U.S. SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
FORM 10-Q

(Mark one)

þ **Quarterly report pursuant to Section 13 or 15 (d) of the Securities Exchange Act of 1934**
For the quarterly period ended July 4, 2009

or

o **Transition report pursuant to Section 13 or 15 (d) of the Securities Exchange Act of 1934**
For the transition period from __________ to __________

COMMISSION FILE NUMBER: 000-49798
THORATEC CORPORATION
(Exact name of registrant as specified in its charter)

California	**94-2340464**
(State or other jurisdiction of incorporation or organization)	**(I.R.S. Employer Identification No.)**

6035 Stoneridge Drive, Pleasanton, California	**94588**
(Address of principal executive offices)	**(Zip Code)**

(925) 847-8600
(Registrant s telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes þ No o

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes o No o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer þ	Accelerated filer o	Non-accelerated filer o (Do not check if a smaller reporting company)	Smaller reporting company o

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act): Yes o No þ

As of August 1, 2009, the registrant had 56,579,136 shares of common stock outstanding.

THORATEC CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

1. Operations and Significant Accounting Policies

Basis of Presentation

The interim condensed consolidated financial statements of Thoratec Corporation (Thoratec or the Company) have been prepared and presented in accordance with accounting principles generally accepted in the United States of America and the rules and regulations of the Securities and Exchange Commission (SEC), without audit, and reflect all adjustments necessary (consisting only of normal recurring adjustments) to present fairly the Company s financial position, results of operations and cash flows. Certain information and footnote disclosures normally included in the Company s annual financial statements, prepared in accordance with accounting principles generally accepted in the United States of America, have been condensed or omitted. The accompanying financial statements should be read in conjunction with the Company s fiscal 2008 consolidated financial statements, and the accompanying notes thereto, filed with the SEC in the Company s Annual Report on Form 10-K as updated by the Current Report on Form 8-K dated June 11, 2009 (the 2008 Annual Report). The operating results for any interim period are not necessarily indicative of the results that may be expected for any future period. The financial statements of the prior periods presented in this Quarterly Report on Form 10-Q have been adjusted for the retrospective adoption of FSP APB 14-1 on January 4, 2009. See Note 12, Long-Term Debt to these unaudited condensed consolidated financial statements for further discussion.

The preparation of the Company s condensed consolidated financial statements necessarily requires the Company s management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities on the condensed consolidated balance sheet dates and the reported amounts of revenues and expenses for the periods presented.

The Company has evaluated subsequent events for the period from July 4, 2009, the date of these financial statements, through August 12, 2009, which represents the date these financial statements are being filed with the SEC. Pursuant to the requirements of Statement of Financial Accounting Standards (SFAS) No. 165, *Subsequent Events*, other than as described in Note 17, Subsequent Events, there were no events or transactions occuring during this subsequent event reporting period, which require recognition or disclosure in these condensed consolidated financial statements.

Revenue Recognition and Product Warranty

The Company recognizes revenue from product sales of its Cardiovascular and ITC segments when evidence of an arrangement exists, title has passed (generally upon shipment) or services have been rendered, the selling price is fixed or determinable and collectibility is reasonably assured. Sales to distributors are recorded when title transfers. One distributor has certain limited product return rights. Other distributors have certain rights of return upon termination of their distribution agreement. A reserve for sales returns is recorded for these customers applying reasonable estimates of product returns based upon historical experience in accordance with SFAS No. 48, *Revenue Recognition When Right of Return Exists*. No other direct sales customers or distributors have return rights.

Cardiovascular segment sales of certain products to first-time customers are recognized when it has been determined that the customer has the ability to use such products. These sales frequently include the sale of products and training services under multiple element arrangements. Training is not essential to the functionality of the products. Revenue under these arrangements is allocated to training at fair value, which is typically performed on behalf of the Company by third party providers. The balance of the revenue from the multiple arrangement is recorded to product sales.

Table of Contents

The majority of the Company s products are covered by up to a two-year limited manufacturer s warranty. Estimated contractual warranty obligations are recorded when related sales are recognized and any additional amounts are recorded when such costs are probable and can be reasonably estimated and are included in Cost of product sales. The change in accrued warranty expense is summarized in the following table:

	Balance at Beginning of Period	Accruals for Warranties Issued	Settlements Made	Balance at End of Period
		(in thousands)		
Six months ended July 4, 2009	$1,071	$ 2,305	$ (1,614)	$ 1,762
Six months ended June 28, 2008	$1,006	$ 888	$ (527)	$ 1,367

2. Recently Issued Accounting Standards

Effective July 1, 2009, the FASB issued SFAS No. 168, *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles a replacement of FASB Statement No. 162* (ASC) which became the single official source of authoritative, nongovernmental GAAP. The historical GAAP hierarchy was eliminated and the ASC became the only level of authoritative GAAP, other than guidance issued by the SEC. All other literature became non-authoritative. ASC is effective for financial statements issued for interim and annual periods ending after September 15, 2009. The Company is assessing what impact, if any, the adoption of this standard may have on our condensed consolidated financial statements, and expects any references to legacy standards contained in our condensed consolidated financial statements to be revised to reflect updated referencing under the ASC.

In May 2009, the FASB issued SFAS No. 165, which establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. In particular, SFAS No. 165 sets forth (i) the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, (ii) the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements, and (iii) the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. SFAS No. 165 is effective for interim and annual periods ending after June 15, 2009. The adoption of this standard did not have a material impact on the Company s unaudited condensed consolidated financial position, results of operations or cash flows.

In April 2009, the FASB issued FSP FAS No. 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments* (FSP FAS 115-2 and FAS 124-2), to modify the existing impairment model with respect to debt securities falling within its scope. Under FSP FAS 115-2 and FSP FAS 124-2, an other-than-temporary impairment (OTTI) will have occurred when either: (i) an entity has the intent to sell an impaired security; (ii) it is more likely than not that an entity will be required to sell an impaired security prior to its anticipated recovery in value; or (iii) an entity does not expect to recover the entire cost basis of an impaired security. In addition, FSP FAS 115-2 and FAS 124-2 modifies the manner in which an OTTI is measured and presented on the statement of operations and requires expanded disclosures. FSP FAS 115-2 and FAS 124-2 is effective for interim and annual reporting periods ending after June 15, 2009. The adoption of this standard did not have a material impact on the Company s unaudited condensed consolidated financial statements, but resulted in additional disclosure requirements about the Company s investments. See Note 5, Investments in Available-for-Sale Securities for further discussion.

In April 2009, the FASB issued FSP FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly,* which provides additional authoritative guidance to assist both issuers and users of financial statements in determining whether a market is active or inactive, and whether a transaction is distressed. FSP FAS 157-4 is effective for financial reporting periods ending after June 15, 2009. The adoption of this standard did not have a material impact on the Company s unaudited condensed consolidated financial position, results of operations or cash flows.

In April 2009, the FASB issued FSP FAS 107-1 and APB No. 28-1, *Interim Disclosures about Fair Value of Financial Instruments*, which requires disclosures about fair value of financial instruments for interim reporting

periods as well as in annual financial statements. The Company adopted this standard in the second quarter of 2009, which was applied prospectively. See Note 6, Fair Value Measurements for further discussion.

Table of Contents

In May 2008, the FASB issued FSP ABP 14-1 which alters the accounting treatment for convertible debt instruments that allow for either mandatory or optional cash settlements upon conversion. FSP APB 14-1 will impact the accounting associated with the Company s senior subordinated convertible notes recorded at a book value of $143.8 million. FSP APB 14-1 requires the issuer to recognize additional (non-cash) interest expense based on the market rate for similar debt instruments without the conversion feature. The Company adopted this standard on January 4, 2009. See Note 12, Long-Term Debt for further discussion.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities*, which is intended to help investors better understand how derivative instruments and hedging activities affect an entity s financial position, financial performance and cash flows through enhanced disclosure requirements. The main requirement is to disclose the objectives and strategies for using derivative instruments by their underlying risk as well as a tabular format of the fair values of the derivative instruments and their gains and losses. The Company adopted this standard on January 4, 2009. See Note 7, Foreign Exchange Instruments for further discussion.

In February 2008, the FASB issued SFAS No. 157-2, *Effective Date of FASB Statement No. 157*. With the issuance of SFAS No. 157-2, the FASB agreed to: (i) defer the effective date of SFAS No. 157, *Fair Value Measurements*, for one year for certain nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually), and (ii) remove certain leasing transactions from the scope of SFAS No. 157. The Company s adoption of fair value measurement for nonfinancial assets and nonfinancial liabilities on January 4, 2009 did not have an impact on the Company s unaudited condensed consolidated financial position, results of operations or cash flows.

In December 2007, the FASB issued SFAS No. 141(R), *Business Combinations*, which replaces SFAS No. 141 and establishes principles and requirements for how the acquirer in a business combination recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree. In addition, SFAS No. 141(R) recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase. SFAS No. 141(R) also establishes disclosure requirements to enable users to evaluate the nature and financial effects of the business combination. In April 2009, FASB issued FSP No. FAS 141(R)-1, *Accounting for Assets Acquired and Liabilities Assumed in a Business Combination That Arises from Contingencies*, which amends and clarifies SFAS No. 141(R) on initial recognition and measurement, subsequent measurement and accounting, and disclosure of assets and liabilities arising from contingencies in a business combination. The Company adopted this accounting guidance on January 4, 2009. During the six months ended July 4, 2009, the Company recorded approximately $11.3 million of transaction costs was included in Selling, general and administrative expenses on the Company s unaudited condensed consolidated statements of operations related to the intended acquisition of HeartWare International Inc. (HeartWare). The Company and HeartWare mutually agreed effective July 31, 2009 to terminate the definitive merger agreement pursuant to which the Company would have acquired HeartWare. See Note 17, Subsequent Events for further discussion.

3. Cash and Cash Equivalents

Cash and cash equivalents are defined as short-term, highly liquid investments with original maturities of 90 days or less at the date of purchase.

4. Restricted Cash and Cash Equivalents

On February 12, 2009, the Company entered into a definitive merger agreement with HeartWare, pursuant to which the Company intended to acquire HeartWare. The Company and HeartWare mutually agreed effective July 31, 2009 to terminate the definitive merger agreement pursuant to which the Company would have acquired HeartWare. As announced on July 29, 2009, the U.S. Federal Trade Commission (FTC) informed the Company and HeartWare that it would file a complaint in U.S. Federal District Court to challenge the Company s proposed acquisition of HeartWare. HeartWare and the Company s decision to terminate the definitive merger agreement was in response to the FTC s determination to challenge the proposed acquisition of HeartWare by the Company. See Note 17, Subsequent Events for further discussion.

Pursuant to the loan agreement entered into concurrently with the execution and delivery of the merger agreement, the Company deposited $20.0 million (the Loan Amount) into an escrow account on February 13, 2009 and agreed to loan such funds to HeartWare. Despite the mutual termination of the definitive merger agreement by the Company

and HeartWare, the Loan Amount continues to remain available for borrowing by HeartWare at any time prior to the earlier of (i) November 1, 2011, (ii) the date on which the outstanding portion of the Loan Amount borrowed by HeartWare, including any accrued and unpaid interest, as well as the portion of the Loan Amount remaining in the escrow account that have not been loaned to HeartWare, are converted into shares of HeartWare s common stock, as further described below, or (iii) the date on which the outstanding principal of the Loan Amount borrowed by HeartWare becomes due and payable in full, whether by acceleration or otherwise, pursuant to the terms of the loan agreement. Beginning as of May 1, 2009, HeartWare may borrow up to an aggregate of $12.0 million and beginning as of July 31, 2009, HeartWare may borrow up to an aggregate of $20.0 million, under certain conditions provided in the loan agreement. The loan to HeartWare bears interest at a rate per annum equal to 10%. The principal amount, together with any accrued and unpaid interest on the principal amount, will be due and payable in full in cash on the earlier of (i) November 1, 2011 or (ii) the date on which the outstanding principal of the Loan Amount borrowed by HeartWare becomes due and payable in full, whether by acceleration or otherwise, pursuant to the terms of the loan agreement,

As of August 12, 2009, the Company has loaned $4.0 million to HeartWare pursuant to the loan agreement. Pursuant to the terms of the loan agreement, the Company may convert the aggregate Loan Amount outstanding or available for borrowing under the loan agreement (including any portion of the Loan Amount held in the escrow account and any outstanding portion of the Loan Amount borrowed by HeartWare) into shares of HeartWare s common stock, at Thoratec s option. The Loan Amount is convertible into shares of HeartWare s common stock at a conversion price equal to $35.00 Australian dollars per share of HeartWare common stock. The conversion rate will be adjusted in the event of any stock split, dividend, distribution or other subdivision or other reclassification of HeartWare s common stock.

Table of Contents

5. Investments in Available-for-Sale Securities

The Company s investment portfolio consists of short-term and long-term investments. Investments classified as short-term available-for-sale consist primarily of municipal bonds, variable demand notes and corporate bonds. Investments classified as long-term available-for-sale consist of auction rate securities, whose underlying assets are student loans.

