessions operated by certain wholesale customers. For the year ended February 3, 2018, our partners opened three new stores and closed three stores, ending the year with 46 licensed retail stores in the Americas. As of February 3, 2018, the total 46 licensed retail stores were comprised of 44 stores in Central and South America and two stores in the U.S. This store count does not include one concession that was operated by one of our partners in the U.S.

Our Americas Wholesale merchandising strategy is to focus on trend-right products supported by key fashion basics. We have sales representatives in New York, Los Angeles, Toronto, Montreal, Mexico City and Vancouver who coordinate with customers to determine the inventory level and product mix that should be carried in each store. Additionally, we use merchandise coordinators who work with the stores to ensure that our products are displayed appropriately. During fiscal 2018, our two largest wholesale customers accounted for a total of approximately 2.2% of our consolidated net revenue.

Europe Segment

In our Europe segment, we sell our products through direct-to-consumer and wholesale channels, primarily throughout Europe and the Middle East.

European Direct-to-Consumer. Our European direct-to-consumer network is comprised of brick-and-mortar retail stores and concessions and e-commerce sites.

Retail stores and concessions. Our European retail stores and concessions are comprised of a mix of directly operated GUESS? and MARCIANO retail and outlet stores, GUESS? Accessories retail and outlet stores, GUESS? Footwear stores, GUESS? Kids stores and G by GUESS stores. For the year ended February 3, 2018, we opened 72 new stores and closed nine stores, ending the year with 400 directly operated stores in Europe and the Middle East. During fiscal 2018, we also acquired one store from one of our European wholesale partners. This store count does not include 33 directly operated concessions in Europe. Certain of our European stores require initial investments in the form of key money to secure prime store locations. These amounts are paid to landlords or existing lessees in certain circumstances.

e-Commerce. In Europe, similar to the Americas, our e-commerce sites operate as virtual storefronts that, combined with our retail stores, provide a seamless shopping experience to the consumer to sell our products and promote our brands. We are leveraging our existing technology and experience from the Americas to deploy similar omni-channel strategies in certain international markets. We currently offer interactive content online and via mobile, and are planning to expand to smartphone applications and integrate with CRM systems and loyalty programs.

European Wholesale Distribution. We sell our products both through wholesale distribution channels and through licensed retail stores and concessions operated by our wholesale partners throughout Europe and

Table of Contents

the Middle East. Our European wholesale business generally relies on a large number of smaller regional distributors and agents to distribute our products primarily to smaller independent multi-brand boutiques. Our products are also sold directly to large, well-known department stores like El Corte Inglés, Galeries Lafayette and Printemps. Overall, we have over 7,000 customers with no single customer representing more than 1% of our consolidated net revenue. The type of customer varies from region to region depending on both the prominence of the GUESS? brand in each region and the dominance of a particular type of retail channel in each region. In countries where the brand is well known, we operate through showrooms where agents and distributors can view our line and place orders. We currently have showrooms in key cities such as Barcelona, Dusseldorf, Lugano, Munich and Paris. In countries where the brand is less prominent, we may use one large distributor for the entire region. We sell both our apparel and certain accessories products under our GUESS? and MARCIANO brand concepts through our wholesale channel, operating primarily through two seasons, Spring/Summer and Fall/Winter. Generally our Spring/Summer sales campaign is from April to September with the related shipments occurring primarily from November to April. The Fall/Winter sales campaign is from November to April with the related shipments occurring primarily from May to October. The Company may take advantage of early-season demand and potential reorders by offering a pre-collection assortment which ships at the beginning of each season. Customers retain the ability to request early shipment of backlog orders or delay shipment of orders depending on their needs. Revenues from sales to our wholesale licensed stores are also recognized as wholesale sales within our European wholesale operations. For the year ended February 3, 2018, our partners opened 12 new licensed retail stores and closed 35 stores, ending the year with 269 licensed retail stores in Europe and the Middle East. During fiscal 2018, we also acquired one store from one of our European wholesale partners.

Asia Segment

In our Asia segment, we sell our products through direct-to-consumer and wholesale channels throughout Asia and the Pacific.

Asian Direct-to-Consumer. Our Asian direct-to-consumer network is comprised of brick-and-mortar retail stores and concessions and e-commerce sites.

Retail stores and concessions. Our Asian retail stores and concessions include a mix of directly operated GUESS?, GUESS? Underwear, GUESS? Footwear, GUESS? Accessories, GUESS? Kids and MARCIANO stores. For the year ended February 3, 2018, we opened 42 new stores and closed 15 stores, ending the year with 157 directly operated stores in Asia and the Pacific. During fiscal 2018, we also acquired 22 stores from certain of our Asian wholesale partners. This store count does not include 177 directly operated apparel and accessory concessions. Concessions are widely used in Asia and generally represent directly managed areas within a department store setting.

e-Commerce. We also have e-commerce sites throughout Asia which operate as virtual storefronts that, combined with our retail stores, provide a seamless shopping experience to the consumer to sell our products and promote our brands.

Asian Wholesale Distribution. Our Asian wholesale customer base is comprised primarily of a small number of selected distributors with which we have contractual distribution arrangements and licensed stores and concessions operated by our wholesale partners. For the year ended February 3, 2018, our partners opened 21 new licensed retail stores and closed 58 stores, ending the year with 337 licensed retail stores. During fiscal 2018, we also acquired 22 stores from certain of our Asian wholesale partners. This store count does not include 191 apparel and accessory concessions operated by our partners in Asia.

Licensing Segment

Our Licensing segment includes the worldwide licensing operations of the Company. The desirability of the GUESS? brand name among consumers has allowed us to selectively expand our product offerings and global markets through trademark licensing arrangements, with minimal capital investment or on-going operating expenses. We currently have various domestic and international licenses that include eyewear, watches, handbags, footwear, kids' and infants' apparel, outerwear, fragrance, jewelry and other fashion accessories; and include licenses for the design, manufacture and distribution of GUESS? branded products in markets which include Africa, Asia, Australia, Europe, the Middle East, Central America, North America and South America.

Table of Contents

Our trademark license agreements customarily provide for a multi-year initial term ranging from three to ten years, with a possible option to renew prior to expiration for an additional multi-year period. The typical license agreement requires that the licensee pay us the greater of a royalty based on a percentage of the licensee's net sales of licensed products or a guaranteed annual minimum royalty that typically increases over the term of the license agreement. In addition, several of our key license agreements provide for specified, fixed cash rights payments over and above our normal, ongoing royalty payments. Generally, licensees are required to spend a percentage of the net sales of licensed products for advertising and promotion of the licensed products and in many cases we place the ads on behalf of the licensee and are reimbursed. Additionally, licensees also make contributions to advertising funds, as a percentage of their sales, or may elect to increase their contribution to support specific brand-building initiatives.

In addition, to protect and increase the value of our trademarks, our license agreements include strict quality control and manufacturing standards. Our licensing personnel in the U.S., Europe and Asia meet regularly with licensees to ensure consistency with our overall merchandising and design strategies in order to protect the GUESS? trademarks and brand. As part of this process, our licensing department reviews in advance GUESS? third party licensed products, advertising and promotional materials.

We strategically reposition our existing licensing portfolio by monitoring and evaluating the performance of our licensees worldwide. For instance, between 2005 and 2013, we acquired several of our European apparel licensees. As a result, we now directly manage our adult and children's apparel businesses in Europe.

Strategic Partnerships

We evaluate opportunities for strategic acquisitions and alliances and pursue those that we believe will support and contribute to our overall strategic initiatives and/or will take advantage of economies of scale. Similarly, when existing investments and alliances no longer align with strategic initiatives or as other circumstances warrant, we will evaluate various exit opportunities.

During fiscal 2017, we acquired the remaining 40% interest in our now wholly-owned subsidiary, Guess Sud SAS ("Guess Sud"), which is based in France. During fiscal 2017, we also sold our minority interest equity holding in a privately-held boutique apparel company. During fiscal 2016, we entered into a majority-owned joint venture in Russia to accelerate our expansion in this country. During fiscal 2014, we entered into a majority-owned joint venture which oversees the development of our retail and wholesale channels in Brazil. During fiscal 2013, we entered into a majority-owned joint venture in Portugal with a licensee partner to further expand in this region. In fiscal 2010, we entered into a majority-owned joint venture in the Canary Islands with licensee partners to open new free standing retail stores in this region. In 2006, we entered into a majority-owned joint venture to oversee the revitalization and expansion of our retail and wholesale channels in Mexico.

Design

GUESS?, G by GUESS and MARCIANO apparel products are designed by their own separate in-house design teams located in the U.S., Switzerland and South Korea. The U.S. and Switzerland teams collaborate to share ideas for products that can be sold throughout our global markets and are inspired by our GUESS? heritage. Our design teams seek to identify global fashion trends and interpret them for the style-conscious consumer while retaining the distinctive GUESS? image. They travel throughout the world in order to monitor fashion trends and discover new fabrics. These fabrics, together with the trends observed by our designers, serve as the primary source of inspiration for our lines and collections. We also maintain a fashion library consisting of vintage and contemporary garments as another source of creative concepts. In addition, our design teams work closely with members of our sales, merchandising and retail operations teams to further refine our products to meet the particular needs of our markets.

Global Sourcing and Supply Chain

We source products through numerous suppliers, many of whom have established long-term relationships with us. We seek to achieve efficient and timely delivery of our products, combining global and local sourcing. Almost all of our products are acquired as package purchases where we design and source product and the vendor delivers the finished product.

We are executing on the following supply chain initiatives to drive improvements in product costs: (i) developing a sourcing network in new territories that can offer better costs; (ii) consolidating and building strategic partnerships

with high-quality suppliers to gain scale efficiencies; and (iii) implementing a global fabric platforming process for

7

Table of Contents

each of the regional design offices to develop and utilize common fabrics across multiple styles creating a consistently high quality global offer for our wholesale and retail customers. We believe that our balanced global supply chain, with deep vendor partnerships, provides us with a competitive advantage where we have the flexibility to respond to increased demand throughout the world. Our sourcing strategy provides us with the opportunity to leverage costs and improve speed-to-market.

As an ongoing strategic initiative, we leave a larger portion of our buys open prior to each season to improve the efficiency of our speed-to-market by allowing us to design and produce closer to market delivery. This allows us to better react to emerging fashion trends in the market. We are also working to shorten our lead times through partnering with our suppliers, exercising agility in the production process and continuously searching for new suppliers and sourcing opportunities in reaction to the latest trends. Additionally, offering an assortment of global products continues to be an area of focus. As a global brand, we maintain skilled sourcing teams in North America, Europe and Asia.

We are committed to sourcing our products in a responsible manner, respecting both the countries in which we conduct business and the business partners that produce our products. As a part of this commitment, we have implemented a global social compliance program that applies to our business partners. Although local customs vary in different regions of the world, we believe that the issues of business ethics, human rights, health, safety and environmental stewardship transcend geographical boundaries.

To support and ensure our social compliance, we communicate our expectations to our partners throughout our global supply chain and conduct compliance audits. If deficiencies are discovered, personnel in each region are empowered to work with the respective business partner to take a corrective course of action. Additionally, the goal of this process is to educate individuals, build strategic relationships and improve business practices over the long-term.

Advertising and Marketing

Our advertising, public relations and marketing strategy is designed to promote a consistent high impact image which endures regardless of changing consumer trends. While our advertising promotes products, the primary emphasis is on brand image.

Since our inception, Paul Marciano, our Executive Chairman of the Board and Chief Creative Officer, has had principal responsibility for the GUESS? brand image and creative vision. Under the direction of Mr. Marciano, our Los Angeles-based advertising department is responsible for overseeing all worldwide advertising. Throughout our history, we have maintained a high degree of consistency in our advertisements by using similar themes and images, including our signature black and white print advertisements and iconic logos.

We deploy a variety of media focused on national and international contemporary fashion/beauty, lifestyle and celebrity outlets. In recent years, we have also expanded our efforts into influencer marketing, digital advertising with leading fashion and lifestyle websites and advertising on social media platforms including Facebook, Instagram, Twitter, Pinterest, Reddit, Snapchat and global search engines. Our smartphone application provides a unique mobile media experience by combining fashion, e-commerce, personalized product recommendations, targeted promotions and social loyalty rewards to drive mobile brand engagement.

We also require our licensees and distributors to invest a percentage of their net sales of licensed products and net purchases of GUESS? products in Company-approved advertising, promotion and marketing. By retaining control over our advertising programs, we are able to maintain the integrity of our brands while realizing substantial cost savings compared to outside agencies.

We will continue to regularly assess and implement marketing initiatives that we believe will build brand equity and grow our business by investing in marketing programs to build awareness and drive customer traffic to our stores, websites and smartphone application. We plan to further strengthen communications with customers through an emphasis on digital marketing, and through our websites, loyalty programs, direct catalog and marketing mailings. We also plan to strengthen communities on various social media platforms, which enable us to provide timely information in an entertaining fashion to consumers about our history, products, special events, promotions and store locations, and allow us to receive and respond directly to customer feedback.

Table of Contents

As part of these initiatives, we currently have loyalty programs in North America, Europe and Asia with millions of members covering all of our brands. These programs reward our members who earn points for purchases that can be redeemed on future purchases either in our stores or online. In addition to earning rewards with the program, our loyalty members receive other benefits including invitations to special VIP events in our stores, double points during their birthday month and access to seasonal savings. During fiscal 2018, our Guess List loyalty program experienced growth in its overall member engagement numbers through the introduction of experiential rewards and unique member content. In addition to this, we use these programs to promote new products to our customers which in turn increases traffic in the stores and online. We believe that the loyalty programs generate substantial repeat business that might otherwise go to competing brands. We continue to enhance our loyalty program offerings by understanding our members' interests and needs, and strategically marketing to this large and growing customer base.

Quality Control

Our quality control program is designed to ensure that products meet our high quality standards. We test the quality of our raw materials prior to production and inspect prototypes of each product before production runs commence. We also perform random in-line quality control checks during and after production before the garments leave the contractor. Final random inspections occur when the garments are received in our distribution centers. We believe that our policy of inspecting our products is important to maintain the quality, consistency and reputation of our products.

Logistics

We utilize distribution centers at strategically located sites. The Company's U.S. distribution center is based in Louisville, Kentucky. Distribution of our products in Canada is handled primarily from Company operated distribution centers in Montreal, Quebec. At our distribution facilities in the U.S. and Canada, we use fully integrated and automated distribution systems. The bar code scanning of merchandise and distribution cartons, together with radio frequency communications, provide timely, controlled, accurate and instantaneous updates to our distribution information systems. Distribution of our products in Europe has been handled primarily through a third party distribution center in Piacenza, Italy. During fiscal 2018, the Company began relocating its European distribution center from its Italy location to a new facility located in Venlo, Netherlands. The Company expects to complete its transition to the new distribution center in the Netherlands during fiscal 2019. Additionally, we utilize several third party operated distribution warehouses that service the Asia region.

Competition

The apparel industry is highly competitive and fragmented and is subject to rapidly changing consumer demands and preferences. We believe that our success depends in large part upon our ability to anticipate, gauge and respond to changing consumer demands and fashion trends in a timely manner and upon the continued appeal to consumers of the GUESS? brand. We compete with numerous apparel retailers, manufacturers and distributors, both domestically and internationally, as well as several well-known designers. Our licensed apparel and accessories also compete with a substantial number of well-known brands. Although the level and nature of competition differs among our product categories and geographic regions, we believe that we differentiate ourselves from our competitors by offering a global lifestyle brand on the basis of our global brand image and wide product assortment comprising both apparel and accessories. We also believe that our geographic diversification, multiple distribution channels and multiple store concepts help to set us apart from our competition.

Information Systems

We believe that high levels of automation and technology are essential to maintain our competitive position and support our strategic objectives and we continue to invest in and update computer hardware, network infrastructure, system applications and cyber security. Our computer information systems consist of a full range of financial, distribution, merchandising, point-of-sales, customer relationship management, supply chain, digital platform, enterprise resource planning and other systems. During fiscal 2018, key initiatives included digital platform improvement and stabilization, the further development of mobile-based initiatives to support both our wholesale and direct-to-consumer businesses, various multi-channel initiatives and continued enhancements of our product lifecycle management system to facilitate vendor collaboration and increase the efficiency of the supply chain. In addition, we continue to enhance our systems to align with our global IT standards, accommodate future growth and provide

operational efficiencies.

9

Table of Contents

Trademarks

We own numerous trademarks, including GUESS, GUESS?, GUESS U.S.A., GUESS Jeans, GUESS? and Triangle Design, MARCIANO, Question Mark and Triangle Design, a stylized G and a stylized M, GUESS Kids, Baby GUESS, YES, G by GUESS, GUESS by MARCIANO and Gc. As of February 3, 2018, we had over 4,700 U.S. and internationally registered trademarks or trademark applications pending with the trademark offices in over 175 countries around the world, including the U.S. From time-to-time, we adopt new trademarks in connection with the marketing of our product lines. We consider our trademarks to have significant value in the marketing of our products and act aggressively to register and protect our trademarks worldwide.

Like many well-known brands, our trademarks are subject to infringement. We have staff devoted to the monitoring and aggressive protection of our trademarks worldwide.

Wholesale Backlog

We generally receive orders for fashion apparel three to six months prior to the time the products are delivered to our customers' stores. The backlog of wholesale orders at any given time is affected by various factors, including seasonality, cancellations, the scheduling of market weeks, the timing of the receipt of orders and the timing of the shipment of orders and may include orders for multiple seasons. Accordingly, a comparison of backlogs of wholesale orders from period-to-period is not necessarily meaningful and may not be indicative of eventual actual shipments.

U.S. and Canada Backlog. Our U.S. and Canadian wholesale backlog as of March 26, 2018, consisting primarily of orders for fashion apparel, was \$38.2 million in constant currency, compared to \$41.3 million at March 27, 2017, a decrease of 7.7%. We estimate that if we were to normalize the orders for the scheduling of market weeks, the current backlog would have increased by 2.2% compared to the prior year.

Europe Backlog. As of March 25, 2018, the European wholesale backlog was €233.0 million, compared to €196.5 million at March 26, 2017, an increase of 18.6%. The backlog as of March 25, 2018 is primarily comprised of sales orders for the Spring/Summer 2018 and Fall/Winter 2018 seasons.

Employees

As of February 2018, we had approximately 14,700 associates, both full and part-time, consisting of approximately 6,200 in the U.S. and 8,500 in foreign countries. The number of our employees fluctuates during the year based on seasonal needs. In some international markets, local laws provide for employee representation by organizations similar to unions and some of our international employees are covered by trade-sponsored or governmental bargaining arrangements. We consider our relationship with our associates to be good.

Environmental and Other Sustainability Matters

We and our licensing partners and suppliers are subject to federal, state, local and foreign laws, regulations and ordinances that govern activities or operations that may have adverse environmental effects (such as emissions to air, discharges to water, and the generation, handling, storage and disposal of solid and hazardous wastes). We are also subject to laws, regulations and ordinances that impose liability for the costs of clean up or other remediation of contaminated property, including damages from spills, disposals or other releases of hazardous substances or wastes, in certain circumstances without regard to fault. Certain of our operations and those of our licensing partners and suppliers routinely involve the handling of chemicals and wastes, some of which are or may become regulated as hazardous substances. We have not incurred, and do not expect to incur, any significant expenditures or liabilities for environmental matters. As a result, we believe that our environmental obligations will not have a material adverse effect on our consolidated financial condition or results of operations.

Website Access to Our Periodic SEC Reports

Our investor website can be found at <http://investors.guess.com>. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished to the Securities and Exchange Commission (“SEC”) pursuant to Section 13(a) or 15(d) of the Exchange Act, are available at our investor website, free of charge, as soon as reasonably practicable after we electronically file them with, or furnish them to, the SEC. In addition, the charters of our Board of Directors’ Audit, Compensation and Nominating and Governance Committees, as well as the Board of Directors’ Governance Guidelines and our Code of Ethics are posted on our investor website. We may from time-to-time provide important disclosures to our investors, including amendments or waivers to our Code of Ethics, by posting them on our investor website, as permitted by SEC rules. Printed copies of these documents may also be obtained by writing or telephoning us at: Guess?, Inc., 1444 South Alameda Street, Los Angeles, California 90021, Attention: Investor Relations, (213) 765-5578.

We have included our Internet website addresses throughout this filing as textual references only. The information contained within these websites is not incorporated into this Annual Report on Form 10-K.

ITEM 1A. Risk Factors.

You should carefully consider the following factors and other information in this Annual Report on Form 10 K. Additional risks which we do not presently consider material, or of which we are not currently aware, may also have an adverse impact on us. Please also see “Important Factors Regarding Forward-Looking Statements” on page (ii). Demand for our merchandise may decrease and the appeal of our brand image may diminish if we fail to identify and rapidly respond to consumers’ fashion tastes.

The apparel industry is subject to rapidly evolving fashion trends and shifting consumer demands. Accordingly, our brand image and our profitability are heavily dependent upon both the priority our target customers place on fashion and our ability to anticipate, identify and capitalize upon emerging fashion trends. Current fashion tastes place significant emphasis on a fashionable look. In the past, this emphasis has increased and decreased through fashion cycles. If we fail to anticipate, identify or react appropriately, or in a timely manner, to fashion trends, we could experience reduced consumer acceptance of our products and a diminished brand image. These factors could result in higher wholesale markdowns, lower average unit retail prices, lower product margins and decreased sales volumes for our products and could have a material adverse effect on our results of operations and financial condition.

The apparel industry is highly competitive, and we may face difficulties competing successfully in the future. We operate in a highly competitive and fragmented industry with low barriers to entry. We compete with many apparel manufacturers and distributors, both domestically and internationally, as well as many well-known designers. We compete with many other retailers (both brick and mortar and e-commerce sites), including department stores, some of whom are our major wholesale customers. Our licensed apparel and accessories compete with many well-known brands. Within each of our geographic markets, we also face significant competition from global and regional branded apparel companies, as well as retailers that market apparel under their own labels. These and other competitors pose significant challenges to our market share in our existing major domestic and foreign markets and to our ability to successfully develop new markets. Some of our competitors have competitive advantages over us, including greater financial and marketing resources, higher wage rates, lower prices, more desirable store locations, greater online and e-commerce presence and faster speed-to-market. In addition, our larger competitors may be better equipped than us to adapt to changing conditions that affect the competitive market and newer competitors may be viewed as more desirable by fashion conscious consumers. Also, in most countries, the industry’s low barriers to entry allow the introduction of new products or new competitors at a fast pace. In other countries, high import duties may favor locally produced products. Any of these competition-related factors could result in reductions in sales or prices of our products and could have a material adverse effect on our results of operations and financial condition.

Table of Contents

Slowing customer traffic in malls or outlet centers could significantly reduce our sales, increase pressure on our margins and leave us with excess inventory.

Unfavorable economic conditions, changing shopping patterns, including significant increases in e-commerce sales, changing demographic patterns and other factors have adversely affected customer traffic in mall and outlet centers, particularly in North America. This, in turn, has resulted in significant pricing pressures and a highly promotional retail environment in the apparel sector. Should these trends occur in our international business, or continue or worsen in North America, it could negatively impact our sales, increase pressure on our margins, leave us with excess inventory, cause a decline in profits and negatively impact our liquidity.

Poor or uncertain economic conditions, and the resulting negative impact on consumer confidence and spending, have had and could in the future have an adverse effect on our business, prospects, operating results, financial condition and cash flows.

The apparel industry is cyclical in nature and is particularly affected by adverse trends in the general economy. Purchases of apparel and related merchandise are generally discretionary and therefore tend to decline during periods of economic uncertainty and recession, but may also decline at other times. Over the last several years, volatile economic conditions and uncertain market conditions in many markets around the world have resulted in cautious consumer spending. For example, a number of European countries experienced difficult economic conditions, including sovereign debt issues that negatively impacted the capital markets. These conditions resulted in reduced consumer confidence and spending in many countries in Europe, particularly Southern Europe. While these conditions have recently improved, if conditions in Europe, or other economic regions in which we do business, worsen or fail to further improve, there will likely be a negative impact on our business, prospects, operating results, financial condition and cash flows.

In addition to the factors contributing to the current economic environment, there are a number of other factors that could contribute to reduced levels of consumer spending, such as increases in interest rates, currency fluctuations, inflation, unemployment, consumer debt levels, inclement weather, taxation rates, net worth reductions based on market declines or uncertainty, energy prices and austerity measures. Similarly, natural disasters, labor unrest, actual or potential terrorist acts, geopolitical unrest and other conflicts can also create significant instability and uncertainty in the world, causing consumers to defer purchases and travel, or prevent our suppliers and service providers from providing required services or materials to us. These or other factors could materially and adversely affect our business, prospects, operating results, financial condition and cash flows. Uncertainty surrounding potential U.S. policies related to immigration, global trade, taxation and other matters could amplify many of these risks and potential impacts.

Difficulties in the credit markets could have a negative impact on our customers, suppliers and business partners, which, in turn could materially and adversely affect our results of operations and liquidity.

The impact of difficult credit conditions on our customers, business partners, suppliers, insurance providers and financial institutions with which we do business cannot be predicted and may be quite severe. The inability of our manufacturers to ship our products could impair our ability to meet delivery date requirements. A disruption in the ability of our significant customers, distributors or licensees to access liquidity could cause serious disruptions or an overall deterioration of their businesses. A disruption in the ability of a large group of our smaller customers to access liquidity could have similar adverse effects, particularly in our important multi-brand wholesale channel in Southern Europe, where many customers tend to be relatively small and not well capitalized. These conditions could lead to significant reductions in future orders of our products and the inability or failure on our customers' part to meet their payment obligations to us, any of which could have a material adverse effect on our results of operations and liquidity. Similarly, a failure on the part of our insurance providers to meet their obligations for claims made by us could have a material adverse effect on our results of operations and liquidity. Continued market difficulties or additional deterioration could jeopardize our ability to rely on those financial institutions that are parties to our various bank facilities and foreign exchange contracts. We could be exposed to a loss if the counterparty fails to meet its obligations upon our exercise of foreign exchange contracts. In addition, instability or other distress in the financial markets could impair the ability of one or more of the banks participating in our credit agreements from honoring its

Table of Contents

commitments. This could have an adverse effect on our business if we were not able to replace those commitments or to locate other sources of liquidity on acceptable terms.

Domestic and foreign currency fluctuations could adversely impact our financial condition, results of operations and earnings.

Since the majority of our international operations are conducted in currencies other than the U.S. dollar (primarily the euro, Canadian dollar, Korean won, Chinese yuan, Mexican peso and Russian rouble), currency fluctuations can have a significant impact on the translation of our international revenues and earnings into U.S. dollar amounts. These amounts could be materially affected by the strengthening of the U.S. dollar, negatively impacting our results of operations, earnings and our ability to generate revenue growth. Furthermore, our products are typically sourced in U.S. dollars. As a result, the cost of these products may be affected by changes in the value of the applicable local currencies. Changes in currency exchange rates may also affect the U.S. dollar value of the foreign currency denominated prices at which our international businesses sell products. Our future financial results could be significantly affected by not only the value of the U.S. dollar in relation to the foreign currencies in which we conduct business, but also the speed at which these fluctuations occur. If the U.S. dollar strengthens relative to the respective fiscal 2018 foreign exchange rates, foreign exchange could negatively impact our revenues and operating results as well as our international cash and other balance sheet items during fiscal 2019, particularly in Canada, Europe and Mexico.

Although we hedge certain exposures to changes in foreign currency exchange rates, we cannot assure that foreign currency fluctuations will not have a material adverse effect on our financial condition or results of operations.

Furthermore, since some of our hedging activities are designed to reduce volatility of fluctuating exchange rates, they not only reduce the negative impact of a stronger U.S. dollar, but they also reduce the positive impact of a weaker U.S. dollar. In addition, while our foreign currency hedges are designed to reduce volatility over the forward contract period, these contracts can create volatility during the period. The degree to which our financial results are affected for any given time period will depend in part upon our hedging activities.

Fluctuations in the price or availability of quality raw materials and commodities could increase costs and negatively impact profitability.

The raw materials used to manufacture our merchandise are subject to availability constraints and price volatility caused by high demand for fabrics, currency fluctuations, crop yields, weather patterns, supply conditions, government regulations (including tariffs), labor conditions, energy costs, transportation or freight costs, economic climate, market speculation and other unpredictable factors. Negative trends in any of these conditions or our inability to appropriately project fabric requirements in the future could increase costs and negatively impact profitability.

We are subject to periodic litigation and other regulatory proceedings, which could result in unexpected obligations, as well as the diversion of time and resources.

We are involved from time-to-time in various U.S. and foreign lawsuits relating to our business, including purported class action lawsuits and intellectual property claims. In addition, we can be subject to regulatory scrutiny which may result in regulatory proceedings, including the current investigation by the European Commission regarding the potential breach of certain European Union competition rules by the Company. Due to the inherent uncertainties of litigation and regulatory proceedings, we cannot accurately predict the ultimate outcome of any such new or existing proceedings. Should management's evaluation of any such claims or proceedings or the likelihood of any future claims or proceedings prove incorrect, our exposure could materially exceed expectations, adversely impacting our business, financial condition and results of operations. In addition, any significant litigation or regulatory matters, regardless of the merits, could divert management's attention from our operations and result in substantial legal fees. See also "Item 3. Legal Proceedings" for further discussion of our legal matters.

We could find that we are carrying excess inventories if we fail to shorten lead-times or anticipate consumer demand, if our international vendors do not supply quality products on a timely basis, if our merchandising strategies fail or if we do not open new and remodel existing stores on schedule.

Although we have shortened lead-times for the design, production and development of a portion of our product lines, we expect to continue to place orders with our vendors for most of our products a season or more in advance. If we are

not successful in our efforts to continue to shorten lead-times or if we fail to correctly anticipate fashion

Table of Contents

trends or consumer demand, we could end up carrying excess inventories. Even if we effectively shorten lead-times and correctly anticipate consumer fashion trends and demand, our vendors could fail to supply the quality products and materials we require at the time we need them. Moreover, we could fail to effectively market or merchandise these products once we receive them. In addition, we could fail to open new or remodeled stores on schedule, and inventory purchases made in anticipation of such store openings could remain unsold. Any of the above factors could cause us to experience excess inventories, which may result in inventory write-downs and more markdowns, which in turn could have a material adverse effect on our results of operations and financial condition.

Our success depends on the strength of our relationships with our suppliers and manufacturers.

We do not own or operate any production facilities, and we depend on independent factories to supply our fabrics and to manufacture our products to our specifications. We do not have long-term contracts with any suppliers or manufacturers, and our business is dependent on our partnerships with our vendors. If manufacturing costs were to rise significantly, our product margins and results of operations could be negatively affected. In addition, very few of our vendors manufacture our products exclusively. As a result, we compete with other companies for the production capacity of independent contractors. If our vendors fail to ship our fabrics or products on time or to meet our quality standards or are unable to fill our orders, we might not be able to deliver products to our retail stores and wholesale customers on time or at all.

Moreover, our suppliers have at times been unable to deliver finished products in a timely fashion. This has led, from time-to-time, to an increase in our inventory, creating potential markdowns and a resulting decrease in our profitability. As there are a finite number of skilled manufacturers that meet our requirements, it could take significant time to identify and qualify suitable alternatives, which could result in our missing retailing seasons or our wholesale customers canceling orders, refusing to accept deliveries or requiring that we lower selling prices. Since we prefer not to return merchandise to our manufacturers, we could also have a considerable amount of unsold merchandise. Any of these problems could harm our financial condition and results of operations.

Our Americas Wholesale business is highly concentrated. If any of our large customers decrease their purchases of our products or experience financial difficulties, our results of operations and financial condition could be adversely affected.

