QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended June 30, 2015
OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Transition Period from _____ to _____

Commission File No. 1-32525

AMERIPRISE FINANCIAL, INC.

(Exact name of registrant as specified in its charter)

Delaware

13-3180631

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

1099 Ameriprise Financial Center, Minneapolis, Minnesota

55474

(Address of principal executive offices)

(Zip Code)

Registrant's telephone number, including area code: (612) 671-3131

Former name, former address and former fiscal year, if changed since last report: Not Applicable

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer

Accelerated Filer

Non-Accelerated Filer

Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class

Outstanding at July 17, 2015

Common Stock (par value \$.01 per share)

178,221,136 shares

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. Basis of Presentation

Ameriprise Financial, Inc. is a holding company, which primarily conducts business through its subsidiaries to provide financial planning, products and services that are designed to be utilized as solutions for clients' cash and liquidity, asset accumulation, income, protection and estate and wealth transfer needs. The foreign operations of Ameriprise Financial, Inc. are conducted primarily through its subsidiary, Threadneedle Asset Management Holdings Sàrl ("Threadneedle").

The accompanying Consolidated Financial Statements include the accounts of Ameriprise Financial, Inc., companies in which it directly or indirectly has a controlling financial interest and variable interest entities ("VIEs") in which it is the primary beneficiary (collectively, the "Company"). The income or loss generated by consolidated entities which will not be realized by the Company's shareholders is attributed to noncontrolling interests in the Consolidated Statements of Operations. Noncontrolling interests are the ownership interests in subsidiaries not attributable, directly or indirectly, to Ameriprise Financial, Inc. and are classified as equity within the Consolidated Balance Sheets. The Company, excluding noncontrolling interests, is defined as "Ameriprise Financial." All intercompany transactions and balances have been eliminated in consolidation. See Note 3 for additional information related to VIEs.

The results of Securities America Financial Corporation and its subsidiaries (collectively, "Securities America") have been presented as discontinued operations for all periods presented. The Company completed the sale of Securities America in the fourth quarter of 2011.

The interim financial information in this report has not been audited. In the opinion of management, all adjustments necessary for a fair presentation of the consolidated results of operations and financial position for the interim periods have been made. All adjustments made were of a normal recurring nature.

The accompanying Consolidated Financial Statements are prepared in accordance with U.S. generally accepted accounting principles ("GAAP"). Results of operations reported for interim periods are not necessarily indicative of results for the entire year. These Consolidated Financial Statements and Notes should be read in conjunction with the Consolidated Financial Statements and Notes in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, filed with the Securities and Exchange Commission ("SEC") on February 24, 2015.

The Company evaluated events or transactions that may have occurred after the balance sheet date for potential recognition or disclosure through the date the financial statements were issued.

2. Recent Accounting Pronouncements

Adoption of New Accounting Standards

Transfers and Servicing

In June 2014, the Financial Accounting Standards Board ("FASB") updated the accounting standards related to transfers and servicing. The update requires repurchase-to-maturity transactions and linked repurchase financings to be accounted for as secured borrowings consistent with the accounting for other repurchase agreements. The standard requires disclosures related to transfers of financial assets accounted for as sales in transactions that are similar to repurchase agreements. The standard also requires disclosures on the remaining contractual maturity of the agreements, disaggregation of the gross obligation by class of collateral pledged and potential risks associated with the agreements and the related collateral pledged in repurchase agreements, securities lending transactions, and repurchase-to-maturity transactions accounted for as secured borrowings. The standard is effective for interim and annual periods beginning after December 15, 2014, except for the disclosure requirements for repurchase agreements, security lending transactions and repurchase-to-maturity transactions accounted for as secured borrowings which are effective for interim periods beginning after March 15, 2015. The standard requires entities to present changes in accounting for transactions outstanding at the effective date as a cumulative-effect adjustment to retained earnings as of the beginning of the period of adoption. The adoption of the standard did not have any effect on the Company's consolidated results of operations and financial condition. See Note 9 and Note 11 for the required disclosures.

Receivables – Troubled Debt Restructuring by Creditors

In January 2014, the FASB updated the accounting standard related to recognizing residential real estate obtained through a repossession or foreclosure from a troubled debtor. The update clarifies the criteria for derecognition of the loan receivable and recognition of the real estate property. The standard is effective for interim and annual periods beginning after December 15, 2014 and can be applied under a modified retrospective transition method or a prospective transition method. The adoption of the standard did not have any effect on the Company's consolidated results of operations and financial condition.

Investments – Equity Method and Joint Ventures

In January 2014, the FASB updated the accounting standard related to investments in qualified affordable housing projects. The update allows for an accounting policy election to account for investments in qualified affordable housing projects using the proportional amortization method if certain conditions are met. Under the proportional amortization method, the investment in a qualified affordable

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

housing project is amortized in proportion to the tax credits and other tax benefits received. The net investment performance is recognized as a component of income tax expense (benefit). The standard is effective for interim and annual periods beginning after December 15, 2014 and should be applied retrospectively to all periods presented. The Company did not elect the proportional amortization method.

Future Adoption of New Accounting Standards

Insurance – Disclosure about Short-Duration Contracts

In May 2015, the FASB updated the accounting standard for short-duration insurance contracts. The update requires enhanced disclosures about an insurance entity's initial claim estimates and subsequent adjustments to those estimates, methodologies and judgements in estimating claims and the timing, frequency and severity of claims. The standard is effective for annual periods beginning after December 15, 2015 and interim periods within annual periods beginning after December 15, 2016. Early adoption is permitted. The disclosures should be applied retrospectively by providing comparative disclosures for each period presented, except for those requirements that apply only to the current period. The adoption of the standard is not expected to have any impact on the Company's consolidated results of operations and financial condition.

Fair Value Measurement – Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)

In May 2015, the FASB updated the accounting standards related to fair value measurement. The update applies to investments that are measured at net asset value ("NAV"). The standard eliminates the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the NAV per share as a practical expedient. In addition, the update limits disclosures to investments for which the entity elected to measure the fair value using the practical expedient rather than all eligible investments. The standard is effective for interim and annual periods beginning after December 15, 2015. The standard should be applied retrospectively to all periods presented and early adoption is permitted. There will be no impact of the standard to the Company's consolidated results of operations and financial condition.

Interest – Imputation of Interest

In April 2015, the FASB updated the accounting standards related to debt issuance costs. The update requires that debt issuance costs be presented on the balance sheet as a direct deduction from the carrying amount of debt. The update does not impact the measurement or recognition of debt issuance costs. The standard is effective for interim and annual periods beginning after December 15, 2015. The standard is to be applied on a retrospective basis to all periods presented. Early adoption of the standard is permitted. The Company does not expect the reclassification to have a material impact on the Company's consolidated financial condition. There is no impact of the standard to the Company's consolidated results of operations.

Consolidation

In February 2015, the FASB updated the accounting standard for consolidation. The update changes the accounting for the consolidation model for limited partnerships and VIEs and excludes certain money market funds out of the consolidation analysis. Specific to the consolidation analysis of a VIE, the update clarifies consideration of fees paid to a decision maker and amends the related party guidance. The standard is effective for periods beginning after December 15, 2015. Early adoption is permitted, including adoption in an interim period. The standard may be applied using a modified retrospective approach by recording a cumulative-effect adjustment to equity at the beginning of the period of adoption or applied retrospectively. The Company is currently evaluating the impact of the standard on its consolidated results of operations and financial condition.

In August 2014, the FASB updated the accounting standard related to consolidation of collateralized financing entities. The update applies to reporting entities that consolidate a collateralized financing entity and measures all financial assets and liabilities of the collateralized financing entity at fair value. The update provides a measurement alternative which would allow an entity to measure both the financial assets and financial liabilities at the fair value of the more observable of the fair value of the financial assets or financial liabilities. When the measurement alternative

is elected, the reporting entity's net income should reflect its own economic interests in the collateralized financing entity, including changes in the fair value of the beneficial interests retained by the reporting entity and beneficial interests that represent compensation for services. If the measurement alternative is not elected, the financial assets and financial liabilities should be measured separately in accordance with the requirements of the fair value topic. Any difference in the fair value of the assets and liabilities would be recorded to net income attributable to the reporting entity. The standard is effective for interim and annual periods beginning after December 15, 2015 and early adoption is permitted as of the beginning of an annual period. The Company is currently evaluating the impact of the standard on its consolidated results of operations and financial condition.

Presentation of Financial Statements – Going Concern

In August 2014, the FASB updated the accounting standard related to an entity's assessment of its ability to continue as a going concern. The standard requires that management evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the entity's ability to continue as a going concern within one year after the date that the financial statements are issued. In situations where there is substantial doubt about an entity's ability to continue as a going concern, disclosure should be made

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

so that a reader can understand the conditions that raise substantial doubt, management's assessment of those conditions and any plan management has to mitigate those conditions. The standard is effective for the annual period ending after December 15, 2016, and for annual periods and interim periods thereafter. Early adoption is permitted. The adoption of the standard is not expected to have a material impact on the Company's consolidated results of operations and financial condition.

Compensation – Stock Compensation

In June 2014, the FASB updated the accounting standards related to stock compensation. The update clarifies the accounting for share-based payments with a performance target that could be achieved after the requisite service period. The update specifies the performance target should not be reflected in estimating the grant-date fair value of the award. Instead, the probability of achieving the performance target should impact vesting of the award. The standard is effective for interim and annual periods beginning after December 15, 2015 and early adoption is permitted. The adoption of the standard is not expected to have a material impact on the Company's consolidated results of operations and financial condition.

Revenue from Contracts with Customers

In May 2014, the FASB updated the accounting standards for revenue from contracts with customers. The update provides a five step revenue recognition model for all revenue arising from contracts with customers and affects all entities that enter into contracts to provide goods or services to their customers (unless the contracts are in the scope of other standards). The standard also updates the accounting for certain costs associated with obtaining and fulfilling a customer contract. In addition, the standard requires disclosure of quantitative and qualitative information that enables users of financial statements to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. The standard is effective for interim and annual periods beginning after December 15, 2016 and early adoption is prohibited. The standard may be applied retrospectively for all periods presented or retrospectively with a cumulative-effect adjustment at the date of adoption. The Company is currently evaluating the impact of the standard on its consolidated results of operations and financial condition.

3. Variable Interest Entities

The Company provides asset management services to investment entities which are considered to be VIEs, such as CLOs, hedge funds, property funds (pooled investment vehicles) and private equity funds (collectively, "investment entities"), which are sponsored by the Company. The Company consolidates certain CLOs and property funds (collectively, "consolidated investment entities"). In addition, the Company invests in structured investments and affordable housing partnerships which are considered VIEs which the Company does not consolidate.

Non-Consolidated VIEs

The Company has determined that consolidation is not required for hedge funds and private equity funds which are sponsored by the Company. The Company's maximum exposure to loss with respect to its investment in these entities is limited to its carrying value. The carrying value of the Company's investment in these entities was \$98 million and \$89 million as of June 30, 2015 and December 31, 2014, respectively.

The Company manages one CLO which it does not consolidate. The Company manages the CLO and earns management fees and incentive fees from the CLO based on the CLO's collateral pool. Unlike the consolidated CLOs, the Company has no investment in the CLO and no exposure to loss.

The Company has variable interests in affordable housing partnerships for which it is not the primary beneficiary and therefore does not consolidate. The Company's maximum exposure to loss as a result of its investments in affordable housing partnerships is limited to the carrying value of these investments. The carrying value is reflected in other investments and was \$494 million and \$504 million as of June 30, 2015 and December 31, 2014, respectively.

The Company invests in structured investments which are considered VIEs for which it is not the sponsor. These structured investments typically invest in fixed income instruments and are managed by third parties and include asset backed securities, commercial mortgage backed securities and residential mortgage backed securities. The Company

classifies these investments as Available-for-Sale securities. The Company has determined that it is not the primary beneficiary of these structures due to the size of the Company's investment in the entities and position in the capital structure of these entities. The Company's maximum exposure to loss as a result of its investment in these structured investments is limited to its carrying value. See Note 4 for additional information about these structured investments. The Company has no obligation to provide financial or other support to the non-consolidated VIEs beyond its investment nor has the Company provided any support to these entities. The carrying value of the Company's investment in these entities is included in investments on the consolidated balance sheets.

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

Consolidated VIEs

The consolidated CLOs are asset backed financing entities collateralized by a pool of assets, primarily syndicated loans and, to a lesser extent, high-yield bonds and stocks. Multiple tranches of debt securities are issued by a CLO, offering investors various maturity and credit risk characteristics. The debt securities issued by the CLOs are non-recourse to the Company. The CLO's debt holders have recourse only to the assets of the CLO. The assets of the CLOs cannot be used by the Company. Scheduled debt payments are based on the performance of the CLO's collateral pool. The Company generally earns management fees from the CLOs based on the CLO's collateral pool and, in certain instances, may also receive incentive fees. The Company has invested in a portion of the unrated, junior subordinated notes of certain CLOs. For certain of the CLOs, the Company has determined that consolidation is required as it has power over the CLOs as collateral manager and holds a variable interest in the CLOs for which the Company has the potential to receive benefits or the potential obligation to absorb losses that could be significant to the CLO.