The Company s investments in available-for-sale securities are recorded at estimated fair value on its financial statements, and the temporary differences between cost and estimated fair value are presented as a separate component of accumulated other comprehensive income.

As of July 4, 2009, the Company had gross unrealized gains from the Company s investment in municipal bonds of $1.4 million and gross unrealized losses from its auction rate securities of $3.1 million.

The aggregate market value, cost basis and gross unrealized gains and losses of available-for-sale investments as of July 4, 2009 and as of January 3, 2009 by major security type are as follows:

	Amortized cost	Gross unrealized gains (losses)	Fair value
		(in thousands)	
July 4, 2009:			
Short-term investments:			
Municipal bonds, variable demand notes and corporate bonds	$ 167,658	$ 1,380	$ 169,038
Long-term investments:			
Auction rate securities	$ 27,800	$ (3,118)	$ 24,682
January 3, 2009:			
Short-term investments:			
Municipal bonds	$ 139,931	$ 1,667	$ 141,598
Long-term investments:			
Auction rate securities	$ 37,200	$ (7,241)	$ 29,959

10

Table of Contents

As of July 4, 2009, the Company owned approximately $27.8 million face amount of auction rate securities. The assets underlying these investments are student loans predominantly backed by the U.S. government under the Federal Family Education Loan Program or by private insurers and are rated between A- and AAA. Historically, these securities have provided liquidity through a Dutch auction process that resets the applicable interest rate periodically every seven to 365 days. Beginning in February of 2008, these auctions began to fail. The principal amount of these auction rate securities will not be accessible until future auctions for these securities are successful, a secondary market is established, these securities are called for redemption, or they are paid at maturity. Therefore, the Company s auction rate securities are classified as long-term and are valued at $24.7 million using significant unobservable inputs.

As a result of these auction failures, these auction rate securities do not have a readily determinable market value. Consistent with January 3, 2009, the Company estimated fair values at July 4, 2009, using a discounted cash flow model based on estimated interest rates, the present value of future principal and interest payments discounted at rates considered to reflect current market conditions, and the credit quality of the underlying securities. Specifically, the Company s management estimated the future cash flows over a five-year period, and applied a credit default rate to reflect the risk in the marketplace for these investments that has arisen due to the lack of an active market. As a result of feedback from outside consultants, and government activities including recent settlement agreements, management s assumption on the expected recovery was modified to five years beginning at January 3, 2009 and this assumption continues to be applicable at July 4, 2009. Because of the inherent subjectivity in valuing these securities, the Company s management also considered independent valuations obtained for each of the Company s auction rate securities in estimating fair values.

The Company has recorded an estimated cumulative unrealized loss of $3.1 million ($1.9 million, net of tax) related to the temporary impairment of the auction rate securities, which was included in accumulated other comprehensive gain/loss within shareholders equity. On April 5, 2009 the Company adopted FSP FAS 115-2 and FAS 124-2 which required the Company s management to review impairments and credit loss associated with its investments, including auction rate securities to determine the classification of the impairment as temporary or other-than-temporary and to birfurcate the credit and non-credit component of an other-than-temporary impairment event. The Company (i) does not intend to sell any of the auction rate securities prior to maturity at an amount below the original purchase value; (ii) intends hold the investment to recovery and based on a more-likely-than-not probability assessment will not be required to sell the security before recovery; and (iii)deems that it is not probable that it will receive less than 100% of the principal and accrued interest from the issuer. Therefore, 100% of the impairment was charged to other comprehensive income. Further, the Company continues to liquidate investments in auction rate securities as opportunities arise. During the six months ended July 4, 2009, $9.4 million in auction rate securities were liquidated at par in connection with issuer calls.

If the issuers of the auction rate securities are unable to successfully complete future auctions and their credit ratings deteriorate, the Company may in the future be required to record an impairment charge to earnings on these investments. It could conceivably take until the final maturity of the underlying notes (up to 30 years) to realize the investments recorded value.

6. Fair Value Measurements

The Company adopted the provisions of SFAS No. 157, *Fair Value Measurements,* on December 30, 2007. SFAS No. 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. In determining fair value, the Company uses various approaches, including market, income and/or cost approaches, and each of these approaches requires certain inputs. SFAS No. 157 establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability based on market data obtained from sources independent of us. Unobservable inputs are inputs that reflect our assumptions as compared to the assumptions market participants would use in pricing the asset or liability based on the best information available in the circumstances.

Table of Contents

The Company valued its financial and nonfinancial assets and liabilities based on the observability of inputs used in the valuation of such assets and liabilities, using the following fair value hierarchy. The fair value hierarchy ranks the quality and reliability of the information used to determine fair values. Financial and nonfinancial assets and liabilities carried or disclosed at fair value were classified and disclosed in one of the following three categories:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Directly or indirectly observable market based inputs used in models or other valuation methodologies.

Level 3: Unobservable inputs that are not corroborated by market data which require significant management judgment or estimation.

The following table represents the fair value hierarchy for the Company s financial assets and financial liabilities measured at fair value on a recurring basis:

	July 4, 2009				
	Assets and liabilities at carrying value	**Total fair value**	**Quoted prices in active markets for identical assets (Level 1)**	**Significant other observable inputs (Level 2)**	**Significant unobservable inputs (Level 3)**
			(in thousands)		
Assets					
Short-term investments municipal bonds, variable demand notes and corporate bonds	$169,038	$169,038	$	$169,038	$
Long-term investments auction rate securities	24,682	24,682			24,682
Mark to market on foreign exchange instruments (Note 7)	44	44		44	
Convertible debenture with Levitronix LLC	5,874	6,000			6,000
Liabilities					
Make-whole provision (Note 12)	51	51			51
Senior subordinated convertible notes (fair value for purposes of disclosure in Note 12)	127,936	197,942		197,942	

	January 3, 2009				
	Assets and liabilities at carrying value	**Total fair value**	**Quoted prices in active markets for identical assets (Level 1)**	**Significant other observable inputs (Level 2)**	**Significant unobservable inputs (Level 3)**

			(in thousands)		
Assets					
Short-term investments municipal bonds	$141,598	$141,598	$	$141,598	$
Long-term investments auction rate securities	29,959	29,959			29,959
Convertible debenture with Levitronix LLC	5,711	4,200			4,200
Liabilities					
Mark to market on foreign exchange instruments (Note 7)	73	73		73	
Make-whole provision (Note 12)	46	46			46
Senior subordinated convertible notes (fair value for purposes of disclosure in Note 12)	124,115	215,880		215,880	

Assets measured at fair value on a recurring basis using significant unobservable Level 3 inputs consist of securities with an auction reset feature (auction rate securities) whose underlying assets are student loans issued by various tax-exempt state agencies, most of which are supported by federal government guarantees and some of which are supported by private insurers. In addition, the Company is using significant unobservable Level 3 inputs for its disclosure of the fair value of its convertible debenture with Levitronix LLC (Levitronix) disclosed in Note 11 Other Assets.

Table of Contents

The following table provides a reconciliation of the beginning and ending balances for the assets and liabilities measured at fair value using significant unobservable inputs (Level 3):

	Fair Value Measurement Using Significant Unobservable Inputs (Level 3)		
	Auction Rate Securities	Assets	Liabilities
		(in thousands)	
Balance at January 3, 2009	$ 29,959	$ 4,200	$ 46
Settlement at par	(100)		
Unrealized holding loss, included in interest income and other			25
Unrealized holding gain, included in other comprehensive income	69		
Balance at April 4, 2009	$ 29,928	$ 4,200	$ 71
Settlements at par	(9,300)		
Unrealized holding gain, included in interest income and other			(20)
Unrealized holding gain, included in other comprehensive income	4,054		
Unrealized holding gain, for disclosure purposes (Note 11)		1,800	
Balance at July 4, 2009	$ 24,682	$ 6,000	$ 51

The Company s management will continue to monitor the market for auction rate securities and consider its impact (if any) on the fair value of the Company s investments. If the current market conditions deteriorate further, or the anticipated recovery in fair values does not occur, the Company may be required to record additional unrealized losses in other comprehensive income or other-than-temporary impairment charges to the condensed consolidated statements of operations in future periods.

7. Foreign Exchange Instruments

The Company utilizes foreign currency forward exchange contracts and options to mitigate against future movements in foreign exchange rates that affect certain existing and forecasted foreign currency denominated sales and purchase transactions (primarily assets and liabilities on its U.K. subsidiary s consolidated balance sheet that are not denominated in U.K. pounds). The Company does not use derivative financial instruments for speculative or trading purposes. The Company routinely hedges its exposures to certain foreign currencies with various financial institutions in an effort to minimize the impact of certain currency exchange rate fluctuations. If a financial counterparty to any of the Company s hedging arrangements experience financial difficulties or is otherwise unable to honor the terms of the foreign currency forward contract, the Company may experience material financial losses.

On January 4, 2009, the Company adopted SFAS No. 161, which requires the disclosure about the Company s objective of using derivative instruments for its forward foreign currency contracts, which qualify as derivatives under SFAS No. 133, *Accounting for Derivative Instrument and Hedging Activities,* and do not qualify for hedge accounting. The impacts of the outstanding foreign currency contracts, with a maximum maturity of three months were as follows:

	Notional Amounts	
	July 4, 2009	June 28, 2008
	(in thousands)	
Purchases	$ 8,414	$ 9,863

Sales	11,973	11,051

As of July 4, 2009, the Company had forward contracts to sell euros with a notional value of 8.5 million and to purchase U.K. pounds with a notional value of £5.1 million, and as of June 28, 2008, the Company had forward contracts to sell euros with a notional value of 7.1 million and to purchase U.K. pounds with a notional value of £5.0 million. As of July 4, 2009, the Company s forward contracts had an average exchange rate of one U.S. dollar to 0.7135 euros and one U.S. dollar to 0.6062 U.K. pounds. The forward contracts are valued based on exchange rates derived from an independent source of market participant assumptions and compiled from the information available. As of July 4, 2009, the estimated fair of value of these foreign currency contracts was $44,000, which was recorded in Prepaid expenses and other assets.

13

Table of Contents

The following represents the Company s realized fair value of the forward currency contracts and offsets to the foreign currency exchange gains and losses which were included in Interest income and other in the unaudited condensed consolidated statements of operations.

	Three Months Ended		Six Months Ended	
	July 4, 2009	June 28, 2008	July 4, 2009	June 28, 2008
	(in thousands)			
Foreign currency exchange gain (loss) on foreign currency contracts	$ 487	$(107)	$ 935	$(1,147)
Foreign currency exchange (loss) gain on foreign translation adjustments	(498)	122	(1,448)	1,230

8. Inventories

Inventories consisted of the following:

	July 4, 2009	January 3, 2009
	(in thousands)	
Finished goods	$ 20,853	$ 24,373
Work in process	11,090	9,174
Raw materials	34,475	27,826
Total	$ 66,418	$ 61,373

9. Property, Plant and Equipment, net

Property, plant and equipment, net, consisted of the following:

	July 4, 2009	January 3, 2009
	(in thousands)	
Land, building and improvements	$ 16,135	$ 16,135
Equipment and capitalized software	71,017	68,029
Furniture and leasehold improvements	30,224	27,424
Total	117,376	111,588
Less accumulated depreciation	(65,156)	(61,450)
Total	$ 52,220	$ 50,138

Depreciation expense for the three months ended July 4, 2009 and June 28, 2008 was $2.8 million and $2.6 million, respectively, and for the six months ended July 4, 2009 and June 28, 2008 was $5.4 million and $5.0 million, respectively.

10. Goodwill and Purchased Intangible Assets

The carrying amount of goodwill was $99.3 million as of July 4, 2009 and as of January 3, 2009. The components of goodwill at July 4, 2009 were $95.0 million attributable to the Cardiovascular division and $4.3 million attributable to the ITC acquisition of the outstanding common shares of privately held A-VOX Systems, Inc. (Avox).

The changes in the carrying amount of goodwill were as follows:

	July 4, 2009	January 3, 2009
	(in thousands)	
Balance at the beginning of the fiscal period	$ 99,287	$ 98,368
Adjustment for the acquisition related to the Cardiovascular division		919
Balance at the end of the fiscal period	$ 99,287	$ 99,287

In February 2001, the Company merged with Thermo Cardiosystems, Inc. (TCA). Prior to the merger with TCA (the Merger), TCA was a subsidiary of Thermo Electron Corporation (TCI). The components of identifiable intangible assets related to the Merger include: patents and trademarks, core technology (Thoralon, the Company s proprietary bio-material), and developed technology (patent technology, other than core technology, acquired in the Merger). The components of intangible assets related to the October 2006 Avox acquisition includes: patents and trademarks, developed technology and customer and distributor relationships and other. The combined components are included in purchased intangibles on the unaudited condensed consolidated balance sheets as follows:

	July 4, 2009		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
		(in thousands)	
Patents and trademarks	$ 38,515	$ (29,570)	$ 8,945
Core technology	37,485	(14,750)	22,735
Developed technology	125,742	(54,772)	70,970
Customer and distributor relationships and other	897	(462)	435
Total purchased intangible assets	$ 202,639	$ (99,554)	$ 103,085

	January 3, 2009		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
		(in thousands)	
Patents and trademarks	$ 38,515	$ (28,803)	$ 9,712
Core technology	37,485	(13,765)	23,720
Developed technology	125,742	(51,098)	74,644
Customer and distributor relationships and other	897	(389)	508
Total purchased intangible assets	$ 202,639	$ (94,055)	$ 108,584

Amortization expense related to purchased intangible assets for the three months ended July 4, 2009 and June 28, 2008 was $2.6 million and $3.3 million, respectively and for the six months ended July 4, 2009 and June 28, 2008 was $5.5 million and $6.6 million, respectively. The Company s amortization expense is expected to be approximately $10.6 million in 2009, declining to $8.7 million by 2013. This decline in amortization expense is due to the change in our estimated useful lives of our core technology and developed technology assets. Patents and trademarks have useful lives ranging from one to fifteen years, core and developed technology assets have useful lives ranging from two to thirteen years and customer and distributor relationships and other have useful lives ranging from one to six years.