In fiscal 2018, our two largest wholesale customers accounted for a total of approximately 2.2% of our consolidated net revenue. No other single customer or group of related customers in any of our segments accounted for more than 1.0% of our consolidated net revenue in fiscal 2018. Continued consolidation in the retail industry could further decrease the number of, or concentrate the ownership of, stores that carry our products and our licensees' products. In recent years, there has been a significant increase in the number of designer brands seeking placement in department stores, which makes any one brand potentially less attractive to department stores. If any one of our major wholesale customers decides to decrease purchases from us, to stop carrying GUESS? products or to carry our products only on terms less favorable to us, our sales and profitability could significantly decrease. Similarly, some retailers have recently experienced significant financial difficulties, which in some cases have resulted in bankruptcy, liquidation and store closures. Financial difficulties of one of our major customers could result in reduced business and higher credit risk with respect to that customer. Any of these circumstances could ultimately have a material adverse effect on our results of operations and financial condition.

Our inability to protect our reputation could have a material adverse effect on our brand.

Our ability to maintain our reputation is critical to our brand. Our reputation could be jeopardized if we or our third party providers fail to maintain high standards for merchandise quality and integrity. Any negative publicity about these types of concerns may reduce demand for our merchandise. Failure by us or our third party providers to comply with ethical, social, product, labor, health and safety or environmental standards could also jeopardize our reputation and potentially lead to various adverse consumer actions, including boycotts. With the increased proliferation of social media, public perception about our products, our stores or our brand, whether justified or not, could significantly impair our reputation, involve us in litigation, damage our brand and have a material adverse effect on our business. Failure to comply with local laws and regulations, to maintain an effective system of internal controls or to provide accurate and timely financial statement information could also hurt our reputation. Damage to our reputation or loss of

consumer confidence for any of these or other reasons could have a material adverse effect on our results of operations and financial condition, as well as require additional resources to rebuild our reputation.

Table of Contents

Since we do not control our licensees' actions and we depend on our licensees for a substantial portion of our earnings from operations, their conduct could harm our business.

We license to others the rights to produce and market certain products that are sold with our trademarks. While we retain significant control over our licensees' products and advertising, we rely on our licensees for, among other things, operational and financial control over their businesses. If the quality, focus, image or distribution of our licensed products diminish, consumer acceptance of and demand for the GUESS? brands and products could decline. This could materially and adversely affect our business and results of operations. In fiscal 2018, approximately 80% of our net royalties were derived from our top five licensed product lines. A decrease in customer demand for any of these product lines could have a material adverse effect on our results of operations and financial condition. Although we believe that in most circumstances we could replace existing licensees if necessary, our inability to do so effectively or for any period of time could adversely affect our revenues and results of operations.

We depend on our intellectual property, and our methods of protecting it may not be adequate.

Our success and competitive position depend significantly upon our trademarks and other proprietary rights. We take steps to establish and protect our trademarks worldwide. Despite any precautions we may take to protect our intellectual property, policing unauthorized use of our intellectual property is difficult, expensive and time consuming, and we may be unable to adequately protect our intellectual property or to determine the extent of any unauthorized use, particularly in those foreign countries where the laws do not protect proprietary rights as fully as in the U.S. We also place significant value on our trade dress and the overall appearance and image of our products. However, we cannot assure you that we can prevent imitation of our products by others or prevent others from seeking to block sales of GUESS? products for purported violations of their trademarks and proprietary rights. We also cannot assure you that others will not assert rights in, or ownership of, trademarks and other proprietary rights of GUESS?, that our proprietary rights would be upheld if challenged or that we would, in that event, not be prevented from using our trademarks, any of which could have a material adverse effect on our financial condition and results of operations. Further, we could incur substantial costs in legal actions relating to our use of intellectual property or the use of our intellectual property by others. Even if we are successful in such actions, the costs we incur could have a material adverse effect on us.

If we fail to successfully execute growth initiatives, including acquisitions and alliances, our business and results of operations could be harmed.

We regularly evaluate strategic acquisitions and alliances and pursue those that we believe will support and contribute to our overall growth initiatives. Our historical acquisitions include our former European jeanswear licensee in 2005, our former European licensee of children's apparel in 2008 and our former European licensee of MARCIANO apparel in 2012. In addition, we have entered into joint venture relationships with partners in Brazil, the Canary Islands, Mexico, Portugal and Russia and have been directly operating our South Korea and China businesses since 2007, our international jewelry business since 2010, our Japan business starting in 2013 and our retail businesses in Australia and Singapore since 2017.

These efforts place increased demands on our managerial, operational and administrative resources that could prevent or delay the successful opening of new stores and the identification of suitable licensee partners, adversely impact the performance of our existing stores and adversely impact our overall results of operations. In addition, acquired businesses and additional store openings may not provide us with increased business opportunities, or result in the growth that we anticipate, particularly during economic downturns. Furthermore, integrating acquired operations (including operations from existing licensees or joint venture partners) is a complex, time-consuming and expensive process. Failing to acquire and successfully integrate complementary businesses, or failing to achieve the business synergies or other anticipated benefits of acquisitions or joint ventures, could materially adversely affect our business and results of operations.

Table of Contents

We may be unsuccessful in implementing our plans to open and operate new stores, which could harm our business and negatively affect our results of operations.

New store openings have historically been an important part of the growth of our business. To open and operate new stores successfully, we must:

- identify desirable locations, the availability of which is out of our control;
- negotiate acceptable lease terms, including desired tenant improvement allowances;
- efficiently build and equip the new stores;
- source sufficient levels of inventory to meet the needs of the new stores;
- hire, train and retain competent store personnel;
- successfully integrate the new stores into our existing systems and operations; and
- satisfy the fashion preferences of customers in the new geographic areas.

Any of these challenges could delay our store openings, prevent us from completing our store opening plans or hinder the operations of stores we do open. These challenges could be even more pronounced in foreign markets, including markets where we have identified opportunities for store growth such as China, Russia and Turkey, due to unfamiliar local regulations, business conditions and other factors. Once open, we cannot be sure that our new stores will be profitable. Such things as unfavorable economic and business conditions and changing consumer preferences could also interfere with our store opening plans.

Failure to successfully develop and manage new store design concepts could adversely affect our results of operations. The introduction and growth or maintenance of new store design concepts as part of our overall growth and productivity strategies could strain our financial and management resources and is subject to a number of other risks, including customer acceptance, product differentiation, competition and maintaining desirable locations. These risks may be compounded during the current difficult economic climate or any future economic downturn. There can be no assurance that new store designs will achieve or maintain sales and profitability levels that justify the required investments. If we are unable to successfully develop new store designs, or if consumers are not receptive to the products, design layout, or visual merchandising, our results of operations and financial results could be adversely affected. In addition, the failure of new store designs to achieve acceptable results could lead to unplanned store closures and/or impairment and other charges, which could adversely affect our results of operations and ability to grow.

We may not fully realize expected cost savings and/or operating efficiencies related to restructuring plans or other cost-saving initiatives.

In fiscal 2017, we implemented a global cost reduction and restructuring plan to better align our global cost and organizational structure with our current strategic initiatives. This plan included the consolidation and streamlining of our business processes and a reduction in our global workforce and other expenses. We have forecasted cost savings from this plan, supply chain and other initiatives, based on a number of assumptions and expectations which, if achieved, would improve our profitability and cash flows from operating activities. However, there can be no assurance that the expected results will be achieved. These and any future spend reductions, if any, may negatively impact our other initiatives or our efforts to grow our business, which may negatively impact our future results of operations and increase the burden on existing management, systems and resources. In addition, these cost savings may be negated or offset by unexpected or increased costs and poorer performance in other areas of the business. Changes in subjective assumptions, estimates and judgments by management related to complex tax matters, including those resulting from regulatory reviews, could adversely affect our financial results.

We are subject to routine tax audits on various tax matters around the world in the ordinary course of business (including income tax, business tax, customs duties and Value Added Tax (“VAT”) matters). We regularly assess the adequacy of our uncertain tax positions and other reserves, which requires a significant amount of judgment. Although we accrue for uncertain tax positions and other reserves, the results of regulatory audits and negotiations with taxing and customs authorities may be in excess of our accruals, resulting in the payment of additional taxes, duties, penalties and interest. See Note 11 to the Consolidated Financial Statements for further discussion of our tax matters, including reserves for uncertain tax positions.

Table of Contents

From time-to-time, we make VAT and other tax-related refund claims with various foreign tax authorities that are audited by those authorities for compliance. Failure by these foreign governments to approve or ultimately pay these claims could have a material adverse effect on our results of operations and liquidity.

Changes in tax laws, significant shifts in the relative source of our earnings, or other unanticipated tax liabilities could adversely affect our effective income tax rate and profitability and may result in volatility in our financial results.

We are subject to income taxes in the U.S. and numerous foreign jurisdictions. Tax laws, regulations, and administrative practices in various jurisdictions may be subject to significant change. We record tax expense based on our estimate of future payments, which include reserves for uncertain tax positions in multiple tax jurisdictions and requires significant judgment in evaluating and estimating our provision and accruals. Our effective income tax rate in the future could be affected by a number of other factors, including: the outcome of income tax audits in various jurisdictions around the world, changes in our stock price, the resolution of uncertain tax positions and changes in our operating structure. We and our subsidiaries are engaged in a number of intercompany transactions across multiple tax jurisdictions. Although we believe that these transactions reflect arm's length terms and that the proper transfer pricing documentation is in place, these transfer pricing terms and conditions may be scrutinized by local tax authorities during an audit and any resulting changes may impact our mix of earnings in countries with differing statutory tax rates. In addition, the relative amount of our foreign earnings, including earnings being lower than anticipated in jurisdictions where we have lower statutory rates and higher than anticipated in jurisdictions where we have higher statutory rates, as well as losses in jurisdictions where we are unable to realize the related tax benefits, can create volatility in our effective income tax rate. Any one of these factors could adversely impact our income tax rate and our profitability and could create ongoing variability in our quarterly or annual tax rates.

In addition, a number of countries are actively discussing or making changes to their tax laws and the reporting applicable to corporate multinationals, such as the recently enacted 2017 Tax Cuts and Jobs Act in the U.S. (referred to herein as the "Tax Reform"). Foreign governments may enact laws in response to the Tax Reform that could result in further changes to global taxation and materially affect our financial position and results of operations.

The Tax Reform significantly changes how the U.S. taxes corporations and requires complex computations to be performed that were not previously required in U.S. tax law. Interpretation of the provisions of the Tax Reform require significant judgment and estimates, which the IRS and other standard-setting bodies could interpret or issue additional guidance on how provisions of the Tax Reform should be applied that is different from our interpretation. As we evaluate additional interpretation and guidance, collect and prepare necessary data and complete our analysis, we may make adjustments to the provisional amounts we have recorded during fiscal 2018 that may materially impact our provision for income taxes in the future periods in which the adjustments are made.

Future changes to U.S. tax or trade policies impacting multi-national companies could materially affect our financial condition and results of operations.

During fiscal 2018, we sourced most of our finished products with partners and suppliers outside the U.S. and we continued to design and purchase fabrics globally. In addition, over time we have increased our sales of product outside of the U.S. In fiscal 2018, approximately 69% of our consolidated net revenue was generated by sales from outside of the U.S. We anticipate that these international revenues will continue to grow as a percentage of our total business over time. The current political landscape has introduced greater uncertainty with respect to future tax and trade regulations for U.S. companies like ours with significant business and sourcing operations outside the U.S. In addition, there have been recent changes to U.S. participation in, and discussions concerning the potential renegotiation of, certain international trade agreements. We cannot predict whether, and to what extent, there may be changes to such international trade agreements or whether quotas, duties, tariffs, exchange controls or other restrictions will be changed or imposed by the U.S. or by other countries. If we or our vendors or product licensees are unable to obtain raw materials or finished goods from the countries where we or they wish to purchase them, either because of such regulatory changes or for any other reason, or if the cost of doing so should increase, it could have a material adverse effect on our results of operations and financial condition.

Table of Contents

Our business is global in scope and can be impacted by factors beyond our control.

As a result of our large and growing international operations, we face the possibility of greater losses from a number of risks inherent in doing business in international markets and from a number of factors which are beyond our control. Such factors that could harm our results of operations and financial condition include, among other things: political instability or acts of terrorism, which disrupt trade with the countries where we operate or in which our contractors, suppliers or customers are located;

recessions in foreign economies;

inflationary pressures and volatility in foreign economies;

reduced global demand resulting in the closing of manufacturing facilities;

challenges in managing broadly dispersed foreign operations;

local business practices that do not conform to legal or ethical guidelines;

adoption of additional or revised quotas, restrictions or regulations relating to imports or exports;

additional or increased customs duties, tariffs, taxes and other charges on imports or exports;

anti-American sentiment in foreign countries where we operate resulting from actual or proposed changes to U.S.

immigration and travel policies or other factors;

delays in receipts due to our distribution centers as a result of labor unrest, increasing security requirements or other factors at U.S. or other ports;

- significant fluctuations in the value of the dollar against foreign currencies;

increased difficulty in protecting our intellectual property rights in foreign jurisdictions;

social, labor, legal or economic instability in the foreign markets in which we do business, which could influence our ability to sell our products in, or distribute our products from, these international markets;

restrictions on the transfer of funds between the U.S. and foreign jurisdictions;

our ability and the ability of our international retail store licensees, distributors and joint venture partners to locate and continue to open desirable new retail locations; and

natural disasters in areas in which our contractors, suppliers, or customers are located.

Further, our international presence means that we are subject to certain U.S. laws, including the Foreign Corrupt Practices Act, as well as the laws of the foreign countries in which we operate, including data privacy laws. If any of our international operations, or our employees or agents, violates such laws, we could become subject to sanctions or other penalties that could negatively affect our reputation, business and operating results.

Violation of laws or regulations, or changes to existing laws or regulations could adversely affect our business, reputation and results of operations.

We are subject to numerous laws and regulations at the state, federal and international levels, including, but not limited to, the areas of health care, taxes, transportation and logistics, data privacy, the environment, trade, conflict minerals, product safety, employment and labor, advertising and pricing practices, consumer protection, e-commerce, anti-competition, anti-corruption and intellectual property. Compliance with these numerous laws and regulations is complicated, time consuming and expensive. In addition, the laws may be inconsistent from jurisdiction to jurisdiction and are subject to change from time to time, sometimes unexpectedly. Failure to comply or to effectively anticipate changes in such laws or regulations could have a material adverse effect on our business, reputation and results of operations.

Violation of labor, environmental and other laws and practices by our licensees or suppliers could harm our business. We require our licensing partners and suppliers to operate in compliance with applicable laws and regulations. While our internal and vendor operating guidelines, code of conduct and monitoring programs promote ethical business practices and compliance with laws, we do not control our licensees or suppliers or their labor, environmental, safety or other business practices. The violation of labor, environmental, safety or other laws by any of our licensees or suppliers, or divergence of a licensee's or supplier's business practices or social responsibility standards from ours or from those generally accepted as ethical in the U.S., could interrupt or otherwise disrupt the shipment of our products, harm the value of our trademarks, damage our reputation or expose us to potential liability for their wrongdoings.

Table of Contents

Our business could suffer if our computer systems and websites are disrupted or cease to operate effectively. The efficient operation of our business is very dependent on our computer and information systems. In particular, we rely heavily on our merchandise management and ERP systems used to track sales and inventory and manage our supply chain. In addition, we have e-commerce and other Internet websites worldwide. Given the complexity of our business and the significant number of transactions that we engage in on an annual basis, it is imperative that we maintain constant operation of our computer hardware and software systems. Despite our preventative efforts, our systems are vulnerable from time-to-time to damage or interruption from, among other things, ineffective upgrades or support from third party vendors, difficulties in replacing or integrating new systems, security breaches, computer viruses, natural disasters and power outages. Any such problems or interruptions could result in incorrect information being supplied to management, inefficient ordering and replenishment of products, loss of orders (including e-commerce orders), significant expenditures, disruption of our operations, inability to produce accurate financial statements, and other adverse impacts to our business.

A data privacy breach or failure to comply with data privacy laws could damage our reputation and customer relationships, expose us to litigation risk and potential fines and adversely affect our business.

As part of our normal operations, we collect, process, transmit and where appropriate, retain certain sensitive and confidential employee and customer information, including credit card information. There is significant concern by consumers and employees over the security of personal information, consumer identity theft and user privacy. Despite the security measures we have in place, our facilities and systems, and those of our third party service providers, may be vulnerable to security breaches, cyber-attacks, acts of vandalism, computer viruses, misplaced or lost data, programming and/or human errors, or other similar events. As a result of recent security breaches at a number of prominent retailers, the media and public scrutiny of information security and privacy has become more intense and the regulatory environment has become more uncertain. Any security breach involving the misappropriation, loss or other unauthorized disclosure of confidential information, whether by us or our vendors, could result in significant legal and remediation expenses, severely damage our reputation and our customer relationships, harm sales, expose us to risks of litigation and liability and result in a material adverse effect on our business, financial condition and results of operations. Additionally, changing privacy laws in the United States, Europe and elsewhere, including the adoption by the European Union of the General Data Protection Regulation (“GDPR”), which becomes effective May 2018, creates new individual privacy rights and imposes increased obligations on companies handling personal data. Consequently, we may incur significant costs related to prevention and to comply with laws regarding the protection and unauthorized disclosure of personal information. A failure to comply with the stringent rules of the GDPR could result in fines of up to €20 million.

A significant disruption at any of our distribution facilities could have a material adverse impact on our sales and operating results.

Our U.S. business relies primarily on a single distribution center located in Louisville, Kentucky to receive, store and distribute merchandise to all of our U.S. retail stores, wholesale customers and e-commerce customers. Distribution of our products in Canada is handled primarily from two distribution centers in Montreal, Quebec. Distribution of our products in Europe has been handled primarily through a third party distribution center in Piacenza, Italy. During fiscal 2018, the Company began relocating its European distribution center from its Italy location to a new facility located in Venlo, Netherlands. The Company expects to complete its transition to the new distribution center in the Netherlands during fiscal 2019. Additionally, we utilize several third party operated distribution warehouses that service the Asia region. Any significant interruption in the operation of any of our distribution centers due to natural disasters, weather conditions, accidents, system failures, capacity issues, labor issues, relationships with our third party warehouse operators or landlords, failure to successfully complete or delays in transitioning to new facilities, new providers, and/or new distribution systems or other unforeseen causes could have a material adverse effect on our ability to replace inventory and fill orders (including e-commerce orders), negatively impacting our sales, operating results and customer relations.

Failure to deliver merchandise timely to our distribution facilities and to our stores and wholesale customers could lead to disruptions to our business.

The efficient operation of our global retail and wholesale businesses depends on the timely importation and customs clearance, as well as receipt of merchandise to and from our regional distribution centers. We receive

Table of Contents

merchandise at our distribution facilities and deliver merchandise to our stores and wholesale customers using independent third parties who import as well as transport goods. The independent third parties and other entities which they rely on have employees which may be represented by labor unions. Disruptions in the delivery of merchandise caused by importation delays or work stoppages by employees or contractors of any of these or other third parties could delay the timely receipt of merchandise. There can be no assurance that such stoppages, delays or disruptions will not occur in the future. Any failure by a third party to respond adequately to our distribution needs could disrupt our operations and negatively impact our financial condition or results of operations.

Abnormally harsh or unseasonable weather conditions could have a material adverse impact on our sales, inventory levels and operating results.

Extreme weather conditions in areas in which our retail stores and wholesale doors are located, particularly in markets where we have a concentration of locations, could adversely affect our business. For example, heavy snowfall, rainfall or other extreme weather conditions over a prolonged period might make it difficult for our customers to travel to our stores and thereby reduce our sales and profitability. Our business is also susceptible to unseasonable weather conditions. For example, extended periods of unseasonably warm temperatures during the winter season or cool weather during the summer season could render a portion of our inventory incompatible with those unseasonable conditions. Reduced sales from extreme or prolonged unseasonable weather conditions could have a material adverse effect on our results of operations, financial condition and cash flows.

Our results of operations could be affected by natural events in the locations in which we or our customers or suppliers operate.

Our corporate headquarters, as well as other key operational locations, including retail, distribution and warehousing facilities, are located in areas that are subject to natural disasters such as severe weather and geological events that could disrupt our operations. Many of our suppliers and customers also have operations in these locations. The occurrence of such natural events may result in sudden disruptions in business conditions of the local economies affected, as well as of the regional and global economies. Such disruptions could result in decreased demand for our products and disruptions in our management functions, sales channels and manufacturing and distribution networks, which could have a material adverse effect on our business, financial condition and results of operations.

Our Chairman Emeritus and our Executive Chairman and Chief Creative Officer own a significant percentage of our common stock. Their interests may differ from the interests of our other stockholders.

Maurice Marciano, our Chairman Emeritus and Board member, and Paul Marciano, our Executive Chairman, Chief Creative Officer and Board member, collectively beneficially own approximately 29% of our outstanding shares of common stock. The sale or prospect of the sale of a substantial number of these shares could have an adverse impact on the market price of our common stock. Moreover, these individuals may have different interests than our other stockholders and, accordingly, they may direct the operations of our business in a manner contrary to the interests of our other stockholders. As long as these individuals own a significant percentage of our common stock, they may effectively be able to:

- elect our directors;
- amend or prevent amendment of our Restated Certificate of Incorporation or Bylaws;
- effect or prevent a merger, sale and/or purchase of assets or other corporate transactions; and
- control the outcome of any other matter submitted to our stockholders for vote.

Their stock ownership, together with the anti-takeover effects of certain provisions of applicable Delaware law and our Restated Certificate of Incorporation and Bylaws, may discourage acquisition bids or allow the Marcianos to delay or prevent a change in control that may be favored by our other stockholders, which in turn could reduce our stock price or prevent our stockholders from realizing a premium over our common stock price.

Our failure to retain our existing senior management team or to retain or attract other key personnel could adversely affect our business.

Our business requires disciplined execution at all levels of our organization in order to ensure the timely delivery of desirable merchandise in appropriate quantities to our stores and other customers. This execution requires experienced and talented management in various areas of our business including: advertising, design, finance, merchandising,

operations, and production. Our success depends upon the personal efforts and abilities of our senior

Table of Contents

management, particularly Victor Herrero, our Chief Executive Officer, Paul Marciano, our Executive Chairman and Chief Creative Officer, and other key personnel. Although we believe we have a strong management team with relevant industry expertise, the extended loss of the services of these or other key personnel and failure to effectively identify and attract suitable successors could materially harm our business.

A committee of the Board of Directors is conducting an investigation of allegations of improper conduct against Paul Marciano, our Executive Chairman and Chief Creative Officer.

As disclosed on February 9, 2018, Guess?, Inc., is investigating allegations of improper conduct against Paul Marciano, our Executive Chairman and Chief Creative Officer. The investigation is being continued and completed solely by Glaser Weil LLP as independent counsel on behalf of a Special Committee of the Board of Directors.

Commencing on February 20, 2018, Mr. Marciano relinquished his day-to-day responsibilities to the Company, on an unpaid basis with the agreement of the Board of Directors. Although we believe we have a strong management team with relevant industry expertise, the extended loss of the services of Mr. Marciano and failure to effectively identify and attract a suitable successor could materially harm our business.

Fluctuations in quarterly performance including comparable store sales, sales per square foot, operating margins, timing of wholesale orders, royalty net revenue or other factors could have a material adverse effect on our earnings and our stock price.

Our quarterly results of operations for each of our business segments have fluctuated in the past and can be expected to fluctuate in the future. Further, if our international retail store expansion plans or anticipated closure of retail stores and other productivity initiatives in the Americas fail to meet our expected results, our overhead and other related expansion costs would increase without an offsetting increase in sales and net revenue. This could have a material adverse effect on our results of operations and financial condition, including but not limited to future impairments of store assets or goodwill.

Our net revenue and operating results have historically been lower in the first half of our fiscal year due to general seasonal trends in the apparel and retail industries. Our comparable store sales, quarterly results of operations and stock price can also be affected by a variety of other factors, including:

- shifts in consumer tastes and fashion trends;
- the timing of new store openings and the relative proportion of new stores to mature stores;
- the timing and effectiveness of planned store closures in North America;
- calendar shifts of holiday or seasonal periods;
- the timing of seasonal wholesale shipments;
- the effectiveness of our inventory management;
- changes in our merchandise mix;
- changes in our mix of revenues by segment;
- the timing of promotional events;
- actions by competitors;
- weather conditions;
- changes in the business environment;
- inflationary changes in prices and costs;
- changes in the payment of future cash dividends;
- changes in currency exchange rates;
- population trends;
- changes in patterns of commerce such as the expansion of e-commerce;
- the level of pre-operating expenses associated with new stores; and
- volatility in securities' markets which could impact the value of our investments in non-operating assets.

An unfavorable change in any of the above factors could have a material adverse effect on our results of operations and our stock price.

ITEM 1B. Unresolved Staff Comments.

Table of Contents

ITEM 2. Properties.

As of February 3, 2018, all of our principal facilities were leased with the exception of our U.S. distribution center based in Louisville, Kentucky and our administrative office based in Florence, Italy. Certain information concerning our principal facilities is set forth below:

Location	Use	Approximate Area in Square Feet
Los Angeles, California	Principal executive and administrative offices, design facilities, sales offices, warehouse facilities and sourcing used by our Americas Wholesale, Americas Retail, Corporate and Licensing support groups	341,700
Louisville, Kentucky	Distribution and warehousing facility used by our Americas Wholesale and Americas Retail segments	506,000
New York, New York	Administrative and sales offices, public relations and showrooms used by our Americas Wholesale segment	13,400
Montreal/Toronto/Vancouver, Canada	Administrative offices, showrooms and warehouse facilities used by our Americas Wholesale and Americas Retail segments	203,100
São Paulo, Brazil	Administrative office and showroom used by our Americas Wholesale and Americas Retail segments	4,000
Lugano/Stabio, Switzerland	Administrative, sales and marketing offices, design facilities and showrooms used by our Europe segment	120,700
Venlo, Netherlands	Distribution and warehousing facility used by all of our segments.	658,200
Paris, France	Administrative office and showroom used by our Europe segment	16,000
Dusseldorf/Munich, Germany	Administrative office and showrooms used by our Europe segment	14,800
Florence, Italy	Administrative office used by our Europe segment	114,800
Warsaw, Poland	Administrative office and showrooms used by our Europe segment	12,400
Lisbon, Portugal	Showroom used by our Europe segment	6,000
Moscow, Russia	Administrative office and showroom used by our Europe segment	6,500
Barcelona, Spain	Administrative office and showroom used by our Europe segment	8,600
Istanbul, Turkey	Administrative office used by our Europe segment	4,200
Shanghai, China	Administrative offices used by our Asia segment	17,800
Kowloon, Hong Kong	Administrative and sales office, showroom and licensing coordination facilities used primarily by our Asia segment	13,100
Seoul, South Korea	Administrative and sales offices, design facilities and showrooms used by our Asia segment	45,100
Tokyo, Japan	Administrative and sales offices and showroom used by our Asia segment	5,100

Our corporate, wholesale and retail headquarters and certain warehouse facilities are located in Los Angeles, California, consisting of four buildings totaling approximately 341,700 square feet. These facilities are leased by us from limited partnerships in which the sole partners are trusts controlled by and for the benefit of Maurice Marciano and Paul Marciano (the "Principal Stockholders") and their families pursuant to a lease that expires in July 2020. The total lease payments related to these facilities are approximately \$0.3 million per month with aggregate minimum lease commitments through the term of the lease totaling approximately \$7.8 million as of February 3, 2018.

Table of Contents

In addition, the Company, through a wholly-owned Canadian subsidiary, leases warehouse and administrative facilities in Montreal, Quebec from a partnership affiliated with the Principal Stockholders. During fiscal 2018, the Company exercised an option to extend the lease term for an additional one-year period ending in December 2018. All other terms of the existing lease remain in full force and effect. The monthly lease payment is \$42,000 Canadian (US\$33,800) with aggregate minimum lease commitments through the term of the lease totaling approximately \$0.5 million Canadian (US\$0.4 million) as of February 3, 2018.

The Company, through a French subsidiary, leases a showroom and office space located in Paris, France from an entity that is owned in part by an affiliate of the Principal Stockholders. The lease expires in May 2020. Due to excess capacity, the lease was amended to reduce the square footage by approximately 5,100 square feet to 16,000 square feet during fiscal 2018. The amendment also provided for a corresponding reduction in aggregate rent, common area maintenance charges and property tax expense due to the lower square footage. All other terms of the existing lease remain in full force and effect. The aggregate minimum lease commitments through the term of the lease totaled approximately €1.6 million (US\$2.1 million) as of February 3, 2018.

See Note 13 to the Consolidated Financial Statements for further information regarding related party transactions. Our U.S. distribution center is a fully automated facility based in Louisville, Kentucky. During fiscal 2016, the Company purchased this facility for approximately \$28.8 million. In February 2016, the Company entered into a ten-year \$21.5 million real estate secured loan to partially finance this purchase.

Distribution of our products in Canada is handled primarily from two leased facilities based in Montreal, Quebec. Distribution of our products in Europe has been handled primarily through a third party distribution center in Piacenza, Italy. During fiscal 2018, the Company began relocating its European distribution center from its Italy location to a new facility located in Venlo, Netherlands. The Company expects to complete its transition to the new distribution center in the Netherlands during fiscal 2019. Additionally, we utilize several third party operated distribution warehouses that service the Asia region.

We lease our showrooms, advertising, licensing, sales and merchandising offices, remote distribution and warehousing facilities and retail and factory outlet store locations under non-cancelable operating lease agreements expiring on various dates through October 2037. These facilities, located mainly in the Americas but with a growing presence in Europe and Asia, had aggregate real estate minimum lease commitments as of February 3, 2018 totaling approximately \$971.3 million, excluding related party commitments.

The terms of our store and concession leases, excluding renewal options and kick-out clauses, as of February 3, 2018, expire as follows:

Years Lease Terms Expire	Number of Stores and Concessions		
	Americas	Europe	Asia
Fiscal 2019-2021	283	124	252
Fiscal 2022-2024	116	144	57
Fiscal 2025-2027	73	99	18
Fiscal 2028-2030	9	57	7
Thereafter	—	9	—
	481	433	334

We believe our existing facilities are well maintained, in good operating condition and are adequate to support our present level of operations. See Note 14 to the Consolidated Financial Statements for further information regarding current lease obligations.

ITEM 3. Legal Proceedings.

On May 6, 2009, Gucci America, Inc. filed a complaint in the U.S. District Court for the Southern District of New York against Guess?, Inc. and certain third party licensees for the Company asserting, among other things, trademark and trade dress law violations and unfair competition. The complaint sought injunctive relief, compensatory damages, including treble damages, and certain other relief. Complaints similar to those in the above action have

Table of Contents

also been filed by Gucci entities against the Company and certain of its subsidiaries in the Court of Milan, Italy, the Intermediate People's Court of Nanjing, China and the Court of Paris, France. The three-week bench trial in the U.S. matter concluded on April 19, 2012, with the court issuing a preliminary ruling on May 21, 2012 and a final ruling on July 19, 2012. Although the plaintiff was seeking compensation in the U.S. matter in the form of damages of \$26 million and an accounting of profits of \$99 million, the final ruling provided for monetary damages of \$2.3 million against the Company and \$2.3 million against certain of its licensees. The court also granted narrow injunctions in favor of the plaintiff for certain of the claimed infringements. On August 20, 2012, the appeal period expired without any party having filed an appeal, rendering the judgment final. On May 2, 2013, the Court of Milan ruled in favor of the Company in the Milan, Italy matter. In the ruling, the Court rejected all of the plaintiff's claims and ordered the cancellation of three of the plaintiff's Italian and four of the plaintiff's European Community trademark registrations. On June 10, 2013, the plaintiff appealed the Court's ruling in the Milan matter. On September 15, 2014, the Court of Appeal of Milan affirmed the majority of the lower Court's ruling in favor of the Company, but overturned the lower Court's finding with respect to an unfair competition claim. That portion of the matter is now in a damages phase based on the ruling. On October 16, 2015, the plaintiff appealed the remainder of the Court of Appeal of Milan's ruling in favor of the Company to the Italian Supreme Court of Cassation. In the China matter, the Intermediate People's Court of Nanjing, China issued a ruling on November 8, 2013 granting an injunction in favor of the plaintiff for certain of the claimed infringements on handbags and small leather goods and awarding the plaintiff statutory damages in the amount of approximately \$80,000. The Company strongly disagreed with the Court's decision and appealed the ruling. On August 31, 2016, the Court of Appeal for the China matter issued a decision in favor of the Company, rejecting all of the plaintiff's claims. In March 2017, the plaintiff petitioned the China Supreme Court for a retrial of the matter. On January 30, 2015, the Court of Paris ruled in favor of the Company in the France matter, rejecting all of the plaintiff's claims and partially canceling two of the plaintiff's community trademark registrations and one of the plaintiff's international trademark registrations. On February 17, 2015, the plaintiff appealed the Court of Paris' ruling. Although the Company believes that it has a strong position with respect to each of the remaining matters, it is unable to predict with certainty whether or not these efforts will ultimately be successful or whether the outcomes will have a material impact on the Company's financial position or results of operations. The parties are currently engaged in settlement discussions with respect to the remaining matters.