The Company provides investment advice and related services to property funds, certain of which are considered VIEs. For investment management services, the Company generally earns management fees based on the market value of assets under management, and in certain instances may also receive performance-based fees. The Company has determined that consolidation is required for certain property funds managed by the Company.

During the six months ended June 30, 2015, the Company consolidated one new CLO with assets of approximately \$564 million and liquidated no CLOs. During the six months ended June 30, 2014, the Company consolidated two new CLOs with assets of approximately \$1.1 billion and liquidated one CLO resulting in the sale of approximately \$315 million in assets.

During the six months ended June 30, 2015, the Company consolidated two new property funds with assets of approximately \$248 million. During the six months ended June 30, 2014, the Company consolidated one new property fund with assets of approximately \$206 million. The Company terminated one property fund during each of the six months ended June 30, 2015 and 2014. The liquidation of properties may occur over several years until the fund is terminated. See the summary of changes in Level 3 assets and liabilities for gross sales and purchases of properties, within the other assets caption, for the three months and six months ended June 30, 2015 and 2014.

Fair Value of Assets and Liabilities

The Company categorizes its fair value measurements according to a three-level hierarchy. See Note 10 for the definition of the three levels of the fair value hierarchy.

The following tables present the balances of assets and liabilities held by consolidated investment entities measured at fair value on a recurring basis:

	June 30, 2015

Securities and loans transferred from Level 2 to Level 3 represent assets with fair values that are now based on a single non-binding broker quote. Securities and loans transferred from Level 3 to Level 2 represent assets with fair values that are now obtained from a third party pricing service with observable inputs or priced in active markets.

During the reporting periods, there were no transfers between Level 1 and Level 2.

The following tables provide a summary of the significant unobservable inputs used in the fair value measurements developed by the Company or reasonably available to the Company of Level 3 assets and liabilities held by consolidated investment entities:

		June 30, 2015					
	Fair Value (in millions)	Valuation Technique	Unobservable Input	Range		Weighted Average	
Other assets (property funds)	\$1,972	Discounted cash flow/ market comparables	Equivalent yield	4.4 %– 13.5%	6.2 %		
			Expected rental value (per square foot)	\$5 – \$92	\$40		
CLO debt	\$6,487	Discounted cash flow	Annual default rate	2.5%			
			Discount rate	1.6 %– 8.3%	2.8 %		
			Constant prepayment rate	5.0 %– 10.0%	9.8 %		
			Loss recovery	36.4 %– 63.6%	62.7 %		
		December 31, 2014					
	Fair Value (in millions)	Valuation Technique	Unobservable Input	Range		Weighted Average	
	\$1,935		Equivalent yield	4.4 %– 12.0%	6.5 %		

Edgar Filing: AMERIPRISE FINANCIAL INC - Form 10-Q

Other assets (property funds)		Discounted cash flow/ market comparables	Expected rental value (per square foot)	\$3	– \$94	\$34		
CLO debt	\$6,030	Discounted cash flow	Annual default rate	2.5%				
			Discount rate	1.2	%– 8.3%	2.4	%	
			Constant prepayment rate	5.0	%– 10.0%	9.8	%	
			Loss recovery	36.4	%– 63.6%	62.7	%	

Level 3 measurements not included in the tables above are obtained from non-binding broker quotes where unobservable inputs are not reasonably available to the Company.

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

Sensitivity of Fair Value Measurements to Changes in Unobservable Inputs

Generally, a significant increase (decrease) in the expected rental value used in the fair value measurement of properties held by consolidated investment entities in isolation would result in a significantly higher (lower) fair value measurement and a significant increase (decrease) in the equivalent yield in isolation would result in a significantly lower (higher) fair value measurement.

Generally, a significant increase (decrease) in the annual default rate and discount rate used in the fair value measurement of the CLO's debt in isolation would result in a significantly lower (higher) fair value measurement and a significant increase (decrease) in loss recovery in isolation would result in a significantly higher (lower) fair value measurement. A significant increase (decrease) in the constant prepayment rate in isolation would result in a significantly higher (lower) fair value measurement.

Determination of Fair Value

Assets

Investments

The fair value of syndicated loans obtained from third party pricing services using a market approach with observable inputs is classified as Level 2. The fair value of syndicated loans obtained from third party pricing services with a single non-binding broker quote as the underlying valuation source is classified as Level 3. The underlying inputs used in non-binding broker quotes are not readily available to the Company.

In consideration of the above, management is responsible for the fair values recorded on the financial statements.

Prices received from third party pricing services are subjected to exception reporting that identifies loans with significant daily price movements as well as no movements. The Company reviews the exception reporting and resolves the exceptions through reaffirmation of the price or recording an appropriate fair value estimate. The Company also performs subsequent transaction testing. The Company performs annual due diligence of the third party pricing services. The Company's due diligence procedures include assessing the vendor's valuation qualifications, control environment, analysis of asset-class specific valuation methodologies and understanding of sources of market observable assumptions and unobservable assumptions, if any, employed in the valuation methodology. The Company also considers the results of its exception reporting controls and any resulting price challenges that arise.

See Note 10 for a description of the Company's determination of the fair value of corporate debt securities, U.S. government and agencies obligations, common stocks and other investments.

Receivables

For receivables of the consolidated CLOs, the carrying value approximates fair value as the nature of these assets has historically been short term and the receivables have been collectible. The fair value of these receivables is classified as Level 2.

Other Assets

Other assets consist primarily of properties held in consolidated pooled investment vehicles managed by Threadneedle. The fair value of these properties is calculated by a third party appraisal service by discounting future cash flows generated by the expected market rental value for the property using the equivalent yield of a similar investment property. Inputs used in determining the equivalent yield and expected rental value of the property may include: rental cash flows, current occupancy, historical vacancy rates, tenant history and assumptions regarding how quickly the property can be occupied and at what rental rates. Management reviews the valuation report and assumptions used to ensure that the valuation was performed in accordance with applicable independence, appraisal and valuation standards. Given the significance of the unobservable inputs to these measurements, these assets are classified as Level 3.

The CLOs hold an immaterial amount of warrants recorded in other assets. Loans within the CLOs may default and go through a restructuring that can result in the CLO receiving warrants for the issuer's equity securities. Warrants are classified as Level 2 when the price is derived from observable market data. Warrants from an issuer whose securities are not priced in active markets are classified as Level 3.

Liabilities

Debt

The fair value of the CLOs' debt is determined using a discounted cash flow model. Inputs used to determine the expected cash flows include assumptions about default, discount, prepayment and recovery rates of the CLOs' underlying assets. Given the significance of the unobservable inputs to this fair value measurement, the fair value of the CLOs' debt is classified as Level 3.

Other Liabilities

Other liabilities consist primarily of securities purchased but not yet settled held by consolidated CLOs. The carrying value approximates fair value as the nature of these liabilities has historically been short term. The fair value of these liabilities is classified as Level 2.

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

Fair Value Option

The Company has elected the fair value option for the financial assets and liabilities of the consolidated CLOs. Management believes that the use of the fair value option better matches the changes in fair value of assets and liabilities related to the CLOs.

The following table presents the fair value and unpaid principal balance of loans and debt for which the fair value option has been elected:

	June 30, 2015	December 31, 2014
	(in millions)	
Syndicated loans		
Unpaid principal balance	\$6,320	\$5,871
Excess unpaid principal over fair value	(129)	(100)
Fair value	\$6,191	\$5,771
Fair value of loans more than 90 days past due	\$26	\$32
Fair value of loans in nonaccrual status	26	32
Difference between fair value and unpaid principal of loans more than 90 days past due, loans in nonaccrual status or both	32	25
Debt		
Unpaid principal balance	\$6,739	\$6,248
Excess unpaid principal over fair value	(252)	(218)
Fair value	\$6,487	\$6,030

Interest income from syndicated loans, bonds and structured investments is recorded based on contractual rates in net investment income. Gains and losses related to changes in the fair value of investments and gains and losses on sales of investments are also recorded in net investment income. Interest expense on debt is recorded in interest and debt expense with gains and losses related to changes in the fair value of debt recorded in net investment income.

Total net losses recognized in net investment income related to changes in the fair value of financial assets and liabilities for which the fair value option was elected were \$12 million and \$1 million for the three months ended June 30, 2015 and 2014, respectively. Total net gains recognized in net investment income related to changes in the fair value of financial assets and liabilities for which the fair value option was elected were \$29 million and \$20 million for the six months ended June 30, 2015 and 2014, respectively. The majority of the syndicated loans and debt have floating rates; as such, changes in their fair values are primarily attributable to changes in credit spreads.

Debt of the consolidated investment entities and the stated interest rates were as follows:

	Carrying Value		Weighted Average Interest Rate	
	June 30, 2015	December 31, 2014	June 30, 2015	December 31, 2014
	(in millions)			
Debt of consolidated CLOs due 2016-2026	\$6,487	\$6,030	1.4	% 1.3
Floating rate revolving credit borrowings due 2016-2020	866	837	2.8	2.7
Total	\$7,353	\$6,867		

The debt of the consolidated CLOs has both fixed and floating interest rates, which range from 0% to 9.2%. The interest rates on the debt of CLOs are weighted average rates based on the outstanding principal and current interest rates. The carrying value of the debt of the consolidated CLOs represents the fair value of the aggregate debt. The carrying value of the floating rate revolving credit borrowings represents the outstanding principal amount of debt of

certain consolidated pooled investment vehicles managed by Threadneedle. The fair value of this debt was \$866 million and \$837 million as of June 30, 2015 and December 31, 2014, respectively. The property funds have entered into interest rate swaps and collars to manage the interest rate exposure on the floating rate revolving credit borrowings. The fair value of these derivative instruments is recorded gross and was a liability of \$9 million and \$10 million at June 30, 2015 and December 31, 2014, respectively. The overall effective interest rate reflecting the impact of the derivative contracts was 3.2% and 3.1% as of June 30, 2015 and December 31, 2014, respectively.

AMERIPRISE FINANCIAL, INC.

⁽¹⁾ Represents the amount of other-than-temporary impairment (“OTTI”) losses in accumulated other comprehensive income (“AOCI”). Amount includes unrealized gains and losses on impaired securities subsequent to the initial impairment measurement date. These amounts are included in gross unrealized gains and losses as of the end of the period.

As of both June 30, 2015 and December 31, 2014, investment securities with a fair value of \$1.3 billion were pledged to meet contractual obligations under derivative contracts and short-term borrowings.

At both June 30, 2015 and December 31, 2014, fixed maturity securities comprised approximately 84% of Ameriprise Financial investments. Rating agency designations are based on the availability of ratings from Nationally Recognized Statistical Rating Organizations (“NRSROs”), including Moody’s Investors Service (“Moody’s”), Standard & Poor’s Ratings Services (“S&P”) and Fitch Ratings Ltd. (“Fitch”). The Company uses the median of available ratings from Moody’s, S&P and Fitch, or, if fewer than three ratings are available, the lower rating is used. When ratings from Moody’s, S&P and Fitch are unavailable, the Company may utilize ratings from other NRSROs or rate the securities internally. At June 30, 2015 and December 31, 2014, the Company’s internal analysts rated \$1.3 billion and \$1.4 billion, respectively, of securities using criteria similar to those used by NRSROs.

A summary of fixed maturity securities by rating was as follows:

Ratings	June 30, 2015			December 31, 2014

As part of Ameriprise Financial's ongoing monitoring process, management determined that a majority of the change in gross unrealized losses on its Available-for-Sale securities is attributable to movement in interest rates.

The following table presents a rollforward of the cumulative amounts recognized in the Consolidated Statements of Operations for other-than-temporary impairments related to credit losses on Available-for-Sale securities for which a portion of the securities' total other-than-temporary impairments was recognized in other comprehensive income (loss):

Three Months Ended		Six Months Ended	
June 30,		June 30,

20

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

The change in net unrealized securities gains (losses) in other comprehensive income (loss) includes three components, net of tax: (i) unrealized gains (losses) that arose from changes in the market value of securities that were held during the period; (ii) (gains) losses that were previously unrealized, but have been recognized in current period net income due to sales of Available-for-Sale securities and due to the reclassification of noncredit other-than-temporary impairment losses to credit losses; and (iii) other adjustments primarily consisting of changes in insurance and annuity asset and liability balances, such as deferred acquisition costs (“DAC”), deferred sales inducement costs (“DSIC”), unearned revenue, benefit reserves and reinsurance recoverables, to reflect the expected impact on their carrying values had the unrealized gains (losses) been realized as of the respective balance sheet dates. The following table presents a rollforward of the net unrealized securities gains on Available-for-Sale securities included in AOCI:

	Net Unrealized Securities Gains	Deferred Income Tax	AOCI Related to Net Unrealized Securities Gains	
	(in millions)			
Balance at January 1, 2014	\$1,016	\$ (361))	\$ 655
Net unrealized securities gains arising during the period ⁽¹⁾	739	(261))	478
Reclassification of net securities gains included in net income	(6)) 2		(4)
Impact of other adjustments	(257)) 90		(167)
Balance at June 30, 2014	\$1,492	\$ (530))	\$ 962 ⁽²⁾
Balance at January 1, 2015	\$1,216	\$ (430))	\$ 786
Net unrealized securities losses arising during the period ⁽¹⁾	(445)) 156		(289)
Reclassification of net securities gains included in net income	(16)) 6		(10)
Impact of other adjustments	203	(71))	132
Balance at June 30, 2015	\$958	\$ (339))	\$ 619 ⁽²⁾

⁽¹⁾ Includes other-than-temporary impairment losses on Available-for-Sale securities related to factors other than credit that were recognized in other comprehensive income (loss) during the period.