11. Other Assets

On August 23, 2006, the Company purchased a $5.0 million convertible debenture from Levitronix, a company with which it has a distribution arrangement to sell Levitronix products. The convertible debenture is a long-term note receivable with an annual interest rate of 5.7%, to be accrued monthly and at the option of Levitronix, paid in cash or in-kind semi-annually on February 23 and August 23 until its maturity on August 23, 2013. The Company may convert the debenture at any time at its option into membership interests of Levitronix at a conversion price of $4.2857, which may be adjusted as a result of certain corporate events. This conversion feature is not an embedded derivative under SFAS No. 133 because the membership interests of the issuer are not readily convertible to cash. If the Company had converted the debenture as of July 4, 2009, its ownership in Levitronix would have been less than

5%.

As of July 4, 2009, the convertible debenture of $5.0 million plus accrued interest of $0.9 million was included in Other long-term assets on the Company s unaudited condensed consolidated balance sheets. The fair value of the convertible debenture, based on a discounted cash flows valuation approach, was $6.0 million.

15

Table of Contents

12. Long-Term Debt

In 2004, the Company completed the sale of $143.8 million initial principal amount of senior subordinated convertible notes due in 2034. The convertible notes were sold to Qualified Institutional Buyers pursuant to the exemption from the registration requirements of the Securities Act of 1933, as amended, provided by Rule 144A thereunder. A portion of the proceeds was used to repurchase 4.2 million shares of the Company s outstanding common stock for $60 million. The balance of the proceeds has been and will be used for general corporate purposes, which may include additional stock repurchases, strategic investments or acquisitions. The principal amount of the convertible notes at maturity is $247.4 million offset by the original issue discount of $103.7 million and net debt issuance costs of $4.3 million, equaling net proceeds of $139.4 million.

The senior subordinated convertible notes were issued at an issue price of $580.98 per note, which is 58.098% of the principal amount at maturity of the notes. The senior subordinated convertible notes bear interest at a rate of 1.3798% per year on the principal amount at maturity, payable semi-annually in arrears in cash on May 16 and November 16 of each year, from November 16, 2004 until May 16, 2011. Beginning on May 16, 2011, the original issue discount will accrue daily at a rate of 2.375% per year on a semi-annual bond equivalent basis and, on the maturity date, a holder will receive $1,000 per note. As a result, the aggregate principal amount of the notes at maturity will be $247.4 million.

Holders of the senior subordinated convertible notes may convert their convertible notes into shares of the Company s common stock at a conversion rate of 29.4652 shares per $1,000 principal amount of senior subordinated convertible notes, which represents a conversion price of $19.72 per share, subject to adjustments upon the occurrence of certain events as set forth in the indenture. Holders have been and are able to convert their convertible notes at any point after the close of business on September 30, 2004 if, as of the last day of the preceding calendar quarter, the closing price of the Company s common stock for at least 20 trading days in a period of 30 consecutive trading days ending on the last trading day of such preceding calendar quarter is more than 120% of the accreted conversion price per share of its common stock. Commencing October 1, 2008, this market price conversion feature was satisfied, such that holders of the senior subordinated convertible notes may convert their notes through the final maturity date of the notes into shares of the Company s common stock at a conversion rate of 29.462 shares per $1,000 principal amount of senior subordinated convertible notes, subject to adjustments as provided in the indenture. If holders elect conversion, the Company may, at its option, deliver shares of common stock, pay a holder in cash, or deliver a combination of shares and cash, as determined pursuant to the terms of the notes. As of July 4, 2009, no notes had been converted.

Holders may require the Company to repurchase all or a portion of their senior subordinated convertible notes on each of May 16, 2011, 2014, 2019, 2024 and 2029 at a repurchase price equal to 100% of the issue price, plus accrued original issue discount, if any. In addition, if the Company experiences a change in control or a termination of trading of its common stock each holder may require the Company to purchase all or a portion of such holder s notes at the same price, plus, in certain circumstances, to pay a make-whole premium. This premium is considered an embedded derivative under SFAS No. 133 and has been bifurcated from the senior subordinated convertible notes and recorded at its estimated fair value, $51,000 at July 4, 2009. There are significant variables and assumptions used in valuing the make-whole provision including, but not limited to, the Company s stock price, volatility of the Company s stock, the probability of the Company being acquired and the probability of the type of consideration used by a potential acquirer.

The senior subordinated convertible notes are subordinated to all of the Company s senior indebtedness and structurally subordinated to all indebtedness of its subsidiaries. Therefore, in the event of a bankruptcy, liquidation or dissolution of the Company or one or more of its subsidiaries and acceleration of or payment default on its senior indebtedness, holders of the convertible notes will not receive any payment until holders of any senior indebtedness the Company may have outstanding have been paid in full.

Table of Contents

On January 4, 2009, the Company adopted FSP APB 14-1, which applies to certain convertible debt instruments that may be settled in cash or other assets, or partially in cash, upon conversion. The senior subordinated convertible notes fall within the scope of FSP APB 14-1 because their terms include partial cash settlement. Pursuant to FSP APB 14-1, the Company is required to account for the liability and equity components of the senior subordinated convertible notes separately in a manner that reflects the Company s nonconvertible debt borrowing rate when interest expense is subsequently recognized. FSP APB 14-1 requires retrospective application as of May 16, 2004. Accordingly, the accompanying prior period condensed consolidated financial statements have been adjusted to reflect the adoption of FSP APB 14-1. The Company estimated the fair value of the senior subordinated convertible notes without the conversion feature as of the date of issuance (liability component). The estimated fair value of the liability component was approximately $95.1 million and was determined using a discounted cash flow approach. Key inputs used to estimate the fair value of the liability component included the following:

The Company s estimated non-convertible borrowing rate as of May 16, 2004 the date the senior subordinated convertible notes were issued;

The amount and timing of cash flows; and

The expected life.

The excess of the proceeds received over the estimated fair value of the liability component totaling $48.5 million was allocated to the conversion feature (equity component) and a corresponding offset was recognized as a discount to reduce the net carrying value of the senior subordinated convertible notes. The discount is being amortized to interest expense over a seven-year period ending May 16, 2011 (the expected life of the liability component) using the effective interest method. Additionally, FSP APB 14-1 requires transaction costs to be allocated on the same percentage as the liability and equity components. The adoption of FSP APB 14-1 will result in a portion of the deferred debt issuance costs allocated to the liability component to be amortized using the effective interest method until May 16, 2011, and the equity component to be included in additional paid-in capital. The deferred debt issuance costs are amortized using the effective interest method until May 16, 2011 at which point the Company may redeem the debt.

The adoption of FSP APB 14-1 increased interest expense associated with the Company s senior subordinated convertible notes by adding a non-cash component to amortize a debt discount calculated based on the difference between the cash coupon rate (2.375% per year) of the senior subordinated convertible notes and the effective interest rate on debt borrowing (9% per year). The impact of the adoption of FSP ABP 14-1 on the results of operations for the three and six months ended July 4, 2009 and June 28, 2008 consisted of the following:

	Three Months Ended July 4, 2009			Six Months Ended July 4, 2009

Diluted	$ 0.16		$ 0.14	$ 0.16		$ 0.13

The impact of the adoption of FSP ABP 14-1 on the opening balance sheets consisted of the following:

	Net Increase (Decrease)				
	Long-term debt	Debt issuance costs	Deferred tax liability	Additional paid-in capital	Deficit
	(in thousands)				
Allocation of long-term debt proceeds and issuance costs to equity component on issuance date	$ (48,508)	$ (1,462)	$ 18,584	$ 28,462	$
Cumulative retrospective impact from amortization of discount on liability component and debt issuance costs	21,718	754	(8,282)		12,682
Cumulative retrospective impact as of December 29, 2007	(26,790)	(708)	10,302	28,462	12,682
Retrospective impact from amortization of discount on liability	7,155	209	(2,745)		4,201

component and debt issuance costs during the period					
Cumulative retrospective impact as of January 3, 2009	$ (19,635)	$ (499)	$ 7,557	$ 28,462	$ 16,883

	Long-term debt	Debt issuance costs	Deferred tax liability	Additional paid-in capital	Deficit
			(in thousands)		
January 3, 2009, balance as previously reported	$ 143,750	$ 1,475	$ 31,285	$ 500,195	$ 39,751
Cumulative retrospective impact as of January 3, 2009	(19,635)	(499)	7,557	28,462	16,883
January 3, 2009, as adjusted	$ 124,115	$ 976	$ 38,842	$ 528,657	$ 56,634

As of July 4, 2009 and January 3, 2009, long-term debt and equity component (recorded in additional paid-in-capital, net of income tax benefit) associated with FSP APB 14-1 consisted of the following:

	July 4, 2009	January 3, 2009
	(in thousands)	
Long-term debt		
Principal amount	$ 143,750	$ 143,750
Unamortized discount	(15,814)	(19,635)
Net carrying amount	$ 127,936	$ 124,115
Equity component, net of income tax benefit	$ 28,462	$ 28,462

Table of Contents

The Company may redeem either in whole or in part any of the senior subordinated convertible notes at any time beginning May 16, 2011, by giving the holders at least 30 days notice, at a redemption price equal to the sum of the issue price and the accrued original issue discount. If the holders converted the senior subordinated convertible notes into shares of the Company s stock as of July 4, 2009, the if-converted value would be $192.9 million, based on the Company s stock price of $26.46 per share on July 3, 2009, which amount exceeds the original value of $143.8 million by $49.1 million. This if-converted value is $54.5 million less than the $247.4 million face amount at maturity in 2034.

The aggregate fair value of the senior subordinated convertible notes at July 4, 2009 was $197.9 million.

13. Share-Based Compensation

Share-based compensation expense is measured based on the grant-date fair value of the share-based awards. The Company recognizes share-based compensation expense for the portion of the award that will ultimately be expected to vest over the requisite service period for those awards with graded vesting and service conditions. The Company develops an estimate of the number of share-based awards which will ultimately vest, primarily based on historical experience. The estimated forfeiture rate is reassessed periodically throughout the requisite service period. Such estimates are revised if they differ materially from actual forfeitures. As required, the forfeiture estimates will be adjusted to reflect actual forfeitures when an award vests.

Share-based compensation included in the condensed consolidated statements of operations consists of the following:

	Three Months Ended		Six Months Ended	
	July 4, 2009	June 28, 2008	July 4, 2009	June 28, 2008
	(in thousands)			
Cost of product sales	$ 508	$ 471	$ 1,020	$ 913
Selling, general and administrative	2,061	1,562	4,466	3,236
Research and development	780	596	1,899	1,344
Total share-based compensation expense before taxes	3,349	2,629	7,385	5,493
Tax benefit for share-based compensation expense	942	1,153	2,063	1,795
Total share-based compensation (net of taxes)	$ 2,407	$ 1,476	$ 5,322	$ 3,698

For the six months ended July 4, 2009 and June 28, 2008, share-based compensation expense of $0.4 million and $0.5 million, respectively, was capitalized to inventory.

The Company receives a tax deduction for certain stock option exercises during the period the options are exercised, generally for the excess of the fair market value of the options at the date of exercise over the exercise prices of the options. Prior to the adoption of SFAS No. 123(R) *Share-Based Payment*, the Company reported all tax benefits resulting from the exercise of stock options as operating cash flows in its condensed consolidated statements of cash flows. In accordance with SFAS No. 123(R), beginning in 2006, the Company s unaudited condensed consolidated statements of cash flows presentation reports the excess tax benefits from share-based compensation as financing cash flows. These amounts were $1.6 million and $68,000 for the six months ended July 4, 2009 and June 28, 2008, respectively.

Cash proceeds from the exercise of stock options were $2.9 million and cash proceeds from the Company s employee stock purchase plan were $1.6 million for the six months ended July 4, 2009. Cash proceeds from the exercise of stock options were $0.9 million and cash proceeds from the Company s employee stock purchase plan were $1.1 million for the six months ended June 28, 2008. Additionally, for the six months ended July 4, 2009, the Company purchased $3.1 million of restricted stock for payment of income tax withholding due upon vesting. For the six months ended June 28, 2008, the Company purchased $1.1 million of restricted stock for payment of income tax withholding due upon vesting.