The Company has received customs tax assessment notices from the Italian Customs Agency regarding its customs tax audit of one of the Company's European subsidiaries for the period from July 2010 through December 2012. Such assessments totaled €9.8 million (\$12.2 million), including potential penalties and interest. The Company strongly disagrees with the positions that the Italian Customs Agency has taken and therefore filed appeals with the Milan First Degree Tax Court ("MFDTC"). In May 2015, the MFDTC issued a judgment in favor of the Company in relation to the first set of appeals (covering the period through September 2010) and canceled the related assessments totaling €1.7 million (\$2.1 million). In November 2015, the Italian Customs Agency notified the Company of its intent to appeal this first MFDTC judgment. During fiscal 2017, the Appeals Court ruled in favor of the Company and rejected the appeal by the Italian Customs Agency on the first MFDTC judgment. During fiscal 2017, the MFDTC also issued judgments in favor of the Company in relation to the second through seventh set of appeals (covering the period from October 2010 through December 2012) and canceled the related assessments totaling €8.1 million (\$10.1 million). Subsequently, the Italian Customs Agency has appealed the majority of these favorable MFDTC judgments, as well as certain of the Appeals Court judgments. While these MFDTC judgments have been favorable to the Company, there can be no assurances that the Italian Customs Agency will not be successful in its remaining appeals. It also continues to be possible that the Company will receive similar or even larger assessments for periods subsequent to December 2012 or other claims or charges related to the matter in the future. Although the Company believes that it has a strong position and will continue to vigorously defend this matter, it is unable to predict with certainty whether or not these efforts will ultimately be successful or whether the outcome will have a material impact on the Company's financial position or results of operations.

On June 6, 2017, the European Commission notified the Company that it has initiated proceedings to investigate whether certain of the Company's practices and agreements concerning the distribution of apparel and accessories

within the European Union breach European Union competition rules related to cross-border transactions, internet sales limitations and resale price restrictions. The initiation of the proceedings does not mean that the European Commission has made a definitive conclusion regarding whether the Company breached any rules. The Company has cooperated and plans to continue to cooperate with the European Commission, including through responses to

Table of Contents

requests for information and through changes to certain business practices and agreements, as appropriate. If a violation is ultimately found, a broad range of remedies is potentially available to the European Commission, including imposing a fine and/or injunctive relief prohibiting or restricting certain business practices. As of November 6, 2017, the Company and the European Commission agreed to begin a settlement discussion process to determine if the parties can mutually agree on an outcome of the proceedings. Those discussions are still ongoing. At this point, the Company is unable to predict the timing or outcome of these proceedings, including the magnitude of any potential fine. However, the Company does not currently believe that any changes to its business practices or agreements made in connection with this proceeding will have a material impact on its ongoing business operations within the European Union.

The Company is also involved in various other claims and other matters incidental to the Company's business, the resolutions of which are not expected to have a material adverse effect on the Company's financial position or results of operations.

PART II

ITEM 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Since August 8, 1996, the Company's common stock has been listed on the New York Stock Exchange under the symbol 'GES.' The following table sets forth, for the periods indicated, the high and low sales prices per common share of the Company's common stock, and the dividends paid with respect thereto:

	Market Price		Dividends Declared and Paid
	High	Low	
Fiscal year ended January 28, 2017			
First Quarter Ended April 30, 2016	\$22.50	\$16.70	\$ 0.225
Second Quarter Ended July 30, 2016	18.28	14.23	0.225
Third Quarter Ended October 29, 2016	18.20	13.38	0.225
Fourth Quarter Ended January 28, 2017	16.39	11.95	0.225
Fiscal year ended February 3, 2018			
First Quarter Ended April 29, 2017	\$13.66	\$10.50	\$ 0.225
Second Quarter Ended July 29, 2017	13.12	9.70	0.225
Third Quarter Ended October 28, 2017	17.44	12.22	0.225
Fourth Quarter Ended February 3, 2018	19.39	14.61	0.225

On March 26, 2018, the closing sales price per share of the Company's common stock, as reported on the New York Stock Exchange Composite Tape, was \$21.57. On March 26, 2018, there were 267 holders of record of the Company's common stock.

Prior to the initiation of a quarterly dividend on February 12, 2007, the Company had not declared any dividends on our common stock since our initial public offering in 1996. The payment of cash dividends in the future will be at the discretion of our Board of Directors and will be based upon a number of business, legal and other considerations, including our cash flow from operations, capital expenditures, debt service and covenant requirements, cash paid for income taxes, earnings, share repurchases, economic conditions and U.S. and global liquidity. On March 21, 2018, the Company announced a regular quarterly cash dividend of \$0.225 per share on the Company's common stock.

Performance Graph

The Stock Price Performance Graph below compares the cumulative stockholder return of the Company with that of the S&P 500 Index (a broad equity market index) and the S&P 1500 Apparel Retail Index (a published industry index) over the five fiscal year period beginning February 2, 2013. The return on investment is calculated based on an investment of \$100 on February 2, 2013, with dividends, if any, reinvested. Past performance is not necessarily indicative of future performance.

Repurchase program (1)	1,946,420	\$ 16.08	1,946,420	
Employee transactions (2)	130,933	\$ 16.52	—	

On June 26, 2012, the Company's Board of Directors authorized a program to repurchase, from time-to-time and as market and business conditions warrant, up to \$500 million of the Company's common stock. Repurchases under (1) the program may be made on the open market or in privately negotiated transactions, pursuant to Rule 10b5-1 trading plans or other available means. There is no minimum or maximum number of shares to be repurchased under the program, which may be discontinued at any time, without prior notice.

Consists of shares surrendered to, or withheld by, the Company in satisfaction of employee tax withholding (2) obligations that occur upon vesting of restricted stock awards/units granted under the Company's 2004 Equity Incentive Plan, as amended.

The Company operates on a 52/53-week fiscal year calendar, which ends on the Saturday nearest to January 31 of (1) each year. The results for fiscal 2018 included the impact of an additional week which occurred during the fourth quarter ended February 3, 2018.

During the fourth quarter of fiscal 2018, the Company reclassified net royalties received on the Company's inventory purchases of licensed product from net revenue to cost of product sales. Accordingly, prior period amounts related to net royalties, net revenue and cost of product sales have been adjusted to conform to the current period presentation. This resulted in a decrease to net revenue and cost of product sales of \$18.9 million, \$19.8 (2) million, \$22.2 million and \$24.0 million during fiscal 2017, fiscal 2016, fiscal 2015 and fiscal 2014, respectively. This reclassification had no impact on previously reported earnings from operations, net earnings attributable to Guess?, Inc. or net earnings per share. Refer to Note 1 to the Consolidated Financial Statements for further information regarding this reclassification.

During fiscal 2018, the Company incurred net losses on lease terminations of \$11.4 million related primarily to the modification of certain lease agreements held with a common landlord in North America. During fiscal 2017, fiscal (3) 2016 and fiscal 2015, the Company recorded net gains on lease terminations of \$0.7 million, \$2.3 million and \$3.8 million, respectively, related primarily to the early termination of certain lease agreements in Europe. There were no net gains (losses) on lease terminations during fiscal 2014.

Table of Contents

During each of the years presented, the Company recognized asset impairment charges for certain retail locations resulting from under-performance and expected store closures. Asset impairment charges recognized were (4) approximately \$8.5 million in fiscal 2018, \$34.4 million in fiscal 2017, \$2.3 million in fiscal 2016, \$24.8 million in fiscal 2015 and \$8.8 million in fiscal 2014. Refer to Note 5 to the Consolidated Financial Statements for further detail.

During fiscal 2017, the Company incurred restructuring charges of \$6.1 million. During fiscal 2014, the Company (5) incurred restructuring charges of \$12.4 million. Refer to Note 9 to the Consolidated Financial Statements for further detail.

During fiscal 2018, the Company recognized additional tax expense of \$47.9 million related to the enactment of the Tax Reform. This is comprised of a \$24.9 million charge for the provisional re-measurement of certain deferred taxes and related amounts and a provisional charge of \$23.0 million to income tax expense for the estimated effects of the transitional tax on the deemed repatriation of foreign earnings. During fiscal 2017, the Company recorded (6) valuation reserves of \$6.8 million resulting from jurisdictions where there have been cumulative net operating losses, limiting the Company's ability to consider other subjective evidence to continue to recognize the existing deferred tax assets. During fiscal 2017, the Company also recorded an estimated exit tax charge of \$1.9 million related to the Company's reorganization in Europe as a result of its global cost reduction and restructuring plan. Refer to Note 11 to the Consolidated Financial Statements for further detail.

During fiscal 2017, the Company sold its minority interest equity holding in a privately-held boutique apparel (7) company for net proceeds of approximately \$34.8 million, which resulted in a gain of approximately \$22.3 million which was recorded in other income.

In November 2015, authoritative guidance was issued which simplifies the presentation of deferred income taxes (8) by requiring that all deferred tax liabilities and assets be classified as long-term on the balance sheet. The Company adopted this guidance during the fourth quarter of fiscal 2016 and has applied it retrospectively to all periods presented herein.

ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

General

Unless the context indicates otherwise, when we refer to "we," "us," "our" or the "Company" in this Form 10 K, we are referring to Guess?, Inc. and its subsidiaries on a consolidated basis.

Business Segments

The Company's businesses are grouped into five reportable segments for management and internal financial reporting purposes: Americas Retail, Americas Wholesale, Europe, Asia and Licensing. During fiscal 2018, net revenue and related costs and expenses for certain globally serviced customers were reclassified into the segment primarily responsible for the relationship. During fiscal 2018, segment results were also adjusted to exclude corporate performance-based compensation costs, net gains (losses) on lease terminations and asset impairment charges due to the fact that these items are no longer included in the segment results provided to the Company's chief operating decision maker in order to allocate resources and assess performance. Accordingly, segment results have been adjusted for fiscal 2017 and fiscal 2016 to conform to the current period presentation. Management evaluates segment performance based primarily on revenues and earnings (loss) from operations before corporate performance-based compensation costs, net gains (losses) from lease terminations, asset impairment charges and restructuring charges, if any. The Americas Retail segment includes the Company's retail and e-commerce operations in North and Central America and its retail operations in South America. The Americas Wholesale segment includes the Company's wholesale operations in the Americas. The Europe segment includes the Company's retail, e-commerce and wholesale operations in Europe and the Middle East. The Asia segment includes the Company's retail, e-commerce and wholesale operations in Asia and the Pacific. The Licensing segment includes the worldwide licensing operations of the Company. The business segment operating results exclude corporate overhead costs, which consist of shared costs of the organization, net gains (losses) on lease terminations, asset impairment charges and restructuring charges. Corporate overhead costs are presented separately and generally include, among other things, the following unallocated corporate costs: accounting and finance, executive compensation, corporate performance-based

compensation, facilities, global advertising and marketing, human resources, information technology and legal. Information regarding these segments is summarized in Note 17 to the Consolidated Financial Statements.

Table of Contents

Products

We derive our net revenue from the sale of GUESS?, G by GUESS, GUESS Kids and MARCIANO apparel and our licensees' products through our worldwide network of directly operated and licensed retail stores, wholesale customers and distributors, as well as our online sites. We also derive royalty revenue from worldwide licensing activities.

Foreign Currency Volatility

Since the majority of our international operations are conducted in currencies other than the U.S. dollar (primarily the euro, Canadian dollar, Korean won, Chinese yuan, Mexican peso and Russian rouble), currency fluctuations can have a significant impact on the translation of our international revenues and earnings into U.S. dollar amounts.

In addition, some of our transactions that occur primarily in Europe, Canada, South Korea, China and Mexico are denominated in U.S. dollars, Swiss francs, British pounds and Russian roubles, exposing them to exchange rate fluctuations when these transactions (such as inventory purchases) are converted to their functional currencies. As a result, fluctuations in exchange rates can impact the operating margins of our foreign operations and reported earnings (loss), largely dependent on the transaction timing and magnitude during the period that the currency fluctuates. When these foreign exchange rates weaken versus the U.S. dollar at the time U.S. dollar denominated inventory is purchased relative to the purchases of the comparable period, our product margins could be unfavorably impacted if the relative sales prices do not change.

During fiscal 2018, the average U.S. dollar rate was weaker against the Canadian dollar, the euro, the Korean won, the Mexican peso and the Russian rouble and stronger against the Chinese yuan compared to the average rate in fiscal 2017. This had an overall favorable impact on the translation of our international revenues and earnings from operations during fiscal 2018 compared to the prior year.

If the U.S. dollar strengthens relative to the respective fiscal 2018 foreign exchange rates, foreign exchange could negatively impact our revenues and operating results as well as our international cash and other balance sheet items during fiscal 2019, particularly in Canada, Europe and Mexico. Alternatively, if the U.S. dollar weakens relative to the respective fiscal 2018 foreign exchange rates, our revenues and operating results as well as our other cash balance sheet items could be positively impacted by foreign currency fluctuations during fiscal 2019, particularly in these regions.

The Company enters into derivative financial instruments to offset some but not all of the exchange risk on foreign currency transactions. For additional discussion regarding our exposure to foreign currency risk, forward contracts designated as hedging instruments and forward contracts not designated as hedging instruments, refer to "Item 7A. Quantitative and Qualitative Disclosures About Market Risk."

Strategy

The Company continues to remain focused on its five top strategic initiatives aimed at driving shareholder value, including: (i) elevating the quality of our sales organization and merchandising strategy to match the quality of our product and marketing; (ii) building a major business in Asia by unlocking the potential of the GUESS? brand in the region; (iii) creating a culture of purpose and accountability throughout the entire Company by implementing a more centralized organizational structure that reinforces our focus on sales and profitability; (iv) improving our cost structure (including supply chain and overhead); and (v) stabilizing and revitalizing our wholesale business. The following provides further details on the progress of these initiatives:

Sales Organization and Merchandising Strategy. We are executing on our plan to elevate the quality of our sales organization and merchandising strategy which includes: (1) elevating the product knowledge of our sales force; (2) building a more strategic and operational online organization in order to increase millennials' engagement with our brand through digital marketing and social media; (3) taking steps such as investing in key stores and developing stronger replenishment, visual, stockroom and cost-control standards in order to improve our overall field and store structure; (4) implementing a more effective yearly retail calendar to better enable each store to fully capture local opportunities; (5) using feedback from our sales force to improve our collections and increase the number and effectiveness of our SKU's; and (6) implementing a global pricing system with greater clarity and simplicity.

Table of Contents

Building our Asia Business. We believe there continues to be significant potential in this region, particularly in mainland China, and plan to continue to allocate sufficient resources to fuel future growth.

Transforming our Company's Culture. In order to generate global synergies, major decisions (including supply chain, technology, finance, stock allocation and communications) are becoming more centralized in the Company's management team in Los Angeles. This centralized approach reinforces our focus on sales and profitability and fosters an environment of accountability and execution measured through key performance metrics.

Improving our Cost Structure. We plan to continue improving our cost structure by identifying synergies among departments and strengthening our supply chain. We are executing on the following supply chain initiatives to drive improvements in product costs: (i) developing a sourcing network in new territories that can offer better costs; (ii) consolidating and building strategic partnerships with high-quality suppliers to gain scale efficiencies; and (iii) implementing a global fabric platforming process for each of the regional design offices to develop and utilize common fabrics across multiple styles creating a consistently high quality global offer for our wholesale and retail customers. We are also working to shorten our lead times through partnering with our suppliers, exercising agility in the production process and continuously searching for new suppliers and sourcing opportunities in reaction to the latest trends.

We are also focused on improving the profitability of our retail business in the Americas. As almost two-thirds our leases in Americas Retail are up for renewal or have lease exit options over the next three years, we continue to have the flexibility to further optimize our retail footprint, as appropriate, in the coming years. However, we are not restricting ourselves to waiting for these dates to close stores or renegotiate rents. For example, during fiscal 2018, we modified certain of our leases held with a common landlord that had original lease end dates from fiscal 2018 to fiscal 2026 to now end in fiscal 2018 through fiscal 2020, in order to accelerate the reduction of our retail store footprint in North America.

Stabilizing our Wholesale Business. We are partnering with our wholesale customers to emphasize a retail-oriented mindset and encourage the adoption of best practices, including high quality visual merchandising, frequent rotation of products and maximization of inventory turns.

Capital Allocation

The Company's investments in capital for the full fiscal year 2019 are planned between \$85 million and \$95 million. The planned investments in capital are primarily related to retail and e-commerce expansion in Europe and Asia as well as continued investments in technology to support our long-term growth plans.

Comparable Store Sales

The Company reports National Retail Federation calendar comparable store sales on a quarterly basis for our retail businesses which include the combined results from our brick-and-mortar retail stores and our e-commerce sites. We also separately report the impact of e-commerce sales on our comparable store sales metric. As a result of our omni-channel strategy, our e-commerce business has become strongly intertwined with our brick-and-mortar retail store business. Therefore, we believe that the inclusion of e-commerce sales in our comparable store sales metric provides a more meaningful representation of our retail results.

Sales from our brick-and-mortar retail stores include purchases that are initiated, paid for and fulfilled at our retail stores and directly operated concessions as well as merchandise that is reserved online but paid for and picked-up at our retail stores. Sales from our e-commerce sites include purchases that are initiated and paid for online and shipped from either our distribution centers or our retail stores as well as purchases that are initiated in a retail store, but due to inventory availability at the retail store, are ordered and paid for online and shipped from our distribution centers or picked-up from a different retail store.

Store sales are considered comparable after the store has been open for 13 full months. If a store remodel results in a square footage change of more than 15%, or involves a relocation or a change in store concept, the store sales are removed from the comparable store base until the store has been opened at its new size, in its new location or under its new concept for 13 full months. E-commerce sales are considered comparable after the online site has been operational in a country for 13 full months and exclude any related revenue from shipping fees.

Table of Contents

The comparable stores sales for fiscal 2018 have been adjusted to compare to the appropriate week in the prior year as a result of the additional week included in fiscal 2018.

Definitions and calculations of comparable store sales used by the Company may differ from similarly titled measures reported by other companies.

Executive Summary

Overview

Net loss attributable to Guess?, Inc. was \$7.9 million, or diluted loss of \$0.11 per common share, for fiscal 2018, compared to net earnings attributable to Guess?, Inc. of \$22.8 million, or diluted earnings of \$0.27 per common share, for fiscal 2017.

During fiscal 2018, the Company recognized net losses on lease terminations of \$11.4 million, asset impairment charges of \$8.5 million and additional income tax expense of \$47.9 million related to the enactment of the Tax Reform (or a combined \$66.3 million after considering the related tax benefit of \$1.4 million resulting from the net losses on lease terminations and asset impairment charges), resulting in an unfavorable impact of \$0.81 per share. Excluding the impact of these items, adjusted net earnings attributable to Guess?, Inc. were \$58.4 million and adjusted diluted earnings were \$0.70 per common share for fiscal 2018. During fiscal 2017, the Company recognized asset impairment charges of \$34.4 million, restructuring charges of \$6.1 million, a restructuring related estimated exit tax charge of \$1.9 million and a valuation allowance established on certain deferred tax assets of \$6.8 million, partially offset by a gain from the sale of a minority interest investment of \$22.3 million and net gains on lease terminations of \$0.7 million (or a combined \$16.0 million after considering the net \$10.2 million tax benefit resulting from the asset impairment charges, restructuring charges, the sale of the minority interest investment and net gains on lease terminations), resulting in an unfavorable impact of \$0.19 per share. Excluding the impact of these items, adjusted net earnings attributable to Guess?, Inc. were \$38.8 million and adjusted diluted earnings were \$0.46 per common share for fiscal 2017. References to financial results excluding the impact of these items are non-GAAP measures and are addressed below under “Non-GAAP Measures.”

Correction of Immaterial Error

During the fourth quarter of fiscal 2018, the Company reclassified net royalties received on the Company’s inventory purchases of licensed product from net revenue to cost of product sales to reflect its proper treatment as a reduction of the cost of such licensed product. Accordingly, prior period amounts related to net royalties, net revenue and cost of product sales have been adjusted to conform to the current period presentation. This resulted in a decrease to net revenue and cost of product sales of \$18.9 million and \$19.8 million during fiscal 2017 and fiscal 2016, respectively. This reclassification had no impact on previously reported earnings from operations, net earnings attributable to Guess?, Inc. or net earnings per share. Refer to Note 1 to the Consolidated Financial Statements for further information regarding this reclassification.

Highlights of the Company’s performance for fiscal 2018 compared to the prior year are presented below, followed by a more comprehensive discussion under “Results of Operations”:

Operations

• Total net revenue increased 7.9% to \$2.36 billion for fiscal 2018, compared to \$2.19 billion in the prior year. In constant currency, net revenue increased by 5.3%.

• Gross margin (gross profit as a percentage of total net revenue) increased 110 basis points to 35.1% for fiscal 2018, compared to 34.0% in the prior year.

• Selling, general and administrative (“SG&A”) expenses as a percentage of total net revenue (“SG&A rate”) increased 40 basis points to 31.5% for fiscal 2018, compared to 31.1% in the prior year. SG&A expenses increased 9.0% to \$743.8 million for fiscal 2018, compared to \$682.6 million in the prior year.

• During fiscal 2018, the Company recognized net losses on lease terminations of \$11.4 million, compared to net gains on lease terminations of \$0.7 million in the prior year.

Table of Contents

During fiscal 2018, the Company recognized asset impairment charges of \$8.5 million, compared to \$34.4 million in the prior year.

The Company incurred \$6.1 million in restructuring charges during fiscal 2017.

Operating margin increased 180 basis points to 2.8% for fiscal 2018, compared to 1.0% in the prior year. Lower asset impairment charges recorded during fiscal 2018 favorably impacted operating margin by 130 basis points compared to the prior year. Restructuring charges incurred during the prior year negatively impacted operating margin by 30 basis points in fiscal 2017. Higher net losses on lease terminations recorded during 2018 negatively impacted operating margin by 50 basis points compared to the prior year. Earnings from operations increased 187.0% to \$65.2 million for fiscal 2018, compared to \$22.7 million in the prior year.

Other income, net (including interest income and expense), totaled \$5.1 million for fiscal 2018, compared to \$30.9 million in the prior year. During fiscal 2017, the Company recorded a gain of \$22.3 million in other income, net related to the sale of a minority interest investment.

The effective income tax rate increased 53.0% to 105.6% for fiscal 2018, compared to 52.6% in the prior year. The Company's effective tax rate for 2018 included additional income tax expense of \$47.9 million related to the enactment of the Tax Reform, which negatively impacted the Company's effective tax rate by 68.2% in fiscal 2018.

The Company's effective tax rate for fiscal 2017 included the impact of a valuation allowance established on certain deferred tax assets of \$6.8 million and an estimated exit tax charge of \$1.9 million related to the Company's reorganization in Europe as a result of the global cost reduction and restructuring plan. These items negatively impacted the Company's effective tax rate by 16.3% in fiscal 2017.

Key Balance Sheet Accounts

The Company had \$367.4 million in cash and cash equivalents and \$0.2 million in restricted cash as of February 3, 2018, compared to \$396.1 million in cash and cash equivalents and \$1.5 million in restricted cash at January 28, 2017.

The Company invested \$56.1 million to repurchase 3,866,387 of its common shares during fiscal 2018, of which \$6.0 million was settled subsequent to year end. During fiscal 2017, the Company invested \$3.5 million to repurchase 289,968 of its common shares.

During fiscal 2018, the Company made up-front payments of approximately \$22 million related to the modification of certain lease agreements held with a common landlord in North America.

Accounts receivable, which consists of trade receivables relating primarily to the Company's wholesale business in Europe and, to a lesser extent, to its wholesale businesses in Asia and the Americas, royalty receivables relating to its licensing operations, credit card and retail concession receivables related to its retail businesses and certain other receivables, increased by \$34.5 million, or 15.3%, to \$260.0 million as of February 3, 2018, compared to \$225.5 million at January 28, 2017. On a constant currency basis, accounts receivable increased by \$4.7 million, or 2.1%.

Inventory increased by \$60.9 million, or 16.6%, to \$428.3 million as of February 3, 2018, compared to \$367.4 million at January 28, 2017. On a constant currency basis, inventory increased by \$21.1 million, or 5.8%.

Table of Contents

Global Store Count

In fiscal 2018, together with our partners, we opened 165 new stores worldwide, consisting of 84 stores in Europe and the Middle East, 63 stores in Asia and the Pacific, 11 stores in Central and South America, five stores in the U.S. and two stores in Canada. Together with our partners, we closed 182 stores worldwide, consisting of 73 stores in Asia and the Pacific, 44 stores in Europe and the Middle East, 38 stores in the U.S., 24 stores in Canada and three stores in Central and South America.

We ended fiscal 2018 with 1,663 stores and 429 concessions worldwide, comprised as follows:

Region	Stores			Concessions		
	Total	Directly Operated	Partner Operated	Total	Directly Operated	Partner Operated
United States	308	306	2	1	—	1
Canada	89	89	—	—	—	—
Central and South America	103	59	44	27	27	—
Total Americas	500	454	46	28	27	1
Europe and the Middle East	669	400	269	33	33	—
Asia and the Pacific	494	157	337	368	177	191
Total	1,663	1,011	652	429	237	192

Of the total 1,663 stores, 1,316 were GUESS? stores, 219 were GUESS? Accessories stores, 70 were G by GUESS stores and 58 were MARCIANO stores.

Results of Operations

The following table sets forth actual operating results for the fiscal years 2018, 2017 and 2016 as a percentage of net revenue:

	Year Ended					
	Feb 3, 2018		Jan 28, 2017 (1)		Jan 30, 2016 (1)	
Product sales	96.9	%	96.7	%	96.2	%
Net royalties (1)	3.1		3.3		3.8	
Net revenue (1)	100.0		100.0		100.0	
Cost of product sales (1)	64.9		66.0		64.0	
Gross profit	35.1		34.0		36.0	
Selling, general and administrative expenses	31.5		31.1		30.4	
Net (gains) losses on lease terminations	0.5		(0.0)		(0.1)	
Asset impairment charges	0.3		1.6		0.1	
Restructuring charges	—		0.3		—	
Earnings from operations	2.8		1.0		5.6	
Interest expense	(0.1)		(0.1)		(0.1)	
Interest income	0.2		0.1		0.0	
Other income, net	0.1		1.4		0.3	
Earnings before income tax expense	3.0		2.4		5.8	
Income tax expense	3.2		1.2		1.9	
Net earnings (loss)	(0.2)		1.2		3.9	
Net earnings attributable to noncontrolling interests	0.1		0.2		0.2	
Net earnings (loss) attributable to Guess?, Inc.	(0.3)	%	1.0	%	3.7	%

During the fourth quarter of fiscal 2018, the Company reclassified net royalties received on the Company's inventory purchases of licensed product from net revenue to cost of product sales. Accordingly, amounts related to (1) net royalties, net revenue and cost of product sales as well as operating results as percentage of net revenue have been adjusted for fiscal 2017 and fiscal 2016 to conform to the current period presentation. Refer to Note 1 to the Consolidated Financial Statements for further information.

Fiscal 2018 Compared to Fiscal 2017

Consolidated Results

Net Revenue. Net revenue increased by \$173.3 million, or 7.9%, to \$2.36 billion for fiscal 2018, compared to \$2.19 billion in fiscal 2017. In constant currency, net revenue increased by 5.3% as currency translation fluctuations relating to our foreign operations favorably impacted net revenue by \$58.3 million compared to the prior year. The increase was driven primarily by retail expansion and positive comparable sales in our international markets and, to a lesser extent, from higher European wholesale shipments and the favorable impact on revenue from the additional week in the current year, partially offset by negative comparable sales in Americas Retail.

Gross Margin. Gross margin increased 110 basis points to 35.1% for fiscal 2018, compared to 34.0% in fiscal 2017, of which 80 basis points was due to a lower occupancy rate and 30 basis points was due to higher overall product margins. The lower occupancy rate was due primarily to cost reductions due primarily to store closures and negotiated rent reductions in Americas Retail and, to a lesser extent, overall leveraging of expenses, partially offset by the negative impact on the fixed cost structure resulting from negative comparable store sales in Americas Retail. The higher overall product margins were driven primarily by higher overall initial markups.

Gross Profit. Gross profit increased by \$83.8 million, or 11.2%, to \$828.8 million for fiscal 2018, compared to \$745.0 million in fiscal 2017. The increase in gross profit, which included the favorable impact of currency translation, was due primarily to the favorable impact on gross profit from higher revenue. Currency translation fluctuations relating to our foreign operations favorably impacted gross profit by \$22.5 million.

Table of Contents

The Company includes inbound freight charges, purchasing costs and related overhead, retail store occupancy costs, including rent and depreciation, and a portion of the Company's distribution costs related to its retail business in cost of product sales. The Company also includes net royalties received on the Company's inventory purchases of licensed product as a reduction to cost of product sales. The Company's gross margin may not be comparable to that of other entities since some entities include all of the costs related to their distribution in cost of product sales and others, like the Company, generally exclude wholesale-related distribution costs from gross margin, including them instead in SG&A expenses. Additionally, some entities include retail store occupancy costs in SG&A expenses and others, like the Company, include retail store occupancy costs in cost of product sales.

SG&A Rate. The Company's SG&A rate increased 40 basis points to 31.5% for fiscal 2018, compared to 31.1% in fiscal 2017, driven primarily by higher performance-based compensation costs, partially offset by overall leveraging of expenses.

SG&A Expenses. SG&A expenses increased by \$61.2 million, or 9.0%, to \$743.8 million for fiscal 2018, compared to \$682.6 million in fiscal 2017. The increase, which included the unfavorable impact of currency translation, was driven primarily by higher performance-based compensation costs and, to a lesser extent, higher distribution costs resulting from the relocation of the Company's European distribution center. Currency translation fluctuations relating to our foreign operations unfavorably impacted SG&A expenses by \$14.0 million.

Net Gains (Losses) on Lease Terminations. During fiscal 2018, the Company recognized net losses on lease terminations of \$11.4 million, compared to net gains on lease terminations of \$0.7 million in the prior year. The net losses on lease terminations during fiscal 2018 related primarily to the modification of certain lease agreements held with a common landlord in North America. Currency translation fluctuations relating to our foreign operations unfavorably impacted net losses on lease terminations by \$0.3 million.

Asset Impairment Charges. During fiscal 2018, the Company recognized asset impairment charges of \$8.5 million, compared to \$34.4 million in the prior year. The higher asset impairment charges during fiscal 2017 related primarily to the impairment of certain retail locations in North America resulting from under-performance and expected store closures.

Restructuring Charges. There were no restructuring charges incurred during fiscal 2018. During fiscal 2017, the Company incurred restructuring charges of \$6.1 million.