⁽²⁾ Includes \$6 million and \$2 million of noncredit related impairments on securities and net unrealized securities gains on previously impaired securities at June 30, 2015 and 2014, respectively.

Net realized gains and losses on Available-for-Sale securities, determined using the specific identification method, recognized in earnings were as follows:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2015	2014	2015	2014
	(in millions)			
Gross realized gains	\$6	\$4	\$23	\$11
Gross realized losses	(1)) (3)	(6)) (4)
Other-than-temporary impairments	—	—	(1)) (1)
Total	\$5	\$1	\$16	\$6

Other-than-temporary impairments for the six months ended June 30, 2015 primarily related to credit losses on non-agency residential mortgage backed securities. Other-than-temporary impairments for the six months ended June 30, 2014 primarily related to the Company’s decision to sell a corporate debt security and credit losses on non-agency residential mortgage backed securities.

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

Available-for-Sale securities by contractual maturity at June 30, 2015 were as follows:

	Amortized Cost (in millions)	Fair Value
Due within one year	\$1,827	\$1,852
Due after one year through five years	6,379	6,827
Due after five years through 10 years	5,329	5,471
Due after 10 years	4,567	5,254
	18,102	19,404
Residential mortgage backed securities	6,056	6,121
Commercial mortgage backed securities	2,479	2,562
Asset backed securities	1,282	1,321
Common stocks	8	19
Total	\$27,927	\$29,427

Actual maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations. Residential mortgage backed securities, commercial mortgage backed securities and asset backed securities are not due at a single maturity date. As such, these securities, as well as common stocks, were not included in the maturities distribution.

5. Financing Receivables

The Company's financing receivables include commercial mortgage loans, syndicated loans, consumer loans, policy loans, certificate loans and margin loans. Commercial mortgage loans, syndicated loans, consumer loans, policy loans and certificate loans are reflected in investments. Margin loans are recorded in receivables.

Allowance for Loan Losses

Policy and certificate loans do not exceed the cash surrender value at origination. As there is minimal risk of loss related to policy and certificate loans, the Company does not record an allowance for loan losses. The Company monitors collateral supporting margin loans and requests additional collateral when necessary in order to mitigate the risk of loss. As there is minimal risk of loss related to margin loans, the allowance for loan losses is immaterial. The following table presents a rollforward of the allowance for loan losses for commercial mortgage loans, syndicated loans and consumer loans for the six months ended and the ending balance of the allowance for loan losses by impairment method:

	June 30, 2015	June 30, 2014
	(in millions)	
Beginning balance	\$35	\$37
Charge-offs	(2) (4
Provisions	1	—
Ending balance	\$34	\$33
Individually evaluated for impairment	\$6	\$9
Collectively evaluated for impairment	28	24

The recorded investment in commercial mortgage loans, syndicated loans and consumer loans by impairment method was as follows:

	June 30, 2015	December 31, 2014
--	------------------	-------------------------

	(in millions)	
Individually evaluated for impairment	\$42	\$42
Collectively evaluated for impairment	3,880	3,951
Total	\$3,922	\$3,993

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

As of June 30, 2015 and December 31, 2014, the Company's recorded investment in financing receivables individually evaluated for impairment for which there was no related allowance for loan losses was \$20 million and \$13 million, respectively. Unearned income, unamortized premiums and discounts, and net unamortized deferred fees and costs are not material to the Company's total loan balance.

During the three months ended June 30, 2015 and 2014, the Company purchased \$28 million and \$25 million, respectively, and sold \$1 million and \$6 million, respectively, of syndicated loans. During the six months ended June 30, 2015 and 2014, the Company purchased \$41 million and \$90 million, respectively, and sold \$7 million and \$10 million, respectively, consisting primarily of syndicated loans.

The Company has not acquired any loans with deteriorated credit quality as of the acquisition date.

Credit Quality Information

Nonperforming loans, which are generally loans 90 days or more past due, were \$10 million and \$12 million as of June 30, 2015 and December 31, 2014, respectively. All other loans were considered to be performing.

Commercial Mortgage Loans

The Company reviews the credit worthiness of the borrower and the performance of the underlying properties in order to determine the risk of loss on commercial mortgage loans. Based on this review, the commercial mortgage loans are assigned an internal risk rating, which management updates as necessary. Commercial mortgage loans which management has assigned its highest risk rating were 1% of total commercial mortgage loans at both June 30, 2015 and December 31, 2014. Loans with the highest risk rating represent distressed loans which the Company has identified as impaired or expects to become delinquent or enter into foreclosure within the next six months. In addition, the Company reviews the concentrations of credit risk by region and property type.

Concentrations of credit risk of commercial mortgage loans by U.S. region were as follows:

	Loans		Percentage			
	June 30, 2015	December 31, 2014	June 30, 2015	December 31, 2014		
	(in millions)					
East North Central	\$207	\$238	8	%	9	%
East South Central	63	62	2		2	
Middle Atlantic	203	217	7		8	
Mountain	254	245	9		9	
New England	131	140	5		5	
Pacific	743	694	27		25	
South Atlantic	742	740	27		27	
West North Central	237	233	9		9	
West South Central	155	160	6		6	
	2,735	2,729	100	%	100	%
Less: allowance for loan losses	23	25				
Total	\$2,712	\$2,704				

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

Concentrations of credit risk of commercial mortgage loans by property type were as follows:

	Loans		Percentage			
	June 30, 2015	December 31, 2014	June 30, 2015	December 31, 2014		
	(in millions)					
Apartments	\$500	\$500	18	%	18	%
Hotel	38	34	1		1	
Industrial	455	461	17		17	
Mixed use	45	45	2		2	
Office	540	545	20		20	
Retail	967	988	35		36	
Other	190	156	7		6	
	2,735	2,729	100	%	100	%
Less: allowance for loan losses	23	25				
Total	\$2,712	\$2,704				

Syndicated Loans

The recorded investment in syndicated loans at June 30, 2015 and December 31, 2014 was \$497 million and \$511 million, respectively. The Company's syndicated loan portfolio is diversified across industries and issuers. The primary credit indicator for syndicated loans is whether the loans are performing in accordance with the contractual terms of the syndication. Total nonperforming syndicated loans at June 30, 2015 and December 31, 2014 were \$5 million and \$4 million, respectively.

Consumer Loans

The recorded investment in consumer loans at June 30, 2015 and December 31, 2014 was \$690 million and \$753 million, respectively. The Company considers the credit worthiness of borrowers (FICO score), collateral characteristics such as loan-to-value ("LTV") and geographic concentration in determining the allowance for loan losses for consumer loans. At a minimum, management updates FICO scores and LTV ratios semiannually.

As of both June 30, 2015 and December 31, 2014, approximately 6% of consumer loans had FICO scores below 640.

As of both June 30, 2015 and December 31, 2014, approximately 2% of the Company's residential mortgage loans had LTV ratios greater than 90%. The Company's most significant geographic concentration for consumer loans is in California representing 37% of the portfolio as of both June 30, 2015 and December 31, 2014. No other state represents more than 10% of the total consumer loan portfolio.

Troubled Debt Restructurings

The recorded investment in restructured loans was not material as of June 30, 2015 and December 31, 2014. The troubled debt restructurings did not have a material impact to the Company's allowance for loan losses or income recognized for the three months and six months ended June 30, 2015 and 2014. There are no material commitments to lend additional funds to borrowers whose loans have been restructured.

6. Deferred Acquisition Costs and Deferred Sales Inducement Costs

The balances of and changes in DAC were as follows:

	2015	2014
	(in millions)	
Balance at January 1	\$2,608	\$2,663
Capitalization of acquisition costs	172	166
Amortization	(169)	(165)
Impact of change in net unrealized securities losses (gains)	47	(52)

Balance at June 30	\$2,658	\$2,612
--------------------	---------	---------

24

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

The balances of and changes in DSIC, which are included in other assets, were as follows:

	2015	2014
	(in millions)	
Balance at January 1	\$362	\$409
Capitalization of sales inducement costs	2	3
Amortization	(25)	(25)
Impact of change in net unrealized securities losses (gains)	7	(8)
Balance at June 30	\$346	\$379

7. Policyholder Account Balances, Future Policy Benefits and Claims and Separate Account Liabilities

Policyholder account balances, future policy benefits and claims consisted of the following:

	June 30, 2015	December 31, 2014
	(in millions)	
Policyholder account balances		
Fixed annuities	\$11,734	\$12,700
Variable annuity fixed sub-accounts	4,874	4,860
Variable universal life ("VUL")/universal life ("UL") insurance	2,872	2,856
Indexed universal life ("IUL") insurance	661	534
Other life insurance	812	840
Total policyholder account balances	20,953	21,790
Future policy benefits		
Variable annuity guaranteed minimum withdrawal benefits ("GMWB")	468	693
Variable annuity guaranteed minimum accumulation benefits ("GMAB" ⁽¹⁾)	(45)	(41)
Other annuity liabilities	48	115
Fixed annuities life contingent liabilities	1,504	1,511
Equity indexed annuities ("EIA")	29	29
Life, disability income and long term care insurance	5,173	5,106
VUL/UL and other life insurance additional liabilities	438	437
Total future policy benefits	7,615	7,850
Policy claims and other policyholders' funds	777	710
Total policyholder account balances, future policy benefits and claims	\$29,345	\$30,350

(1) Includes the value of GMAB embedded derivatives that was a net asset at both June 30, 2015 and December 31, 2014 reported as a contra liability.

Separate account liabilities consisted of the following:

	June 30, 2015	December 31, 2014
	(in millions)	
Variable annuity	\$72,264	\$72,125
VUL insurance	7,026	7,016
Other insurance	36	37
Threadneedle investment liabilities	4,378	4,078
Total	\$83,704	\$83,256

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

8. Variable Annuity and Insurance Guarantees

The majority of the variable annuity contracts offered by the Company contain guaranteed minimum death benefit (“GMDB”) provisions. The Company also offers variable annuities with death benefit provisions that gross up the amount payable by a certain percentage of contract earnings, which are referred to as gain gross-up (“GGU”) benefits. In addition, the Company offers contracts with GMWB and GMAB provisions. The Company previously offered contracts containing guaranteed minimum income benefit (“GMIB”) provisions.

Certain UL policies offered by the Company provide secondary guarantee benefits. The secondary guarantee ensures that, subject to specified conditions, the policy will not terminate and will continue to provide a death benefit even if there is insufficient policy value to cover the monthly deductions and charges.

The following table provides information related to variable annuity guarantees for which the Company has established additional liabilities:

Variable Annuity Guarantees by Benefit Type ⁽¹⁾	June 30, 2015				December 31, 2014			
	Total Contract Value	Contract Value in Separate Accounts	Net Amount at Risk	Weighted Average Attained Age	Total Contract Value	Contract Value in Separate Accounts	Net Amount at Risk	Weighted Average Attained Age
	(in millions, except age)							
GMDB:								
Return of premium	\$56,176	\$54,345	\$47	64	\$55,378	\$53,565	\$24	64
Five/six-year reset	10,008	7,462	31	65	10,360	7,821	28	64
One-year ratchet	7,223	6,846	69	67	7,392	7,006	39	66
Five-year ratchet	1,734	1,677	4	63	1,773	1,717	2	63
Other	926	909	45	70	959	941	38	70
Total — GMDB	\$76,067	\$71,239	\$196	64	\$75,862	\$71,050	\$131	64
GGU death benefit	\$1,097	\$1,045	\$123	67	\$1,072	\$1,019	\$123	67
GMIB	\$310	\$288	\$10	67	\$343	\$321	\$9	67
GMWB:								
GMWB	\$3,478	\$3,467	\$1	68	\$3,671	\$3,659	\$1	68
GMWB for life	37,753	37,629	137	66	36,843	36,735	95	65
Total — GMWB	\$41,231	\$41,096	\$138	66	\$40,514	\$40,394	\$96	65
GMAB	\$4,246	\$4,229	\$5	58	\$4,247	\$4,234	\$2	58

⁽¹⁾ Individual variable annuity contracts may have more than one guarantee and therefore may be included in more than one benefit type. Variable annuity contracts for which the death benefit equals the account value are not shown in this table.