19

Table of Contents

Equity Plan

In April 2006, the Board of Directors approved the 2006 Incentive Stock Plan (2006 Plan). In May 2006 the 2006 Plan was amended by the Board of Directors and such amendment was approved by the Company s shareholders and in May 2008 the 2006 Plan was amended by the Board of Directors and such amendment was approved by the Company s shareholders. The 2006 Plan allows the Company to grant to employees and directors of, and consultants to, the Company up to a total of 5.4 million shares of stock awards. Each share issued from and after May 20, 2008 as restricted stock bonuses, restricted stock units, phantom stock units, performance share bonuses, or performance share units reduces the number of shares available for issuance under the 2006 Plan by one and seventy-four hundredths (1.74) shares, and each share issued as stock options, restricted stock purchases or stock appreciation rights reduces the shares available for issuance under the 2006 Plan on a share-for-share basis. During the six months ended July 4, 2009, approximately 336,000 options were granted under the 2006 Plan at an exercise price equal to the fair market value on the date of grant, and approximately 463,000 shares of restricted stock units were granted under the 2006 Plan. As of July 4, 2009, 2.1 million shares remained available for grant under the 2006 Plan.

Stock Options

Upon approval in May 2006, the 2006 Plan replaced the Company s previous common stock option plans and equity incentive plans. At July 4, 2009, the Company had options outstanding under the 2006 Plan and the replaced plans. Options under the 2006 Plan may be granted by the Board of Directors at the fair market value on the date of grant and generally become fully exercisable within four years after the grant date and expire between five and ten years from the date of grant. Vesting on options granted to officers will be accelerated in certain circumstances following a change in control of the Company.

The fair value of each option is estimated at the date of grant using the Black-Scholes option pricing model with the following assumptions:

	Three Months Ended		**Six Months Ended**	
	July 4, 2009	**June 28, 2008**	**July 4, 2009**	**June 28, 2008**
Risk-free interest rate (weighted average)	2.97%	3.10%	2.32%	3.25%
Expected volatility	53%	40%	53%	40%
Expected option term (years)	4.91 to 6.02	5.09 to 6.07	4.90 to 6.04	5.09 to 6.07
Dividends	None	None	None	None

The risk-free interest rate is based on the United States Treasury yield curve in effect at the time of grant. The expected term of options represents the period of time that options are expected to be outstanding. The Company uses separate assumptions for groups of employees (for example, officers) that have similar historical exercise behavior. The range above reflects the expected option impact of these separate groups. The Company bases the expected volatility on historical trends, because it has determined that the historical volatility trends are reflective of market conditions.

At July 4, 2009, there was $4.8 million of unrecognized compensation expense related to stock options, which expense the Company expects to recognize over a weighted average period of 1.36 years. The aggregate intrinsic value of in-the-money options outstanding, based on the closing price of the Company s common stock on July 2, 2009, the last trading day in the six months ended July 4, 2009, of $26.46, was $41.1 million, and the aggregate intrinsic value of options exercisable was $32.7 million. The intrinsic value of options vested and expected to vest was $40.2 million as of July 4, 2009. The intrinsic value of options exercisable was $2.6 million for the six months ended July 4, 2009. The aggregate fair value of the options granted during the six months ended July 4, 2009 was $4.0 million.

Table of Contents

Stock option activity is summarized as follows:

	Number of Options (in thousands)		Weighted Average Exercise Price Per Share	Weighted Average Remaining Contract Life (years)
Outstanding options at January 3, 2009	4,259	$	16.37	5.98
Granted	336		23.97	
Exercised	(204)		14.36	
Forfeited or expired	(78)		23.69	
Outstanding options at July 4, 2009	4,313	$	16.93	5.84
Outstanding options exercisable at July 4, 2009	3,073	$	15.83	4.92
Outstanding options vested at July 4, 2009 and expected to vest	4,169	$	16.82	5.74

The weighted average grant-date fair value of options granted during the first six months of 2009 was $12.03 per share.

Restricted Stock

The 2006 Plan allows for the issuance of restricted stock awards and restricted stock units, which awards or units may not be sold or otherwise transferred until certain restrictions have lapsed. The unearned share-based compensation related to these awards is being amortized to compensation expense over the period of the restrictions, generally four years. The expense for these awards was determined based on the market price of the Company s shares on the date of grant applied to the total number of shares that were granted.

Recognized share-based compensation expense related to these restricted stock grants was $3.0 million for the six months ended July 4, 2009. As of July 4, 2009, the Company had $7.6 million of unrecognized compensation expense related to these restricted stock awards, which expense the Company expects to recognize over a weighted average period of 2.08 years. There were no restricted stock awards granted during the first six months of 2009.

Restricted stock activity is summarized as follows:

	Number of Shares (in thousands)		Weighted Average Grant Date Fair Value
Outstanding unvested restricted stock at January 3, 2009	983	$	16.83
Granted			
Vested	(305)		17.00
Forfeited or expired	(33)		17.36
Outstanding unvested restricted stock at July 4, 2009	645	$	16.72

Restricted Stock Units

As of July 4, 2009, the Company had $8.0 million of unrecognized compensation expense related to restricted stock units, which expense the Company expects to recognize over a weighted average period of 3.6 years. The

aggregate intrinsic value of the units outstanding, based on the Company s stock price on July 4, 2009, was $11.9 million. In the first six months of 2009, the Company issued restricted stock units to U.S and non-U.S. employees.

Restricted stock unit activity is summarized as follows:

	Number of Units (in thousands)	Weighted Average Grant Date Fair Value		Weighted Average Remaining Contract Life (in years)
Outstanding units at January 3, 2009	28	$	16.66	2.46
Granted	463		24.42	
Released	(32)		23.52	
Forfeited or expired	(10)		23.93	
Outstanding units at July 4, 2009	449	$	24.03	3.60

Table of Contents

Employee Stock Purchase Plan

In May 2002, the Company s shareholders approved the Company s Employee Stock Purchase Plan (ESPP) under which 500,000 shares of common stock were reserved for issuance. In addition, the ESPP provides for an annual, automatic increase of up to 250,000 shares in the total number of shares available for issuance thereunder on March 1st of each year, unless the Company s Board of Directors specifies a smaller increase or no increase. Under this provision, an additional 250,000 shares were reserved for issuance under the ESPP on each of March 1, 2006, March 1, 2008 and March 1, 2009; the Company s Board of Directors specified no increase as of each other year. Eligible employees may purchase a limited number of shares, over a six month period, of the Company s common stock at 85% of the lower of the market value on the offering date or the market value on the purchase date. During the six months ended July 4, 2009, approximately 75,843 shares of common stock were issued under the ESPP. As of July 4, 2009, approximately 356,568 shares remained available for issuance under this plan.

The estimated subscription date fair value of the current offering under the ESPP is approximately $0.4 million using the Black-Scholes option pricing model and the following assumptions:

Risk-free interest rate	0.31%
Expected volatility	55%
Expected option life	0.50years
Dividends	None

As of July 4, 2009, there was approximately $0.3 million of unrecognized compensation expense related to ESPP subscriptions that began on May 1, 2009, which amount the Company expects to recognize during the third quarter of 2009.

14. Income Taxes

The Company s effective income tax rates were 29.0% and 25.9% for the three months ended July 4, 2009 and June 28, 2008, respectively, and 27.3% and 25.0% for the six months ended July 4, 2009 and June 28, 2008, respectively.

For the six months ended July 4, 2009, the Company recorded a discrete benefit of approximately $0.9 million to reflect the effect of a change in California tax law which will permit the Company to make a beneficial apportionment election beginning in 2011. This election will impact the California state tax rate for certain of the Company s existing long-term deferred tax assets and liabilities which are anticipated to reverse subsequent to 2010.

The tax years 2005 through 2008 remain subject to audit by certain jurisdictions in which the Company is subject to taxation with the exception of California and New Jersey, which remain subject to audit from tax years 2004 to 2008, and the U.K., which remains subject to audit from tax years 2007 through 2008. However, because the Company had net operating losses and credits carried forward in several jurisdictions including U.S. federal and California, certain items attributed to closed years remain subject to adjustment by the relevant tax authority through an adjustment to tax attributes carried forward to open years. The Company is currently under audit by the state of California for its 2003 and 2004 tax years. Although the ultimate outcome and the timing of the conclusion of this examination is unknown, the Company believes that adequate amounts have been provided for any adjustments that may result from the current examination and that the final outcome will not have a material adverse effect on the Company s unaudited condensed consolidated statements of operations.

As of July 4, 2009 and January 3, 2009, the Company reported a net deferred tax liability of approximately $26.2 million and $29.1 million, respectively, comprised principally of temporary differences between the financial statement and income tax bases of intangible assets, and subordinated convertible notes.

The Company adopted FIN 48 on December 31, 2006. Under FIN 48, *Accounting for Uncertainty in Income Taxes, an interpretation of SFAS No. 109*, tax positions are evaluated for recognition using a more-likely-than-not recognition threshold, and those tax positions eligible for recognition are measured as the largest amount of tax benefit that is greater than fifty percent likely of being realized upon the effective settlement with a taxing authority that has full knowledge of all relevant information. Unrecognized tax benefits increased by approximately $0.5 million for both periods during the three and six months ended July 4, 2009, respectively, primarily as a result of positions taken during the year. In addition, unrecognized tax benefits also increased by $0.2 million due to prior year positions taken on returns for compensation deductions and apportionment methodologies, and as a result of foreign exchange rate fluctuations. Both increases were offset by a decrease of approximately $9,000 from settlements of previously unfiled state returns. The Company believes it is reasonably possible that unrecognized tax benefits will increase by approximately $0.4 million within the next twelve months as a result of tax positions which may be taken on tax returns yet to be filed. Conversely, it is reasonably possible unrecognized tax benefits will decrease by approximately $1.5 million, primarily as a result of the settlement of outstanding audits.

15. Net Income Per Share

Basic and diluted net income per share was calculated as follows:

	Three Months Ended		Six Months Ended	
	July 4, 2009	June 28, 2008	July 4, 2009	June 28, 2008
	(in thousands, except per share data)			
Net income for basic and diluted share calculation	$ 1,832	$ 7,624	$ 7,459	$ 6,946
Weighted average number of common shares-basic	56,468	54,556	56,426	54,389
Dilutive effect of stock-based compensation plans	1,372	778	1,356	716
Weighted average number of common shares-diluted	57,840	55,334	57,782	55,105
Net income per common share:				
Basic and diluted	$ 0.03	$ 0.14	$ 0.13	$ 0.13

Basic net income per share is computed by dividing net income per share by the weighted-average number of common shares outstanding during the period. Diluted net income per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock, using the treasury stock method.

	Three Months Ended		Six Months Ended	
	July 4, 2009	June 28, 2008	July 4, 2009	June 28, 2008
	(in thousands)			
Options to purchase shares not included in the computation of diluted income per share because their inclusion would be antidilutive	344	2,411	253	2,486

The computation of diluted net income per share for the three and six months ended July 4, 2009 and June 28, 2008 excludes the effect of assuming the conversion of the Company s senior subordinated convertible notes, which are convertible at $19.72 per share into 7.3 million shares of common stock, because the effect would have been antidilutive for those periods.

Table of Contents

16. Enterprise and Related Geographic Information

The Company organizes and manages its business by functional operating entities. The functional entities operate in two segments: Cardiovascular and ITC. The Cardiovascular segment designs, develops, manufactures and markets proprietary medical devices used for circulatory support and vascular graft applications. The ITC segment designs, develops, manufactures and markets proprietary point-of-care diagnostic test systems and incision devices.

Business Segments:

	Three Months Ended		Six Months Ended	
	July 4, 2009	June 28, 2008	July 4, 2009	June 28, 2008
	(in thousands)			
Product sales:				
Cardiovascular	$ 69,222	$ 57,506	$ 133,851	$ 97,727
ITC	22,837	25,142	47,674	49,348
Total product sales	$ 92,059	$ 82,648	$ 181,525	$ 147,075
Income (loss) before income taxes and other:				
Cardiovascular (a)(c)	$ 17,059	$ 13,399	$ 35,586	$ 15,225
ITC(a)(c)	(2,198)	1,272	(3,263)	2,077
Corporate (b)(c)	(10,876)	(3,840)	(18,783)	(7,085)
Income (loss) from operations	3,985	10,831	13,540	10,217
Other income and (expense):				
Interest expense (b)	(3,040)	(2,828)	(5,906)	(5,415)
Interest income and other (b)	1,637	2,281	2,625	4,459
Income before income taxes	$ 2,582	$ 10,284	$ 10,259	$ 9,261

	July 4, 2009	January 3, 2009
	(in thousands)	
Total assets:		
Cardiovascular	$ 327,063	$ 321,605
ITC	58,396	61,552
Corporate (b)	318,102	300,928
Total assets	$ 703,561	$ 684,085

(a) The Cardiovascular segment includes amortization expense on purchased

intangible assets of $2.4 million and $5.1 million for the three and six months ended July 4, 2009, respectively, and $3.1 million and $6.2 million for the three and six months ended June 28, 2008, respectively. The ITC segment also includes amortization expense of $0.2 million and $0.4 million for the three and six months ended July 4, 2009, respectively, and $0.2 million and $0.4 million for the three and six months ended June 28, 2008, respectively.