Operating Margin. Operating margin increased 180 basis points to 2.8% for fiscal 2018, compared to 1.0% in fiscal 2017. Lower asset impairment charges recorded during fiscal 2018 favorably impacted operating margin by 130 basis points compared to the prior year. Restructuring charges incurred during the prior year negatively impacted operating margin by 30 basis points in fiscal 2017. Higher net losses on lease terminations recorded during 2018 negatively impacted operating margin by 50 basis points compared to the prior year. Excluding the impact of these items, operating margin increased by 70 basis points compared to the prior year. Currency exchange rate fluctuations favorably impacted operating margin by approximately 30 basis points.

Earnings from Operations. Earnings from operations increased by \$42.5 million, or 187.0%, to \$65.2 million for fiscal 2018, compared to \$22.7 million in fiscal 2017. Currency translation fluctuations relating to our foreign operations favorably impacted earnings from operations by \$8.1 million.

Interest Income (Expense), Net. Interest income, net, was \$1.7 million for fiscal 2018, compared to minimal interest expense, net, in fiscal 2017 and includes the impact of hedge ineffectiveness of foreign exchange currency contracts designated as cash flow hedges.

Other Income, Net. Other income, net was \$3.4 million for fiscal 2018, compared to \$30.9 million in fiscal 2017. Other income, net in fiscal 2018 consisted primarily of unrealized gains on non-operating assets and net unrealized mark-to-market revaluation gains on foreign currency balances, partially offset by net realized and unrealized mark-to-market revaluation losses on foreign exchange currency contracts. Other income, net in fiscal 2017 consisted primarily of a realized gain of \$22.3 million from the sale of a minority interest investment.

Table of Contents

Income Tax Expense. Income tax expense for fiscal 2018 was \$74.2 million, or a 105.6% effective tax rate, compared to \$28.2 million, or a 52.6% effective tax rate, in fiscal 2017. The increase in the effective income tax rate was primarily due to income tax adjustments made during fiscal 2018 as a result of the enactment of the Tax Reform. These adjustments included a \$24.9 million charge for the provisional re-measurement of certain deferred taxes and related amounts and a provisional charge of \$23.0 million to income tax expense for the estimated effects of the transitional tax on the deemed repatriation of foreign earnings. These items negatively impacted the Company's effective tax rate by 68.2% in fiscal 2018. The Company's effective tax rate for fiscal 2017 included the impact of a valuation allowance established on certain deferred tax assets of \$6.8 million, a portion of which was generated from asset impairment charges recorded during fiscal 2017, and an estimated exit tax charge of \$1.9 million related to the Company's reorganization in Europe as a result of the global cost reduction and restructuring plan. These items negatively impacted the Company's effective tax rate by 16.3% in fiscal 2017.

Net Earnings Attributable to Noncontrolling Interests. Net earnings attributable to noncontrolling interests for fiscal 2018 was \$4.0 million, net of taxes, compared to \$2.6 million, net of taxes, in fiscal 2017.

Net Earnings (Loss) Attributable to Guess?, Inc. Net loss attributable to Guess?, Inc. was \$7.9 million for fiscal 2018, compared to net earnings attributable to Guess?, Inc. of \$22.8 million in fiscal 2017. Diluted loss per share was \$0.11 for fiscal 2018, compared to diluted earnings per share of \$0.27 in fiscal 2017. During fiscal 2018, the Company recognized net losses on lease terminations of \$11.4 million, asset impairment charges of \$8.5 million and additional income tax charges totaling \$47.9 million related to the Tax Reform (or a combined \$66.3 million after considering the related tax benefit of \$1.4 million resulting from the net losses on lease terminations and asset impairment charges), or an unfavorable \$0.81 per share impact. Excluding the impact of these items, adjusted net earnings attributable to Guess?, Inc. were \$58.4 million and adjusted diluted earnings were \$0.70 per common share for fiscal 2018. We estimate that the positive impact from currency fluctuations on diluted loss per common share for fiscal 2018 was approximately \$0.02 per share. During fiscal 2017, the Company recognized asset impairment charges of \$34.4 million, restructuring charges of \$6.1 million, a restructuring related estimated exit tax charge of \$1.9 million and a valuation allowance established on certain deferred tax assets of \$6.8 million, partially offset by a gain from the sale of a minority interest investment of \$22.3 million and net gains on lease terminations of \$0.7 million (or a combined \$16.0 million after considering the net \$10.2 million tax benefit resulting from the asset impairment charges, restructuring charges, the sale of the minority interest investment and net gains on lease terminations), or an unfavorable \$0.19 per share impact. Excluding the impact of these items, adjusted net earnings attributable to Guess?, Inc. were \$38.8 million and adjusted diluted earnings were \$0.46 per common share for fiscal 2017. References to financial results excluding the impact of these items are non-GAAP measures and are addressed below under "Non-GAAP Measures."

Total earnings from operations	\$65,173	\$22,708	\$42,465	187.0%
Operating margins:				
Americas Retail	(2.1 %)	(2.4 %)		
Americas Wholesale (1)	16.7 %	16.5 %		
Europe (1)	8.7 %	7.2 %		
Asia (1)	4.6 %	(1.0 %)		
Licensing (1) (2)	107.3 %	111.8 %		
Total Company (2)	2.8 %	1.0 %		

During fiscal 2018, net revenue and related costs and expenses for certain globally serviced customers were reclassified into the segment primarily responsible for the relationship. Segment results were also adjusted to (1) exclude corporate performance-based compensation costs, net gains (losses) on lease terminations and asset impairment charges due to the fact that these items are no longer included in the segment results provided to the Company's chief operating decision maker in order to allocate resources and assess performance. Accordingly, segment results have been adjusted for fiscal 2017 to conform to the current period presentation.

(2) During the fourth quarter of fiscal 2018, the Company reclassified net royalties received on the Company's inventory purchases of licensed product from net revenue to cost of product sales. Accordingly, net revenue has been adjusted for fiscal 2017 to conform to the current period presentation. This reclassification had no impact on previously reported earnings from operations.

Americas Retail

Net revenue from our Americas Retail segment decreased by \$102.4 million, or 10.9%, to \$833.1 million for fiscal 2018, from \$935.5 million in fiscal 2017. In constant currency, net revenue decreased by 11.4% compared to the prior year, driven primarily by the unfavorable impact from negative comparable store sales and, to a lesser extent, store closures. Comparable store sales (including e-commerce) decreased 9% in U.S. dollars and 10% in constant currency. The inclusion of our e-commerce sales had a minimal impact on the comparable store sale percentage in U.S. dollars

and constant currency. The store base for the U.S. and Canada decreased by an average of 28 net stores in fiscal 2018 compared to the prior year, resulting in a 5.4% net decrease in average square footage. Currency translation fluctuations relating to our non-U.S. retail stores and e-commerce sites favorably impacted net revenue by \$3.9 million.

Table of Contents

Operating margin improved 30 basis points to negative 2.1% for fiscal 2018, compared to negative 2.4% in fiscal 2017. This improvement was due to higher gross margins and, to a lesser extent, a lower SG&A rate. The higher gross margins were driven primarily by cost reductions due primarily to store closures and negotiated rent reductions and, to a lesser extent, higher initial markups, partially offset by the negative impact on the fixed cost structure resulting from negative comparable store sales. The lower SG&A rate was due to lower expenses, partially offset by the negative impact on the fixed cost structure resulting from negative comparable store sales.

Loss from operations from our Americas Retail segment improved by \$5.5 million, or 24.2%, to \$17.3 million for fiscal 2018, compared to \$22.8 million in fiscal 2017. The improvement reflects the favorable impact on earnings from lower occupancy costs and lower store selling expenses driven primarily by store closures and, to a lesser extent, negotiated rent reductions, partially offset by the unfavorable impact from lower revenue.

Americas Wholesale

Net revenue from our Americas Wholesale segment increased by \$4.1 million, or 2.8%, to \$150.4 million for fiscal 2018, compared to \$146.3 million in fiscal 2017. In constant currency, net revenue increased by 2.0% compared to the prior year, primarily by higher shipments in our Mexico wholesale business. Currency translation fluctuations relating to our non-U.S. wholesale businesses favorably impacted net revenue by \$1.2 million.

Operating margin increased 20 basis points to 16.7% for fiscal 2018, compared to 16.5% in fiscal 2017, due to higher gross margins, partially offset by higher expenses.

Earnings from operations from our Americas Wholesale segment increased by \$1.0 million, or 4.0%, to \$25.2 million for fiscal 2018, compared to \$24.2 million in fiscal 2017. The increase was driven primarily by the favorable impact on earnings from higher revenue and, to a lesser extent, higher gross margins.

Europe

Net revenue from our Europe segment increased by \$210.5 million, or 26.7%, to \$998.7 million for fiscal 2018, compared to \$788.2 million in fiscal 2017. In constant currency, net revenue increased by 20.6% compared to the prior year, driven primarily by the favorable impact from retail expansion and, to a lesser extent, from higher shipments in our European wholesale business, positive comparable sales and the favorable impact on revenue from the additional week in the current year. As of February 3, 2018, we directly operated 400 stores in Europe compared to 336 stores at January 28, 2017, excluding concessions, which represents a 19.0% increase over the prior year. Comparable sales (including e-commerce) increased 11% in U.S. dollars and 6% in constant currency compared to the prior-year period. The inclusion of our e-commerce sales increased the comparable sales percentage by 4% in U.S. dollars and 3% in constant currency. Currency translation fluctuations relating to our European operations favorably impacted net revenue by \$47.7 million.

Operating margin increased 150 basis points to 8.7% for fiscal 2018, compared to 7.2% in fiscal 2017, due to a lower SG&A rate, partially offset by lower gross margins. The lower SG&A rate was driven primarily by the favorable impact on the fixed cost structure resulting from overall leveraging of expenses, partially offset by higher distribution costs resulting from the relocation of the Company's European distribution center. The lower gross margins were driven primarily by higher distribution costs resulting from the relocation of the Company's European distribution center, partially offset by higher initial markups.

Earnings from operations from our Europe segment increased by \$30.4 million, or 53.4%, to \$87.4 million for fiscal 2018, compared to \$57.0 million in fiscal 2017. The increase was driven primarily by the favorable impact on earnings from higher revenue, partially offset by higher occupancy costs and store selling expenses due to retail expansion and, to a lesser extent, higher distribution costs resulting from the relocation of the Company's European distribution center. Currency translation fluctuations relating to our European operations favorably impacted earnings from operations by \$7.6 million.

Asia

Net revenue from our Asia segment increased by \$60.3 million, or 24.3%, to \$308.9 million for fiscal 2018, compared to \$248.6 million in fiscal 2017. In constant currency, net revenue increased by 22.1% compared to the prior year, driven primarily by retail expansion and, to a lesser extent, positive comparable sales. Comparable sales (including e-commerce) increased 8% in U.S. dollars and 5% in constant currency compared to the prior year. The

Table of Contents

inclusion of our e-commerce sales increased the comparable sales percentage by 4% in U.S. dollars and 3% in constant currency. As of February 3, 2018, we and our partners operated 494 stores and 368 concessions in Asia, compared to 504 stores and 384 concessions at January 28, 2017. As of February 3, 2018, we directly operated 157 stores and 177 concessions, compared to 108 directly operated stores and 193 concessions at January 28, 2017. Currency translation fluctuations relating to our Asian operations favorably impacted net revenue by \$5.4 million. Operating margin increased 560 basis points to 4.6% for fiscal 2018, from negative 1.0% in fiscal 2017. The increase in operating margin was due to higher gross margins and, to a lesser extent, a lower SG&A rate driven primarily by overall leveraging of occupancy costs and SG&A expenses.

Earnings from operations from our Asia segment was \$14.1 million for fiscal 2018, compared to loss from operations of \$2.4 million in fiscal 2017. The increase in earnings from operations was driven by the favorable impact on earnings from higher revenue. Currency translation fluctuations relating to our Asian operations favorably impacted earnings from operations by \$0.6 million.

Licensing

Net royalty revenue from our Licensing segment increased by \$0.8 million, or 1.2%, to \$72.8 million for fiscal 2018, compared to \$71.9 million in fiscal 2017.

Earnings from operations from our Licensing segment decreased by \$2.3 million, or 2.8%, to \$78.1 million for fiscal 2018, from \$80.4 million in fiscal 2017.

Corporate Overhead

Unallocated corporate overhead increased by \$28.6 million to \$102.4 million for fiscal 2018, compared to \$73.9 million in fiscal 2017. The increase was driven primarily by higher performance-based compensation costs.

Fiscal 2017 Compared to Fiscal 2016**Consolidated Results**

Net Revenue. Net revenue increased by \$6.0 million, or 0.3%, to \$2.19 billion for fiscal 2017, compared to \$2.18 billion in fiscal 2016. In constant currency, net revenue increased by 1.1% as currency translation fluctuations relating to our foreign operations unfavorably impacted net revenue by \$17.2 million compared to the prior year.

Gross Margin. Gross margin decreased 200 basis points to 34.0% for fiscal 2017, from 36.0% in fiscal 2016, of which 120 basis points was due to lower overall product margins and 80 basis points was due to a higher occupancy rate. The lower overall product margins were due primarily to more markdowns in Americas Retail. The higher occupancy rate was driven primarily by the negative impact on the Company's fixed cost structure resulting from negative comparable store sales in Americas Retail.

Gross Profit. Gross profit decreased by \$42.4 million, or 5.4%, to \$745.0 million for fiscal 2017, from \$787.4 million in fiscal 2016. The decrease in gross profit, which included the unfavorable impact of currency translation, was due primarily to lower overall product margins and higher occupancy costs resulting from retail expansion in our international markets. Currency translation fluctuations relating to our foreign operations unfavorably impacted gross profit by \$6.5 million.

SG&A Rate. The Company's SG&A rate increased 70 basis points to 31.1% for fiscal 2017, compared to 30.4% in fiscal 2016, due primarily to the unfavorable impact from segment mix, partially offset by lower performance-based compensation costs.

SG&A Expenses. SG&A expenses increased by \$16.5 million, or 2.5%, to \$682.6 million for fiscal 2017, compared to \$666.1 million in fiscal 2016. The increase, which included the favorable impact of currency translation, was driven by higher investments to support our expansion, partially offset by lower current-year performance-based compensation costs and prior-year charges for legal matters of \$7.0 million. Currency translation fluctuations relating to our foreign operations favorably impacted SG&A expenses by \$3.6 million.

Table of Contents

Net Gains on Lease Terminations. During fiscal 2017, the Company recognized net gains on lease terminations of \$0.7 million, compared to \$2.3 million in the prior year. The net gains on lease terminations related primarily to the early termination of certain lease agreements in Europe

Asset Impairment Charges. During fiscal 2017, the Company recognized asset impairment charges of \$34.4 million, compared to \$2.3 million in the prior year. The higher asset impairment charges during fiscal 2017 related primarily to the impairment of certain retail locations in North America resulting from under-performance and expected store closures. Currency translation fluctuations relating to our foreign operations unfavorably impacted asset impairment charges by \$0.5 million.

Restructuring Charges. During the first quarter of fiscal 2017, the Company implemented a global cost reduction and restructuring plan to better align its global cost and organizational structure with its current strategic initiatives. This plan included the consolidation and streamlining of the Company's business processes and a reduction in its global workforce and other expenses. These actions resulted in restructuring charges of \$6.1 million incurred during fiscal 2017.

Operating Margin. Operating margin decreased 460 basis points to 1.0% for fiscal 2017, from 5.6% in fiscal 2016. Higher asset impairment charges recorded during fiscal 2017 unfavorably impacted operating margin by 150 basis points compared to the prior year. Restructuring charges negatively impacted operating margin by 30 basis points in fiscal 2017. Lower net gains on lease terminations recorded during fiscal 2017 unfavorably impacted operating margin by 10 basis points compared to the prior year. Currency exchange rate fluctuations negatively impacted operating margin by approximately 70 basis points.

Earnings from Operations. Earnings from operations decreased by \$98.6 million, or 81.3%, to \$22.7 million for fiscal 2017, from \$121.4 million in fiscal 2016. Currency translation fluctuations relating to our foreign operations unfavorably impacted earnings from operations by \$3.6 million.

Interest Expense, Net. Interest expense, net was minimal for fiscal 2017, compared to \$0.9 million in fiscal 2016 and includes the impact of hedge ineffectiveness of foreign exchange currency contracts designated as cash flow hedges.

Other Income, Net. Other income, net was \$30.9 million for fiscal 2017, compared to \$6.8 million in fiscal 2016. Other income, net in fiscal 2017 consisted primarily of a realized gain of \$22.3 million from the sale of a minority interest investment. Other income, net in fiscal 2016 consisted primarily of net realized and unrealized mark-to-market revaluation gains on foreign exchange currency contracts and realized gains on the sale of other assets, partially offset by net unrealized mark-to-market revaluation losses on foreign currency balances.

Income Tax Expense. Income tax expense for fiscal 2017 was \$28.2 million, or a 52.6% effective tax rate, compared to \$42.5 million, or a 33.4% effective tax rate, in fiscal 2016. The increase in the effective income tax rate was due primarily to more losses incurred in certain foreign jurisdictions where the Company has valuation allowances, partially offset by the favorable impact of a lower tax rate on the gain from the sale of a minority interest investment during fiscal 2017 compared to the prior year. The Company's effective tax rate for fiscal 2017 included the impact of a valuation allowance established on certain deferred tax assets of \$6.8 million, a portion of which was generated from asset impairment charges recorded during fiscal 2017, and an estimated exit tax charge of \$1.9 million related to the Company's reorganization in Europe as a result of the global cost reduction and restructuring plan. These items negatively impacted the Company's effective tax rate by 16.3% in fiscal 2017.

Net Earnings Attributable to Noncontrolling Interests. Net earnings attributable to noncontrolling interests for fiscal 2017 was \$2.6 million, net of taxes, compared to \$3.0 million, net of taxes, in fiscal 2016.

Net Earnings Attributable to Guess?, Inc. Net earnings attributable to Guess?, Inc. decreased by \$59.1 million, or 72.2%, to \$22.8 million for fiscal 2017, from \$81.9 million in fiscal 2016. Diluted earnings per share decreased to \$0.27 per share for fiscal 2017, from \$0.96 per share in fiscal 2016. During fiscal 2017, the Company recognized asset impairment charges of \$34.4 million, restructuring charges of \$6.1 million, a restructuring related estimated exit tax charge of \$1.9 million and a valuation allowance established on certain deferred tax assets of \$6.8 million,

Table of Contents

partially offset by a gain from the sale of a minority interest investment of \$22.3 million and net gains on lease terminations of \$0.7 million (or a combined \$16.0 million after considering the net \$10.2 million tax benefit resulting from the asset impairment charges, restructuring charges, the sale of the minority interest investment and net gains on lease terminations), or an unfavorable \$0.19 per share impact. Excluding the impact of these items, adjusted net earnings attributable to Guess?, Inc. were \$38.8 million and adjusted diluted earnings were \$0.46 per common share for fiscal 2017. References to financial results excluding the impact of these items are non-GAAP measures and are addressed below under “Non-GAAP Measures.” We estimate that the negative impact from currency fluctuations on diluted earnings per common share for fiscal 2017 was approximately \$0.13 per share. During fiscal 2016, the Company also recognized net gains on lease terminations of \$2.3 million which was mostly offset by asset impairment charges of \$2.3 million, resulting in a minimal per share impact.

Information by Business Segment

The following table presents our net revenue and earnings (loss) from operations by segment for fiscal 2017 and fiscal 2016 (dollars in thousands):

	Fiscal 2017	Fiscal 2016	Change	% Change
Net revenue:				
Americas Retail	\$935,479	\$981,942	\$(46,463)	(4.7 %)
Americas Wholesale (1)	146,260	155,594	(9,334)	(6.0 %)
Europe (1)	788,194	722,877	65,317	9.0
Asia (1)	248,601	240,041	8,560	3.6
Licensing (2)	71,919	84,041	(12,122)	(14.4 %)
Total net revenue (2)	\$2,190,453	\$2,184,495	\$5,958	0.3 %
Earnings (loss) from operations:				
Americas Retail (1)	\$(22,816)	\$18,414	\$(41,230)	(223.9%)
Americas Wholesale (1)	24,190	29,579	(5,389)	(18.2 %)
Europe (1)	56,961	53,673	3,288	6.1
Asia (1)	(2,381)	10,309	(12,690)	(123.1)
Licensing (1)	80,386	92,189	(11,803)	(12.8 %)
Total segment earnings from operations	136,340	204,164	(67,824)	(33.2 %)
Corporate overhead (1)	(73,859)	(82,864)	9,005	(10.9 %)
Net gains (losses) on lease terminations (1)	695	2,337	(1,642)	
Asset impairment charges (1)	(34,385)	(2,287)	(32,098)	
Restructuring charges	(6,083)	—	(6,083)	
Total earnings from operations	\$22,708	\$121,350	\$(98,642)	(81.3 %)
Operating margins:				
Americas Retail (1)	(2.4 %)	1.9 %		
Americas Wholesale (1)	16.5 %	19.0 %		
Europe (1)	7.2 %	7.4 %		
Asia (1)	(1.0 %)	4.3 %		
Licensing (1) (2)	111.8 %	109.7 %		
Total Company (2)	1.0 %	5.6 %		

(1) During fiscal 2018, net revenue and related costs and expenses for certain globally serviced customers were reclassified into the segment primarily responsible for the relationship. Segment results were also adjusted to exclude corporate performance-based compensation costs, net gains (losses) on lease terminations and asset impairment charges due to the fact that these items are no longer included in the segment results provided to the Company’s chief operating decision maker in order to allocate resources and assess performance. Accordingly, segment results have been adjusted for fiscal 2017 and fiscal 2016 to conform to the current period presentation.

During the fourth quarter of fiscal 2018, the Company reclassified net royalties received on the Company's inventory purchases of licensed product from net revenue to cost of product sales. Accordingly, net revenue has (2) been adjusted for fiscal 2017 and fiscal 2016 to conform to the current period presentation. This reclassification had no impact on previously reported earnings from operations.

Table of Contents**Americas Retail**

Net revenue from our Americas Retail segment decreased by \$46.5 million, or 4.7%, to \$935.5 million for fiscal 2017, from \$981.9 million in fiscal 2016. In constant currency, net revenue decreased by 4.1% compared to the prior year, driven primarily by the unfavorable impact from negative comparable store sales and net store closures. Comparable store sales (including e-commerce) in the U.S. and Canada decreased 4.9% in U.S. dollars and 4.5% in constant currency, which excludes the unfavorable translation impact from currency fluctuations relating to our Canadian retail stores and e-commerce sites. E-commerce sales increased by \$2.9 million, or 3.2%, to \$92.4 million for fiscal 2017, compared to \$89.5 million in fiscal 2016. The inclusion of our e-commerce sales improved the comparable store sale percentage by 0.8% in U.S. dollars and 0.9% in constant currency. The store base for the U.S. and Canada decreased by an average of 11 net stores in fiscal 2017 compared to the prior year, resulting in a 0.8% net decrease in average square footage. Currency translation fluctuations relating to our non-U.S. retail stores and e-commerce sites unfavorably impacted net revenue by \$6.4 million.

Operating margin decreased 430 basis points to negative 2.4% for fiscal 2017, from 1.9% in fiscal 2016, due to lower gross margins and a higher SG&A rate. The lower gross margins were driven primarily by more markdowns and the negative impact on the fixed cost structure resulting from negative comparable store sales. The higher SG&A rate was due primarily to the negative impact on the fixed cost structure resulting from negative comparable store sales.

Loss from operations from our Americas Retail segment was \$22.8 million for fiscal 2017, compared to earnings from operations of \$18.4 million in fiscal 2016. The deterioration reflects the impact on earnings from negative comparable store sales and lower product margins.

Americas Wholesale

Net revenue from our Americas Wholesale segment decreased by \$9.3 million, or 6.0%, to \$146.3 million for fiscal 2017, from \$155.6 million in fiscal 2016. In constant currency, net revenue decreased by 2.7% compared to the prior year, driven primarily by lower shipments in our U.S. wholesale business. Currency translation fluctuations relating to our non-U.S. wholesale businesses unfavorably impacted net revenue by \$5.2 million.

Operating margin decreased 250 basis points to 16.5% for fiscal 2017, from 19.0% in fiscal 2016, driven by lower gross margins and a higher SG&A rate. The lower gross margins were driven primarily by the unfavorable impact from currency exchange rate fluctuations on product costs and lower initial markups. The higher SG&A rate was due primarily to overall deleveraging.

Earnings from operations from our Americas Wholesale segment decreased by \$5.4 million, or 18.2%, to \$24.2 million for fiscal 2017, from \$29.6 million in fiscal 2016. The decrease was driven by the negative impact on earnings from lower product margins and lower revenue. Currency translation fluctuations relating to our non-U.S. wholesale businesses unfavorably impacted earnings from operations by \$1.6 million.

Europe

Net revenue from our Europe segment increased by \$65.3 million, or 9.0%, to \$788.2 million for fiscal 2017, compared to \$722.9 million in fiscal 2016. In constant currency, net revenue increased by 9.4% compared to the prior year, driven primarily by the favorable impact from retail expansion and a percentage increase in the high-single digits for comparable store sales, partially offset by lower shipments in our European wholesale business. As of January 28, 2017, we directly operated 336 stores in Europe compared to 280 stores at January 30, 2016, excluding concessions, which represents a 20.0% increase over the prior year. Currency translation fluctuations relating to our European operations unfavorably impacted net revenue by \$2.4 million.

Operating margin decreased 20 basis points to 7.2% for fiscal 2017, from 7.4% in fiscal 2016, due to lower gross margins, partially offset by a lower SG&A rate. The lower gross margins were driven primarily by the unfavorable impact from currency exchange rate fluctuations, partially offset by the favorable impact from positive comparable store sales. The lower SG&A rate was driven by the favorable impact on the fixed cost structure resulting from overall leveraging of expenses.

Earnings from operations from our Europe segment increased by \$3.3 million, or 6.1%, to \$57.0 million for fiscal 2017, compared to \$53.7 million in fiscal 2016. The increase was due to the favorable impact on earnings from

Table of Contents

higher revenue, partially offset by higher occupancy costs and store selling expenses due to retail expansion. Currency translation fluctuations relating to our European operations unfavorably impacted earnings from operations by \$1.6 million.

Asia

Net revenue from our Asia segment increased by \$8.6 million, or 3.6%, to \$248.6 million for fiscal 2017, compared to \$240.0 million in fiscal 2016. In constant currency, net revenue increased by 4.9% compared to the prior year, driven primarily by retail expansion and positive comparable stores in China. As of January 28, 2017, we and our partners operated 504 stores and 384 concessions in Asia, compared to 490 stores and 416 concessions at January 30, 2016. Currency translation fluctuations relating to our Asian operations unfavorably impacted net revenue by \$3.1 million. Operating margin decreased 530 basis points to negative 1.0% for fiscal 2017, from 4.3% in fiscal 2016. The decrease in operating margin was driven primarily by a higher SG&A rate and lower gross margins. The higher SG&A rate was driven primarily by higher expenses resulting from retail expansion in China and country mix. The lower gross margins were driven by higher occupancy costs due to retail expansion in China and the unfavorable impact from country mix.

Loss from operations from our Asia segment was \$2.4 million for fiscal 2017, compared to earnings from operations of \$10.3 million in fiscal 2016. The deterioration was driven by higher SG&A expenses and occupancy costs due primarily to expansion in China.

Licensing

Net royalty revenue from our Licensing segment decreased by \$12.1 million, or 14.4%, to \$71.9 million for fiscal 2017, from \$84.0 million in fiscal 2016. The decrease was driven primarily by overall softness in our licensing business, particularly in our watch and footwear categories.

Earnings from operations from our Licensing segment decreased by \$11.8 million, or 12.8%, to \$80.4 million for fiscal 2017, from \$92.2 million in fiscal 2016. The decrease was driven primarily by the unfavorable impact to earnings from lower revenue.

Corporate Overhead

Unallocated corporate overhead decreased by \$9.0 million to \$73.9 million for fiscal 2017, compared to \$82.9 million in fiscal 2016. The decrease was driven primarily by lower performance-based compensation costs during fiscal 2017 and charges related to legal matters of \$7.0 million during fiscal 2016.

Non-GAAP Measures

The Company's reported financial results are presented in accordance with GAAP. The reported net loss attributable to Guess?, Inc. and diluted loss per share in fiscal 2018 reflect the impact of (i) net losses on a lease termination, (ii) asset impairment charges, (iii) the tax effects of these adjustments and (iv) additional income tax expense related to the enactment of the Tax Reform. The reported net earnings attributable to Guess?, Inc. and diluted earnings per share in fiscal 2017 reflect the impact of (i) net gains on lease terminations, (ii) asset impairment charges, (iii) restructuring charges and a related estimated exit tax charge, (iv) a gain related to the sale of a minority interest investment, (v) the tax effects of these adjustments and (vi) a valuation allowance established on certain deferred tax assets. The reported net earnings attributable to Guess?, Inc. and diluted earnings per share in fiscal 2016 reflect the impact of (i) net gains on lease terminations, (ii) asset impairment charges and (iii) the tax effects of these adjustments. These items affect the comparability of the Company's reported results. The financial results are also presented on a non-GAAP basis, as defined in Section 10(e) of Regulation S-K of the SEC, to exclude the effect of these items. The Company believes that these "non-GAAP" or "adjusted" financial measures are useful for investors to evaluate the comparability of the Company's operating results and its future outlook when reviewed in conjunction with the Company's GAAP financial statements. The non-GAAP measures are provided in addition to, and not as alternatives for, the Company's reported GAAP results.

The adjusted measures for fiscal 2018 exclude the impact of net losses on lease terminations of \$11.4 million, asset impairment charges of \$8.5 million and additional income tax expense of \$47.9 million related to the enactment of the Tax Reform. The net losses on lease terminations related primarily to the modification of certain lease agreements

Table of Contents

held with a common landlord in North America. The asset impairment charges related primarily to the impairment of certain retail locations in North America resulting from under-performance and expected store closures. The additional income tax expense related to the enactment of the Tax Reform is comprised of a provisional charge of \$24.9 million for the re-measurement of U.S. deferred tax assets and a provisional charge of \$23.0 million for the estimated effects of the transitional tax on the deemed repatriation of foreign earnings. These items resulted in a combined \$66.3 million impact (after considering the related tax benefit of \$1.4 million resulting from the net losses on lease terminations and asset impairment charges), or an unfavorable \$0.81 per share impact during fiscal 2018. Net loss attributable to Guess?, Inc. was \$7.9 million and diluted loss per common share was \$0.11 for fiscal 2018. Excluding the impact of these items, adjusted net earnings attributable to Guess?, Inc. were \$58.4 million and adjusted diluted earnings per common share were \$0.70 for fiscal 2018.

The adjusted measures for fiscal 2017 exclude the impact of asset impairment charges of \$34.4 million, restructuring charges of \$6.1 million, a restructuring related estimated exit tax charge of \$1.9 million and a valuation allowance established on certain deferred tax assets of \$6.8 million, partially offset by a gain related to the sale of a minority interest investment of \$22.3 million and net gains on lease terminations of \$0.7 million. The asset impairment charges related primarily to the impairment of certain retail locations in North America resulting from under-performance and expected store closures. During the first quarter of fiscal 2017, the Company implemented a global cost reduction and restructuring plan to better align its global cost and organizational structure with its current strategic initiatives. This plan included the consolidation and streamlining of the Company's business processes and a reduction in its global workforce and other expenses. During fiscal 2017, the Company recorded a valuation allowance on certain deferred tax assets, a portion of which was generated from asset impairment charges recorded during fiscal 2017. The net gains on lease terminations related primarily to the early termination of certain lease agreements in Europe. These items resulted in a combined \$16.0 million impact (after considering the net \$10.2 million tax benefit resulting from the asset impairment charges, restructuring charges, the sale of the minority interest investment and net gains on lease terminations), or an unfavorable \$0.19 per share impact during fiscal 2017. Net earnings attributable to Guess?, Inc. were \$22.8 million and diluted earnings per common share were \$0.27 for fiscal 2017. Excluding the impact of these items, adjusted net earnings attributable to Guess?, Inc. were \$38.8 million and adjusted diluted earnings per common share were \$0.46 for fiscal 2017.