The net amount at risk for GMDB, GGU and GMAB guarantees is defined as the current guaranteed benefit amount in excess of the current contract value. The net amount at risk for GMIB and GMWB guarantees is defined as the greater of the present value of the minimum guaranteed withdrawal payments less the current contract value or zero. The present value is calculated using a discount rate that is consistent with assumptions embedded in the Company’s annuity pricing models.

The following table provides information related to insurance guarantees for which the Company has established additional liabilities:

June 30, 2015

December 31, 2014

Edgar Filing: AMERIPRISE FINANCIAL INC - Form 10-Q

	Net	Weighted	Net	Weighted
	Amount at	Average	Amount at	Average

27

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

The amounts included in the table above are net of any unamortized discount and premium associated with issuing these notes.

The Company has an unsecured revolving credit facility for up to \$500 million. Under the terms of the underlying credit agreement for the facility, the Company may increase the amount of this facility up to \$750 million upon satisfaction of certain approval requirements. Available borrowings under the agreement are reduced by any outstanding letters of credit. The Company had no borrowings outstanding under this facility and outstanding letters of credit issued against this facility were \$1 million as of June 30, 2015. On May 1, 2015, the Company amended the underlying credit agreement for the facility to extend the expiration to May 2020.

The Company's junior subordinated notes due 2066 and credit facility contain various administrative, reporting, legal and financial covenants. The Company was in compliance with all such covenants at both June 30, 2015 and December 31, 2014.

Short-term Borrowings

The Company enters into repurchase agreements in exchange for cash, which it accounts for as secured borrowings and has pledged Available-for-Sale securities to collateralize its obligations under the repurchase agreements. As of June 30, 2015 and December 31, 2014, the Company has pledged \$23 million and \$18 million, respectively, of agency residential mortgage backed securities and \$29 million and \$34 million, respectively, of commercial mortgage backed securities. The remaining maturity of outstanding repurchase agreements was less than two months as of June 30, 2015 and less than four months as of December 31, 2014. The stated interest rate of the repurchase agreements is a weighted average annualized interest rate on repurchase agreements held as of the balance sheet date.

The Company's life insurance subsidiary is a member of the FHLB of Des Moines which provides access to collateralized borrowings. The Company has pledged Available-for-Sale securities consisting of commercial mortgage backed securities to collateralize its obligation under these borrowings. The fair value of the securities pledged is recorded in investments and was \$303 million and \$298 million at June 30, 2015 and December 31, 2014, respectively. The remaining maturity of outstanding FHLB advances was less than three months as of June 30, 2015 and less than two months as of December 31, 2014. The stated interest rate of the FHLB advances is a weighted average annualized interest rate on the outstanding borrowings as of the balance sheet date.

10. Fair Values of Assets and Liabilities

GAAP defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date; that is, an exit price. The exit price assumes the asset or liability is not exchanged subject to a forced liquidation or distressed sale.

Valuation Hierarchy

The Company categorizes its fair value measurements according to a three-level hierarchy. The hierarchy prioritizes the inputs used by the Company's valuation techniques. A level is assigned to each fair value measurement based on the lowest level input that is significant to the fair value measurement in its entirety. The three levels of the fair value hierarchy are defined as follows:

Level 1 Unadjusted quoted prices for identical assets or liabilities in active markets that are accessible at the measurement date.

Level 2 Prices or valuations based on observable inputs other than quoted prices in active markets for identical assets and liabilities.

Level 3 Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

The following tables present the balances of assets and liabilities of Ameriprise Financial measured at fair value on a recurring basis:

	June 30, 2015			Total

The decrease to pretax income of the Company's adjustment for nonperformance risk on the fair value of its embedded derivatives was \$45 million and \$6 million, net of DAC, DSIC, unearned revenue amortization and the reinsurance accrual, for the three months ended June 30, 2015 and 2014, respectively. The increase (decrease) to pretax income of the Company's adjustment for nonperformance risk on the fair value of its embedded derivatives was \$(8) million and \$9 million, net of DAC, DSIC, unearned revenue amortization and the reinsurance accrual, for the six months ended June 30, 2015 and 2014, respectively.

Securities transferred from Level 3 primarily represent securities with fair values that are now obtained from a third party pricing service with observable inputs. Securities transferred to Level 3 represent securities with fair values that are now based on a single non-binding broker quote. The Company recognizes transfers between levels of the fair value hierarchy as of the beginning of the quarter in which each transfer occurred. For assets and liabilities held at the end of the reporting periods that are measured at fair value on a recurring basis, there were no transfers between Level 1 and Level 2.

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

The following tables provide a summary of the significant unobservable inputs used in the fair value measurements developed by the Company or reasonably available to the Company of Level 3 assets and liabilities:

June 30, 2015

	Fair Value (in millions)	Valuation Technique	Unobservable Input	Range	Weighted Average
Corporate debt securities (private placements)	\$1,490	Discounted cash flow	Yield/spread to U.S. Treasuries	1.1 %– 3.5%	1.5%
IUL embedded derivatives	\$292	Discounted cash flow	Nonperformance risk ⁽¹⁾	67 bps	
GMWB and GMAB embedded derivatives	\$235	Discounted cash flow	Utilization of guaranteed withdrawals ⁽²⁾	0.0 %– 51.1%	
			Surrender rate	0.0 %– 59.1%	
			Market volatility ⁽³⁾	5.3 %– 21.0%	
			Nonperformance risk ⁽¹⁾	67 bps	
			Elective contractholder strategy allocations ⁽⁴⁾	0.0 %– 3.0%	

December 31, 2014

	Fair Value (in millions)	Valuation Technique	Unobservable Input	Range	Weighted Average
Corporate debt securities (private placements)	\$1,476	Discounted cash flow	Yield/spread to U.S. Treasuries	1.0 %– 3.9%	1.5%
IUL embedded derivatives	\$242	Discounted cash flow	Nonperformance risk ⁽¹⁾	65 bps	
GMWB and GMAB embedded derivatives	\$479	Discounted cash flow	Utilization of guaranteed withdrawals ⁽²⁾	0.0 %– 51.1%	
			Surrender rate	0.0 %– 59.1%	
			Market volatility ⁽³⁾	5.2 %– 20.9%	
			Nonperformance risk ⁽¹⁾	65 bps	
			Elective contractholder strategy allocations ⁽⁴⁾	0.0 %– 3.0%	

⁽¹⁾ The nonperformance risk is the spread added to the observable interest rates used in the valuation of the embedded derivatives.

⁽²⁾ The utilization of guaranteed withdrawals represents the percentage of contractholders that will begin withdrawing in any given year.

⁽³⁾ Market volatility is implied volatility of fund of funds and managed volatility funds.

⁽⁴⁾ The elective allocation represents the percentage of contractholders that are assumed to electively switch their investment allocation to a different allocation model.

Level 3 measurements not included in the table above are obtained from non-binding broker quotes where unobservable inputs are not reasonably available to the Company.

Sensitivity of Fair Value Measurements to Changes in Unobservable Inputs

Significant increases (decreases) in the yield/spread to U.S. Treasuries used in the fair value measurement of Level 3 corporate debt securities in isolation would result in a significantly lower (higher) fair value measurement.

Significant increases (decreases) in nonperformance risk used in the fair value measurement of the IUL embedded derivatives in isolation would result in a significantly lower (higher) fair value measurement.

Significant increases (decreases) in utilization and volatility used in the fair value measurement of the GMWB and GMAB embedded derivatives in isolation would result in a significantly higher (lower) liability value. Significant increases (decreases) in nonperformance risk, surrender rate and elective investment allocation model used in the fair value measurement of the GMWB and GMAB embedded derivatives in isolation would result in a significantly lower (higher) liability value. Utilization of guaranteed withdrawals and surrender rates vary with the type of rider, the duration of the policy, the age of the contractholder, the distribution system and whether the value of the guaranteed benefit exceeds the contract accumulation value.

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

Determination of Fair Value

The Company uses valuation techniques consistent with the market and income approaches to measure the fair value of its assets and liabilities. The Company's market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities. The Company's income approach uses valuation techniques to convert future projected cash flows to a single discounted present value amount. When applying either approach, the Company maximizes the use of observable inputs and minimizes the use of unobservable inputs.

The following is a description of the valuation techniques used to measure fair value and the general classification of these instruments pursuant to the fair value hierarchy.

Assets

Cash Equivalents

Cash equivalents include highly liquid investments with original maturities of 90 days or less. Actively traded money market funds are measured at their NAV and classified as Level 1. The Company's remaining cash equivalents are classified as Level 2 and measured at amortized cost, which is a reasonable estimate of fair value because of the short time between the purchase of the instrument and its expected realization.

Investments (Available-for-Sale Securities and Trading Securities)

When available, the fair value of securities is based on quoted prices in active markets. If quoted prices are not available, fair values are obtained from third party pricing services, non-binding broker quotes, or other model-based valuation techniques. Level 1 securities primarily include U.S. Treasuries. Level 2 securities primarily include corporate bonds, residential mortgage backed securities, commercial mortgage backed securities, asset backed securities, state and municipal obligations and U.S. agency and foreign government securities. The fair value of these Level 2 securities is based on a market approach with prices obtained from third party pricing services. Observable inputs used to value these securities can include, but are not limited to, reported trades, benchmark yields, issuer spreads and non-binding broker quotes. Level 3 securities primarily include certain corporate bonds, non-agency residential mortgage backed securities, commercial mortgage backed securities and asset backed securities. The fair value of corporate bonds, non-agency residential mortgage backed securities, commercial mortgage backed securities and certain asset backed securities classified as Level 3 is typically based on a single non-binding broker quote. The underlying inputs used for some of the non-binding broker quotes are not readily available to the Company. The Company's privately placed corporate bonds are typically based on a single non-binding broker quote. In addition to the general pricing controls, the Company reviews the broker prices to ensure that the broker quotes are reasonable and, when available, compares prices of privately issued securities to public issues from the same issuer to ensure that the implicit illiquidity premium applied to the privately placed investment is reasonable considering investment characteristics, maturity, and average life of the investment.

In consideration of the above, management is responsible for the fair values recorded on the financial statements. Prices received from third party pricing services are subjected to exception reporting that identifies investments with significant daily price movements as well as no movements. The Company reviews the exception reporting and resolves the exceptions through reaffirmation of the price or recording an appropriate fair value estimate. The Company also performs subsequent transaction testing. The Company performs annual due diligence of third party pricing services. The Company's due diligence procedures include assessing the vendor's valuation qualifications, control environment, analysis of asset-class specific valuation methodologies, and understanding of sources of market observable assumptions and unobservable assumptions, if any, employed in the valuation methodology. The Company also considers the results of its exception reporting controls and any resulting price challenges that arise.

Separate Account Assets

The fair value of assets held by separate accounts is determined by the NAV of the funds in which those separate accounts are invested. The NAV represents the exit price for the separate account. Separate account assets are classified as Level 2 as they are traded in principal-to-principal markets with little publicly released pricing

information.

Investments Segregated for Regulatory Purposes

Investments segregated for regulatory purposes includes U.S. Treasuries that are classified as Level 1.

Other Assets

Derivatives that are measured using quoted prices in active markets, such as foreign currency forwards, or derivatives that are exchange-traded are classified as Level 1 measurements. The fair value of derivatives that are traded in less active over-the-counter (“OTC”) markets is generally measured using pricing models with market observable inputs such as interest rates and equity index levels. These measurements are classified as Level 2 within the fair value hierarchy and include swaps and options. Other derivative contracts consist of the Company’s macro hedge program. See Note 12 for further information on the macro hedge program. The

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

counterparties' nonperformance risk associated with uncollateralized derivative assets was immaterial at June 30, 2015 and December 31, 2014. See Note 11 and Note 12 for further information on the credit risk of derivative instruments and related collateral.

Liabilities

Policyholder Account Balances, Future Policy Benefits and Claims

The Company values the embedded derivatives attributable to the provisions of certain variable annuity riders using internal valuation models. These models calculate fair value by discounting expected cash flows from benefits plus margins for profit, risk and expenses less embedded derivative fees. The projected cash flows used by these models include observable capital market assumptions and incorporate significant unobservable inputs related to contractholder behavior assumptions, implied volatility, and margins for risk, profit and expenses that the Company believes an exit market participant would expect. The fair value also reflects a current estimate of the Company's nonperformance risk specific to these embedded derivatives. Given the significant unobservable inputs to this valuation, these measurements are classified as Level 3. The embedded derivatives attributable to these provisions are recorded in policyholder account balances, future policy benefits and claims.

The Company uses various Black-Scholes calculations to determine the fair value of the embedded derivatives associated with the provisions of its EIA and IUL products. Significant inputs to the EIA calculation include observable interest rates, volatilities and equity index levels and, therefore, are classified as Level 2. The fair value of the IUL embedded derivatives includes significant observable interest rates, volatilities and equity index levels and the significant unobservable estimate of the Company's nonperformance risk. Given the significance of the nonperformance risk assumption to the fair value, the IUL embedded derivatives are classified as Level 3.