(b) Represents unallocated costs or assets, not specifically identified to any particular business segment.

(c) Includes share-based compensation expense of $1.9 million, $1.0 million and $0.5 million for Cardiovascular,

ITC and Corporate, respectively, for the three months ended July 4, 2009 and $1.6 million, $0.7 million and $0.4 million for Cardiovascular, ITC and Corporate, respectively, for the three months ended June 28, 2008 and share-based compensation expense of $4.2 million, $2.1 million and $1.1 million for Cardiovascular, ITC and Corporate, respectively, for the six months ended July 4, 2009; and $3.2 million, $1.4 million and $0.8 million for Cardiovascular, ITC and Corporate, respectively, for the six months ended June 28, 2008.

Table of Contents

Geographic Areas:

Revenue attributed to a country or region includes product sales to hospitals, physicians and distributors and is based on final destination where the products are sold. During the second quarter ended and first half of July 4, 2009 and June 28, 2008, no customer or international country represented individually greater than 10% of the Company s total product sales. The geographic composition of the Company s product sales was as follows:

	Three Months Ended		Six Months Ended	
	July 4, 2009	June 28, 2008	July 4, 2009	June 28, 2008
	(in thousands)			
Domestic	$ 69,726	$ 60,684	$ 137,151	$ 106,057
International	22,333	21,964	44,374	41,018
Total product sales	$ 92,059	$ 82,648	$ 181,525	$ 147,075

17. Subsequent Events

On February 12, 2009, the Company and HeartWare entered into a definitive merger agreement pursuant to which the Company would have acquired HeartWare. The Company and HeartWare mutually agreed effective July 31, 2009 to terminate the definitive merger agreement. As announced on July 29, 2009, the FTC informed the Company and HeartWare that it would file a complaint in U.S. Federal District Court to challenge the Company s proposed acquisition of HeartWare. HeartWare and the Company s decision to terminate the definitive merger agreement was in response to the FTC s determination to challenge the proposed acquisition of HeartWare by the Company.

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

This Quarterly Report on Form 10-Q includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements can be identified by the words expects, projects, hopes, believes, intends, should, estimate, wi may, anticipates, plans, could and other similar words. Actual results, events or performance could differ materiall from these forward-looking statements based on a variety of factors, many of which are beyond our control. Therefore, readers are cautioned not to put undue reliance on these statements. Factors that could cause actual results or conditions to differ from those anticipated by these and other forward-looking statements include those more fully described in the Risk Factors section of our 2008 Annual Report on Form 10-K (the 2008 Annual Report), the Risk Factors section of our first quarter 2009 Quarterly Report on Form 10-Q (Q1 2009 Quarterly Report) and in other documents we file with the Securities and Exchange Commission (SEC). These forward-looking statements speak only as of the date hereof. We are not under any obligation, and we expressly disclaim any obligation, to publicly release any revisions or updates to these forward-looking statements that may be made to reflect events or circumstances after the date hereof, or to reflect the occurrence of unanticipated events.

The following presentation of management s discussion and analysis of our financial condition and results of operations should be read together with our unaudited condensed consolidated financial statements included in this Quarterly Report on Form 10-Q.

OVERVIEW

Thoratec Corporation (we, our, us, or the Company) is the world leader in mechanical circulatory support with a product portfolio to treat the full range of clinical needs for advanced heart failure patients. We develop, manufacture and market proprietary medical devices used for circulatory support. We also develop, manufacture and market point-of-care diagnostic test systems and skin incision products. Our business is comprised of two operating divisions: Cardiovascular and International Technidyne Corporation (ITC), a wholly owned subsidiary.

For advanced heart failure (HF), our Cardiovascular division develops, manufactures and markets proprietary medical devices used for mechanical circulatory support (MCS). Our primary product lines are our ventricular assist devices (VADs): the Thoratec Paracorporeal Ventricular Assist Device (PVAD), the Thoratec Implantable Ventricular Assist Device (IVAD), the HeartMate Left Ventricular Assist System (HeartMate XVE), and the HeartMate II Left Ventricular Assist System (HeartMate II). We refer to the PVAD and the IVAD collectively as the Thoratec product line and we refer to the HeartMate XVE and the HeartMate II collectively as the HeartMate product line. The PVAD, IVAD, HeartMate XVE and HeartMate II are approved by the U.S Food and Drug Administration (FDA) and Conformite Europeene (CE) Mark approved in Europe. In addition, for acute HF we market the CentriMag Blood Pumping System (CentriMag), which is manufactured by Levitronix LLC (Levitronix) and distributed by us in the U.S. under a distribution agreement with Levitronix. We also manufacture a vascular access graft for renal dialysis.

VADs supplement the pumping function of the heart in patients with advanced HF. In most cases, a cannula connects the left ventricle of the heart to a blood pump. Blood flows from the left ventricle to the pump chamber via the cannula, powered by an electric or air driven mechanism that drives the blood through another cannula into the aorta. From the aorta, the blood then circulates throughout the body. Mechanical or tissue valves enable unidirectional flow in some devices. Currently, the power source remains outside the body for all FDA-approved VADs.

Our ITC division develops, manufactures and markets two product lines: point-of-care diagnostic test systems for hospital point-of-care and alternate site point-of-care markets, including diagnostic test systems that monitor blood coagulation while a patient is being administered certain anticoagulants, and that monitor blood gas/electrolytes, oxygenation and chemistry status; and incision products including devices used to obtain a patient s blood sample for diagnostic testing and screening for platelet function.

Table of Contents

Our Business Model

Our business is comprised of two operating divisions: Cardiovascular and ITC.

The product line of our Cardiovascular division is:

Circulatory Support Products. Our mechanical circulatory support products include the PVAD, IVAD, HeartMate XVE, HeartMate II and CentriMag for acute, intermediate and long-term mechanical circulatory support for patients with advanced HF. We also manufacture and sell small diameter grafts using our proprietary materials to address the vascular access market for hemodialysis.

The product lines of our ITC division are:

Point-of-Care Diagnostics. Our point-of-care products include diagnostic test systems that monitor blood coagulation while a patient is being administered certain anticoagulants, as well as monitor blood gas/electrolytes, oxygenation and chemistry status.

Incision. Our incision products include devices used to obtain a patient s blood sample for diagnostic testing and screening for platelet function.

Cardiovascular Division

VADs supplement the pumping function of the heart in patients with severe HF. In most cases, a cannula connects the left ventricle of the heart to a blood pump. Blood flows from the left ventricle to the pump chamber via the cannula, powered by an electric or air driven mechanism that drives the blood through another cannula into the aorta. From the aorta, the blood then circulates throughout the body. Mechanical or tissue valves enable unidirectional flow in some devices. Currently, the power source remains outside the body for all FDA-approved VADs.

Certain VADs are implanted internally, while others are placed outside the body. Some external devices are placed immediately adjacent to the body (paracorporeal), while other external VADs are positioned at a distance from the body (extracorporeal).

In addition to our MCS devices, we sell vascular access graft products used in hemodialysis for patients with late-stage renal disease.

Our product portfolio of implantable and external MCS devices and graft products is described below.

The Paracorporeal Ventricular Assist Device

The PVAD is an external, pulsatile, ventricular assist device, FDA approved for bridge-to-transplantation (BTT), including home discharge, and post-cardiotomy myocardial recovery and provides left, right and biventricular MCS. The PVAD is a paracorporeal device that is less invasive than implantable VADs since only the cannula is implanted. The paracorporeal nature of the PVAD has several benefits including shorter implantation times (approximately two hours) and the ability to use the device in smaller patients.

A pneumatic power source drives the PVAD. It is designed for short-to-intermediate duration use of a few weeks to several months, although this device has supported numerous patients for nine to eighteen months. Offering left, right or biventricular support, the PVAD and the IVAD, described below, are the only biventricular support systems approved for use as BTT. This characteristic is significant because approximately 50% of BTT patients treated with the PVAD and the IVAD require right as well as left-sided ventricular assistance. The PVAD and the IVAD are also the only devices approved for both BTT and recovery following cardiac surgery. The PVAD incorporates our proprietary biomaterial, Thoralon, which has excellent tissue and blood compatibility and is resistant to blood clots.

Table of Contents

The Implantable Ventricular Assist Device

The IVAD is an implantable, pulsatile, ventricular assist device FDA approved for BTT, including home discharge, and post-cardiotomy myocardial recovery and provides left, right or biventricular MCS. The IVAD maintains the same blood flow path, valves and blood pumping mechanism as the PVAD, but has an outer housing made of a titanium alloy that makes it suitable for implantation.

The HeartMate XVE

The HeartMate XVE is an implantable, pulsatile, left ventricular assist device for intermediate and longer-term MCS, FDA approved for BTT and for long-term support for patients suffering from advance stage HF who are not eligible for heart transplantation (Destination Therapy or DT). The HeartMate XVE is the only device approved in the U.S., Europe and Canada for long-term support of patients ineligible for heart transplantation. Patients with a HeartMate XVE do not require anticoagulation drugs, other than aspirin, because of the product s incorporation of proprietary textured surfaces and tissue valves. The system is comprised of the blood pump and a wearable controller and batteries providing a high degree of patient freedom and mobility.

The HeartMate II

The HeartMate II is an implantable, electrically powered, continuous flow, left ventricular assist device consisting of a miniature rotary blood pump designed to provide intermediate and long-term MCS. The HeartMate II is designed to improve survival and quality of life and to provide five to ten years of circulatory support for a broad range of advanced HF patients. Significantly smaller than the HeartMate XVE and with only one moving part, the HeartMate II is simpler and designed to operate more quietly than pulsatile devices. In April 2008, we received FDA approval for the HeartMate II for BTT. In addition, the HeartMate II is in a Phase II pivotal trial in the U.S. for DT. In December 2008, we announced that the HeartMate II had demonstrated superiority in a pre-specified interim analysis to the HeartMate XVE, the control device in the DT pivotal study. This allowed us to gain FDA approval to end randomization in the ongoing continuous access protocol (CAP) phase of the DT study. In April 2009, we filed a pre-market approval (PMA) supplement with the FDA seeking to add the intended use of DT for the HeartMate II LVAS. The PMA filing includes data on a pivotal study cohort of 200 randomized patients, including two-year data on the first 167 patients enrolled. The filing also provides data on adjunctive cohorts totaling an additional 409 patients, including those who had been originally supported by an XVE who then elected to receive a HeartMate II, based on the need for device replacement, and patients enrolled under CAP. We filed an amendment to the PMA supplement submission with complete two-year data on all 200 randomized patients in June 2009. We received routine questions from the FDA regarding the PMA supplement submission and expect to respond in the third quarter of 2009. We continue to believe that we are on track to receive approval for submission by early 2010. The device received CE Mark approval in November 2005, allowing for its commercial sale in Europe.

The CentriMag

The CentriMag is manufactured by Levitronix and is based on their magnetically levitated bearingless motor technology. We entered into a distribution agreement with Levitronix in August 2007, with an initial term effective through December 2011, to distribute the CentriMag in the U.S. The CentriMag is 510(k) cleared by the FDA for use up to six hours in patients requiring short-term extracorporeal circulatory support during cardiac surgery. Additionally, CentriMag is approved under a FDA humanitarian device exemption to be used as a right ventricular assist device for periods of support up to thirty days in patients in cardiogenic shock due to acute right ventricular failure. Levitronix has recently commenced a U.S. pivotal trial to demonstrate safety and effectiveness of the CentriMag for periods of support up to thirty days. Levitronix has CE Mark approval in Europe to market the product to provide support for up to thirty days.

Table of Contents

Vascular Graft Products

The Vectra Vascular Access Graft was approved for sale in the U.S. and Europe. It is designed for use as a shunt between an artery and a vein, primarily to provide access to the bloodstream for renal hemodialysis patients requiring frequent needle punctures during treatment.

ITC Division

Our product portfolio of point-of-care diagnostic test systems and incision products includes the following:

Hospital point-of-care

The HEMOCHRON Whole Blood Coagulation System

The HEMOCHRON Whole Blood Coagulation System (HEMOCHRON) is used to quantitatively monitor a patient s coagulation status while the patient is being administered anticoagulants. It may be used in various hospital settings. For instance, it is used in the cardiovascular operating room and cardiac catheterization lab to monitor the drug Heparin, and in an anticoagulation clinic to monitor the drug warfarin. The system consists of a small portable instrument and disposable test cuvettes or tubes and delivers results in minutes.

The IRMA TRUpoint Blood Analysis System

The IRMA TRUpoint Blood Analysis System (IRMA) is used to quantitatively monitor a patient s blood gas, electrolyte and chemistry status. This instrument is a self-contained, portable system which uses disposable test cartridges and delivers results in minutes.