The adjusted measures for fiscal 2016 exclude the impact of asset impairment charges of \$2.3 million which was mostly offset by net gains on lease terminations of \$2.3 million, resulting in a minimal per share impact. The asset impairment charges related primarily to the impairment of certain retail locations in North America resulting from under-performance and expected store closures. The net gains on lease terminations related primarily to the early termination of certain lease agreements in Europe.

Our discussion and analysis herein also includes certain constant currency financial information. Foreign currency exchange rate fluctuations affect the amount reported from translating the Company's foreign revenue, expenses and balance sheet amounts into U.S. dollars. These rate fluctuations can have a significant effect on reported operating results under GAAP. The Company provides constant currency information to enhance the visibility of underlying business trends, excluding the effects of changes in foreign currency translation rates. To calculate net revenue, comparable store sales and earnings (loss) from operations on a constant currency basis, operating results for the current-year period are translated into U.S. dollars at the average exchange rates in effect during the comparable period of the prior year. To calculate balance sheet amounts on a constant currency basis, the current year balance sheet amount is translated into U.S. dollars at the exchange rate in effect at the comparable prior-year period. The constant currency calculations do not adjust for the impact of revaluing specific transactions denominated in a currency that is different to the functional currency of that entity when exchange rates fluctuate. The constant currency information presented may not be comparable to similarly titled measures reported by other companies.

In calculating the estimated impact of currency fluctuations (including translational and transactional impacts) on other measures such as earnings (loss) per share, the Company estimates gross margin (including the impact of foreign exchange currency contracts designated as cash flow hedges for anticipated merchandise purchases) and expenses using the appropriate prior-year rates, translates the estimated foreign earnings (loss) at the comparable prior-year

rates and excludes the year-over-year earnings impact of gains or losses arising from balance sheet remeasurement and foreign exchange currency contracts not designated as cash flow hedges for merchandise purchases.

Table of Contents**Liquidity and Capital Resources**

We need liquidity globally primarily to fund our working capital, occupancy costs, the expansion, remodeling and rationalization of our retail stores, shop-in-shop programs, concessions, systems, infrastructure, other existing operations, international growth and potential acquisitions and investments. In addition, in the U.S. we need liquidity to fund share repurchases and payment of dividends to our stockholders. Generally, our working capital needs are highest during the late summer and fall as our inventories increase before the holiday selling period. During the fiscal year ended February 3, 2018, the Company relied primarily on trade credit, available cash, real estate and other operating leases, capital leases, proceeds from short-term lines of credit and internally generated funds to finance our operations, payment of dividends, share repurchases and expansion. The Company anticipates that we will be able to satisfy our ongoing cash requirements during the next twelve months for working capital, capital expenditures, payments on our debt, capital leases and operating leases as well as lease termination payments, potential acquisitions and investments, share repurchases and dividend payments to stockholders, primarily with cash flow from operations and existing cash balances supplemented by borrowings under our existing Credit Facility in the U.S. and Canada as well as bank facilities in Europe, as described below under “—Borrowings and Capital Lease Obligations.”

In December 2017, the U.S. government enacted the Tax Reform which significantly changes the U.S. corporate income tax laws, including moving from a global taxation regime to a territorial regime and lowering the future U.S. federal tax rate from 35% to 21%. The Company is now required to pay a tax on all historical earnings of foreign subsidiaries that have not been repatriated to the U.S., and as a result, the Company has recorded a provisional charge of \$23.0 million during the fourth quarter of fiscal 2018. Such charges are expected to be paid over an eight year period as the Tax Reform allows beginning in calendar 2018. The Company has provided for any additional tax liabilities on amounts that are estimated to be repatriated from foreign operations as a result of the Tax Reform. We have not provided for other income taxes on undistributed foreign earnings expected to be reinvested outside the U.S. If in the future we decide to repatriate such earnings, we would incur other incremental taxes. Our current plans do not indicate a need to repatriate them to fund our U.S. cash requirements. As of February 3, 2018, the Company had cash and cash equivalents of \$367.4 million, of which approximately \$76.9 million was held in the U.S.

Excess cash and cash equivalents, which represent the majority of our outstanding cash and cash equivalents balance, are held primarily in overnight deposit and short-term time deposit accounts. Please see “Part I, Item 1A. Risk Factors” for a discussion of risk factors which could reasonably be likely to result in a decrease of internally generated funds available to finance capital expenditures and working capital requirements.

The Company has presented below the cash flow performance comparison of the year ended February 3, 2018 versus the year ended January 28, 2017. As a result of the adoption of new authoritative guidance during fiscal 2018, which impacted the classification of certain cash receipts and cash payments in the statement of cash flows, the amounts related to cash flows from operating, investing and financing activities as well as the effect of exchange rates on cash, cash equivalents and restricted cash have been updated for fiscal 2017 to conform to the current period presentation. Refer to Note 2 to the Consolidated Financial Statements for further description of these changes.

Operating Activities

Net cash provided by operating activities was \$148.4 million for the fiscal year ended February 3, 2018, compared to \$71.7 million for the fiscal year ended January 28, 2017, or an increase of \$76.6 million. The increase was driven primarily by the favorable impact of changes in working capital during fiscal 2018 compared to the prior year. The change in working capital was driven primarily by the favorable impact from timing of payments and improved inventory management during fiscal 2018 compared to the prior year. Net cash provided by operating activities for fiscal 2018 includes the impact from up-front payments of approximately \$22 million related to the modification of certain lease agreements held with a common landlord in North America.

Investing Activities

Net cash used in investing activities was \$90.3 million for the fiscal year ended February 3, 2018, compared to \$49.0 million for the fiscal year ended January 28, 2017. Net cash used in investing activities related primarily to capital expenditures incurred on international retail expansion, investments in technology infrastructure and existing store remodeling programs. In addition, the cost of any business acquisitions, settlement of forward exchange currency

contracts, purchases of investments and proceeds from the disposition of long-term assets are also included in cash flows used in investing activities.

Table of Contents

The increase in cash used in investing activities was driven primarily by proceeds received in the prior year from the sale of long-term assets. During the fiscal year ended February 3, 2018, the Company opened 129 directly operated stores compared to 130 directly operated stores that were opened in the prior year.

Financing Activities

Net cash used in financing activities was \$128.7 million for the fiscal year ended February 3, 2018, compared to \$69.0 million for the fiscal year ended January 28, 2017. Cash used in financing activities related primarily to the payment of dividends and the repurchases of shares of the Company's common stock. In addition, payments related to borrowings, capital lease obligations, capital distributions to noncontrolling interests, issuance of common stock under our equity plans, purchase of redeemable noncontrolling interest and debt issuance costs and proceeds from borrowings and capital contributions from noncontrolling interests are also included in cash flows used in financing activities.

The increase in net cash used in financing activities was due primarily due to higher repurchases of shares of the Company's common stock and prior-year proceeds from the Company's ten-year \$21.5 million real estate secured loan entered into during fiscal 2017. During fiscal 2018, the Company invested \$56.1 million to repurchase 3,866,387 of its common shares, of which \$6.0 million was settled subsequent to year end. During fiscal 2017, the Company invested \$3.5 million to repurchase 289,968 of its common shares.

Effect of Exchange Rates on Cash, Cash Equivalents and Restricted Cash

During the fiscal year ended February 3, 2018, changes in foreign currency translation rates increased our reported cash, cash equivalents and restricted cash balance by \$40.7 million. This compares to a decrease of \$2.1 million in cash, cash equivalents and restricted cash driven by changes in foreign currency translation rates during the fiscal year ended January 28, 2017.

Working Capital

As of February 3, 2018, the Company had net working capital (including cash and cash equivalents) of \$640.9 million, compared to \$698.6 million at January 28, 2017. The Company's primary working capital needs are for accounts receivable and inventory. Accounts receivable increased by \$34.5 million, or 15.3%, to \$260.0 million as of February 3, 2018, compared to \$225.5 million at January 28, 2017. The accounts receivable balance consists of trade receivables relating primarily to the Company's wholesale business in Europe and, to a lesser extent, to its wholesale businesses in Asia and the Americas, royalty receivables relating to its licensing operations, credit card and retail concession receivables related to its retail businesses and certain other receivables. On a constant currency basis, accounts receivable increased by \$4.7 million, or 2.1%, when compared to January 28, 2017. As of February 3, 2018, approximately 59% of our total net trade receivables and 72% of our European net trade receivables were subject to credit insurance coverage, certain bank guarantees or letters of credit for collection purposes. Our credit insurance coverage contains certain terms and conditions specifying deductibles and annual claim limits. Inventory increased by \$60.9 million, or 16.6%, to \$428.3 million as of February 3, 2018, from \$367.4 million at January 28, 2017. On a constant currency basis, inventory increased by \$21.1 million, or 5.8%, when compared to January 28, 2017, driven primarily by retail expansion in our international markets, partially offset by lower inventory in Americas Retail.

Table of Contents

Contractual Obligations and Commitments

The following table summarizes the Company's contractual obligations as of February 3, 2018 and the effects such obligations are expected to have on liquidity and cash flow in future periods (dollars in thousands):

	Payments due by period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Contractual Obligations:					
Long-term debt (1)	\$28,216	\$2,114	\$4,876	\$2,457	\$18,769
Capital lease obligations (1)	24,984	2,940	5,879	5,306	10,859
Operating lease obligations (2)	984,902	201,078	329,220	224,724	229,880
Purchase obligations (3)	208,143	208,143	—	—	—
Benefit obligations (4)	94,723	1,863	9,102	10,166	73,592
Total	\$1,340,968	\$416,138	\$349,077	\$242,653	\$333,100
Other commercial commitments (5)	\$990	\$990	\$—	\$—	\$—

(1) Includes interest payments.

(2) Does not include rent based on a percentage of annual sales volume, insurance, taxes and common area maintenance charges. In fiscal 2018, these variable charges totaled \$133.2 million.

Purchase obligations represent open purchase orders for raw materials and merchandise at the end of the fiscal (3) year. These purchase orders can be impacted by various factors, including the scheduling of market weeks, the timing of issuing orders, the timing of the shipment of orders and currency fluctuations.

(4) Includes expected payments associated with the deferred compensation plan and the Supplemental Executive Retirement Plan through fiscal 2055.

(5) Consists of standby letters of credit for workers' compensation and general liability insurance.

Excluded from the above contractual obligations table is the noncurrent liability for unrecognized tax benefits, including penalties and interest, of \$19.0 million. This liability for unrecognized tax benefits has been excluded because the Company cannot make a reliable estimate of the period in which the liability will be settled, if ever.

Off-Balance Sheet Arrangements

Other than certain obligations and commitments included in the table above, we did not have any material off-balance sheet arrangements as of February 3, 2018.

Dividends

During the first quarter of fiscal 2008, the Company announced the initiation of a quarterly cash dividend of \$0.06 per share of the Company's common stock. Since that time, the Company has continued to pay a quarterly cash dividend, which has subsequently increased to \$0.225 per common share.

On March 21, 2018, the Company announced a regular quarterly cash dividend of \$0.225 per share on the Company's common stock. The cash dividend will be paid on April 20, 2018 to shareholders of record as of the close of business on April 4, 2018.

The payment of cash dividends in the future will be at the discretion of our Board of Directors and will be based upon a number of business, legal and other considerations, including our cash flow from operations, capital expenditures, debt service and covenant requirements, cash paid for income taxes, earnings, share repurchases, economic conditions and U.S. and global liquidity.

Share Repurchases

On June 26, 2012, the Company's Board of Directors authorized a program to repurchase, from time-to-time and as market and business conditions warrant, up to \$500 million of the Company's common stock. Repurchases under the program may be made on the open market or in privately negotiated transactions, pursuant to Rule 10b5-1 trading plans or other available means. There is no minimum or maximum number of shares to be repurchased under

Table of Contents

the program, which may be discontinued at any time, without prior notice. During fiscal 2018, the Company repurchased 3,866,387 shares under the program at an aggregate cost of \$56.1 million, of which \$6.0 million was settled subsequent to year end. During fiscal 2017, the Company repurchased 289,968 shares under the program at an aggregate cost of \$3.5 million. During fiscal 2016, the Company repurchased 2,000,000 shares at an aggregate cost of \$44.0 million. As of February 3, 2018, the Company had remaining authority under the program to purchase \$392.2 million of its common stock.

Subsequent to year end, the Company repurchased approximately 1.1 million shares under its share repurchase program at an aggregate cost of \$17.6 million.

Capital Expenditures

Gross capital expenditures totaled \$84.7 million, before deducting lease incentives of \$7.4 million, for the fiscal year ended February 3, 2018. This compares to gross capital expenditures of \$90.6 million, before deducting lease incentives of \$6.1 million, for the fiscal year ended January 28, 2017.

The Company's investments in capital for the full fiscal year 2019 are planned between \$85 million and \$95 million. The planned investments in capital are primarily related to retail and e-commerce expansion in Europe and Asia as well as continued investments in technology to support our long-term growth plans.

We will periodically evaluate strategic acquisitions and alliances and pursue those that we believe will support and contribute to our overall growth initiatives.

Borrowings and Capital Lease Obligations**Credit Facilities**

On June 23, 2015, the Company entered into a five-year senior secured asset-based revolving credit facility with Bank of America, N.A. and the other lenders party thereto (the "Credit Facility"). The Credit Facility provides for a borrowing capacity in an amount up to \$150 million, including a Canadian sub-facility up to \$50 million, subject to a borrowing base. Based on applicable accounts receivable, inventory, eligible cash balances and relevant covenant restrictions as of February 3, 2018, the Company could have borrowed up to \$87 million under the Credit Facility. The Credit Facility has an option to expand the borrowing capacity by up to \$150 million subject to certain terms and conditions, including the willingness of existing or new lenders to assume such increased amount. The Credit Facility is available for direct borrowings and the issuance of letters of credit, subject to certain letters of credit sublimits, and may be used for working capital and other general corporate purposes.

All obligations under the Credit Facility are unconditionally guaranteed by the Company and the Company's existing and future domestic and Canadian subsidiaries, subject to certain exceptions, and are secured by a first priority lien on substantially all of the assets of the Company and such domestic and Canadian subsidiaries, as applicable.

Direct borrowings under the Credit Facility made by the Company and its domestic subsidiaries shall bear interest at the U.S. base rate plus an applicable margin (varying from 0.25% to 0.75%) or at LIBOR plus an applicable margin (varying from 1.25% to 1.75%). The U.S. base rate is based on the greater of (i) the U.S. prime rate, (ii) the federal funds rate, plus 0.5%, and (iii) LIBOR for a 30 day interest period, plus 1.0%. Direct borrowings under the Credit Facility made by the Company's Canadian subsidiaries shall bear interest at the Canadian prime rate plus an applicable margin (varying from 0.25% to 0.75%) or at the Canadian BA rate plus an applicable margin (varying from 1.25% to 1.75%). The Canadian prime rate is based on the greater of (i) the Canadian prime rate, (ii) the Bank of Canada overnight rate, plus 0.5%, and (iii) the Canadian BA rate for a one month interest period, plus 1.0%. The applicable margins are calculated quarterly and vary based on the average daily availability of the aggregate borrowing base. The Company is also obligated to pay certain commitment, letter of credit and other fees customary for a credit facility of this size and type. As of February 3, 2018, the Company had \$1.0 million in outstanding standby letters of credit, no outstanding documentary letters of credit and no outstanding borrowings under the Credit Facility.

The Credit Facility requires the Company to comply with a fixed charge coverage ratio on a trailing four-quarter basis if a default or an event of default occurs under the Credit Facility or generally if borrowings exceed 80% of the borrowing base. In addition, the Credit Facility contains customary covenants, including covenants that limit or restrict the Company and certain of its subsidiaries' ability to: incur liens, incur indebtedness, make

Table of Contents

investments, dispose of assets, make certain restricted payments, merge or consolidate and enter into certain transactions with affiliates. Upon the occurrence of an event of default under the Credit Facility, the lenders may cease making loans, terminate the Credit Facility and declare all amounts outstanding to be immediately due and payable. The Credit Facility specifies a number of events of default (some of which are subject to applicable grace or cure periods), including, among other things, non-payment defaults, covenant defaults, cross-defaults to other material indebtedness, bankruptcy and insolvency defaults and material judgment defaults. The Credit Facility allows for both secured and unsecured borrowings outside of the Credit Facility up to specified amounts.

The Company, through its European subsidiaries, maintains short-term uncommitted borrowing agreements, primarily for working capital purposes, with various banks in Europe. The majority of the borrowings under these agreements are secured by specific accounts receivable balances. Based on the applicable accounts receivable balances as of February 3, 2018, the Company could have borrowed up to \$87.5 million under these agreements. As of February 3, 2018, the Company had no outstanding borrowings or outstanding documentary letters of credit under these agreements. The agreements are denominated primarily in euros and provide for annual interest rates ranging from 0.5% to 4.6%. The maturities of any short-term borrowings under these arrangements are generally linked to the credit terms of the underlying accounts receivable that secure the borrowings. With the exception of one facility for up to \$43.6 million that has a minimum net equity requirement, there are no other financial ratio covenants.

Mortgage Debt

On February 16, 2016, the Company entered into a ten-year \$21.5 million real estate secured loan (the "Mortgage Debt"). The Mortgage Debt is secured by the Company's U.S. distribution center based in Louisville, Kentucky and provides for monthly principal and interest payments based on a 25-year amortization schedule, with the remaining principal balance and any accrued and unpaid interest due at maturity. Outstanding principal balances under the Mortgage Debt bear interest at the one-month LIBOR rate plus 1.5%. As of February 3, 2018, outstanding borrowings under the Mortgage Debt, net of debt issuance costs of \$0.1 million, were \$20.3 million. At January 28, 2017, outstanding borrowings under the Mortgage Debt, net of debt issuance costs of \$0.1 million, were \$20.9 million. The Mortgage Debt requires the Company to comply with a fixed charge coverage ratio on a trailing four-quarter basis if consolidated cash, cash equivalents and short term investment balances fall below certain levels. In addition, the Mortgage Debt contains customary covenants, including covenants that limit or restrict the Company's ability to incur liens on the mortgaged property and enter into certain contractual obligations. Upon the occurrence of an event of default under the Mortgage Debt, the lender may terminate the Mortgage Debt and declare all amounts outstanding to be immediately due and payable. The Mortgage Debt specifies a number of events of default (some of which are subject to applicable grace or cure periods), including, among other things, non-payment defaults, covenant defaults, cross-defaults to other material indebtedness, bankruptcy and insolvency defaults and material judgment defaults. On February 16, 2016, the Company also entered into a separate interest rate swap agreement, designated as a cash flow hedge, that resulted in a swap fixed rate of approximately 3.06%. This interest rate swap agreement matures in January 2026 and converts the nature of the Mortgage Debt from LIBOR floating-rate debt to fixed-rate debt. The fair value of the interest rate swap asset as of February 3, 2018 and January 28, 2017 was approximately \$1.5 million and \$0.9 million, respectively.

Capital Lease Obligations

During fiscal 2018, the Company began the relocation of its European distribution center to the Netherlands. As a result, the Company entered into a capital lease of \$17.0 million for equipment used in the new facility. The capital lease primarily provides for monthly minimum lease payments through May 2027 with an effective interest rate of approximately 6%. As of February 3, 2018, the capital lease obligation was \$17.3 million.

During fiscal 2018, the Company also entered into a capital lease for \$1.5 million related primarily to computer hardware and software. As of February 3, 2018, this capital lease obligation was \$1.3 million.

Other

From time-to-time, the Company will obtain other financing in foreign countries for working capital to finance its local operations.

Table of Contents

Supplemental Executive Retirement Plan

On August 23, 2005, the Board of Directors of the Company adopted a Supplemental Executive Retirement Plan (“SERP”) which became effective January 1, 2006. The SERP provides select employees who satisfy certain eligibility requirements with certain benefits upon retirement, termination of employment, death, disability or a change in control of the Company, in certain prescribed circumstances.

As a non-qualified pension plan, no dedicated funding of the SERP is required; however, the Company has made periodic payments into insurance policies held in a rabbi trust to fund the expected obligations arising under the non-qualified SERP. The amount of any future payments into the insurance policies, if any, may vary depending on investment performance of the trust. The cash surrender values of the insurance policies were \$64.5 million and \$58.6 million as of February 3, 2018 and January 28, 2017, respectively, and were included in other assets in the Company’s consolidated balance sheets. As a result of changes in the value of the insurance policy investments, the Company recorded unrealized gains (losses) of \$7.7 million, \$6.9 million and \$(1.8) million in other income and expense during fiscal 2018, fiscal 2017 and fiscal 2016, respectively. The Company also recorded realized gains of \$0.7 million in other income resulting from payout on the insurance policies during fiscal 2016. The projected benefit obligation was \$54.8 million and \$53.5 million as of February 3, 2018 and January 28, 2017, respectively, and was included in accrued expenses and other long-term liabilities in the Company’s consolidated balance sheets depending on the expected timing of payments. SERP benefit payments of \$1.7 million were made during both fiscal 2018 and fiscal 2017.

Employee Stock Purchase Plan

The Company’s qualified employee stock purchase plan (“ESPP”) allows qualified employees (as defined) to participate in the purchase of designated shares of the Company’s common stock at a price equal to 85% of the lower of the closing price at the beginning or end of each quarterly stock purchase period. The Company has 4,000,000 shares of common stock registered under the ESPP. The Company’s ESPP will remain in effect through March 11, 2022. During the year ended February 3, 2018, 54,300 shares of the Company’s common stock were issued pursuant to the ESPP at an average price of \$10.45 per share for a total of \$0.6 million.

Inflation

The Company does not believe that inflation trends in the U.S. and internationally over the last three years have had a significant effect on net revenue or profitability.

Seasonality

The Company’s business is impacted by the general seasonal trends characteristic of the apparel and retail industries. The retail operations in the Americas and Europe are generally stronger during the second half of the fiscal year, and the wholesale operations in the Americas generally experience stronger performance from July through November. The European wholesale businesses operate with two primary selling seasons: the Spring/Summer season, which ships from November to April and the Fall/Winter season, which ships from May to October. The Company may take advantage of early-season demand and potential reorders in its European wholesale business by offering a pre-collection assortment which ships at the beginning of each season. Customers retain the ability to request early shipment of backlog orders or delay shipment of orders depending on their needs.

Table of Contents

Critical Accounting Policies and Estimates

The Consolidated Financial Statements are prepared in conformity with accounting principles generally accepted in the U.S., which require management to make estimates and assumptions that affect the reported amounts of the assets and liabilities and disclosures of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Management bases its estimates and judgments on its historical experience and other relevant factors, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Management evaluates its estimates and judgments on an ongoing basis including those related to the allowances for doubtful accounts, sales return and markdown allowances, gift card and loyalty accruals, valuation of inventories, share-based compensation, recoverability of deferred taxes, unrecognized tax benefits, the useful life of assets for depreciation and amortization, evaluation of asset impairment, pension obligations, workers' compensation and medical self-insurance expense and accruals, litigation reserves and restructuring expense and accruals.

The Company believes that the following significant accounting policies involve a higher degree of judgment and complexity. In addition to the accounting policies mentioned below, see Note 1 to the Consolidated Financial Statements for other significant accounting policies.

Allowances for Doubtful Accounts

In the normal course of business, the Company grants credit directly to certain wholesale customers after a credit analysis is performed based on financial and other criteria. Accounts receivable are recorded net of an allowance for doubtful accounts. The Company maintains allowances for doubtful accounts for estimated losses that result from the inability of its wholesale customers to make their required payments. The Company bases its allowances on analysis of the aging of accounts receivable at the date of the financial statements, assessments of historical collection trends, an evaluation of the impact of current economic conditions and whether the Company has obtained credit insurance or other guarantees.

Sales Return Allowances

The Company accrues for estimated sales returns in the period in which the related revenue is recognized. To recognize the financial impact of sales returns, the Company estimates the amount of goods that will be returned based on historical experience and reduces sales and cost of sales accordingly. The Company's policy allows retail customers in certain regions a grace period to return merchandise following the date of sale. Substantially all of these returns are considered to be resalable at a price that exceeds the cost of the merchandise.

Markdown Allowances

Costs associated with customer markdowns are recorded as a reduction to revenues, and any unapplied amounts are included in the allowance for accounts receivable. Historically, these markdown allowances resulted from seasonal negotiations with the Company's wholesale customers, as well as historical trends and the evaluation of the impact of economic conditions.

Gift Card Breakage

Gift card breakage is income recognized due to the non-redemption of a portion of gift cards sold by the Company for which a liability was recorded in prior periods. Gifts cards are mainly used in the U.S. and Canada. The Company issues its gift cards in the U.S. and Canada through one of its subsidiaries and is not required by law to escheat the value of unredeemed gift cards to the state in which the subsidiary is domiciled. Estimated breakage amounts are accounted for under the redemption recognition method and are classified as additional net revenues as the gift cards are redeemed. The Company determined a gift card breakage rate based upon historical redemption patterns, which represented the cumulative estimated amount of gift card breakage from the inception of the electronic gift card program in late 2002. Any future revisions to the estimated breakage rate may result in changes in the amount of breakage income recognized in future periods. See Note 1 to the Consolidated Financial Statements for further information regarding the recognition of gift card breakage.

Loyalty Programs

The Company has customer loyalty programs in North America, Europe and Asia which cover all of its brands. Under certain of the programs, primarily in the U.S. and Canada, customers accumulate points based on purchase

Table of Contents

activity. Once a loyalty program member achieves a certain point level, the member earns awards that may only be redeemed for merchandise. Unredeemed points generally expire after six months without additional purchase activity and unredeemed awards generally expire after two months. The Company uses historical redemption rates to estimate the value of future award redemptions which are accrued in current liabilities and recorded as a reduction of net revenue in the period which the related revenue is recognized. The aggregate dollar value of the loyalty program accruals included in accrued expenses was \$3.8 million and \$4.0 million as of February 3, 2018 and January 28, 2017, respectively. Future revisions to the estimated liability may result in changes to net revenue.

Inventory Reserves

Inventories are valued at the lower of cost (primarily weighted average method) or net realizable value. The Company continually evaluates its inventories by assessing slow moving product as well as prior seasons' inventory. Net realizable value of aged inventory is estimated based on historical sales trends for each product line category, the impact of market trends, an evaluation of economic conditions, available liquidation channels and the value of current orders relating to the future sales of this type of inventory. The Company closely monitors off-price sales to ensure the actual results closely match initial estimates. Estimates are regularly updated based upon this continuing review.

Share-Based Compensation

The Company recognizes compensation expense for all share-based awards granted based on the grant date fair value. The fair value of each stock option is estimated on the grant date using the Black-Scholes option-pricing model and involves several assumptions, including the risk-free interest rate, expected volatility, dividend yield and expected life. The risk-free interest rate is based on the U.S. Treasury yield curve in effect for the expected term of the option at the time of grant. The expected stock price volatility is determined based on an average of both historical volatility and implied volatility. Implied volatility is derived from exchange traded options on the Company's common stock. The expected dividend yield is based on the Company's history and expectations of dividend payouts. The expected life is determined based on historical trends. Compensation expense for nonvested stock options and stock awards/units that are not subject to performance-based vesting conditions is recognized on a straight-line basis over the vesting period. During fiscal 2018, the Company adopted authoritative guidance which eliminates the requirement to estimate forfeitures, but rather provides for an election that would allow entities to account for forfeitures as they occur. In addition, the Company has granted certain nonvested units that require certain minimum performance targets to be achieved in order for these awards to vest. Vesting is also subject to continued service requirements through the vesting date. Compensation expense for performance-based awards that vest in increments is recognized based on an accelerated attribution method. If the minimum performance targets are not forecasted to be achieved, no expense is recognized during the period.

The Company has also granted certain nonvested stock units which are subject to market-based performance targets in order for these units to vest. Vesting is also subject to continued service requirements through the vesting date. The grant date fair value for such nonvested stock units was estimated using a Monte Carlo simulation that incorporates option-pricing inputs covering the period from the grant date through the end of the performance period.

Compensation expense for such nonvested stock units is recognized on a straight-line basis over the vesting period, regardless of whether the market condition is satisfied.

During fiscal 2016, the Company granted certain restricted stock units which vested immediately but were considered contingently returnable as a result of certain service conditions. Compensation expense for these restricted stock units was recognized on a straight-line basis over the implied service period.

Derivatives

Foreign Exchange Currency Contracts

The Company operates in foreign countries, which exposes it to market risk associated with foreign currency exchange rate fluctuations. The Company has entered into certain forward contracts to hedge the risk of foreign currency rate fluctuations. The Company has elected to apply the hedge accounting rules in accordance with authoritative guidance for certain of these hedges.

Table of Contents

The Company's primary objective is to hedge the variability in forecasted cash flows due to the foreign currency risk. Various transactions that occur primarily in Europe, Canada, South Korea, China and Mexico are denominated in U.S. dollars, British pounds and Russian roubles and thus are exposed to earnings risk as a result of exchange rate fluctuations when converted to their functional currencies. These types of transactions include U.S. dollar denominated purchases of merchandise and U.S. dollar and British pound denominated intercompany liabilities. In addition, certain operating expenses, tax liabilities and pension-related liabilities are denominated in Swiss francs and are exposed to earnings risk as a result of exchange rate fluctuations when converted to the functional currency. The Company enters into derivative financial instruments, including forward exchange currency contracts, to offset some but not all of the exchange risk on certain of these anticipated foreign currency transactions. Changes in the fair value of forward contracts designated as cash flow hedges are recorded as a component of accumulated other comprehensive income (loss) within stockholders' equity and are recognized in cost of product sales or other income and expense in the period which approximates the time the hedged merchandise inventory is sold or the hedged intercompany liability is incurred.

Periodically, the Company may also use foreign exchange currency contracts to hedge the translation and economic exposures related to its net investments in certain of its international subsidiaries. Changes in the fair value of these U.S. dollar forward contracts, designated as net investment hedges, are recorded in foreign currency translation adjustment as a component of accumulated other comprehensive income (loss) within stockholders' equity and are not recognized in earnings (loss) until the sale or liquidation of the hedged net investment.

The Company also has foreign exchange currency contracts that are not designated as hedging instruments for accounting purposes. Changes in fair value of foreign exchange currency contracts not designated as hedging instruments are reported in net earnings (loss) as part of other income and expense.

Interest Rate Swap Agreements

The Company is exposed to interest rate risk on its floating-rate debt. The Company has entered into interest rate swap agreements to effectively convert its floating-rate debt to a fixed-rate basis. The principal objective of these contracts is to eliminate or reduce the variability of the cash flows in interest payments associated with the Company's floating-rate debt, thus reducing the impact of interest rate changes on future interest payment cash flows. The Company has elected to apply the hedge accounting rules in accordance with authoritative guidance for certain of these contracts. Changes in the fair value of interest rate swap agreements designated as cash flow hedges are recorded as a component of accumulated other comprehensive income (loss) within stockholders' equity and are amortized to interest expense over the term of the related debt. Periodically, the Company may also enter into interest rate swap agreements that are not designated as hedging instruments for accounting purposes. Changes in the fair value of interest rate swap agreements not designated as hedging instruments are reported in net earnings (loss) as part of other income and expense.

Income Taxes

The Company adopted authoritative guidance which clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements and prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. For those benefits to be recognized, a tax position must be more likely than not to be sustained upon examination by taxing authorities. Guidance was also provided on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The Company's continuing practice is to recognize interest and penalties related to income tax matters in income tax expense. As required under applicable accounting rules, the Company accrues an amount for its estimate of additional income tax liability which the Company, more likely than not, will incur as a result of the ultimate resolution of income tax audits ("uncertain tax positions"). The Company reviews and updates the estimates used in the accrual for uncertain tax positions as more definitive information becomes available from taxing authorities, upon completion of tax audits, upon expiration of statutes of limitation, or upon occurrence of other events. The results of operations and financial position for future periods could be impacted by changes in assumptions or resolutions of tax audits.