The embedded derivatives attributable to these provisions are recorded in policyholder account balances, future policy benefits and claims.

The Company's Corporate Actuarial Department calculates the fair value of the embedded derivatives on a monthly basis. During this process, control checks are performed to validate the completeness of the data. Actuarial management approves various components of the valuation along with the final results. The change in the fair value of the embedded derivatives is reviewed monthly with senior management. The Level 3 inputs into the valuation are consistent with the pricing assumptions and updated as experience develops. Significant unobservable inputs that reflect policyholder behavior are reviewed quarterly along with other valuation assumptions.

Customer Deposits

The Company uses various Black-Scholes calculations to determine the fair value of the embedded derivative liability associated with the provisions of its stock market certificates. The inputs to these calculations are primarily market observable and include interest rates, volatilities and equity index levels. As a result, these measurements are classified as Level 2.

Other Liabilities

Derivatives that are measured using quoted prices in active markets, such as foreign currency forwards, or derivatives that are exchange-traded, are classified as Level 1 measurements. The fair value of derivatives that are traded in less active OTC markets are generally measured using pricing models with market observable inputs such as interest rates and equity index levels. These measurements are classified as Level 2 within the fair value hierarchy and include swaps and the majority of options. Other derivative contracts consist of the Company's macro hedge program. See Note 12 for further information on the macro hedge program. The Company's nonperformance risk associated with uncollateralized derivative liabilities was immaterial at June 30, 2015 and December 31, 2014. See Note 11 and Note 12 for further information on the credit risk of derivative instruments and related collateral.

Securities sold but not yet purchased include highly liquid investments which are short-term in nature. Securities sold but not yet purchased are measured using amortized cost, which is a reasonable estimate of fair value because of the short time between the purchase of the instrument and its expected realization and are classified as Level 2.

During the reporting periods, there were no material assets or liabilities measured at fair value on a nonrecurring basis.

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

The following tables provide the carrying value and the estimated fair value of financial instruments that are not reported at fair value. All other financial instruments that are reported at fair value have been included above in the tables with balances of assets and liabilities Ameriprise Financial measured at fair value on a recurring basis.

	June 30, 2015

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

Mortgage Loans, Net

The fair value of commercial mortgage loans, except those with significant credit deterioration, is determined by discounting contractual cash flows using discount rates that reflect current pricing for loans with similar remaining maturities, liquidity and characteristics including LTV ratio, occupancy rate, refinance risk, debt-service coverage, location, and property condition. For commercial mortgage loans with significant credit deterioration, fair value is determined using the same adjustments as above with an additional adjustment for the Company's estimate of the amount recoverable on the loan. Given the significant unobservable inputs to the valuation of commercial mortgage loans, these measurements are classified as Level 3.

The fair value of consumer loans is determined by discounting estimated cash flows and incorporating adjustments for prepayment, administration expenses, loss severity, liquidity and credit loss estimates, with discount rates based on the Company's estimate of current market conditions. The fair value of consumer loans is classified as Level 3 as the valuation includes significant unobservable inputs.

Policy and Certificate Loans

Policy loans represent loans made against the cash surrender value of the underlying life insurance or annuity product. These loans and the related interest are usually realized at death of the policyholder or contractholder or at surrender of the contract and are not transferable without the underlying insurance or annuity contract. The fair value of policy loans is determined by estimating expected cash flows discounted at rates based on the U.S. Treasury curve. Policy loans are classified as Level 3 as the discount rate used may be adjusted for the underlying performance of individual policies.

Certificate loans represent loans made against and collateralized by the underlying certificate balance. These loans do not transfer to third parties separate from the underlying certificate. The outstanding balance of these loans is considered a reasonable estimate of fair value and is classified as Level 2.

Receivables

Brokerage margin loans are measured at outstanding balances, which are a reasonable estimate of fair value because of the sufficiency of the collateral and short term nature of these loans. Margin loans that are sufficiently collateralized are classified as Level 2. Margin loans that are not sufficiently collateralized are classified as Level 3.

Securities borrowed require the Company to deposit cash or collateral with the lender. As the market value of the securities borrowed is monitored daily, the carrying value is a reasonable estimate of fair value. The fair value of securities borrowed is classified as Level 1 as the value of the underlying securities is based on unadjusted prices for identical assets.

Restricted and Segregated Cash

Restricted and segregated cash is generally set aside for specific business transactions and restrictions are specific to the Company and do not transfer to third party market participants; therefore, the carrying amount is a reasonable estimate of fair value.

Amounts segregated under federal and other regulations may also reflect resale agreements and are measured at the price at which the securities will be sold. This measurement is a reasonable estimate of fair value because of the short time between entering into the transaction and its expected realization and the reduced risk of credit loss due to pledging U.S. government-backed securities as collateral.

The fair value of restricted and segregated cash is classified as Level 1.

Other Investments and Assets

Other investments and assets primarily consist of syndicated loans. The fair value of syndicated loans is obtained from a third party pricing service or non-binding broker quotes. Syndicated loans that are priced using a market approach with observable inputs are classified as Level 2 and syndicated loans priced using a single non-binding broker quote are classified as Level 3.

Other investments and assets also include the Company's membership in the Federal Home Loan Bank of Des Moines and investments related to the Community Reinvestment Act. The fair value of these assets is approximated by the

carrying value and classified as Level 3 due to restrictions on transfer and lack of liquidity in the primary market for these assets.

39

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

Policyholder Account Balances, Future Policy Benefits and Claims

The fair value of fixed annuities, in deferral status, is determined by discounting cash flows using a risk neutral discount rate with adjustments for profit margin, expense margin, early policy surrender behavior, a margin for adverse deviation from estimated early policy surrender behavior and the Company's nonperformance risk specific to these liabilities. The fair value of non-life contingent fixed annuities in payout status, EIA host contracts and the fixed portion of a small number of variable annuity contracts classified as investment contracts is determined in a similar manner. Given the use of significant unobservable inputs to these valuations, the measurements are classified as Level 3.

Investment Certificate Reserves

The fair value of investment certificate reserves is determined by discounting cash flows using discount rates that reflect current pricing for assets with similar terms and characteristics, with adjustments for early withdrawal behavior, penalty fees, expense margin and the Company's nonperformance risk specific to these liabilities. Given the use of significant unobservable inputs to this valuation, the measurement is classified as Level 3.

Brokerage Customer Deposits

Brokerage customer deposits are liabilities with no defined maturities and fair value is the amount payable on demand at the reporting date. The fair value of these deposits is classified as Level 1.

Separate Account Liabilities

Certain separate account liabilities are classified as investment contracts and are carried at an amount equal to the related separate account assets. The NAV of the related separate account assets represents the exit price for the separate account liabilities. Separate account liabilities are classified as Level 2 as they are traded in principal-to-principal markets with little publicly released pricing information. A nonperformance adjustment is not included as the related separate account assets act as collateral for these liabilities and minimize nonperformance risk.

Debt and Other Liabilities

The fair value of long-term debt is based on quoted prices in active markets, when available. If quoted prices are not available, fair values are obtained from third party pricing services, broker quotes, or other model-based valuation techniques such as present value of cash flows. The fair value of long-term debt is classified as Level 2.

The fair value of short-term borrowings is obtained from a third party pricing service. A nonperformance adjustment is not included as collateral requirements for these borrowings minimize the nonperformance risk. The fair value of short-term borrowings is classified as Level 2.

The fair value of future funding commitments to affordable housing partnerships is determined by discounting cash flows. The fair value of these commitments includes an adjustment for the Company's nonperformance risk and is classified as Level 3 due to the use of the significant unobservable input.

Securities loaned require the borrower to deposit cash or collateral with the Company. As the market value of the securities loaned is monitored daily, the carrying value is a reasonable estimate of fair value. Securities loaned are classified as Level 1 as the fair value of the underlying securities is based on unadjusted prices for identical assets.

11. Offsetting Assets and Liabilities

Certain financial instruments and derivative instruments are eligible for offset in the Consolidated Balance Sheets. The Company's derivative instruments, repurchase agreements and securities borrowing and lending agreements are subject to master netting arrangements and collateral arrangements and qualify for offset. A master netting arrangement with a counterparty creates a right of offset for amounts due to and from that same counterparty that is enforceable in the event of a default or bankruptcy. Securities borrowed and loaned result from transactions between the Company's broker dealer subsidiary and other financial institutions and are recorded at the amount of cash collateral advanced or received. Securities borrowed and securities loaned are primarily equity securities. The Company's securities borrowed and securities loaned transactions generally do not have a fixed maturity date and may be terminated by either party under customary terms.

The Company's policy is to recognize amounts subject to master netting arrangements on a gross basis in the Consolidated Balance Sheets.

⁽¹⁾ Represents the amount of liabilities that could be offset by assets with the same counterparty under master netting or similar arrangements that management elects not to offset on the Consolidated Balance Sheets.

In the tables above, the amounts of assets or liabilities presented in the Consolidated Balance Sheets are offset first by financial instruments that have the right of offset under master netting or similar arrangements, then any remaining amount is reduced by the amount of cash and securities collateral. The actual collateral may be greater than amounts presented in the tables.

When the fair value of collateral accepted by the Company is less than the amount due to the Company, there is a risk of loss if the counterparty fails to perform or provide additional collateral. To mitigate this risk, the Company monitors collateral values regularly and requires additional collateral when necessary. When the value of collateral pledged by the Company declines, it may be required to post additional collateral.

The Company's freestanding derivative instruments are reflected in other assets and other liabilities. Repurchase agreements are reflected in short-term borrowings. Securities borrowing and lending agreements are reflected in receivables and other liabilities, respectively. See Note 12 for additional disclosures related to the Company's derivative instruments, Note 9 for additional disclosures related to the Company's repurchase agreements and Note 3 for information related to derivatives held by consolidated investment entities.

12. Derivatives and Hedging Activities

Derivative instruments enable the Company to manage its exposure to various market risks. The value of such instruments is derived from an underlying variable or multiple variables, including equity, foreign exchange and interest rate indices or prices. The Company primarily enters into derivative agreements for risk management purposes related to the Company's products and operations.

The Company's freestanding derivatives are recorded at fair value and are reflected in other assets or other liabilities. The Company's freestanding derivative instruments are all subject to master netting arrangements. The Company's policy on the recognition of derivatives on the Consolidated Balance Sheets is to not offset fair value amounts recognized for derivatives and collateral arrangements executed with the same counterparty under the same master netting arrangement. See Note 11 for additional information regarding the estimated fair value of the Company's freestanding derivatives after considering the effect of master netting arrangements and collateral.

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

The Company uses derivatives as economic hedges and accounting hedges. The following table presents the balance sheet location and the gross fair value of derivative instruments, including embedded derivatives:

Derivatives designated as hedging instruments	Balance Sheet Location	Assets		Balance Sheet Location	Liabilities	
		June 30, 2015 (in millions)	December 31, 2014 (in millions)		June 30, 2015 (in millions)	December 31, 2014 (in millions)

N/A Not applicable.

⁽¹⁾ The fair values of GMWB and GMAB embedded derivatives fluctuate based on changes in equity, interest rate and credit markets.

(2) The fair value of the GMWB and GMAB embedded derivatives at June 30, 2015 included \$541 million of individual contracts in a liability position and \$306 million of individual contracts in an asset position. The fair value of the GMWB and GMAB embedded derivatives at December 31, 2014 included \$700 million of individual contracts in a liability position and \$221 million of individual contracts in an asset position.

(3) The fair value of the Company's derivative liabilities after considering the effects of master netting arrangements, cash collateral held by the same counterparty and the fair value of net embedded derivatives was \$1.2 billion and \$1.5 billion at June 30, 2015 and December 31, 2014, respectively. See Note 11 for additional information related to master netting arrangements and cash collateral. See Note 3 for information about derivatives held by consolidated VIEs. See (2) above for additional information related to gross GMWB and GMAB embedded derivatives.

See Note 10 for additional information regarding the Company's fair value measurement of derivative instruments.

⁽¹⁾ The fair values of GMWB and GMAB embedded derivatives fluctuate based on changes in equity, interest rate and credit markets.

The Company holds derivative instruments that either do not qualify or are not designated for hedge accounting treatment. These derivative instruments are used as economic hedges of equity, interest rate, credit and foreign currency exchange rate risk related to various products and transactions of the Company.