The AVOXimeter Whole Blood Co-Oximeter/Oximeter System

The AVOXimeter Whole Blood Co-Oximeter/Oximeter System (AVOXimeter) is used to assess a patient s oxygenation status and is commonly used in the cardiac catherization lab, the intensive care unit (ICU), the neonatal intensive care unit (NICU) and the emergency department. This portable instrument uses small, single-use test cuvettes and delivers results in less than ten seconds.

Our integrated data management system connects the HEMOCHRON, IRMA and AVOXimeter products.

Alternate site point-of-care

The ProTime Microcoagulation System

The ProTime Microcoagulation System (ProTime) is designed to safely monitor blood clotting activity in patients on anticoagulation therapy, specifically warfarin. The system can be prescribed for patient use at home or can be used in the physician s office or clinic. The system consists of a portable, quantitative instrument and disposable test cuvettes and delivers results in minutes.

The Hgb Pro Professional Hemoglobin Testing System

The Hgb Pro Professional Hemoglobin Testing System (Hgb Pro) is used by professionals, mainly in the physician s office, to test for anemia. Hgb Pro delivers quick results from a small blood sample placed on a disposable test strip inserted into a hand-held test meter.

The ProTime and Hgb Pro products are sold into the alternate site non-hospital point-of-care segment of the market comprised of physicians offices, long-term care facilities, clinics, visiting nurse associations and home healthcare companies.

Incision Products

The Tenderfoot Heel Incision Device (Tenderfoot), the Tenderlett Finger Incision Device (Tenderlett) and the Surgicutt Bleeding Time Device (Surgicutt) are used by medical professionals to obtain a patient s blood sample for diagnostic testing. The Tenderfoot is a heel stick used for infant testing, the Tenderlett is used for finger incisions and the Surgicutt is used to perform screening tests to determine platelet function. These devices feature permanently retracting blades for safe incision with minimal pain, as compared to traditional lancets, which puncture the skin.

These products are sold to both the hospital point-of-care and alternate site point-of-care segments of the market. These products offer certain advantages, command a premium over the competition and are sold in the higher end of the market.

Critical Accounting Policies and Estimates

We have identified the policies and estimates below as critical to our business operations and the understanding of our results of operations. The impact of, and any associated risks related to, these policies and estimates on our business operations are discussed below. Preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amount of assets, liabilities, revenue and expenses and the disclosure of contingent assets and liabilities. There can be no assurance that actual results will not differ from those estimates and assumptions.

Revenue Recognition

We recognize revenue from product sales for our Cardiovascular and ITC business divisions when evidence of an arrangement exists, title has passed (generally upon shipment) or services have been rendered, the selling price is fixed or determinable and collectability is reasonably assured. Sales to distributors are recorded when title transfers. One distributor has certain limited product return rights. Other distributors have certain rights of return upon termination of their distribution agreement. A reserve for sales returns is recorded for these customers applying reasonable estimates of product returns based upon historical experience in accordance with SFAS No. 48, *Revenue Recognition When Rights of Return Exists*. No other direct sales customers or distributors have return rights.

We recognize sales of certain Cardiovascular division products to first-time customers when it has been determined that the customer has the ability to use the products. These sales frequently include the sale of products and training services under multiple element arrangements. Training is not considered essential to the functionality of the products. Revenue under these arrangements is allocated to training based upon fair market value of the training, which is typically performed on our behalf by third party providers. Under this method, the total value of the arrangement is allocated to the training and the Cardiovascular division products based on the relative fair market value of the training and products.

In determining when to recognize revenue, management makes decisions on such matters as the fair values of the product and training elements when sold together, customer credit worthiness and warranty reserves. If any of these decisions proves incorrect, the carrying value of these assets and liabilities on our condensed consolidated balance sheets or the recorded product sales could be significantly different, which could have a material adverse effect on our results of operations for any fiscal period.

Reserves

We maintain allowances for doubtful accounts for estimated losses resulting from the inability of our customers to make payments owed to us for product sales and training services. If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

The majority of our products are covered by up to a two-year limited manufacturer s warranty from the date of shipment or installation. Estimated contractual warranty obligations are recorded when the related sales are recognized and any additional amounts are recorded when such costs are probable and can be reasonably estimated, at which time they are included in Cost of product sales in our condensed consolidated statements of operations. In determining the warranty reserve estimate, management makes judgments and estimates on such matters as repair costs and probability of warranty obligations.

Estimated excess and obsolete inventory reserves are recorded when inventory levels exceed projected sales volume for a certain period of time. In determining the excess obsolete reserve, management makes judgments and estimates on matters such as forecasted sales volume. If sales volume differs from projections, adjustments to these

reserves may be required.

Management must make judgments to determine the amount of reserves to accrue. If any of these decisions proves incorrect, our condensed consolidated financial statements could be materially and adversely affected.

Income Taxes

We make certain estimates and judgments in determining income tax expense for financial statement purposes. These estimates and judgments occur in the calculation of tax credits, benefits and deductions, such as tax benefits from our non-U.S. operations and in the calculation of certain tax assets and liabilities, which arise from differences in the timing of revenue and expense for tax and financial statement purposes.

We record a valuation allowance to reduce our deferred income tax assets to the amount that is more-likely-than-not to be realized. In evaluating our ability to recover our deferred income tax assets we consider all available positive and negative evidence, including our operating results, ongoing tax planning and forecasts of future taxable income on a jurisdiction by jurisdiction basis. In the event we were to determine that we would be able to realize our deferred income tax assets in the future in excess of their net recorded amount, we would make an adjustment to the valuation allowance which would reduce the provision for income taxes. Conversely, in the event that all or part of the net deferred tax assets are determined not to be realizable in the future, an adjustment to the valuation allowance would be charged to earnings in the period such determination is made.

We believe we have provided adequate reserves for uncertain tax positions for anticipated audit adjustments by U.S. federal, state and local, as well as foreign, tax authorities based on our estimate of whether, and the extent to which, additional taxes, interest and penalties may be due. If events occur which indicate payment of these amounts is unnecessary, the reversal of the liabilities would result in tax benefits being recognized in the period when we determine the accrued liabilities are no longer warranted. If our estimate of tax liabilities proves to be less than the ultimate assessment, a further charge to expense would result.

Evaluation of Purchased Intangibles and Goodwill for Impairment

In accordance with Statement of Financial Accounting Standards (SFAS) No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, we periodically evaluate the carrying value of long-lived assets to be held and used, including intangible assets subject to amortization, when events or circumstances warrant such a review. The carrying value of a long-lived asset to be held and used is considered impaired when the anticipated separately-identifiable undiscounted cash flows from such an asset are less than the carrying value of the asset. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair value of the long-lived asset. Fair value is determined primarily using the anticipated cash flows discounted at a rate commensurate with the risk involved. Management must make estimates of these future cash flows, if necessary, and the approximate discount rate, and if any of these estimates proves incorrect, the carrying value of these assets on our condensed consolidated balance sheets could become significantly impaired.

In accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*, such assets with indefinite lives are not amortized but are subject to annual impairment tests. If there is an impairment, a new fair value would be determined. If the new fair value is less than the carrying amount, an impairment loss would be recognized.

Valuation of Share-Based Awards

We account for share-based compensation expense in accordance with the fair value recognition provisions of SFAS No. 123(R), *Share-Based Payment*. Under SFAS No. 123(R), share-based compensation expense is measured at the grant date based on the value of the award and is recognized as expense over the vesting period. Determining the fair value of option awards at the grant date requires judgment, including estimating the expected term of stock options, the expected volatility of our stock, expected forfeitures and expected dividends. The computation of the expected volatility assumption used in the Black-Scholes option pricing model for option grants is based on historical volatility. When establishing the expected life assumption, we review annual historical employee exercise behavior of option grants with similar vesting periods. In addition, judgment is also required in estimating the amount of share-based awards that are expected to be forfeited. If actual forfeitures differ significantly from these estimates, share-based compensation expense and our results of operations could be materially affected.

Table of Contents

Fair Value Measurements

We adopted the provisions of SFAS No. 157, *Fair Value Measurements,* on December 30, 2007. SFAS No. 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date.

In determining fair value, we use various approaches, including market, income and/or cost approaches, and each of these approaches requires certain inputs. SFAS No. 157 establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability based on market data obtained from sources independent of us. Unobservable inputs are inputs that reflect our assumptions as compared to the assumptions market participants would use in pricing the asset or liability based on the best information available in the circumstances. The hierarchy is broken down into three levels based on the reliability of inputs as follows:

Level 1 Valuations based on quoted prices in active markets for identical assets or liabilities that we have the ability to access. Assets and liabilities utilizing Level 1 inputs include broker-dealer quote securities that can be traded in an active market. Since valuations are based on quoted prices that are readily and regularly available in an active market, a significant degree of judgment is not required.

Level 2 Valuations based on quoted prices of similar investments in active markets, of similar or identical investments in markets that are not active or model based valuations for which all significant inputs and value drivers are observable, directly or indirectly. Assets and liabilities utilizing Level 2 inputs primarily include municipal bonds, variable demand notes, corporate bonds and our senior subordinated convertible notes, except the make-whole provision, which uses Level 3 inputs, described below.

Level 3 Valuations based on inputs that are unobservable and significant to the overall fair value measurement. Assets and liabilities utilizing Level 3 inputs include certain auction rate securities, our Levitronix convertible debenture and the make-whole feature of our senior subordinated convertible notes. Given the current credit market illiquidity for auction rate securities, our estimates are subject to significant judgment by management.

Fair value is a market-based measure considered from the perspective of a market participant who holds the asset or owes the liability rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, our own assumptions are developed to reflect those that market participants would use in pricing the asset or liability at the measurement date. See Note 6 Fair Value Measurements, to the unaudited condensed consolidated financial statements for further information about our financial assets that are accounted for at fair value.

Due to the uncertainty inherent in the valuation process, estimates of fair value may differ significantly from the values that would have been obtained had an active market for the securities existed, and the differences could be material. After determining the fair value of our available-for-sale securities, gains or losses on these investments are recorded to other comprehensive income, until either the investment is sold or we determine that the decline in value is other-than-temporary. Determining whether the decline in fair value is other-than-temporary requires management judgment based on the specific facts and circumstances of each investment. For investments in available-for-sale securities, these judgments primarily consider: the financial condition and liquidity of the issuer, the issuer s credit rating, and any specific events that may cause us to believe that the debt instrument will not mature and be paid in full; and our ability and intent to hold the investment to maturity. Given the current market conditions, these judgments could prove to be incorrect, and companies with relatively high credit ratings and solid financial conditions may not be able to fulfill their obligations. In addition, if we decide not to hold an investment until its value recovers, it may result in the recognition of an other-than-temporary impairment.

Table of Contents

Results of Operations

The following table sets forth selected condensed consolidated statements of operations data for the periods indicated and as a percentage of total product sales:

	Three Months Ended				Six Months Ended			
	July 4, 2009		June 28, 2008		July 4, 2009		June 28, 2008	
	(in thousand, except for percentage data)							
			As adjusted (1)				As adjusted (1)	
Product sales	$ 92,059	100%	$ 82,648	100%	$ 181,525	100%	$ 147,075	100%

(1) Adjusted for the retrospective adoption of Financial Accounting Standards Board (FASB) Staff

Position (FSP) APB 14-1, *Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement).* See Note 12, Long-Term Debt to the unaudited condensed consolidated financial statements.

See Note 16 to our unaudited condensed consolidated financial statements in this Quarterly Report for data presented by business segment and geographic composition.

Three and six months ended July 4, 2009 and June 28, 2008

Product Sales

Product sales in the second quarter of 2009 increased by $9.4 million or 11.4% as compared to the second quarter of 2008 and in the first half of 2009 increased by $34.4 million or 23.4% as compared to the first half of 2008.

	Three Months Ended			Six Months Ended		
	July 4, 2009	June 28, 2008	% Change	July 4, 2009	June 28, 2008	% Change
	(in thousands)			(in thousands)		
Cardiovascular	$ 69,222	$ 57,506	20.4	$ 133,851	$ 97,727	37.0
ITC	22,837	25,142	9.2	47,674	49,348	3.4
Total product sales	$ 92,059	$ 82,648	11.4	$ 181,525	$ 147,075	23.4

In the second quarter of 2009 as compared to the second quarter of 2008, Cardiovascular product sales increased by $11.7 million primarily due to higher sales of our HeartMate product line, partially offset by a decline in the Thoratec product line. ITC product sales decreased by $2.3 million, primarily due to delayed capital purchases by hospitals and physicians driven by the current economic environment and competitive pressure on the ProTime and skin incision businesses.