Deferred tax assets and liabilities are determined based on differences between financial reporting bases and tax bases of assets and liabilities and are measured using the enacted tax rates expected to apply to taxable income in the periods in which the deferred tax asset or liability is expected to be realized or settled. Deferred tax assets are

Table of Contents

reduced by valuation allowances if we believe it is more likely than not that some portion or the entire asset will not be realized. The Company has provided for any additional tax liabilities on amounts that are estimated to be repatriated from foreign operations as a result of the Tax Reform. We have not provided for other income taxes on undistributed foreign earnings expected to be reinvested outside the U.S. If in the future we decide to repatriate such earnings, we would incur other incremental taxes. Our current plans do not indicate a need to repatriate them to fund our U.S. cash requirements.

Valuation of Goodwill, Intangible and Other Long-Lived Assets

The Company assesses the impairment of its long-lived assets (i.e., goodwill, intangible assets and property and equipment), which requires the Company to make assumptions and judgments regarding the carrying value of these assets on an annual basis, or more frequently if events or changes in circumstances indicate that the assets might be impaired. For goodwill, determination of impairment is made at the reporting unit level which may be either an operating segment or one level below an operating segment if discrete financial information is available. Two or more reporting units within an operating segment may be aggregated for impairment testing if they have similar economic characteristics. The Company has identified its Americas Retail segment, its Americas Wholesale segment, its European wholesale and European retail components of its Europe segment and its China retail component of its Asia segment as reporting units for goodwill impairment testing. For long-lived assets (other than goodwill), the majority relate to its retail operations which consist primarily of regular retail and flagship locations. The Company considers each individual regular retail location as an asset group for impairment testing, which is the lowest level at which individual cash flows can be identified. The asset group includes leasehold improvements, furniture, fixtures and equipment, computer hardware and software and certain long-term security deposits and lease acquisition costs. The Company reviews regular retail locations in penetrated markets for impairment risk once the locations have been opened for at least one year in their current condition, or sooner as changes in circumstances require. The Company believes that waiting at least one year allows a location to reach a maturity level where a more comprehensive analysis of financial performance can be performed. The Company evaluates impairment risk for regular retail locations in new markets, where the Company is in the early stages of establishing its presence, once brand awareness has been established. The Company also evaluates impairment risk for retail locations that are expected to be closed in the foreseeable future. The Company has flagship locations which are used as a regional marketing tool to build brand awareness and promote the Company's current product. Impairment for these locations is tested at a reporting unit level similar to goodwill since they do not have separately identifiable cash flows.

An asset is considered to be impaired if the Company determines that the carrying value may not be recoverable based upon its assessment of the asset's ability to continue to generate earnings from operations and positive cash flow in future periods or if significant changes in the Company's strategic business objectives and utilization of the assets occurred. If the assets (other than goodwill) are assessed to be recoverable, they are depreciated or amortized over the periods benefited. If the assets are considered to be impaired, an impairment charge is recognized representing the amount by which the carrying value of the assets exceeds the fair value of those assets. Fair value is determined based upon the discounted cash flows derived from the underlying asset. The Company uses various assumptions in determining current fair market value of these assets, including future expected cash flows and discount rates. Future expected cash flows for assets in regular retail locations are based on management's estimates of future cash flows over the remaining lease period or expected life, if shorter. For expected location closures, the Company will evaluate whether it is necessary to shorten the useful life for any of the assets within the respective asset group. The Company will use this revised useful life when estimating the asset group's future cash flows. The Company considers historical trends, expected future business trends and other factors when estimating the future cash flow for each regular retail location. The Company also considers factors such as: the local environment for each regular retail location, including mall traffic and competition; the Company's ability to successfully implement strategic initiatives; and the ability to control variable costs such as cost of sales and payroll and, in some cases, renegotiate lease costs. If actual results are not consistent with the assumptions and judgments used in estimating future cash flows and asset fair values, there may be additional exposure to future impairment losses that could be material to the Company's results of operations. See Notes 1 and 5 to the Consolidated Financial Statements for further discussion.

Pension Benefit Plan Actuarial Assumptions

The Company's pension obligations and related costs are calculated using actuarial concepts, within the authoritative guidance framework. The Company uses the corridor approach to amortize unrecognized actuarial gains

Table of Contents

or losses over the average remaining service life of active participants. The life expectancy, estimated retirement age, discount rate, estimated future compensation and expected return on plan assets are important elements of expense and/or liability measurement. These critical assumptions are evaluated annually which enables expected future payments for benefits to be stated at present value on the measurement date. If actual results are not consistent with actuarial assumptions, the amounts recognized for the defined benefit plans could change significantly. Refer to Note 12 to the Consolidated Financial Statements for detail regarding the Company's defined benefit plans.

Litigation Reserves

Estimated amounts for claims that are probable and can be reasonably estimated are recorded as liabilities in the consolidated balance sheets. As additional information becomes available, the Company assesses the potential liability related to new claims and existing claims and revises estimates as appropriate. As new claims arise or existing claims evolve, such revisions in estimates of the potential liability could materially impact the results of operations and financial position.

Recently Issued Accounting Guidance

In May 2014, the Financial Accounting Standards Board ("FASB") issued a comprehensive new revenue recognition standard which will supersede previous existing revenue recognition guidance. The standard is intended to clarify the principles of recognizing revenue and create common revenue recognition guidance between GAAP and International Financial Reporting Standards. The standard also requires expanded disclosures surrounding revenue recognition.

During fiscal 2017, the FASB issued additional clarification guidance on the new revenue recognition standard which also included certain scope improvements and practical expedients. The standard (including clarification guidance issued) is effective for fiscal periods beginning after December 15, 2017, which will be the Company's first quarter of fiscal 2019, and allows for either full retrospective or modified retrospective adoption, with early adoption permitted.

The Company has adopted this guidance using the modified retrospective method beginning in the first quarter of fiscal 2019. The Company's assessment efforts have included reviewing current revenue processes, arrangements and accounting policies to identify potential differences that could arise from the application of this standard on its consolidated financial statements and related disclosures. While the Company does not expect the adoption of this standard to have a material impact on its consolidated financial statements, the Company expects there to be differences related primarily to the classification and timing of when revenue and certain expenses are recognized from its licensing business. These differences relate primarily to changes in the presentation of advertising contributions received from the Company's licensees and related advertising expenditures incurred by the Company.

The Company currently records advertising contributions received from its licensees and the related advertising expenditures incurred by the Company on a net basis in its consolidated balance sheet. To the extent that the advertising contributions exceed the Company's advertising expenditures for its licensees, the excess contribution is treated as a deferred liability and is included in accrued expenses in the Company's consolidated balance sheet. Under the new standard, advertising contributions and related advertising expenditures related to the Company's licensing business will be recorded on a gross basis which will increase net revenue as well as SG&A expenses. The Company also expects revenue related to its e-commerce operations to be recognized when merchandise is transferred to a common carrier rather than upon receipt by the customer, as well as adjustments to the accounting for the Company's loyalty programs due to a slight change in the valuation of the amount that is deferred related to points earned. Additionally, allowances for wholesale sales returns and wholesale markdowns will be presented as accrued expenses rather than as reductions to accounts receivable and the estimated cost of inventory associated with the allowance for sales returns will be presented within other current assets in the Company's consolidated balance sheet.

In January 2016, the FASB issued authoritative guidance which requires equity investments not accounted for under the equity method of accounting or consolidation accounting to be measured at fair value, with subsequent changes in fair value recognized in net income. In February 2018, the FASB issued additional clarification guidance which made targeted improvements to address certain aspects of recognition, measurement, presentation and disclosure requirements for financial instruments. The original guidance is effective for fiscal years beginning after December 15, 2017, which will be the Company's first quarter of fiscal 2019, and requires a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption. The clarification guidance is effective for fiscal years

beginning after December 15, 2017 and interim periods beginning after June 15, 2015, which will be the Company's third quarter of fiscal 2019. The clarification guidance may be early adopted, provided that the

Table of Contents

original guidance issued has been adopted. The adoption of this guidance (including the clarification guidance) is not expected to have a material impact on the Company's consolidated financial statements or related disclosures unless the Company acquires new equity investments.

In February 2016, the FASB issued a comprehensive new lease standard which will supersede previous lease guidance. The standard requires a lessee to recognize assets and liabilities related to long-term leases that were classified as operating leases under previous guidance in its balance sheet. An asset would be recognized related to the right to use the underlying asset and a liability would be recognized related to the obligation to make lease payments over the term of the lease. The standard also requires expanded disclosures surrounding leases. The standard is effective for fiscal periods beginning after December 15, 2018, which will be the Company's first quarter of fiscal 2020, and requires modified retrospective adoption, with early adoption permitted. The Company expects that this adoption will result in material increases in assets and liabilities in its consolidated balance sheet as well as enhanced disclosures. The Company is in the process of implementing controls and system changes to enable the preparation of the required financial information for this standard.

In June 2016, the FASB issued authoritative guidance related to the measurement of credit losses on financial instruments. This guidance is effective for fiscal years beginning after December 15, 2019, which will be the Company's first quarter of fiscal 2021. Early adoption is permitted for fiscal periods beginning after December 15, 2018, which will be the Company's first quarter of fiscal 2020. The Company is currently evaluating the impact of the adoption of this standard on its consolidated financial statements and related disclosures.

In October 2016, the FASB issued authoritative guidance which amends the accounting for income taxes on intra-entity transfers of assets other than inventory. This guidance requires that entities recognize the income tax consequences of an intra-entity transfer of an asset, other than inventory, when the transfer occurs. The income tax consequences on intra-entity transfers of inventory will continue to be deferred until the inventory has been sold to a third party. This guidance is effective for fiscal years beginning after December 15, 2017, which will be the Company's first quarter of fiscal 2019, and requires a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption. Early adoption is permitted at the beginning of a fiscal year. The adoption of this guidance is not expected to have a material impact on the Company's consolidated financial statements or related disclosures.

In January 2017, the FASB issued authoritative guidance to simplify the testing for goodwill impairment by removing step two from the goodwill testing. Under current guidance, if the fair value of a reporting unit is lower than its carrying amount (step one), an entity would calculate an impairment charge by comparing the implied fair value of goodwill with its carrying amount (step two). The implied fair value of goodwill was calculated by deducting the fair value of the assets and liabilities of the respective reporting unit from the reporting unit's fair value as determined under step one. This guidance instead provides that an impairment charge should be recognized based on the difference between a reporting unit's fair value and its carrying value. This guidance also does not require a qualitative test to be performed on reporting units with zero or negative carrying amounts. However, entities need to disclose any reporting units with zero or negative carrying amounts that have goodwill and the amount of goodwill allocated to each. This guidance is effective for fiscal years beginning after December 15, 2019, which will be the Company's first quarter of fiscal 2021, with early adoption permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. The adoption of this guidance is not expected to have a material impact on the Company's consolidated financial statements or related disclosures.

In March 2017, the FASB issued authoritative guidance related to the presentation of net periodic pension cost in the income statement. This guidance requires that the service cost component of net periodic pension cost is presented in the same line as other compensation costs arising from services rendered by the employees during the period. The other non-service components of net periodic pension cost are required to be presented in the income statement separately from the service cost component and outside of earnings from operations. This guidance also allows for the service cost component to be eligible for capitalization when applicable. This guidance is effective for fiscal years beginning after December 15, 2017, which will be the Company's first quarter of fiscal 2019, and requires retrospective adoption for the presentation of the service cost component and other non-service components of net

periodic pension cost in the income statement and prospective adoption for capitalization of the service cost component. Other than the change in presentation of other non-service components of net periodic pension cost

Table of Contents

within the Company's consolidated statements of income, the adoption of this guidance is not expected to have an impact on the Company's consolidated financial statements and related disclosures.

In May 2017, the FASB issued authoritative guidance that provides clarification on accounting for modifications in share-based payment awards. This guidance is effective for fiscal years beginning after December 15, 2017, which will be the Company's first quarter of fiscal 2019, with early adoption permitted. The adoption of this guidance is not expected to have an impact on the Company's consolidated financial statements or related disclosures unless there are modifications to the Company's share-based payment awards.

In August 2017, the FASB issued authoritative guidance to better align the results of hedge accounting with an entity's risk management activities. This guidance updates the designation and measurement guidance for qualifying hedging relationships and the presentation of hedge results in the financial statements. This guidance is effective for fiscal years beginning after December 15, 2018, which will be the Company's first quarter of fiscal 2020, and requires a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption, with early adoption permitted. The updated presentation and disclosure guidance is required only on a prospective basis. The Company is currently evaluating the impact of the adoption of this standard on its consolidated financial statements and related disclosures.

ITEM 7A. Quantitative and Qualitative Disclosures About Market Risk.

Exchange Rate Risk

More than half of product sales and licensing revenue recorded for the year ended February 3, 2018 were denominated in currencies other than the U.S. dollar. The Company's primary exchange rate risk relates to operations in Europe, Canada, South Korea, China and Mexico. Changes in currencies affect our earnings in various ways. For further discussion on currency-related risk, please refer to our risk factors under "Part I, Item 1A. Risk Factors."

Various transactions that occur primarily in Europe, Canada, South Korea, China and Mexico are denominated in U.S. dollars, British pounds and Russian roubles and thus are exposed to earnings risk as a result of exchange rate fluctuations when converted to their functional currencies. These types of transactions include U.S. dollar denominated purchases of merchandise and U.S. dollar and British pound denominated intercompany liabilities. In addition, certain operating expenses, tax liabilities and pension-related liabilities are denominated in Swiss francs and are exposed to earnings risk as a result of exchange rate fluctuations when converted to the functional currency. The Company is also subject to certain translation and economic exposures related to its net investment in certain of its international subsidiaries. The Company enters into derivative financial instruments to offset some but not all of its exchange risk. In addition, some of the derivative contracts in place will create volatility during the fiscal year as they are marked-to-market according to the accounting rules and may result in revaluation gains or losses in different periods from when the currency impact on the underlying transactions are realized.

Foreign Exchange Currency Contracts Designated as Cash Flow Hedges

During fiscal 2018, the Company purchased U.S. dollar forward contracts in Europe and Canada totaling US\$147.6 million and US\$25.7 million, respectively, that were designated as cash flow hedges. As of February 3, 2018, the Company had forward contracts outstanding for its European and Canadian operations of US\$145.8 million and US\$38.7 million, respectively, to hedge forecasted merchandise purchases and intercompany royalties, which are expected to mature over the next 17 months. The Company's derivative financial instruments are recorded in its consolidated balance sheet at fair value based on quoted market rates. Changes in the fair value of the U.S. dollar forward contracts, designated as cash flow hedges for forecasted merchandise purchases, are recorded as a component of accumulated other comprehensive income (loss) within stockholders' equity and are recognized in cost of product sales in the period which approximates the time the hedged merchandise inventory is sold. Changes in the fair value of the U.S. dollar forward contracts, designated as cash flow hedges for forecasted intercompany royalties, are recorded as a component of accumulated other comprehensive income (loss) within stockholders' equity and are recognized in other income and expense in the period in which the royalty expense is incurred.

Table of Contents

As of February 3, 2018, accumulated other comprehensive income (loss) related to foreign exchange currency contracts included a net unrealized loss of approximately \$15.5 million, net of tax, of which \$10.0 million will be recognized in cost of product sales or other expense over the following 12 months, at the then current values on a pre-tax basis, which can be different than the current year-end values. As of February 3, 2018, the net unrealized loss of the remaining open forward contracts recorded in the Company's consolidated balance sheet was approximately \$13.7 million.

At January 28, 2017, the Company had forward contracts outstanding for its European and Canadian operations of US\$104.2 million and US\$66.9 million, respectively, that were designated as cash flow hedges. At January 28, 2017, the net unrealized gain of these open forward contracts recorded in the Company's consolidated balance sheet was approximately \$4.8 million.

Derivatives Not Designated as Hedging Instruments

The Company also has foreign exchange currency contracts that are not designated as hedging instruments for accounting purposes. Changes in fair value of foreign exchange currency contracts not designated as hedging instruments are reported in net earnings (loss) as part of other income and expense. For the year ended February 3, 2018, the Company recorded a net loss of \$10.5 million for its euro and Canadian dollar foreign currency contracts not designated as hedges, which has been included in other expense. As of February 3, 2018, the Company had euro foreign exchange currency contracts to purchase US\$68.2 million expected to mature over the next 12 months and Canadian dollar foreign exchange currency contracts to purchase US\$17.6 million expected to mature over the next 11 months. As of February 3, 2018, the net unrealized loss of these open forward contracts recorded in the Company's consolidated balance sheet was approximately \$4.3 million.

At January 28, 2017, the Company had euro foreign exchange currency contracts to purchase US\$81.4 million and Canadian dollar foreign exchange currency contracts to purchase US\$13.9 million. At January 28, 2017, the net unrealized gain of these open forward contracts recorded in the Company's consolidated balance sheet was approximately \$3.6 million.

Sensitivity Analysis

As of February 3, 2018, a sensitivity analysis of changes in foreign currencies when measured against the U.S. dollar indicates that, if the U.S. dollar had uniformly weakened by 10% against all of the U.S. dollar denominated foreign exchange derivatives totaling US\$270.3 million, the fair value of the instruments would have decreased by \$30.0 million. Conversely, if the U.S. dollar uniformly strengthened by 10% against all of the U.S. dollar denominated foreign exchange derivatives, the fair value of these instruments would have increased by \$24.6 million. Any resulting changes in the fair value of the hedged instruments may be partially offset by changes in the fair value of certain balance sheet positions (primarily U.S. dollar denominated liabilities in our foreign operations) impacted by the change in the foreign currency rate. The ability to reduce the exposure of currencies on earnings depends on the magnitude of the derivatives compared to the balance sheet positions during each reporting cycle.

Table of Contents**Interest Rate Risk**

The Company is exposed to interest rate risk on its floating-rate debt. The Company has entered into interest rate swap agreements to effectively convert its floating-rate debt to a fixed-rate basis. The principal objective of these contracts is to eliminate or reduce the variability of the cash flows in interest payments associated with the Company's floating-rate debt, thus reducing the impact of interest rate changes on future interest payment cash flows. The Company has elected to apply the hedge accounting rules in accordance with authoritative guidance for certain of these contracts.

Interest Rate Swap Agreement Designated as Cash Flow Hedge

During fiscal 2017, the Company entered into an interest rate swap agreement with a notional amount of \$21.5 million, designated as a cash flow hedge, to hedge the variability of cash flows in interest payments associated with the Company's floating-rate debt. This interest rate swap agreement matures in January 2026 and converts the nature of the Company's real estate secured term loan from LIBOR floating-rate debt to fixed-rate debt, resulting in a swap fixed rate of approximately 3.06%. The fair value of the interest rate swap agreement is based upon inputs corroborated by observable market data. Changes in the fair value of the interest rate swap agreement, designated as a cash flow hedge to hedge the variability of cash flows in interest payments associated with the Company's floating-rate debt, are recorded as a component of accumulated other comprehensive income (loss) within stockholders' equity and are amortized to interest expense over the term of the related debt.

As of February 3, 2018, accumulated other comprehensive income (loss) related to the interest rate swap agreement included a net unrealized gain of approximately \$1.1 million, net of tax, which will be recognized in interest expense after the following 12 months, at the then current values on a pre-tax basis, which can be different than the current year-end values. As of February 3, 2018, the net unrealized gain of the interest rate swap recorded in the Company's consolidated balance sheet was approximately \$1.5 million.

At January 28, 2017, the net unrealized gain of the interest rate swap recorded in the Company's condensed consolidated balance sheet was approximately \$0.9 million.

Sensitivity Analysis

As of February 3, 2018, approximately 93% of the Company's total indebtedness related to a real estate secured term loan and capital lease obligations. The real estate secured loan is covered by a separate interest rate swap agreement with a swap fixed interest rate of approximately 3.06% that matures in January 2026. The interest rate swap agreement is designated as a cash flow hedge and converts the nature of the Company's real estate secured term loan from LIBOR floating-rate debt to fixed-rate debt. The capital lease obligations are based on fixed interest rates derived from the respective agreements.

The Company's remaining indebtedness is at variable rates of interest. Accordingly, changes in interest rates would impact the Company's results of operations in future periods. A 100 basis point increase in interest rates would have had an insignificant effect on interest expense for the year ended February 3, 2018.

The fair value of the Company's debt instruments are based on the amount of future cash flows associated with each instrument discounted using the Company's incremental borrowing rate. As of February 3, 2018 and January 28, 2017, the carrying value of all financial instruments was not materially different from fair value, as the interest rates on the Company's debt approximated rates currently available to the Company.

Table of Contents

Derivatives Designated as Hedging Instruments

The following table summarizes net after-tax activity related to the Company's foreign exchange currency contracts and interest rate swap agreement designated as cash flow hedges recorded in accumulated other comprehensive income (loss) (in thousands):

	Year Ended Feb 3, 2018	Year Ended Jan 28, 2017
Beginning balance gain	\$5,400	\$7,252
Net gains (losses) from changes in cash flow hedges	(20,408)	1,059
Net (gains) losses reclassified to earnings (loss)	414	(2,911)
Net losses reclassified to retained earnings (1)	225	—
Ending balance gain (loss)	\$(14,369)	\$5,400

During the fourth quarter of fiscal 2018, the Company early adopted authoritative guidance which addresses certain stranded income tax effects in accumulated other comprehensive income (loss) resulting from the Tax Reform (1) enacted in December 2017. As a result, the Company recorded a cumulative adjustment to reduce retained earnings by \$0.2 million with a corresponding increase to accumulated other comprehensive income (loss) related to the Company's interest rate swap designated as a cash flow hedge.

ITEM 8. Financial Statements and Supplementary Data.

The information required by this Item is incorporated herein by reference to the Consolidated Financial Statements and Supplementary Data listed in "Item 15" of Part IV of this report.

ITEM 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

None.

ITEM 9A. Controls and Procedures.

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Based on this evaluation, our principal executive officer and our principal financial officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this annual report.

Management's Report on Internal Control Over Financial Reporting

The SEC, as directed by Section 404 of the Sarbanes-Oxley Act of 2002, adopted rules which require the Company to include in its Annual Reports on Form 10-K, an assessment by management of the effectiveness of the Company's internal control over financial reporting as defined in Rule 13a-15(f) under the Exchange Act. In addition, the Company's independent auditors must attest to and report on the effectiveness of the Company's internal control over financial reporting.

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) under the Exchange Act. The Company's internal control over financial reporting is designed to provide reasonable assurance to the Company's management and Board of Directors regarding the preparation and fair presentation of published financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

The Company's management carried out an evaluation, under the supervision and with the participation of the Company's principal executive officer and principal financial officer, of the effectiveness of the Company's internal

Table of Contents

control over financial reporting based on the framework in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 Framework). Based upon this evaluation, under the framework in Internal Control—Integrated Framework, our management concluded that our internal control over financial reporting was effective as of February 3, 2018.

Ernst & Young LLP, the independent registered public accounting firm that audited the Company's financial statements as of and for the fiscal year ended February 3, 2018 included in this Annual Report on Form 10-K has issued an attestation report on the Company's internal control over financial reporting, which is set forth below.

Changes in Internal Control Over Financial Reporting

There was no change in our internal control over financial reporting during the fourth quarter of fiscal 2018 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders of Guess?, Inc. and Subsidiaries

Opinion on Internal Control Over Financial Reporting

We have audited Guess?, Inc. and subsidiaries' internal control over financial reporting as of February 3, 2018, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, Guess?, Inc. and subsidiaries (the Company) maintained, in all material respects, effective internal control over financial reporting as of February 3, 2018, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of February 3, 2018 and January 28, 2017, the related consolidated statements of income (loss), comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended February 3, 2018, and the related notes and the financial statement schedule listed in the Index at ITEM 15(a)(2) and our report dated March 29, 2018 expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements..

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

ITEM 9B. Other Information.

On March 27, 2018, the Board of Directors of the Company approved an immediately effective amendment and restatement of the Bylaws of the Company (the “Third Amended and Restated Bylaws”) which added a new Article XI. The new Article XI provides that, unless the Company consents in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware (or, if the Court of Chancery does not have jurisdiction, another state court located within the State of Delaware or, if no state court located within the State of Delaware has jurisdiction, the federal district court for the District of Delaware) shall, to the fullest extent permitted by law, be the sole and exclusive forum for (a) any derivative action or proceeding brought on behalf of the Company, (b) any action asserting a claim of breach of a fiduciary duty owed by any director, officer or other employee of the Company to the Company or the Company’s stockholders, (c) any action asserting a claim arising pursuant to any provision of the General Corporation law of the State of Delaware, the Certificate of Incorporation of the Company or the Bylaws of the Company, and (d) any action asserting a claim against the Company or any director or officer or other employee of the Company governed by the internal affairs doctrine.

The Third Amended and Restated Bylaws are filed as Exhibit 3.2 to this Annual Report on Form 10-K and are incorporated by reference herein. The foregoing summary is qualified in its entirety by reference to the full text of the Third Amended and Restated Bylaws.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders of Guess?, Inc. and Subsidiaries

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Guess?, Inc. and subsidiaries (the Company) as of February 3, 2018 and January 28, 2017, and the related consolidated statements of income (loss), comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended February 3, 2018, and the related notes and the financial statement schedule listed in the Index at ITEM 15(a)(2) (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company at February 3, 2018 and January 28, 2017, and the results of its operations and its cash flows for each of the three years in the period ended February 3, 2018, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of February 3, 2018, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated March 29, 2018 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements and schedule based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

GUESS?, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(1) Description of the Business and Summary of Significant Accounting Policies and Practices

Description of the Business

Guess?, Inc. (the “Company” or “GUESS?”) designs, markets, distributes and licenses a leading lifestyle collection of contemporary apparel and accessories for men, women and children that reflect the American lifestyle and European fashion sensibilities. The Company’s designs are sold in GUESS? owned stores, to a network of wholesale accounts that includes better department stores, selected specialty retailers and upscale boutiques and through the Internet. GUESS? branded products, some of which are produced under license, are also sold internationally through a series of retail store licensees and wholesale distributors.

Correction of Immaterial Error

During the year ended February 3, 2018, the Company identified an immaterial error related to the classification of net royalties received on the Company’s purchases of licensed product. The Company’s typical license agreement requires the licensee to pay the Company a royalty based on the licensee’s net sales of licensed products, which in certain cases also includes licensed inventory that was purchased by the Company. Historically, the Company has included royalties received on the Company’s purchases of licensed product in net royalties generated from its Licensing segment. However, in connection with the Company’s review of the new revenue recognition standard, it was determined that such royalties received should be recorded as a reduction of the cost of the licensed product under existing revenue recognition guidance. As a result, during the fourth quarter of fiscal 2018, the Company reclassified net royalties received on the Company’s inventory purchases of licensed product from net revenue to cost of product sales. Accordingly, prior period amounts related to net royalties, net revenue and cost of product sales have been adjusted to conform to the current period presentation. This resulted in a decrease to net revenue and cost of product sales of \$18.9 million and \$19.8 million for fiscal 2017 and fiscal 2016, respectively. This reclassification had no impact on previously reported earnings (loss) from operations, net earnings (loss) or net earnings (loss) per share.

Reclassifications

The Company has made certain reclassifications to prior period amounts to conform to the current period presentation within the accompanying notes to the consolidated financial statements.

Fiscal Year

The Company operates on a 52/53-week fiscal year calendar, which ends on the Saturday nearest to January 31 of each year. All references herein to “fiscal 2018,” “fiscal 2017” and “fiscal 2016” represent the results of the 53-week fiscal year ended February 3, 2018 and the 52-week fiscal years ended January 28, 2017 and January 30, 2016. The additional week in fiscal 2018 occurred during the fourth quarter ended February 3, 2018. References to “fiscal 2019” represent the 52-week fiscal year ending February 2, 2019.

Principles of Consolidation

The consolidated financial statements include the accounts of Guess?, Inc., its wholly-owned direct and indirect subsidiaries and its non-wholly-owned subsidiaries and joint ventures in which the Company has a controlling financial interest and is determined to be the primary beneficiary. Accordingly, all references herein to “Guess?, Inc.” include the consolidated results of the Company, its wholly-owned subsidiaries and its joint ventures. All intercompany accounts and transactions are eliminated during the consolidation process.

Use of Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the U.S. requires management to make estimates and assumptions that affect the amounts reported in the financial statements and disclosed in the accompanying notes. Significant areas requiring the use of management estimates relate to the allowances for doubtful accounts, sales return and markdown allowances, gift card and loyalty accruals, valuation of inventories, share-based compensation, recoverability of deferred taxes, unrecognized tax benefits, the useful life of assets for depreciation and amortization, evaluation of asset impairment, pension obligations, workers’ compensation and medical self-insurance expense and accruals, litigation reserves and restructuring expense and accruals. Actual results could differ from those estimates.

GUESS?, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Business Segment Reporting

Where applicable, the Company reports information about business segments and related disclosures about products and services, geographic areas and major customers. The Company's businesses are grouped into five reportable segments for management and internal financial reporting purposes: Americas Retail, Americas Wholesale, Europe, Asia and Licensing. The Company's Americas Retail, Americas Wholesale, Europe and Licensing reportable segments are the same as their respective operating segments. Certain components of the Company's Asia reportable segment are separate operating segments based on region which have been aggregated into the Asia reportable segment for disclosure purposes. During fiscal 2018, net revenue and related costs and expenses for certain globally serviced customers were reclassified into the segment primarily responsible for the relationship. During fiscal 2018, segment results were also adjusted to exclude corporate performance-based compensation costs, net gains (losses) on lease terminations and asset impairment charges due to the fact that these items are no longer included in the segment results provided to the Company's chief operating decision maker in order to allocate resources and assess performance. Accordingly, segment results have been adjusted for fiscal 2017 and fiscal 2016 to conform to the current period presentation. Management evaluates segment performance based primarily on revenues and earnings (loss) from operations before corporate performance-based compensation costs, net gains (losses) from lease terminations, asset impairment charges and restructuring charges, if any. The Company believes this segment reporting reflects how its business segments are managed and how each segment's performance is evaluated by the Company's chief operating decision maker to assess performance and make resource allocation decisions. The Americas Retail segment includes the Company's retail and e-commerce operations in North and Central America and its retail operations in South America. The Americas Wholesale segment includes the Company's wholesale operations in the Americas. The Europe segment includes the Company's retail, e-commerce and wholesale operations in Europe and the Middle East. The Asia segment includes the Company's retail, e-commerce and wholesale operations in Asia and the Pacific. The Licensing segment includes the worldwide licensing operations of the Company. The business segment operating results exclude corporate overhead costs, which consist of shared costs of the organization, net gains (losses) on lease terminations, asset impairment charges and restructuring charges. Corporate overhead costs are presented separately and generally include, among other things, the following unallocated corporate costs: accounting and finance, executive compensation, corporate performance-based compensation, facilities, global advertising and marketing, human resources, information technology and legal. Information regarding these segments is summarized in Note 17.

Revenue Recognition

General

The Company recognizes retail operations revenue at the point of sale and wholesale operations revenue from the sale of merchandise when products are shipped and the customer takes title and assumes risk of loss, collection of the relevant receivable is reasonably assured, pervasive evidence of an arrangement exists, and the sales price is fixed or determinable. Revenue from our e-commerce operations, including shipping fees, is recognized based on the estimated customer receipt date. The Company accrues for estimated sales returns and other allowances in the period in which the related revenue is recognized. To recognize the financial impact of sales returns, the Company estimates the amount of goods that will be returned based on historical experience and reduces sales and cost of sales accordingly. Sales taxes and value added taxes collected from customers and remitted directly to governmental authorities are excluded from net revenues.