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

Certain annuity contracts contain GMWB or GMAB provisions, which guarantee the right to make limited partial withdrawals each contract year regardless of the volatility inherent in the underlying investments or guarantee a minimum accumulation value of consideration received at the beginning of the contract period, after a specified holding period, respectively. The Company economically hedges the exposure related to non-life contingent GMWB and GMAB provisions primarily using various futures, options, interest rate swaptions, interest rate swaps, total return swaps and variance swaps. At June 30, 2015 and December 31, 2014, the gross notional amount of derivative contracts for the Company's GMWB and GMAB provisions was \$137.9 billion and \$132.0 billion, respectively. The deferred premium associated with certain of the above options is paid or received semi-annually over the life of the option contract or at maturity. The following is a summary of the payments the Company is scheduled to make and receive for these options:

	Premiums Payable (in millions)	Premiums Receivable
2015 ⁽¹⁾	\$ 194	\$ 38
2016	346	77
2017	276	77
2018	216	125
2019	261	87
2020 - 2027	634	208
Total	\$ 1,927	\$ 612

⁽¹⁾ 2015 amounts represent the amounts payable and receivable for the period from July 1, 2015 to December 31, 2015.

Actual timing and payment amounts may differ due to future contract settlements, modifications or exercises of options prior to the full premium being paid or received.

The Company has a macro hedge program to provide protection against the statutory tail scenario risk arising from variable annuity reserves on its statutory surplus and to cover some of the residual risks not covered by other hedging activities. As a means of economically hedging these risks, the Company uses a combination of options, interest rate swaptions and/or swaps. Certain of the macro hedge derivatives used contain settlement provisions linked to both equity returns and interest rates; the remaining are interest rate contracts or equity contracts. The gross notional amount of these derivative contracts was \$4.9 billion and \$2.7 billion at June 30, 2015 and December 31, 2014, respectively.

In the second quarter of 2015, the Company entered into interest rate swaps to manage its exposure to interest rate risk on certain of its investments. The gross notional amount of these contracts was \$598 million at June 30, 2015.

EIA, IUL and stock market certificate products have returns tied to the performance of equity markets. As a result of fluctuations in equity markets, the obligation incurred by the Company related to EIA, IUL and stock market certificate products will positively or negatively impact earnings over the life of these products. As a means of economically hedging its obligations under the provisions of these products, the Company enters into index options and futures contracts. The gross notional amount of these derivative contracts was \$2.1 billion and \$2.0 billion at June 30, 2015 and December 31, 2014, respectively.

The Company enters into futures, commodity swaps, and foreign currency forward contracts to manage its exposure to price risk arising from seed money investments in proprietary investment products. The gross notional amount of these contracts was \$73 million and \$97 million at June 30, 2015 and December 31, 2014, respectively.

The Company enters into foreign currency forward contracts to economically hedge its exposure to certain transactions denominated in non-functional currencies. The gross notional amount of these contracts was \$6 million and \$11 million at June 30, 2015 and December 31, 2014, respectively.

The Company enters into futures contracts to economically hedge its exposure related to deferred compensation plans. The gross notional amount of these contracts was \$298 million and \$278 million at June 30, 2015 and December 31, 2014, respectively.

Embedded Derivatives

Certain annuities contain GMAB and non-life contingent GMWB provisions, which are considered embedded derivatives. In addition, the equity component of the EIA, IUL and stock market certificate product obligations are also considered embedded derivatives. These embedded derivatives are bifurcated from their host contracts for valuation purposes and reported on the Consolidated Balance Sheets at fair value with changes in fair value reported in earnings. As discussed above, the Company uses derivatives to mitigate the financial statement impact of these embedded derivatives.

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

Cash Flow Hedges

The Company has designated and accounts for the following as cash flow hedges: (i) interest rate swaps to hedge interest rate exposure on debt, (ii) interest rate lock agreements to hedge interest rate exposure on debt issuances and (iii) swaptions used to hedge the risk of increasing interest rates on forecasted fixed premium product sales.

For the three months and six months ended June 30, 2015 and 2014, amounts recognized in earnings related to cash flow hedges due to ineffectiveness were not material. The estimated net amount of existing pretax losses as of June 30, 2015 that the Company expects to reclassify to earnings within the next twelve months is \$3 million, which consists of \$3 million of pretax gains to be recorded as a reduction to interest and debt expense and \$6 million of pretax losses to be recorded in net investment income.

The following table presents the impact of the effective portion of the Company's cash flow hedges on the Consolidated Statements of Operations and the Consolidated Statements of Equity:

Location of Gain (Loss) Reclassified from Accumulated Other Comprehensive Income into Income	Amount of Gain (Loss) Reclassified from Accumulated Other Comprehensive Income into Income			
	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
	(in millions)			
Interest and debt expense	\$1	\$1	\$2	\$2
Net investment income	(1)	(1)	(2)	(2)
Total	\$—	\$—	\$—	\$—

Currently, the longest period of time over which the Company is hedging exposure to the variability in future cash flows is 20 years and relates to forecasted debt interest payments.

Fair Value Hedges

In 2010, the Company entered into and designated as fair value hedges three interest rate swaps to convert senior notes due 2015, 2019 and 2020 from fixed rate debt to floating rate debt. The swaps have identical terms as the underlying debt being hedged so no ineffectiveness is expected to be realized. The Company recognizes gains and losses on the derivatives and the related hedged items within interest and debt expense. The following table presents the amounts recognized in income related to fair value hedges:

Derivatives designated as hedging instruments	Location of Gain Recorded into Income	Amount of Gain Recognized in Income on Derivatives			
		Three Months Ended June 30,		Six Months Ended June 30,	
		2015	2014	2015	2014
		(in millions)			
Interest rate contracts	Interest and debt expense	\$8	\$8	\$16	\$16

Credit Risk

Credit risk associated with the Company's derivatives is the risk that a derivative counterparty will not perform in accordance with the terms of the applicable derivative contract. To mitigate such risk, the Company has established guidelines and oversight of credit risk through a comprehensive enterprise risk management program that includes members of senior management. Key components of this program are to require preapproval of counterparties and the use of master netting arrangements and collateral arrangements whenever practical. See Note 11 for additional information on the Company's credit exposure related to derivative assets.

Certain of the Company's derivative contracts contain provisions that adjust the level of collateral the Company is required to post based on the Company's debt rating (or based on the financial strength of the Company's life insurance subsidiaries for contracts in which those subsidiaries are the counterparty). Additionally, certain of the Company's

derivative contracts contain provisions that allow the counterparty to terminate the contract if the Company's debt does not maintain a specific credit rating (generally an investment grade rating) or the Company's life insurance subsidiary does not maintain a specific financial strength rating. If these termination provisions were to be triggered, the Company's counterparty could require immediate settlement of any net liability position. At June 30, 2015 and December 31, 2014, the aggregate fair value of derivative contracts in a net liability position containing such credit contingent provisions was \$466 million and \$416 million, respectively. The aggregate fair value of assets posted as collateral for such instruments as of June 30, 2015 and December 31, 2014 was \$466 million and \$416 million, respectively. If the credit contingent provisions of derivative contracts in a net liability position at June 30, 2015 and December 31, 2014 were triggered, the aggregate fair value of additional assets that would be required to be posted as collateral or needed to settle the instruments immediately would have been nil for both periods.

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

13. Shareholders' Equity

The following table provides information related to amounts reclassified from AOCI:

AOCI Reclassification	Location of Loss (Gain) Recognized in Income	Three Months Ended June 30,		Six Months Ended June 30,	
		2015	2014	2015	2014
		(in millions)			
Net unrealized gains on Available-for-Sale securities	Net investment income	\$(5)	\$(1)	\$(16)	\$(6)
Tax expense	Income tax provision	2	—	6	2
Net of tax		\$(3)	\$(1)	\$(10)	\$(4)
Losses (gains) on cash flow hedges:					
Interest rate contracts	Interest and debt expense	\$(1)	\$(1)	\$(2)	\$(2)
Swaptions	Net investment income	1	1	2	2
Total before tax		—	—	—	—
Tax benefit	Income tax provision	—	—	—	—
Net of tax		\$—	\$—	\$—	\$—

See Note 4 for additional information related to the impact of DAC, DSIC, unearned revenue, benefit reserves and reinsurance recoverable on net unrealized securities gains/losses included in AOCI. See Note 12 for additional information regarding the Company's cash flow hedges.

In April 2014, the Company's Board of Directors authorized an expenditure of up to \$2.5 billion for the repurchase of shares of the Company's common stock through April 28, 2016. As of June 30, 2015, the Company had \$1.0 billion remaining under its share repurchase authorization. During the six months ended June 30, 2015 and 2014, the Company repurchased a total of 6.0 million shares and 6.4 million shares, respectively, of its common stock for an aggregate cost of \$774 million and \$706 million, respectively.

The Company may also reacquire shares of its common stock under its share-based compensation plans related to restricted stock awards and certain option exercises. The holders of restricted shares may elect to surrender a portion of their shares on the vesting date to cover their income tax obligation. These vested restricted shares are reacquired by the Company and the Company's payment of the holders' income tax obligations are recorded as a treasury share purchase. For the six months ended June 30, 2015 and 2014, the Company reacquired 0.3 million shares and 0.8 million shares, respectively, of its common stock through the surrender of shares upon vesting and paid in the aggregate \$44 million and \$90 million, respectively, related to the holders' income tax obligations on the vesting date. Option holders may elect to net settle their vested awards resulting in the surrender of the number of shares required to cover the strike price and tax obligation of the options exercised. These shares are reacquired by the Company and recorded as treasury shares. For the six months ended June 30, 2015 and 2014, the Company reacquired 0.7 million shares and 1.2 million shares of its common stock through the net settlement of options for an aggregate value of \$87 million and \$133 million, respectively.

During the six months ended June 30, 2015 and 2014, the Company reissued 1.0 million and 1.6 million treasury shares, respectively, for restricted stock award grants, performance share units and issuance of shares vested under the Ameriprise Financial Franchise Advisor Deferred Compensation Plan.

14. Income Taxes

The Company's effective tax rate on income from continuing operations was 22.6% and 24.5% for the three months ended June 30, 2015 and 2014, respectively. The Company's effective tax rate on income from continuing operations was 22.6% and 22.5% for the six months ended June 30, 2015 and 2014, respectively. The Company's effective tax rates for the three months and six months ended June 30, 2015 are lower than the statutory rate as a result of tax

preferred items including the dividends received deduction and low income housing tax credits.

Included in the Company's deferred income tax assets are tax benefits related to state net operating losses of \$17 million, net of federal benefit, which will expire beginning December 31, 2015 and a state AMT credit carryforward of \$1 million, which has no expiration.

The Company is required to establish a valuation allowance for any portion of the deferred tax assets that management believes will not be realized. Included in deferred tax assets is a significant deferred tax asset relating to capital losses that have been recognized for financial statement purposes but not yet for tax return purposes. Under current U.S. federal income tax law, capital losses generally must be used against capital gain income within five years of the year in which the capital losses are recognized for tax purposes.

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

Significant judgment is required in determining if a valuation allowance should be established, and the amount of such allowance if required. Factors used in making this determination include estimates relating to the performance of the business. Consideration is given to, among other things in making this determination, (i) future taxable income exclusive of reversing temporary differences and carryforwards, (ii) future reversals of existing taxable temporary differences, (iii) taxable income in prior carryback years, and (iv) tax planning strategies. Based on analysis of the Company's tax position, management believes it is more likely than not that the Company will not realize certain state deferred tax assets and state net operating losses and therefore a valuation allowance has been established. The valuation allowance was \$12 million at June 30, 2015 and \$20 million at December 31, 2014.

As of June 30, 2015 and December 31, 2014, the Company had \$224 million and \$242 million, respectively, of gross unrecognized tax benefits. If recognized, approximately \$45 million and \$57 million, net of federal tax benefits, of unrecognized tax benefits as of June 30, 2015 and December 31, 2014, respectively, would affect the effective tax rate.

It is reasonably possible that the total amounts of unrecognized tax benefits will change in the next 12 months. The Company estimates that the total amount of gross unrecognized tax benefits may decrease by \$170 million to \$180 million in the next 12 months primarily due to resolution of IRS examinations.

The Company recognizes interest and penalties related to unrecognized tax benefits as a component of the income tax provision. The Company recognized a net increase of \$1 million and \$2 million in interest and penalties for the three months and six months ended June 30, 2015, respectively. The Company recognized a net increase of \$4 million and \$3 million in interest and penalties for the three months and six months ended June 30, 2014, respectively. At June 30, 2015 and December 31, 2014, the Company had a payable of \$50 million and \$48 million, respectively, related to accrued interest and penalties.

The Company or one or more of its subsidiaries files income tax returns in the U.S. federal jurisdiction, and various state and foreign jurisdictions. The IRS has completed its field examination of the 1997 through 2011 tax returns. However, for federal income tax purposes, these years, except for 2007, continue to remain open as a consequence of certain unagreed-upon issues. The IRS is currently auditing the Company's U.S. Income Tax Returns for 2012 and 2013. The Company's or certain of its subsidiaries' state income tax returns are currently under examination by various jurisdictions for years ranging from 1997 through 2012 and remain open for all years after 2012.

15. Guarantees and Contingencies

Guarantees

The Company is required by law to be a member of the guaranty fund association in every state where it is licensed to do business. In the event of insolvency of one or more unaffiliated insurance companies, the Company could be adversely affected by the requirement to pay assessments to the guaranty fund associations.