Table of Contents

In the first half of 2009 as compared to the first half of 2008, Cardiovascular product sales increased by $36.1 million primarily due to higher sales of our HeartMate product line following approval from the FDA of the HeartMate II for BTT in April 2008, this in part is offset by a decline in the Thoratec product line. In the U.S., nine HeartMate II centers have been added in first half of 2009 bringing the HeartMate II implanting centers to 110. In the first half of 2009, ITC product sales decreased by $1.7 million compared to the first half of 2008, primarily due to delayed capital purchases by hospitals and physicians driven by the current economic environment and competitive pressure on the ProTime and skin incision businesses, partially offset by higher sales to customers in pharmaceutical clinical trials.

Sales originating outside of the U.S. and U.S. export sales accounted for approximately 24% and 27% of our total product sales in the second quarter of 2009 and 2008, respectively and approximately 24% and 28% of our total product sales in the first half of 2009 and 2008, respectively.

Gross Profit

Gross profit and gross margin are as follows:

	Three Months Ended		Six Months Ended	
	July 4, 2009	**June 28, 2008**	**July 4, 2009**	**June 28, 2008**
	(in thousands, except percentages)			
Total gross profit	$ 50,755	$ 50,823	$ 104,782	$ 86,660
Total gross margin	55.1%	61.5%	57.7%	58.9%

In the second quarter of 2009 as compared to the second quarter of 2008, Cardiovascular gross margin percentage decreased by 7.5% primarily attributable to an excess inventory reserve related to the HearMate XVE, manufacturing variances and unfavorable foreign exchange rates. ITC division gross margin percentage decreased by 8.0% primarily due to increased inventory reserves, manufacturing variances and lower volume.

In the first half of 2009 as compared to the first half of 2008, Cardiovascular gross margin percentage decreased by 1.5% primarily attributable to an excess inventory reserve related to the HearMate XVE, increase in warranty reserves and unfavorable foreign currency exchange rates. ITC division gross margin percentage decreased by 6.5% primarily due to increase in inventory reserves, manufacturing variances and lower volume.

Selling, General and Administrative

Selling, general and administrative expenses were $30.8 million in the second quarter of 2009 as compared to $23.9 million during the second quarter of 2008 and $58.2 million in the first half of 2009 as compared to $44.5 million in the first half of 2008.

	Three Months Ended			Six Months Ended		
	July 4, 2009	**June 28, 2008**	**% Change**	**July 4, 2009**	**June 28, 2008**	**% Change**
	(in thousands)			**(in thousands)**		
Total selling, general and administration	$ 30,776	$ 23,857	29.0	$ 58,231	$ 44,493	30.9

In the second quarter of 2009 as compared to the second quarter of 2008, Cardiovascular costs increased by $0.1 million due to higher share-based compensation expense. ITC costs increased by $0.5 million, primarily due to higher quality system improvement costs. Corporate costs increased by $6.3 million primarily due to higher legal and consulting fees related to the previously intended acquisition of HeartWare International Inc. (HeartWare).

In the first half of 2009 as compared to the first half of 2008, Cardiovascular costs increased by $2.2 million due to customer training and market development initiatives, including the users meetings. ITC costs increased by $1.1 million, primarily due to higher quality system improvement costs. Corporate costs increased by $10.4 million

primarily due to higher legal and consulting fees related to the previously intended acquisition of HeartWare.

Table of Contents

The Company and HeartWare mutually agreed effective July 31, 2009 to terminate the definitive merger agreement pursuant to which the Company would have acquired HeartWare. See Note 17, Subsequent Events, to the unaudited condensed consolidated financial statements for further discussion.

Research and Development

Research and development expenses in the second quarter of 2009 were $13.4 million, or 15% of product sales, compared to $12.8 million, or 15% of product sales, in the second quarter of 2008 and in the first half of 2009 were $27.5 million or 15% of product sales as compared to $25.4 million or 17% of product sales in the first half of 2008.

	Three Months Ended			Six Months Ended		
	July 4, 2009	June 28, 2008	% Change	July 4, 2009	June 28, 2008	% Change
	(in thousands)			(in thousands)		
Total research and development costs	$ 13,426	$ 12,839	4.6	$ 27,512	$ 25,358	8.5

Research and development costs are largely project driven, and fluctuate based on the level of project activity planned and subsequently approved and conducted.

In the second quarter of 2009 as compared to the second quarter of 2008, Cardiovascular costs increased by $0.8 million primarily due to increased research and development costs associated with the HeartMate product line peripheral enhancements and new product technology. ITC costs decreased by $0.2 million due to lower spending related to new product development.

In the first half of 2009 as compared to the first half of 2008, Cardiovascular costs increased by $2.1 million primarily due to increased research and development costs associated with the HeartMate product line peripheral enhancements and new product technology. ITC costs increased by $0.1 million primarily due to higher share-based compensation expense.

Amortization of Purchased Intangible Assets

Amortization of purchased intangible assets in the second quarter of 2009 was $2.6 million as compared to $3.3 million in the second quarter of 2008 and in the first half of 2009 was $5.5 million as compared to $6.6 million in the first half of 2008. The decrease in amortization expense of $0.7 million in the second quarter of 2009 and $1.1 million in the first half of 2009 resulted from certain intangibles assets at our Cardiovascular division being fully amortized during the first quarter of 2009.

Interest Expense and Other

Interest expense and other was $3.0 million in the second quarter of 2009 as compared to $2.8 million in the second quarter of 2008 and $5.9 million in the first half of 2009 as compared to $5.4 million in the first half of 2008:

	Three Months Ended			Six Months Ended		
	July 4, 2009	June 28, 2008	% Change	July 4, 2009	June 28, 2008	% Change
	(in thousands)			(in thousands)		
Interest expense	$ 2,937	$ 2,725	7.8	$ 5,700	$ 5,209	9.4
Amortization of debt issuance costs related to senior subordinated convertible notes	103	103		206	206	
Total interest expense	$ 3,040	$ 2,828	7.5	$ 5,906	$ 5,415	9.1

Interest expense, which comprises primarily of the senior subordinated convertible notes, is calculated using the interest rate method and increases interest expense over the term of the debt resulting in a higher expense in the

second quarter of 2009 and first half of 2009 as compared to the same periods in 2008.

Interest Income and Other

Interest income and other in the second quarter of 2009 was $1.6 million as compared to $2.3 million in the second quarter of 2008 and in the first half of 2009 was $2.6 million as compared to $4.5 million in the first half of 2008. The components of interest and other income are as follows:

	Three Months Ended			Six Months Ended		
	July 4, 2009	June 28, 2008	% Change	July 4, 2009	June 28, 2008	% Change
	(in thousands)			(in thousands)		
Interest income	$ 1,419	$ 2,109	32.7	$ 2,723	$ 4,250	35.9
Foreign currency, net	(11)	15	168.5	(513)	83	715.2
Other	229	157	45.9	415	126	229.4
Total interest income and other	$ 1,637	$ 2,281	28.2	$ 2,625	$ 4,459	41.1

Interest income in the second quarter of 2009 decreased by $0.7 million from the second quarter of 2008, due to the decline in market interest rates and shortened maturities on our investment portfolio.

Interest income in the first half of 2009 decreased by $1.5 million from the first half of 2008, mainly due to the decline in market interest rates and shortened maturities on our investment portfolio. In addition, foreign currency increased by $0.6 million in the first half of 2009 as compared to the first half of 2008 because of certain foreign currency transactions related to inventory for our foreign operations, which are not hedged in our foreign currency contracts.

Income Taxes

Our effective income tax rate was 29.0% for the second quarter of 2009 as compared to 25.9% for the second quarter of 2008. This 3.2% increase in our effective tax rate was primarily due to an increase in pre-tax earnings and lower tax exempt interest income.

Our effective income tax rate was 27.3% for the first half of 2009 as compared to 25.0% for the first half of 2008. This 2.3% increase in our effective tax rate was primarily due to an increase in pre-tax earnings and lower tax exempt interest income, partially offset by a discrete benefit for $0.9 million recorded in the first quarter of 2009 attributable to a change in California tax law.

Our effective tax rate is calculated based on the statutory tax rates imposed on projected annual pre-tax income or loss in various jurisdictions. Because relatively small changes in our forecasted profitability for 2009 can significantly affect our projected annual effective tax rate, we believe our quarterly tax rate will be dependent on our profitability and could fluctuate significantly.

Liquidity and Capital Resources

Cash, Cash Equivalents and Investments

Cash and cash equivalents include highly liquid financial instruments that are readily convertible to cash and have maturities of 90 days or less from the date of purchase.

Cash and cash equivalents classified as restricted are funds held by a third party. Pursuant to the loan agreement entered into concurrently with the execution and delivery of the merger agreement, the Company deposited $20.0 million (the Loan Amount) into an escrow account on February 13, 2009 and agreed to loan such funds to HeartWare. As announced on July 29, 2009, the U.S. Federal Trade Commission (FTC) informed the Company and HeartWare that it would file a complaint in U.S. Federal District Court to challenge the Company s proposed acquisition of HeartWare. HeartWare and the Company s decision to terminate the definitive merger agreement was in response to the FTC s determination to challenge the proposed acquisition of HeartWare by the Company. See Note 17, Subsequent Events for further discussion. Despite the mutual termination of the definitive merger agreement between the Company and HeartWare, the Loan Amount continues to remain available for borrowing by HeartWare at any time prior to the earlier of (i) November 1, 2011, (ii) the date on which the outstanding portion of the Loan Amount borrowed by HeartWare, including any accrued and unpaid interest, as well as the portion of the Loan Amount remaining in the escrow account that have not been loaned to HeartWare, are converted into shares of HeartWare s common stock, as further described below, or (iii) the date on which the outstanding principal of the Loan Amount borrowed by HeartWare becomes due and payable in full, whether by acceleration or otherwise, pursuant to the terms of the loan agreement. Beginning as of May 1, 2009, HeartWare may borrow up to an aggregate of $12.0 million and beginning as of July 31, 2009, HeartWare may borrow up to an aggregate of $20.0 million, under certain conditions provided in the loan agreement. The loan to HeartWare bears interest at a rate per annum equal to 10%. The principal amount, together with any accrued and unpaid interest on the principal amount, will be due and payable in full in cash on the earlier of (i) November 1, 2011 or (ii) the date on which the outstanding principal of the Loan Amount borrowed by HeartWare becomes due and payable in full, whether by acceleration or otherwise, pursuant to the terms of the loan agreement, See Note 4, Restricted Cash and Cash Equivalents for further discussion.

Investments classified as short-term consist of various financial instruments such as commercial paper, U.S. government agency obligations and corporate notes. Bonds with high credit quality with maturities of greater than 90 days when purchased are classified as available-for-sale. Investments classified as long-term consist of our investments in auction rate securities.

Following is a summary of our cash, cash equivalents and investments:

	July 4, 2009	January 3, 2009
	(in thousands)	
Cash and cash equivalents	$ 81,474	$ 107,053
Restricted cash and cash equivalents	20,036	
Short-term investments	169,038	141,598
Long-term investments	24,682	29,959
Total cash, cash equivalents and investments	$ 295,230	$ 278,610

We believe that cash and cash equivalents, short-term available-for-sale investments and expected cash flows from operations, will be sufficient to fund our operations and capital requirements for at least the next twelve months.

As of July 4, 2009 we owned approximately $27.8 million face value of auction rate securities. The assets underlying these investments are student loans predominantly backed by the U.S. government under the Federal Family Education Loan Program or by private insurers and are rated between A- and AAA. Historically, these securities have provided liquidity through a Dutch auction process that resets the applicable interest rate periodically every seven to 365 days. Beginning in February of 2008, these auctions began to fail. Although we have realized higher interest rates for many of these auction rate securities than the current market rates, the principal amount will

not be accessible until future auctions for these securities are successful, a secondary market is established, these securities are called for redemption or paid upon maturity. Therefore, our auction rate securities are classified as long-term and are valued at $24.7 million.

Table of Contents

As a result of these auction failures, these auction rate securities do not have a readily determinable market value. To estimate their fair values at July 4, 2009, we used a discounted cash flow model based on estimated interest rates, the present value of future principal and interest payments discounted at rates considered to reflect current market conditions, and the credit quality of the underlying securities. Specifically, we estimated the future cash flows over a five year period, and applied a credit default rate to reflect the risk in the marketplace for these investments that has arisen due to the lack of an active market. Because of the inherent subjectivity in valuing these securities, we also considered independent valuations obtained for each of our auction rate securities in estimating fair values.

The following table provides a reconciliation of the beginning and ending balances for auction rate securities measured at fair value using significant unobservable inputs (Level 3):

	Auction Rate Securities (in thousands)
Balance at January 3, 2009	$ 29,959
Settlement at par	(9,400)
Unrealized holding gain, included in other comprehensive loss	4,123
Balance at July 4, 2009	$ 24,682

We continue to monitor the market for auction rate securities and consider its impact (if any) on the fair value of our investments. If the current market conditions deteriorate further, or the anticipated recovery in fair values does not occur, we may be required to record additional unrealized losses in other comprehensive income or other-than-temporary impairment charges to the condensed consolidated statements of operations in future periods.