Net Royalty Revenue

Royalty revenue is based upon a percentage, as defined in the underlying agreement, of the licensee's actual net sales or minimum net sales, whichever is greater. The Company may also receive special payments in consideration of the grant of license rights. These payments are recognized ratably as revenue over the term of the license agreement. The unrecognized portion of upfront payments is included in deferred royalties in accrued expenses and other long-term

liabilities depending on the short or long-term nature of the payments to be recognized. As of February 3, 2018, the Company had \$6.8 million and \$12.8 million of deferred royalties included in accrued expenses and other long-term liabilities, respectively. This compares to \$6.1 million and \$16.4 million of deferred royalties included in accrued expenses and other long-term liabilities, respectively, at January 28, 2017.

F-9

Table of Contents

GUESS?, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Gift Cards

Gift card breakage is income recognized due to the non-redemption of a portion of gift cards sold by the Company for which a liability was recorded in prior periods. Gifts cards are mainly used in the U.S. and Canada. The Company issues its gift cards in the U.S. and Canada through one of its subsidiaries and is not required by law to escheat the value of unredeemed gift cards to the state in which the subsidiary is domiciled. Estimated breakage amounts are accounted for under the redemption recognition method and are classified as additional net revenues as the gift cards are redeemed. The Company's gift card breakage rate is approximately 6.1% and 5.1% for the U.S. retail business and Canadian retail business, respectively, based upon historical redemption patterns, which represents the cumulative estimated amount of gift card breakage from the inception of the electronic gift card program in late 2002. Based upon historical redemption trends, the Company recognizes estimated gift card breakage as a component of net revenue in proportion to actual gift card redemptions, over the period that remaining gift card values are redeemed. In fiscal 2018, fiscal 2017 and fiscal 2016, the Company recognized \$0.7 million, \$0.8 million and \$0.5 million of gift card breakage to revenue, respectively. Any future revisions to the estimated breakage rate may result in changes in the amount of breakage income recognized in future periods.

Loyalty Programs

The Company has customer loyalty programs in North America, Europe and Asia which cover all of its brands. Under certain of the programs, primarily in the U.S. and Canada, customers accumulate points based on purchase activity. Once a loyalty program member achieves a certain point level, the member earns awards that may only be redeemed for merchandise. Unredeemed points generally expire after six months without additional purchase activity and unredeemed awards generally expire after two months. The Company uses historical redemption rates to estimate the value of future award redemptions which are accrued in current liabilities and recorded as a reduction of net revenue in the period which the related revenue is recognized. The aggregate dollar value of the loyalty program accruals included in accrued expenses was \$3.8 million and \$4.0 million as of February 3, 2018 and January 28, 2017, respectively. Future revisions to the estimated liability may result in changes to net revenue.

Classification of Certain Costs and Expenses

The Company includes inbound freight charges, purchasing costs and related overhead, retail store occupancy costs, including rent and depreciation, and a portion of the Company's distribution costs related to its direct-to-consumer business in cost of product sales. Distribution costs related primarily to the wholesale business are included in selling, general and administrative ("SG&A") expenses and amounted to \$34.2 million, \$22.6 million and \$23.2 million for fiscal 2018, fiscal 2017 and fiscal 2016, respectively. The Company also includes store selling, selling and merchandising, advertising, design and other corporate overhead costs as a component of SG&A expenses. The Company classifies amounts billed to customers for shipping fees as revenues and classifies costs related to shipping as cost of product sales in the accompanying consolidated statements of income (loss).

Advertising and Marketing Costs

The Company expenses the cost of advertising as incurred. Advertising and marketing expenses charged to operations for fiscal 2018, fiscal 2017 and fiscal 2016 were \$36.3 million, \$37.1 million and \$31.6 million, respectively.

Share-Based Compensation

The Company recognizes compensation expense for all share-based awards granted based on the grant date fair value. The fair value of each stock option is estimated on the grant date using the Black-Scholes option-pricing model and involves several assumptions, including the risk-free interest rate, expected volatility, dividend yield and expected life. The risk-free interest rate is based on the U.S. Treasury yield curve in effect for the expected term of the option at the time of grant. The expected stock price volatility is determined based on an average of both historical volatility and implied volatility. Implied volatility is derived from exchange traded options on the Company's common stock. The expected dividend yield is based on the Company's history and expectations of dividend payouts. The expected life is determined based on historical trends. Compensation expense for nonvested stock options and stock awards/units that

are not subject to performance-based vesting conditions is recognized on a straight-line basis over

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

the vesting period. During fiscal 2018, the Company adopted authoritative guidance which eliminates the requirement to estimate forfeitures, but rather provides for an election that would allow entities to account for forfeitures as they occur.

In addition, the Company has granted certain nonvested units that require certain minimum performance targets to be achieved in order for these awards to vest. Vesting is also subject to continued service requirements through the vesting date. Compensation expense for performance-based awards that vest in increments is recognized based on an accelerated attribution method. If the minimum performance targets are not forecasted to be achieved, no expense is recognized during the period.

The Company has also granted certain nonvested stock units which are subject to market-based performance targets in order for these units to vest. Vesting is also subject to continued service requirements through the vesting date. The grant date fair value for such nonvested stock units was estimated using a Monte Carlo simulation that incorporates option-pricing inputs covering the period from the grant date through the end of the performance period.

Compensation expense for such nonvested stock units is recognized on a straight-line basis over the vesting period, regardless of whether the market condition is satisfied.

During fiscal 2016, the Company granted certain restricted stock units which vested immediately but were considered contingently returnable as a result of certain service conditions. Compensation expense for these restricted stock units was recognized on a straight-line basis over the implied service period.

Foreign Currency

Foreign Currency Translation Adjustment

The local selling currency is typically the functional currency for all of the Company's significant international operations. In accordance with authoritative guidance, assets and liabilities of the Company's foreign operations are translated from foreign currencies into U.S. dollars at period-end rates, while income and expenses are translated at the weighted average exchange rates for the period. The related translation adjustments are reflected as a foreign currency translation adjustment in accumulated other comprehensive income (loss) within stockholders' equity. In addition, the Company records foreign currency translation adjustments related to its noncontrolling interests within stockholders' equity. Periodically, the Company may also use foreign exchange currency contracts to hedge the translation and economic exposures related to its net investments in certain of its international subsidiaries (see below). Changes in the fair values of these foreign exchange currency contracts, designated as net investment hedges, are recorded in foreign currency translation adjustment as a component of accumulated other comprehensive income (loss) within stockholders' equity. The total foreign currency translation adjustment increased stockholders' equity by \$93.4 million, from an accumulated foreign currency translation loss of \$164.7 million as of January 28, 2017 to an accumulated foreign currency translation loss of \$71.3 million as of February 3, 2018.

Foreign Currency Transaction Gains and Losses

Transaction gains and losses that arise from exchange rate fluctuations on transactions denominated in a currency other than the functional currency, including gains and losses on foreign exchange currency contracts (see below), are included in the consolidated statements of income (loss). Net foreign currency transaction gains (losses) included in the determination of net earnings (loss) were \$(5.9) million, \$3.6 million and \$10.0 million for fiscal 2018, fiscal 2017 and fiscal 2016, respectively.

Table of Contents

GUESS?, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Derivatives

Foreign Exchange Currency Contracts

The Company operates in foreign countries, which exposes it to market risk associated with foreign currency exchange rate fluctuations. Various transactions that occur primarily in Europe, Canada, South Korea, China and Mexico are denominated in U.S. dollars, British pounds and Russian roubles and thus are exposed to earnings risk as a result of exchange rate fluctuations when converted to their functional currencies. These types of transactions include U.S. dollar denominated purchases of merchandise and U.S. dollar and British pound denominated intercompany liabilities. In addition, certain operating expenses, tax liabilities and pension-related liabilities are denominated in Swiss francs and are exposed to earnings risk as a result of exchange rate fluctuations when converted to the functional currency. The Company has entered into certain forward contracts to hedge the risk of a portion of these anticipated foreign currency transactions against foreign currency rate fluctuations. The Company has elected to apply the hedge accounting rules in accordance with authoritative guidance for certain of these hedges. The Company does not hedge all transactions denominated in foreign currency. The Company may also hedge the translation and economic exposures related to its net investments in certain of its international subsidiaries.

Changes in the fair value of the U.S. dollar/euro and U.S. dollar/Canadian dollar forward contracts for anticipated U.S. dollar merchandise purchases designated as cash flow hedges are recorded as a component of accumulated other comprehensive income (loss) within stockholders' equity and are recognized in cost of product sales in the period which approximates the time the hedged merchandise inventory is sold. Changes in the fair value of U.S. dollar/euro forward contracts for U.S. dollar intercompany royalties designated as cash flow hedges are recorded as a component of accumulated other comprehensive income (loss) within stockholders' equity and are recognized in other income and expense in the period in which the royalty expense is incurred. Changes in the fair value of any U.S. dollar/euro forward contracts designated as net investment hedges are recorded in foreign currency translation adjustment as a component of accumulated other comprehensive income (loss) within stockholders' equity and are not recognized in earnings (loss) until the sale or liquidation of the hedged net investment.

The Company also has forward contracts that are not designated as hedging instruments for accounting purposes. Changes in fair value of forward contracts not designated as hedging instruments are reported in net earnings (loss) as part of other income and expense.

Interest Rate Swap Agreements

The Company is exposed to interest rate risk on its floating-rate debt. The Company has entered into interest rate swap agreements to effectively convert its floating-rate debt to a fixed-rate basis. The principal objective of these contracts is to eliminate or reduce the variability of the cash flows in interest payments associated with the Company's floating-rate debt, thus reducing the impact of interest rate changes on future interest payment cash flows. The Company has elected to apply the hedge accounting rules in accordance with authoritative guidance for certain of these contracts. Changes in the fair value of interest rate swap agreements designated as cash flow hedges are recorded as a component of accumulated other comprehensive income (loss) within stockholders' equity and are amortized to interest expense over the term of the related debt. Periodically, the Company may also enter into interest rate swap agreements that are not designated as hedging instruments for accounting purposes. Changes in the fair value of interest rate swap agreements not designated as hedging instruments are reported in net earnings (loss) as part of other income and expense.

Income Taxes

The Company uses the asset and liability method of accounting for income taxes. Under this method, deferred income taxes are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to be applied to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred taxes of a change in tax rates is recognized

in income in the period that includes the enactment date. A valuation allowance is recorded when management believes it is more likely than not that the results of operations will not generate sufficient taxable earnings to realize certain net deferred tax assets.

F-12

Table of Contents

GUESS?, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The Company accounts for uncertainty in income taxes in accordance with authoritative guidance, which prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The Company also follows authoritative guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition.

Earnings (Loss) Per Share

Basic earnings (loss) per share represents net earnings (loss) attributable to common stockholders divided by the weighted average number of common shares outstanding during the period. The Company considers any restricted stock units with forfeitable dividend rights that are issued and outstanding, but considered contingently returnable if certain service conditions are not met, as common equivalent shares outstanding. These restricted stock units are excluded from the weighted average number of common shares outstanding and basic earnings (loss) per share calculation until the respective service conditions have been met. Diluted earnings per share represents net earnings attributable to common stockholders divided by the weighted average number of common shares outstanding, inclusive of the dilutive impact of common equivalent shares outstanding during the period. The potentially dilutive impact of common equivalent shares outstanding are not included in the computation of diluted net loss per share as the impact of the shares would be antidilutive due to the net loss incurred for the period. Nonvested restricted stock awards (referred to as participating securities) are excluded from the dilutive impact of common equivalent shares outstanding in accordance with authoritative guidance under the two-class method since the nonvested restricted stockholders are entitled to participate in dividends declared on common stock as if the shares were fully vested and hence are deemed to be participating securities. Under the two-class method, distributed and undistributed earnings attributable to nonvested restricted stockholders are excluded from net earnings (loss) attributable to common stockholders for purposes of calculating basic and diluted earnings (loss) per common share. However, net losses are not allocated to nonvested restricted stockholders because they are not contractually obligated to share in the losses of the Company.

In addition, the Company has granted certain nonvested stock units that are subject to certain performance-based or market-based vesting conditions as well as continued service requirements through the respective vesting periods. These nonvested stock units are included in the computation of diluted net earnings per common share attributable to common stockholders only to the extent that the underlying performance-based or market-based vesting conditions are satisfied as of the end of the reporting period, or would be considered satisfied if the end of the reporting period were the end of the related contingency period, and the results would be dilutive under the treasury stock method.

Comprehensive Income (Loss)

Comprehensive income (loss) consists of net earnings (loss), foreign currency translation adjustments, the effective portion of the change in the fair value of cash flow hedges, unrealized and realized gains or losses and other-than-temporary-impairment on available-for-sale securities and defined benefit plan impact from actuarial valuation gains or losses and related amortization, plan amendment, prior service credit or cost amortization and curtailment. Comprehensive income (loss) is presented in the consolidated statements of comprehensive income.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash on hand and marketable securities with original maturities of three months or less.

Investment Securities

The Company accounts for its investment securities in accordance with authoritative guidance which requires investments to be classified into one of three categories based on management's intent: held-to-maturity securities, available-for-sale securities and trading securities. Held-to-maturity securities are recorded at their amortized cost. Available-for-sale securities are recorded at fair value with unrealized gains and losses reported as a separate component of stockholders' equity. Trading securities are recorded at market value with unrealized gains and losses reported in net earnings. The appropriate classification of investment securities is determined at the time of purchase

and reevaluated at each balance sheet date. The Company has historically accounted for its investment securities, if any, as available-for-sale.

F-13

Table of Contents

GUESS?, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The Company periodically evaluates investment securities for other-than-temporary-impairment using both qualitative and quantitative criteria such as the length of time and extent to which fair value has been below cost basis, the financial condition of the issuer and the Company's ability and intent to hold the investment for a period of time which may be sufficient for anticipated recovery in market value. Other-than-temporary-impairment is recognized in net earnings (loss) as part of other income and expense in the period which the unrealized losses are deemed other than temporary. During fiscal 2017, the Company determined that its available-for-sale securities were fully impaired and recognized minimal other-than-temporary-impairment in other expense.

Concentration of Credit and Liquidity Risk

Cash used primarily for working capital purposes is maintained with various major financial institutions. The Company performs evaluations of the relative credit standing of these financial institutions in order to limit the amount of asset and liquidity exposure with any institution. Excess cash and cash equivalents, which represent the majority of the Company's outstanding cash and cash equivalents balance, are held primarily in overnight deposit and short-term time deposit accounts.

The Company is also exposed to concentrations of credit risk through its accounts receivable balances. The Company extends credit to corporate customers based upon an evaluation of the customer's financial condition and credit history and generally requires no collateral but does obtain credit insurance when considered appropriate. As of February 3, 2018, approximately 59% of the Company's total net trade accounts receivable and 72% of its European net trade receivables were subject to credit insurance coverage, certain bank guarantees or letters of credit for collection purposes. The Company's credit insurance coverage contains certain terms and conditions specifying deductibles and annual claim limits. The Company maintains allowances for doubtful accounts for estimated losses that result from the inability of its wholesale customers to make their required payments. The Company bases its allowances on analysis of the aging of accounts receivable at the date of the financial statements, assessments of historical collection trends, an evaluation of the impact of current economic conditions and whether the Company has obtained credit insurance or other guarantees. The Company's corporate customers are principally located throughout Europe, Asia and the Americas. Management performs regular evaluations concerning the ability of its customers to satisfy their obligations and records a provision for doubtful accounts based on these evaluations. The Company's credit losses for the periods presented were immaterial and did not significantly exceed management's estimates. The Company's two largest wholesale customers accounted for a total of approximately 2.2%, 2.7% and 3.4% of the Company's consolidated net revenue in fiscal 2018, fiscal 2017 and fiscal 2016, respectively.

Inventories

Inventories are valued at the lower of cost (primarily weighted average method) or net realizable value. The Company continually evaluates its inventories by assessing slow moving product as well as prior seasons' inventory. Net realizable value of aged inventory is estimated based on historical sales trends for each product line category, the impact of market trends, an evaluation of economic conditions, available liquidation channels and the value of current orders relating to the future sales of this type of inventory.

Depreciation and Amortization

Depreciation and amortization of property and equipment and purchased intangibles are provided using the straight-line method over the following useful lives:

Building and building improvements	10 to 39 years
Land improvements	5 years
Furniture, fixtures and equipment	2 to 10 years
Purchased intangibles	4 to 20 years

Leasehold improvements are amortized over the lesser of the estimated useful life of the asset or the term of the lease, including reasonably assured renewal periods. Construction in progress is not depreciated until the related asset is completed and placed in service.

Table of Contents

GUESS?, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Long-Lived Assets

Long-lived assets, such as property and equipment, and purchased intangibles subject to amortization, are reviewed for impairment quarterly or whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The majority of the Company's long-lived assets relate to its retail operations which consist primarily of regular retail and flagship locations. The Company considers each individual regular retail location as an asset group for impairment testing, which is the lowest level at which individual cash flows can be identified. The asset group includes leasehold improvements, furniture, fixtures and equipment, computer hardware and software and certain long-term security deposits and lease acquisition costs. The Company reviews regular retail locations in penetrated markets for impairment risk once the locations have been opened for at least one year in their current condition, or sooner as changes in circumstances require. The Company believes that waiting at least one year allows a location to reach a maturity level where a more comprehensive analysis of financial performance can be performed. The Company evaluates impairment risk for regular retail locations in new markets, where the Company is in the early stages of establishing its presence, once brand awareness has been established. The Company also evaluates impairment risk for retail locations that are expected to be closed in the foreseeable future. The Company has flagship locations which are used as a regional marketing tool to build brand awareness and promote the Company's current product. Impairment for these locations is tested at a reporting unit level similar to goodwill (see below) since they do not have separately identifiable cash flows.

An asset is considered to be impaired if the Company determines that the carrying value may not be recoverable based upon its assessment of the asset's ability to continue to generate earnings from operations and positive cash flow in future periods or if significant changes in the Company's strategic business objectives and utilization of the assets occurred. If the carrying amount of an asset exceeds its estimated undiscounted future cash flows, an impairment charge is recognized in the amount by which the carrying amount of the asset exceeds the estimated fair value, which is determined based on discounted future cash flows. The impairment loss calculations require management to apply judgment in estimating future cash flows and the discount rates that reflect the risk inherent in future cash flows. Future expected cash flows for assets in regular retail locations are based on management's estimates of future cash flows over the remaining lease period or expected life, if shorter. For expected location closures, the Company will evaluate whether it is necessary to shorten the useful life for any of the assets within the respective asset group. The Company will use this revised useful life when estimating the asset group's future cash flows. The Company considers historical trends, expected future business trends and other factors when estimating the future cash flow for each regular retail location. The Company also considers factors such as: the local environment for each regular retail location, including mall traffic and competition; the Company's ability to successfully implement strategic initiatives; and the ability to control variable costs such as cost of sales and payroll and, in some cases, renegotiate lease costs. The estimated cash flows used for this nonrecurring fair value measurement are considered a Level 3 input as defined in Note 20. If actual results are not consistent with the assumptions and judgments used in estimating future cash flows and asset fair values, there may be additional exposure to future impairment losses that could be material to the Company's results of operations.

See Note 5 for further details on asset impairment charges.

Goodwill

Goodwill is tested annually for impairment or more frequently if events and circumstances indicate that the asset might be impaired. An impairment loss is recognized to the extent that the carrying amount exceeds the asset's fair value. This determination is made at the reporting unit level which may be either an operating segment or one level below an operating segment if discrete financial information is available. Two or more reporting units within an operating segment may be aggregated for impairment testing if they have similar economic characteristics. The Company has identified its Americas Retail segment, its Americas Wholesale segment, its European wholesale and European retail components of its Europe segment and its China retail component of its Asia segment as reporting

units for goodwill impairment testing. In accordance with authoritative guidance, the Company may first assess qualitative factors relevant in determining whether it is more likely than not that the fair value of its reporting units are less than their carrying amounts. Based on this analysis, the Company may determine whether it is necessary to perform a quantitative impairment test. If it is more likely than not that the fair value of a reporting unit is less than

F-15

Table of Contents

GUESS?, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

its carrying amount, the amount of any impairment loss to be recognized for that reporting unit is determined using two steps. First, the Company determines the fair value of the reporting unit using a discounted cash flow analysis, which requires unobservable inputs (Level 3) within the fair value hierarchy as defined in Note 20. These inputs include selection of an appropriate discount rate and the amount and timing of expected future cash flows. Second, if the carrying amount of a reporting unit exceeds its fair value, an impairment loss is recognized for any excess of the carrying amount of the reporting unit's goodwill and other intangibles over the implied fair value. The implied fair value is determined by allocating the fair value of the reporting unit in a manner similar to a purchase price allocation, in accordance with authoritative guidance.

Other Assets

Other assets mainly relate to the Company's investments in insurance policies held in rabbi trusts to fund expected obligations arising under its non-qualified supplemental executive retirement and deferred compensation plans. Refer to Notes 12 and 15 for further information regarding these investments.

In addition, other assets also relate to security, key money and other deposits to secure prime retail store locations and receivables related to refundable value-added tax payments mainly from European taxing authorities.

During fiscal 2017, the Company sold its minority interest equity holding in a privately-held boutique apparel company for net proceeds of approximately \$34.8 million, which resulted in a gain of approximately \$22.3 million which was recorded in other income.

Defined Benefit Plans

In accordance with authoritative guidance for defined benefit pension and other postretirement plans, an asset for a plan's overfunded status or a liability for a plan's underfunded status is recognized in the consolidated balance sheets; plan assets and obligations that determine the plan's funded status are measured as of the end of the Company's fiscal year; and changes in the funded status of defined benefit postretirement plans are recognized in the year in which they occur. Such changes are reported in other comprehensive income (loss) as a separate component of stockholders' equity.

The Company's pension obligations and related costs are calculated using actuarial concepts, within the authoritative guidance framework, and are considered Level 3 inputs as defined in Note 20. The Company uses the corridor approach to amortize unrecognized actuarial gains or losses over the average remaining service life of active participants. The life expectancy, estimated retirement age, discount rate, estimated future compensation and expected return on plan assets are important elements of expense and/or liability measurement. These critical assumptions are evaluated annually which enables expected future payments for benefits to be stated at present value on the measurement date. If actual results are not consistent with actuarial assumptions, the amounts recognized for the defined benefit plans could change significantly.

Deferred Rent and Lease Incentives

When a lease includes lease incentives (such as a rent holiday) or requires fixed escalations of the minimum lease payments or advances, rental expense is recognized on a straight-line basis over the term of the lease. The difference between the average rental amount charged to expense and the lease payments or advances under the lease is included either in deferred rent and lease incentives or other assets in the accompanying consolidated balance sheets depending on whether the difference is in a liability or asset position at the end of the period. For construction allowances, the Company records a deferred lease credit on the consolidated balance sheets and amortizes the deferred lease credit as a reduction of rent expense in the consolidated statements of income (loss) over the term of the leases.

Net Gains (Losses) on Lease Terminations

During fiscal 2018, the Company recorded net losses on lease terminations related primarily to the modification of certain lease agreements held with a common landlord in North America. In connection with this modification, the Company made up-front payments of approximately \$22 million, of which \$12 million was recognized as net losses on lease terminations and \$10 million was recorded as advance rent payments. During fiscal 2018, the Company

Table of Contents

GUESS?, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

also recorded net gains on lease terminations of approximately \$1 million related primarily to the early termination of certain lease agreements in Europe.

During fiscal 2017 and fiscal 2016, the Company recorded net gains on lease terminations of \$0.7 million and \$2.3 million, respectively, related primarily to the early termination of certain lease agreements in Europe.

Litigation Reserves

Estimated amounts for claims that are probable and can be reasonably estimated are recorded as liabilities in the consolidated balance sheets. As additional information becomes available, the Company assesses the potential liability related to new claims and existing claims and revises estimates as appropriate. As new claims arise or existing claims evolve, such revisions in estimates of the potential liability could materially impact the results of operations and financial position.

(2) New Accounting Guidance**Changes in Accounting Policies**

In July 2015, the Financial Accounting Standards Board (“FASB”) issued authoritative guidance to simplify the subsequent measurement of inventories by replacing the lower of cost or market test with a lower of cost or net realizable value test. The Company adopted this guidance effective January 29, 2017 on a prospective basis. The adoption of this guidance did not have a material impact on the Company’s consolidated financial statements or related disclosures.

In March 2016, the FASB issued authoritative guidance to simplify the accounting for certain aspects of share-based compensation. This guidance addresses the accounting for income tax effects at award settlement, the use of an expected forfeiture rate to estimate award cancellations prior to the vesting date and the presentation of excess tax benefits and shares surrendered for tax withholdings on the statement of cash flows. The Company adopted this guidance effective January 29, 2017. This guidance requires all income tax effects of awards (resulting from an increase or decrease in the fair value of an award from grant date to the vesting date) to be recognized in the income statement when the awards vest or are settled. This is a change from previous guidance that required such activity to be recorded in paid-in capital within stockholders’ equity. The Company adopted this provision prospectively and accordingly recorded tax shortfalls of approximately \$1.3 million in its consolidated statement of income (loss) during fiscal 2018. This resulted in a negative impact on net loss attributable to Guess?, Inc. of approximately \$1.3 million, or an unfavorable \$0.02 per share impact during fiscal 2018. Under this guidance, excess tax benefits are also excluded from the assumed proceeds available to repurchase shares in the computation of diluted earnings (loss) per share. This was adopted prospectively and did not have an impact on the Company’s diluted loss per share for fiscal 2018. This guidance also eliminates the requirement to estimate forfeitures, but rather provides for an election that would allow entities to account for forfeitures as they occur. The Company adopted this election beginning in the first quarter of fiscal 2018 using the modified retrospective method and recorded a cumulative adjustment to reduce retained earnings by approximately \$0.3 million. This guidance also changes the presentation of excess tax benefits from a financing activity to an operating activity in the statement of cash flows. This presentation was adopted on a retrospective basis and, as a result, net cash used in operating activities improved by \$0.3 million and \$0.2 million with a corresponding offset to net cash used in financing activities during fiscal 2017 and fiscal 2016, respectively.

In August 2016, the FASB issued authoritative guidance related to the classification of certain cash receipts and cash payments in the statement of cash flows. The Company adopted this guidance effective January 29, 2017 on a retrospective basis. The adoption of this guidance did not have a material impact on the Company’s consolidated financial statements or related disclosures.

In October 2016, the FASB issued authoritative guidance that requires an entity to include indirect interests held through related parties that are under common control on a proportionate basis when evaluating if a reporting entity is the primary beneficiary of a variable interest entity. The Company adopted this guidance effective January 29, 2017. The adoption of this guidance did not have an impact on the Company’s consolidated financial statements or related

disclosures.

F-17

Table of Contents

GUESS?, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In November 2016, the FASB issued authoritative guidance related to the presentation of restricted cash in the statement of cash flows. This guidance requires that the statement of cash flows reconcile the change during the period in total cash, cash equivalents and restricted cash. The Company's restricted cash is generally held as collateral for certain transactions. The Company adopted this guidance effective January 29, 2017 on a retrospective basis. As a result, the Company updated its consolidated statements of cash flows for fiscal 2018, fiscal 2017 and fiscal 2016 to include restricted cash with cash and cash equivalents when reconciling the beginning and end of period balances and to eliminate changes in restricted cash that have historically been included within operating and investing activities.

In January 2017, the FASB issued authoritative guidance which clarifies the definition of a business to assist entities when evaluating whether transactions should be accounted for as acquisitions or disposals of assets or businesses. The Company early adopted this guidance effective January 29, 2017 on a prospective basis. The adoption of this guidance did not have a material impact on the Company's consolidated financial statements or related disclosures.

In February 2018, the FASB issued authoritative guidance to address certain stranded income tax effects in accumulated other comprehensive income (loss) resulting from the 2017 Tax Cuts and Jobs Act (the "Tax Reform") enacted in December 2017. This guidance provides the Company with an option to reclassify stranded tax effected within accumulated other comprehensive income (loss) to retained earnings in each period in which the effect of the change in the U.S. federal corporate income tax rate due to the Tax Reform is recorded. The Company early adopted this guidance during the fourth quarter of fiscal 2018 and recorded a cumulative adjustment to increase retained earnings by approximately \$1.2 million.

Recently Issued Accounting Guidance

In May 2014, the FASB issued a comprehensive new revenue recognition standard which will supersede previous existing revenue recognition guidance. The standard is intended to clarify the principles of recognizing revenue and create common revenue recognition guidance between GAAP and International Financial Reporting Standards. The standard also requires expanded disclosures surrounding revenue recognition. During fiscal 2017, the FASB issued additional clarification guidance on the new revenue recognition standard which also included certain scope improvements and practical expedients. The standard (including clarification guidance issued) is effective for fiscal periods beginning after December 15, 2017, which will be the Company's first quarter of fiscal 2019, and allows for either full retrospective or modified retrospective adoption, with early adoption permitted. The Company has adopted this guidance using the modified retrospective method beginning in the first quarter of fiscal 2019. The Company's assessment efforts have included reviewing current revenue processes, arrangements and accounting policies to identify potential differences that could arise from the application of this standard on its consolidated financial statements and related disclosures. While the Company does not expect the adoption of this standard to have a material impact on its consolidated financial statements, the Company expects there to be differences related primarily to the classification and timing of when revenue and certain expenses are recognized from its licensing business. These differences relate primarily to changes in the presentation of advertising contributions received from the Company's licensees and related advertising expenditures incurred by the Company. The Company currently records advertising contributions received from its licensees and the related advertising expenditures incurred by the Company on a net basis in its consolidated balance sheet. To the extent that the advertising contributions exceed the Company's advertising expenditures for its licensees, the excess contribution is treated as a deferred liability and is included in accrued expenses in the Company's consolidated balance sheet. Under the new standard, advertising contributions and related advertising expenditures related to the Company's licensing business will be recorded on a gross basis which will increase net revenue as well as SG&A expenses. The Company also expects revenue related to its e-commerce operations to be recognized when merchandise is transferred to a common carrier rather than upon receipt by the customer, as well as adjustments to the accounting for the Company's loyalty programs due to a slight change in the valuation of the amount that is deferred related to points earned. Additionally, allowances for wholesale sales returns and wholesale markdowns will be presented as accrued expenses rather than as reductions to accounts receivable and

the estimated cost of inventory associated with the allowance for sales returns will be presented within other current assets in the Company's consolidated balance sheet.

F-18

Table of Contents

GUESS?, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In January 2016, the FASB issued authoritative guidance which requires equity investments not accounted for under the equity method of accounting or consolidation accounting to be measured at fair value, with subsequent changes in fair value recognized in net income. In February 2018, the FASB issued additional clarification guidance which made targeted improvements to address certain aspects of recognition, measurement, presentation and disclosure requirements for financial instruments. The original guidance is effective for fiscal years beginning after December 15, 2017, which will be the Company's first quarter of fiscal 2019, and requires a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption. The clarification guidance is effective for fiscal years beginning after December 15, 2017 and interim periods beginning after June 15, 2015, which will be the Company's third quarter of fiscal 2019. The clarification guidance may be early adopted, provided that the original guidance issued has been adopted. The adoption of this guidance (including the clarification guidance) is not expected to have a material impact on the Company's consolidated financial statements or related disclosures unless the Company acquires new equity investments.

In February 2016, the FASB issued a comprehensive new lease standard which will supersede previous lease guidance. The standard requires a lessee to recognize assets and liabilities related to long-term leases that were classified as operating leases under previous guidance in its balance sheet. An asset would be recognized related to the right to use the underlying asset and a liability would be recognized related to the obligation to make lease payments over the term of the lease. The standard also requires expanded disclosures surrounding leases. The standard is effective for fiscal periods beginning after December 15, 2018, which will be the Company's first quarter of fiscal 2020, and requires modified retrospective adoption, with early adoption permitted. The Company expects that this adoption will result in material increases in assets and liabilities in its consolidated balance sheet as well as enhanced disclosures. The Company is in the process of implementing controls and system changes to enable the preparation of the required financial information for this standard.