The Company projects its cost of future guaranty fund assessments based on estimates of insurance company insolvencies provided by the National Organization of Life and Health Insurance Guaranty Associations ("NOLHGA") and the amount of its premiums written relative to the industry-wide premium in each state. The Company accrues the estimated cost of future guaranty fund assessments when it is considered probable that an assessment will be imposed, the event obligating the Company to pay the assessment has occurred and the amount of the assessment can be reasonably estimated.

The Company has a liability for estimated guaranty fund assessments and a related premium tax asset. At both June 30, 2015 and December 31, 2014, the estimated liability was \$14 million and the related premium tax asset was \$12 million. The expected period over which guaranty fund assessments will be made and the related tax credits recovered is not known.

Contingencies

The Company and its subsidiaries are involved in the normal course of business in legal, regulatory and arbitration proceedings, including class actions, concerning matters arising in connection with the conduct of its activities as a

diversified financial services firm. These include proceedings specific to the Company as well as proceedings generally applicable to business practices in the industries in which it operates. The Company can also be subject to litigation arising out of its general business activities, such as its investments, contracts, leases and employment relationships. Uncertain economic conditions, heightened and sustained volatility in the financial markets and significant financial reform legislation may increase the likelihood that clients and other persons or regulators may present or threaten legal claims or that regulators increase the scope or frequency of examinations of the Company or the financial services industry generally.

As with other financial services firms, the level of regulatory activity and inquiry concerning the Company's businesses remains elevated. From time to time, the Company receives requests for information from, and/or has been subject to examination or claims by, the SEC, the Financial Industry Regulatory Authority, the Office of the Comptroller of the Currency, the UK Financial Conduct Authority, state insurance and securities regulators, state attorneys general and various other domestic or foreign governmental and quasi-governmental authorities on behalf of themselves or clients concerning the Company's business activities and practices, and the

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

practices of the Company's financial advisors. The Company has numerous pending matters which include information requests, exams or inquiries that the Company has received during recent periods regarding certain matters, including: sales and distribution of mutual funds, annuities, equity and fixed income securities, real estate investment trusts, insurance products, and financial advice offerings; supervision of the Company's financial advisors; administration of insurance claims; security of client information; and front office systems and controls at the Company's UK subsidiary. The Company is also responding to regulatory audits, market conduct examinations and other state inquiries relating to an industry-wide investigation of unclaimed property and escheatment practices and procedures. The number of reviews and investigations has increased in recent years with regard to many firms in the financial services industry, including Ameriprise Financial. The Company has cooperated and will continue to cooperate with the applicable regulators.

These legal and regulatory proceedings and disputes are subject to uncertainties and, as such, it is inherently difficult to determine whether any loss is probable or even possible, or to reasonably estimate the amount of any loss. The Company cannot predict with certainty if, how or when any such proceedings will be initiated or resolved or what the eventual settlement, fine, penalty or other relief, if any, may be, particularly for proceedings that are in their early stages of development or where plaintiffs seek indeterminate damages. Numerous issues may need to be resolved, including through potentially lengthy discovery and determination of important factual matters, and by addressing unsettled legal questions relevant to the proceedings in question, before a loss or range of loss can be reasonably estimated for any proceeding. An adverse outcome in one or more proceeding could eventually result in adverse judgments, settlements, fines, penalties or other sanctions, in addition to further claims, examinations or adverse publicity that could have a material adverse effect on the Company's consolidated financial condition, results of operations or liquidity.

In accordance with applicable accounting standards, the Company establishes an accrued liability for contingent litigation and regulatory matters when those matters present loss contingencies that are both probable and can be reasonably estimated. In such cases, there still may be an exposure to loss in excess of any amounts reasonably estimated and accrued. When a loss contingency is not both probable and estimable, the Company does not establish an accrued liability, but continues to monitor, in conjunction with any outside counsel handling a matter, further developments that would make such loss contingency both probable and reasonably estimable. Once the Company establishes an accrued liability with respect to a loss contingency, the Company continues to monitor the matter for further developments that could affect the amount of the accrued liability that has been previously established, and any appropriate adjustments are made each quarter.

Certain legal and regulatory proceedings are described below.

In November 2014, a lawsuit was filed against the Company's London-based asset management affiliate in England's High Court of Justice Commercial Court, entitled *Otkritie Capital International Ltd and JSC Otkritie Holding v. Threadneedle Asset Management Ltd. and Threadneedle Management Services Ltd.* ("Threadneedle Defendants"). Claimants allege that the Threadneedle Defendants should be held liable for the wrongful acts of one of its former employees, who in February 2014 was held jointly and severally liable with several other parties for conspiracy and dishonest assistance in connection with a fraud perpetrated against Claimants in 2011. Claimants allege they were harmed by that fraud in the amount of \$120 million. The Threadneedle Defendants have applied to the Court for an Order dismissing the proceedings as an abuse of process of the court, and the parties are awaiting a decision by the Court after a hearing that was held on June 10, 2015. The Company cannot reasonably estimate the range of loss, if any, that may result from this matter due to the early procedural status of the case, the number of parties involved, and the failure to allege any specific, evidence based damages.

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

16. Earnings per Share Attributable to Ameriprise Financial, Inc. Common Shareholders

The computations of basic and diluted earnings per share attributable to Ameriprise Financial, Inc. common shareholders are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
	(in millions, except per share amounts)			
Numerator:				
Income from continuing operations	\$476	\$467	\$955	\$983
Less: Net income attributable to noncontrolling interests	61	93	147	208
Income from continuing operations attributable to Ameriprise Financial	415	374	808	775
Loss from discontinued operations, net of tax	—	—	—	(1)
Net income attributable to Ameriprise Financial	\$415	\$374	\$808	\$774
Denominator:				
Basic: Weighted-average common shares outstanding	183.8	192.7	185.1	194.1
Effect of potentially dilutive nonqualified stock options and other share-based awards	2.6	3.5	2.6	3.5
Diluted: Weighted-average common shares outstanding	186.4	196.2	187.7	197.6
Earnings per share attributable to Ameriprise Financial, Inc. common shareholders:				
Basic:				
Income from continuing operations	\$2.26	\$1.94	\$4.37	\$3.99
Loss from discontinued operations	—	—	—	—
Net income	\$2.26	\$1.94	\$4.37	\$3.99
Diluted:				
Income from continuing operations	\$2.23	\$1.91	\$4.30	\$3.92
Loss from discontinued operations	—	—	—	—
Net income	\$2.23	\$1.91	\$4.30	\$3.92

The calculation of diluted earnings per share excludes the incremental effect of 1.6 million and 1.5 million options as of June 30, 2015 and 2014, respectively, due to their anti-dilutive effect.

AMERIPRISE FINANCIAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (continued)

17. Segment Information

The Company's segments are Advice & Wealth Management, Asset Management, Annuities, Protection and Corporate & Other.

Management uses segment operating measures in goal setting, as a basis for determining employee compensation and in evaluating performance on a basis comparable to that used by some securities analysts and investors. Consistent with GAAP accounting guidance for segment reporting, operating earnings is the Company's measure of segment performance. Operating earnings should not be viewed as a substitute for GAAP income from continuing operations before income tax provision. The Company believes the presentation of segment operating earnings as the Company measures it for management purposes enhances the understanding of its business by reflecting the underlying performance of its core operations and facilitating a more meaningful trend analysis.

The accounting policies of the segments are the same as those of the Company, except for operating adjustments defined below, the method of capital allocation, the accounting for gains (losses) from intercompany revenues and expenses and not providing for income taxes on a segment basis.

Operating earnings is defined as operating net revenues less operating expenses. Operating net revenues and operating expenses exclude the results of discontinued operations, the market impact on IUL benefits (net of hedges and the related DAC amortization, unearned revenue amortization, and the reinsurance accrual), integration and restructuring charges and the impact of consolidating investment entities. Operating net revenues also exclude net realized investment gains or losses and the market impact of hedges to offset interest rate changes on unrealized gains or losses for certain investments. Operating expenses also exclude the market impact on variable annuity guaranteed benefits (net of hedges and the related DSIC and DAC amortization). The market impact on variable annuity guaranteed benefits and IUL benefits includes changes in liability values caused by changes in financial market conditions, net of changes in associated economic hedge values. The market impact also includes certain valuation adjustments made in accordance with FASB Accounting Standards Codification 820, Fair Value Measurements and Disclosures, including the impact on liability values of discounting projected benefits to reflect a current estimate of the Company's life insurance subsidiary's nonperformance spread.

The following tables summarize selected financial information by segment and reconcile segment totals to those reported on the consolidated financial statements:

	June 30, 2015	December 31, 2014
	(in millions)	
Assets:		
Advice & Wealth Management	\$10,630	\$10,220
Asset Management	7,935	7,509
Annuities	97,406	98,535
Protection	20,955	20,779
Corporate & Other	11,880	11,767

AMERIPRISE FINANCIAL, INC.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our consolidated financial condition and results of operations should be read in conjunction with the "Forward-Looking Statements" that follow and our Consolidated Financial Statements and Notes presented in Item 1. Our Management's Discussion and Analysis should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2014, filed with the Securities and Exchange Commission ("SEC") on February 24, 2015 ("2014 10-K"), as well as our current reports on Form 8-K and other publicly available information. References below to "Ameriprise Financial," "Ameriprise," the "Company," "we," "us," and "our" refer to Ameriprise Financial, Inc. exclusively, to our entire family of companies, or to one or more of our subsidiaries.

Overview

Ameriprise Financial is a diversified financial services company with a 121 year history of providing financial solutions. We offer a broad range of products and services designed to achieve the financial objectives of individual and institutional clients. We are America's leader in financial planning and a leading global financial institution with more than \$811 billion in assets under management and administration as of June 30, 2015.

Our strategy is centered on helping our clients confidently achieve their goals by providing advice and managing their assets and protecting their assets and income. We utilize two go-to-market approaches in carrying out this strategy: Wealth Management and Asset Management.

Our wealth management capabilities are centered on the long-term, personal relationships between our clients and our financial advisors and registered representatives (our "advisors"). Through our advisors, we offer financial planning, products and services designed to be used as solutions for our clients' cash and liquidity, asset accumulation, income, protection, and estate and wealth transfer needs. Our focus on personal relationships, together with our discipline in financial planning and strengths in product development and advice, allow us to address the evolving financial and retirement-related needs of our clients, including our primary target market segment, the mass affluent and affluent, which we define as households with investable assets of more than \$100,000. The financial product solutions we offer through our advisors include both our own products and services and the products of other companies. Our advisor network is the primary channel through which we offer our affiliated insurance and annuity products and services. Our network of approximately 9,700 advisors is the primary means through which we engage in our wealth management activities. We offer our advisors training, tools, leadership, marketing programs and other field and centralized support to assist them in delivering advice and product solutions. We believe that our nationally recognized brand and practice vision, local marketing support, integrated operating platform and comprehensive set of products and solutions constitute a compelling value proposition for financial advisors, as evidenced by our strong advisor retention rate and our ability to attract and retain experienced and productive advisors. We have and will continue to invest in and develop capabilities and tools designed to maximize advisor productivity and client satisfaction.

We are in a compelling position to capitalize on significant demographic and market trends driving increased demand for financial advice and solutions. In the U.S., the ongoing transition of baby boomers into retirement, as well as recent economic and financial market crises, continues to drive demand for financial advice and solutions. In addition, the amount of investable assets held by mass affluent and affluent households, our target market, has grown and accounts for over half of U.S. investable assets. We believe our differentiated financial planning model, broad range of products and solutions, as well as our demonstrated financial strength throughout the economic downturn of recent past years, will help us capitalize on these trends.

Our asset management capabilities are increasingly global in scale, with Columbia Management Investment Advisers, LLC ("Columbia" or "Columbia Management") as the primary provider of products and services in the U.S. and Threadneedle Asset Management Holdings Sàrl ("Threadneedle") as the primary provider of products and services outside of the U.S. On March 30, 2015, we launched a new brand — Columbia Threadneedle Investments — that represents the combined capabilities, resources and reach of both firms. While the group now operates under one

brand, established investment teams, strategies and processes in place at both firms will not change as a result of the new brand, nor will existing funds or client portfolios and mandates. In addition, there is no change to the corporate structure or regulated entities.

We offer a broad spectrum of investment advice and products to individual, institutional and high-net worth investors. These investment products are primarily provided through third parties, though we also provide our asset management products through our advisor channel. Our underlying asset management philosophy is based on delivering consistently strong and competitive investment performance. The quality and breadth of our asset management capabilities are demonstrated by 125 of our funds rated as four- and five-star funds by Morningstar.

We are positioned to continue to grow our assets under management and to strengthen our asset management offerings to existing and new clients. Our asset management capabilities are well positioned to address mature markets in the U.S. and Europe. We also have the capability to leverage existing strengths to effectively expand into new global and emerging markets. In the past few years, we have expanded beyond our traditional strengths in the U.S. and UK to gather assets in Continental Europe, Asia, Australia, the Middle East and Africa. In addition, we continue to pursue opportunities to leverage the collective capabilities of Columbia Threadneedle

AMERIPRISE FINANCIAL, INC.

