**Item 2.03 - Creation of a Direct Financial Obligation or an Obligation under an Off-Balance Sheet Arrangement of the Registrant.**

On June 23, 2006, Tucson Electric Power Company (TEP) borrowed \$45 million under the \$60 million revolving credit facility available under its Credit Agreement. Together with the \$15 million previously outstanding, the facility is fully drawn. TEP has generally drawn upon its revolving credit facility to meet seasonal working capital requirements. The drawing on June 23, 2006 provided liquidity to make upcoming capital lease payments, maintain cash balances and pay a portion of the price of a 14% undivided equity interest in the Springerville Unit 1 leases purchased by TEP. Since TEP's cash flow from operations is typically highest in the third quarter due to TEP's summer peaking load, TEP anticipates it will begin repaying the borrowings on the revolving credit facility in July and fully repay the borrowings by the end of 2006. Borrowings under the revolving credit facility may be prepaid at any time and are due upon the expiration of the TEP Credit Agreement in May 2010. See *Item 7. - Management's Discussion and Analysis of Financial Condition and Results of Operations* in our Annual Report on Form 10-K for the year ended December 31, 2005 for a description of the terms of the TEP Credit Agreement.