In June 2016, the FASB issued authoritative guidance related to the measurement of credit losses on financial instruments. This guidance is effective for fiscal years beginning after December 15, 2019, which will be the Company's first quarter of fiscal 2021. Early adoption is permitted for fiscal periods beginning after December 15, 2018, which will be the Company's first quarter of fiscal 2020. The Company is currently evaluating the impact of the adoption of this standard on its consolidated financial statements and related disclosures.

In October 2016, the FASB issued authoritative guidance which amends the accounting for income taxes on intra-entity transfers of assets other than inventory. This guidance requires that entities recognize the income tax consequences of an intra-entity transfer of an asset, other than inventory, when the transfer occurs. The income tax consequences on intra-entity transfers of inventory will continue to be deferred until the inventory has been sold to a third party. This guidance is effective for fiscal years beginning after December 15, 2017, which will be the Company's first quarter of fiscal 2019, and requires a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption. Early adoption is permitted at the beginning of a fiscal year. The adoption of this guidance is not expected to have a material impact on the Company's consolidated financial statements or related disclosures.

In January 2017, the FASB issued authoritative guidance to simplify the testing for goodwill impairment by removing step two from the goodwill testing. Under current guidance, if the fair value of a reporting unit is lower than its carrying amount (step one), an entity would calculate an impairment charge by comparing the implied fair value of goodwill with its carrying amount (step two). The implied fair value of goodwill was calculated by deducting the fair value of the assets and liabilities of the respective reporting unit from the reporting unit's fair value as determined under step one. This guidance instead provides that an impairment charge should be recognized based on the difference between a reporting unit's fair value and its carrying value. This guidance also does not require a qualitative test to be performed on reporting units with zero or negative carrying amounts. However, entities need to disclose any reporting units with zero or negative carrying amounts that have goodwill and the amount of goodwill allocated to

each. This guidance is effective for fiscal years beginning after December 15, 2019, which will be the Company's first quarter of fiscal 2021, with early adoption permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. The adoption of this guidance is not expected to have a material impact on the Company's consolidated financial statements or related disclosures.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In March 2017, the FASB issued authoritative guidance related to the presentation of net periodic pension cost in the income statement. This guidance requires that the service cost component of net periodic pension cost is presented in the same line as other compensation costs arising from services rendered by the employees during the period. The other non-service components of net periodic pension cost are required to be presented in the income statement separately from the service cost component and outside of earnings from operations. This guidance also allows for the service cost component to be eligible for capitalization when applicable. This guidance is effective for fiscal years beginning after December 15, 2017, which will be the Company's first quarter of fiscal 2019, and requires retrospective adoption for the presentation of the service cost component and other non-service components of net periodic pension cost in the income statement and prospective adoption for capitalization of the service cost component. Other than the change in presentation of other non-service components of net periodic pension cost within the Company's consolidated statements of income, the adoption of this guidance is not expected to have an impact on the Company's consolidated financial statements and related disclosures.

In May 2017, the FASB issued authoritative guidance that provides clarification on accounting for modifications in share-based payment awards. This guidance is effective for fiscal years beginning after December 15, 2017, which will be the Company's first quarter of fiscal 2019, with early adoption permitted. The adoption of this guidance is not expected to have an impact on the Company's consolidated financial statements or related disclosures unless there are modifications to the Company's share-based payment awards.

In August 2017, the FASB issued authoritative guidance to better align the results of hedge accounting with an entity's risk management activities. This guidance updates the designation and measurement guidance for qualifying hedging relationships and the presentation of hedge results in the financial statements. This guidance is effective for fiscal years beginning after December 15, 2018, which will be the Company's first quarter of fiscal 2020, and requires a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption, with early adoption permitted. The updated presentation and disclosure guidance is required only on a prospective basis. The Company is currently evaluating the impact of the adoption of this standard on its consolidated financial statements and related disclosures.

(3) Accounts Receivable

Accounts receivable is summarized as follows (in thousands):

	Feb 3, 2018	Jan 28, 2017
Trade	\$290,478	\$234,690
Royalty	5,504	19,881
Other	13,233	5,888
	309,215	260,459
Less allowances	49,219	34,922
	\$259,996	\$225,537

Accounts receivable consists of trade receivables relating primarily to the Company's wholesale business in Europe and, to a lesser extent, to its wholesale businesses in Asia and the Americas, royalty receivables relating to its licensing operations, credit card and retail concession receivables related to its retail businesses and certain other receivables. Other receivables generally relate to amounts due to the Company that result from activities that are not related to the direct sale of the Company's products or collection of royalties. The accounts receivable allowance includes allowances for doubtful accounts, wholesale sales returns and wholesale markdowns. Retail sales returns allowances are included in accrued expenses.

Table of Contents

GUESS?, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(4) Inventories

Inventories consist of the following (in thousands):

	Feb 3, 2018	Jan 28, 2017
Raw materials	\$604	\$799
Work in progress	16	78
Finished goods	427,684	366,504
	\$428,304	\$367,381

The above balances include an allowance to write down inventories to the lower of cost or net realizable value of \$29.9 million and \$19.4 million as of February 3, 2018 and January 28, 2017, respectively.

(5) Property and Equipment

Property and equipment is summarized as follows (in thousands):

	Feb 3, 2018	Jan 28, 2017
Land and land improvements	\$2,750	\$2,750
Building and building improvements	51,285	47,673
Leasehold improvements	380,234	367,294
Furniture, fixtures and equipment	389,393	353,843
Construction in progress	16,555	13,163
Assets under capital leases	19,560	—
	859,777	784,723
Less accumulated depreciation and amortization	565,523	541,718
	\$294,254	\$243,005

During fiscal 2016, the Company purchased, for approximately \$28.8 million, the facility that houses its U.S. distribution center.

During fiscal 2018, the Company began the relocation of its European distribution center to the Netherlands and entered into a capital lease for equipment used in the new facility. During fiscal 2018, the Company also entered into a capital lease related primarily to computer hardware and software. The accumulated depreciation and amortization related to assets under capital leases was approximately \$0.9 million as of February 3, 2018 and was included in depreciation expense when recognized. See Note 8 for more information regarding the related capital lease obligations.

Construction in progress represents the costs associated with the construction in progress of leasehold improvements to be used in the Company's operations, primarily for new and remodeled stores in retail operations.

Impairment

The Company recorded asset impairment charges of \$8.5 million, \$34.4 million and \$2.3 million for fiscal 2018, fiscal 2017 and fiscal 2016, respectively. The asset impairment charges related primarily to the impairment of certain retail locations in North America resulting from under-performance and expected store closures during each of the respective periods.

Impairments to long-lived assets are summarized as follows (in thousands):

	Feb 3, 2018	Jan 28, 2017
Aggregate carrying value of long-lived assets impaired	\$8,728	\$36,103
Less asset impairment charges	8,479	34,385
Aggregate remaining fair value of long-lived assets impaired	\$249	\$1,718

The Company's impairment evaluations included testing of 233 retail locations and 255 retail locations during fiscal 2018 and fiscal 2017, respectively, which were deemed to have impairment indicators. The Company concluded

F-21

Table of Contents

GUESS?, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

that 99 retail locations and 148 retail locations, respectively, were determined to be impaired, as the carrying amounts of the assets exceeded their estimated fair values (determined based on discounted cash flows) at each of the respective dates. Refer to Note 1 for a description of other assumptions that management considers in estimating the future discounted cash flows. If actual results are not consistent with the assumptions and judgments used in estimating future cash flows and asset fair values, there may be additional exposure to future impairment losses that could be material to the Company's results of operations.

(6) Goodwill and Intangible Assets

Goodwill activity is summarized by business segment as follows (in thousands):

	Americas Retail	Americas Wholesale	Europe	Asia	Total
Goodwill balance at January 30, 2016	\$ 1,693	\$ 9,960	\$21,759	\$—	\$33,412
Adjustments:					
Acquisition	—	—	—	933	933
Translation adjustments	36	6	(287)	—	(245)
Goodwill balance at January 28, 2017	1,729	9,966	21,472	933	34,100
Adjustments:					
Acquisition	—	—	—	566	566
Translation adjustments	36	6	3,653	120	3,815
Goodwill balance at February 3, 2018	\$ 1,765	\$ 9,972	\$25,125	\$1,619	\$38,481

The Company has no accumulated impairment related to goodwill.

From time-to-time, the Company may acquire certain retail locations from its wholesale partners which may result in the recognition of goodwill or other intangible assets. During fiscal 2018, the Company recognized goodwill of approximately \$0.6 million related to the acquisition of 14 retail locations from three of its Asian wholesale partners. During fiscal 2017, the Company recognized goodwill of approximately \$0.9 million related to the acquisition of 12 retail locations from five of its Asian wholesale partners.

Other intangible assets as of February 3, 2018 consisted primarily of lease and license acquisition costs related to European acquisitions. Gross intangible assets were \$33.6 million and \$29.7 million as of February 3, 2018 and January 28, 2017, respectively. The accumulated amortization of intangible assets with finite useful lives was \$27.6 million and \$23.2 million for the years ended February 3, 2018 and January 28, 2017, respectively. For these assets, amortization expense over the next five years is expected to be approximately \$1.2 million in fiscal 2019, \$1.0 million in fiscal 2020, \$0.9 million in fiscal 2021, \$0.8 million in fiscal 2022 and \$0.7 million in fiscal 2023.

(8) Borrowings and Capital Lease Obligations

Borrowings and capital lease obligations are summarized as follows (in thousands):

	Feb 3, 2018	Jan 28, 2017
Mortgage debt, maturing monthly through January 2026	\$20,323	\$20,889
Capital lease obligations	18,589	—
Other	3,129	3,159
	42,041	24,048
Less current installments	2,845	566
Long-term debt and capital lease obligations	\$39,196	\$23,482

Mortgage Debt

On February 16, 2016, the Company entered into a ten-year \$21.5 million real estate secured loan (the “Mortgage Debt”). The Mortgage Debt is secured by the Company’s U.S. distribution center based in Louisville, Kentucky and provides for monthly principal and interest payments based on a 25-year amortization schedule, with the remaining principal balance and any accrued and unpaid interest due at maturity. Outstanding principal balances under the Mortgage Debt bear interest at the one-month LIBOR rate plus 1.5%. As of February 3, 2018, outstanding borrowings under the Mortgage Debt, net of debt issuance costs of \$0.1 million, were \$20.3 million. At January 28, 2017, outstanding borrowings under the Mortgage Debt, net of debt issuance costs of \$0.1 million, were \$20.9 million. The Mortgage Debt requires the Company to comply with a fixed charge coverage ratio on a trailing four-quarter basis if consolidated cash, cash equivalents and short term investment balances fall below certain levels. In addition, the Mortgage Debt contains customary covenants, including covenants that limit or restrict the Company’s ability to incur liens on the mortgaged property and enter into certain contractual obligations. Upon the occurrence of an event of default under the Mortgage Debt, the lender may terminate the Mortgage Debt and declare all amounts outstanding to be immediately due and payable. The Mortgage Debt specifies a number of events of default (some of which are subject to applicable grace or cure periods), including, among other things, non-payment defaults, covenant defaults, cross-defaults to other material indebtedness, bankruptcy and insolvency defaults and material judgment defaults.

On February 16, 2016, the Company also entered into a separate interest rate swap agreement, designated as a cash flow hedge, that resulted in a swap fixed rate of approximately 3.06%. This interest rate swap agreement matures

F-23

Table of Contents

GUESS?, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

in January 2026 and converts the nature of the Mortgage Debt from LIBOR floating-rate debt to fixed-rate debt. The fair value of the interest rate swap asset was approximately \$1.5 million and \$0.9 million as of February 3, 2018 and January 28, 2017, respectively.

Capital Lease Obligations

During fiscal 2018, the Company began the relocation of its European distribution center to the Netherlands. As a result, the Company entered into a capital lease of \$17.0 million for equipment used in the new facility. The capital lease primarily provides for monthly minimum lease payments through May 2027 with an effective interest rate of approximately 6%. As of February 3, 2018, the capital lease obligation was \$17.3 million.

During fiscal 2018, the Company also entered into a capital lease for \$1.5 million related primarily to computer hardware and software. As of February 3, 2018, this capital lease obligation was \$1.3 million.

The Company previously leased a building in Florence, Italy under a capital lease which provided for minimum lease payments through May 1, 2016. Upon termination of the capital lease, the title of the building was transferred to the Company. The Company had a separate interest rate swap agreement designated as a non-hedging instrument that converted the nature of the capital lease obligation from Euribor floating-rate debt to fixed-rate debt and resulted in a swap fixed rate of 3.55%. This interest rate swap agreement matured on February 1, 2016.

Credit Facilities

On June 23, 2015, the Company entered into a five-year senior secured asset-based revolving credit facility with Bank of America, N.A. and the other lenders party thereto (the "Credit Facility"). The Credit Facility provides for a borrowing capacity in an amount up to \$150 million, including a Canadian sub-facility up to \$50 million, subject to a borrowing base. Based on applicable accounts receivable, inventory, eligible cash balances and relevant covenant restrictions as of February 3, 2018, the Company could have borrowed up to \$87 million under the Credit Facility. The Credit Facility has an option to expand the borrowing capacity by up to \$150 million subject to certain terms and conditions, including the willingness of existing or new lenders to assume such increased amount. The Credit Facility is available for direct borrowings and the issuance of letters of credit, subject to certain letters of credit sublimits, and may be used for working capital and other general corporate purposes.

All obligations under the Credit Facility are unconditionally guaranteed by the Company and the Company's existing and future domestic and Canadian subsidiaries, subject to certain exceptions, and are secured by a first priority lien on substantially all of the assets of the Company and such domestic and Canadian subsidiaries, as applicable.

Direct borrowings under the Credit Facility made by the Company and its domestic subsidiaries shall bear interest at the U.S. base rate plus an applicable margin (varying from 0.25% to 0.75%) or at LIBOR plus an applicable margin (varying from 1.25% to 1.75%). The U.S. base rate is based on the greater of (i) the U.S. prime rate, (ii) the federal funds rate, plus 0.5%, and (iii) LIBOR for a 30 day interest period, plus 1.0%. Direct borrowings under the Credit Facility made by the Company's Canadian subsidiaries shall bear interest at the Canadian prime rate plus an applicable margin (varying from 0.25% to 0.75%) or at the Canadian BA rate plus an applicable margin (varying from 1.25% to 1.75%). The Canadian prime rate is based on the greater of (i) the Canadian prime rate, (ii) the Bank of Canada overnight rate, plus 0.5%, and (iii) the Canadian BA rate for a one month interest period, plus 1.0%. The applicable margins are calculated quarterly and vary based on the average daily availability of the aggregate borrowing base. The Company is also obligated to pay certain commitment, letter of credit and other fees customary for a credit facility of this size and type. As of February 3, 2018, the Company had \$1.0 million in outstanding standby letters of credit, no outstanding documentary letters of credit and no outstanding borrowings under the Credit Facility.

The Credit Facility requires the Company to comply with a fixed charge coverage ratio on a trailing four-quarter basis if a default or an event of default occurs under the Credit Facility or generally if borrowings exceed 80% of the borrowing base. In addition, the Credit Facility contains customary covenants, including covenants that limit or restrict the Company and certain of its subsidiaries' ability to: incur liens, incur indebtedness, make investments, dispose of assets, make certain restricted payments, merge or consolidate and enter into certain transactions with

affiliates. Upon the occurrence of an event of default under the Credit Facility, the lenders may cease making loans, terminate the Credit Facility and declare all amounts outstanding to be immediately due and

F-24

Table of Contents

GUESS?, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

payable. The Credit Facility specifies a number of events of default (some of which are subject to applicable grace or cure periods), including, among other things, non-payment defaults, covenant defaults, cross-defaults to other material indebtedness, bankruptcy and insolvency defaults and material judgment defaults. The Credit Facility allows for both secured and unsecured borrowings outside of the Credit Facility up to specified amounts.

The Company, through its European subsidiaries, maintains short-term uncommitted borrowing agreements, primarily for working capital purposes, with various banks in Europe. The majority of the borrowings under these agreements are secured by specific accounts receivable balances. Based on the applicable accounts receivable balances as of February 3, 2018, the Company could have borrowed up to \$87.5 million under these agreements. As of February 3, 2018, the Company had no outstanding borrowings or outstanding documentary letters of credit under these agreements. The agreements are denominated primarily in euros and provide for annual interest rates ranging from 0.5% to 4.6%. The maturities of any short-term borrowings under these arrangements are generally linked to the credit terms of the underlying accounts receivable that secure the borrowings. With the exception of one facility for up to \$43.6 million that has a minimum net equity requirement, there are no other financial ratio covenants.

Other

From time-to-time, the Company will obtain other financing in foreign countries for working capital to finance its local operations.

Maturities of the Company's debt and capital lease obligations as of February 3, 2018 are as follows (in thousands):

	Debt	Capital Lease	Total
Fiscal 2019	\$1,361	\$1,594	\$2,955
Fiscal 2020	1,893	1,767	3,660
Fiscal 2021	1,725	1,923	3,648
Fiscal 2022	659	1,944	2,603
Fiscal 2023	682	1,895	2,577
Thereafter	17,221	9,466	26,687
Total principal payments	23,541	18,589	42,130
Less unamortized debt issuance costs	89	—	89
Total debt and capital lease obligations	\$23,452	\$18,589	\$42,041

(9) Restructuring Charges

During the first quarter of fiscal 2017, the Company implemented a global cost reduction and restructuring plan to better align its global cost and organizational structure with its current strategic initiatives. This plan included the consolidation and streamlining of the Company's business processes and a reduction in its global workforce and other expenses. These actions resulted in restructuring charges related primarily to cash-based severance costs of \$6.1 million during fiscal 2017. There were no restructuring charges incurred during fiscal 2018. The Company does not expect significant future cash-based severance charges to be incurred under this plan as the actions were completed during fiscal 2017. As of February 3, 2018, there were no amounts included in accrued expenses related to these restructuring activities as the Company completed payments for the remaining anticipated costs during fiscal 2018. At January 28, 2017, the Company had a balance of approximately \$0.2 million in accrued expenses related to these restructuring activities.

The following table summarizes restructuring activities related primarily to severance during fiscal 2017 and fiscal 2018 (in thousands):

	Total
Balance at January 30, 2016	\$—
Charges to operations	6,083
Cash payments	(6,003)
Foreign currency and other adjustments	100
Balance at January 28, 2017	\$180
Cash payments	(124)
Foreign currency and other adjustments	(56)
Balance at February 3, 2018	\$—

During fiscal 2017, the Company also incurred an estimated exit tax charge of approximately \$1.9 million related to its reorganization in Europe as a result of the global cost reduction and restructuring plan. The exit tax charge has not been finalized with the local authorities and actual amounts could differ significantly from these estimates as negotiations are completed.

Balance at February 3, 2018	\$(67,049)	\$ (14,369)	\$ —	\$(11,644)	\$(93,062)

During the fourth quarter of fiscal 2018, the Company early adopted authoritative guidance which addresses certain stranded income tax effects in accumulated other comprehensive income (loss) resulting from the Tax Reform enacted in December 2017. As a result, the Company recorded a cumulative adjustment to increase retained earnings by \$1.2 million with a corresponding reduction to accumulated other comprehensive income (loss) related to the Company's Supplemental Executive Retirement Plan and its interest rate swap designated as a cash flow hedge based in the U.S.

(1) These accumulated other comprehensive income (loss) components are included in the computation of net periodic defined benefit pension cost. Refer to Note 12 for further information.

(11) Income Taxes

Changes in Tax Law

In December 2017, the 2017 Tax Cuts and Jobs Act in the U.S. (referred to herein as the “Tax Reform”), was enacted into law. The Tax Reform includes significant changes to the U.S. corporate income tax system, including a reduction in the U.S. federal corporate income tax rate from 35% to 21% and a one-time mandatory transition tax on accumulated foreign earnings.

The Tax Reform also establishes new tax laws that will be effective for calendar 2018, including but not limited to (i) a new provision designed to tax global intangible low-taxed income (“GILTI”), (ii) a general elimination of U.S. federal income taxes on dividends from foreign subsidiaries, (iii) a limitation on deductible interest expense and (iv) limitations on the deductibility of certain executive compensation.

The Securities and Exchange Commission (“SEC”) issued authoritative guidance which addresses accounting for the impact of the Tax Reform. This guidance provides a measurement period, which should not extend beyond one year from the enactment date, during which the Company may finalize the accounting for the impacts of the Tax Reform, and allows for the Company to record provisional estimates of such amounts. As a result, during fiscal 2018, the Company recorded estimated additional income tax expense of \$47.9 million. This is comprised of a provisional charge of \$24.9 million for the re-measurement of U.S. deferred tax assets and a provisional charge of \$23.0 million for the estimated effects of the transitional tax on the deemed repatriation of foreign earnings. The

F-28

Table of Contents

GUESS?, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

income tax payable related to the transition tax is due over an eight year period beginning in calendar 2018. The amount that is payable in the next 12 months is approximately \$1.9 million and has been included in accrued expenses in the Company's consolidated balance sheet. The Company has provided for any additional tax liabilities on amounts that are estimated to be repatriated from foreign operations as a result of the Tax Reform. We have not provided for other income taxes on undistributed foreign earnings expected to be reinvested outside the U.S. If in the future we decide to repatriate such earnings, we would incur other incremental taxes. Our current plans do not indicate a need to repatriate them to fund our U.S. cash requirements.

Based on the Company's current interpretation of the Tax Reform, reasonable estimates were made to record provisional adjustments during fiscal 2018. These estimates may change, and the Company will continue to refine such amounts within the measurement period allowed. These estimates may be impacted by a number of additional considerations, including, but not limited to, the state level income tax impacts of the Tax Reform, clarifications of or changes to the Tax Reform (including the issuance of final regulations and evolving technical interpretations), additional guidance issued by the SEC or FASB, and the Company's ongoing analysis of historical earnings and profits as well as tax pools. The Company continues to analyze the provisions of the Tax Reform, including but not limited to, the creation of a new minimum tax called the base erosion anti-abuse tax; a new provision that taxes U.S. allocated expenses (e.g. interest and general administrative expenses) as well as certain GILTI from foreign operations; a general elimination of U.S. federal income taxes on dividends from foreign subsidiaries; a new limitation on deductible interest expense; and limitations on the deductibility of certain employee compensation. Under GAAP, companies are allowed to make an accounting policy election to either treat taxes resulting from GILTI as a current-period expense when they are incurred or factor such amounts into the measurement of deferred taxes. The Company has not completed its analysis of the effects of the GILTI provisions and will further consider the accounting policy election within the measurement period allowed.

During the fourth quarter of fiscal 2018, the Company also early adopted authoritative guidance which addresses certain stranded income tax effects in accumulated other comprehensive income (loss) resulting from the Tax Reform. As a result, the Company recorded a cumulative adjustment of \$1.2 million to reclassify the stranded income tax effects from the Tax Reform that were included in accumulated other comprehensive income (loss) to retained earnings.

Income Tax Expense

Income tax expense (benefit) is summarized as follows (in thousands):

	Year Ended Feb 3, 2018	Year Ended Jan 28, 2017	Year Ended Jan 30, 2016
Federal:			
Current	\$34,181	\$8,212	\$23,618
Deferred	21,595	(636)	4,038
State:			
Current	1,903	2,537	3,864
Deferred	217	(1,000)	(296)
Foreign:			
Current	7,333	17,055	14,259
Deferred	8,943	2,044	(3,019)
Total	\$74,172	\$28,212	\$42,464

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Actual income tax expense differs from expected income tax expense obtained by applying the statutory federal income tax rate to earnings before income taxes as follows (in thousands):

	Year Ended Feb 3, 2018	Year Ended Jan 28, 2017	Year Ended Jan 30, 2016
Computed "expected" tax expense	\$23,693	\$18,763	\$44,547
State taxes, net of federal benefit	1,675	999	2,320
Non-U.S. tax expense less than federal statutory tax rate (1)	(7,396)	(1,539)	(6,991)
Tax Reform - repatriation tax adjustment (2)	23,034	—	—
Tax Reform - deferred tax adjustment (2)	24,856	—	—
Cumulative valuation reserve (3)	—	6,830	—
Valuation reserve (4)	9,057	5,841	3,024
Unrecognized tax benefit	537	556	1,123
Share-based compensation (5)	1,309	—	—
Net tax settlements	—	1,894	—
Sale of minority interest investment	—	(2,316)	—
Estimated exit tax charge	—	1,911	—
Prior year tax adjustments	(88)	(1,790)	(2,944)
Non-deductible permanent difference	(3,224)	(2,284)	1,295
Other	719	(653)	90
Total	\$74,172	\$28,212	\$42,464

The jurisdictional location of pre-tax income (loss) may represent a significant component of the Company's effective tax rate as income tax rates outside the U.S. are generally lower than the U.S. statutory income tax rate. Furthermore, the impact of changes in the jurisdictional location of pre-tax income (loss) on the Company's effective tax rate will be greater at lower levels of consolidated pre-tax income (loss). These amounts exclude the (1) impact of net changes in valuation allowances, audit and other adjustments related to the Company's non-U.S. operations, as they are reported separately in the appropriate corresponding line items in the table above. The impact on the Company's effective tax rate was primarily related to the Company's Swiss and Korean subsidiaries which have jurisdictional effective tax rates which range from 8% to 20% lower than the U.S. rates in effect for the periods presented.

During fiscal 2018, the Company recognized additional tax expense resulting from the enactment of the Tax (2) Reform to account for the estimated effects of the transitional tax on the deemed repatriation of foreign earnings and reduced deferred tax assets due to lower future U.S. corporate tax rates.

Amounts represent valuation reserves resulting from jurisdictions where there have been cumulative net operating (3) losses, limiting the Company's ability to consider other subjective evidence to continue to recognize the existing deferred tax assets.

Amounts relate primarily to valuation reserves on non-cumulative net operating losses or other deferred tax assets (4) arising during the respective period.

During fiscal 2018, the Company adopted authoritative guidance which requires all income tax effects of stock (5) awards (resulting from an increase or decrease in the fair value of an award from grant date to the vesting date) to be recognized in the income statement when the awards vest or are settled. This is a change from previous guidance that required such activity to be recorded in paid-in capital within stockholders' equity.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Total income tax expense (benefit) is allocated as follows (in thousands):

	Year Ended Feb 3, 2018	Year Ended Jan 28, 2017	Year Ended Jan 30, 2016
Operations (1)	\$74,172	\$28,212	\$42,464
Stockholders' equity (1)	(3,173)	1,782	4,668
Total income tax expense	\$70,999	\$29,994	\$47,132

(1) During fiscal 2018, the Company adopted authoritative guidance which requires all income tax effects of stock awards (resulting from an increase or decrease in the fair value of an award from grant date to the vesting date) to be recognized in the income statement when the awards vest or are settled. This is a change from previous guidance that required such activity to be recorded in paid-in capital within stockholders' equity. As a result, the Company recorded tax shortfalls of approximately \$1.3 million in the Company's income tax expense during fiscal 2018.

The tax effects of the components of other comprehensive income (loss) are allocated as follows (in thousands):

	Year Ended Feb 3, 2018	Year Ended Jan 28, 2017	Year Ended Jan 30, 2016
Derivative financial instruments designated as cash flow hedges	\$(2,738)	\$(864)	\$559
Marketable securities	—	6	(7)
Defined benefit plans	(435)	(21)	2,972
Total income tax expense (benefit) (1)	\$(3,173)	\$(879)	\$3,524

(1) During the fourth quarter of fiscal 2018, the Company early adopted authoritative guidance which addresses certain stranded income tax effects in accumulated other comprehensive income (loss) resulting from the Tax Reform enacted in December 2017. As a result, the Company recorded a cumulative adjustment to increase retained earnings by \$1.2 million with a corresponding reduction to accumulated other comprehensive income (loss) related to the Company's Supplemental Executive Retirement Plan and its interest rate swap designated as a cash flow hedge based in the U.S. The impact from this reclassification on accumulated other comprehensive income (loss) has been excluded from the amounts provided in this table.

Total earnings before income tax expense and noncontrolling interests are comprised of the following (in thousands):

	Year Ended Feb 3, 2018	Year Ended Jan 28, 2017	Year Ended Jan 30, 2016
Domestic operations	\$39,112	\$32,944	\$90,141
Foreign operations	31,159	20,666	37,138
Earnings before income tax expense and noncontrolling interests	\$70,271	\$53,610	\$127,279

Deferred Taxes

The tax effects of temporary differences that give rise to significant portions of deferred tax assets and deferred tax liabilities as of February 3, 2018 and January 28, 2017 are presented below (in thousands):

	Feb 3, 2018	Jan 28, 2017
Deferred tax assets:		
Net operating losses	19,859	13,524
Defined benefit plans	13,155	20,642
Deferred compensation	10,721	12,987
Excess of book over tax depreciation/amortization	10,704	9,018
Rent expense	7,651	13,672
Deferred income	7,141	6,213
Bad debt reserve	2,529	2,124
Lease incentives	1,814	5,545
Uniform capitalization	974	1,900
Other	30,703	28,265
Total deferred tax assets	105,251	113,890
Deferred tax liabilities:		
Goodwill amortization	(2,303)	(3,654)
Excess of tax over book depreciation/amortization	(135)	(189)
Other	(4,517)	(4,544)
Valuation allowance	(32,601)	(23,255)
Net deferred tax assets (1)	\$65,695	\$82,248

As of February 3, 2018, amount includes net deferred tax liabilities of \$2.7 million recorded in other long-term (1) liabilities in the Company's consolidated balance sheet. There were \$0.5 million net deferred tax liabilities recorded in other long-term liabilities in the Company's consolidated balance sheet at January 28, 2017.

Based on the historical earnings of the Company and projections of future taxable earnings in certain jurisdictions, management believes it is more likely than not that the results of operations will not generate sufficient taxable earnings to realize certain net deferred tax assets. Therefore, the Company has recorded a valuation allowance of \$32.6 million, which is an increase of \$9.3 million from the prior year.

As of February 3, 2018, certain of the Company's operations had net operating loss carryforwards of \$74.7 million. These are comprised of \$17.1 million of operating loss carryforwards that have an unlimited carryforward life, \$57.0 million of foreign operating loss carryforwards that expire between fiscal 2019 and fiscal 2038 and \$0.6 million of state operating loss carryforwards that expire between fiscal 2019 and fiscal 2036. Based on the historical earnings of these operations, management believes that it is more likely than not that some of the operations will not generate sufficient earnings to utilize all of the net operating loss. As of February 3, 2018 and January 28, 2017, the Company had a valuation allowance of \$20.4 million and \$13.9 million, respectively, related to its net operating loss carryforwards.

Unrecognized Tax Benefit

The Company and its subsidiaries are subject to U.S. federal and foreign income tax as well as income tax of multiple state and foreign local jurisdictions. From time-to-time, the Company is subject to routine income tax audits on various tax matters around the world in the ordinary course of business. Although the Company has substantially concluded all U.S. federal, foreign, state and foreign local income tax matters for years through fiscal 2012, as of February 3, 2018, several income tax audits were underway in multiple jurisdictions for various periods after fiscal

2012. The Company does not believe that the resolution of open matters will have a material effect on the Company's financial position or liquidity.

The Company accrues an amount for its estimate of additional income tax liability which the Company, more likely than not, will incur as a result of the ultimate resolution of income tax audits ("uncertain tax positions"). The

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Company reviews and updates the estimates used in the accrual for uncertain tax positions as more definitive information becomes available from taxing authorities, upon completion of tax audits, upon expiration of statutes of limitation, or upon occurrence of other events.

A reconciliation of the beginning and ending amount of gross unrecognized tax benefit (excluding interest and penalties) is as follows (in thousands):

	Year Ended Feb 3, 2018	Year Ended Jan 28, 2017	Year Ended Jan 30, 2016
Beginning balance	\$12,983	\$12,585	\$13,640
Additions:			
Tax positions related to the prior year	4,436	672	496
Tax positions related to the current year	222	106	1,516
Reductions:			
Tax positions related to the prior year	(356)	(380)	(1,650)
Tax positions related to the current year	(309)	—	(359)
Settlements	—	—	(505)
