Security Valuation - Securities (including options) traded on an exchange are valued at the last sales price on the primary exchange or market on which they are traded. Securities not listed on an exchange or security market, or securities for which there is no last sales price, are valued at the mean of the most recent bid and asked prices or are valued by J. & W. Seligman & Co. Incorporated (the [Manager]) based on quotations provided by primary market makers in such securities. Securities for which market quotations are not readily available or are otherwise no longer valid or reliable are valued at fair value determined in accordance with procedures approved by the Board of Directors. This can occur in the event of, among other things, natural disasters, acts of terrorism, market disruptions, inter-day market disruptions, intra-day trading halts, and extreme market volatility.

Short-term holdings that mature in more than 60 days are valued at current market quotations. Short-term holdings maturing in 60 days or less are valued at amortized cost.