We intend and have the ability to hold these auction rate securities until the market recovers, and the securities may recover to par or until maturity. We do not anticipate having to sell these securities in order to operate our business. We believe that, based on our current unrestricted cash, cash equivalents and short-term marketable security balances of $250.5 million at July 4, 2009, the current lack of liquidity in the credit and capital markets will not have an impact on our liquidity, our cash flow or our ability to fund our operations. If the issuers of the auction rate securities are unable to successfully complete future auctions and their credit ratings deteriorate, we may in the future be required to record an other-than-temporary impairment charge on these investments. It could conceivably take until the final maturity of the underlying notes (up to 30 years) to realize our investments recorded value.

Long-term obligation

In 2004, we completed the sale of $143.8 million initial principal amount of senior subordinated convertible notes due in 2034. The senior subordinated convertible notes were issued at an issue price of $580.98 per note, which is 58.098% of the principal amount at maturity of the notes. The senior subordinated convertible notes bear interest at a rate of 1.3798% per year on the principal amount at maturity, payable semi-annually in arrears in cash on May 16 and November 16 of each year, from November 16, 2004 until May 16, 2011. The Company has adopted FSP APB 14-1, applied retrospectively, which increases non-cash interest expense based on the assumed market rate of 9% percent per annum as compared to the cash coupon rate of 2.375% as further discussed in Note 12, Long-Term Debt of the notes to the unaudited condensed consolidated financial statements. Holders of the senior subordinated convertible notes may convert their convertible notes into shares of our common stock at a conversion rate of 29.4652 shares per $1,000 principal amount of senior subordinated convertible notes, which represents a conversion price of $19.72 per share, subject to adjustments upon the occurrence of certain events as set forth in the indenture. Holders have been and are able to convert their convertible notes at any point after the close of business on September 30, 2004 if, as of the last day of the preceding calendar quarter, the closing price of our common stock for at least 20 trading days in a period of 30 consecutive trading days ending on the last trading day of such preceding calendar quarter is more than 120% of the accreted conversion price per share of our common stock. Commencing October 1, 2008, this market price conversion feature was satisfied, such that holders of the senior subordinated convertible notes may convert their

notes through the final maturity date of the notes into shares of our common stock at a conversion rate of 29.462 shares per $1,000 principal amount of senior subordinated convertible notes, subject to adjustments as provided in the indenture. If holders elect conversion, we may, at our option, deliver shares of common stock, pay a holder in cash, or deliver a combination of shares and cash, as determined pursuant to the terms of the notes.

Table of Contents

Cash Flow Activities

Following is a summary of our cash flow activities:

	July 4, 2009	June 28, 2008
	(in thousands)	
Net cash provided by operating activities	$ 17,076	$ 17,968
Net cash (used in) provided by investing activities	(45,611)	21,636
Net cash provided by financing activities	3,047	786
Effect of exchange rate changes on cash and cash equivalents	(91)	27
Net (decrease) increase in cash and cash equivalents	$ (25,579)	$ 40,417

Cash Provided by Operating Activities

For the six months ended July 4, 2009, cash provided by operating activities was $17.1 million. This amount included net income of $7.5 million increased by positive non-cash adjustments to net income of $19.8 million primarily comprised of $5.4 million related to depreciation, $5.5 million related to amortization, $1.8 million related to tax benefit related to stock options, $7.4 million related to share-based compensation expense and non-cash interest of $3.8 million. These positive cash contributions were partially offset by a decrease of $1.6 million related to excess tax benefits from share-based compensation and a decrease of $4.5 million in our net deferred tax liability. Changes in assets and liabilities used cash of $10.3 million primarily due to the decrease in accrued compensation liability and an increase in inventory at our Cardiovascular division.

Cash Used in Investing Activities

For the six months ended July 4, 2009, cash used in investing activities was $45.6 million, due to purchases of investments of $90.2 million and a transfer of $20.0 million to an escrow account to be used by HeartWare in accordance with the loan agreement, partially offset by sales and maturities of investments of $70.6 million. In addition, we made $6.0 million of purchases of property, plant and equipment which included $4.5 million for leasehold improvements related to the expansion of our manufacturing facility and the office building at our Pleasanton headquarters and purchases of management information systems equipment at our Cardiovascular division and $1.5 million for manufacturing equipment and management information systems equipment at our ITC division.

Cash Provided by Financing Activities

For the six months ended July 4, 2009, cash provided by financing activities was $3.0 million, primarily was comprised of $2.9 million from proceeds related to stock option exercises, $1.6 million from proceeds from stock issued under our employee stock purchase plan and $1.6 million from excess tax benefits from stock option exercises, offset by $3.1 million of restricted stock purchased for payment of income tax withholding due upon vesting.

Off Balance Sheet Arrangements

We maintain an Irrevocable Standby Letter of Credit as part of our workers compensation insurance program. The Letter of Credit is not collateralized. The Letter of Credit automatically renews on June 30th of each year, unless terminated by one of the parties. As of July 4, 2009, our Letter of Credit was approximately $1.0 million.

Contractual Obligations

As of July 4, 2009, the liability for uncertain tax positions was $10.1 million, including interest and penalties. Due to the high degree of uncertainty regarding the timing of potential future cash flows associated with these liabilities, we are unable to make a reasonably reliable estimate of the amount and period in which these liabilities might be paid.

During the three and six months ended July 4, 2009 there were no other material changes to our contractual obligations reported in our 2008 Annual Report on Form 10-K, as updated by the Current Report on Form 8-K dated June 11, 2009, outside our normal course of business.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE OF MARKET RISK

Interest Rate Risk

Our investment portfolio is made up of marketable investments in money market funds, auction rate securities, U.S. Treasury securities and debt instruments of government agencies, local municipalities, and high quality corporate issuers. All investments are carried at fair market value and are treated as available-for-sale. Investments with maturities beyond one year may be classified as short-term based on their highly liquid nature due to the frequency with which the interest rate is reset and because such marketable securities represent the investment of cash that is available for current operations. Our auction rate securities that are not liquid are classified as long-term. Our holdings of the securities of any one issuer, except government agencies, do not exceed 10% of the portfolio. If interest rates rise, the market value of our investments may decline, which could result in a loss if it were forced to sell an investment before its scheduled maturity. If interest rates were to rise or fall from current levels by 25 basis points and by 50 basis points, the change in our net unrealized gain or loss on investments would be $0.3 million and $0.6 million, respectively. We do not utilize derivative financial instruments to manage interest rate risks. Our senior subordinated convertible notes and the Levitronix convertible debenture do not bear interest rate risk as the notes and debenture were issued at a fixed rate of interest.

Foreign Currency Rate Fluctuations

We use forward foreign currency contracts to mitigate the gains and losses generated by the re-measurement of non-functional currency assets and liabilities (primarily assets and liabilities on our U.K. subsidiary s consolidated balance sheet that are not denominated in U.K. pounds). Our contracts typically have maturities of three months or less.

As of July 4, 2009, we had forward contracts to sell euros with a notional value of 8.5 million and to purchase U.K. pounds with a notional value of £5.1 million, and as of June 28, 2008, we had forward contracts to sell euros with a notional value of 7.1 million and to purchase U.K. pounds with a notional value of £5.0 million. As of July 4, 2009, our forward contracts had an average exchange rate of one U.S. dollar to 0.7135 euros and one U.S. dollar to 0.6062 U.K. pounds. The forward contracts are valued based on exchange rates derived from an independent source of market participant assumptions and compiled from the information available. The potential fair value loss for a hypothetical 10% adverse change in foreign currency exchange rates at July 4, 2009 would be approximately $2.1 million.

ITEM 4. CONTROLS AND PROCEDURES

Attached as exhibits to this Form 10-Q are certifications of our Chief Executive Officer and Chief Financial Officer, which are required in accordance with Rule 13a-14 of the Securities Exchange Act of 1934, as amended (the Exchange Act). This Controls and Procedures section includes information concerning the controls and controls evaluation referred to in the certifications. Item 9A of our 2008 Annual Report sets forth management s report on internal control over financial reporting as of January 3, 2009.

Disclosure Controls and Procedures

An evaluation was performed under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rule 13a-15(e) under the Exchange Act, as of July 4, 2009. The evaluation of our disclosure controls and procedures included a review of our processes and implementation and the effect on the information generated for use in this Quarterly Report on Form 10-Q. In the course of this evaluation, we sought to identify any significant deficiencies or material weaknesses in our disclosure controls and procedures, to determine whether we had identified any acts of fraud involving personnel who have a significant role in our disclosure controls and procedures, and to confirm that any necessary corrective action, including process improvements, was taken. This type of evaluation is done quarterly so that our conclusions concerning the effectiveness of these controls can be reported in our periodic reports filed with the SEC. The overall goals of these evaluation activities are to monitor our disclosure controls and procedures and to make modifications as necessary. We intend to maintain these disclosure controls and procedures, modifying them as circumstances warrant.

Table of Contents

Based on that evaluation, our management, including the Chief Executive Officer and Chief Financial Officer, concluded that as of July 4, 2009 the Company s disclosure controls and procedures, as defined in Rule 13a-15(e) under the Exchange Act, were effective to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC s rules and forms, and to provide reasonable assurance that such information is accumulated and communicated to our management, including our principal executive officer, as appropriate to allow timely decisions regarding required disclosures.

Changes to Internal Controls

There have been no changes in our internal controls over financial reporting during the quarter ended July 4, 2009 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

Inherent Limitations on Controls and Procedures

Our management, including the Chief Executive Officer and the Chief Financial Officer, does not expect that our disclosure controls and procedures and our internal controls will prevent all error and all fraud. A control system, no matter how well designed and operated, can only provide reasonable assurances that the objectives of the control system are met. The design of a control system reflects resource constraints; the benefits of controls must be considered relative to their costs. Because there are inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been or will be detected. As these inherent limitations are known features of the financial reporting process, it is possible to design into the process safeguards to reduce, though not eliminate, these risks. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns occur because of simple error or mistake. Controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events. While our disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives, there can be no assurance that any design will succeed in achieving its stated goals under all future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with the policies or procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

We intend to review and evaluate the design and effectiveness of our disclosure controls and procedures on an ongoing basis and to improve our controls and procedures over time and to correct any deficiencies that we may discover in the future. While our Chief Executive Officer and Chief Financial Officer have concluded that, as of July 4, 2009, the design of our disclosure controls and procedures, as defined in Rule 13a-15(e) under the Exchange Act, was effective, future events affecting our business may cause us to significantly modify our disclosure controls and procedures.

PART II. OTHER INFORMATION

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this Quarterly Report, you should carefully consider the factors discussed in Part I, Item 1A. Risk Factors in our 2008 Annual Report and Part II, Item 1A. Risk Factors in our Q1 2009 Quarterly Report, which could materially affect our business, financial condition or future results. The risks described in our 2008 Annual Report and Q1 2009 Quarterly Report are not the only risks facing us. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

ITEM 2: UNREGISTERED SALE OF EQUITY SECURITIES AND USE OF PROCEEDS

There were no unregistered sales of our equity securities during the three months ended July 4, 2009.

The following table sets forth certain information about our common stock repurchased during the three months ended July 4, 2009:

	Total number of shares purchased (2)	Average price paid per share	Total number of shares purchased under publicly announced programs (1)	Approximate value of shares authorized to be purchased under publicly announced programs
	(in thousands, except per share data)			
April 5, 2009 through May 2, 2009	1.5	$ 27.29		$
May 3, 2009 through May 30, 2009	1.8	29.13		
May 31, 2009 through July 4, 2009	1.3	26.05		
Total	4.6	$ 27.63		$

(1) Our share repurchase programs, which authorized us to repurchase up to a total of $130 million of our common shares, were announced on February 11, 2004 as a $25 million program, on

May 12, 2004 as a $60 million program, on July 29, 2004 as a $25 million program and on February 2, 2006 as a $20 million program. These programs authorize us to acquire shares in the open market or in privately negotiated transactions and do not have an expiration date. No shares were repurchased under these programs during the three months ended July 4, 2009. As July 4, 2009, we have $10.1 million remaining under our share repurchase programs.

(2) Shares purchased that were not part of our publicly announced repurchase programs represent the surrender value of shares of restricted stock used to pay income taxes due upon vesting, and do not reduce the dollar value that

may yet be
purchased under
our publicly
announced
repurchase
programs.

Table of Contents

ITEM 4: SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

The annual meeting of shareholders was held on May 13, 2009. The following items were voted upon and approved at the meeting:

1. To elect the following directors to serve for the ensuing year until their successors are elected:

	Number of Votes	
	For	**Withheld**
Gerhard F. Burbach	49,505,450	2,189,631
J. Daniel Cole	50,487,808	1,207,273
Steven H. Collis	50,981,069	714,012
Neil F. Dimick	47,462,953	4,232,128
Elisha W. Finney	50,985,139	709,942
D. Keith Grossman	25,317,885	26,377,196
Paul A. LaViolette	50,601,637	1,093,444
Daniel M. Mulvena	50,490,992	1,204,089

2. To ratify of the appointment of Deloitte & Touche LLP as the Company s independent auditors for its fiscal year ending January 2, 2010:

	Number of Votes
For	51,060,271
Against	605,963
Abstain	28,847