Investments to enhance our current range of investment solutions, to develop new solutions that are responsive to client demand in an increasingly complex marketplace and to maximize the distribution capabilities of our global business.

The financial results from the businesses underlying our go-to-market approaches are reflected in our five operating segments:

- ▲ Advice & Wealth Management;
- ▲ Asset Management;
- ▲ Annuities;
- ▲ Protection; and
- ▲ Corporate & Other.

Our operating segments are aligned with the financial solutions we offer to address our clients' needs. The products and services we provide retail clients and, to a lesser extent, institutional clients, are the primary source of our revenues and net income. Revenues and net income are significantly affected by investment performance and the total value and composition of assets we manage and administer for our retail and institutional clients as well as the distribution fees we receive from other companies. These factors, in turn, are largely determined by overall investment market performance and the depth and breadth of our individual client relationships.

Financial markets and macroeconomic conditions have had and will continue to have a significant impact on our operating and performance results. In addition, the business and regulatory environment in which we operate remains subject to elevated uncertainty and change. To succeed, we expect to continue focusing on our key strategic objectives. The success of these and other strategies may be affected by the factors discussed in "Item 1A. Risk Factors" in our 2014 10-K, "Item 1A. Risk Factors" in our Form 10-Q for the quarterly period ended March 31, 2015 filed with the SEC on May 4, 2015 and other factors as discussed herein.

Equity price, credit market and interest rate fluctuations can have a significant impact on our results of operations, primarily due to the effects they have on the asset management and other asset-based fees we earn, the "spread" income generated on our fixed annuities, fixed insurance, deposit products and the fixed portion of variable annuities and variable insurance contracts, the value of deferred acquisition costs ("DAC") and deferred sales inducement costs ("DSIC") assets, the values of liabilities for guaranteed benefits associated with our variable annuities and the values of derivatives held to hedge these benefits.

Earnings, as well as operating earnings, will continue to be negatively impacted by the ongoing low interest rate environment. In addition to continuing spread compression in our interest sensitive product lines, a sustained low interest rate environment may result in increases to our reserves and changes in various rate assumptions we use to amortize DAC and DSIC, which may negatively impact our operating earnings. For additional discussion on our interest rate risk, see Item 3. "Quantitative and Qualitative Disclosures About Market Risk."

We consolidate certain collateralized loan obligations ("CLOs") and property funds (pooled investment vehicles) for which we provide asset management services. These entities are defined as consolidated investment entities ("CIEs"). While the consolidation of the CIEs impacts our balance sheet and income statement, our exposure to these entities is unchanged and there is no impact to the underlying business results. For further information on CIEs, see Note 3 to our Consolidated Financial Statements. Changes in the valuation of the CIE assets and liabilities impact pretax income. The net income (loss) of the CIEs is reflected in net income (loss) attributable to noncontrolling interests. The results of operations of the CIEs are reflected in the Corporate & Other segment. On a consolidated basis, the management fees we earn for the services we provide to the CIEs and the related general and administrative expenses are eliminated and the changes in the assets and liabilities related to the CIEs, primarily syndicated loans and debt, are reflected in net investment income. We continue to include the fees from these entities in the management and financial advice fees line within our Asset Management segment.

While our consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles ("GAAP"), management believes that operating measures, which exclude net realized investment gains or losses; the market impact on variable annuity guaranteed benefits, net of hedges and the related DSIC and DAC

amortization; the market impact on indexed universal life benefits, net of hedges and the related DAC amortization, unearned revenue amortization and the reinsurance accrual; the market impact of hedges to offset interest rate changes on unrealized gains or losses for certain investments; integration and restructuring charges; income (loss) from discontinued operations; and the impact of consolidating CIEs, best reflect the underlying performance of our core operations and facilitate a more meaningful trend analysis. Management uses certain of these non-GAAP measures to evaluate our financial performance on a basis comparable to that used by some securities analysts and investors. Also, certain of these non-GAAP measures are taken into consideration, to varying degrees, for purposes of business planning and analysis and for certain compensation-related matters. Throughout our Management's Discussion and Analysis, these non-GAAP measures are referred to as operating measures.

It is management's priority to increase shareholder value over a multi-year horizon by achieving our on-average, over-time financial targets.

AMERIPRISE FINANCIAL, INC.

Our financial targets are:

Operating total net revenue growth of 6% to 8%,

Operating earnings per diluted share growth of 12% to 15%, and

Operating return on equity excluding accumulated other comprehensive income (“AOCI”) of 19% to 23%.

The following tables reconcile our GAAP measures to operating measures:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
	(in millions)			
Total net revenues	\$3,128	\$3,072	\$6,181	\$6,068
Less: Revenue attributable to CIEs	141	160	290	337
Less: Net realized gains	5	1	15	6
Less: Market impact on indexed universal life benefits	—	(4)	(4)	(2)
Less: Market impact of hedges on investments	(1)	—	(1)	—
Operating total net revenues	\$2,983	\$2,915	\$5,881	\$5,727
			Per Diluted Share	
	Three Months Ended June 30,		Three Months Ended June 30,	
	2015	2014	2015	2014
	(in millions, except per share amounts)			
Net income	\$476	\$467		
Less: Net income attributable to noncontrolling interests	61	93		
Net income attributable to Ameriprise Financial	415	374	\$2.23	\$1.91
Less: Loss from discontinued operations, net of tax	—	—	—	—
Net income from continuing operations attributable to Ameriprise Financial	415	374	2.23	1.91
Add: Integration/restructuring charges, net of tax ⁽¹⁾	1	—	0.01	—
Add: Market impact on variable annuity guaranteed benefits, net of tax ⁽¹⁾	23	35	0.12	0.18
Add: Market impact on indexed universal life benefits, net of tax ⁽¹⁾	(3)	—	(0.02)	—
Add: Market impact of hedges on investments, net of tax ⁽¹⁾	1	—	0.01	—
Less: Net realized gains, net of tax ⁽¹⁾	3	1	0.02	0.01
Operating earnings	\$434	\$408	\$2.33	\$2.08
Weighted average common shares outstanding:				
Basic	183.8	192.7		
Diluted	186.4	196.2		

⁽¹⁾ Calculated using the statutory tax rate of 35%.

AMERIPRISE FINANCIAL, INC.

	Six Months Ended		Per Diluted Share	
	June 30,		Six Months Ended	
	2015	2014	2015	2014
	(in millions, except per share amounts)			
Net income	\$955	\$982		
Less: Net income attributable to noncontrolling interests	147	208		
Net income attributable to Ameriprise Financial	808	774	\$4.30	\$3.92
Less: Loss from discontinued operations, net of tax	—	(1)	—	—
Net income from continuing operations attributable to Ameriprise Financial	808	775	4.30	3.92
Add: Integration/restructuring charges, net of tax ⁽¹⁾	1	—	0.01	—
Add: Market impact on variable annuity guaranteed benefits, net of tax ⁽¹⁾	45	45	0.22	0.22
Add: Market impact on indexed universal life benefits, net of tax ⁽¹⁾	1	(1)	0.01	—
Add: Market impact of hedges on investments, net of tax ⁽¹⁾	1	—	0.01	—
Less: Net realized gains, net of tax ⁽¹⁾	10	4	0.04	0.02
Operating earnings	\$846	\$815	\$4.51	\$4.12

Weighted average common shares outstanding:

Basic	185.1	194.1
Diluted	187.7	197.6

⁽¹⁾ Calculated using the statutory tax rate of 35%.

The following table reconciles the trailing twelve months' sum of net income attributable to Ameriprise Financial to operating earnings and the five-point average of quarter-end equity to operating equity:

	Twelve Months Ended		
	June 30,	2014	
	2015	2014	
	(in millions)		
Net income attributable to Ameriprise Financial	\$1,653	\$1,452	
Less: Loss from discontinued operations, net of tax	(1)	(2)	
Net income from continuing operations attributable to Ameriprise Financial	1,654	1,454	
Less: Adjustments ⁽¹⁾	(39)	(131)	
Operating earnings	\$1,693	\$1,585	
Total Ameriprise Financial, Inc. shareholders' equity	\$8,176	\$8,326	
Less: Accumulated other comprehensive income, net of tax	706	698	
Total Ameriprise Financial, Inc. shareholders' equity from continuing operations, excluding AOCI	7,470	7,628	
Less: Equity impacts attributable to CIEs	280	330	
Operating equity	\$7,190	\$7,298	
Return on equity from continuing operations, excluding AOCI	22.1	% 19.1	%
Operating return on equity, excluding AOCI ⁽²⁾	23.5	% 21.7	%

⁽¹⁾ Adjustments reflect the trailing twelve months' sum of after-tax net realized investment gains/losses; the market impact on variable annuity guaranteed benefits, net of hedges and related DSIC and DAC amortization; the market impact on indexed universal life benefits, net of hedges and the related DAC amortization, unearned revenue amortization, and the reinsurance accrual; the market impact of hedges to offset interest rate changes on unrealized

gains or losses for certain investments; and integration and restructuring charges. After-tax is calculated using the statutory tax rate of 35%.

(2) Operating return on equity, excluding AOCI, is calculated using the trailing twelve months of earnings excluding the after-tax net realized investment gains/losses; market impact on variable annuity guaranteed benefits, net of hedges and related DSIC and DAC amortization; the market impact on indexed universal benefits, net of hedges and the related DAC amortization, unearned revenue amortization, and the reinsurance accrual; the market impact of hedges to offset interest rate changes on unrealized gains or losses for certain investments; integration/restructuring charges; and discontinued operations in the numerator, and Ameriprise Financial shareholders' equity, excluding AOCI and the impact of consolidating investment entities using a five-point average of quarter-end equity in the denominator. After-tax is calculated using the statutory rate of 35%.

AMERIPRISE FINANCIAL, INC.

Critical Accounting Policies

The accounting and reporting policies that we use affect our Consolidated Financial Statements. Certain of our accounting and reporting policies are critical to an understanding of our consolidated results of operations and financial condition. In some cases, the application of these policies can be significantly affected by the estimates, judgments and assumptions made by management during the preparation of our Consolidated Financial Statements. These accounting policies are discussed in detail in “Management’s Discussion and Analysis — Critical Accounting Policies” in our 2014 10-K.

Recent Accounting Pronouncements

For information regarding recent accounting pronouncements and their expected impact on our future consolidated results of operations and financial condition, see Note 2 to our Consolidated Financial Statements.

Assets Under Management and Administration

Assets under management (“AUM”) include external client assets for which we provide investment management services, such as the assets of the Columbia funds and Threadneedle funds, assets of institutional clients and assets of clients in our advisor platform held in wrap accounts as well as assets managed by sub-advisers selected by us. AUM also includes certain assets on our Consolidated Balance Sheets for which we provide investment management services and recognize management fees in our Asset Management segment, such as the assets of the general account and the variable product funds held in the separate accounts of our life insurance subsidiaries and CIEs. These assets do not include assets under advisement, for which we provide model portfolios but do not have full discretionary investment authority. Corporate & Other AUM primarily includes former bank assets that are managed within our Corporate & Other segment.

Assets under administration (“AUA”) include assets for which we provide administrative services such as client assets invested in other companies’ products that we offer outside of our wrap accounts. These assets include those held in clients’ brokerage accounts. We generally record revenues received from administered assets as distribution fees. We do not exercise management discretion over these assets and do not earn a management fee. These assets are not reported on our Consolidated Balance Sheets. AUA also includes certain assets on our Consolidated Balance Sheets for which we do not provide investment management services and do not recognize management fees, such as investments in non-affiliated funds held in the separate accounts of our life insurance subsidiaries. These assets do not include assets under advisement, for which we provide model portfolios but do not have full discretionary investment authority.

The following table presents detail regarding our AUM and AUA:

	June 30,		Change		
	2015	2014			
	(in billions)				
Assets Under Management and Administration					
Advice & Wealth Management AUM	\$181.1	\$167.3	\$13.8	8	%
Asset Management AUM	503.1	518.3	(15.2)	(3))
Corporate & Other AUM	0.7	0.9	(0.2)	(22))
Eliminations	(23.2)	(21.3)	(1.9)	(9))
Total Assets Under Management	661.7	665.2	(3.5)	(1))
Total Assets Under Administration	149.4	144.7	4.7	3	
Total AUM and AUA	\$811.1	\$809.9	\$1.2	—	%

Total AUM decreased \$3.5 billion, or 1%, to \$661.7 billion as of June 30, 2015 compared to \$665.2 billion as of June 30, 2014 primarily due to a \$15.2 billion decrease in Asset Management AUM driven by the negative impact of foreign currency translation, net outflows and retail fund distributions, partially offset by market appreciation, and a \$13.8 billion increase in Advice & Wealth Management AUM driven by wrap account net inflows. See our segment

results of operations discussion below for additional information on changes in our AUM.
